Example (2). P, a partnership, operates a rental apartment building for low-income tenants in City Y. Under Y's laws relating to the operation of low-income housing, P is required to maintain a reserve fund to pay for the maintenance and repair of the building. P invests the reserve fund in short-term interest-bearing deposits. Because P's interest income from the investment of the reserve fund is not interest income described in paragraph (c)(3)(ii) of this section, such income is not treated as derived in the ordinary course of a trade or business. Accordingly, P's interest income from the deposits is portfolio income (within the meaning of paragraph (c)(3)(i) of this section).

Example (3). (i) B is a partner in a partnership that is engaged in an activity involving the conduct of a trade or business of dealing in securities. On February 1, the partnership acquires certain securities for investment (within the meaning of section 163(d)). On February 2, before recognizing any income with respect to the securities, the partnership determines that it would be advisable to hold the securities primarily for sale to customers and subsequently sells them to customers in the ordinary course of its business.

(ii) Under paragraph (c)(3)(iii)(A) of this section, income or gain from any security (including any security acquired pursuant to an investment of working capital) held by a dealer for investment at any time before such income or gain is recognized is not treated for purposes of paragraph (c)(3)(i) of this section as derived by the dealer in the ordinary course of its trade or business of dealing in securities. Accordingly, B's distributive share of the partnership's interest, dividends, or gains from the securities acquired by the partnership for investment on February 1 is portfolio income of B, notwithstanding that such securities were held by the partnership, subsequent to February 1, primarily for sale to customers in the ordinary course of the partnership's trade or business of dealing in securities.

Example (4). C is a partner in a partnership that is engaged in an activity of trading or dealing in royalty interests in mineral properties. The partnership derives royalty income from royalty interests held in the activity. If the activity is a trade or business activity, C's distributive share of the partnership's royalty income from such royalty interests is treated under paragraph (c)(3)(ii)(D) of this section as derived in the ordinary course of the partnership's trade or business.

Example (5). (i) D, a calendar year individual, is a partner in a calendar year partnership that is engaged in an activity of developing and marketing a design for a system that reduces air pollution in office buildings. D has a 10 percent distributive share of all items of partnership income, gain, loss, deduction, and credit. In 1987, the partnership acquired the rights to the design for $100,000. In 1987, 1988, and 1989, the partnership incurs expenditures with respect to the development and marketing of the design, and derives gross royalties from licensing the design, in the amounts set forth in the table below. The expenditures incurred in 1987 and 1988 are currently deductible expenses. The expenditures incurred in 1989 are capitalized and may be deducted only in subsequent taxable years.

Year	Gross royalties	Expenditures	Cumulative capital expenditures
1987	$20,000	$8,000	$100,000
1988	20,000	12,000	100,000
1989	60,000	15,000	115,000
1990	120,000	0	115,000

(ii) Under paragraph (c)(3)(iii)(B)(3) of this section, the determination of whether royalties from intangible property are derived in the ordinary course of a trade or business of a partnership is made by applying the rules of paragraph (c)(3)(iii)(B) of this section to the partnership rather than the partners. The expenditures reasonably incurred by the partnership in 1987 with respect to the development or marketing of the design ($8,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design ($20,000). In addition, the sum of such expenditures incurred in 1987 and all prior taxable years ($8,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such taxable years with respect to the design ($100,000). Accordingly, for 1987, the partnership is not treated under paragraph (c)(3)(iii)(B)(2)(ii) of this section as performing substantial services or incurring substantial costs with respect to the development or marketing of the design. Therefore, unless all of the facts and circumstances indicate that the partnership performed substantial services or incurred substantial costs with respect to the development or marketing of the design, D's distributive share of the partnership's royalty income for 1987 is portfolio income.

(iii) As of the end of 1988, the sum of the expenditures reasonably incurred by the partnership during such taxable year and all prior taxable years with respect to the development or marketing of the design ($20,000) does not exceed 25 percent of the aggregate capital expenditures made by the partnership in all such years with respect to the design ($100,000). However, the amount of such expenditures incurred by the partnership in 1988 ($12,000) exceeds 50 percent of the partnership's gross royalties for such year from licensing the design ($20,000). Accordingly, for 1988, under paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income for 1988 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(iv) The expenditures reasonably incurred by the partnership in 1989 with respect to the development or marketing of the design ($15,000) do not exceed 50 percent of the partnership's gross royalties for such year from licensing the design ($60,000). However, the sum of such expenditures incurred by the partnership in 1989 and all prior taxable years ($35,000) exceeds 25 percent of the partnership's aggregate capital expenditures made in all such years with respect to the design ($115,000). Accordingly, for 1989, under paragraph (c)(3)(iii)(B)(2)(ii)(b) of this section, the partnership is treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design, and D's distributive share of the partnership's royalty income in 1989 is considered for purposes of paragraph (c)(3)(i) of this section to be derived in the ordinary course of a trade or business and therefore is not portfolio income.

(v) The result for 1990 is the same as for 1989, notwithstanding that the partnership incurs no expenditures in 1990 with respect to the development or marketing of the design.

Example (6). The facts are the same as in example (5), except that, for 1987, D's distributive share of the partnership's development and marketing costs is 15 percent, while D's distributive share of the partnership's gross royalties is 10 percent. Although D's distributive share of the expenditures reasonably incurred by the partnership during 1987 with respect to the development and marketing of the design ($1,200) is more than 50 percent of D's distributive share of the partnership's gross royalties from licensing the design ($2,000), D is not treated as performing substantial services or incurring substantial costs with respect to the development or marketing of the design for 1987 under paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section. This is because, under paragraph (c)(3)(iii)(B)(3) of this section, the determination of whether the royalties are derived in the ordinary course of a trade or business is made by applying paragraph (c)(3)(iii)(B) of this section to the partnership, and not to D.

(4) Items of personal service income specifically excluded—(i) In general. Passive activity gross income does not include compensation paid to or on behalf of an individual for personal services performed or to be performed by such individual at any time. For purposes of this paragraph (c)(4), compensation for personal services includes only—

(A) Earned income (within the meaning of section 911(d)(2)(A)), including gross income from a payment described in paragraph (e)(2) of this section that represents compensation for the performance of services by a partner;

(B) Amounts includible in gross income under section 83;

(C) Amounts includible in gross income under sections 402 and 403;

(D) Amounts (other than amounts described in paragraph (c)(4)(i)(C) of this section) paid pursuant to retirement, pension, and other arrangements for deferred compensation for services;

(E) Social security benefits (within the meaning of section 86(d)) includible in gross income under section 86; and

(F) Other income identified by the Commissioner as income derived by the taxpayer from personal services;

provided, however, that no portion of a partner's distributive share of partnership income (within the meaning of section 704(b)) or a shareholder's pro rata share of income from an S corporation (within the meaning of section 1377(a)) shall be treated as compensation for personal services.

(ii) Example. The following example illustrates the application of this paragraph (c)(4):

Example. C owns 50 percent of the stock of X, an S corporation. X owns rental real estate, which it manages. X pays C a salary for services performed by C on behalf of X in

connection with the management of X's rental properties. Under this paragraph (c)(4), although C's pro rata share of X's gross rental income is passive activity gross income (even if the salary paid to C is less than the fair market value of C's services), the salary paid to C does not constitute passive activity gross income.

(5) Income from section 481 adjustment—(i) In general. If a change in accounting method results in a positive section 481 adjustment with respect to an activity, a ratable portion (within the meaning of paragraph (c)(5)(iii) of this section) of the amount taken into account for a taxable year as a net positive section 481 adjustment by reason of such change shall be treated as gross income from the activity for such taxable year, and such gross income shall be treated as passive activity gross income if and only if such activity is a passive activity for the year of the change (within the meaning of section 481(a)).

(ii) Positive section 481 adjustments. For purposes of applying this paragraph (c)(5)—

(A) The term "net positive section 481 adjustment" means the increase (if any) in taxable income taken into account under section 481(a) to prevent amounts from being duplicated or omitted by reason of a change in accounting method; and

(B) The term "positive section 481 adjustment with respect to an activity" means the increase (if any) in taxable income that would be taken into account under section 481(a) to prevent only the duplication or omission of amounts from such activity by reason of the change in accounting method.

(iii) Ratable portion. The ratable portion of the amount taken into account as a net positive section 481 adjustment for a taxable year by reason of a change in accounting method is determined with respect to an activity by multiplying such amount by the fraction obtained by dividing—

(A) The positive section 481 adjustment with respect to the activity; by

(B) The sum of the positive section 481 adjustments with respect to all of the activities of the taxpayer.

(6) Gross income from certain oil or gas properties—(i) In general. Notwithstanding any other provision of the regulations under section 469, passive activity gross income for any taxable year does not include an amount of the taxpayer's gross income for such year from—

(A) An oil or gas property, if any loss from a working interest in such property for any prior taxable year beginning after December 31, 1986, was treated by the taxpayer, solely by reason of § 1.469-1T(e)(4) (relating to a special rule for losses from oil and gas working interests), and not by reason of the taxpayer's material participation in the activity, as a loss that is not from a passive activity; or

(B) Any property the basis of which is determined in whole or in part by reference to the basis of property described in paragraph(c)(6)(i)(A) of this section;

equal to the taxpayer's net income from such property for the taxable year. The preceding sentence applies without regard to whether the taxpayer's interest in the property is held through an entity that limits the taxpayer's liability (within the meaning of § 1.469-1T(e)(4)(v)).

(ii) Net income from the property. For purposes of this paragraph (c)(6), the taxpayer's net income for the taxable year from any property described in paragraph (c)(6)(i) of this section is the amount, if any, by which the taxpayer's gross income from such property exceeds the taxpayer's deductions for such taxable year (including any deduction treated as a deduction for such year under § 1.469-1T(f)(4)) that are reasonable allocable to such property.

(iii) Property. For purposes of paragraph (c)(6)(i)(A) of this section, the term "property" does not have the meaning given such term by section 614(a) or the regulations thereunder, but means any property the value of which is directly enhanced by any drilling, logging, seismic testing, or other activities any part of the costs of which were borne by the taxpayer as a result of holding the working interest described in such paragraph (c)(6)(i)(A).

(iv) Examples. The following examples illustrate the application of this (c)(6):

Example (1). A is a general partner in partnership P and a limited partner in partnership R. P and R own oil and gas working interests in two separate tracts of land acquired from two separate landowners. In 1987, P drills a well on its tract, and A's distributive share of P's losses from drilling the well are treated under § 1.469-1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, P develops information indicating that the reservoir in which the well was drilled underlies R's tract as well as P's. Under these facts, P's and R's tracts are treated as one property for purposes of this paragraph (c)(6), even if A's interests in the mineral deposits in the tracts are treated as separate properties under section 614(a). Accordingly, in 1988 and subsequent years, A's distributive share of both P's and R's income and expenses from their respective tracts is taken into account in computing A's net income from the property for purposes of this paragraph (c)(6).

Example (2). B is a general partner in partnership S. S owns an oil and gas working interest in a single tract of land. In

1987, S drills a well, and B's distributive share of S's losses from drilling the well is treated under § 1.469-1T(e)(4) as not from a passive activity. In the course of drilling the well, S discovers two oil-bearing formations, one underlying the other. On December 1, 1987, S completes the well in the underlying formation. On January 1, 1988, B converts B's entire general partnership interest in S into a limited partnership interest. In 1988, S completes in, and commences production from, the shallow formation. Under these facts, the two mineral deposits in S's tract are treated as one property for purposes of this paragraph (c)(6), even if they are treated as separate properties under section, 614 (a). Accordingly, B's distributive share of S's income and expenses from both the underlying formation and from recompletion in and production from the shallow formation is taken into account in computing B's net income from the property for purposes of this paragraph (c)(6).

Example (3). C is a general partner in partnership T and a limited partner in partnership U. T and U both own oil and gas working interests in tracts of land in County X. In 1987, T drills a well, and C's distributive share of T's losses from drilling the well is treated under § 1.469-1T(e)(4) as not from a passive activity. In the course of selecting the drilling site and drilling the well, T develops information indicating a significant probability that substantial oil and gas reserves underlie most portions of County X. As a result, the value of all oil and gas properties in County X is enhanced. The information developed by T does not, however, indicate that the reservoir in which T's well is drilled underlies U's tract. Under these facts, T's and U's tracts are not treated as one property for purposes of this paragraph (c)(6), because the value of U's tract is not directly enhanced by T's activities.

(7) Other items specifically excluded. Notwithstanding any other provision of the regulations under section 469, passive activity gross income does not include the following:

(i) Gross income of an individual from intangible property, such as a patent, copyright, or literary, musical, or artistic composition, if the taxpayer's personal efforts significantly contributed to the creation of such property;

(ii) Gross income from a qualified low-income housing project (within the meaning of section 502 of the Tax Reform Act of 1986) for any taxable year in the relief period (within the meaning of section 502(b) of such Act;

(iii) Gross income attributable to a refund of any state, local, or foreign income, war profits, or excess profits tax;

(iv) Gross income of an individual from a covenant by such individual not to compete; and

(v) Gross income that is treated as not from a passive activity under any provision of the regulations under section 469, including but not limited to § 1.469-1T(h)(6) (relating to income from intercompany transactions of members of an affiliated group of corporations filing a consolidated return) and paragraph (f) of this section (relating to recharacterized passive income).

(d) Passive activity deductions—(1) In general. Except as otherwise provided in section 469 and the regulations thereunder, a deduction is a passive activity deduction for a taxable year if and only if such deduction—

(i) Arises (within the meaning of paragraph (d)(8) of this section) in connection with the conduct of an activity that is a passive activity for the taxable year; or

(ii) Is treated as a deduction from an activity under § 1.469-1T(f)(4) for the taxable year.

The following example illustrates the application of this paragraph (d)(1):

Example. (i) In 1987, A, a calendar year individual, acquires a partnership interest in R, a calendar year partnership. R's only activity is a trade or business activity in which A materially participates for 1987. R incurs a loss in 1987. A's distributive share of R's 1987 loss is $1,000. However, A's basis in the partnership interest at the end of 1987 (without regard to A's distributive share of partnership loss) is $600; accordingly, section 704(d) disallows any deduction in 1987 for $400 of A's distributive share of R's loss. The remainder of A's distributive share of R's loss would be allowed as a deduction for 1987 if taxable income for all taxable years were determined without regard to sections 469 and 1211. See paragraph (d)(8) of this section.

(ii) A does not materially participate in R's activity for 1988. In 1988, R again incurs a loss, and A's distributive share of the loss is again $1,000. At the end of 1988, A's basis in the partnership interest (without regard to A's distributive share of partnership loss) is $2,000; accordingly, in 1988 section 704(d) does not limit A's deduction for either A's $1,000 distributive share of R's 1988 loss or the $400 loss carried over from 1987 under the second sentence of section 704(d). These losses would be allowed as a deduction for 1988 if taxable income for all taxable years were determined without regard to sections 469 and 1211. See paragraph (d)(8) of this section.

(iii) Under these facts, only $400 of A's distributive share of R's deductions from the activity are disallowed under section 704(d) in 1987. A's remaining deductions from the activity are treated as deductions that arise in connection with the activity for 1987 under paragraph (d)(8) of this section. Because A materially participates in the activity for 1987, the activity is not a passive activity (within the meaning of § 1.469-1T(e)(1)) of A for such year. Accordingly, the deductions that are not disallowed in 1987 are not passive activity deductions.

(iv) A does not materially participate in R's activity for 1988. Accordingly, the activity is a passive activity of A for such year. No portion of A's distributive share of R's deductions from the activity is disallowed under section 704(d) in 1988. Accordingly, A's distributive share of R's deductions for 1988 and the $400 of deductions carried over from 1987 are both treated under paragraph (d)(8) of this section as deductions that arise in 1988. Since the activity is a passive activity for 1988, such deductions are passive activity deductions.

(2) Exceptions. Passive activity deductions do not include—

(i) A deduction for an item of expense (other than interest) that is clearly and directly allocable (within the meaning of paragraph (d)(4) of this

section) to portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(ii) A deduction allowed under section 243, 244, or 245 with respect to any dividend that is not included in passive activity gross income;

(iii) Interest expense (other than interest expense described in paragraph (d)(3) of this section);

(iv) A deduction for a loss from the disposition of property of a type that produces portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(v) A deduction that, under section 469(g) and § 1.469-6T (relating to the allowance of passive activity losses upon certain dispositions of interests in passive activities), is treated as a deduction that is not a passive activity deduction;

(vi) A deduction for any state, local, or foreign income, war profits, or excess profits tax;

(vii) A miscellaneous itemized deduction (within the meaning of section 67(b)) that is subject to disallowance in whole or in part under section 67(a) (without regard to whether any amount of such deduction is disallowed under section 67);

(viii) A deduction allowed under section 170 for a charitable contribution;

(ix) An item of loss or deduction that is carried to the taxable year under section 172(a), section 1212(a)(1)(B) (in the case of corporations), or section 1212(b) (in the case of taxpayers other than corporations); and

(x) An item of loss or deduction that would have been allowed for a taxable year beginning before January 1, 1987, but for section 704(d), 1366, or 465.

(3) Interest expense. Except as otherwise provided in the regulations under section 469, interest expense is taken into account as a passive activity deduction if and only if such interest expense—

(i) Is allocated under § 1.163-8T to a passive activity expenditure (within the meaning of § 1.163-8T(b)(4)); and

(ii) Is not—

(A) Qualified residence interest (within the meaning of § 1.163-10T); or

(B) Capitalized pursuant to a capitalization provision (within the meaning of § 1.163-8T(m)(7)(i)).

(4) Clearly and directly allocable expenses. For purposes of section 469 and the regulations thereunder, an expense (other than interest expense) is clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)(i) of this section) if and only if such expense is incurred as a result of, or incident to, an activity in which such gross income is derived or in connection with property from which such gross income is derived. For example, general and administrative expenses and compensation paid to officers attributable to the performance of services that do not directly benefit or are not incurred by reason of a particular activity or particular property are not clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)(i) of this section).

(5) Treatment of loss from disposition—(i) In general. Except as otherwise provided in the regulations under section 469—

(A) Any loss recognized in any year upon the sale, exchange, or other disposition (a "disposition") of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation and any deduction allowed on account of the abandonment or worthlessness of such an interest is treated as a deduction from such activity; and

(B) Any such deduction is a passive activity deduction if and only if the activity is a passive activity of the taxpayer for the taxable year of the disposition (or other event giving rise to the deduction).

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition. In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities in the manner described in paragraph (c)(2)(ii) of this section.

(iii) Other applicable rules—(A) Interest in property. For purposes of this paragraph (d)(5), a taxpayer's interests in property used in an activity and the amounts allocated to such interests shall be determined under paragraph (c)(2)(i)(C) of this section.

(B) Dispositions of partnership interests and S corporation stock. A partnership interest or S corporation stock is not property used in an activity for purposes of this paragraph (d)(5). See paragraph (e)(3) of this section for rules treating

the loss recognized upon the disposition of a partnership interest or S corporation stock as loss from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(6) Coordination with other limitations on deductions that apply before section 469—(i) In general. An item of deduction from a passive activity that is disallowed for a taxable year under section 704(d), 1366(d), or 465 is not a passive activity deduction for the taxable year. Paragraphs (d)(6) (ii) and (iii) of this section provide rules for determining the extent to which items of deduction from a passive activity are disallowed for a taxable year under sections 704(d), 1366(d), and 465.

(ii) Proration of deductions disallowed under basis limitations—(A) Deductions disallowed under section 704(d). If any amount of a partner's distributive share of a partnership's loss for the taxable year is disallowed under section 704(d), a ratable portion of the partner's distributive share of each item of deduction or loss of the partnership is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(1) The amount of the partner's distributive share of partnership loss that is disallowed for the taxable year; by

(2) The sum of the partner's distributive shares of all items of deduction and loss of the partnership for the taxable year.

(B) Deductions disallowed under section 1366(d). If any amount of an S corporation shareholder's pro rata share of an S corporation's loss for the taxable year is disallowed under section 1366(d), a ratable portion of the taxpayer's pro rata share of each item of deduction or loss of the S corporation is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(1) The amount of the shareholder's pro rata share of S corporation loss that is disallowed for the taxable year; by

(2) The sum of the shareholder's pro rata shares of all items of deduction and loss of the corporation for the taxable year.

(iii) Proration of deductions disallowed under at-risk limitation. If any amount of the taxpayer's loss from an activity (within the meaning of section 465(c)) is disallowed under section 465 for the taxable year, a ratable portion of each item of deduction or loss from the activity is disallowed for the taxable year. For purposes of the preceding sentence, the ratable portion of an item of deduction or loss is the amount of such item multiplied by the fraction obtained by dividing—

(1) The amount of the loss from the activity that is disallowed for the taxable year; by

(2) The sum of all deductions from the activity for the taxable year.

(iv) Coordination of basis and at-risk limitations. The portion of any item of deduction or loss that is disallowed for the taxable year under section 704(d) or 1366(d) is not taken into account for the taxable year in determining the loss from an activity (within the meaning of section 465(c)) for purposes of applying section 465.

(v) Separately identified items of deduction and loss. In identifying the items of deduction and loss from an activity that are not disallowed under sections 704(d), 1366(d), and 465 (and that therefore may be treated as passive activity deductions), the taxpayer need not account separately for any item of deduction or loss unless such item may, if separately taken into account, result in an income tax liability different from that which would result were such item of deduction or loss taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702-1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Items of deduction or loss that must be accounted for separately include (but are not limited to) items of deduction or loss that—

(A) Are attributable to separate activities (within the meaning of the rules to be contained in § 1.469-4T);

(B) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer activity participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(C) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(D) Arose in a taxable year beginning before 1987 and were not allowed for such taxable year under section 704(d), 1366(d), or 465(a)(2);

(E) Are taken into account under section 1211 (relating to the limitation on capital losses) or section 1231 (relating to property used in a trade or business and involuntary conversions); or

(F) Are attributable to pre-enactment interests in activities (within the meaning of § 1.469-11T(c)).

(7) Deductions from section 481 adjustment—(i) In general. If a change in accounting method results in a negative section 481 adjustment with respect to an activity, a ratable portion (within the meaning of paragraph (d)(7)(iii) of this section) of the amount taken into account for a taxable year as a net negative section 481 adjustment by reason of such change shall be treated as a deduction from the activity for such taxable year, and such deduction shall be treated as a passive activity deduction if and only if such activity is a passive activity for the year of the change (within the meaning of section 481(a)). See the rules to be contained in § 1.469-1T(k) for the treatment of passive activity deductions from an activity in taxable years in which the activity is a former passive activity.

(ii) Negative section 481 adjustments. For purposes of applying this paragraph (d)(7)—

(A) The term "net negative section 481 adjustment" means the decrease (if any) in taxable income taken into account under section 481(a) to prevent amounts from being duplicated or omitted by reason of a change in accounting method; and

(B) The term "negative section 481 adjustment with respect to an activity" means the decrease (if any) in taxable income that would be taken into account under section 481(a) to prevent only the duplication or omission of amounts from such activity by reason of the change in accounting method.

(iii) Ratable portion. The ratable portion of the amount taken into account as a net negative section 481 adjustments for a taxable year by reason of a change in accounting method is determined with respect to an activity by multiplying such amount by the fraction obtained by dividing—

(A) The negative section 481 adjustment with respect to the activity; by

(B) The sum of the negative section 481 adjustments with respect to all of the activities of the taxpayer.

(8) Taxable year in which item arises. For purposes of this paragraph (d), an item of deduction arises in the taxable year in which such item would be allowable as a deduction under the taxpayer's method of accounting if taxable income for all taxable years were determined without regard to sections 469 and 1211.

(e) Special rules for partners and S corporation shareholders—(1) In general. For purposes of section 469 and the regulations thereunder, the character (as an item of passive activity gross income or passive activity deduction) of each item of gross income and deduction allocated to a taxpayer from a partnership or S corporation (a "passthrough entity") shall be determined, in any case in which participation is relevant, by reference to the participation of the taxpayer in the activity (or activities) that generated such item. Such participation is determined for the taxable year of the passthrough entity (and not the taxable year of the taxpayer). The following example illustrates the application of this paragraph (e)(1):

Example. A, a calendar year individual, is a partner in a partnership that has a taxable year ending January 31. During its taxable year ending on January 31, 1988, the partnership engages in a single trade or business activity. For the period from February 1, 1987, through January 31, 1988, A does not materially participate in this activity. In A's calendar year 1988 return, A's distributive share of the partnership's gross income and deductions from the activity must be treated as passive activity gross income and passive activity deductions, without regard to A's participation in the activity from February 1, 1988, through December 31, 1988. See also § 1.469-11T(a)(4) (relating to the effective date of, and transition rules under, section 469 and the regulations thereunder).

(2) Payments under sections 707(a), 707(c), and 736(b). Items of gross income and deduction attributable to a transaction described in section 707(a), 707(c), or 736(b) shall be characterized for purposes of section 469 and the regulations thereunder in accordance with the following rules:

(i) Section 707(a). Any item of gross income or deduction attributable to a transaction that is treated under section 707(a) as a transaction between a partnership and a partner acting in a capacity other than as a member of such partnership shall be characterized for purposes of section 469 and the regulations thereunder in a manner that is consistent with the treatment of such transaction under section 707(a).

(ii) Section 707(c)—(A) In general. Except as provided in paragraph(e)(2)(ii)(B) of this section, any payment to a partner for services or the use of capital that is described in section 707(c) (including any payment described in section 736(a)(2)

(relating to guaranteed payments made in liquidation of the interest of a retiring or deceased partner)) shall be characterized as the payment of compensation for services or as the payment of interest, respectively, and not as a distributive share of partnership income.

(B) Exception. (1) If section 736(a)(2) applies to a payment made in liquidation of a retiring or deceased partner's interest, any income that—

(i) Is taken into account by a retiring partner (or any other person that owns (directly or indirectly) an interest in such partner if such partner is a passthrough entity) or a deceased partner's successor in interest as a result of such payment; and

(ii) Is attributable to the portion (if any) of such payment that is allocable to the unrealized receivables (within the meaning of section 751(c)) and goodwill of an activity of the partnership; shall be treated as passive activity gross income if and only if the activity was a passive activity of such retiring or deceased partner (or such other person) for the taxable year of such retiring or deceased partner (or such other person) in which the liquidation of such partner's interest commenced.

(2) If section 736(a)(2) applies to a payment made in liquidation of a retiring or deceased partner's interest, the portion (if any) of such payment that is allocable to the unrealized receivables (within the meaning of section 751(c)) and goodwill of an activity of the partnership is determined, for purposes of this paragraph (e)(2)(ii)(B), by multiplying the amount of such payment by the fraction obtained by dividing—

(i) The amount to be paid under section 736(a)(2) in liquidation of such partner's interest in the unrealized receivables and goodwill of such activity of the partnership; by

(ii) The sum of all payments to be made under section 736(a)(2) in liquidation of such partner's interest.

(iii) Section 736(b). If any gain or loss is taken into account by a retiring partner (or any other person that owns (directly or indirectly) an interest in such partner if such partner is a passthrough entity) or a deceased partner's successor in interest as a result of a payment to which section 736(b) (relating to payments made in exchange for a retiring or deceased partner's interest in partnership property) applies, such gain or loss shall be treated as passive activity gross income or a passive activity deduction only to the extent that such gain or loss would have been passive activity gross income or a passive activity deduction of such retiring or deceased partner (or such other person) if it had been recognized at the time the liquidation of such partner's interest commenced.

(3) Sale or exchange of interest in passthrough entity—(i) Application of this paragraph (e)(3). In the case of the sale, exchange, or other disposition (a "disposition") of an interest in a passthrough entity, the amount of the seller's gain or loss from each activity in which such entity has an interest is determined, for purposes of section 469 and the regulations thereunder, under this paragraph (e)(3). In the case of any such disposition, except as otherwise provided in paragraph (e)(3)(iii) or (iv) of this section, paragraph (e)(3)(ii) of this section shall apply. See paragraphs (c)(2) and (d)(5) of this section for rules for determining the character of gain or loss, respectively, recognized upon a disposition of an interest in an activity held through a passthrough entity.

(ii) General rule—(A) Allocation among activities. Except as otherwise provided in this paragraph (e)(3)(ii) or in paragraph (e)(3) (iii) or (iv) of this section, if a holder of an interest in a passthrough entity disposes of such interest, a ratable portion (within the meaning of paragraph (e)(3)(ii)(B) of this section) of any gain or loss from such disposition shall be treated as gain or loss from the disposition of an interest in each trade or business, rental, or investment activity in which such passthrough entity owns an interest on the applicable valuation date.

(B) Ratable portion—(1) Dispositions on which gain is recognized. The ratable portion of any gain from the disposition of an interest in a passthrough entity that is allocable to an activity described in paragraph (e)(3)(ii)(A) of this section is determined by multiplying the amount of such gain by the fraction obtained by dividing—

(i) The amount of net gain (within the meaning of paragraph (e)(3)(ii)(E)(3) of this section) that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date; by

(ii) The sum of the amounts of net gain that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in each appreciated activity (within the meaning of paragraph (e)(3)(ii)(E)(1) of this section) described in paragraph (e)(3)(ii)(A) of this section for the fair mar-

ket value of each such activity on the applicable valuation date.

(2) Dispositions on which loss is recognized. The ratable portion of any loss from the disposition of an interest in a passthrough entity that is allocable to an activity described in paragraph (e)(3)(ii)(A) of this section is determined by multiplying the amount of such loss by the fraction obtained by dividing—

(i) The amount of net loss (within the meaning of paragraph (e)(3)(ii)(E)(4) of this section) that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date; by

(ii) The sum of the amounts of net loss that would have been allocated to the holder of such interest with respect thereto if the passthrough entity had sold its entire interest in each depreciated activity (within the meaning of paragraph (e)(3)(ii)(E)(2) of this section) described in paragraph (e)(3)(ii)(A) of this section for the fair market value of each such activity on the applicable valuation date.

(C) Default rule. If the gain or loss recognized upon the disposition of an interest in a passthrough entity cannot be allocated under paragraph (e)(3)(ii)(A) of this section, such gain or loss shall be allocated among the activities described in paragraph (e)(3)(ii)(A) of this section in proportion to the respective fair market values of the passthrough entity's interests in such activities at the applicable valuation date, and the gain or loss allocated to each activity of the passthrough entity shall be treated as gain or loss from the disposition of an interest in such activity.

(D) Special rules. For purposes of this paragraph (e)(3)(ii), the following rules shall apply:

(1) Applicable valuation date—(i) In general. Except as otherwise provided in paragraph (e)(3)(ii)(D)(1)(ii) of this section, the applicable valuation date with respect to any disposition of an interest in a passthrough entity is whichever one of the following dates is selected by the passthrough entity:

(a) The beginning of the taxable year of the passthrough entity in which such disposition occurs; or

(b) The date on which such disposition occurs.

(ii) Exception. If, after the beginning of a passthrough entity's taxable year in which a holder's disposition of an interest in such passthrough entity occurs and before the time of such disposition—

(a) The passthrough entity disposes of more than 10 percent of its interest (by value as of the beginning of such taxable year) in any activity;

(b) More than 10 percent of the property (by value as of the beginning of such taxable year) used in any activity of the passthrough entity is disposed of; or

(c) The holder of such interest contributes to the passthrough entity substantially appreciated property or substantially depreciated property with a total fair market value or adjusted basis, respectively, which exceeds 10 percent of the total fair market value of the holder's interest in the passthrough entity as of the beginning of such taxable year;

then the applicable valuation date shall be the date immediately preceding the date on which such disposition occurs.

(2) Basis adjustments. Any adjustment to the basis of partnership property under section 743(b) made with respect to the holder of an interest in a partnership shall be taken into account in computing the net gain or net loss that would have been allocated to the holder with respect to such interest if the partnership had sold its entire interest in an activity.

(3) Tiered passthrough entities. In the case of a disposition of an interest in a passthrough entity (the "subsidiary passthrough entity") by a holder that is also a passthrough entity, any gain or loss from such disposition that is taken into account by any person that owns (directly or indirectly) an interest in such holder shall be allocated among the activities of the subsidiary passthrough entity by applying the rules of this paragraph (e)(3)(ii) to the person taking such gain or loss into account as if such person has been the holder of an interest in such subsidiary passthrough entity and had recognized such gain or loss as a result of a disposition of such interest.

(E) Meaning of certain terms. For purposes of this paragraph (e)(3)(ii)—

(1) An activity is an appreciated activity with respect to a holder that has disposed of an interest in a passthrough entity if a net gain would have been allocated to the holder with respect to such interest if the passthrough entity has sold its entire interest in such activity for its fair market value on the applicable valuation date;

(2) An activity is a depreciated activity with respect to a holder that has disposed of an interest in a passthrough entity if a net loss would have been allocated to the holder with respect to such interest if the passthrough entity had sold its entire interest in such activity for its fair market value on the applicable valuation date;

(3) The term "net gain" means, with respect to the sale of a passthrough entity's entire interest in an activity, the amount by which the gains from the sale of all of the property used by (or representing the interest of) the passthrough entity in such activity exceed the losses (if any) from such sale;

(4) The term "net loss" means, with respect to the sale of a passthrough entity's entire interest in an activity, the amount by which the losses from the sale of all of the property used by (or representing the interest of) the passthrough entity in such activity exceed the gains (if any) from such sale.

(iii) Treatment of gain allocated to certain passive activities as not from a passive activity. If, in the case of a disposition of an interest in a passthrough entity—

(A) An amount of gain recognized on account of such disposition by the holder of such interest (or any other person that owns (directly or indirectly) an interest in such holder if such holder is a passthrough entity) is allocated to a passive activity of such holder (or such other person) under paragraph (e)(3)(ii) of this section;

(B) An amount of gain that would have been treated as gain that is not from a passive activity under paragraph (c)(2)(iii) of this section (relating to substantially appreciated property formerly used in a nonpassive activity) would have been allocated to such holder (or such other person) with respect to such interest if all of the property used in such passive activity had been sold immediately prior to the disposition for its fair market value on the applicable valuation date (within the meaning of paragraph (e)(3)(ii)(D)(1) of this section; and

(C) The amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(B) of this section exceeds 10 percent of the amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(A) of this section;

then the gain of the holder (or such other person) that is described in paragraph (e)(3)(iii)(A) of this section shall be treated as gain that is not from a passive activity to the extent that such gain does not exceed the amount of the gain of the holder (or such other person) described in paragraph (e)(3)(iii)(B) of this section. For purposes of applying the preceding sentence to the disposition of an interest in a partnership, the amount of gain that would have been allocated to the holder (or such other person) if all of the property used in an activity had been sold shall be determined by taking into account any adjustment to the basis of partnership property made with respect to such holder (or such other person) under section 743(b).

(iv) Dispositions occurring in taxable years beginning before February 19, 1988—(A) In general. Except as otherwise provided in this paragraph (e)(3)(iv), if the holder of an interest in a passthrough entity sells, exchanges, or otherwise disposes of all or part of such interest during a taxable year of such entity beginning prior to February 19, 1988, any gain or loss recognized from such disposition shall be allocated among the activities of the passthrough entity under any reasonable method selected by the passthrough entity, and the gain or loss allocated to each activity of the passthrough entity shall be treated as gain or loss from the disposition of an interest in such activity. For purposes of the preceding sentence, a reasonable method shall include the method prescribed by paragraph (e)(3)(ii) of this section. In addition, a method that allocates gain or loss among the passthrough entity's activities on the basis of the fair market value, cost, or adjusted basis of the property used in such activities shall generally be considered a reasonable method for purposes of this paragraph (e)(3)(iv).

(B) Exceptions. This paragraph (e)(3)(iv) shall not apply to any disposition of an interest in a passthrough entity occurring after February 19, 1988, if after such date, but before the holder's disposition of such interest, the holder (or any other person that owns (directly or indirectly) an interest in such holder if such holder is a passthrough entity) contributes to the passthrough entity substantially appreciated portfolio assets or any other substantially appreciated property that was used in any trade or business activity (within the meaning of § 1.469-1T(e)) of the holder (or such other person) during—

(1) The taxable year of such person in which such contribution occurs; or

(2) The immediately preceding taxable year of such person;

but only if such person materially participated (within the meaning of § 1.469-5T) in the activity for such year.

(v) **Treatment of portfolio assets.** For purposes of the paragraph (e)(3), all portfolio assets owned by a passthrough entity shall be treated as held in a single investment activity.

(vi) **Definitions.** For purposes of this paragraph (e)(3)—

(A) The term "portfolio asset" means any property of a type that produces portfolio income (within the meaning of paragraph (c)(3)(i) of this section);

(B) The term "substantially appreciated property" means property with a fair market value that exceeds 120 percent of its adjusted basis; and

(C) The term "substantially depreciated property" means property with an adjusted basis that exceeds 120 percent of its fair market value.

(vii) **Examples.** The following examples illustrate the application of this paragraph (e)(3):

Example (1). (i) A owns a one-half interest in P, a calendar year partnership. In 1993, A sells 50 percent of such interest for $50,000. A's adjusted basis for the interest sold is $30,000. Thus, A recognizes $20,000 of gain from the sale. P is engaged in three trade or business activities, X, Y, and Z, and owns marketable securities that are portfolio assets. For 1993, A materially participates in activity Z, but does not participate in activities X and Y. Paragraph (c)(2)(iii) of this section would not have applied to any of the gain that A would have been allocated if, immediately before A's sale, P had disposed of all of the property used in its trade or business activities. During the portion of 1993 preceding A's sale, P did not sell any of the property used in its activities, and A did not contribute any property to P.

(ii) Under paragraph (e)(3)(ii) of this section, a ratable portion of A's $20,000 gain is allocated to each appreciated activity in which P owned an interest on the applicable valuation date (within the meaning of paragraph (e)(3)(ii)(D)(*1*) of this section). For this purpose, paragraph (e)(3)(v) of this section treats the marketable securities owned by P as a single investment activity.

(iii) P selects the beginning of 1993 as the applicable valuation date pursuant to paragraph (e)(3)(ii)(D)(*1*)(i) of this section. P is not required to use the date of A's sale as the applicable valuation date under paragraph (e)(3)(ii)(D)(*1*)(ii) of this section because during the portion of 1993 preceding A's sale, P did not sell any of its property and A did not contribute any property to P. At the beginning of 1993, the fair market value and adjusted basis of the property used in P's activities are as follows:

	Adjusted basis	Fair market value
X	$68,000	$48,000
Y	30,000	62,000
Z	20,000	80,000
Marketable securities	2,000	10,000
Total	120,000	200,000

(iv) Under paragraph (e)(3)(ii)(B) of this section, the portion of A's $20,000 gain that is allocated to an appreciated activity of P (i.e., activities Y and Z and the marketable securities) is the amount of such gain multiplied by the fraction obtained by dividing (a) the net gain that would have been allocated to A with respect to the interest sold by A if P had sold its entire interest in such activity at the beginning of 1993 by (b) the sum of the amounts of net gain that would have been allocated to A with respect to the interest sold by A if P had sold its entire interest in each appreciated activity at the beginning of 1993.

(v) If P had sold its entire interest in activities Y and Z and the marketable securities at the beginning of 1993, A would have been allocated the following amounts of net gain with respect to the interest in P that A sold in 1993:

Activity	Net gain
Y	$8,000
Z	15,000
Marketable securities	2,000
Total	25,000

(vi) Accordingly, under paragraph (e)(3)(ii) of this section, $6,400 of A's $20,000 gain ($20,000 × $8,000/$25,000) is allocated to activity Y, $12,000 of A's $20,000 gain ($20,000 × $15,000/$25,000) is allocated to activity Z, and $1,600 of A's $20,000 gain ($20,000 × $2,000/$25,000) is allocated to the marketable securities. The gain allocated to activity Y is passive activity gross income. None of that gain is treated as gain that is not from a passive activity under paragraph (e)(3)(iii) of this section because paragraph (c)(2)(iii) of this section would not have applied to any of the gain that A would have been allocated if P had sold all of the property used in activity Y immediately prior to A's sale.

Example (2). (i) B and C, calendar year individuals, are equal partners in calendar year partnership R, which they formed on January 1, 2005, with contributions of property and money. The only item of property (other than money) contributed by B was a building that B had used for 12 years preceding the contribution in an activity that was not a passive activity during such period. At the time of its contribution, the building had an adjusted basis of $40,000 and a fair market value of $66,000. R is engaged in a single activity: the sale of equipment to customers in the ordinary course of the business of dealing in such property. R uses the building contributed by B in the dealership activity. B did not materially participate in the dealership activity during 2005. On July 1, 2005, D purchases one-half of B's interest in R for $37,500 in cash. At the time of the sale, the balance sheet of R, which uses the accrual method of accounting, is as follows:

	Adjusted basis per books	Fair market value
Assets		
Cash	$30,000	$30,000
Accounts receivable:		
Dealership	20,000	18,000
Inventory:		
Dealership	52,000	66,000
Building	40,000	66,000
Total	142,000	180,000
Liabilities and Capital		
Liabilities	$30,000	$30,000

	Adjusted basis per books	Fair market value
Capital:		
B	47,000	75,000
C	65,000	75,000
Total	142,000	180,000

Thus, B's gain from the sale is $14,000 ($45,000 amount realized from the sale (consisting of $37,500 of cash and $7,500 of liabilities assumed by the purchaser) minus B's $31,000 adjusted basis for the interest sold (one-half of B's total adjusted basis of $62,000)).

(ii) Under paragraph (e)(3)(ii) of this section, all $14,000 of B's gain from the sale is allocated to R's dealership activity, which is a passive activity of B for 2005. If, however, R had sold its interest in the building immediately prior to B's sale for its fair market value on the applicable valuation date (the valuation date selected by R is irrelevant since the building had a fair market value of $66,000 at the beginning of 2005 and at the time of the sale), B would have been allocated $13,000 of gain under section 704(c) with respect to the interest in R that B sold to D. This gain would have been treated as gain that is not from a passive activity under paragraph (c)(2)(iii) of this section and would have exceeded 10 percent of the total amount of B's gain that is allocated to the dealership activity under paragraph (e)(3)(ii) of this section. Accordingly, under paragraph (e)(3)(iii) of this section, B's gain from the sale ($14,000) is treated as gain that is not from a passive activity to the extent that such gain does not exceed the amount of gain subject to paragraph (c)(2)(iii) of this section that B would have been allocated with respect to the interest sold to D if R had sold all of the property used in the dealership activity immediately prior to B's sale ($13,000). Thus, $13,000 of B's gain from the sale is treated as gain that is not from a passive activity.

(f) Recharacterization of passive income in certain situations—(1) In general. This paragraph (f) sets forth rules that require income from certain passive activities to be treated as income that is not from a passive activity (regardless of whether such income is treated as passive activity gross income under section 469 or any other provision of the regulations thereunder). For definitions of certain terms used in this paragraph (f), see paragraph (f)(9) of this section.

(2) Special rule for significant participation—(i) In general. An amount of the taxpayer's gross income from each significant participation passive activity for the taxable year equal to a ratable portion of the taxpayer's net passive income from such activity for the taxable year shall be treated as not from a passive activity if the taxpayer's passive activity gross income from all significant participation passive activities for the taxable year (determined without regard to paragraphs (f) (2) through (4) of this section) exceeds the taxpayer's passive activity deductions from all such activities for such year. For purposes of this paragraph (f)(2), the ratable portion of the net passive income from an activity is determined by multiplying the amount of such income by the fraction obtained by dividing—

(A) The amount of the excess described in the preceding sentence; by

(B) The amount of the excess described in the preceding sentence taking into account only significant participation passive activities from which the taxpayer has net passive income for the taxable year.

(ii) Significant participation passive activity. For purposes of this paragraph (f)(2), the term "significant participation passive activity" means any trade or business activity (within the meaning of § 1.469-1T(e)(2)) in which the taxpayer significantly participates (within the meaning of § 1.469-5T(c)(2)) for the taxable year but in which the taxpayer does not materially participate (within the meaning of § 1.469-5T) for such year.

(iii) Example. The following example illustrates the application of this paragraph (f)(2):

Example. (i) A owns interests in three trade or business activities, X, Y, and Z. A does not materially participate in any of these activities for the taxable year, but participates in activity X for 110 hours, in activity Y for 160 hours, and in activity Z for 125 hours. A owns no interest in any other trade or business activity in which A does not materially participate for the taxable year but in which A participates for more than 100 hours during the taxable year. A's net passive income (or loss) for the taxable year from activities X, Y, and Z is as follows:

	X	Y	Z
Passive activity gross income	$600	$700	$900
Passive activity deductions	(200)	(1,000)	(300)
Net passive income	400	(300)	600

(ii) Under paragraph (f)(2)(ii) of this section, activities X, Y, and Z are A's only significant participation passive activities for the taxable year. A's passive activity gross income from significant participation passive activities ($2,200) exceeds A's passive activity deductions from significant participation passive activities ($1,500) by $700 for such year. Therefore, under paragraph (f)(2)(i) of this section, a ratable portion of A's gross income from activities X and Z (A's significant participation passive activities with net passive income for the taxable year) is treated as gross income that is not from a passive activity. The ratable portion is determined by dividing (a) the amount by which A's passive activity gross income from significant participation passive activities exceeds A's passive activity deductions from significant participation passive activities for the taxable year ($700) by (b) such excess taking into account only A's significant participation passive activities having net passive income for the taxable year ($1,000). Accordingly, $280 of gross income from activity X ($400 x 700/1000) and $420 of gross income from activity Z ($600 x 700/1000) is treated as gross income that is not from a passive activity.

(3) Rental of nondepreciable property. If less than 30 percent of the unadjusted basis of the

property used or held for use by customers in a rental activity (within the meaning of § 1.469-1T(e)(3)) during the taxable year is subject to the allowance for depreciation under section 167, an amount of the taxpayer's gross income from the activity equal to the taxpayer's net passive income from the activity shall be treated as not from a passive activity. For purposes of this paragraph (f)(3), the term "unadjusted basis" means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis. The following example illustrates the application of this paragraph (f)(3):

Example. C is a limited partner in a partnership. The partnership acquires vacant land for $300,000, constructs improvements on the land at a cost of $100,000, and leases the land and improvements to a tenant. The partnership then sells the land and improvements for $600,000, thereby realizing a gain on the disposition. The unadjusted basis of the improvements ($100,000) equals 25 percent of the unadjusted basis of all property ($400,000) used in the rental activity. Therefore, under this paragraph (f)(3), an amount of C's gross income from the activity equal to the net passive income from the activity (which is computed by taking into account the gain from the disposition, including gain allocable to the improvements) is treated as not from a passive activity.

(4) Net interest income from passive equity-financed lending activity—(i) In general. An amount of the taxpayer's gross income for the taxable year from any equity-financed lending activity equal to the lesser of—

(A) The taxpayer's equity-financed interest income from the activity for such year; and

(B) The taxpayer's net passive income from the activity for such year

shall be treated as not from a passive activity.

(ii) Equity-financed lending activity—(A) In general. For purposes of this paragraph (f)(4), an activity is an equity-financed lending activity for a taxable year if—

(*1*) The activity involves a trade or business of lending money; and

(*2*) The average outstanding balance of the liabilities incurred in the activity for the taxable year does not exceed 80 percent of the average outstanding balance of the interest-bearing assets held in the activity for such year.

(B) Certain liabilities not taken into account. For purposes of paragraph (f)(4)(ii)(A)(*2*) of this section, liabilities incurred principally for the purpose of increasing the percentage described in paragraph (f)(4)(ii)(A)(*2*) of this section shall not be taken into account in computing such percentage.

(iii) Equity-financed interest income. For purposes of this paragraph (f)(4), the taxpayer's equity-financed interest income from an activity for a taxable year is the amount of the taxpayer's net interest income from the activity for such year multiplied by the fraction obtained by dividing—

(A) The excess of the average outstanding balance for such year of the interest-bearing assets held in the activity over the average outstanding balance for such year of the liabilities incurred in the activity; by

(B) The average outstanding balance for such year of the interest-bearing assets held in the activity.

(iv) Net interest income. For purposes of this paragraph (f)(4), the net interest income from an activity for a taxable year is—

(A) The gross interest income from the activity for such year; reduced by

(B) Expenses from the activity (other than interest on liabilities described in paragraph (f)(4)(vi) of this section) for such year that are reasonably allocable to such gross interest income.

(v) Interest-bearing assets. For purposes of this paragraph (f)(4), the interest-bearing assets held in an activity include all assets that produce interest income, including loans to customers.

(vi) Liabilities incurred in the activity. For purposes of this paragraph (f)(4), liabilities incurred in an activity include all fixed and determinable liabilities incurred in the activity that bear interest or are issued with original issue discount other than debts secured by tangible property used in the activity. In the case of an activity conducted by an entity in which the taxpayer owns a interest, liabilities incurred in an activity include only liabilities with respect to which the entity is the borrower.

(vii) Average outstanding balance. For purposes of this paragraph (f)(4), the average outstanding balance of liabilities incurred in an activity or of the interest-bearing assets held in an activity may be computed on a daily, monthly, or quarterly basis at the option of the taxpayer.

(viii) Example. The following example illustrates the application of this paragraph (f)(4):

Example: (i) A, a calendar year individual, acquires on January 1, 1988, a limited partnership interest in P, a calendar year partnership. Under the partnership agreement, A has a one percent share of each item of income, gain, loss, deduction, and credit of P. A acquires the partnership interest for $90,000, using $50,000 of unborrowed funds and $40,000 of proceeds of

a loan bearing interest at an annual rate of 10 percent. A pays $4,000 of interest on the loan in 1988.

(ii) P's sole activity is a trade or business of lending money. A does not materially participate in the activity for 1988. During 1988, the average outstanding balance of P's interest-bearing assets (including loans to customers, temporary deposits with other lending institutions, and government and corporate securities) is $20 million. P incurs numerous interest-bearing liabilities in connection with its lending activity, including liabilities for deposits taken from customers, unsecured short-term and long-term loans from other lending institutions, and a mortgage loan secured by the building, owned by P, in which P conducts its business. For 1988, the average outstanding balance of all of these liabilities (other than the mortgage loan) is $11 million. None of these liabilities was incurred by P principally for the purpose of increasing the percentage described in paragraph (f)(4)(ii)(A)(2) of this section.

(iii) The interest income derived by P for 1988 from its interest-bearing assets is $2.2 million. The interest expense paid by P for 1988 with respect to the liabilities incurred in connection with its lending activity (other than the mortgage loan) is $990,000. P's other expenses for 1988 that are reasonably allocable to P's gross interest income (including expenses for advertising, loan processing and servicing, and insurance, and depreciation on P's building) total $250,000. P's interest expense for 1988 on the mortgage loan secured by the building used in P's lending activity is $50,000. All of the interest expense paid or incurred by P for 1988 is allocated under § 1.63-8T to expenditures in connection with P's lending activity.

(iv) Under paragraph (f)(4)(ii) of this section, P's activity is an equity-financed lending activity for 1988, since, for 1988, the activity involves a trade or business of lending money and the average outstanding balance of the liabilities incurred in the activity ($11 million) does not exceed 80 percent of the average outstanding balance of the interest-bearing assets held in the activity ($20 million). Accordingly, under paragraph (f)(4)(i) of this section, an amount of A's gross income from the activity equal to the lesser of (a) A's equity-financed interest income from the activity for 1988, or (b) A's net passive income from the activity for 1988, is treated as income that is not from a passive activity.

(v) Under paragraph (f)(4)(iii) of this section, A's equity-financed interest income from the activity for 1988 is determined by multiplying A's net interest income from the activity for 1988 by the fraction obtained by dividing $9 million (the excess of the average interest-bearing assets for 1988 over the average interest-bearing liabilities for 1988) by $20 million (the average interest-bearing assets for 1988). Under paragraph (f)(4)(iv) of this section, A's net interest income from the activity for 1988 is $19,000 (A's distributive share of $2.2 million of gross interest income less A's distributive share of $300,000 of expenses described in paragraph (f)(4)(iv)(B) of this section, including interest expense on the mortgage loan). A's distributive share of P's other interest expense ($990,000) is not taken into account in computing A's net interest income for 1988. Accordingly, A's equity-financed interest income from the activity for 1988 is $8,550 ($19,000 x $9 million/$20 million).

(vi) Under paragraph (f)(9)(i) of this section, A's net passive income from the activity for 1988 is determined by taking into account A's distributive share of P's gross income and deductions from the activity for 1988, as well as any interest expense incurred by A individually that is taken into account under § 1.163-8T in determining A's income or loss from the activity for 1988. Assuming that for 1988 all $4,000 of interest expense on the loan that A used to finance the acquisition of A's interest in P is allocated under § 1.163-8T to expenditures of A in connection with the lending activity for 1988, A's net passive income from the activity for 1988 is $5,100, computed as set forth in the following table:

Gross income:	
Interest income	$22,000
Deductions:	
Distributive share of P's expenses from the activity	(12,900)
Interest expense on A's acquisition debt	(4,000)
Net passive income	5,100

(vii) A's net passive income from the activity for 1988 ($5,100) is less than A's equity-financed income from the activity for 1988 ($8,550). Accordingly, under this paragraph (f)(4), $5,100 of A's gross income from the activity for 1988 is treated as not from a passive activity.

(5) Net income from certain property rented incidental to development activity—(i) In general. An amount of the taxpayer's gross rental activity income for the taxable year from an item of property used in a rental activity for such year equal to the net rental activity income for the year from such item of property shall be treated as not from a passive activity if—

(A) Any gain from the sale, exchange, or other disposition of the item of property is included in the taxpayer's income for the taxable year;

(B) The use of the item of property in an activity involving the rental of such property commenced less than 24 months before the date of the disposition (within the meaning of paragraph (c)(2)(iii)(B) of this section) of such property; and

(C) The taxpayer materially participated (within the meaning of § 1.469-5T, but without regard to paragraph (e) thereof) or significantly participated (within the meaning of § 1.469-5T(c)(2)) for any taxable year in an activity that involved for such year the performance of services for the purpose of enhancing the value of such item of property (or any other item of property if the basis of the item of property that is sold, exchanged, or otherwise disposed of is determined in whole or in part by reference to the basis of such other item of property).

(ii) Commencement of use. For purposes of paragraph (f)(5)(i)(B) of this section, the use cf an item of property in an activity involving the rental of such property commences when substantially all of the property is first held out for rent and is in a state of readiness for rental.

(iii) Services performed for the purpose of enhancing the value of property. For purposes of paragraph (f)(5)(i)(C) of this section, services that are treated as performed for the purpose of enhancing the value of an item of property include but are not limited to—

(A) Construction;

(B) Renovation; and

(C) Lease-up (but only if, as of the time the taxpayer commences using the property in the activity described in paragraph (f)(5)(i)(B), a substantial portion of the property is not leased).

(iv) Example. The following example illustrates the application of this paragraph (f)(5):

Example. (i) A, a calendar year individual, is a partner in calendar year partnership P, which is engaged in an activity of developing commercial real estate. In 1988, P acquires an interest in undeveloped land, and arranges for the financing and construction of an office building on the land. Beginning on March 1, 1990, substantially all of the building is held out for rent and is in a state of readiness for rental.

(ii) P holds the building for rent for the remainder of 1990 and all of 1991 and 1992, and sells the building on January 15, 1993, pursuant to a contract entered into on January 15, 1992. P did not hold the building for sale to customers in the ordinary course of P's trade or business (see § 1.469-1T (e)(3)(vi)(D)). A's distributive share of P's taxable losses from the rental of the building is $50,000, $30,000, and $30,000, respectively, for 1990, 1991, and 1992. All of A's losses from the rental of the building are disallowed under § 1.469-1T (a)(1)(i). A's distributive share of the gain recognized by P on the sale of the building is $150,000. A has no other gross income or deductions from the activity of renting the building.

(iii) For purposes of paragraph (f)(5)(i)(C), in 1988, 1989, and 1990, P's real estate development activity involves the performance of services for the purpose of enhancing the value of the building. In 1993, the building is sold, and the date on which the use of the building in the rental activity commenced (March 1, 1990) was less then 24 months before the date on which a binding contract for such sale was entered into (January 15, 1992). Accordingly, if A materially participated in P's real estate development activity in 1988, 1989, or 1990 (without regard to whether A materially participated in the activity in more than one of those years), an amount of A's gross rental activity income for 1993 from the building equal to A's net rental activity income for 1993 from such building ($150,000—$110,000 of previously disallowed deductions = $40,000) is treated under this paragraph (f)(5) as gross income that is not from a passive activity.

(6) Property rented to a nonpassive activity. An amount of the taxpayer's gross rental activity income for the taxable year from an item of property used in a rental activity for such year equal to the net rental activity income for the year from such item of property shall be treated as not from a passive activity if such property—

(i) Is rented for use in a trade or business activity (within the meaning of § 1.469-1T (e)(2)) in which the taxpayer materially participates (within the meaning of § 1.469-5T, but without regard to paragraph (e) thereof) for the taxable year; and

(ii) Is not described in paragraph (f)(5) of this section.

(7) Special rules applicable to the acquisition of an interest in a passthrough entity engaged in the trade or business of licensing intangible property—**(i) In general.** If a taxpayer acquires an interest in an entity described in paragraph (c)(3)(iii)(B)(3) of this section (the "development entity") after the development entity has created an item of intangible property or performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property, an amount of the taxpayer's gross royalty income for the taxable year from such item of property equal to the taxpayer's net royalty income for the year from such item of property shall be treated as not from a passive activity.

(ii) Royalty income from property. For purposes of this paragraph (f)(7)—

(A) A taxpayer's gross royalty income for a taxable year from an item of property is the taxpayer's share of passive activity gross income for such year (determined without regard to paragraphs (f)(2) through (7) of this section) from the licensing or transfer of any right in such property; and

(B) A taxpayer's net royalty income for a taxable year from an item of property is the excess, if any, of—

(1) The taxpayer's gross royalty income for the taxable year from such item of property; over

(2) Any passive activity deductions for such taxable year (including any deduction treated as a deduction for such year under § 1.469-1T (f)(4)) that are reasonably allocable to such item of property.

(iii) Exceptions. Paragraph (f)(7)(i) of this section shall not apply to a taxpayer's gross royalty income for a taxable year from the licensing of an item of intangible property if—

(A) The expenditures reasonably incurred by the development entity for the taxable year of the entity ending with or within the taxpayer's taxable year with respect to the development or marketing of such property satisfy paragraph (c)(3)(iii)(B)(2)(ii) (a) of this section; or

(B) The taxpayer's share of the expenditures reasonably incurred by the development entity with respect to the development or marketing of such property for all taxable years of the entity beginning with the taxable year of the entity in which the taxpayer acquired the interest in the entity and ending with the taxable year of the entity ending with or within the taxpayer's current taxable year exceeds 25 percent of the fair market value of the taxpayer's interest in such property at

the time the taxpayer acquired the interest in the entity.

(iv) Capital expenditures. For purposes of paragraph (f)(7)(iii)(B) of this section, a capital expenditure shall be taken into account for the taxable year of the entity in which such expenditure is chargeable to capital account, and the taxpayer's share of such expenditure shall be determined as though such expenditure were allowed as a deduction for such year.

(v) Example. The following example illustrates the application of this paragraph (f)(7):

Example. (i) The facts are the same as in example (5) in paragraph (c)(3)(iv) of this section, except that, in 1988, D's 10 percent partnership interest is sold to F for $13,000, all of which is attributable to the design licensed by the partnership.

(ii) For 1988, the expenditures reasonably incurred by the partnership with respect to the development or marketing of the design satisfy paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section. Accordingly, under paragraph (f)(7)(iii)(A) of this section, paragraph (f)(7)(i) of this section does not apply to F's distributive share of the partnership's gross income from licensing the design.

(iii) For 1989, the expenditures reasonably incurred by the partnership with respect to the development or marketing of the design do not satisfy paragraph (c)(3)(iii)(B)(2)(ii)(a) of this section. Moreover, F's distributive share of such expenditures reasonably incurred by the partnership for 1988 and 1989 ($27,000 x .10 = $2,700) does not exceed 25 percent of the fair market value of F's interest in the design at the time F acquired the partnership interest ($13,000). Accordingly, neither of the exceptions provided in paragraph (f)(7)(iii) of this section applies for 1989 and, under paragraph (f)(7)(i) of this section, an amount of F's gross royalty income from the design equal to F's net royalty income from the design is treated as not from a passive activity.

(8) Limitation on recharacterized income. The amount of gross income from an activity that is treated as not from a passive activity for the taxable year under subparagraphs (f) (2) through (4) of this paragraph (f) shall not exceed the greatest amount of gross income treated as not from a passive activity under any one of such subparagraphs.

(9) Meaning of certain terms. For purposes of this paragraph (f), the terms set forth below shall have the following meanings:

(i) The net passive income from an activity for a taxable year is the amount by which the taxpayer's passive activity gross income from the activity for the taxable year (determined without regard to paragraphs (f) (2) through (4) of this section) exceeds the taxpayer's passive activity deductions from the activity for such year;

(ii) The net passive loss from an activity for a taxable year is the amount by which the taxpayer's passive activity deductions from the activity for the taxable year exceeds the taxpayer's passive activity gross income from the activity for such year (determined without regard to paragraphs (f) (2) through (4) of this section).

(iii) The gross rental activity income for a taxable year from an item of property used in a rental activity for such year is any passive activity gross income for such year (determined without regard to paragraphs (f) (2) through (6) of this section) from the rental or disposition of such item of property; and

(iv) The net rental activity income from an item of property for a taxable year is the excess, if any, of—

(A) The gross rental activity income from such item of property for the taxable year; over

(B) Any passive activity deductions for such taxable year (including any deduction treated as a deduction for such year under § 1.469-1T(f)(4)) that are reasonably allocable to the use of such item of property in the rental activity.

(10) Coordination with section 163(d). Gross income that is treated as not from a passive activity under paragraph (f) (3), (4), or (7) of this section shall be treated as income described in section 469 (e)(1)(A) and paragraph (c)(3)(i) of this section except in determining whether—

(i) Any property is treated for purposes of section 469(e)(1)(A)(ii)(I) and paragraph (c)(3)(i)(C) of this section as property that produces income of a type described in paragraph (c)(3)(i)(A) of this section;

(ii) An expense (other than interest expense) is treated for purposes of section 469(e)(1)(A)(i)(II) and paragraph (d)(4) of this section as clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)(i) of this section); and

(iii) Interest expense is allocated under § 1.163-8T to an investment expenditure (within the meaning of § 1.163-8T(b)(3)) or to a passive activity expenditure (within the meaning of § 1.163-8T(b)(4)).

(11) Effective date. For the effective date of the rules in this paragraph (f), see § 1.469-11T (relating to effective date and transition rules).

[T.D. 8175, 53 FR 5711, Feb. 25, 1988; 53 FR 15494, April 29, 1988]

§ 1.469–3T Passive activity credit (temporary).

(a) Computation of passive activity credit. The taxpayer's passive activity credit for the taxable year is the amount (if any) by which—

(1) The sum of all of the taxpayer's credits that are subject to section 469 for such year; exceeds

(2) The taxpayer's regular tax liability allocable to all passive activities for such year.

(b) Credits subject to section 469—(1) In general. Except as otherwise provided in this paragraph (b), a credit is subject to section 469 for a taxable year if and only if—

(i) Such credit—

(A) Is attributable to such taxable year and arises in connection with the conduct of an activity that is a passive activity for such taxable year; and

(B) Is described in—

(*1*) Section 38(b) (1) through (5) (relating to general business credits);

(*2*) Section 27(b) (relating to corporations described in section 936);

(*3*) Section 28 (relating to clinical testing of certain drugs); or

(*4*) Section 29 (relating to fuel from nonconventional sources); or

(ii) Such credit is allocable to an activity for such taxable year under § 1.469-1T(f)(4).

(2) Treatment of credits attributable to qualified progress expenditures. Any credit attributable to an increase in qualified investment under section 46(d)(1)(A) (relating to qualified progress expenditures) with respect to progress expenditure property (as defined in section 46(d)(2)) is subject to section 469 for a taxable year if—

(i) Such credit is attributable to such taxable year;

(ii) Such credit is described in paragraph (b)(1)(i)(B) of this section; and

(iii) It is reasonable to believe that such progress expenditure property will be used in a passive activity of the taxpayer when it is placed in service.

(3) Special rule for partners and S corporation shareholders. The character of a credit of a taxpayer arising in connection with an activity conducted by a partnership or S corporation (as a credit subject to section 469) shall be determined, in any case in which participation is relevant, by reference to the participation of the taxpayer in such activity. Such participation is determined for the taxable year of the partnership or S corporation (and not the taxable year of the taxpayer). See § 1.469-2T(e)(1).

(4) Exception for pre-1987 credits. A credit is not subject to section 469 if it is attributable to a taxable year of the taxpayer beginning prior to January 1, 1987.

(c) Taxable year to which credit is attributable. A credit is attributable to the taxable year in which such credit would be (or would have been) allowed if the credits regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469.

(d) Regular tax liability allocable to passive activities—(1) In general. For purposes of paragraph (a)(2) of this section, the taxpayer's regular tax liability allocable to all passive activities for the taxable year is the excess (if any) of—

(i) The taxpayer's regular tax liability for such taxable year; over

(ii) The amount of such regular tax liability determined by reducing the taxpayer's taxable income for such year by the excess (if any) of the taxpayer's passive activity gross income for such year over the taxpayer's passive activity deductions for such year.

(2) Regular tax liability. For purposes of this section, the term "regular tax liability" has the meaning given such term in section 26(b).

(e) Coordination with section 39. For purposes of section 39 (relating to the carryback and carryforward of unused business credits), any credit described in section 38(b) (1) through (5) is treated as a current year business credit for the first taxable year in which such credit is subject to section 469 and is not disallowed by section 469 and the regulations thereunder.

(f) Examples. The following examples illustrate the application of this section:

Example (1). (i) A, a calendar year individual, is a general partner in calendar year partnership P. P purchases a building in 1987 and, in 1987, 1988, and 1989, incurs rehabilitation costs with respect to the building. The building is placed in service in the rental activity in 1989. P's rehabilitation costs are qualified rehabilitation expenditures (within the meaning of section 48(g)(2)) and are taken into account in determining the amount of the investment credit for rehabilitation expenditures. P's qualified rehabilitation expenditures are not qualified progress expenditures (within the meaning of section 46(d)).

(ii) Because, under section 46(c)(1), the credit is allowable for the taxable year in which the rehabilitated property is placed in service, the credit allowable for P's qualified rehabilitation expenditures arises in connection with the activity in which the property is placed in service. In addition, the credit is attributable to 1989, the year in which the property is placed in service, because it would be allowed for such year if A's credits allowed for all taxable years were determined without regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469. Accordingly, under paragraph (b)(1) of this section, A's distributive share of the credit is subject to section 469 for 1989 because the credit arises in connection with a rental activity for such year.

Example (2). The facts are the same as in example (1), except that the rehabilitation costs are incurred in anticipation of placing the building in service in a rental activity, the qualified rehabilitation expenditures in 1987 and 1988 are qualified progress expenditures ("QPEs") (within the meaning of section 46(d)(3)), the improvements resulting from the expenditures are progress expenditure property (within the meaning of paragraph (d)(2) of this section), and it is reasonable to expect that such property will be transition property (within the meaning of section 49(e)) when the property is placed in service. Therefore, under section 46(d)(1)(A), the qualified investment for 1987 and 1988 is increased by an amount equal to the aggregate of the applicable percentage of the qualified rehabilitation expenditures incurred in such years. The credits that are based on these expenditures are attributable (under paragraph (c) of this section) to 1987 and 1988, respectively. It is reasonable to believe in 1987 and 1988 that the progress expenditure property will be used in a rental activity when it is placed in service. Accordingly, under paragraph (b)(2) of this section, A's distributive share of the credit for 1987 and 1988 is subject to section 469. Under paragraph (b)(1) of this section (as in example (1)), A's distributive share of the credit for 1989 is also subject to section 469.

Example (3). (i) B, a single individual, acquires an interest in a partnership that, in 1988, rehabilitates a building and places it in service in a trade or business activity in which B does not materially participate. For 1988, B has the following items of gross income, deduction, and credit:

Gross income:		
Income other than passive activity gross income	$110,000	
Passive activity gross income	20,000	$130,000
Deductions:		
Deductions other than passive activity deductions	23,950	
Passive activity deductions	18,000	(41,950)
Taxable income		88,050
Credits:		
Rehabilitation credit from the passive activity		8,000

(ii) For 1988, the amount by which B's passive activity gross income exceeds B's passive activity deductions (B's net passive income) is $2,000. Under paragraph (d) of this section, B's regular tax liability allocable to passive activities for 1988 is determined as follows:

(A)	Taxable income	$88,050	
(B)	Regular tax liability		$24,578.50
(C)	Taxable income minus net passive income	86,050	
(D)	Regular tax liability for taxable income of $86,050.00		23,918.50
(E)	Regular tax liability allocable to passive activities ((B) minus (D))		$660.00

(iii) Under paragraph (a) of this section, B's passive activity credit for 1988 is the amount by which B's credits that are subject to section 469 for 1988 ($8,000) exceed B's regular tax liability allocable to passive activities for 1988 ($660.00). Accordingly, B's passive activity credit for 1988 is $7,340.

Example (4). (i) The facts are the same as in example (3) except that, in 1988, B also has additional deductions of $100,000 from a trade or business activity in which B materially participates for 1988. Thus, B has a taxable loss for 1988 of $11,950, determined as follows:

Gross income:		
Income other than passive activity gross income	$110,000	
Passive activity gross income	20,000	$130,000
Deductions:		
Deductions other than passive activity deductions	123,950	
Passive activity deductions	18,000	(141,950)
Taxable income		(11,950)

(ii) Under section 26(b) and paragraph (d)(2) of this section, the regular tax liability for a taxable year cannot exceed the tax imposed by chapter 1 of subtitle A of the Internal Revenue Code for the taxable year. Therefore, under paragraph (d)(1) of this section, B's regular tax liability allocable to passive activities for 1988 is zero. Although B's net operating loss for the taxable year is reduced by B's net passive income, and B's regular tax liability for other taxable years may increase as a result of the reduction, such an increase does not change B's regular tax liability allocable to passive activities for 1988. Accordingly, B's passive activity credit for 1988 is $8,000.

[T.D. 8175, 53 FR 5724, Feb. 25, 1988; 53 FR 15494, April 29, 1988]

§ 1.469–4T Definition of activity (temporary). [Reserved]

§ 1.469–5T Material participation (temporary).

(a) In general. Except as provided in paragraphs (e) and (h)(2) of this section, an individual shall be treated, for purposes of section 469 and the regulations thereunder, as materially participating in an activity for the taxable year if and only if—

(1) The individual participates in the activity for more than 500 hours during such year;

(2) The individual's participation in the activity for the taxable year constitutes substantially all of the participation in such activity of all individuals (including individuals who are not owners of interests in the activity) for such year;

(3) The individual participates in the activity for more than 100 hours during the taxable year, and such individual's participation in the activity for the taxable year is not less than the participation in the activity of any other individual (including

individuals who are not owners of interests in the activity) for such year;

(4) The activity is a significant participation activity (within the meaning of paragraph (c) of this section) for the taxable year, and the individual's aggregate participation in all significant participation activities during such year exceeds 500 hours;

(5) The individual materially participated in the activity (determined without regard to this paragraph (a)(5)) for any five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year;

(6) The activity is a personal service activity (within the meaning of paragraph (d) of this section), and the individual materially participated in the activity for any three taxable years (whether or not consecutive) preceding the taxable year; or

(7) Based on all of the facts and circumstances (taking into account the rules in paragraph (b) of this section), the individual participates in the activity on a regular, continuous, and substantial basis during such year.

(b) Facts and circumstances—(1) In general. [Reserved]

(2) Certain participation insufficient to constitute material participation under this paragraph (b) —(i) Participation satisfying standards not contained in section 469. Except as provided in section 469(h)(3) and paragraph (h)(2) of this section (relating to certain retired individuals and surviving spouses in the case of farming activities), the fact that an individual satisfies the requirements of any participation standard (whether or not referred to as "material participation") under any provision (including sections 1402 and 2032A and the regulations thereunder) other than section 469 and the regulations thereunder shall not be taken into account in determining whether such individual materially participates in any activity for any taxable year for purposes of section 469 and the regulations thereunder.

(ii) Certain management activities. An individual's services performed in the management of an activity shall not be taken into account in determining whether such individual is treated as materially participating in such activity for the taxable year under paragraph (a)(7) of this section unless, for such taxable year—

(A) No person (other than such individual) who performs services in connection with the management of the activity receives compensation described in section 911(d)(2)(A) in consideration for such services; and

(B) No individual performs services in connection with the management of the activity that exceed (by hours) the amount of such services performed by such individual.

(iii) Participation less than 100 hours. If an individual participates in an activity for 100 hours or less during the taxable year, such individual shall not be treated as materially participating in such activity for the taxable year under paragraph (a)(7) of this section.

(c) Significant participation activity —(1) In general. For purposes of paragraph (a)(4) of this section, an activity is a significant participation activity of an individual if and only if such activity—

(i) Is a trade or business activity (within the meaning of § 1.469-1T(e)(2)) in which the individual significantly participates for the taxable year; and

(ii) Would be an activity in which the individual does not materially participate for the taxable year if material participation for such year were determined without regard to paragraph (a)(4) of this section.

(2) Significant participation. An individual is treated as significantly participating in an activity for a taxable year if and only if the individual participates in the activity for more than 100 hours during such year.

(d) Personal service activity. An activity constitutes a personal service activity for purposes of paragraph (a)(6) of this section if such activity involves the performance of personal services in—

(A) The fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting; or

(B) Any other trade or business in which capital is not a material income-producing factor.

(e) Treatment of limited partners—(1) General rule. Except as otherwise provided in this paragraph (e), an individual shall not be treated as materially participating in any activity of a limited partnership for purposes of applying section 469 and the regulations thereunder to—

(i) The individual's share of any income, gain, loss, deduction, or credit from such activity that is attributable to a limited partnership interest in the partnership; and

(ii) Any gain or loss from such activity recognized upon a sale or exchange of such an interest.

(2) **Exceptions.** Paragraph (e)(1) of this section shall not apply to an individual's share of income, gain, loss, deduction, and credit for a taxable year from any activity in which the individual would be treated as materially participating for the taxable year under paragraph (a)(1), (5), or (6) of this section if the individual were not a limited partner for such taxable year.

(3) **Limited partnership interest—(i) In general.** Except as provided in paragraph (e)(3)(ii) of this section, for purposes of section 469(h)(2) and this paragraph (e), a partnership interest shall be treated as a limited partnership interest if—

(A) Such interest is designated a limited partnership interest in the limited partnership agreement or the certificate of limited partnership, without regard to whether the liability of the holder of such interest for obligations of the partnership is limited under the applicable State law; or

(B) The liability of the holder of such interest for obligations of the partnership is limited, under the law of the State in which the partnership is organized, to a determinable fixed amount (for example, the sum of the holder's capital contributions to the partnership and contractual obligations to make additional capital contributions to the partnership).

(ii) **Limited partner holding general partner interest.** A partnership interest of an individual shall not be treated as a limited partnership interest for the individual's taxable year if the individual is a general partner in the partnership at all times during the partnership's taxable year ending with or within the individual's taxable year (or the portion of the partnership's taxable year during which the individual (directly or indirectly) owns such limited partnership interest).

(f) **Participation—(1) In general.** Except as otherwise provided in this paragraph (f), any work done by an individual (without regard to the capacity in which the individual does such work) in connection with an activity in which the individual owns (directly or indirectly, other than through a C corporation) an interest at the time the work is done shall be treated for purposes of this section as participation of such individual in the activity.

(2) **Exceptions—(i) Certain work not customarily done by owners.** Work done in connection with an activity shall not be treated as participation in the activity for purposes of this section if—

(A) Such work is not of a type that is customarily done by an owner of such an activity; and

(B) One of the principal purposes for the performance of such work is to avoid the disallowance, under section 469 and the regulations thereunder, of any loss or credit from such activity.

(ii) **Participation as an investor—(A) In general.** Work done by an individual in the individual's capacity as an investor in an activity shall not be treated as participation in the activity for purposes of this section unless the individual is directly involved in the day-to-day management or operations of the activity.

(B) Work done in individual's capacity as an investor. For purposes of this paragraph (f)(2)(ii), work done by an individual in the individual's capacity as an investor in an activity includes—

(1) Studying and reviewing financial statements or reports on operations of the activity;

(2) Preparing or compiling summaries or analyses of the finances or operations of the activity for the individual's own use; and

(3) Monitoring the finances or operations of the activity in a non-managerial capacity.

(3) **Participation of spouse.** In the case of any person who is a married individual (within the meaning of section 7703) for the taxable year, any participation by such person's spouse in the activity during the taxable year (without regard to whether the spouse owns an interest in the activity and without regard to whether the spouses file a joint return for the taxable year) shall be treated, for purposes of applying section 469 and the regulations thereunder to such person, as participation by such person in the activity during the taxable year.

(4) **Methods of proof.** The extent of an individual's participation in an activity may be established by any reasonable means. Contemporaneous daily time reports, logs, or similar documents are not required if the extent of such participation may be established by other reasonable means. Reasonable means for purposes of this paragraph may include but are not limited to the identification of services performed over a period of time and the approximate number of hours spent performing such services during such period, based on appointment books, calendars, or narrative summaries.

(g) **Material participation of trusts and estates.** [Reserved]

(h) Miscellaneous rules—(1) Participation of corporations. For rules relating to the participation in an activity of a personal service corporation (within the meaning of § 1.468-1T(g)(2)(i)) or a closely held corporation (within the meaning of § 1.469-1T(g)(2)(ii)), see § 1.469-1T(g)(3).

(2) Treatment of certain retired farmers and surviving spouses of retired or disabled farmers. An individual shall be treated as materially participating for a taxable year in any trade or business activity of farming in paragraph (4) or (5) of section 2032A(b) would cause the requirements of section 2032A(b)(1)(C)(ii) to be met with respect to real property used in such activity had the individual died during such taxable year.

(i) [Reserved]

(j) Material participation for taxable years beginning before January 1, 1987. In any case in which it is necessary to determine whether an individual materially participated in any activity for a taxable year beginning before January 1, 1987 (other than a taxable year of a partnership, S corporation, estate, or trust ending after December 31, 1986), such determination shall be made without regard to paragraphs (a) (2) through (7) of this section.

(k) Examples. The following examples illustrate the application of this section:

Example (1). A, a calendar year individual, owns all of the stock of X, a C corporation. X is the general partner, and A is the limited partner, in P, a calendar year partnership. P has a single activity, a restaurant, which is a trade or business activity (within the meaning of § 1.469-1T(e)(2)). During the taxable year, A works for an average of 30 hours per week in connection with P's restaurant activity. Under paragraphs (a)(1) and (e)(2) of this section, A is treated as materially participating in the activity for the taxable year because A participates in the restaurant activity during such year for more than 500 hours. In addition, under § 1.469-1T(g)(3)(i), A's participation will cause X to be treated as materially participating in the restaurant activity.

Example (2). The facts are the same as in example (1), except that the partnership agreement provides that P's restaurant activity is to be managed by X, and A's work in the activity is performed pursuant to an employment contract between A and X. Under paragraph (f)(1) of this section, work done by A in connection with the activity in any capacity is treated as participation in the activity by A. Accordingly, the conclusion is the same as in example (1). The conclusion would be the same if A owned no stock in X at any time, although in that case A's participation would not be taken into account in determining whether X materially participates in the restaurant activity.

Example (3). B, an individual, is employed fulltime as a carpenter. B also owns an interest in a partnership which is engaged in a van conversion activity, which is a trade or business activity (within the meaning of § 1.469-1T(e)(2)). B and C, the other partner, are the only participants in the activity for the taxable year. The activity is conducted entirely on Saturdays. Each Saturday throughout the taxable year, B and C work for eight hours in the activity. Although B does not participate in the activity for more than 500 hours during the taxable year, under paragraph (a)(3) of this section, B is treated for such year as materially participating in the activity because B participates in the activity for more than 100 hours during the taxable year, and B's participation in the activity for such year is not less than the participation of any other person in the activity for such year.

Example (4). C, an individual, is employed full-time as an accountant. C also owns interests in a restaurant and a shoe store. The restaurant and shoe store are trade or business activities (within the meaning of § 1.469-1T(e)(2)) that are treated as separate activities under the rules to be contained in § 1.469-4T. Each activity has several full-time employees. During the taxable year, C works in the restaurant activity for 400 hours and in the shoe store activity for 150 hours. Under paragraph (c) of this section, both the restaurant and shoe store activities are significant participation activities of C for the taxable year. Accordingly, since C's aggregate participation in the restaurant and shoe store activities during the taxable year exceeds 500 hours, C is treated under paragraph (a)(4) of this section as materially participating in both activities.

Example (5). In 1990, D, an individual, acquires stock in an S corporation engaged in a trade or business activity (within the meaning of § 1.469-1T(e)(2)). For every taxable year from 1990 through 1994, D is treated as materially participating (without regard to paragraph (a)(5) of this section) in the activity. D retires from the activity at the beginning of 1995, and would not be treated as materially participating in the activity for 1995 and subsequent taxable years if material participation for such years were determined without regard to paragraph (a)(5) of this section. Under paragraph (a)(5) of this section, however, D is treated as materially participating in the activity for taxable years 1995 through 1999 because D materially participated in the activity (determined without regard to paragraph (a)(5) of this section) for five taxable years during the ten taxable years that immediately precede each of those years. D is not treated under paragraph (a)(5) of this section as materially participating in the activity for taxable years after 1999 because of such years D has not materially participated in the activity (determined without regard to paragraph (a)(5) of this section) for five of the ten immediately preceding taxable years.

Example (6). The facts are the same as in example (5), except that D does not acquire any stock in the S corporation until 1994. Under paragraph (f)(1) of this section, D is not treated as participating in the activity for any taxable year prior to 1994 because D does not own as interest in the activity for any such taxable year. Accordingly, D materially participates in the activity for only one taxable year prior to 1995, and D is not treated under paragraph (a)(5) of this section as materially participating in the activity for 1995 or subsequent taxable years.

Example (7). (i) E, a married individual filing a separate return for the taxable year, is employed full-time as an attorney. E also owns an interest in a professional football team that is a trade or business activity (within the meaning of § 1.469-1T(e)(2)). E does no work in connection with this activity. E anticipates that, for the taxable year, E's deductions from the activity will exceed E's gross income from the activity and that, if E does not materially participate in the activity for the taxable year, part or all of F's passive activity loss for the taxable year will be disallowed under § 1.469-1T(a)(1)(i). Accordingly, E pays E's spouse to work as an office receptionist in connection with the activity for an average of 15 hours per week during the taxable year.

(ii) Under paragraph (f)(3) of this section any participation in the activity by E's spouse is treated as participation in the activity by E. However, under paragraph (f)(2)(i) of this section, the work done by E's spouse is not treated as participation in the activity because work as an office receptionist is not

work of a type customarily done by an owner of a football team, and one of E's principal purposes for paying E's spouse to do this work is to avoid the disallowance under § 1.469-1T(a)(1)(i) of E's passive activity loss. Accordingly, E is not treated as participating in the activity for the taxable year.

Example (8). (i) F, an individual, owns an interest in a partnership that feeds and sells cattle. The general partner of the partnership periodically mails F a letter setting forth certain proposed actions and decisions with respect to the cattle-feeding operation. Such actions and decisions include, for example, what kind of feed to purchase, how much to purchase, and when to purchase it, how often to feed cattle, and when to sell cattle. The letters explain the proposed actions and decisions, emphasize that taking or not taking a particular action or decision is solely within the discretion of F and other partners, and ask F to indicate a decision with respect to each proposed action by answering certain questions. The general partner receives a fee that constitutes earned income (within the meaning of section 911 (d)(2)(A)) for managing the cattle-feeding operation. F is not treated as materially participating in the cattle-feeding operation under paragraph (a) (1) through (6) of this section.

(ii) F's only participation in the cattle-feeding operation is to make certain managerial decisions. Under paragraph (b)(2)(ii) of this section, such management services are not taken into account in determining whether the taxpayer is treated as materially participating in the activity for a taxable year under paragraph (a)(7) of this section, if any other person performs services in connection with the management of the activity and receives compensation described in section 911(d)(2)(A) for such services. Therefore, F is not treated as materially participating for the taxable year in the cattle-feeding operation.

[T.D. 8175, 53 FR 5725, Feb. 25, 1988; 53 FR 15494, April 29, 1988]

§ 1.469–6T Treatment of losses upon certain dispositions (temporary). [Reserved]

§ 1.469–7T Treatment of self-charged items of income and expense (temporary). [Reserved]

§ 1.469–8T Application of section 469 and the regulations thereunder to trusts, estates, and their beneficiaries (temporary). [Reserved]

§ 1.469–9T Treatment of income, deductions, and credits from certain rental real estate activities (temporary). [Reserved]

§ 1.469–10T Application of section 469 to publicly traded partnerships (temporary). [Reserved]

§ 1.469–11T Effective date and transition rules (temporary).

(a) Effective date—(1) In general. Except as provided in paragraph (a)(2) of this section, section 469 and the regulations thereunder apply for taxable years beginning after December 31, 1986.

(2) Application of certain income recharacterization rules—(i) In general. No amount of gross income shall be treated under § 1.469-2T(f)(3) through (7) as income that is not from a passive activity for any taxable year of the taxpayer beginning before January 1, 1988.

(ii) Property rented to a nonpassive activity. In applying § 1.469-2T(f)(6) to a taxpayer's rental of an item of property, the taxpayer's net rental activity income (within the meaning of § 1.469-2T(f)(9)(iv)) from such property for any taxable year beginning after December 31, 1987, shall not include the portion of such income (if any) that is attributable to the rental of such item of property pursuant to a written binding contract entered into before February 19, 1988.

(3) Qualified low-income housing projects. For a transitional rule concerning the application of section 469 to losses from qualified low-income housing projects, see section 502 of the Tax Reform Act of 1986.

(4) Effect of events occurring in years prior to 1987. The treatment for a taxable year beginning after December 31, 1986, of any item of income, gain, loss, deduction, or credit as an item of passive activity gross income, passive activity deduction, or credit from a passive activity, shall be determined as if section 469 and the regulations thereunder had been in effect for taxable years beginning before January 1, 1987, but without regard to any passive activity loss or passive activity credit that would have been disallowed for any taxable year beginning before January 1, 1987, if section 469 and the regulations thereunder had been in effect for such year. For example, in determining whether a taxpayer materially participates in an activity under § 1.469-5T(a)(5) (relating to taxpayers who have materially participated in an activity for five of the ten immediately preceding taxable years) for any taxable year beginning after December 31, 1986, the taxpayer's participation in the activity for all prior taxable years (including taxable years beginning before 1987) is taken into account. See § 1.469-5T(j) (relating to the determination of material participation for taxable years beginning before January 1, 1987).

(5) Examples. The following examples illustrate the application of this paragraph (a):

Example (1). A, a calendar year individual, is a partner in a partnership with a taxable year ending on January 31. During its taxable year ending January 31, 1987, the partnership was engaged in a single activity involving the conduct of a trade or business. In applying section 469 and the regulations thereunder to A for calendar year 1987, A's distributive share of partnership items for the partnership's taxable year ending January 31, 1987, is taken into account. Therefore, under § 1.469-2T(e)(1) and paragraph (a)(4) of this section, A's participation in the activity throughout the partnership's taxable year beginning February 1, 1986, and ending January 31, 1987, is taken into account for purposes of determining the character under section 469 of the items of gross income, deduction, and credit allocated to A for the partnership's taxable year ending January 31, 1987.

Example (2). B, a calendar year individual, is a beneficiary of a trust described in section 651 that has a taxable year ending January 31. The trust conducts a rental activity (within the meaning of § 1.469-1T(e)(3)). Because the trust's taxable year ending January 31, 1987, began before January 1, 1987, section 469 and the regulations thereunder do not apply to the trust for such year. Section 469 and the regulations thereunder do apply, however, to B for B's calendar year 1987. Therefore, income of the trust from the rental activity for the trust's taxable year ending January 31, 1987, that is included in B's gross income for 1987 is taken into account in applying section 469 to B for 1987.

(b) Transitional rule for pre-enactment loss and pre-enactment credit—(1) In general. For taxable years beginning after December 31, 1986, and before January 1, 1991, § 1.469-1T(a)(1) shall not apply to—

(i) An amount of the passive activity loss equal to the applicable percentage of the pre-enactment loss; and

(ii) An amount of the passive activity credit equal to the applicable percentage of the pre-enactment credit.

(2) Applicable percentage. For purposes of this paragraph (b), the applicable percentage of the pre-enactment loss or the pre-enactment credit for a taxable year shall be determined in accordance with the following table:

In the case of a taxable year beginning in:	The applicable percentage is:
1987	65
1988	40
1989	20
1990	10

(3) Pre-enactment loss. The pre-enactment loss for any taxable year is the lesser of—

(i) The amount of the passive activity loss that would be disallowed for the taxable year under § 1.469-1T(a)(1)(i) if this section were disregarded; and

(ii) The amount of the passive activity loss that would be disallowed for the taxable year under § 1.469-1T(a)(1)(i) if this section were disregarded and the following items were not taken into account:

(A) Any deduction treated as a deduction from an activity for the taxable year under § 1.469-1T(f)(4); and

(B) Any item from an interest (other than a pre-enactment interest) in any passive activity.

(4) Pre-enactment credit. The pre-enactment credit for any taxable year is the lesser of—

(i) The amount of the passive activity credit that would be disallowed for the taxable year under § 1.469-1T(a)(1)(ii) if this section were disregarded; and

(ii) The amount of the passive activity credit that would be disallowed for the taxable year under § 1.469-1T(a)(1)(ii) if this section were disregarded and the following items were not taken into account:

(A) Any deduction or credit treated as a deduction or credit from an activity for the taxable year under § 1.469-1T(f)(4); and

(B) Any item from an interest (other than a pre-enactment interest) in a passive activity.

(5) Examples. The following examples illustrate the application of this paragraph (b):

Example (1). A, an individual, owns interest in two passive activities, X and Y. A's interest in activity X is a pre-enactment interest (within the meaning of paragraph (c) of this section), while A's interest in activity Y is not a pre-enactment interest. For 1987 A has a $10,000 loss from activity X and $9,000 of income from activity Y. The amount determined under paragraph (b)(3)(i) of this section is $1,000. The amount determined under paragraph (b)(3)(ii) of this section is $10,000. Therefore, A's pre-enactment loss for 1987 is $1,000. Accordingly, § 1.469-1T(a)(1)(i) does not apply to $650 ($1,000 × .65) of A's $1,000 passive activity loss for 1987.

Example (2). (i) B, an individual, owns an interest in one passive activity, and B's interest in the activity is a pre-enactment interest (within the meaning of paragraph (c) of this section). For 1987 and 1988, B has the following passive activity gross income and passive activity deductions from the activity:

	1987	1988
Gross income	$20,000	$20,000
Deductions	($50,000)	($40,000)

(ii) Under § 1.469-2T(b), B's passive activity loss for 1987 is $30,000 ($50,000 of passive activity deductions minus $20,000 of passive activity gross income). Under paragraph (b)(3) of this section, B's pre-enactment loss for 1987 is $30,000. Ac-

cordingly, under paragraphs (b) (1) and (2) of this section, § 1.469-1T(a)(1)(i) does not apply to $19,500 ($30,000 × .65) of B's $30,000 passive activity loss for 1987. Under § 1.469-1T(a)(1)(i), $10,500 of B's loss for 1987 ($30,000 × .35) is disallowed. Under § 1.469-1T(f) (2) and (4), the disallowed loss is allocated among deductions from the activity, and the disallowed deductions are treated as deductions from the activity for 1988.

(iii) For 1988, B's pre-enactment loss is computed as shown in the following table:

	(b)(3)(i)	(b)(3)(ii)
Gross income	$20,000	$20,000
Current deductions	(40,000)	(40,000)
§ 1.469–1T(f)(4)	(10,500)	0
Net loss	($30,500)	($20,000)

Therefore, B's pre-enactment loss for 1988 is $20,000.

(iv) Under paragraph (b)(2) of this section, the applicable percentage for 1988 is 40 percent. Therefore, under paragraph (b)(1) of this section § 1.469-1T(a)(1)(i) does not apply to $8,000 ($20,000 × .40) of B's $30,500 passive activity loss for 1988.

Example (3). (i) C, an individual, owns interests in three passive activities, R, S, and T. C's interest in each activity is a pre-enactment interest. For 1987 and 1988, C's gross income, deductions, and net income (loss) from each of the three activities are as follows:

	R	S	T
1987:			
Gross income	$8,000	$5,000	$2,000
Deductions	(9,000)	(7,000)	(1,400)
Net income (loss)	($1,000)	($2,000)	$600
1988:			
Gross income	$7,000	$6,000	$2,000
Deductions	(8,000)	(4,500)	(3,000)
Net income (loss)	($1,000)	$1,500	($1,000)

(ii) Under § 1.469-2T(b), C's passive activity loss for 1987 is $2,400 ($17,400 of passive activity deductions less $15,000 of passive activity gross income). Under paragraph (b)(3) of this section, C's pre-enactment loss for 1987 is $2,400. Accordingly, under paragraph (b)(1) and (2) of this section, § 1.469-1T (a)(1)(i) does not apply to $1,560 ($2,400 × .65) of C's passive activity loss for 1987. Under § 1.469-1T (a)(1)(i), $840 of C's passive activity loss for 1987 ($2,400 x .35) is disallowed.

(iii) Under § 1.469-1T (f)(2)(i), since a portion of C's passive activity loss for 1987 is disallowed, a ratable portion of the loss from each of C's activities that has a loss for 1987 (activity R and activity S) is disallowed for 1987. Accordingly, $280 of the 1987 loss from activity R ($840 × $1,000/$3,000) and $560 of the 1987 loss from activity S ($840 × $2,000/$3,000) is disallowed for 1987. Under § 1.469-1T (f)(2) and (4), corresponding portions of the deductions from each activity are disallowed for 1987 and treated as deductions from activities R and S, respectively, for 1988. The deductions that are disallowed for 1987 and treated as deductions for 1988 are taken into account under paragraph (b)(3)(i) but not paragraph (b)(3)(ii) of this section. Thus, the amounts determined under paragraphs (b)(3)(i) and (b)(3)(ii) of this section for 1988 are as follows:

Activity	(b)(3)(i)	(b)(3)(ii)
R	($1,280)	($1,000)
S	940	1,500
T	(1,000)	(1,000)
Total	($1,340)	($500)

Therefore, C's pre-enactment loss for 1988 is $500.

(iv) Under paragraph (b)(2) of this section, the applicable percentage for 1988 is 40 percent. Therefore, under paragraph (b)(1) of this section, § 1.469-1T (a)(1)(i) does not apply to $200 ($500 × .40) of C's $1,340 passive activity loss for 1988.

Example (4). (i) D, an individual, has interests in three passive activities, X, Y, and Z. Activities X and Y are rental real estate activities (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in which D actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) for the taxable year. D's interest in activity X is a pre-enactment interest, and D's interest in activity Y is not a pre-enactment interest. Activity Z is not a rental real estate activity, and D's interest in activity Z is not a pre-enactment interest. The amount of income (loss) from each activity for the taxable year is as follows:

Activity	Income (loss)
X (pre-enactment rental)	($40,000)
Y (other rental)	$30,000
Z (other non-rental)	($20,000)

(ii) The amount determined under paragraph (b)(3)(ii) of this section is computed by applying section 469 to D as if D's only interests in passive activities were D's pre-enactment interests in such activities. If D's only interests in passive activities were D's pre-enactment interests in such activities, the amount to which § 1.469-1T (a)(1)(i) would not apply, by reason of section 469(i) and the rules to be contained in § 1.469-9T, would be $25,000. Taking into account all of D's interests in passive activities, the amount to which § 1.469-1T (a)(1)(i) would not apply, by reason of section 469(i) and the rules to be contained in § 1.469-9T, is $10,000. Accordingly, the amounts determined under paragraph (b)(3)(i) and (b)(3)(ii) of this section for the taxable year are as follows:

Activity	(b)(3)(i)	(b)(3)(ii)
X	($40,000)	($40,000)
Y	$30,000	
Z	($20,000)	
Subtotal	($30,000)	($40,000)
§ 469(i) allowance	$10,000	$25,000
Total	($20,000)	($15,000)

Therefore, D's pre-enactment loss for the taxable year is $15,000.

Example (5). E, an individual, has for the taxable year the following items of income, deduction, and credit from passive activities:

	Pre-enactment interests	Other interests	Total
Income (deductions)	$100	($100)	0

	R	S	T
Credits	28	28	$56

For the taxable year, E is subject to tax at a marginal rate of 28 percent. Under § 1.469-3T (d), E's regular tax liability allocable to passive activities for the taxable year is zero. If, however, the only interests in passive activities taken into account were the pre-enactment interests (i.e., if the $100 loss were disregarded), E's regular tax liability allocable to passive activities for the taxable year would be $28. Thus, the amounts determined under paragraphs (b)(4)(i) and (b)(4)(ii) of this section are as follows:

(b)(4)(i)	(b)(4)(ii)
$56	0

Therefore, E's pre-enactment credit for the taxable year is zero, and § 1.469-1T (a)(1)(ii) applies to E's $56 passive activity credit for the taxable year.

(c) Definition of pre-enactment interest—(1) General rule. Except as otherwise provided in this paragraph (c), the term "pre-enactment interest" means a qualified interest in a pre-enactment activity.

(2) Qualified interest—(i) In general. For purposes of this paragraph (c), a qualified interest in an activity is any interest in an activity that was—

(A) Held by the taxpayer on October 22, 1986, and at all times thereafter (but only if the activity existed on October 22, 1986); or

(B) Acquired by the taxpayer after October 22, 1986, directly or indirectly, pursuant to one or more written binding contracts to which the taxpayer was a party on October 22, 1986, and held by the taxpayer at all times after such acquisition.

See paragraph (c)(7) of this section for rules for determining whether a taxpayer was a party on October 22, 1986, to a written binding contract.

(ii) Stock in a C corporation. For purposes of this paragraph (c)(2), stock in a C corporation is not treated as an interest in any activity of the corporation. The following example illustrates the application of this paragraph (c)(2)(ii):

Example. On October 22, 1986, the taxpayer owned all of the stock of a C corporation that conducted a single activity. On December 31, 1986, the corporation liquidated and distributed to the taxpayer the assets used in the activity. Under this paragraph (c)(2)(ii), the taxpayer does not have a qualified interest in the corporation's activity as a result of the liquidation. The result would be the same if, on December 31, 1986, instead of liquidating, the corporation elected under section 1362(a) to be an S corporation.

(3) Pre-enactment activity—(i) In general. For purposes of this paragraph (c), an activity is a pre-enactment activity if—

(A) The activity was being conducted by any person on October 22, 1986; or

(B) At least 50 percent (by value) of the property used in the activity during the taxable year was—

(1) In existence or under construction on August 16, 1986; or

(2) Acquired or constructed by any person pursuant to a written binding contract (without regard to whether the taxpayer or any person related to the taxpayer was a party to such contract) in effect on August 16, 1986.

(ii) Character before 1987 irrelevant. For purposes of this paragraph (c), an activity may be treated as a pre-enactment activity without regard to whether such activity would have been a passive activity of the taxpayer for any taxable year beginning before January 1, 1987, had section 469 and the regulations thereunder been in effect for such year.

(4) Examples. The following examples illustrate the application of paragraphs (c) (1), (2), and (3) of this section:

Example (1). On October 22, 1986, the taxpayer owned an interest in property used as a personal residence. After October 22, 1986, the taxpayer ceased to use the property as a personal residence and began to use it in a rental activity. The rental activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section) because the property used in the rental activity was in existence on August 16, 1986. The taxpayer did not hold any interest in the rental activity on October 22, 1986, however, because the activity did not exist on that date. In addition, the taxpayer did not acquire an interest in the activity after October 22, 1986, pursuant to a written binding contract to which the taxpayer was a party on such date. Accordingly, the taxpayer's interest in the rental activity is not a qualified interest (within the meaning of paragraph (c)(2) of this section), and the taxpayer does not have a pre-enactment interest in the rental activity.

Example (2). The taxpayer owns an interest in a partnership, which owns property used in a rental activity. The taxpayer acquired the partnership interest pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986. The partnership acquired its interest in the rental property pursuant to written binding contracts to which the partnership was a party on October 22, 1986. Construction of the property used in the rental activity commenced prior to August 16, 1986. Under paragraph (c)(7)(ii) of this section, the taxpayer is treated as a party to the contracts to which the partnership was a party on October 22, 1986. Therefore, the taxpayer's interest in the partnership's rental activity is a qualified interest (within the meaning of paragraph (c)(2) of this section) because the taxpayer is treated as acquiring an interest in the partnership's rental activity pursuant to written binding contracts to which the taxpayer was party on October 22, 1986. Since the property used in the rental activity was under construction on August 16, 1986, the partnership's rental activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section). Accordingly, the taxpayer's

interest in the partnership's rental activity is a pre-enactment interest.

Example (3). The facts are the same as in example (2), except that the partnership acquired the property after October 22, 1986, pursuant to a contract entered into after October 22, 1986. The taxpayer's interest in the partnership's rental activity is not a pre-enactment interest because such interest was not acquired pursuant to written binding contracts to which the taxpayer was a party on October 22, 1986.

Example (4). The taxpayer owned a pre-enactment interest in an activity on October 22, 1986. After that date, the taxpayer died, and the decedent's interest in the activity passed to the decedent's estate. Since a decedent and the decedent's estate are not the same taxpayer, the estate must independently satisfy the requirements for a pre-enactment interest regardless of the fact that the decedent had a pre-enactment interest in the activity. Since the activity was being conducted by the decedent on October 22, 1986, the activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section). Since, however, the estate did not hold any interest in the activity on October 22, 1986, the estate does not have a qualified interest in the activity (within the meaning of paragraph (c)(2) of this section). Accordingly, the estate does not have a pre-enactment interest in the activity.

(5) Effect of changes in a taxpayer's interest in a pre-enactment activity—(i) In general. If the taxpayer's share for a taxable year of an item of income, gain, loss, deduction, or credit from a pre-enactment activity was increased or decreased at any time after October 22, 1986, and prior to the end of such taxable year (other than pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986), the share of such item that is attributable to the taxpayer's pre-enactment interest in such activity shall be determined by taking into account—

(A) The taxpayer's share for such taxable year of such item as of October 22, 1986; reduced by

(B) The greatest amount at any time subsequent to October 22, 1986, by which the sum of all the decreases in the taxpayer's share for such year of such item (other than decreases pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986) exceeds the sum of all the increases in the taxpayer's share for such year of such item (other than increases pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986).

For purposes of this paragraph (c)(5)(i), the taxpayer's share of an item as of October 22, 1986, is determined by taking into account any written binding contract to which the taxpayer was a party on October 22, 1986.

(ii) Partnership terminations under section 708(b)(1)(B). A taxpayer's share for a taxable year of an item of income, gain, loss, deduction, or credit from a pre-enactment activity conducted by a partnership shall not be treated as having increased or decreased at any time after October 22, 1986, solely because the partnership is treated as terminating at any time after such date under section 708(b)(1)(B).

(iii) Examples. The following examples illustrate the application of this paragraph (c)(5):

Example (1). On October 22, 1986, an individual owned a 10 percent interest in a pre-enactment activity. After October 22, 1986, the taxpayer acquires an additional five percent interest in the activity pursuant to a contract entered into after October 22, 1986. Under this paragraph (c)(5), only the 10 percent interest in the activity the taxpayer owned on October 22, 1986, is a pre-enactment interest.

Example (2). On October 22, 1986, individuals A and B each owned a rental activity. After October 22, 1986, A and B contribute their rental activities to a partnership in exchange for which each receives a 50 percent interest in all items of income, gain, loss, deduction, and credit of the partnership. Under paragraph (c)(5)(i) of this section, A's 50 percent interest in each partnership item attributable to the rental activity contributed by A is attributable to a pre-enactment interest. None of A's interest in the partnership items attributable to the rental activity contributed by B is attributable to a pre-enactment interest.

Example (3). The facts are the same as in example (2), except that under the partnership agreement the items of income, gain, loss, deduction, and credit attributable to the rental activity A contributed to the partnership are allocated 80 percent to A and 20 percent to B. Under paragraph (c)(5)(i) of this section, A's 80 percent interest in each partnership item attributable to the rental activity contributed by A is attributable to a pre-enactment interest.

Example (4). The facts are the same as in example (3) except that on January 1, 1988, the partnership liquidates, distributing to A the rental activity contributed by A to the partnership. Under paragraph (c)(5)(i) of this section, only 80 percent of A's interest in the rental activity distributed to A is a pre-enactment interest.

Example (5). On October 22, 1986, an individual is the general partner in a limited partnership. Under the partnership agreement in effect on that date, the taxpayer is allocated one percent of each item of partnership income, gain, loss, deduction, and credit for 1987 and 10 percent of each such item for 1988. Since the increase was provided for in a written binding contract to which the taxpayer was a party on October 22, 1986, the increase in the taxpayer's share of each item of partnership income, gain, loss, deduction, and credit is taken into account, under paragraph (c)(5)(i) of this section, as income, gain, loss, deduction, and credit from a pre-enactment interest.

Example (6). The facts are the same as in example (5) except that the partnership agreement is amended on November 30, 1986. The amendment decreases the taxpayer's share of partnership depreciation for 1987 from 10 percent to five percent, but does not affect the partner's share of partnership depreciation for any other year. Since the taxpayer's share of partnership depreciation for 1988 is not decreased by the amendment, the result, for 1988, is the same as in example (5). For 1987, however, only five percent of the partnership depreciation is attributable to the taxpayer's pre-enactment interest even if, after November 30, 1986, another amendment to the partnership agreement restores the taxpayer's 10 percent share of partnership depreciation for 1987.

Example (7). (i) A and B, calendar year individuals, own all the stock of X, a calendar year S corporation. On October 22,

1986, A and B each own 50 shares of X stock. On July 1, 1987, X issues an additional 100 shares of stock to B (but does not issue any additional stock to A). On December 1, 1987, A purchases 70 shares of X stock from B. Thus, A and B have the following shares of items of income, gain, loss, deduction, and credit from activities of X:

Period	A's share	B's share
10/22/86–6/30/87	50%	50%
7/1/87–11/30/87	25%	75%
12/1/87–	60%	40%

(ii) Under paragraph (c)(5)(i) of this section, A and B each have a 50 percent share of each item of X as of October 22, 1986. Since there are no increases or decreases in their shares before June 30, 1987, their 50 percent shares of items of X assigned to the period from January 1, 1987, through June 30, 1987, are attributable to their pre-enactment interests.

(iii) As a result of the decrease in A's share on June 30, 1987, only a 25 percent share of the items of X assigned to the period from July 1, 1987, through November 30, 1987, is attributable to A's pre-enactment interest. In addition, notwithstanding the increase in B's share, only a 50 percent share of such items (B's share as of October 22, 1986) is attributable to B's pre-enactment interest.

(iv) As a result of the decrease in B's share on November 30, 1987, only a 40 percent share of the items of X assigned to the period from December 1, 1987, through December 31, 1987, is attributable to B's pre-enactment interest. In addition, notwithstanding the increase in A's share, only a 25 percent share of such items (A's share as of October 22, 1986, reduced by the amount of the decrease in A's share on June 30, 1987) is attributable to A's pre-enactment interest.

(6) Special rule for beneficiaries of trusts or estates—(i) In general. If a beneficial interest in a trust or estate was held by a taxpayer on October 22, 1986, and at all times thereafter, any income, directly allocable deductions, and credits taken into account by the taxpayer with respect to such interest shall be treated as income, deductions, and credits, respectively, from a pre-enactment interest of the beneficiary if and only if such income, deductions, and credits are from a pre-enactment interest of the trust or estate. For purposes of the preceding sentence, "directly allocable deductions" means—

(A) Depreciation allowable to the beneficiary under section 167(h);

(B) Depletion allowable to the beneficiary under section 611(b)(3); and

(C) Amortization apportioned to the beneficiary under section 642(f).

The following example illustrates the application of this paragraph (c)(6)(i):

Example. The taxpayer is a beneficiary of a trust that conducts a rental activity. The trust's interest in the activity is a pre-enactment interest of the trust. On October 22, 1986, under the trust agreement the trustee had discretion to allocate any amount of the depreciation deductions from the rental activity to the beneficiary. Under this paragraph (c)(6)(i), any depreciation deductions from the rental activity that are allocated to the beneficiary will be treated as deductions attributable to a pre-enactment interest of the beneficiary.

(ii) Interests distributed to beneficiaries. A beneficiary of a trust or estate to whom the trust or estate distributes an interest in an activity shall be treated as having a pre-enactment interest in the activity by reason of such distribution if and only if such interest was a pre-enactment interest of the trust or estate, and the beneficiary held a beneficial interest in the trust or estate on October 22, 1986, and at all times thereafter.

(7) Written binding contract—(i) In general. A contract shall be treated as a written binding contract of a person for purposes of this section if and only if the contract is enforceable against such person under the applicable State law and does not limit damages to a specified amount (e.g., by use of a liquidated damages provision). For purposes of the preceding sentence, a contractual provision that limits damages to an amount equal to five percent or more of the total contract price is not treated as limiting damages. In general, a contract is binding upon a person even if it is subject to a condition, as long as the condition is not within the control of such person. A contract is not binding on any date with respect to a person if the contract became enforceable against such person only by reason of an assignment occurring after such date. The following example illustrates the application of this paragraph (c)(7)(i):

Example. As of October 22, 1986, the taxpayer had signed a subscription agreement to acquire an interest in a partnership. The taxpayer's obligation to purchase an interest in the partnership was contingent on other persons signing subscription agreements by a particular date after October 22, 1986, to acquire a minimum number of the total interests offered for sale. If the taxpayer acquires an interest in the partnership, such interest will be treated as acquired pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986. Although the taxpayer's obligation to acquire an interest in the partnership was subject to a contingency, the contingency was not within the taxpayer's control.

(ii) Special rule for contract of partnership or S corporation. For purposes of this section, a person shall be treated as a party to a contract on October 22, 1986, if on such date such person is a partner in a partnership or a shareholder in an S corporation (or is bound by a written contract to acquire an interest in such partnership or stock in such corporation) which itself is a party to such contract (or is treated under this paragraph (c)(7)(ii) as a party to such contract) on such date.

(iii) Application of rule to partnership agreements. A provision of a partnership agreement

shall be treated as a binding contract with respect to a partner if the requirements of this paragraph (c)(7) are otherwise satisfied and such partner does not have the power to amend any provision of the partnership agreement without the consent of other partners.

[T.D. 8175, 53 FR 5728, Feb. 25, 1988]

Inventories

§ 1.471–1 Need for inventories.

In order to reflect taxable income correctly, inventories at the beginning and end of each taxable year are necessary in every case in which the production, purchase, or sale of merchandise is an income-producing factor. The inventory should include all finished or partly finished goods and, in the case of raw materials and supplies, only those which have been acquired for sale or which will physically become a part of merchandise intended for sale, in which class fall containers, such as kegs, bottles, and cases, whether returnable or not, if title thereto will pass to the purchaser of the product to be sold therein. Merchandise should be included in the inventory only if title thereto is vested in the taxpayer. Accordingly, the seller should include in his inventory goods under contract for sale but not yet segregated and applied to the contract and goods out upon consignment, but should exclude from inventory goods sold (including containers), title to which has passed to the purchaser. A purchaser should include in inventory merchandise purchased (including containers), title to which has passed to him, although such merchandise is in transit or for other reasons has not been reduced to physical possession, but should not include goods ordered for future delivery, transfer of title to which has not yet been effected. (But see § 1.472–1.)

[T.D. 6500, 25 FR 11724, Nov. 26, 1960]

§ 1.471–2 Valuation of inventories.

(a) Section 471 provides two tests to which each inventory must conform:

(1) It must conform as nearly as may be to the best accounting practice in the trade or business, and

(2) It must clearly reflect the income.

(b) It follows, therefore, that inventory rules cannot be uniform but must give effect to trade customs which come within the scope of the best accounting practice in the particular trade or business. In order to clearly reflect income, the inventory practice of a taxpayer should be consistent from year to year, and greater weight is to be given to consistency than to any particular method of inventorying or basis of valuation so long as the method or basis used is in accord with §§ 1.471–1 through 1.471–11.

(c) The bases of valuation most commonly used by business concerns and which meet the requirements of section 471 are (1) cost and (2) cost or market, whichever is lower. (For inventories by dealers in securities, see § 1.471–5.) Any goods in an inventory which are unsalable at normal prices or unusable in the normal way because of damage, imperfections, shop wear, changes of style, odd or broken lots, or other similar causes, including second-hand goods taken in exchange, should be valued at bona fide selling prices less direct cost of disposition, whether subparagraph (1) or (2) of this paragraph is used, or if such goods consist of raw materials or partly finished goods held for use or consumption, they shall be valued upon a reasonable basis, taking into consideration the usability and the condition of the goods, but in no case shall such value be less than the scrap value. Bona fide selling price means actual offering of goods during a period ending not later than 30 days after inventory date. The burden of proof will rest upon the taxpayer to show that such exceptional goods as are valued upon such selling basis come within the classifications indicated above, and he shall maintain such records of the disposition of the goods as will enable a verification of the inventory to be made.

(d) In respect of normal goods, whichever method is adopted must be applied with reasonable consistency to the entire inventory of the taxpayer's trade or business except as to those goods inventoried under the last-in, first-out method authorized by section 472 or to animals inventoried under the elective unit, livestock-price-method authorized by § 1.471–6. See paragraph (d) of § 1.446–1 for rules permitting the use of different methods of accounting if the taxpayer has more than one trade or business. Where the taxpayer is engaged in more than one trade or business the Commissioner may require that the method of valuing inventories with respect to goods in one trade or business also be used with respect to similar goods in other trades or businesses if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essen-

tial to a clear reflection of income. Taxpayers were given an option to adopt the basis of either (1) cost or (2) cost or market, whichever is lower, for their 1920 inventories. The basis properly adopted for that year or any subsequent year is controlling, and a change can now be made only after permission is secured from the Commissioner. Application for permission to change the basis of valuing inventories shall be made in writing and filed with the Commissioner as provided in paragraph (e) of § 1.446-1. Goods taken in the inventory which have been so intermingled that they cannot be identified with specific invoices will be deemed to be the goods most recently purchased or produced, and the cost thereof will be the actual cost of the goods purchased or produced during the period in which the quantity of goods in the inventory has been acquired. But see section 472 as to last-in, first-out inventories. Where the taxpayer maintains book inventories in accordance with a sound accounting system in which the respective inventory accounts are charged with the actual cost of the goods purchased or produced and credited with the value of goods used, transferred, or sold, calculated upon the basis of the actual cost of the goods acquired during the taxable year (including the inventory at the beginning of the year), the net value as shown by such inventory accounts will be deemed to be the cost of the goods on hand. The balances shown by such book inventories should be verified by physical inventories at reasonable intervals and adjusted to conform therewith.

(e) Inventories should be recorded in a legible manner, properly computed and summarized, and should be preserved as a part of the accounting records of the taxpayer. The inventories of taxpayers on whatever basis taken will be subject to investigation by the district director, and the taxpayer must satisfy the district director of the correctness of the prices adopted.

(f) The following methods, among others, are sometimes used in taking or valuing inventories, but are not in accord with the regulations in this part:

(1) Deducting from the inventory a reserve for price changes, or an estimated depreciation in the value thereof.

(2) Taking work in process, or other parts of the inventory, at a nominal price or at less than its proper value.

(3) Omitting portions of the stock on hand.

(4) Using a constant price or nominal value for so-called normal quantity of materials or goods in stock.

(5) Including stock in transit, shipped either to or from the taxpayer, the title to which is not vested in the taxpayer.

(6) Segregating indirect production costs into fixed and variable production cost classifications (as defined in § 1.471-11(b)(3)(ii)) and allocating only the variable costs to the cost of goods produced while treating fixed costs as period costs which are currently deductible. This method is commonly referred to as the "direct cost" method.

(7) Treating all or substantially all indirect production costs (whether classified as fixed or variable) as period costs which are currently deductible. This method is generally referred to as the "prime cost" method.

[T.D. 6500, 25 FR 11724, Nov. 26, 1960, as amended by T.D. 7285, 38 FR 26185, Sept. 19, 1973]

§ 1.471-3 Inventories at cost.

Cost means:

(a) In the case of merchandise on hand at the beginning of the taxable year, the inventory price of such goods.

(b) In the case of merchandise purchased since the beginning of the taxable year, the invoice price less trade or other discounts, except strictly cash discounts approximating a fair interest rate, which may be deducted or not at the option of the taxpayer, provided a consistent course is followed. To this net invoice price should be added transportation or other necessary charges incurred in acquiring possession of the goods.

(c) In the case of merchandise produced by the taxpayer since the beginning of the taxable year, (1) the cost of raw materials and supplies entering into or consumed in connection with the product, (2) expenditures for direct labor, and (3) indirect production costs incident to and necessary for the production of the particular article, including in such indirect production costs an appropriate portion of management expenses, but not including any cost of selling or return on capital, whether by way of interest or profit. See § 1.263A-1T for more specific rules regarding the treatment of production costs.

(d) In any industry in which the usual rules for computation of cost of production are inapplicable, costs may be approximated upon such basis as may be reasonable and in conformity with established trade practice in the particular industry.

Among such cases are: (1) Farmers and raisers of livestock (see § 1.471–6); (2) miners and manufacturers who by a single process or uniform series of processes derive a product of two or more kinds, sizes, or grades, the unit cost of which is substantially alike (see § 1.471–7); and (3) retail merchants who use what is known as the "retail method" in ascertaining approximate cost (see § 1.471–8). Notwithstanding the other rules of this section, cost shall not include an amount which is of a type for which a deduction would be disallowed under section 162(c), (f), or (g) and the regulations thereunder in the case of a business expense.

[T.D. 6500, 25 FR 11725, Nov. 26, 1960, as amended by T.D. 7285, 38 FR 26185, Sept. 19, 1973; T.D. 7345, 40 FR 7439, Feb. 20, 1975; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.471–4 Inventories at cost or market, whichever is lower.

(a) Under ordinary circumstances and for normal goods in an inventory, "market" means the current bid price prevailing at the date of the inventory for the particular merchandise in the volume in which usually purchased by the taxpayer, and is applicable in the cases—

(1) Of goods purchased and on hand, and

(2) Of basic elements of cost (materials, labor, and burden) in goods in process of manufacture and in finished goods on hand; exclusive, however, of goods on hand or in process of manufacture for delivery upon firm sales contracts (*i.e.*, those not legally subject to cancellation by either party) at fixed prices entered into before the date of the inventory, under which the taxpayer is protected against actual loss, which goods must be inventoried at cost.

(b) Where no open market exists or where quotations are nominal, due to inactive market conditions, the taxpayer must use such evidence of a fair market price at the date or dates nearest the inventory as may be available, such as specific purchases or sales by the taxpayer or others in reasonable volume and made in good faith, or compensation paid for cancellation of contracts for purchase commitments. Where the taxpayer in the regular course of business has offered for sale such merchandise at prices lower than the current price as above defined, the inventory may be valued at such prices less direct cost of disposition, and the correctness of such prices will be determined by reference to the actual sales of the taxpayer for a reasonable period before and after the date of the inventory. Prices which vary materially from the actual prices so ascertained will not be accepted as reflecting the market.

(c) Where the inventory is valued upon the basis of cost or market, whichever is lower, the market value of each article on hand at the inventory date shall be compared with the cost of the article, and the lower of such values shall be taken as the inventory value of the article.

[T.D. 6500, 25 FR 11725, Nov. 26, 1960]

§ 1.471–5 Inventories by dealers in securities.

A dealer in securities who in his books of account regularly inventories unsold securities on hand either—

(a) At cost,

(b) At cost or market, whichever is lower, or

(c) At market value,

may make his return upon the basis upon which his accounts are kept, provided that a description of the method employed is included in or attached to the return, that all the securities are inventoried by the same method, and that such method is adhered to in subsequent years, unless another method is authorized by the Commissioner pursuant to a written application therefor filed as provided in paragraph (e) of § 1.446–1. A dealer in securities in whose books of account separate computations of the gain or loss from the sale of the various lots of securities sold are made on the basis of the cost of each lot shall be regarded, for the purposes of this section, as regularly inventorying his securities at cost. For the purposes of this section, a dealer in securities is a merchant of securities, whether an individual, partnership, or corporation, with an established place of business, regularly engaged in the purchase of securities and their resale to customers; that is, one who as a merchant buys securities and sells them to customers with a view to the gains and profits that may be derived therefrom. If such business is simply a branch of the activities carried on by such person, the securities inventoried as provided in this section may include only those held for purposes of resale and not for investment. Taxpayers who buy and sell or hold securities for investment or speculation, irrespective of whether such buying or selling constitutes the carrying on of a trade or business, and officers of corporations and members of partnerships who in their individual capacities buy and sell securities, are not dealers in securities within the meaning of this section. See

§ 1.263A–1T for rules regarding the treatment of costs with respect to property acquired for resale.

[T.D. 6500, 25 FR 11725, Nov. 26, 1960; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.471–6 Inventories of livestock raisers and other farmers.

(a) A farmer may make his return upon an inventory method instead of the cash receipts and disbursements method. It is optional with the taxpayer which of these methods of accounting is used but, having elected one method, the option so exercised will be binding upon the taxpayer for the year for which the option is exercised and for subsequent years unless another method is authorized by the Commissioner as provided in paragraph (e) of § 1.446–1.

(b) In any change of accounting method from the cash receipts and disbursements method to an inventory method, adjustments shall be made as provided in section 481 (relating to adjustments required by change in method of accounting) and the regulations thereunder.

(c) Because of the difficulty of ascertaining actual cost of livestock and other farm products, farmers who render their returns upon an inventory method may value their inventories according to the "farm-price method", and farmers raising livestock may value their inventories of animals according to either the "farm-price method" or the "unit-livestock-price method".

(d) The "farm-price method" provides for the valuation of inventories at market price less direct cost of disposition. If this method of valuing inventories is used, it must be applied to the entire inventory except as to livestock inventoried, at the taxpayer's election, under the "unit-livestock-price method". If the use of the "farm-price method" of valuing inventories for any taxable year involves a change in method of valuing inventories from that employed in prior years, permission for such change shall first be secured from the Commissioner as provided in paragraph (e) of § 1.446–1.

(e) The "unit-livestock-price method" provides for the valuation of the different classes of animals in the inventory at a standard unit price for each animal within a class. A livestock raiser electing this method of valuing his animals must adopt a reasonable classification of the animals in his inventory with respect to the age and kind included so that the unit prices assigned to the several classes will reasonably account for the normal costs incurred in producing the animals within such classes. Thus, if a cattle raiser determines that it costs approximately $15 to produce a calf, and $7.50 each year to raise the calf to maturity, his classifications and unit prices would be as follows: Calves, $15; yearlings, $22.50; 2-year olds, $30; mature animals, $37.50. The classification selected by the livestock raiser, and the unit prices assigned to the several classes, are subject to approval by the district director upon examination of the taxpayer's return.

(f) A taxpayer who elects to use the "unit-livestock-price method" must apply it to all livestock raised, whether for sale or for draft, breeding, or dairy purposes. Once established, the unit prices and classifications selected by the taxpayer must be consistently applied in all subsequent taxable years in the valuation of livestock inventories. No changes in the classification of animals or unit prices will be made without the approval of the Commissioner. See § 1.263A–1T for rules regarding the computation of costs for purposes of the unit livestock-price method.

(g) A livestock raiser who uses the "unit-livestock-price method" must include in his inventory at cost any livestock purchased, except that animals purchased for draft, breeding, or dairy purposes can, at the election of the livestock raiser, be included in inventory or be treated as capital assets subject to depreciation after maturity. If the animals purchased are not mature at the time of purchase, the cost should be increased at the end of each taxable year in accordance with the established unit prices, except that no increase is to be made in the taxable year of purchase if the animal is acquired during the last six months of that year. If the records maintained permit identification of a purchased animal, the cost of such animal will be eliminated from the closing inventory in the event of its sale or loss. Otherwise, the first-in, first-out method of valuing inventories must be applied.

(h) If a taxpayer using the "farm-price method" desires to adopt the "unit-livestock-price method" in valuing his inventories of livestock, permission for the change shall first be secured from the Commissioner as provided in paragraph (e) of § 1.446–1. However, a taxpayer who has filed returns on the basis of inventories at cost, or cost or market whichever is lower, may adopt the "unit-livestock-price method" for valuing his inventories of livestock without formal application for permission, but the classifications and unit prices selected are subject to approval by the district director upon examination of the taxpayer's return. A livestock raiser who has adopted a constant unit-price method of valuing livestock

inventories and filed returns on that basis will be considered as having elected the "unit-livestock-price method".

(i) If returns have been made in which the taxable income has been computed upon incomplete inventories, the abnormality should be corrected by submitting with the return for the current taxable year a statement for the preceding taxable year. In this statement such adjustments shall be made as are necessary to bring the closing inventory for the preceding taxable year into agreement with the opening complete inventory for the current taxable year. If necessary clearly to reflect income, similar adjustments may be made as at the beginning of the preceding year or years, and the tax, if any be due, shall be assessed and paid at the rate of tax in effect for such year or years.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.471–7 Inventories of miners and manufacturers.

A taxpayer engaged in mining or manufacturing who by a single process or uniform series of processes derives a product of two or more kinds, sizes, or grades, the unit cost of which is substantially alike, and who in conformity to a recognized trade practice allocates an amount of cost to each kind, size, or grade of product, which in the aggregate will absorb the total cost of production, may, with the consent of the Commissioner, use such allocated cost as a basis for pricing inventories, provided such allocation bears a reasonable relation to the respective selling values of the different kinds, sizes, or grades of product. See section 472 as to last-in, first-out inventories.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960]

§ 1.471–8 Inventories of retail merchants.

(a) Retail merchants who employ what is known as the "retail method" of pricing inventories may make their returns upon that method, provided that the use of such method is designated upon the return, that accurate accounts are kept, and that such method is consistently adhered to unless a change is authorized by the Commissioner as provided in paragraph (e) of § 1.446–1. Under the retail method the total of the retail selling prices of the goods on hand at the end of the year in each department or of each class of goods is reduced to approximate cost by deducting therefrom an amount which bears the same ratio to such total as—

(1) The total of the retail selling prices of the goods included in the opening inventory plus the retail selling prices of the goods purchased during the year, with proper adjustment to such selling prices for all mark-ups and mark-downs, less

(2) The cost of the goods included in the opening inventory plus the cost of the goods purchased during the year, bears to (1).

The result should represent as accurately as may be the amounts added to the cost price of the goods to cover selling and other expenses of doing business and for the margin of profit. See § 1.263A–1T for rules regarding the computation of costs with respect to property acquired for resale.

(b) For further adjustments to be made in the case of a retail merchant using the last-in, first-out inventory method authorized by section 472, see paragraph (k) of § 1.472–1.

(c) A taxpayer maintaining more than one department in his store or dealing in classes of goods carrying different percentages of gross profit should not use a percentage of profit based upon an average of his entire business, but should compute and use in valuing his inventory the proper percentages for the respective departments or classes of goods.

(d) A taxpayer (other than one using the last-in, first-out inventory method) who previously has determined inventories in accordance with the retail method, except that, to obtain a basis of approximate cost or market, whichever is lower, has consistently and uniformly followed the practice of adjusting the retail selling prices of the goods included in the opening inventory and purchased during the taxable year for mark-ups but not for mark-downs, may continue such practice subject to the conditions prescribed in this section. The adjustments must be bona fide and consistent and uniform. Where mark-downs are not included in the adjustments, mark-ups made to cancel or correct mark-downs shall not be included; and the mark-ups included must be reduced by the mark-downs made to cancel or correct such mark-ups.

(e) In no event shall mark-downs not based on actual reduction of retail sale prices, such as mark-downs based on depreciation and obsolescence, be recognized in determining the retail selling prices of the goods on hand at the end of the taxable year.

(f) A taxpayer (other than one using the last-in, first-out inventory method) who previously has

determined inventories without following the practice of eliminating mark-downs in making adjustments to retail selling prices may adopt such practice, provided permission to do so is obtained in accordance with, and subject to the terms provided by, paragraph (e) of § 1.446–1. A taxpayer filing a first return of income may adopt such practice subject to approval by the district director upon examination of the return.

(g) A taxpayer using the last-in, first-out inventory method in conjunction with retail computations must adjust retail selling prices for markdowns as well as mark-ups, in order that there may be reflected the approximate cost of the goods on hand at the end of the taxable year regardless of market values.

[T.D. 6500, 25 FR 11726, Nov. 26, 1960; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.471–9 Inventories of acquiring corporations.

For additional rules in the case of certain corporate acquisitions specified in section 381(a), see section 381(c)(5) and the regulations thereunder.

[T.D. 6500, 25 FR 11727, Nov. 26, 1960]

§ 1.471–10 Applicability of long-term contract methods.

See § 1.451-3 for rules providing for the application of the long-term contract methods to certain manufacturing contracts.

[T.D. 7397, 41 FR 2642, Jan. 19, 1976; T.D. 8067, 51 FR 393, Jan. 6, 1986]

§ 1.471–11 Inventories of manufacturers.

(a) Use of full absorption method of inventory costing. In order to conform as nearly as may be possible to the best accounting practices and to clearly reflect income (as required by section 471 of the Code), both direct and indirect production costs must be taken into account in the computation of inventoriable costs in accordance with the "full absorption" method of inventory costing. Under the full absorption method of inventory costing production costs must be allocated to goods produced during the taxable year, whether sold during the taxable year or in inventory at the close of the taxable year determined in accordance with the taxpayer's method of identifying goods in inventory. Thus, the taxpayer must include as inventoriable costs all direct production costs and, to the extent provided by paragraphs (c) and (d) of this section, all indirect production costs. For purposes of this section, the term "financial reports" means financial reports (including consolidated financial statements) to shareholders, partners, beneficiaries or other proprietors and for credit purposes. See § 1.263A–1T relating to the treatment of production costs with respect to taxable years beginning after December 31, 1986.

(b) Production costs—(1) In general. Costs are considered to be production costs to the extent that they are incident to and necessary for production or manufacturing operations or processes. Production costs include direct production costs and fixed and variable indirect production costs.

(2) Direct production costs. (i) Costs classified as "direct production costs" are generally those costs which are incident to and necessary for production or manufacturing operations or processes and are components of the cost of either direct material or direct labor. Direct material costs include the cost of those materials which become an integral part of the specific product and those materials which are consumed in the ordinary course of manufacturing and can be identified or associated with particular units or groups of units of that product. See § 1.471–3 for the elements of direct material costs. Direct labor costs include the cost of labor which can be identified or associated with particular units or groups of units of a specific product. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor. For the treatment of rework labor, scrap, spoilage costs, and any other costs not specifically described as direct production costs see § 1.471–11(c)(2).

(ii) Under the full absorption method, a taxpayer must take into account all items of direct production cost in his inventoriable costs. Nevertheless, a taxpayer will not be treated as using an incorrect method of inventory costing if he treats any direct production costs as indirect production costs, provided such costs are allocated to the taxpayer's ending inventory to the extent provided by paragraph (d) of this section. Thus, for example, a taxpayer may treat direct labor costs as part of indirect production costs (for example, by use of the conversion cost method), provided all such costs are allocated to ending inventory to the extent provided by paragraph (d) of this section.

(3) Indirect production costs—(i) In general. The term "indirect production costs" includes all costs which are incident to and necessary for production or manufacturing operations or processes other than direct production costs (as defined in subparagraph (2) of this paragraph). Indirect production costs may be classified as to kind or type in accordance with acceptable accounting principles so as to enable convenient identification with various production or manufacturing activities or functions and to facilitate reasonable groupings of such costs for purposes of determining unit product costs.

(ii) Fixed and variable classifications. For purposes of this section, fixed indirect production costs are generally those costs which do not vary significantly with changes in the amount of goods produced at any given level of production capacity. These fixed costs may include, among other costs, rent and property taxes on buildings and machinery incident to and necessary for manufacturing operations or processes. On the other hand, variable indirect production costs are generally those costs which do vary significantly with changes in the amount of goods produced at any given level of production capacity. These variable costs may include, among other costs, indirect materials, factory janitorial supplies, and utilities. Where a particular cost contains both fixed and variable elements, these elements should be segregated into fixed and variable classifications to the extent necessary under the taxpayer's method of allocation, such as for the application of the practical capacity concept (as described in paragraph (d)(4) of this section).

(c) Certain indirect and production costs—(1) General rule. Except as provided in paragraph (c)(3) of this section and in paragraph (d)(6)(v) of § 1.451-3, in order to determine whether indirect production costs referred to in paragraph (b) of this section must be included in a taxpayer's computation of the amount of inventoriable costs, three categories of costs have been provided in subparagraph (2) of this paragraph. Costs described in subparagraph (2)(i) of this paragraph must be included in the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(ii) of this paragraph need not enter into the taxpayer's computation of the amount of inventoriable costs, regardless of their treatment by the taxpayer in his financial reports. Costs described in subparagraph (2)(iii) of this paragraph must be included in or excluded from the taxpayer's computation of the amount inventoriable costs in accordance with the treatment of such costs by the taxpayer in his financial reports and generally accepted accounting principles. For the treatment of indirect production costs described in subparagraph (2) of this paragraph in the case of a taxpayer who is not using comparable methods of accounting for such costs for tax and financial reporting see paragraph (c)(3) of this section. For contracts entered into after December 31, 1982, notwithstanding this section, taxpayers who use an inventory method of accounting for extended period long-term contracts (as defined in paragraph (b)(3) of § 1.451-3) for tax purposes may be required to use the cost allocation rules provided in paragraph (d)(6) of § 1.451-3 rather than the cost allocation rules provided in this section. See paragraph (d)(6)(v) of § 1.451-3. After a taxpayer has determined which costs must be treated as indirect production costs includible in the computation of the amount of inventoriable costs, such costs must be allocated to a taxpayer's ending inventory in a manner prescribed by paragraph (d) of this section.

(2) Includibility of certain indirect production costs—(i) Indirect production costs included in inventoriable costs. Indirect production costs which must enter into the computation of the amount of inventoriable costs (regardless of their treatment by a taxpayer in his financial reports) include:

(a) Repair expenses,

(b) Maintenance,

(c) Utilities, such as heat, power and light,

(d) Rent,

(e) Indirect labor and production supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan,

(f) Indirect materials and supplies,

(g) Tools and equipment not capitalized, and

(h) Costs of quality control and inspection,

to the extent, and only to the extent, such costs are incident to and necessary for production or manufacturing operations or processes.

(ii) Costs not included in inventoriable costs. Costs which are not required to be included for tax purposes in the computation of the amount of

inventoriable costs (regardless of their treatment by a taxpayer in his financial reports) include:

(a) Marketing expenses,

(b) Advertising expenses,

(c) Selling expenses,

(d) Other distribution expenses,

(e) Interest,

(f) Research and experimental expenses including engineering and product development expenses,

(g) Losses under section 165 and the regulations thereunder,

(h) Percentage depletion in excess of cost depletion,

(i) Depreciation and amortization reported for Federal income tax purposes in excess of depreciation reported by the taxpayer in his financial reports,

(j) Income taxes attributable to income received on the sale of inventory,

(k) Pension contributions to the extent that they represent past services cost,

(*l*) General and administrative expenses incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes, and

(m) Salaries paid to officers attributable to the performance of services which are incident to and necessary for the taxpayer's activities taken as a whole rather than to production or manufacturing operations or processes.

Notwithstanding the preceding sentence, if a taxpayer consistently includes in his computation of the amount of inventoriable costs any of the costs described in the preceding sentence, a change in such method of inclusion shall be considered a change in method of accounting within the meaning of sections 446, 481, and paragraph (e)(4) of this section.

(iii) Indirect production costs includible in inventoriable costs depending upon treatment in taxpayer's financial reports. In the case of costs listed in this subdivision, the inclusion or exclusion of such costs from the amount of inventoriable costs for purposes of a taxpayer's financial reports shall determine whether such costs must be included in or excluded from the computation of inventoriable costs for tax purposes, but only if such treatment is not inconsistent with generally accepted accounting principles. In the case of costs which are not included in subdivision (i) or (ii) of this subparagraph, nor listed in this subdivision, whether such costs must be included in or excluded from the computation of inventoriable costs for tax purposes depends upon the extent to which such costs are similar to costs included in subdivision (i) or (ii), and if such costs are dissimilar to costs in subdivision (i) or (ii), such costs shall be treated as included in or excludable from the amount of inventoriable costs in accordance with this subdivision. The costs listed in this subdivision are:

(a) Taxes. Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes) attributable to assets incident to and necessary for production or manufacturing operations or processes. Thus, for example, the cost of State and local property taxes imposed on a factory or other production facility and any State and local taxes imposed on inventory must be included in or excluded from the computation of the amount of inventoriable costs for tax purposes depending upon their treatment by a taxpayer in his financial reports.

(b) Depreciation and depletion. Depreciation reported in financial reports and cost depletion on assets incident to and necessary for production or manufacturing operations or processes. In computing cost depletion under this section, the adjusted basis of such assets shall be reduced by cost depletion and not by percentage depletion taken thereon.

(c) Employee benefits. Pension and profit-sharing contributions representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor incident to and necessary for production or manufacturing operations or processes. These other benefits include workmen's compensation expenses, payments under a wage continuation plan described in section 105(d), amounts of a type which would be includible in the gross income of employees under non-qualified pension, profit-sharing and stock bonus plans, premiums on life and health insurance and miscellaneous benefits provided for employees such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deductions under chapter 1 of the Code.

(d) Costs attributable to strikes, rework labor, scrap and spoilage. Costs attributable to rework labor, scrap and spoilage which are incident to and necessary for production or manufacturing opera-

tions or processes and costs attributable to strikes incident to production or manufacturing operation or processes.

(e) Factory administrative expenses. Administrative costs of production (but not including any cost of selling or any return on capital) incident to and necessary for production or manufacturing operations or processes.

(f) Officers' salaries. Salaries paid to officers attributable to services performed incident to and necessary for production or manufacturing operations or processes.

(g) Insurance costs. Insurance costs incident to and necessary for production or manufacturing operations or processes such as insurance on production machinery and equipment. A change in the taxpayer's treatment in his financial reports of costs described in this subdivision which results in a change in treatment of such costs for tax purposes shall constitute a change in method of accounting within the meaning of sections 446 and 481 to which paragraph (e) applies.

(3) Exception. Except as provided in paragraph (d)(6) of § 1.451-3, in the case of a taxpayer whose method of accounting for production costs in his financial reports is not comparable to his method of accounting for such costs for tax purposes (such as a taxpayer using the prime cost method for purposes of financial reports), the following rules apply:

(i) Indirect production costs included in inventoriable costs. Indirect production costs which must enter into the computation of the amount of inventoriable costs (to the extent, and only to the extent, such costs are incident to and necessary for production or manufacturing operations or processes) include:

(a) Repair expenses,

(b) Maintenance,

(c) Utilities, such as heat, power and light,

(d) Rent,

(e) Indirect labor and production supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan,

(f) Indirect materials and supplies,

(g) Tools and equipment not capitalized,

(h) Costs of quality control and inspection,

(i) Taxes otherwise allowable as a deduction under section 164 (other than State and local and foreign income taxes),

(j) Depreciation and amortization reported for financial purposes and cost depletion,

(k) Administrative costs of production (but not including any cost of selling or any return on capital) incident to and necessary for production or manufacturing operations or processes,

(*l*) Salaries paid to officers attributable to services performed incident to and necessary for production or manufacturing operations or processes, and

(m) Insurance costs incident to and necessary for production or manufacturing operations or processes such as insurance on production machinery and equipment.

(ii) Costs not included in inventoriable costs. Costs which are not required to be included in the computation of the amount of inventoriable costs include:

(a) Marketing expenses,

(b) Advertising expenses,

(c) Selling expenses,

(d) Other distribution expenses,

(e) Interest,

(f) Research and experimental expenses including engineering and product development expenses,

(g) Losses under section 165 and the regulations thereunder,

(h) Percentage depletion in excess of cost depletion,

(i) Depreciation reported for Federal income tax purposes in excess of depreciation reported by the taxpayer in his financial reports,

(j) Income taxes attributable to income received on the sale of inventory,

(k) Pension and profit-sharing contributions representing either past service costs or representing current service costs otherwise allowable as a deduction under section 404, and other employee benefits incurred on behalf of labor. These other benefits include workmen's compensation expenses, payments under a wage continuation plan

described in section 105(d), amounts of a type which would be includible in the gross income of employees under nonqualified pension, profit-sharing and stock bonus plans, premiums on life and health insurance and miscellaneous benefits provided for employees such as safety, medical treatment, cafeteria, recreational facilities, membership dues, etc., which are otherwise allowable as deductions under chapter 1 of the Code,

(*l*) Cost attributable to strikes, rework labor, scrap and spoilage,

(m) General and administrative expenses incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes, and

(n) Salaries paid to officers attributable to the performance of services which are incident to and necessary for the taxpayer's activities as a whole rather than to production or manufacturing operations or processes.

(d) Allocation methods—(1) In general. Indirect production costs required to be included in the computation of the amount of inventoriable costs pursuant to paragraphs (b) and (c) of this paragraph must be allocated to goods in a taxpayer's ending inventory (determined in accordance with the taxpayer's method of identification) by the use of a method of allocation which fairly apportions such costs among the various items produced. Acceptable methods for allocating indirect production costs to the cost of goods in the ending inventory include the manufacturing burden rate method and the standard cost method. In addition, the practical capacity concept can be used in conjunction with either the manufacturing burden rate or standard cost method.

(2) Manufacturing burden rate method—(i) In general. Manufacturing burden rates may be developed in accordance with acceptable accounting principles and applied in a reasonable manner. In developing a manufacturing burden rate, the factors described in paragraph (d)(2)(ii) of this section may be taken into account. Furthermore, if the taxpayer chooses, he may allocate different indirect production costs on the basis of different manufacturing burden rates. Thus, for example, the taxpayer may use one burden rate for allocating rent and another burden rate for allocating utilities. The method used by the taxpayer in allocating such costs in his financial reports shall be given great weight in determining whether the taxpayer's method employed for tax purposes fairly allocates indirect production costs to the ending inventory. Any change in a manufacturing burden rate which is merely a periodic adjustment to reflect current operating conditions, such as increases in automation or changes in operation, does not constitute a change in method of accounting under section 446. However, a change in the concept upon which such rates are developed does constitute a change in method of accounting requiring the consent of the Commissioner. The taxpayer shall maintain adequate records and working papers to support all manufacturing burden rate calculations.

(ii) Development of manufacturing burden rate. The following factors, among others, may be taken into account in developing manufacturing burden rates:

(a) The selection of an appropriate level of activity and period of time upon which to base the calculation of rates which will reflect operating conditions for purposes of the unit costs being determined;

(b) The selection of an appropriate statistical base such as direct labor hours, direct labor dollars, or machine hours, or a combination thereof, upon which to apply the overhead rate to determine production costs; and

(c) The appropriate budgeting, classification and analysis of expenses (for example, the analysis of fixed and variable costs).

(iii) Operation of the manufacturing burden rate method. (a) The purpose of the manufacturing burden rate method used in conjunction with the full absorption method of inventory costing is to allocate an appropriate amount of indirect production costs to a taxpayer's goods in ending inventory by the use of predetermined rates intended to approximate the actual amount of indirect production costs incurred. Accordingly, the proper use of the manufacturing burden rate method under this section requires that any net negative or net positive difference between the total predetermined amount of indirect production costs allocated to the goods in ending inventory and the total amount of indirect production costs actually incurred and required to be allocated to such goods (*i.e.*, the under or over-applied burden) must be treated as an adjustment to the taxpayer's ending inventory in the taxable year in which such difference arises. However, if such adjustment is not significant in amount in relation to the taxpayer's total actual indirect production costs for the year then such adjustment need not be allocated to the taxpayer's goods in ending inventory unless such allocation is made in the taxpayer's financial

reports. The taxpayer must treat both positive and negative adjustments consistently.

(b) Notwithstanding subdivision (a), the practical capacity concept may be used to determine the total amount of fixed indirect production costs which must be allocated to goods in ending inventory. See subparagraph (4) of this paragraph.

(3) Standard cost method—(i) In general. A taxpayer may use the so-called "standard cost" method of allocating inventoriable costs to the goods in ending inventory, provided he treats variances in accordance with the procedures prescribed in paragraph (d)(3)(ii) of this section. The method used by the taxpayer in allocating such costs in his financial reports shall be given great weight in determining whether the taxpayer's method employed for tax purposes fairly allocates indirect production costs to the ending inventory. For purposes of this subparagraph, a "net positive overhead variance" shall mean the excess of total standard (or estimated) indirect production costs over total actual indirect production costs and a "net negative overhead variance" shall mean the excess of total actual indirect production costs over total standard (or estimated) indirect production costs.

(ii) Treatment of variances. (a) The proper use of the standard cost method pursuant to this subparagraph requires that a taxpayer must reallocate to the goods in ending inventory a pro rata portion of any net negative or net positive overhead variances and any net negative or net positive direct production cost variances. The taxpayer must apportion such variances among his various items in ending inventory. However, if such variances are not significant in amount in relation to the taxpayer's total actual indirect production costs for the year then such variances need not be allocated to the taxpayer's goods in ending inventory unless such allocation is made in the taxpayer's financial reports. The taxpayer must treat both positive and negative variances consistently.

(b) Notwithstanding subdivision (a), the practical capacity concept may be used to determine the total amount of fixed indirect production costs which must be allocated to goods in ending inventory. See subparagraph (4) of this paragraph.

(4) Practical capacity concept—(i) In general. Under the practical capacity concept, the percentage of practical capacity represented by actual production (not greater than 100 percent), as calculated under subdivision (ii) of this subparagraph, is used to determine the total amount of fixed indirect production costs which must be included in the taxpayer's computation of the amount of inventoriable costs. The portion of such costs to be included in the taxpayer's computation of the amount of inventoriable costs is then combined with variable indirect production costs and both are allocated to the goods in ending inventory in accordance with this paragraph. See the example in subdivision (ii)(d) of this subparagraph. The difference (if any) between the amount of all fixed indirect production costs and the fixed indirect production costs which are included in the computation of the amount of inventoriable costs under the practical capacity concept is allowable as a deduction for the taxable year in which such difference occurs.

(ii) Calculation of practical capacity—(a) In general. Practical capacity and theoretical capacity (as described in (c) of this subdivision) may be computed in terms of tons, pounds, yards, labor hours, machine hours, or any other unit of production appropriate to the cost accounting system used by a particular taxpayer. The determination of practical capacity and theoretical capacity should be modified from time to time to reflect a change in underlying facts and conditions such as increased output due to automation or other changes in plant operation. Such a change does not constitute a change in method of accounting under sections 446 and 481.

(b) Based upon taxpayer's experience. In selecting an appropriate level of production activity upon which to base the calculation of practical capacity, the taxpayer shall establish the production operating conditions expected during the period for which the costs are being determined, assuming that the utilization of production facilities during operations will be approximately at capacity. This level of production activity is frequently described as practical capacity for the period and is ordinarily based upon the historical experience of the taxpayer. For example, a taxpayer operating on a 5-day, 8-hour basis may have a "normal" production of 100,000 units a year based upon three years of experience.

(c) Based upon theoretical capacity. Practical capacity may also be established by the use of "theoretical" capacity, adjusted for allowances for estimated inability to achieve maximum production, such as machine breakdown, idle time, and other normal work stoppages. Theoretical capacity is the level of production the manufacturer could reach if all machines and departments were operated continuously at peak efficiency.

(d) Example. The provisions of (c) of this subdivision may be illustrated by the following example:

Corporation X operates a stamping plant with a theoretical capacity of 50 units per hour. The plant actually operates 1960 hours per year based on an 8-hour day, 5 day week basis and 15 shutdown days for vacations and holidays. A reasonable allowance for down time (the time allowed for ordinary and necessary repairs and maintenance) is 5 percent of practical capacity before reduction for down time. Assuming no loss of production during starting up, closing down, or employee work breaks, under these facts and circumstances X may properly make a practical capacity computation as follows:

Practical capacity without allowance for down time based on theoretical capacity per hour is (1960 × 50)	98,000
Reduction for down time (98,000 × 5 percent)	4,900
Practical capacity	93,100

The 93,100 unit level of activity (*i.e.*, practical capacity) would, therefore, constitute an appropriate base for calculating the amount of fixed indirect production costs to be included in the computation of the amount of inventoriable costs for the period under review. On this basis if only 76,000 units were produced for the period, the effect would be that approximately 81.6 percent (76,000, the actual number of units produced, divided by 93,100, the maximum number of units producible at practical capacity) of the fixed indirect production costs would be included in the computation of the amount of inventoriable costs during the year. The portion of the fixed indirect production costs not so included in the computation of the amount of inventoriable costs would be deductible in the year in which paid or incurred. Assume further that 7,600 units were on hand at the end of the taxable year and the 7,600 units were in the same proportion to the total units produced. Thus, 10 percent (7,600 units in inventory at the end of the taxable year, divided by 76,000, the actual number of units produced) of the fixed indirect production costs included in the computation of the amount of inventoriable costs (the above-mentioned 81.6 percent) and 10 percent of the variable indirect production costs would be included in the cost of the goods in the ending inventory, in accordance with a method of allocation provided by this paragraph.

(e) Transition to full absorption method of inventory costing—(1) In general—(i) Mandatory requirement. A taxpayer not using the full absorption method of inventory costing, as prescribed by paragraph (a) of this section, must change to that method. Any change to the full absorption method must be made by the taxpayer with respect to all trades or businesses of the taxpayer to which this section applies. A taxpayer not using the full absorption method of inventory costing, as prescribed by paragraph (a) of this section, who makes the special election provided in subdivision (ii) of this subparagraph during the transition period described in subdivision (ii) of this subparagraph need not change to the full absorption method of inventory costing for taxable years prior to the year for which such election is made. In determining whether the taxpayer is changing to a more or less inclusive method of inventory costing, all positive and negative adjustments for all items and all trades or businesses of the taxpayer shall be aggregated. If the net adjustment is positive, paragraph (e)(3) shall apply, and if the net adjustment is negative, paragraph (e)(4) shall apply to the change. The rules otherwise prescribed in sections 446 and 481 and the regulations thereunder shall apply to any taxpayer who fails to make the special election in subdivision (ii) of this subparagraph. The transition rules of this paragraph are available only to those taxpayers who change their method of inventory costing.

(ii) Special election during two-year-transition period. If a taxpayer elects to change to the full absorption method of inventory costing during the transition period provided herein, he may elect on Form 3115 to change to such full absorption method of inventory costing and, in so doing, employ the transition procedures and adopt any of the transition methods prescribed in subparagraph (3) of this paragraph. Such election shall be made during the first 180 days of any taxable year beginning on or after September 19, 1973 and before September 19, 1975 (*i.e.*, the "transition period") and the change in inventory costing method shall be made for the taxable year in which the election is made. Notwithstanding the preceding sentence if the taxpayer's prior returns have been examined by the Service prior to Sept. 19, 1973, and there is a pending issue involving the taxpayer's method of inventory costing, the taxpayer may request the application of this regulation by agreeing and filing a letter to that effect with the district director, within 90 days after September 19, 1973 to change to the full absorption method for the first taxable year of the taxpayer beginning after Sept. 19, 1973 and subsequently filing Form 3115 within the first 180 days of such taxable year of change.

(iii) Change initiated by the Commissioner. A taxpayer who properly makes an election under subdivision (ii) of this subparagraph shall be considered to have made a change in method of accounting not initiated by the taxpayer, notwithstanding the provisions of § 1.481–1(c)(5). Thus, any of the taxpayer's "pre-1954 inventory balances" with respect to such inventory shall not be taken into account as an adjustment under section 481. For purposes of this paragraph, a "pre-1954 inventory balance" is the net amount of the adjustments which would have been required if the taxpayer had made such change in his method of accounting with respect to his inventory in his first taxable year which began after December 31, 1953,

and ended after August 16, 1954. See section 481(a)(2) and § 1.481–3.

(2) **Procedural rules for change.** If a taxpayer makes an election pursuant to subparagraph (1)(ii) of this paragraph, the Commissioner's consent will be evidenced by a letter of consent to the taxpayer, setting forth the values of inventory, as provided by the taxpayer, determined under the full absorption method of inventory costing, except to the extent that no determination of such values is necessary under subparagraph (3)(ii)(B) of this paragraph (the cut-off method), the amount of the adjustments (if any) required to be taken into account by section 481, and the treatment to be accorded to any such adjustments. Such full absorption values shall be subject to verification on examination by the district director. The taxpayer shall preserve at his principal place of business all records, data, and other evidence relating to the full absorption values of inventory.

(3) **Transition methods.** In the case of a taxpayer who properly makes an election under subparagraph (1)(ii) of this paragraph during the transition period—

(i) **10-year adjustment period.** Such taxpayer may elect to take any adjustment required by section 481 with respect to any inventory being revalued under the full absorption method into account ratably over a period designated by the taxpayer at the time of such election, not to exceed the lesser of 10 taxable years commencing with the year of transition or the number of years the taxpayer has been on the inventory method from which he is changing. If the taxpayer dies or ceases to exist in a transaction other than one to which section 381(a) of the Code applies or if the taxpayer's inventory (determined under the full absorption method) on the last day of any taxable year is reduced (by other than a strike or involuntary conversion) by more than an amount equal to 33⅓ percent of the taxpayer's inventory (determined under the full absorption method) as of the beginning of the year of change, the entire amount of the section 481 adjustment not previously taken into account in computing income shall be taken into account in computing income for the taxable year in which such taxpayer so ceases to exist or such taxpayer's inventory is so reduced.

(ii) **Additional rules for LIFO taxpayers.** A taxpayer who uses the LIFO method of inventory identification may either—

(a) Employ the special transition rules described in subdivision (i) of this subparagraph. Accordingly, all LIFO layers must be revalued under the full absorption method and the section 481 adjustment must be computed for all items in all layers in inventory, but no pre-1954 inventory balances shall be taken into account as adjustments under section 481; or

(b)(1) Employ a cut-off method whereby the full absorption method is only applied in costing layers of inventory acquired during all taxable years beginning with the year for which an election is made under subparagraph (e)(1)(ii).

(2) In the case of a taxpayer using dollar value LIFO, employ a cut-off method whereby the taxpayer must use, for the year of change, the full absorption method in computing the base year cost and current cost of a dollar value inventory pool for the beginning of such year. The taxpayer shall not be required to recompute his LIFO inventories based on the full absorption method for a taxable year beginning prior to the year of change to the full absorption method. The base cost and layers of increment previously computed shall be retained and treated as if such base cost and layers of increment had been computed under the method authorized by this section. The taxpayer shall use the year of change as the base year in applying the double extension method or other method approved by the Commissioner, instead of the earliest year for which he adopted the LIFO method for any items in the pool.

(4) **Transition to full absorption method of inventory costing from a method more inclusive of indirect production costs—(i) Taxpayer has not previously changed to his present method pursuant to subparagraphs (1), (2), and (3) of this paragraph.** If a taxpayer wishes to change to the full absorption method of inventory costing (as prescribed by paragraph (a) of this section) from a method of inventory costing which is more inclusive of indirect production costs and he has not previously changed to his present method by use of the special transition rules provided by subparagraphs (1), (2) and (3) of this paragraph, he may elect on Form 3115 to change to the full absorption method of inventory costing and, in so doing, take into account any resulting section 481 adjustment generally over 10 taxable years commencing with the year of transition. The Commissioner's consent to such election will be evidenced by a letter of consent to the taxpayer setting forth the values of inventory, as provided by the taxpayer determined under the full absorption method of inventory costing, except to the extent that no determination of such values is necessary under subparagraph (3)(ii)(b) of this paragraph, the amount of the

adjustments (if any) required to be taken into account by section 481, and the treatment to be accorded such adjustments, subject to terms and conditions specified by the Commissioner to prevent distortions of income. Such election must be made within the transition period described in subparagraph (1)(ii) of this paragraph. A change pursuant to this subparagraph shall be a change initiated by the taxpayer as provided by § 1.481–1(c)(5). Thus, any of the taxpayers "pre-1954 inventory balances" will be taken into account as an adjustment under section 481.

(ii) Taxpayer has previously changed to his present method pursuant to subparagraph (1), (2), and (3) of this paragraph or would satisfy all the requirements of subdivision (i) of this subparagraph but fails to elect within the transition period. If a taxpayer wishes to change to the full absorption method of inventory costing (as prescribed by paragraph (a) of this section) from a method of inventory costing which is more inclusive of indirect production costs and he has previously changed to his present method pursuant to subparagraphs (1), (2), and (3) of this paragraph or he would satisfy the requirements of subdivision (i) of this subparagraph but he fails to elect within the transition period, he must secure the consent of the Commissioner prior to making such change.

[T.D. 7285, 38 FR 26185, Sept. 19, 1973; T.D. 8067, 51 FR 393, Jan. 6, 1986; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.472–1 Last-in, first-out inventories.

(a) Any taxpayer permitted or required to take inventories pursuant to the provisions of section 471, and pursuant to the provisions of §§ 1.471–1 to 1.471–9, inclusive, may elect with respect to those goods specified in his application and properly subject to inventory to compute his opening and closing inventories in accordance with the method provided by section 472, this section, and § 1.472–2. Under this last-in, first-out (LIFO) inventory method, the taxpayer is permitted to treat those goods remaining on hand at the close of the taxable year as being:

(1) Those included in the opening inventory of the taxable year, in the order of acquisition and to the extent thereof, and

(2) Those acquired during the taxable year.

The LIFO inventory method is not dependent upon the character of the business in which the taxpayer is engaged, or upon the identity or want of identity through commingling of any of the goods on hand, and may be adopted by the taxpayer as of the close of any taxable year.

(b) If the LIFO inventory method is used by a taxpayer who regularly and consistently, in a manner similar to hedging on a futures market, matches purchases with sales, then firm purchases and sales contracts (*i.e.*, those not legally subject to cancellation by either party) entered into at fixed prices on or before the date of the inventory may be included in purchases or sales, as the case may be, for the purpose of determining the cost of goods sold and the resulting profit or loss, provided that this practice is regularly and consistently adhered to by the taxpayer and provided that, in the opinion of the Commissioner, income is clearly reflected thereby.

(c) A manufacturer or processor who has adopted the LIFO inventory method as to a class of goods may elect to have such method apply to the raw materials only (including those included in goods in process and in finished goods) expressed in terms of appropriate units. If such method is adopted, the adjustments are confined to costs of the raw material in the inventory and the cost of the raw material in goods in process and in finished goods produced by such manufacturer or processor and reflected in the inventory. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Assume that the opening inventory had 10 units of raw material, 10 units of goods in process, and 10 units of finished goods, and that the raw material cost was 6 cents a unit, the processing cost 2 cents a unit, and overhead cost 1 cent a unit. For the purposes of this example, it is assumed that the entire amount of goods in process was 50 percent processed.

OPENING INVENTORY

	Raw material	Goods in process	Finished goods
Raw material	$0.60	$0.60	$0.60
Processing cost	....	.10	.20
Overhead	....	.05	.10

In the closing inventory there are 20 units of raw material, 6 units of goods in process, and 8 units of finished goods and the costs were: Raw material 10 cents, processing cost 4 cents, and overhead 1 cent.

CLOSING INVENTORY

[Based on cost and prior to adjustment]

	Raw material	Goods in process	Finished goods
Raw material	$2.00	$0.60	$0.80
Processing costs	....	.12	.32
Overhead	....	.03	.08
Total	2.00	.75	1.20

There were 30 units of raw material in the opening inventory and 34 units in the closing inventory. The adjustment to the closing inventory would be as follows:

CLOSING INVENTORY AS ADJUSTED

	Raw material	Goods in process	Finished goods
Raw material:			
20 at 6 cents	$1.20	....	....
6 at 6 cents	....	$0.36	....
4 at 6 cents	....	....	$0.24
4 at 10 cents [1]	....	....	.40
Processing costs	....	.12	.32
Overhead	....	.03	.08
Total	1.20	.51	1.04

[1] This excess is subject to determination of price under section 472(b)(1) and § 1.472–2. If the excess falls in goods in process, the same adjustment is applicable.

The only adjustment to the closing inventory is the cost of the raw material; the processing costs and overhead cost are not changed.

Example (2). Assume that the opening inventory had 5 units of raw material, 10 units of goods in process, and 20 units of finished goods, with the same prices as in example (1), and that the closing inventory had 20 units of raw material, 20 units of goods in process, and 10 units of finished goods, with raw material costs as in the closing inventory in example (1). The adjusted closing inventory would be as follows in so far as the raw material is concerned:

Raw material, 20 at 6 cents	$1.20
Goods in process:	
15 at 6 cents........................	.90
5 at 10 cents [1]........................	.50
Finished goods:	
None at 6 cents	0.00
10 at 10 cents [1].......................	1.00

[1] This excess is subject to determination of price under section 472(b)(1) and § 1.472–2.

The 20 units of raw material in the raw state plus 15 units of raw material in goods in process make up the 35 units of raw material that were contained in the opening inventory.

(d) For the purposes of this section, raw material in the opening inventory must be compared with similar raw material in the closing inventory. There may be several types of raw materials, depending upon the character, quality, or price, and each type of raw material in the opening inventory must be compared with a similar type in the closing inventory.

(e) In the cotton textile industry there may be different raw materials depending upon marked differences in length of staple, in color or grade of the cotton. But where different staple lengths or grades of cotton are being used at different times in the same mill to produce the same class of goods, such differences would not necessarily require the classification into different raw materials.

(f) As to the pork packing industry a live hog is considered as being composed of various raw materials, different cuts of a hog varying markedly in price and use. Generally a hog is processed into approximately 10 primal cuts and several miscellaneous articles. However, due to similarity in price and use, these may be grouped into fewer classifications, each group being classed as one raw material.

(g) When the finished product contains two or more different raw materials as in the case of cotton and rayon mixtures, each raw material is treated separately and adjustments made accordingly.

(h) Upon written notice addressed to the Commissioner of Internal Revenue, Attention T:R, Washington, D.C. 20224 by the taxpayer, a taxpayer who has heretofore adopted the LIFO inventory method in respect of any goods may adopt the method authorized in this section and limit the election to the raw material including raw materials entering into goods in process and in finished goods. If this method is adopted as to any specific goods, it must be used exclusively for such goods for any prior taxable year (not closed by agreement) to which the prior election applies and for all subsequent taxable years, unless permission to change is granted by the Commissioner.

(i) The election may also be limited to that phase in the manufacturing process where a product is produced that is recognized generally as a salable product as, for example, in the textile industry where one phase of the process is the production of yarn. Since yarn is generally recognized as a salable product, the election may be limited to that portion of the process when yarn is produced. In the case of copper and brass processors, the election may be limited to the production of bars, plates, sheets, etc., although these may be further processed into other products.

(j) The election may also apply to any one raw material, when two or more raw materials enter into the composition of the finished product; for example, in the case of cotton and rayon yarn, the taxpayer may elect to inventory the cotton only. However, a taxpayer who has previously made an election to use the LIFO inventory method may not later elect to exclude any raw materials that were covered by such previous election.

(k) If a taxpayer using the retail method of pricing inventories, authorized by § 1.471–8, elects to use in connection therewith the LIFO inventory method authorized by section 472 and this section, the apparent cost of the goods on hand at the end

of the year, determined pursuant to § 1.471–8, shall be adjusted to the extent of price changes therein taking place after the close of the preceding taxable year. The amount of any apparent inventory increase or decrease to be eliminated in this adjustment shall be determined by reference to acceptable price indexes established to the satisfaction of the Commissioner. Price indexes prepared by the United States Bureau of Labor Statistics which are applicable to the goods in question will be considered acceptable to the Commissioner. Price indexes which are based upon inadequate records, or which are not subject to complete and detailed audit within the Internal Revenue Service, will not be approved.

(*l*) If a taxpayer uses consistently the so-called "dollar-value" method of pricing inventories, or any other method of computation established to the satisfaction of the Commissioner as reasonably adaptable to the purpose and intent of section 472 and this section, and if such taxpayer elects under section 472 to use the LIFO inventory method authorized by such section, the taxpayer's opening and closing inventories shall be determined under section 472 by the use of the appropriate adaptation. See § 1.472–8 for rules relating to the use of the dollar-value method.

[T.D. 6500, 25 FR 11727, Nov. 26, 1960, as amended by T.D. 6539, 26 FR 518, Jan. 20, 1961]

§ 1.472–2 Requirements incident to adoption and use of LIFO inventory method.

Except as otherwise provided in § 1.472–1 with respect to raw material computations, with respect to retail inventory computations, and with respect to other methods of computation established to the satisfaction of the Commissioner as reasonably adapted to the purpose and intent of section 472, and in § 1.472–8 with respect to the "dollar-value" method, the adoption and use of the LIFO inventory method is subject to the following requirements:

(a) The taxpayer shall file an application to use such method specifying with particularity the goods to which it is to be applied.

(b) The inventory shall be taken at cost regardless of market value.

(c) Goods of the specified type included in the opening inventory of the taxable year for which the method is first used shall be considered as having been acquired at the same time and at a unit cost equal to the actual cost of the aggregate divided by the number of units on hand. The actual cost of the aggregate shall be determined pursuant to the inventory method employed by the taxpayer under the regulations applicable to the prior taxable year with the exception that restoration shall be made with respect to any writedown to market values resulting from the pricing of former inventories.

(d) Goods of the specified type on hand as of the close of the taxable year in excess of what were on hand as of the beginning of the taxable year shall be included in the closing inventory, regardless of identification with specific invoices and regardless of specific cost accounting records, at costs determined pursuant to the provisions of subparagraph (1) or (2) of this paragraph, dependent upon the character of the transactions in which the taxpayer is engaged:

(1)(i) In the case of a taxpayer engaged in the purchase and sale of merchandise, such as a retail grocer or druggist, or engaged in the initial production of merchandise and its sale without processing, such as a miner selling his ore output without smelting or refining, such costs shall be determined—

(*a*) By reference to the actual cost of the goods most recently purchased or produced;

(*b*) By reference to the actual cost of the goods purchased or produced during the taxable year in the order of acquisition;

(*c*) By application of an average unit cost equal to the aggregate cost of all of the goods purchased or produced throughout the taxable year divided by the total number of units so purchased or produced, the goods reflected in such inventory increase being considered for the purposes of section 472 as having been acquired all at the same time; or

(*d*) Pursuant to any other proper method which, in the opinion of the Commissioner, clearly reflects income.

(ii) Whichever of the several methods of valuing the inventory increase is adopted by the taxpayer and approved by the Commissioner shall be consistently adhered to in all subsequent taxable years so long as the LIFO inventory method is used by the taxpayer.

(iii) The application of subdivisions (i) and (ii) of this subparagraph may be illustrated by the following examples:

Example (1). Suppose that the taxpayer adopts the LIFO inventory method for the taxable year 1957 with an opening

inventory of 10 units at 10 cents per unit, that it makes 1957 purchases of 10 units as follows:

January	1 at	$0.11 =	$0.11
April	2 at	.12 =	.24
July	3 at	.13 =	.39
October	4 at	.14 =	.56
Totals	10		1.30

and that it has a 1957 closing inventory of 15 units. This closing inventory, depending upon the taxpayer's method of valuing inventory increases, will be computed as follows:

(a) Most recent purchases—

	10 at	$0.10	$1.00
October	4 at	.14	.56
July	1 at	.13	.13
Totals	15		1.69

(b) In order of acquisitions—

	10 at	$0.10	$1.00
January	1 at	.11	.11
April	2 at	.12	.24
July	2 at	.13	.26
Totals	15		1.61

or

(c) At an annual average—

	10 at	$0.10	$1.00
(130/10)	5 at	.13	.65
Totals	15		1.65

Example (2). Suppose that the taxpayer's closing inventory for 1958, the year following that involved in example (1) of this subdivision, reflects an inventory decrease for the year, and not an increase; suppose that there is, accordingly, a 1958 closing inventory of 13 units. Inasmuch as the decreased closing inventory will be determined wholly by reference to the 15 units reflected in the opening inventory for the year, and will be taken "in the order of acquisition" pursuant to section 472(b)(1), and inasmuch as the character of the taxpayer's opening inventory for 1958 will be dependent upon its method of valuing its 5-unit inventory increase for 1957, the closing inventory for 1958 will be computed as follows:

(a) In case the increase for 1957 was taken by reference to the most recent purchases—

From 1956	10 at	$0.10	$1.00
July 1957	1 at	.13	.13
October 1957	2 at	.14	.28
Totals	13		1.41

or

(b) In case the increase for 1957 was taken in the order of acquisition—

From 1956	10 at	$0.10	$1.00
January 1957	1 at	.11	.11
April 1957	2 at	.12	.24
Totals	13		1.35

or

(c) In case the increase for 1957 was taken on the basis of an average—

From 1956	10 at	$0.10	$1.00
From 1957	3 at	.13	.39
Totals	13		1.39

(2) In the case of a taxpayer engaged in manufacturing, fabricating, processing, or otherwise producing merchandise, such costs shall be determined:

(i) In the case of raw materials purchased or initially produced by the taxpayer, in the manner elected by the taxpayer under subparagraph (1) of this paragraph to the same extent as if the taxpayer were engaged in purchase and sale transactions; and

(ii) In the case of goods in process, regardless of the stage to which the manufacture, fabricating, or processing may have advanced, and in the case of finished goods, pursuant to any proper method which, in the opinion of the Commissioner, clearly reflects income.

(e) **LIFO conformity requirement—(1) In general.** The taxpayer must establish to the satisfaction of the Commissioner that the taxpayer, in ascertaining the income, profit, or loss for the taxable year for which the LIFO inventory method is first used, or for any subsequent taxable year, for credit purposes or for purposes of reports to shareholders, partners, or other proprietors, or to beneficiaries, has not used any inventory method other than that referred to in § 1.472–1 or at variance with the requirement referred to in § 1.472–2(c). See paragraph (e)(2) of this section for rules relating to the meaning of the term "taxable year" as used in this paragraph. The following are not considered at variance with the requirement of this paragraph:

(i) The taxpayer's use of an inventory method other than LIFO for purposes of ascertaining information reported as a supplement to or explanation of the taxpayer's primary presentation of the taxpayer's income, profit, or loss for a taxable year in credit statements or financial reports (including preliminary and unaudited financial reports). See paragraph (e)(3) of this section for rules relating to the reporting of supplemental and explanatory information ascertained by the use of an inventory method other than LIFO.

(ii) The taxpayer's use of an inventory method other than LIFO to ascertain the value of the taxpayer's inventory of goods on hand for purposes of reporting the value of such inventories as assets. See paragraph (e)(4) of this section for rules relating to such disclosures.

(iii) The taxpayer's use of an inventory method other than LIFO for purposes of ascertaining information reported in internal management reports. See paragraph (e)(5) of this section for rules relating to such reports.

(iv) The taxpayer's use of an inventory method other than LIFO for purposes of issuing reports or credit statements covering a period of operations that is less than the whole of a taxable year for which the LIFO method is used for Federal income tax purposes. See paragraph (e)(6) of this section for rules relating to series of interim reports.

(v) The taxpayer's use of the lower of LIFO cost or market method to value LIFO inventories for purposes of financial reports and credit statements. However, except as provided in paragraph (e)(7) of this section, a taxpayer may not use market value in lieu of cost to value inventories for purposes of financial reports or credit statements.

(vi) The taxpayer's use of a costing method or accounting method to ascertain income, profit, or loss for credit purposes or for purposes of financial reports if such costing method or accounting method is neither inconsistent with the inventory method referred to in § 1.472–1 nor at variance with the requirement referred to in § 1.472–2(c), regardless of whether such costing method or accounting method is used by the taxpayer for Federal income tax purposes. See paragraph (e)(8) of this section for examples of such costing methods and accounting methods.

(vii) For credit purposes or for purposes of financial reports, the taxpayer's treatment of inventories, after such inventories have been acquired in a transaction to which section 351 applies from a transferor that used the LIFO method with respect to such inventories, as if such inventories had the same acquisition dates and costs as in the hands of the transferor.

(viii) For credit purposes or for purposes of financial reports relating to a taxable year, the taxpayer's determination of income, profit, or loss for the taxable year by valuing inventories in accordance with the procedures described in section 472(b)(1) and (3), notwithstanding that such valuation differs from the valuation of inventories for Federal income tax purposes because the taxpayer either—

(A) Adopted such procedures for credit or financial reporting purposes beginning with an accounting period other than the taxable year for which the LIFO method was first used by the taxpayer for Federal income tax purposes, or

(B) With respect to such inventories treated as a business combination for credit or financial reporting purposes in a manner different from the treatment of the business combination for Federal income tax purposes.

(2) One-year periods other than a taxable year. The rules of this paragraph relating to the determination of income, profit, or loss for a taxable year and credit statements or financial reports that cover a taxable year also apply to the determination of income, profit, or loss for a one-year period other than a taxable year and credit statements or financial reports that cover a one-year period other than a taxable year, but only if the one-year period both begins and ends in a taxable year or years for which the taxpayer uses the LIFO method for Federal income tax purposes. For example, the requirements of paragraph (e)(1) of this section apply to a taxpayer's determination of income for purposes of a credit statement that covers a 52-week fiscal year beginning and ending in a taxable year for which the taxpayer uses the LIFO method for Federal income tax purposes. Similarly, in the case of a calendar year taxpayer, the requirements of paragraph (e)(1) of this section apply to the taxpayer's determination of income for purposes of a credit statement that covers the period October 1, 1981, through September 30, 1982, if the taxpayer uses the LIFO method for Federal income tax purposes in taxable years 1981 and 1982. However, the Commissioner will waive any violation of the requirements of this paragraph in the case of a credit statement or financial report that covers a one-year period other than a taxable year if the report was issued before January 22, 1981.

(3) Supplemental and explanatory information—(i) Face of the income statement. Information reported on the face of a taxpayer's financial income statement for a taxable year is not considered a supplement to or explanation of the taxpayer's primary presentation of the taxpayer's income, profit, or loss for the taxable year in credit statements or financial reports. For purposes of paragraph (e)(3) of this section, the face of an income statement does not include notes to the income statement presented on the same page as the income statement, but only if all notes to the financial income statement are presented together.

(ii) Notes to the income statement. Information reported in notes to a taxpayer's financial income statement is considered a supplement to or explanation of the taxpayer's primary presentation

of income, profit, or loss for the period covered by the income statement if all notes to the financial income statement are presented together and if they accompany the income statement in a single report. If notes to an income statement are issued in a report that does not include the income statement, the question of whether the information reported therein is supplemental or explanatory is determined under the rules in paragraph (e)(3)(iv) of this section.

(iii) Appendices and supplements to the income statement. Information reported in an appendix or supplement to a taxpayer's financial income statement is considered a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss for the period covered by the income statement if the appendix or supplement accompanies the income statement in a single report and the information reported in the appendix or supplement is clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement. If an appendix or supplement to an income statement is issued in a report that does not include the income statement, the question of whether the information reported therein is supplemental or explanatory is determined under the rules in paragraph (e)(3)(iv) of this section. For purposes of paragraph (e)(3)(iii) of this section, an appendix or supplement to an income statement includes written statements, schedules, and reports that are labelled supplements or appendices to the income statement. However, sections of an annual report such as those labelled "President's Letter", "Management's Analysis", "Statement of Changes in Financial Position", "Summary of Key Figures", and similar sections are reports described in paragraph (e)(3)(iv) of this section and are not considered "supplements or appendices to an income statement" within the meaning of paragraph (e)(3)(iii) of this section, regardless of whether such sections are also labelled as supplements or appendices. For purposes of paragraph (e)(3)(iii) of this section, information is considered to be clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement if the information either—

(A) Is reported in an appendix or supplement that contains a general statement identifying all such supplemental or explanatory information;

(B) Is identified specifically as supplemental or explanatory by a statement immediately preceding or following the disclosure of the information;

(C) Is disclosed in the context of making a comparison to corresponding information disclosed both on the face of the taxpayer's income statement and in the supplement or appendix; or

(D) Is a disclosure of the effect on an item reported on the face of the taxpayer's income statement of having used the LIFO method.

For example, a restatement of cost of goods sold based on an inventory method other than LIFO is considered to be clearly identified as supplemental or explanatory information if the supplement or appendix containing the restatement contains a general statement that all information based on such inventory method is reported in the appendix or supplement as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement.

(iv) Other reports; in general. The rules of paragraph (e)(3)(iv), (v), and (vi) of this section apply to the following types of reports: news releases; letters to shareholders, partners, or other proprietors or beneficiaries; oral statements at press conferences, shareholders' meetings or securities analysts' meetings; sections of an annual report such as those labelled "President's Letter", "Management's Analysis", "Statement of Changes in Financial Position", "Summary of Key Figures", and similar sections; and reports other than a taxpayer's income statement or accompanying notes, appendices, or supplements. Information disclosed in such a report is considered a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss for the period covered by an income statement if the supplemental or explanatory information is clearly identified as a supplement to or explanation of the taxpayer's primary presentation of income, profit, or loss as reported on the face of the taxpayer's income statement and the specific item of information being explained or supplemented, such as the cost of goods sold, net income, or earnings per share ascertained using the LIFO method, is also reported in the other report.

(v) Other reports; disclosure of non-LIFO income. For purposes of paragraph (e)(3)(iv) of this section, supplemental or explanatory information is considered to have been clearly identified as such if it would be considered to have been clearly identified as such under the rules of paragraph (e)(3)(iii) of this section, relating to information

reported in supplements or appendices to an income statement. For example, if at a securities analysts' meeting the following question is asked, "What would the reported earnings per share for the year have been if the FIFO method had been used to value inventories?", it would be permissible to respond "Reported earnings per share for the year were $6.00. If the company had used the FIFO method to value inventories this year and had computed earnings based upon the following assumptions, earnings per share would have been $8.20. FIFO earnings are based on the following assumptions:

"(A) The use of the same effective tax rate as used in computing LIFO earnings, and

"(B) All other conditions and assumptions remain the same, including—

"(1) The use of the LIFO method for Federal income tax purposes and

"(2) The investment of the tax savings resulting from such use of the LIFO method, the income from which is included in both LIFO and FIFO 'earnings.' "

(vi) Other reports; disclosure of effect on income. For purposes of paragraph (e)(3)(iv) of this section, if the only supplement to or explanation of a specific item is the effect on the item of having used LIFO instead of a method other than LIFO to value inventories, it is not necessary to also report the specific item. For example, if at a shareholders' meeting the question is asked, "What was the effect on reported earnings per share of not having used FIFO to value inventories?", it would be permissible to respond "If earnings would have been computed on the basis of the following assumptions, the use of LIFO instead of FIFO to value inventories would have decreased reported earnings per share by $2.20. FIFO earnings are based on the following assumptions:

"(A) The use of the same effective tax rate as used in computing LIFO earnings, and

"(B) All other conditions and assumptions remain the same, including—

"(1) The use of the LIFO method for Federal income tax purposes and

"(2) The investment of the tax savings resulting from such use of the LIFO method, the income from which is included in both LIFO and FIFO earnings."

(4) Inventory asset value disclosures. Under paragraph (e)(1)(ii) of this section, the use of an inventory method other than LIFO to ascertain the value of the taxpayer's inventories for purposes of reporting the value of the inventories as assets is not considered the ascertainment of income, profit, or loss and therefore is not considered at variance with the requirement of paragraph (e)(1) of this section. Therefore, a taxpayer may disclose the value of inventories on a balance sheet using a method other than LIFO to identify the inventories, and such a disclosure will not be considered at variance with the requirement of paragraph (e)(1) of this section. However, the disclosure of income, profit, or loss for a taxable year on a balance sheet issued to creditors, shareholders, partners, other proprietors, or beneficiaries is considered at variance with the requirement of paragraph (e)(1) of this section if such income information is ascertained using an inventory method other than LIFO and such income information is for a taxable year for which the LIFO method is used for Federal income tax purposes. Therefore, a balance sheet that discloses the net worth of a taxpayer, determined as if income had been ascertained using an inventory method other than LIFO, may be at variance with the requirement of paragraph (e)(1) of this section if the disclosure of net worth is made in a manner that also discloses income, profit, or loss for a taxable year.

However, a disclosure of income, profit, or loss using an inventory method other than LIFO is not considered at variance with the requirement of paragraph (e)(1) of this section if the disclosure is made in the form of either a footnote to the balance sheet or a parenthetical disclosure on the face of the balance sheet. In addition, an income disclosure is not considered at variance with the requirement of paragraph (e)(1) of this section if the disclosure is made on the face of a supplemental balance sheet labelled as a supplement to the taxpayer's primary presentation of financial position, but only if, consistent with the rules of paragraph (e)(3) of this section, such a disclosure is clearly identified as a supplement to or explanation of the taxpayer's primary presentation of financial income as reported on the face of the taxpayer's income statement.

(5) Internal management reports. [Reserved]

(6) Series of interim reports. For purposes of paragraph (e)(1)(iv) of this section, a series of credit statements or financial reports is considered a single statement or report covering a period of operations if the statements or reports in the series are prepared using a single inventory method and

can be combined to disclose the income, profit, or loss for the period. However, the Commissioner will waive any violation of the requirement of this paragraph in the case of a series of interim reports issued before February 6, 1978, that cover a taxable year, or a series of interim reports issued before January 22, 1981 that cover a one-year period other than a taxable year.

(7) **Market value.** The Commissioner will waive any violation of the requirement of this paragraph in the case of a taxpayer's use of market value in lieu of cost for a credit statement or financial report issued before January 22, 1981. However, the special rule of this (7) applies only to a taxpayer's use of market value in lieu of cost and does not apply to the use of a method of valuation such as market value in lieu of cost but not more than FIFO cost.

(8) **Use of different methods.** The following are examples of costing methods and accounting methods that are neither inconsistent with the inventory method referred to in § 1.472–1 nor at variance with the requirement of § 1.472–2(c) and which, under paragraph (e)(1)(vi) of this section, may be used to ascertain income, profit, or loss for credit purposes or for purposes of financial reports regardless of whether such method is also used by the taxpayer for Federal income tax purposes:

(i) Any method relating to the determination of which costs are includible in the computation of the cost of inventory under the full absorption inventory method.

(ii) Any method of establishing pools for inventory under the dollar-value LIFO inventory method.

(iii) Any method of determining the LIFO value of a dollar-value inventory pool, such as the double-extension method, the index method, and the link chain method.

(iv) Any method of determining or selecting a price index to be used with the index or link chain method of valuing inventory pools under the dollar-value LIFO inventory method.

(v) Any method permitted under § 1.472–8 for determining the current-year cost of closing inventory for purposes of using the dollar-value LIFO inventory method.

(vi) Any method permitted under § 1.472–2(d) for determining the cost of goods in excess of goods on hand at the beginning of the year for purposes of using a LIFO method other than the dollar-value LIFO method.

(vii) Any method relating to the classification of an item as inventory or a capital asset.

(viii) The use of an accounting period other than the period used for Federal income tax purposes.

(ix) The use of cost estimates.

(x) The use of actual cost of cut timber or the cost determined under section 631(a).

(xi) The use of inventory costs unreduced by any adjustment required by the application of section 108 and section 1017, relating to discharge of indebtedness.

(xii) The determination of the time when sales or purchases are accrued.

(xiii) The use of a method to allocate basis in the case of a business combination other than the method used for Federal income tax purposes.

(xiv) The treatment of transfers of inventory between affiliated corporations in a manner different from that required by § 1.1502–13.

(9) **Reconciliation of LIFO inventory values.** A taxpayer may be required to reconcile differences between the value of inventories maintained for credit or financial reporting purposes and for Federal income tax purposes in order to show that the taxpayer has satisfied the requirements of this paragraph.

(f) Goods of the specified type on hand as of the close of the taxable year preceding the taxable year for which this inventory method is first used shall be included in the taxpayer's closing inventory for such preceding taxable year at cost determined in the manner prescribed in paragraph (c) of this section.

(g) The LIFO inventory method, once adopted by the taxpayer with the approval of the Commissioner, shall be adhered to in all subsequent taxable years unless—

(1) A change to a different method is approved by the Commissioner; or

(2) The Commissioner determines that the taxpayer, in ascertaining income, profit, or loss for the whole of any taxable year subsequent to his adoption of the LIFO inventory method, for credit purposes or for the purpose of reports to shareholders, partners, or other proprietors, or to beneficiaries, has used any inventory method at variance with that referred to in § 1.472–1 and requires of the taxpayer a change to a different

method for such subsequent taxable year or any taxable year thereafter.

(h) The records and accounts employed by the taxpayer in keeping his books shall be maintained in conformity with the inventory method referred to in § 1.472–1; and such supplemental and detailed inventory records shall be maintained as will enable the district director readily to verify the taxpayer's inventory computations as well as his compliance with the requirements of section 472 and §§ 1.472–1 through 1.472–7.

(i) Where the taxpayer is engaged in more than one trade or business, the Commissioner may require that if the LIFO method of valuing inventories is used with respect to goods in one trade or business the same method shall also be used with respect to similar goods in the other trades or businesses if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essential to a clear reflection of income.

[T.D. 6500, 25 FR 11728, Nov. 26, 1960, as amended by T.D. 6539, 26 FR 518, Jan. 20, 1961; T.D. 7756, 46 FR 6920, Jan. 22, 1981; T.D. 7756, 46 FR 15685, March 9, 1981]

§ 1.472–3 Time and manner of making election.

(a) The LIFO inventory method may be adopted and used only if the taxpayer files with his income tax return for the taxable year as of the close of which the method is first to be used a statement of his election to use such inventory method. The statement shall be made on Form 970 pursuant to the instructions printed with respect thereto and to the requirements of this section, or in such other manner as may be acceptable to the Commissioner. Such statement shall be accompanied by an analysis of all inventories of the taxpayer as of the beginning and as of the end of the taxable year for which the LIFO inventory method is proposed first to be used, and also as of the beginning of the prior taxable year. In the case of a manufacturer, this analysis shall show in detail the manner in which costs are computed with respect to raw materials, goods in process, and finished goods, segregating the products (whether in process or finished goods) into natural groups on the basis of either (1) similarity in factory processes through which they pass, or (2) similarity of raw materials used, or (3) similarity in style, shape, or use of finished products. Each group of products shall be clearly described.

(b) The taxpayer shall submit for the consideration of the Commissioner in connection with the taxpayer's adoption or use of the LIFO inventory method such other detailed information with respect to his business or accounting system as may be at any time requested by the Commissioner.

(c) As a condition to the taxpayer's use of the LIFO inventory method, the Commissioner may require that the method be used with respect to goods other than those specified in the taxpayer's statement of election if, in the opinion of the Commissioner, the use of such method with respect to such other goods is essential to a clear reflection of income.

(d) Whether or not the taxpayer's application for the adoption and use of the LIFO inventory method should be approved, and whether or not such method, once adopted, may be continued, and the propriety of all computations incidental to the use of such method, will be determined by the Commissioner in connection with the examination of the taxpayer's income tax returns.

[T.D. 6500, 25 FR 11729, Nov. 26, 1960, as amended by T.D. 7295, 38 FR 34203, Dec. 12, 1973]

§ 1.472–4 Adjustments to be made by taxpayer.

A taxpayer may not change to the LIFO method of taking inventories unless, at the time he files his application for the adoption of such method, he agrees to such adjustments incident to the change to or from such method, or incident to the use of such method, in the inventories of prior taxable years or otherwise, as the district director upon the examination of the taxpayer's returns may deem necessary in order that the true income of the taxpayer will be clearly reflected for the years involved.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§ 1.472–5 Revocation of election.

An election made to adopt and use the LIFO inventory method is irrevocable, and the method once adopted shall be used in all subsequent taxable years, unless the use of another method is required by the Commissioner, or authorized by him pursuant to a written application therefor filed as provided in paragraph (e) of § 1.446–1.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§ 1.472–6 Change from LIFO inventory method.

If the taxpayer is granted permission by the Commissioner to discontinue the use of LIFO method of taking inventories, and thereafter to use some other method, or if the taxpayer is required

by the Commissioner to discontinue the use of the LIFO method by reason of the taxpayer's failure to conform to the requirements detailed in § 1.472–2, the inventory of the specified goods for the first taxable year affected by the change and for each taxable year thereafter shall be taken—

(a) In conformity with the method used by the taxpayer under section 471 in inventorying goods not included in his LIFO inventory computations; or

(b) If the LIFO inventory method was used by the taxpayer with respect to all of his goods subject to inventory, then in conformity with the inventory method used by the taxpayer prior to his adoption of the LIFO inventory method; or

(c) If the taxpayer had not used inventories prior to his adoption of the LIFO inventory method and had no goods currently subject to inventory by a method other than the LIFO inventory method, then in conformity with such inventory method as may be selected by the taxpayer and approved by the Commissioner as resulting in a clear reflection of income; or

(d) In any event, in conformity with any inventory method to which the taxpayer may change pursuant to application approved by the Commissioner.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§ 1.472–7 Inventories of acquiring corporations.

For additional rules in the case of certain corporate acquisitions specified in section 381(a), see section 381(c)(5) and the regulations thereunder.

[T.D. 6500, 25 FR 11730, Nov. 26, 1960]

§ 1.472–8 Dollar-value method of pricing LIFO inventories.

(a) Election to use dollar-value method. Any taxpayer may elect to determine the cost of his LIFO inventories under the so-called "dollar-value" LIFO method, provided such method is used consistently and clearly reflects the income of the taxpayer in accordance with the rules of this section. The dollar-value method of valuing LIFO inventories is a method of determining cost by using "base-year" cost expressed in terms of total dollars rather than the quantity and price of specific goods as the unit of measurement. Under such method the goods contained in the inventory are grouped into a pool or pools as described in paragraphs (b) and (c) of this section. The term "base-year cost" is the aggregate of the cost (determined as of the beginning of the taxable year for which the LIFO method is first adopted, *i.e.*, the base date) of all items in a pool. The taxable year for which the LIFO method is first adopted with respect to any item in the pool is the "base year" for that pool, except as provided in paragraph (g)(3) of this section. Liquidations and increments of items contained in the pool shall be reflected only in terms of a net liquidation or increment for the pool as a whole. Fluctuations may occur in quantities of various items within the pool, new items which properly fall within the pool may be added, and old items may disappear from the pool, all without necessarily effecting a change in the dollar value of the pool as a whole. An increment in the LIFO inventory occurs when the end of the year inventory for any pool expressed in terms of base-year cost is in excess of the beginning of the year inventory for that pool expressed in terms of base-year cost. In determining the inventory value for a pool, the increment, if any, is adjusted for changing unit costs or values by reference to a percentage, relative to base-year-cost, determined for the pool as a whole. See paragraph (e) of this section. See also paragraph (f) of this section for rules relating to the change to the dollar-value LIFO method from another LIFO method.

(b) Principles for establishing pools of manufacturers and processors—(1) Natural business unit pools. A pool shall consist of all items entering into the entire inventory investment for a natural business unit of a business enterprise, unless the taxpayer elects to use the multiple pooling method provided in subparagraph (3) of this paragraph. Thus, if a business enterprise is composed of only one natural business unit, one pool shall be used for all of its inventories, including raw materials, goods in process, and finished goods. If, however, a business enterprise is actually composed of more than one natural business unit, more than one pool is required. Where similar types of goods are inventoried in two or more natural business units of the taxpayer, the Commissioner may apportion or allocate such goods among the various natural business units, if he determines that such apportionment or allocation is necessary in order to clearly reflect the income of such taxpayer. Where a manufacturer or processor is also engaged in the wholesaling or retailing of goods purchased from others, any pooling of the LIFO inventory of such purchased goods for the wholesaling or retailing operations shall be determined in accordance with the rules of paragraph (c) of this section.

(2) Definition of natural business unit. (i) Whether an enterprise is composed of more than

one natural business unit is a matter of fact to be determined from all the circumstances. The natural business divisions adopted by the taxpayer for internal management purposes, the existence of separate and distinct production facilities and processes, and the maintenance of separate profit and loss records with respect to separate operations are important considerations in determining what is a business unit, unless such divisions, facilities, or accounting records are set up merely because of differences in geographical location. In the case of a manufacturer or processor, a natural business unit ordinarily consists of the entire productive activity of the enterprise within one product line or within two or more related product lines including (to the extent engaged in by the enterprise) the obtaining of materials, the processing of materials, and the selling of manufactured or processed goods. Thus, in the case of a manufacturer or processor, the maintenance and operation of a raw material warehouse does not generally constitute, of itself, a natural business unit. If the taxpayer maintains and operates a supplier unit the production of which is both sold to others and transferred to a different unit of the taxpayer to be used as a component part of another product, the supplier unit will ordinarily constitute a separate and distinct natural business unit. Ordinarily, a processing plant would not in itself be considered a natural business unit if the production of the plant, although saleable at this stage, is not sold to others, but is transferred to another plant of the enterprise, not operated as a separate division, for further processing or incorporation into another product. On the other hand, if the production of a manufacturing or processing plant is transferred to a separate and distinct division of the taxpayer, which constitutes a natural business unit, the supplier unit itself will ordinarily be considered a natural business unit. However, the mere fact that a portion of the production of a manufacturing or processing plant may be sold to others at a certain stage of processing with the remainder of the production being further processed or incorporated into another product will not of itself be determinative that the activities devoted to the production of the portion sold constitute a separate business unit. Where a manufacturer or processor is also engaged in the wholesaling or retailing of goods purchased from others, the wholesaling or retailing operations with respect to such purchased goods shall not be considered a part of any manufacturing or processing unit.

(ii) The rules of this subparagraph may be illustrated by the following examples:

Example (1). A corporation manufactures, in one division, automatic clothes washers and driers of both commercial and domestic grade as well as electric ranges, mangles, and dishwashers. The corporation manufactures, in another division, radios and television sets. The manufacturing facilities and processes used in manufacturing the radios and television sets are distinct from those used in manufacturing the automatic clothes washers, etc. Under these circumstances, the enterprise would consist of two business units and two pools would be appropriate, one consisting of all of the LIFO inventories entering into the manufacture of clothes washers and driers, electric ranges, mangles, and dishwashers and the other consisting of all of the LIFO inventories entering into the production of radio and television sets.

Example (2). A taxpayer produces plastics in one of its plants. Substantial amounts of the production are sold as plastics. The remainder of the production is shipped to a second plant of the taxpayer for the production of plastic toys which are sold to customers. The taxpayer operates his plastics plant and toy plant as separate divisions. Because of the different product lines and the separate divisions the taxpayer has two natural business units.

Example (3). A taxpayer is engaged in the manufacture of paper. At one stage of processing, uncoated paper is produced. Substantial amounts of uncoated paper are sold at this stage of processing. The remainder of the uncoated paper is transferred to the taxpayer's finishing mill where coated paper is produced and sold. This taxpayer has only one natural business unit since coated and uncoated paper are within the same product line.

(3) **Multiple pools—(i) Principles for establishing multiple pools.** (a) A taxpayer may elect to establish multiple pools for inventory items which are not within a natural business unit as to which the taxpayer has adopted the natural business unit method of pooling as provided in subparagraph (1) of this paragraph. Each such pool shall ordinarily consist of a group of inventory items which are substantially similar. In determining whether such similarity exists, consideration shall be given to all the facts and circumstances. The formulation of detailed rules for selection of pools applicable to all taxpayers is not feasible. Important considerations to be taken into account include, for example, whether there is substantial similarity in the types of raw materials used or in the processing operations applied; whether the raw materials used are readily interchangeable; whether there is similarity in the use of the products; whether the groupings are consistently followed for purposes of internal accounting and management; and whether the groupings follow customary business practice in the taxpayer's industry. The selection of pools in each case must also take into consideration such factors as the nature of the inventory items subject to the dollar-value LIFO method and the significance of such items to the taxpayer's business operations. Where similar types of goods are inventoried in natural business units and multiple pools of the taxpayer, the Commissioner may apportion or allocate such goods

among the natural business units and the multiple pools, if he determines that such apportionment or allocation is necessary in order to clearly reflect the income of the taxpayer.

(b) Raw materials which are substantially similar shall be pooled together in accordance with the principles of this subparagraph. However, inventories of raw or unprocessed materials of an unlike nature may not be placed into one pool, even though such materials become part of otherwise identical finished products.

(c) Finished goods and goods-in-process in the inventory shall be placed into pools classified by major classes or types of goods. The same class or type of finished goods and goods-in-process shall ordinarily be included in the same pool. Where the material content of a class of finished goods and goods-in-process included in a pool has been changed, for example, to conform with current trends in an industry, a separate pool of finished goods and goods-in-process will not ordinarily be required unless the change in material content results in a substantial change in the finished goods.

(d) The requirement that pools be established by major types of materials or major classes of goods is not to be construed so as to preclude the establishment of a miscellaneous pool. Since a taxpayer may elect the dollar-value LIFO method with respect to all or any designated goods in his inventory, there may be a number of such inventory items covered in the election. A miscellaneous pool shall consist only of items which are relatively insignificant in dollar value by comparison with other inventory items in the particular trade or business and which are not properly includible as part of another pool.

(ii) Raw materials content pools. The dollar-value method of pricing LIFO inventories may be used in conjunction with the raw materials content method authorized in § 1.472–1. Raw materials (including the raw material content of finished goods and goods-in-process) which are substantially similar shall be pooled together in accordance with the principles of subdivision (i) of this subparagraph. However, inventories of materials of an unlike nature may not be placed into one pool, even though such materials become part of otherwise identical finished products.

(c) Principles for establishing pools for wholesalers, retailers, etc. Items of inventory in the hands of wholesalers, retailers, jobbers, and distributors shall be placed into pools by major lines, types, or classes of goods. In determining such groupings, customary business classifications of the particular trade in which the taxpayer is engaged is an important consideration. An example of such customary business classification is the department in the department store. In such case, practices are relatively uniform throughout the trade, and departmental grouping is peculiarly adapted to the customs and needs of the business. However, in appropriate cases, the principles set forth in paragraphs (b)(1) and (2) of this section, relating to pooling by natural business units, may be used, with permission of the Commissioner, by wholesalers, retailers, jobbers, or distributors. Where a wholesaler or retailer is also engaged in the manufacturing or processing of goods, the pooling of the LIFO inventory for the manufacturing or processing operations shall be determined in accordance with the rules of paragraph (b) of this section.

(d) Determination of appropriateness of pools. Whether the number and the composition of the pools used by the taxpayer is appropriate, as well as the propriety of all computations incidental to the use of such pools, will be determined in connection with the examination of the taxpayer's income tax returns. Adequate records must be maintained to support the base-year unit cost as well as the current-year unit cost for all items priced on the dollar-value LIFO inventory method, regardless of the method authorized by paragraph (e) of this section which is used in computing the LIFO value of the dollar-value pool. The pool or pools selected must be used for the year of adoption and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commissioner as provided in paragraph (e) of § 1.446–1. However, see paragraph (h) of this section for authorization to change the method of pooling in certain specified cases.

(e) Methods of computation of the LIFO value of a dollar-value pool—(1) Methods authorized. A taxpayer may ordinarily use only the so-called "double-extension" method for computing the base-year and current-year cost of a dollar-value inventory pool. Where the use of the double-extension method is impractical, because of technological changes, the extensive variety of items, or extreme fluctuations in the variety of the items, in a dollar-value pool, the taxpayer may use an index method for computing all or part of the LIFO value of the pool. An index may be computed by double-extending a representative portion of the inventory in a pool or by the use of other sound

and consistent statistical methods. The index used must be appropriate to the inventory pool to which it is to be applied. The appropriateness of the method of computing the index and the accuracy, reliability, and suitability of the use of such index must be demonstrated to the satisfaction of the district director in connection with the examination of the taxpayer's income tax returns. The use of any so-called "link-chain" method will be approved for taxable years beginning after December 31, 1960, only in those cases where the taxpayer can demonstrate to the satisfaction of the district director that the use of either an index method or the double-extension method would be impractical or unsuitable in view of the nature of the pool. A taxpayer using either an index or link-chain method shall attach to his income tax return for the first taxable year beginning after December 31, 1960, for which the index or link-chain method is used, a statement describing the particular link-chain method or the method used in computing the index. The statement shall be in sufficient detail to facilitate the determination as to whether the method used meets the standards set forth in this subparagraph. In addition, a copy of the statement shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C. 20224. The taxpayer shall submit such other information as may be requested with respect to such index or link-chain method. Adequate records must be maintained by the taxpayer to support the appropriateness, accuracy, and reliability of an index or link-chain method. A taxpayer may request the Commissioner to approve the appropriateness of an index or link-chain method for the first taxable year beginning after December 31, 1960, for which it is used. Such request must be submitted within 90 days after the beginning of the first taxable year beginning after December 31, 1960, in which the taxpayer desires to use the index or link-chain method, or on or before May 1, 1961, whichever is later. A taxpayer entitled to use the retail method of pricing LIFO inventories authorized by paragraph (k) of § 1.472–1 may use retail price indexes prepared by the United States Bureau of Labor Statistics. Any method of computing the LIFO value of a dollar-value pool must be used for the year of adoption and all subsequent taxable years, unless the taxpayer obtains the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a different method.

(2) Double-extension method. (i) Under the double-extension method the quantity of each item in the inventory pool at the close of the taxable year is extended at both base-year unit cost and current-year unit cost. The respective extensions at the two costs are then each totaled. The first total gives the amount of the current inventory in terms of base-year cost and the second total gives the amount of such inventory in terms of current-year cost.

(ii) The total current-year cost of items making up a pool may be determined—

(a) By reference to the actual cost of the goods most recently purchased or produced;

(b) By reference to the actual cost of the goods purchased or produced during the taxable year in the order of acquisition;

(c) By application of an average unit cost equal to the aggregate cost of all of the goods purchased or produced throughout the taxable year divided by the total number of units so purchased or produced; or

(d) Pursuant to any other proper method which, in the opinion of the Commissioner, clearly reflects income.

(iii) Under the double-extension method a base-year unit cost must be ascertained for each item entering a pool for the first time subsequent to the beginning of the base year. In such a case, the base-year unit cost of the entering item shall be the current-year cost of that item unless the taxpayer is able to reconstruct or otherwise establish a different cost. If the entering item is a product or raw material not in existence on the base date, its cost may be reconstructed, that is, the taxpayer using reasonable means may determine what the cost of the item would have been had it been in existence in the base year. If the item was in existence on the base date but not stocked by the taxpayer, he may establish, by using available data or records, what the cost of the item would have been to the taxpayer had he stocked the item. If the base-year unit cost of the entering item is either reconstructed or otherwise established to the satisfaction of the Commissioner, such cost may be used as the base-year unit cost in applying the double-extension method. If the taxpayer does not reconstruct or establish to the satisfaction of the Commissioner a base-year unit cost, but does reconstruct or establish to the satisfaction of the Commissioner the cost of the item at some year subsequent to the base year, he may use the earliest cost which he does reconstruct or establish as the base-year unit cost.

(iv) To determine whether there is an increment or liquidation in a pool for a particular taxable

year, the end of the year inventory of the pool expressed in terms of base-year cost is compared with the beginning of the year inventory of the pool expressed in terms of base-year cost. When the end of the year inventory of the pool is in excess of the beginning of the year inventory of the pool an increment occurs in the pool for that year. If there is an increment for the taxable year, the ratio of the total current-year cost of the pool to the total base-year cost of the pool must be computed. This ratio when multiplied by the amount of the increment measured in terms of base-year cost gives the LIFO value of such increment. The LIFO value of each such increment is hereinafter referred to in this section as the "layer of increment" and must be separately accounted for and a record thereof maintained as a separate layer of the pool, and may not be combined with a layer of increment occurring in a different year. On the other hand, when the end of the year inventory of the pool is less than the beginning of the year inventory of the pool, a liquidation occurs in the pool for that year. Such liquidation is to be reflected by reducing the most recent layer of increment by the excess of the beginning of the year inventory over the end of the year inventory of the pool. However, if the amount of the liquidation exceeds the amount of the most recent layer of increment, the preceding layers of increment in reverse chronological order are to be successively reduced by the amount of such excess until all the excess is absorbed. The base-year inventory is to be reduced by liquidation only to the extent that the aggregate of all liquidation exceeds the aggregate of all layers of increment.

(v) The following examples illustrate inventories under the double-extension the computation of the LIFO value of method.

Example (1). (a) A taxpayer elects, beginning with the calendar year 1961, to compute his inventories by use of the LIFO inventory method under section 472 and further elects to use the dollar-value method in pricing such inventories as provided in paragraph (a) of this section. He creates Pool No. 1 for items A, B, and C. The composition of the inventory for Pool No. 1 at the base date, January 1, 1961, is as follows:

Items	Units	Unit cost	Total cost
A	1,000	$5	$5,000
B	2,000	4	8,000
C	500	2	1,000
Total base-year cost at Jan. 1, 1961	.....	.....	14,000

(b) The closing inventory of Pool No. 1 at December 31, 1961, contains 3,000 units of A, 1,000 units of B, and 500 units of C. The taxpayer computes the current-year cost of the items making up the pool by reference to the actual cost of goods most recently purchased. The most recent purchases of items A, B, and C are as follows:

Item	Purchase date	Quantity pur-chased	Unit cost
A	Dec. 15, 1961.....	3,500	$6.00
B	Dec. 10, 1961.....	2,000	5.00
C	Nov. 1, 1961	500	2.50

(c) The inventory of Pool No. 1 at December 31, 1961, shown at base-year and current-year cost is as follows:

		Dec. 31, 1961 inventory at Jan. 1, 1961, base-year cost		Dec. 31, 1961, inventory at current-year cost	
Item	Quan-tity	Unit cost	Amount	Unit cost	Amount
A	3,000	$5.00	$15,000	$6.00	$18,000
B	1,000	4.00	4,000	5.00	5,000
C	500	2.00	1,000	2.50	1,250
Total	.....	.....	20,000	.....	24,250

(d) If the amount of the December 31, 1961, inventory at base-year cost were equal to, or less than, the base-year cost of $14,000 at January 1, 1961, such amount would be the closing LIFO inventory at December 31, 1961. However, since the base-year cost of the closing LIFO inventory at December 31, 1961, amounts to $20,000, and is in excess of the $14,000 base-year cost of the opening inventory for that year, there is a $6,000 increment in Pool No. 1 during the year. This increment must be valued at current-year cost, *i.e.*, the ratio of 24,250/20,000, or 121.25 percent. The LIFO value of the inventory at December 31, 1961, is $21,275, computed as follows:

Pool No. 1

	Dec. 31, 1961, inventory at Jan. 1, 1961, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
Jan. 1, 1961, base cost	14,000	100.00	$14,000
Dec. 31, 1961, increment	6,000	121.25	7,275
Total	20,000	....	21,275

Example (2). (a) Assume the taxpayer in example (1) during the year 1962 completely disposes of item C and purchases item D. Assume further that item D is properly includible in Pool No. 1 under the provisions of this section. The closing inventory on December 31, 1962, consists of quantities at current-year unit cost, as follows:

Items	Units	Current-year unit cost Dec. 31, 1962
A	2,000	$6.50
B	1,500	6.00
D	1,000	5.00

(b) The taxpayer establishes that the cost of item D, had he acquired it on January 1, 1961, would have been $2.00 per unit. Such cost shall be used as the base-year unit cost for item D, and the LIFO computations at December 31, 1962, are made as follows:

		Dec. 31, 1962, inventory at Jan. 1, 1961, base-year cost		Dec. 31, 1962, inventory at current-year cost	
Item	Quantity	Unit cost	Amount	Unit cost	Amount
A	2,000	$5.00	$10,000	$6.50	$13,000
B	1,500	4.00	6,000	6.00	9,000
D	1,000	2.00	2,000	5.00	5,000
Total	.....	.....	18,000	.....	27,000

(c) Since the closing inventory at base-year cost, $18,000, is less than the 1962 opening inventory at base-year cost, $20,000, a liquidation of $2,000 has occurred during 1962. This liquidation is to be reflected by reducing the most recent layer of increment. The LIFO value of the inventory at December 31, 1962, is $18,850, and is summarized as follows:

Pool No 1

	Dec. 31, 1962, inventory at Jan. 1, 1961, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1962, inventory at LIFO value
Jan. 1, 1961, base cost	14,000	100.00	$14,000
Dec. 31, 1961, increment	4,000	121.25	4,850
Total	18,000	....	18,850

(3) Use of inventory price index computed with reference to consumer or producer price indexes—(i) In general. For purposes of paragraph (e)(1) of this section, for taxable years beginning after December 31, 1981, an inventory price index computed in the manner provided by paragraph (e)(3) will be accepted by the Commissioner as an appropriate method of computing an index, and the use of such inventory price index to compute the LIFO value of a dollar-value inventory pool will be accepted as accurate, reliable, and suitable. A taxpayer using the inventory price index computation method provided by paragraph (e)(3) must use such method in determining the value of all goods for which the taxpayer has elected to use the LIFO method. However, the inventory price index computation method provided by paragraph (e)(3) may not be used by a taxpayer eligible to use inventory price indexes prepared by the United States Bureau of Labor Statistics for the purpose of valuing the LIFO inventories of a specific industry. Thus, a taxpayer eligible to use the retail price indexes prepared by the Bureau of Labor Statistics and published in *Department Store Inventory Price Indexes* may not use the inventory price index computation method provided by paragraph (e)(3). An inventory price index computed as provided by paragraph (e)(3) is computed in the manner provided by paragraph (e)(3)(ii) with reference to consumer or producer price indexes selected in the manner provided by paragraph (e)(3)(iii). Special rules for establishing inventory pools to be valued by an inventory price index computed in the manner provided by paragraph (e)(3) are in paragraph (e)(3)(iv). Rules relating to the adoption of, or change to, the method of computing an inventory price index in the manner provided by paragraph (e)(3) are in paragraph (e)(3)(v) and (vi).

(ii) Computation of index. An inventory price index computed in the manner provided by this (ii) shall be a stated percentage of the percent change in the selected consumer or producer price index or indexes for a specific category or categories of goods. The stated percentage for a taxpayer in a taxable year in which it is an eligible small business, as defined by section 474(b) of the Code, shall be 100 percent of the percent change in the selected price indexes. The stated percentage for all other taxpayers shall be 80 percent of the percent change in the selected price indexes.

See paragraph (e)(3)(iii) of this section for rules relating to the selection of appropriate consumer or producer price indexes. Thus, if the selected consumer or producer price index for a specific category of goods increased 10 percent for the period December 1981 to December 1982, an inventory price index computed in the manner provided by this (ii) with reference to such consumer or producer price index will reflect an increase of either 10 percent for an eligible small business or 8 percent (80 percent of 10 percent) for all other taxpayers. If the selected consumer or producer price index for a specific category of goods increased 10 percent per year for the period December 1981 to December 1983, an inventory price index computed in the manner provided by this (ii) with reference to such consumer or producer price index will reflect an increase of either 21 percent for an eligible small business or 16.8 percent (80 percent of 21 percent) for all other taxpayers. If under paragraph (e)(3)(iii) it is necessary to select more than one specific consumer or producer price

index for an inventory pool, the stated percentage of the percent change in such indexes is the stated percentage of the weighted average percent change for such indexes. Such weighted average is computed with reference to the relative amounts of costs in the inventory pool for each index category of goods. The costs to be used in computing such weighted average must be the relative current-year costs in ending inventory.

(iii) **Selection of consumer or producer price indexes**—(A) In general. An inventory price index computed as provided by paragraph (e)(3) of this section is computed with reference to the consumer or producer price indexes for specific categories of inventory items in the *CPI Detailed Report* or *Producer Prices and Price Indexes* published by the United States Bureau of Labor Statistics.

(B) Selection of indexes by category of inventory items. The selection of consumer or producer price indexes for an inventory pool is accomplished via a two-step process. First, the inventory items in each pool should be classified according to the detailed listings in the appropriate tables of the *CPI Detailed Report* or in *Producer Prices and Price Indexes* and assigned an index category. Second, an appropriate consumer or producer price index must be determined for each index category to which inventory items have been assigned. The assignment of index categories to the taxpayer's inventory items is accomplished by a process of elimination as follows:

(1) Whenever a specific inventory item in the taxpayer's inventory comprises 10 percent or more of total inventory value, such an inventory item must be placed in its own, separate index category. The index category selected must be the most detailed index category which includes that specific inventory item. In addition, any other inventory item that is included in such most detailed index category must also be included in such index category.

(2) If there are inventory items still remaining in the pool that have not been included in an index category, the taxpayer, beginning with the most detailed index categories for such remaining inventory items, must investigate successively less detailed index category levels and select the first index category that contains remaining inventory items which in the aggregate comprise 10 percent or more of total inventory value. The index category so selected must be the separate index category for the included inventory items. This procedure must be repeated either until all inventory items in the pool have been included in an index category, or until the remaining inventory items in the aggregate comprise less than 10 percent of total inventory value, or until it has been determined that no appropriate index category exists for the aggregate of such remaining inventory items.

(3) If there are inventory items remaining in the pool that comprise less than 10 percent of total inventory value, the index category to be selected for these inventory items must be the most detailed index category that includes such inventory items. If it has been determined that no appropriate index category exists for such remaining inventory items, such remaining inventory items must be combined in a miscellaneous index category created by the taxpayer.

In no event shall an index category be selected that is less detailed than either the 11 general categories of consumer goods described in Tables 3 and 5 of the *CPI Detailed Report* (see paragraph (e)(3)(iv) of this section), or the 15 general categories of producer goods described in Table 6 of the *Producer Prices and Price Indexes.* The determination of the appropriate index for an index category is accomplished as follows:

(4) Whenever an index category has been selected pursuant to paragraph (e)(3)(iii)(B)(1) of this section the appropriate index must be the published index for that index category.

(5) Whenever an index category has been selected pursuant to paragraph (e)(3)(iii)(B)(2) or (3) of this section, the appropriate index must be a weighted average of the published indexes of the index category items actually present in the taxpayer's inventory, excluding any index category items that have been placed in any other separate index category, weighted according to the weights used by BLS. Thus, if a taxpayer's inventory contains every inventory item that comprises the selected index category and none of these inventory items have been placed in any other separate index category, the appropriate index must be the published index for that index category. In the case of a miscellaneous index category created by the taxpayer, the appropriate index must be a weighted average of the published indexes for the index category items, weighted according to the weights used by BLS.

The use of BLS weights is limited only to the determination of the appropriate index for an index category. In computing the index for a pool, the taxpayer will weigh the appropriate indexes for the separate index categories comprising the pool according to the taxpayer's actual inventory weights for such separate index categories.

Whether the selection of the consumer or producer price indexes to be used to compute an inventory price index is appropriate, and the propriety of all computations incidental to the use of such consumer or producer price indexes, will be determined in connection with the examination of the taxpayer's income tax return. The selection of a consumer or producer price index for a specific good to compute an inventory price index under paragraph (e)(3) is a method of accounting. A taxpayer desiring to change the selection of such a consumer or producer price index must secure the consent of the Commissioner as provided in § 1.446–1(e). In the case of such a change, any layers of inventory increments previously determined and the LIFO value of such increments shall be retained. Instead of using the earliest taxable year for which the taxpayer adopted the LIFO method for any items in the inventory pool, the year of such change shall be used as the base year in determining the LIFO value of the inventory pool for the year of change and later taxable years. The base year costs of layers of increments in the pool at the beginning of the year of change shall be restated in terms of new base year costs using the year of change as the new base year.

(C) Other selection requirements. Manufacturers, processors, wholesalers, jobbers, and distributors may select indexes from only *Producer Prices and Price Indexes.* Retailers may select indexes from either the *CPI Detailed Report* or *Producer Prices and Price Indexes,* but if equally appropriate indexes could be selected from either publication, a retailer using the retail inventory method must select the index from the *CPI Detailed Report* and a retailer not using the retail inventory method must select the index from *Producer Prices and Price Indexes.* If a retailer using the retail inventory method selects a price index from *Producer Prices and Price Indexes,* the selected index must be converted into a retail price index. If a retailer not using the retail inventory method selects an index from the *CPI Detailed Report,* the selected index must be converted into a cost price index. Manufacturers, processors, wholesalers, jobbers, and distributors, must convert selected indexes into cost price indexes. In the case of the *CPI Detailed Report,* indexes may be selected only from Table 3 (Consumer Price Index for All Urban Consumers: Food expenditure categories, U.S. city average) and Table 5 (Consumer Price Index for All Urban Consumers: Nonfood expenditure categories, U.S. city average). In the case of the *Producer Prices and Price Indexes,* indexes may be selected only from Table 6 (Producer prices and price indexes for commodity groupings and individual items), unless the taxpayer can demonstrate that the selection of an index from another *Producer Prices and Price Indexes* table would be more appropriate. In the case of a taxpayer using the retail inventory method, the selected index must be the index as of the last month of the taxpayer's taxable year. Taxpayers that do not use the retail inventory method must select indexes as of the month or months most appropriate to the taxpayer's method of determining the current-year cost of the inventory pool under paragraph (e)(2)(ii) of this section, or make a one-time binding election of an appropriate representative month during the taxable year. The election must be clearly set forth on Form 970 (see paragraph (e)(3)(v) of this section).

(iv) **Special rules for pools.** A retailer, wholesaler, jobber, or distributor computing an inventory price index in the manner provided by paragraph (e)(3) of this section may, at the option of the taxpayer, establish an inventory pool for any group of goods included within one of eleven general categories of consumer goods described in the *CPI Detailed Report.* The eleven categories are food and beverages, housing maintenance and repair commodities, fuels (other than gasoline), house furnishings and housekeeping supplies, apparel commodities, private transportation (including gasoline), medical care commodities, entertainment commodities, tobacco products, toilet goods and personal care appliances, and school books and supplies. Inventory pools that comprise less than 5 percent of inventory value may be combined to form a single miscellaneous inventory pool. If the resulting miscellaneous inventory pool itself comprises less than 5 percent of inventory value, such pool may be combined only with the largest inventory pool. See paragraphs (b), (c) and (d) of this section for additional rules relating to the establishment of pools. See also section 474 of the Code for rules relating to the use of a single pool by an eligible small business. Except as provided in paragraph (e)(3)(v) of this section, relating to the adoption or change of method of computing an inventory price index, the rules of paragraph (g)(1) and (2) of this section apply to a change in method of pooling.

(v) **Adoption or change of method.** The use of an inventory price index computed in the manner provided by paragraph (e)(3) of this section is considered a method of accounting. A taxpayer permitted to adopt or change to the dollar-value LIFO inventory method without first securing the consent of the Commissioner may also adopt the inventory price index computation method pre-

scribed by paragraph (e)(3) incident to such adoption or change without first securing the consent of the Commissioner. In all other cases, a taxpayer may adopt or change to the inventory price index computation method prescribed by paragraph (e)(3) only after first securing the consent of the Commissioner as provided in § 1.446–1(e). However, in the case of a taxpayer not using the inventory price index computation method prescribed by paragraph (e)(3), the taxpayer may adopt or change to such method for the taxpayer's first or second taxable year beginning after December 31, 1981, without requesting the Commissioner's consent to such adoption or change. In addition, in such a case the taxpayer is not required to request the Commissioner's consent to a change in method of pooling incident to such adoption or change if the taxpayer is changing to a method of pooling authorized by paragraph (e)(3)(iv). In this case the rules of § 1.472–8(g) will apply. The inventory price index computation method provided by paragraph (e)(3) may be adopted and used only if the taxpayer indicates on a Form 970, or in such other manner as may be acceptable to the Commissioner, a listing of each inventory pool, the type of goods included in each pool, and the consumer or producer price index or indexes selected for each inventory pool. In the case of a taxpayer permitted to adopt or change to the inventory price index computation method without requesting the Commissioner's consent, the Form 970 shall be attached to the taxpayer's income tax return for the taxable year of such adoption or change. In other cases, the Form 970 shall be attached to a Form 3115 filed in accordance with § 1.446–1(e). Taxpayers must maintain adequate books and records of the use and computation of the inventory price index method in order to satisfy the requirements of § 1.472–2(h). Notwithstanding the rules in paragraph (e)(1) of this section, a taxpayer adopting or changing to the use of an inventory price index computed in the manner provided by paragraph (e)(3) is not required to demonstrate that the use of the double-extension method is impractical.

(vi) Requirement incident to change. In the case of a taxpayer using a method other than an inventory price index computed as prescribed by paragraph (e)(3) of this section to determine the LIFO value of a dollar-value inventory pool, any layers of inventory increments previously determined by such method and the LIFO value of such layers shall be retained if the taxpayer changes to the use of a price index computed as prescribed by paragraph (e)(3). Instead of using the earliest taxable year for which the taxpayer adopted the LIFO method for any items in the pool, the year of such change shall be used as the base year in determining the LIFO value of the inventory pool for the year of change and later taxable years. The base year costs of layers of increments in the pool at the beginning of the year of change shall be restated in terms of new base year cost, using the year of change as the new base year. See paragraph (f)(2) of this section for rules relating to a change to the dollar-value method from another method of pricing LIFO inventories.

(f) Change to dollar-value method from another method of pricing LIFO inventories—(1) Consent required. Except as provided in § 1.472–3 in the case of a taxpayer electing to use a LIFO inventory method for the first time, or in the case of a taxpayer changing to the dollar-value method and continuing to use the same pools as were used under another LIFO method, a taxpayer using another LIFO method of pricing inventories may not change to the dollar-value method of pricing such inventories unless he first secures the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1.

(2) Method of converting inventory. Where the taxpayer changes from one method of pricing LIFO inventories to the dollar-value method, the ending LIFO inventory for the taxable year immediately preceding the year of change shall be converted to the dollar-value LIFO method. This is done to establish the base-year cost for subsequent calculations. Thus, if the taxpayer was previously valuing LIFO inventories on the specific goods method, these separate values shall be combined into appropriate pools. For this purpose, the base year for the pool shall be the earliest taxable year for which the LIFO inventory method had been adopted for any item in that pool. No change will be made in the overall LIFO value of the opening inventory for the year of change as a result of the conversion, and that inventory will merely be restated in the manner used under the dollar-value method. All layers of increment for such inventory must be retained, except that all layers of increment which occurred in the same taxable year must be combined. The following examples illustrate the provisions of this subparagraph:

Example (1). (i) Assume that the taxpayer has used another LIFO method for finished goods since 1954 and has complied with all the requirements prerequisite for a change to the dollar-value method. Items A, B, and C, which have previously been inventoried under the specific goods LIFO method, may properly be included in a single dollar-value LIFO pool. The LIFO inventory value of items A, B, and C at December 31, 1960, is $12,200, computed as follows:

Year	Base quantity and yearly increments	Unit cost	Dec. 31, 1960, inventory at LIFO value
Item A			
1954 (base year)	100	$1	$100
1955	200	2	400
1956	100	4	400
1960	100	6	600
Total	500	....	1,500
Item B			
1954 (base year)	300	6	1,800
1955	100	8	800
1960	50	10	500
Total	450	....	3,100
Item C			
1954 (base year)	1,000	4	4,000
1955	200	6	1,200
1956	300	8	2,400
Total	1,500	....	7,600
LIFO value of items A, B, and C at Dec. 31, 1960	....	....	12,200

There were no increments in the years 1957, 1958, or 1959.

(ii) The computation of the ratio of the total current-year cost to the total base-year cost for the base year and each layer of increment in Pool No. 1 is shown as follows:

Item	1954 base-year unit cost	Year 1954	Increments 1955	1956	1960
A					
Base-year cost	$1.00	$100	$200	$100	$100
LIFO value	......	100	400	400	600
B					
Base-year cost	6.00	1,800	600	......	300
LIFO value	......	1,800	800	......	500
C					
Base-year cost	4.00	4,000	800	1,200	......
LIFO value	......	4,000	1,200	2,400	......
Total—Base-year cost	5,900	1,600	1,300	400	
Total—LIFO value	5,900	2,400	2,800	1,100	
Ratio of total current-year cost to total base-year cost (percent)	......	100.00	150.00	215.38	275.00

(iii) On the basis of the foregoing computations, the LIFO inventory of Pool No. 1, at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
1954 base cost	$5,900	100.00	$5,900
1955 increment	1,600	150.00	2,400
1956 increment	$1,300	215.38	$2,800
1960 increment	400	275.00	1,100
Total	9,200	....	12,200

Example (2). Assume the same facts as in example (1) and assume further that the base-year cost of Pool No. 1 at December 31, 1961, is $8,350. Since the closing inventory for the taxable year 1961 at base-year cost is less than the opening inventory for that year at base-year cost, a liquidation has occurred during 1961. This liquidation absorbs all of the 1960 layer of increment and part of the 1956 layer of increment. The December 31, 1961, inventory is $10,131, computed as follows:

	Dec. 31, 1961, inventory at base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1961, inventory at LIFO value
1954 base cost	$5,900	100.00	$5,900
1955 increment	1,600	150.00	2,400
1956 increment	850	215.38	1,831
Total	8,350	....	10,131

(g) **Transitional rules—(1) Change in method of pooling.** Any method of pooling authorized by this section and used by the taxpayer in computing his LIFO inventories under the dollar-value method shall be treated as a method of accounting. Any method of pooling which is authorized by this section shall be used for the year of adoption and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commissioner as provided in paragraph (e) of § 1.446–1. Where the taxpayer changes from one method of pooling to another method of pooling permitted by this section, the ending LIFO inventory for the taxable year preceding the year of change shall be restated under the new method of pooling.

(2) Manner of combining or separating dollar-value pools. (i) A taxpayer who has been using the dollar-value LIFO method and who is permitted or required to change his method of pooling, shall combine or separate the LIFO value of his inventory for the base year and each yearly layer of increment in order to conform to the new pool or pools. Each yearly layer of increment in the new pool or pools must be separately accounted for and a record thereof maintained, and any liquidation occurring in the new pool or pools subsequent to the formation thereof shall be treat-

ed in the same manner as if the new pool or pools had existed from the date the taxpayer first adopted the LIFO inventory method. The combination or separation of the LIFO value of his inventory for the base year and each yearly layer of increment shall be made in accordance with the appropriate method set forth in this subparagraph, unless the use of a different method is approved by the Commissioner.

(ii) Where the taxpayer is permitted or required to separate a pool into more than one pool, the separation shall be made in the following manner: First, each item in the former pool shall be placed in an appropriate new pool. Every item in each new pool is then extended at its base-year unit cost and the extensions are totaled. Each total is the amount of inventory for each new pool expressed in terms of base-year cost. Then a ratio of the total base-year cost of each new pool to the base-year cost of the former pool is computed. The resulting ratio is applied to the amount of inventory for the base year and each yearly layer of increment of the former pool to obtain an allocation to each new pool of the base-year inventory of the former pool and subsequent layers of increment thereof. The foregoing may be illustrated by the following example of a change for the taxable year 1961:

Example. (a) Assume that items A, B, C, and D are all grouped together in one pool prior to December 31, 1960. The LIFO inventory value at December 31, 1960, is computed as follows:

	Pool ABCD		
	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1956, base cost	$10,000	100	$10,000
Dec. 31, 1956, increment	1,000	110	1,100
Dec. 31, 1958, increment	5,000	120	6,000
Dec. 31, 1960, increment	4,000	125	5,000
Total	20,000	....	22,100

(b) The extension of the quantity of items A, B, C, and D at respective base-year unit costs is as follows:

Item	Quantity	Base-year unit cost	Amount
A	2,000	$2	$4,000
B	1,000	3	3,000
C	1,000	5	$5,000
D	4,000	2	8,000
Total			20,000

(c) Under the provisions of this section the taxpayer separates former Pool ABCD into two pools, Pool AB and Pool CD. The computation of the ratio of total base-year cost for each of the new pools to the base-year cost of the former pool is as follows:

Item	Total base-year cost	Ratio
Pool AB:		
A	$4,000	....
B	3,000	....
	7,000	7,000/20,000
Pool CD:		
C	5,000	....
D	8,000	....
	13,000	13,000/20,000
Total for Pool ABCD	20,000	....

(d) The ratio of the base-year cost of new Pools AB and CD to the base-year cost of former Pool ABCD is 7,000/20,000 and 13,000/20,000, respectively. The allocation of the January 1, 1956 base cost and subsequent yearly layers of increment of former Pool ABCD to new Pools AB and CD is as follows:

	Base-year cost to be allocated	Pool	
		AB	CD
Jan. 1, 1956, base cost	$10,000	$3,500	$6,500
Dec. 31, 1956, increment	1,000	350	650
Dec. 31, 1958, increment	5,000	1,750	3,250
Dec. 31, 1960, increment	4,000	1,400	2,600
Total	20,000	7,000	13,000

(e) The LIFO value of new Pools AB and CD at December 31, 1960, as allocated, is as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool AB			
Jan. 1, 1956, base cost	$3,500	100	$3,500
Dec. 31, 1956, increment	350	110	385
Dec. 31, 1958, increment	1,750	20	2,100
Dec. 31, 1960, increment	1,400	125	1,750
Total	7,000	....	7,735
Pool CD			
Jan. 1, 1956, base cost	6,500	100	6,500

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Dec. 31, 1956, increment	$650	110	$715
Dec. 31, 1958, increment	3,250	120	3,900
Dec. 31, 1960, increment	2,600	125	3,250
Total	13,000	....	14,365

(iii) Where the taxpayer is permitted or required to combine two or more pools having the same base year, they shall be combined into one pool in the following manner: The LIFO value of the base-year inventory of each of the former pools is combined to obtain a LIFO value of the base-year inventory for the new pool. Then, any layers of increment in the various pools which occurred in the same taxable year are combined into one total layer of increment for that taxable year. However, layers of increment which occurred in different taxable years may not be combined. In combining the layers of increment a new ratio of current-year cost to base-year cost is computed for each of the combined layers of increment. The foregoing may be illustrated by the following example:

Example. (a) Assume the taxpayer has two pools at December 31, 1960. Under the provisions of this section the taxpayer combines these pools into a single pool as of January 1, 1961. The LIFO inventory value of each pool at December 31, 1960, is shown as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1957, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool No. 1			
Jan. 1, 1956, base cost	$10,000	100	$10,000
Dec. 31, 1957, increment	2,000	110	2,200
Dec. 31, 1960, increment	1,000	120	1,200
Total	13,000	....	13,400
Pool No. 2			
Jan. 1, 1957, base cost	5,000	100	5,000
Dec. 31, 1960, increment	3,000	140	4,200
Total	8,000	....	9,200

(b) The computation of the ratio of the total current-year cost to the total base-year cost for the base year and each yearly layer of increment in the new pool is as follows:

Pool	Base year 1957	Increments: Dec. 31, 1957	Increments: Dec. 31, 1960
No. 1:			
Base-year cost	$10,000	$2,000	$1,000
LIFO value	10,000	2,200	1,200
No. 2:			
Base-year cost	5,000	....	3,000
LIFO value	5,000	....	4,200
Total, base-year cost	15,000	2,000	4,000
Total, LIFO value	15,000	2,200	5,400
Ratio of total current-year cost to total base-year cost (percent)	100	110	135

(c) On the basis of the foregoing computations, the LIFO inventory of the new pool at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1957, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1957, base cost	$15,000	100	$15,000
Dec. 31, 1957, increment	2,000	110	2,200
Dec. 31, 1960, increment	4,000	135	5,400
Total	21,000	....	22,600

(iv) In combining pools having different base years, the principles set forth in subdivision (iii) of this subparagraph are to be applied, except that all base years subsequent to the earliest base year shall be treated as increments, and the base-year costs for all pools having a base year subsequent to the earliest base year of any pool shall be redetermined in terms of the base cost for the earliest base year. The foregoing may be illustrated by the following example:

Example. (a) Assume that the taxpayer has two pools at December 31, 1960. Under the provisions of this section the taxpayer combines these pools into a single pool as of January 1, 1961. The LIFO inventory value of each pool at December 31, 1960, is shown as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current rent-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Pool No. 1			
Jan. 1, 1956, base cost	$7,000	100	$7,000
Dec. 31, 1956, increment	1,000	105	1,050

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current rent-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Dec. 31, 1957, increment	$ 500	110	$ 550
Dec. 31, 1958, increment	500	110	550
Dec. 31, 1960, increment	1,000	120	1,200
Total	10,000	....	10,350
Pool No. 2			
Jan. 1, 1958, base cost	3,500	100	3,500
Dec. 31, 1958, increment	1,000	110	1,100
Dec. 31, 1959, increment	500	115	575
Total	5,000	....	5,175

(b) The next step is to redetermine the 1958 base-year cost for Pool No. 2 in terms of 1956 base-year cost. January 1, 1956 base-year unit cost must be reconstructed or established in accordance with paragraph (e)(2) of this section for each item in Pool No. 2. Such costs are assumed to be $9.00 for item A, $20.00 for item B, and $1.80 for item C. A ratio of the 1958 total base-year cost to the 1956 total base-year cost for Pool No. 2 is computed as follows:

Item	Quantity	Jan. 1, 1956, base-year unit cost	Jan. 1, 1956, base-year cost
A	250	$9.00	$2,250
B	75	20.00	1,500
C	500	1.80	900
Total			4,650
A	250	10.00	2,500
B	75	20.00	1,500
C	500	2.00	1,000
Total			5,000

(c) The ratio of the 1956 total base-year cost to the 1958 total base-year cost for Pool No. 2 is 4,650/5,000 or 93 percent. The January 1, 1958 base cost and each yearly layer of increment at 1958 base-year cost is multiplied by this ratio. Such computation is as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1958, base-year cost	Ratio (percent)	Dec. 31, 1960, inventory restated at Jan. 1, 1956, base-year cost
Jan. 1, 1958, base cost	$3,500	93	$3,255
Dec. 31, 1958, increment	1,000	93	930
Dec. 31, 1959, increment	500	93	465
Total			4,650

(d) The computation of the ratio of the total current-year cost to the total base-year cost for the base year (1956) and each yearly layer of increment in the new pool is as follows:

Pool	Base year 1956	Increments Dec. 31, 1956	Dec. 31, 1957	Dec. 31, 1958	Dec. 31, 1959	Dec. 31, 1960
No. 1:						
Base-year cost	$7,000	$1,000	$500	$500	....	$1,000
LIFO value	7,000	1,050	550	550	....	1,200
No. 2:						
Base-year cost as restated	....	....	3,255	930	$465	....
LIFO value	....	....	3,500	1,100	575	....
Total, base-year cost	7,000	1,000	3,755	1,430	465	1,000
Total, LIFO value	7,000	1,050	4,050	1,650	575	1,200
Ratio of total current-year cost to total base-year cost (percent)	100.00	105.00	107.86	115.38	133.66	120.00

(e) On the basis of the foregoing computation, the LIFO inventory of the new pool at December 31, 1960, is restated as follows:

	Dec. 31, 1960, inventory at Jan. 1, 1956, base-year cost	Ratio of total current-year cost to total base-year cost (percent)	Dec. 31, 1960, inventory at LIFO value
Jan. 1, 1956, base cost	$7,000	100.00	$7,000
Dec. 31, 1956, increment	1,000	105.00	1,050
Dec. 31, 1957, increment	3,755	107.86	4,050
Dec. 31, 1958, increment	1,430	115.38	1,650
Dec. 31, 1959, increment	465	123.66	575
Dec. 31, 1960, increment	1,000	120.00	1,200
Total	14,650	....	15,525

(3) Change in methods of computation at the LIFO value of a dollar-value pool. For the first taxable year beginning after December 31, 1960, the taxpayer must use a method authorized by paragraph (e)(1) of this section in computing the base-year cost and current-year cost of a dollar-value inventory pool for the end of such year. If the taxpayer had previously used any methods other than one authorized by paragraph (e)(1) of this section, he shall not be required to recompute his LIFO inventories for taxable years beginning on or before December 31, 1960, under a method authorized by such paragraph. The base cost and layers of increment previously computed by such other method shall be retained and treated as if such base cost and layers of increment had been computed under a method authorized by paragraph (e)(1) of this section. The taxpayer shall use the year of change as the base year in applying the double-extension method or other method approved by the Commissioner, instead of the earliest year for which he adopted the LIFO method for any items in the pool.

(h) Change without consent in method of pooling—(1) Authorization. Notwithstanding the provisions of paragraph (g) of this section, a taxpayer, for his first taxable year ending after April 15, 1961, may change from one method of pooling authorized by this section to any other method of pooling authorized by this section provided the requirements of subparagraph (2) of this paragraph are met. Also, for such year, if a taxpayer is currently using only a method of pooling authorized by this section, or a method of pooling which would be authorized by this section if additional items were included in the pool, and could change to the natural business unit method, except for the fact he has not inventoried all items entering into the inventory investment for such natural business unit on the LIFO method, he may change to the natural business unit method if he elects under the provisions of § 1.472-3 to extend the LIFO election to all items entering into the entire inventory investment for such natural business unit, provided the requirements of subparagraph (2) of this paragraph are met. The method of pooling adopted shall be used for the year of change and for all subsequent taxable years unless a change is required by the Commissioner in order to clearly reflect income, or unless permission to change is granted by the Commission as provided in paragraph (e) of § 1.446-1.

(2) Requirements. A statement shall be attached to the income tax return for the year of change referred to in subparagraph (1) of this paragraph setting forth, in summary form, the following information:

(i) A description of the new pool or pools,

(ii) The basis for selection of the new pool or pools,

(iii) A schedule showing the computation of the LIFO value of the former pool or pools, and,

(iv) A schedule showing the transition from the former pool or pools to the new pool or pools.

In addition, a copy of the statement shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C. 20024. The taxpayer shall submit such other information with respect to the change in method of pooling as may be requested.

[T.D. 6539, 26 FR 518, Jan. 20, 1961; T.D. 7814, 47 FR 11272, March 16, 1982]

Adjustments

§ 1.481-1 Adjustments in general.

(a)(1) Section 481 prescribes the rules to be followed in computing taxable income in cases where the taxable income of the taxpayer is computed under a method of accounting different from that under which the taxable income was previously computed. A change in method of accounting to which section 481 applies includes a change in the over-all method of accounting for gross income or deductions, or a change in the treatment of a material item. For rules relating to changes in methods of accounting, see section 446(e) and

paragraph (e) of § 1.446–1. In computing taxable income for the taxable year of the change, there shall be taken into account those adjustments which are determined to be necessary solely by reason of such change in order to prevent amounts from being duplicated or omitted. The "year of the change" is the taxable year for which the taxable income of the taxpayer is computed under a method of accounting different from that used for the preceding taxable year.

(2) Unless the adjustments are attributable to a change in method of accounting initiated by the taxpayer, no part of the adjustments required by subparagraph (1) of this paragraph shall be based on amounts which were taken into account in computing income (or which should have been taken into account had the new method of accounting been used) for taxable years beginning before January 1, 1954, or ending before August 17, 1954.

(b) The adjustments specified in section 481(a) and this section shall take into account inventories, accounts receivable, accounts payable, and any other item determined to be necessary in order to prevent amounts from being duplicated or omitted.

(c)(1) The term "adjustments", as used in section 481, has reference to the net amount of the adjustments required by section 481(a) and paragraph (b) of this section. In the case of a change in the over-all method of accounting, such as from the cash receipts and disbursements method to an accrual method, the term "net amount of the adjustments" means the consolidation of adjustments (whether the amounts thereof represent increases or decreases in items of income or deductions) arising with respect to balances in various accounts, such as inventory, accounts receivable, and accounts payable, at the beginning of the taxable year of the change in method of accounting. With respect to the portion of the adjustments attributable to pre-1954 Code years, it is immaterial that the same items or class of items with respect to which adjustments would have to be made (for the first taxable year to which section 481 applies) do not exist at the time the actual change in method of accounting occurs. For purposes of section 481, only the net dollar balance is to be taken into account. In the case of a change in the treatment of a single material item, the amount of the adjustment shall be determined with reference only to the net dollar balances in that particular account.

(2)(i) If the change in method of accounting is voluntary (that is, initiated by the taxpayer), the entire amount of the adjustments required by section 481(a) is to be taken into account in computing taxable income for the taxable year of the change, except as otherwise provided by section 481(b)(4) and (5). However, in such a case, if the portion of the adjustments which is attributable to taxable years subject to the Internal Revenue Code of 1954 increases taxable income by more than $3,000, the limitations on tax provided in section 481(b)(1) or (2) apply.

(ii) The portion of the adjustments arising from a voluntary change in method of accounting and attributable to taxable years not subject to the 1954 Code is determined in accordance with section 481(b)(4)(A) and paragraph (a) of § 1.481–4. If such portion increases taxable income by more than $3,000 for the first taxable year to which section 481 applies, such portion may be taken into account over the period prescribed in section 481(b)(4)(B). If the total increase in taxable income arising from the adjustments required by section 481(a) is more than $3,000 for the taxable year of the change, but the portion of such adjustments attributable by $3,000 or less for the first taxable year to which section 481 applies, then the limitations provided in section 481(b)(1) or (2) apply to the total adjustments. On the other hand, if the portion of such adjustments attributable to pre-1954 Code years under section 481(b)(4)(A) increases taxable income taxable year to which section 481 applies, and the portion attributable to 1954 Code years increases taxable income by $3,000 or less for the taxable year of the change, then the portion of the adjustments attributable to pre-1954 Code years may be taken into account over the period prescribed in section 481(b)(4)(B), and the portion of the adjustments attributable to 1954 Code years is to be taken into account in the taxable year of the change.

(3) If the change in method of accounting is not voluntary (that is, not initiated by the taxpayer), then only the adjustments required by section 481(a) which are attributable to taxable years subject to the Internal Revenue Code of 1954 are taken into account in computing taxable income for the taxable year of the change. If the amount of such adjustments increases taxable income by more than $3,000 for the taxable year of the change, the limitations on tax provided in section 481(b)(1) or (2) apply.

(4) If the adjustments required by section 481(a) as a result of a change in method of accounting decrease taxable income for the taxable year of the change, such decrease is taken into account for that year and the provisions of section 481(b) do

not apply. In the case of an involuntary change in method of accounting, no adjustments attributable to pre-1954 Code years are taken into account, whether or not such adjustments would decrease taxable income.

(5) A change in the method of accounting initiated by the taxpayer includes not only a change which he originates by securing the consent of the Commissioner, but also a change from one method of accounting to another made without the advance approval of the Commissioner. A change in the taxpayer's method of accounting required as a result of an examination of the taxpayer's income tax return will not be considered as initiated by the taxpayer. On the other hand, a taxpayer who, on his own initiative, changes his method of accounting in order to conform to the requirements of any Federal income tax regulation or ruling shall not, merely because of such fact, be considered to have made an involuntary change.

(6) Where the total adjustments required by section 481(a) include both—

(i) An amount attributable to 1954 Code years to which the limitations on tax provided by section 481(b)(1) or (2) apply, and

(ii) An amount attributable to pre-1954 Code years of which all or a pro rata portion thereof is to be taken into account under section 481(b)(4)(A) or (B),

two separate computations of tax must be made for the taxable year of the change. The tax for such year must first be computed under section 481(b)(1) or (2) in respect of the portion of the adjustments attributable to 1954 Code years, without regard to amounts taken into account under section 481(b)(4)(A) or (B). Then the tax for such year must be computed in respect of the portion of the adjustments attributable to pre-1954 Code years, taking into account the portion of the adjustments attributable to 1954 Code years. The total tax for the taxable year of the change will be the aggregate of the tax computed under section 481(b)(1) or (2) and the increase in tax attributable to taking into account the portion of the adjustments attributable to pre-1954 Code years under section 481(b)(4)(A) or (B).

(7) For rules relating to the limitations on tax provided by section 481(b)(1) and (2), see § 1.481–2. For rules relating to the adjustments attributable to taxable years beginning before January 1, 1954, or ending before August 17, 1954, see §§ 1.481–3 and 1.481–4.

(d) In determining the amount of any item of gain, loss, deduction, or credit which depends upon gross income, adjusted gross income, or taxable income for the taxable year of the change, the full amount of the adjustments required under section 481(a) shall be taken into account for such year if such adjustments increase taxable income by $3,000 or less, or decrease taxable income. However, if the amount of the adjustments increase taxable income by more than $3,000, the provisions of section 481(b) apply. Since section 481(b)(1) and (2) merely provide for limitations on the tax for the taxable year of the change, the entire amount of the adjustments which is subject to section 481(b)(1) and (2) is taken into account in such year. See § 1.481–2. Where section 481(b)(4) applies and the taxpayer does not elect to have the 10-year period begin with the first taxable year beginning after December 31, 1957, the pro rata portion of the adjustments attributable to pre-1954 Code years is also taken into account in the taxable year of the change. See § 1.481–4.

(e) The provisions of section 481 shall not apply in the case of a change from an accrual method to the installment method of accounting. In such case the rules provided in section 453 shall apply. However, section 481 does apply in the case of a change from the installment method of accounting to any other method.

[T.D. 6500, 25 FR 11731, Nov. 26, 1960]

§ 1.481–2 Limitation on tax.

(a) Three-year allocation. Section 481(b)(1) provides a limitation on the tax for the taxable year of the change attributable to the adjustments required under section 481(a) and § 1.481–1 (other than the amount of adjustments to which section 481(b)(4) or (5) applies). If such adjustments increase the taxpayer's taxable income for the taxable year of the change by more than $3,000, then the tax for such taxable year under chapter 1 of the Internal Revenue Code of 1954 attributable to the adjustments shall not exceed the lesser of (1) the tax attributable to taking such adjustments into account in computing taxable income for the taxable year of the change under section 481(a) and § 1.481–1, or (2) the aggregate of the increases in tax under chapter 1 (or under corresponding provisions of prior revenue laws) which would result if the adjustments were included ratably in the taxable year of the change and the two preceding taxable years. For the purpose of computing the limitation on tax under section 481(b)(1), the adjustments shall be allocated ratably to the taxable year of the change and the two preceding taxable years, whether or not the adjustments are

in fact attributable in whole or in part to such years. The limitation on the tax provided in this paragraph shall be applicable only if the taxpayer used the method of accounting from which the change was made in computing taxable income for the two taxable years preceding the taxable year of the change.

(b) Allocation under new method of accounting. Section 481(b)(2) provides a second alternative limitation on the tax for the taxable year of the change under chapter 1 attributable to the adjustments required under section 481(a) and § 1.481–1 which are not subject to section 481(b)(4) or (5) where such adjustments increase taxable income for the taxable year of the change by more than $3,000. If the taxpayer establishes from his books of account and other records what his taxable income would have been under the new method of accounting for one or more consecutive taxable years immediately preceding the taxable year of the change, and if the taxpayer in computing taxable income for such years used the method of accounting from which the change was made, then the tax attributable to the adjustments shall not exceed the smallest of the following amounts:

(1) The tax attributable to taking the adjustments into account in computing taxable income for the taxable year of the change under section 481(a) and § 1.481–1;

(2) The tax attributable to such adjustments computed under the 3-year allocation provided in section 481(b)(1), if applicable; or

(3) The net increase in the taxes under chapter 1 (or under corresponding provisions of prior revenue laws) which would result from allocating that portion of the adjustments to the one or more consecutive preceding taxable years to which properly allocable under the new method of accounting and from allocating the balance thereof to the taxable year of the change.

(c) Rules for computation of tax. (1) The first step in determining whether either of the limitations described in section 481(b)(1) or (2) applies is to compute the increase in tax for the taxable year of the change which is attributable to the increase in taxable income for such year resulting solely from the adjustments required under section 481(a) and § 1.481–1 which are not subject to section 481(b)(4) or (5). This increase in tax is the excess of the tax for the taxable year computed by taking into account such adjustments under section 481(a) over the tax computed for such year without taking the adjustments into account.

(2) The next step is to compute under section 481(b)(1) the tax attributable to the adjustments referred to in subparagraph (1) of this paragraph for the taxable year of the change and the two preceding taxable years as if an amount equal to one-third of the net amount of such adjustments had been received or accrued in each of such taxable years. The increase in tax attributable to the adjustments for each such taxable year is the excess of the tax for such year computed with the allocation of one-third of the net adjustments to such taxable year over the tax computed without the allocation of any part of the adjustments to such year. For the purpose of computing the aggregate increase in taxes for such taxable years, there shall be taken into account the increase or decrease in tax for any taxable year preceding the taxable year of the change to which no adjustment is allocated under section 481(b)(1) but which is affected by a net operating loss under section 172 or by a capital loss carryback or carryover under section 1212, determined with reference to taxable years with respect to which adjustments under section 481(b)(1) are allocated.

(3) In the event that the taxpayer satisfies the conditions set forth in section 481(b)(2), the next step is to determine the amount of the net increase in tax attributable to the adjustments referred to in subparagraph (1) of this paragraph for:

(i) The taxable year of the change,

(ii) The consecutive taxable year or years immediately preceding the taxable year of the change for which the taxpayer can establish his taxable income under the new method of accounting, and

(iii) Any taxable year preceding the taxable year of the change to which no adjustment is allocated under section 481(b)(2), but which is affected by a net operating loss or by a capital loss carryback or carryover determined with reference to taxable years with respect to which such adjustments are allocated.

The net increase in tax for the taxable years specified in subdivisions (i), (ii), and (iii) of this subparagraph shall be computed as if the amount of the adjustments for the prior taxable years to which properly allocable in accordance with section 481(b)(2) had been received or accrued, or paid or incurred, as the case may be, in such prior years and the balance of the adjustments in the taxable year of the change. The amount of tax attributable to such adjustments for the taxable years specified in subdivisions (i), (ii), and (iii) of this subparagraph is the aggregate of the differences (increases and decreases) between the tax for

each such year computed by taking into account the allocable portion of the adjustments in computing taxable income and the tax computed without taking into account any portion of the adjustments in computing taxable income. Generally, where there is an increase in taxable income for a preceding consecutive taxable year established under the new method of accounting, computed without regard to adjustments attributable to any preceding taxable year, the amount of the adjustments to be allocated to each such year shall be an amount equal to such increase. However, where the amount of the adjustments to be allocated to a prior taxable year is less than the increase in taxable income for such year established under the new method of accounting, the amount of the increase in such taxable income for purposes of determining the increase in tax under section 481(b)(2) for such year shall be considered to be the amount so allocated. For example, if the amount of the adjustments required by section 481(a) for 1958 (the taxable year of the change) is $60,000, and the increase in taxable income is determined by the taxpayer to be $40,000, $5,000, and $35,000, computed under the new method of accounting, for the taxable years 1957, 1956, and 1955, respectively, then the amount of the adjustments to be allocated to 1955 will be the balance of the adjustments, or $15,000.

(4) The tax for the taxable year of the change (determined without regard to adjustments under section 481(b)(4) or (5)) shall be the tax for such year, computed without taking any of the adjustments referred to in subparagraph (1) of this paragraph into account, increased by the smallest of the following amounts:

(i) The amount of tax for the taxable year of the change attributable solely to taking into account the entire amount of the adjustments required by section 481(a) and § 1.481–1 which are not subject to section 481(b)(4) or (5);

(ii) The sum of the increases in tax liability for the taxable year of the change and the two immediately preceding taxable years which would have resulted solely from taking into account one-third of the amount of such adjustments required for each of such years as though such amounts had been properly attributable to such years (computed in accordance with subparagraph (2) of this paragraph); or

(iii) The net increase in tax attributable to allocating such adjustments under the new method of accounting (computed in accordance with subparagraph (3) of this paragraph).

(5)(i) In the case of a change in method of accounting by a partnership, the adjustments required by section 481 shall be made with respect to the taxable income of the partnership but the limitations on tax under section 481(b) shall apply to the individual partners. Each partner shall take into account his distributive share of the partnership items, as so adjusted, for the taxable year of the change. Section 481(b) applies to a partner whose taxable income is so increased by more than $3,000 as a result of such adjustments to the partnership taxable income. It is not necessary for the partner to have been a member of the partnership for the two taxable years immediately preceding the taxable year of the change of the partnership's accounting method in order to have the limitation provided by section 481(b)(1) apply. Further, a partner may apply section 481(b)(2) even though he was not a member of the partnership for all the taxable years affected by the computation thereunder.

(ii) In the case of a change in method of accounting by an electing small business corporation under subchapter S, chapter 1 of the Code, the adjustments required by section 481 shall be made with respect to the taxable income of such electing corporation in the year of the change, but the limitations on tax under section 481(b) shall apply to the individual shareholders. Section 481(b) applies to a shareholder of an electing small business corporation whose taxable income is so increased by more than $3,000 as a result of such adjustments to such corporation's taxable income. It is not necessary for the shareholder to have been a member of the electing small business corporation, or for such corporation to have been an electing small business corporation, for the two taxable years immediately preceding the taxable year of the change of the corporation's accounting method in order to have the limitation provided by section 481(b)(1) apply. Further, a shareholder may apply section 481(b)(2), even though he was not a shareholder, or the corporation was not an electing small business corporation, for all the taxable years affected by the computation thereunder.

(6) For the purpose of the successive computations of the limitations on tax under section 481(b)(1) or (2), if the treatment of any item under the provisions of the Internal Revenue Code of 1954 (or corresponding provisions of prior internal revenue laws) depends upon the amount of gross income, adjusted gross income, or taxable income (for example, medical expenses, charitable contributions, or credits against the tax), such item shall

be determined for the purpose of each such computation by taking into account the proper portion of the amount of any adjustments required to be taken into account under section 481 in each such computation.

(7) The increase or decrease in the tax for any taxable year for which an assessment of any deficiency, or a credit or refund of any overpayment, is prevented by any law or rule of law, shall be determined by reference to the tax previously determined (within the meaning of section 1314(a)) for such year.

(8) In applying section 7807(b)(1), the provisions of chapter 1 (other than subchapter E, relating to tax on self-employment income) and chapter 2 of the Internal Revenue Code of 1939 shall be treated as the corresponding provisions of the Internal Revenue Code of 1939.

(d) **Examples.** The application of section 481(b)(1) and (2) may be illustrated by the following examples. Although the examples in this paragraph are based upon adjustments required in the case of a change in the over-all method of accounting, the principles illustrated would be equally applicable to adjustments required in the case of a change in method of accounting for a particular material item, provided the treatment of such adjustments is not specifically subject to some other provision of the Internal Revenue Code of 1954.

Example (1). An unmarried individual taxpayer using the cash receipts and disbursements method of accounting for the calendar year is required by the Commissioner to change to an accrual method effective with the year 1958. As of January 1, 1958, he had an opening inventory of $11,000. On December 31, 1958, he had a closing inventory of $12,500. Merchandise purchases during the year amounted to $22,500, and net sales were $32,000. Total deductible business expenses were $5,000. There were no receivables or payables at January 1, 1958. The computation of taxable income for 1958, assuming no other adjustments, using the new method of accounting follows:

Net sales		$32,000
Opening inventory	$11,000	
Purchases	22,500	
Total	33,500	
Less closing inventory	12,500	
Cost of goods sold		21,000
Gross profit		11,000
Business expenses		5,000
Business income		6,000
Personal exemption and itemized deductions		1,600
Taxable income		4,400

Under the cash receipts and disbursements method of accounting, only $9,000 of the $11,000 opening inventory had been included in the cost of goods sold and claimed as a deduction for the taxable years 1954 through 1957; the remaining $2,000 had been so accounted for in pre-1954 Code years. In order to prevent the same item from reducing taxable income twice, an adjustment of $9,000 must be made to the taxable income of 1958 under the provisions of section 481(a) and § 1.481–1. Since the change in method of accounting was not initiated by the taxpayer, the $2,000 of opening inventory which had been included in cost of goods sold in pre-1954 Code years is not taken into account. Taxable income for 1958 is accordingly increased by $9,000 under section 481(a) to $13,400. Assuming that the tax on $13,400 is $4,002 and that the tax on $4,400 (income without the adjustment) is $944, the increase in tax attributable to the adjustment, if taken into account for the taxable year of the change, would be the difference between the two, or $3,058. Since the adjustment required by section 481(a) and § 1.481–1 ($9,000) increases taxable income by more than $3,000, the increase in tax for the taxable year 1958 attributable to the adjustment of $9,000 (*i.e.*, $3,058) may be limited under the provisions of section 481(b)(1) or (2). See examples (2) and (3).

Example (2). Assume that the taxpayer in example (1) used the cash receipts and disbursements method of accounting in computing taxable income for the years 1956 and 1957 and that the taxable income for these years determined under such method was $4,000 and $6,000, respectively. The section 481(b)(1) limitation on tax with a pro rata three-year allocation of the $9,000 adjustment is computed as follows:

Taxable year	Taxable income before adjustment	Taxable income with adjustment	Assume total tax	Assumed tax before adjustment	Increase in tax attributable to adjustment
1956	$4,000	$7,000	$1,660	$840	$820
1957	6,000	9,000	2,300	1,360	940
1958	4,400	7,400	1,780	944	836
Total					2,596

Since this increase in tax of $2,596 is less than the increase in tax attributable to the inclusion of the entire adjustment in the income for the taxable year of the change ($3,058), the limitation provided by section 481(b)(1) applies, and the total tax for 1958, the taxable year of the change, if section 481(b)(2) does not apply, is determined as follows:

Tax without any portion of adjustment	$944
Increase in tax attributable to adjustment computed under section 481(b)(1)	2,596
Total tax for taxable year of the change	3,540

Example (3). (i) Assume the same facts as in example (1) and, in addition, assume that the taxpayer used the cash receipts and disbursements method of accounting in computing

taxable income for the years 1953 through 1957; that he established his taxable income under the new method for the taxable years 1953, 1954, and 1957, but did not have sufficient records to establish his taxable income under such method for the taxable years 1955 and 1956. The original taxable income and taxable income as redetermined are as follows:

Taxable year	Taxable income: Determined under cash receipts and disbursements method	Taxable income: Established under new method	Increase or (decrease) in taxable income
1953	$5,000	$7,000	$2,000
1954	6,000	7,000	1,000
1955	5,500	(1)	....
1956	4,000	(1)	....
1957	6,000	10,000	4,000

[1] Undetermined.

As in examples (1) and (2), the total adjustment under section 481(a) is $9,000. Of the $9,000 adjustment, $4,000 may be allocated to 1957, which is the only year consecutively preceding the taxable year of the change for which the taxpayer was able to establish his income under the new method. Since the income cannot be established under the new method for 1956 and 1955, no allocation may be made to 1954 or 1953, even though the taxpayer has established his income for those years under the new method of accounting. The balance of $5,000 ($9,000 minus $4,000) must be allocated to 1958.

(ii) The limitation provided by section 481(b)(2) is computed as follows: The tax for 1957, based on taxable income of $6,000, is assumed to be $1,360. Under the new method, based on taxable income of $10,000, the tax for 1957 is assumed to be $2,640, the increase attributable to $4,000 of the $9,000 section 481(a) adjustment being $1,280 ($2,640 minus $1,360). The tax for 1958, computed on the basis of taxable income of $4,400 (determined under the new method), is assumed to be $944. The tax computed for 1958 on taxable income of $9,400 ($4,400 plus the $5,000 adjustment allocated to 1958) is assumed to be $2,436, leaving a difference of $1,492 ($2,436 minus $944) attributable to the inclusion in 1958 of the portion of the total adjustment to be taken into account which could not be properly allocated to the taxable year or years consecutively preceding 1958.

(iii) The tax attributable to the adjustment is determined by selecting the smallest of the three following amounts:

Increase in tax attributable to adjustment computed under section 481(b)(2) ($1,280 + $1,492)	$2,772
Increase in tax attributable to adjustment computed under section 481(b)(1) (example (2))	2,596
Increase in tax if the entire adjustment is taken into account in the taxable year of the change (example (1))	3,058

The final tax for 1958 is then $3,540 computed as follows:

Tax before inclusion of any adjustment	$944
Increase in tax attributable to adjustments (smallest of $2,772, $2,596 or $3,058)	2,596
Total tax for 1958 (limited in accordance with section 481(b)(1))	3,540

Example (4). Assume that X Corporation has maintained its books of account and filed its income tax returns using the cash receipts and disbursements method of accounting for the years 1953 through 1957. The corporation secures permission to change to an accrual method of accounting for the calendar year 1958. The following tabulation presents the data with respect to the taxpayer's income for the years involved:

Year	Taxable income under the cash receipts and disbursements method: Before application of net operating loss carryback	Taxable income under the cash receipts and disbursements method: After application of net operating loss carryback	Taxable income established under accrual method	Increase or (decrease) attributable to change	Changes in taxable income due to changes in net loss carryback
1953	$2,000	0	(1)	....	$2,000
1954	4,000	$1,000	(1)	....	3,000
1955	(5,000)	....	$1,000	$6,000	....
1956	80,000	80,000	77,000	(3,000)	....
1957	90,000	90,000	96,000	6,000	....
1958	....	....	100,000	....	....

[1] Not established.

As indicated above, taxable income for 1953 and 1954, as determined under the cash receipts and disbursements method of accounting, was $2,000 and $4,000, respectively, and after application of the net operating loss carryback from 1955, the taxable income was reduced to zero in 1953 and to $1,000 in 1954. The taxpayer was unable to establish taxable income for these years under an accrual method of accounting; however, under section 481(b)(3)(A), increases or decreases in the tax for taxable years to which no adjustment is allocated must, nevertheless, be taken into account to the extent the tax for such years would be affected by a net operating loss determined with reference to taxable years to which adjustments are allocated. The total amount of the adjustments required under section 481(a) and attributable to the taxable years 1953 through 1957 in this example is assumed to be $10,000. The redetermination of taxable income established by the taxpayer for the taxable years 1955, 1956, and 1957 appears under the heading "Taxable income established under accrual method" in the above tabulation. The tabulation assumes that the taxpayer has been able to recompute the income for those years so as to establish

a net adjustment of $9,000, which leaves a balance of $1,000 unaccounted for. In accordance with the requirements of section 481(b)(2), the $1,000 amount is allocated to 1958, the taxable year of the change. The following computations are necessary in order to determine the tax attributable to the adjustments under section 481(a):

Increase in tax attributable to inclusion in 1958 of the entire $10,000 adjustment

Tax on income of 1958 increased by entire amount of adjustment ($100,000 + $10,000)	$51,700
Tax on income of 1958 without adjustment ($100,000)	$46,500
Increase in tax attributable to inclusion of entire adjustment in year of the change	5,200

Increase in tax attributed to adjustment computed under section 481(b)(1)

Year	Amount of adjustment	Tax before adjustment	Tax after adjustment	Increase in tax liability attributable to adjustment
1958	$3,334	$46,500	$48,234	$1,734
1957	3,333	41,300	43,033	1,733
1956	3,333	36,100	37,833	1,733
Increase in tax attributable to adjustment computed under section 481(b)(1)				5,200
Increase in tax attributed to adjustment computed under section 481(b)(2)				
1953	[1] $2,000	0	[1] $600	$600
1954	[1] 3,000	$300	[1] 1,200	900
1955	6,000	0	300	300
1956	(3,000)	36,100	34,540	(1,560)
1957	96,000	41,300	44,420	3,120
1958	[2] 1,000	46,500	[2] 47,020	520
Increase in tax attributable to the adjustment computed under section 481(b)(2)				3,880

[1] Attributable to recomputations of net operating loss carrybacks determined with reference to net operating loss in 1955.

[2] Attributable to the inclusion of $1,000 in the year of the change which represents the portion of the $10,000 adjustment not allocated to taxable years prior to the year of the change for which taxable income is established under the new method.

Since the limitation under section 481(b)(2) ($3,880) on the amount of tax attributable to the adjustments is applicable, the final tax for the taxable year of the change is computed by adding such amount to the tax for that year computed without the inclusion of any amount attributable to the adjustments, that is, $46,500 plus $3,880, or $50,380.

[T.D. 6500, 25 FR 11732, Nov. 26, 1960, as amended by T.D. 6490, 25 FR 8374, Sept. 1, 1960; T.D. 7301, 39 FR 963, Jan. 4, 1974]

§ 1.481–3 Adjustments attributable to pre-1954 Code years where change was not initiated by taxpayer.

If the adjustments required by section 481(a) and § 1.481–1 are attributable to a change in method of accounting which was not initiated by the taxpayer, no portion of any adjustments which is attributable to pre-1954 Code years shall be taken into account in computing taxable income. For example, if the total adjustments in the case of a change in method of accounting which is not initiated by the taxpayer amount to $10,000, of which $4,000 is attributable to pre-1954 Code years, only $6,000 of the $10,000 total adjustments is required to be taken into account under section 481 in computing taxable income. The portion of the adjustments which is attributable to pre-1954 Code years is the net amount of the adjustments which would have been required if the taxpayer had changed his method of accounting in his first taxable year which began after December 31, 1953, and ended after August 16, 1954. See section 481(b)(4)(A).

[T.D. 6500, 25 FR 11735, Nov. 26, 1960]

§ 1.481–4 Adjustments attributable to pre-1954 Code years where change was initiated by taxpayer.

(a) Amount of adjustments to be taken into account. If the adjustments required by section 481(a) and § 1.481–1 are attributable to a change in method of accounting initiated by the taxpayer, the amount of such adjustments, to the extent such amount does not exceed the net amount which would have been required if the change had been made in the first taxable year beginning after December 31, 1953, and ending after August 16, 1954, shall be taken into account by the taxpayer in computing taxable income in the manner provided in section 481(b)(4)(B) and paragraph (b) of this section. The preceding sentence shall apply only if such amount would increase taxable income for such year by more than $3,000. For example, if the total adjustments amount to $19,000, and the portion of the adjustments attributable to pre-

1954 Code years is $10,000 and the balance of $9,000 is attributable to taxable years subject to the 1954 Code, the adjustments shall be taken into account as follows:

(1) The portion attributable to pre-1954 Code years ($10,000) shall be taken into account in the manner provided in section 481(b)(4)(B) and paragraph (b) of this section, and the limitations provided in section 481(b)(1) or (2) will apply to the balance of $9,000; or

(2) If the taxpayer elects under section 481(b)(6) to take the adjustments attributable to pre-1954 Code years into account under section 481(b)(1) or (2), the limitations provided in section 481(b)(1) or (2) will apply to the entire amount of the adjustments ($19,000).

The provisions of section 481(b)(4), section 481(b)(6), and paragraphs (b), (c), (d), and (e) of this section shall not apply with respect to changes in methods of accounting made in taxable years beginning after December 31, 1963.

(b) Years for which amounts are to be taken into account. **(1)** If the amount of the adjustments determined in accordance with section 481(b)(4)(A) and paragraph (a) of this section would increase the taxable income of the taxpayer for the first taxable year to which section 481 applies by more than $3,000, the amount of such adjustments shall, except as provided in paragraphs (c), (d), (f), and (g) of this section, be taken into account—

(i) One-tenth in each of the 10 taxable years beginning with the taxable year of the change, or

(ii) If the taxable year of the change was a taxable year beginning after December 31, 1953, and ending after August 16, 1954, but before January 1, 1958, and if the taxpayer makes the election under section 481(b)(4)(B) in the manner provided in subparagraph (4) of this paragraph, one-tenth in each of the 10 taxable years beginning with the first taxable year which begins after December 31, 1957.

(2)(i) The 10-year period which begins with the taxable year of the change shall be reduced by the number of years in respect of which assessment of the tax is prevented by operation of any law or rule of law. In the case of a taxpayer whose taxable year of the change ended before January 1, 1958, and who elects to use the period provided for in subparagraph (1)(ii) of this paragraph, the 10-year period which begins with the first taxable year beginning after December 31, 1957, shall be reduced by the number of years which corresponds to the number of taxable years, beginning with the taxable year of the change in respect of which assessment of the tax was prevented by the operation of any law or rule of law on September 2, 1958.

(ii) In the case of such a shortened period, the portion of the adjustments to be taken into account in any one taxable year within such shortened period shall be one-tenth of such adjustments, that is, the same pro rata portion which would have been taken into account in such taxable year if the 10-year period beginning with such first taxable year had not been shortened. If, for example, in a case where the 10-year period is properly used, assessment of a deficiency is prevented with respect to 1 of the 10 taxable years in which one-tenth of the adjustments would otherwise be required to be taken into account, then only nine-tenths of such adjustments is to be taken into account ratably in the other 9 taxable years. Thus, if the adjustments required under section 481(a) amount to $10,000 and assessment of a deficiency for the calendar year 1954 (the taxable year of the change) is prevented, only nine-tenths of the adjustments, or $9,000, is to be taken into account in 1955 and the eight following taxable years at the rate of $1,000 a year. Similarly, if the taxpayer elects to begin the 10-year period with the taxable year 1958, only nine-tenths, or $9,000, is to be taken into account in 1958 and the eight following taxable years at the rate of $1,000 a year.

(3) If assessment of a deficiency is prevented with respect to a taxable year for which a prorated part would otherwise be required to be taken into account under subparagraphs (1) and (2) of this paragraph, section 481(b)(4)(B) does not reopen that year for assessment purposes.

(4) The election provided in section 481(b)(4)(B) and subparagraph (1) of this paragraph shall be made—

(i) In cases where the taxpayer requests the Commissioner's permission to change his method of accounting, at the time such request is made or at such other time as the Commissioner, prior to granting the taxpayer permission to make the change, may afford the taxpayer an opportunity to make such election; or

(ii) In cases where the taxpayer changed his method of accounting without the advance approval of the Commissioner and has not made an election to return to his former method of accounting in accordance with § 1.481–6, at any time before May 21, 1959.

The election shall be in the form of a written statement to the effect that the taxpayer elects under section 481(b)(4)(B) to take the adjustments determined in accordance with section 481(b)(4)(A) into account in the 10-year period beginning with the first taxable year beginning after December 31, 1957, and that the taxpayer agrees to include one-tenth of such adjustments in taxable income for such years in the manner provided in subparagraph (2) of this paragraph. In the case of a partnership, the election shall be made by the individual partners. In the case of a taxpayer referred to in subdivision (i) of this subparagraph, the statement of election shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C. 20224. In the case of a taxpayer referred to in subdivision (ii) of this subparagraph, the statement of election shall be filed with the district director with whom he filed his income tax return for the taxable year of the change.

(c) Limitation on years in which adjustments can be taken into account. The amount of any adjustments determined in accordance with section 481(b)(4)(A) and paragraph (a) of this section, to the extent not taken into account in prior taxable years under section 481(b)(4)(B) and paragraph (b) of this section, shall be taken into account as follows:

(1) In the case of an individual taxpayer, such amount shall be taken into account in the taxable year in which he dies or ceases to engage in a trade or business;

(2) In the case of a partner, his distributive share of such amount shall be taken into account in his taxable year in which the partnership terminates or in which his entire interest in such partnership is transferred or liquidated; or

(3) In the case of a corporation, such amount shall be taken into account in the taxable year in which the corporation ceases to engage in a trade or business, unless the amount is required to be taken into account by the acquiring corporation under section 381(c)(21) and the regulations thereunder.

(d) Election under section 481(b)(6). **(1)** Under section 481(b)(6) a taxpayer may elect to take the adjustments determined in accordance with section 481(b)(4)(A) and paragraph (a) of this section into account in the manner provided in section 481(b)(1) or (2) and paragraphs (a) or (b) of § 1.481-2 in lieu of taking such adjustments into account under the 10-year allocation rule provided in section 481(b)(4)(B) and paragraph (b) of this section. If a taxpayer makes the election under section 481(b)(6), such taxpayer may not take any portion of the adjustments into account under the 10-year allocation rule provided in section 481(b)(4)(B). In such cases, the entire amount of the adjustments required by section 481(a) is to be taken into account in computing taxable income for the taxable year of the change, subject to the limitations on tax provided in section 481(b)(1) or (2). For example, if the adjustments resulting from a change in method of accounting which occurred in 1956 amount to $25,000, of which $10,000 is attributable to pre-1954 Code years, and the taxpayer elects under section 481(b)(6) to take such adjustments into account in the manner provided by section 481(b)(1) or (2), the limitations on tax provided in section 481(b)(1) or (2) shall apply to the entire $25,000 adjustments.

(2) The election under section 481(b)(6) may be made only if the taxpayer consents in writing to the assessment, within such period as may be agreed upon with the Commissioner or district director, of any deficiency for the taxable year of the change in the method of accounting which results from taking such adjustments into account in the manner so elected, even though at the time of filing such consent the assessment of such deficiency would otherwise be prevented by the operation of any law or rule of law.

(3) The election provided in section 481(b)(6) shall be made within the time prescribed by law for filing the return (including extensions of time therefor) for the taxable year of the change, or within 90 days after the date on which the Commissioner grants permission to the taxpayer to change his method of accounting, or at any time before May 21, whichever is later. The statement shall be filed with the district director with whom the taxpayer files his income tax return for the taxable year of the change and shall be attached to the return for such year or, in the case of returns previously filed, the statement shall be attached to the necessary amended return or returns.

(e) Example. The application of the provisions of this section may be illustrated by the following examples:

Example (1). X Corporation has been filing its income tax returns and keeping its books on the cash receipts and disbursements method of accounting for the calendar year. It requests, and is granted, the permission of the Commissioner, effective with the calendar year 1960, to change to an accrual method of accounting. As of January 1, 1954, the taxpayer had an opening inventory of $20,000, accounts receivable of $22,000, and accounts payable of $14,000. As of January 1, 1960, its records reflect an opening inventory of $34,000, accounts receivable of $32,000, and accounts payable of $19,000. The

corporation has no other items which require adjustment under section 481(a). The adjustments required to be made by X Corporation in 1960 under section 481(a) amount to $47,000 ($34,000 plus $32,000 less $19,000). The amount of the adjustments which X Corporation would have been required to make if it had changed its method of accounting for the calendar year 1954 is $28,000 ($20,000 plus $22,000 less $14,000). Since such $28,000 of adjustments in respect of pre-1954 Code years would increase the taxable income for 1954 by more than $3,000, and since the adjustments are attributable to a change in method of accounting initiated by the taxpayer, such $28,000 of adjustments shall be taken into account under section 481(b)(4)(B) and paragraph (b) of § 1.481–4, unless X Corporation elects under section 481(b)(6) to have the limitations on tax provided by section 481(b)(1) or (2) apply to such adjustments. The remaining portion ($19,000) of the adjustments required by section 481(a) is to be taken into account in 1960, subject, however, to the tax limitation applicable under the 3-year allocation method of section 481(b)(1) or the new-accounting-method allocation under section 481(b)(2).

Example (2). If the facts in example (1) were the same except that as of January 1, 1960, the three adjustments are such that only $20,000 of adjustments is required to be taken into account under section 481(a) for 1960, then the entire amount of adjustments ($20,000) is to be taken into account in the manner provided by section 481(b)(4) or section 481(b)(6) since such amount does not exceed the $28,000 of adjustments that would have been required if the taxpayer had changed its method of accounting for the calendar year 1954.

(f) Special rule for pre-1954 adjustments in case of certain decedents. Section 481(b)(5) provides a special rule in respect of the tax attributable to pre-1954 adjustments in the case of a change from the cash receipts and disbursements method to an accrual method involving the use of inventories made on or after August 16, 1954, and before January 1, 1958, for a taxable year to which section 481 applies, by the executor or administrator of a decedent's estate in the first income tax return filed by such executor or administrator on behalf of the decedent. Such rule provides that—

(1) Such a change shall be given effect in determining taxable income (other than for the purpose of computing a net operating loss carryback to any prior taxable year of the decedent); and

(2) If the adjustments required by section 481(a) in respect of taxable years to which section 481 does not apply would increase taxable income of the decedent by more than $3,000, then the tax attributable to such adjustments shall not exceed an amount equal to the tax that would have been payable on the cash receipts and disbursements method for the years for which the executor or administrator filed income tax returns on behalf of the decedent, computed for each such year as though a ratable portion of the taxable income for such year had been received in each of 10 taxable years beginning and ending on the same dates as the taxable year for which the tax is being computed.

(g) Exception for certain agreements. (1) Section 29(d)(2) of the Technical Amendments Act of 1958 (72 Stat. 1629) provides as follows:

Sec. 29. Adjustments required by changes in method of accounting. * * *

(d) Effective date. * * *

(2) Exception for certain agreements. The amendments made by subsections (a), (b)(1), and (c) shall not apply if before the date of the enactment of this Act—

(A) The taxpayer applied for a change in the method of accounting in the manner provided by regulations prescribed by the Secretary of the Treasury or his delegate, and

(B) The taxpayer and the Secretary of the Treasury or his delegate agreed to the terms and conditions for making the change.

(2) The amendments made to section 481 by section 29 (other than paragraphs 2 through 5 of subsection (b)) of the Technical Amendments Act of 1958 shall not apply if, before September 2, 1958, the taxpayer applied for a change in method of accounting in the manner provided by any Federal income tax regulation and the taxpayer and the Commissioner agreed to the terms and conditions for making the change.

(3) A taxpayer who, in accordance with any provision of the Code or of any Federal income tax regulation permitting such action, elected to change his method of accounting with regard to one or more material items, such as research and experimental expenditures (section 174), soil and water conservation expenditures (section 175), last-in, first-out inventories (section 472), and exploration expenditures (section 615), and who satisfied the requirements of the regulations dealing with such elections, shall be treated for purposes of section 29(d)(2) of the Technical Amendments Act of 1958 as a taxpayer who applied for and changed his method of accounting in the manner provided by regulations and who agreed to the terms and conditions for making the change.

[T.D. 6500, 25 FR 11735, Nov. 26, 1960]

§ 1.481–5 Adjustments taken into account with consent.

(a) In addition to the methods of allocation described in section 481(b), the adjustments required by section 481(a) may be taken into account in computing the tax under chapter 1 of the Code for such taxable years, in such manner and subject to such conditions as may be agreed upon between the Commissioner and the taxpayer. See section 481(c). Requests for approval of a method of allocation differing from those described in section 481(b) shall be addressed to the Commissioner of Internal Revenue, Attention: T:R, Wash-

ington, D.C. 20224, and shall set forth in detail the facts and circumstances upon which the taxpayer bases his request. Permission will be granted only if the taxpayer and the Commissioner agree to the terms and conditions under which the allocation is to be effected.

(b) The agreement shall be in writing and shall be signed by the Commissioner and the taxpayer. It shall set forth the items to be adjusted, the amount of the adjustments, the taxable year or years for which the adjustments are to be taken into account, and the amount of the adjustments allocable to each such year. The agreement shall be binding on the parties except upon a showing of fraud, malfeasance, or misrepresentation of a material fact.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.481–6 Election to return to former method of accounting.

(a) Section 29(e) of the Technical Amendments Act of 1958 (72 Stat. 1629) provides as follows:

Sec. 29. Adjustments required by changes in method of accounting. * * *

(e) Election to return to former method of accounting—(1) Election. Any taxpayer who for any taxable year beginning after December 31, 1953, and ending after August 16, 1954, and before the date of enactment of this Act, computed his taxable income under a method of accounting different from the method under which his taxable income for the preceding taxable year was computed, may elect to recompute his taxable income, beginning with the taxable year for which taxable income was computed under such different method of accounting, under the method of accounting under which taxable income was computed for such preceding taxable year. An election under this paragraph shall be made within 6 months after the date of the enactment of this Act, and shall be made in such manner as the Secretary of the Treasury or his delegate may provide. This paragraph shall not apply to any taxpayer—

(A) To whom subsection (d)(2) applies, or

(B) Who was required, before the date of the enactment of this Act, by the Secretary of the Treasury or his delegate to change his method of accounting.

(2) Statute of limitations. If assessment of any deficiency for any taxable year resulting from an election under paragraph (1) is prevented on the date on which such election is made, or at any time within one year after such date, by the operation of any law or rule of law, such assessment may, nevertheless, be made if made within one year after such date. An election by a taxpayer under paragraph (1) shall be considered as a consent to the assessment pursuant to this paragraph of any such deficiency. If refund or credit of any overpayment of income tax resulting from an election under paragraph (1) is prevented on the date on which such election is made, or at any time within one year after such date, by the operation of any law or rule of law, refund or credit of such overpayment may, nevertheless, be made or allowed if claim therefor is filed within one year after such date.

(b) Except as provided in paragraph (e) of this section, a taxpayer who for any taxable year beginning after December 31, 1953, and ending after August 16, 1954, but before September 2, 1958, computed his taxable income under a method of accounting different from the method used for the immediately preceding taxable year may elect to recompute his taxable income, beginning with the taxable year for which such method was first used, under the method used for such preceding taxable year.

(c) The election referred to in paragraph (b) of this section shall be made in the following manner:

(1) On or before March 2, 1959, the taxpayer shall file with the district director with whom he filed his income tax return for the taxable year of the change a statement to the effect that he elects to recompute his taxable income, beginning with the first taxable year for which he computed his taxable income under a method of accounting different from the preceding taxable year, under the method used for such preceding taxable year. The statement shall indicate the first taxable year for which taxable income was computed under a different method of accounting; and

(2) On or before June 1, 1959, the taxpayer shall file amended income tax returns for all taxable years affected by the election with a statement attached thereto showing the recomputation of taxable income for such taxable years under the method of accounting which he used in computing taxable income for the taxable year immediately preceding the taxable year of the change. The taxpayer shall also compute the amount of deficiency or overassessment in tax resulting from such recomputation of taxable income.

(d)(1) If assessment of a deficiency for any taxable year resulting from an election under this section is prevented on the date on which the election is made, or at any time within one year after such date, by the operation of any law or rule of law, such assessment may, nevertheless, be made within one year after such date. An election under this section shall be considered as a consent to the assessment of any such deficiency.

(2) If refund or credit of any overpayment of income tax resulting from an election under this section is prevented on the date on which such election is made, or at any time within one year after such date, by the operation of any law or rule of law, refund or credit of such overpayment may, nevertheless, be made or allowed if a claim for such refund or credit is filed within one year after such date.

(e) An election under this section may not be made by a taxpayer—

(1) To whom paragraph (g) of § 1.481–4, relating to exception for certain agreements, applies, or

(2) Who was required, before September 2, 1958, by the Commissioner or district director to change his method of accounting.

For purposes of subparagraph (2) of this paragraph, a taxpayer, who on his own initiative, changed his method of accounting in order to conform to the requirements of any Federal income tax regulation or ruling shall not, merely because of such fact, be considered to be a taxpayer who was required, for purposes of section 481, to change his method of accounting.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.482–1 Allocation of income and deductions among taxpayers.

(a) Definitions. When used in this section and in § 1.482–2—

(1) The term "organization" includes any organization of any kind, whether it be a sole proprietorship, a partnership, a trust, an estate, an association, or a corporation (as each is defined or understood in the Internal Revenue Code or the regulations thereunder), irrespective of the place where organized, where operated, or where its trade or business is conducted, and regardless of whether domestic or foreign, whether exempt, whether affiliated, or whether a party to a consolidated return.

(2) The term "trade" or "business" includes any trade or business activity of any kind, regardless of whether or where organized, whether owned individually or otherwise, and regardless of the place where carried on.

(3) The term "controlled" includes any kind of control, direct or indirect, whether legally enforceable, and however exercisable or exercised. It is the reality of the control which is decisive, not its form or the mode of its exercise. A presumption of control arises if income or deductions have been arbitrarily shifted.

(4) The term "controlled taxpayer" means any one of two or more organizations, trades, or businesses owned or controlled directly or indirectly by the same interests.

(5) The terms "group" and "group of controlled taxpayers" mean the organizations, trades, or businesses owned or controlled by the same interests.

(6) The term "true taxable income" means, in the case of a controlled taxpayer, the taxable income (or, as the case may be, any item or element affecting taxable income) which would have resulted to the controlled taxpayer, had it in the conduct of its affairs (or, as the case may be, in the particular contract, transaction, arrangement, or other act) dealt with the other member or members of the group at arm's length. It does not mean the income, the deductions, the credits, the allowances, or the item or element of income, deductions, credits, or allowances, resulting to the controlled taxpayer by reason of the particular contract, transaction, or arrangement, the controlled taxpayer, or the interests controlling it, chose to make (even though such contract, transaction, or arrangement be legally binding upon the parties thereto).

(b) Scope and purpose. (1) The purpose of section 482 is to place a controlled taxpayer on a tax parity with an uncontrolled taxpayer, by determining, according to the standard of an uncontrolled taxpayer, the true taxable income from the property and business of a controlled taxpayer. The interests controlling a group of controlled taxpayers are assumed to have complete power to cause each controlled taxpayer so to conduct its affairs that its transactions and accounting records truly reflect the taxable income from the property and business of each of the controlled taxpayers. If, however, this has not been done, and the taxable incomes are thereby understated, the district director shall intervene, and, by making such distributions, apportionments, or allocations as he may deem necessary of gross income, deductions, credits, or allowances, or of any item or element affecting taxable income, between or among the controlled taxpayers constituting the group, shall determine the true taxable income of each controlled taxpayer. The standard to be applied in every case is that of an uncontrolled taxpayer dealing at arm's length with another uncontrolled taxpayer.

(2) Section 482 and this section apply to the case of any controlled taxpayer, whether such taxpayer makes a separate or a consolidated return. If a controlled taxpayer makes a separate return, the determination is of its true separate taxable income. If a controlled taxpayer is a party to a consolidated return, the true consolidated taxable income of the affiliated group and the true separate taxable income of the controlled taxpayer are determined consistently with the principles of a consolidated return.

(3) Section 482 grants no right to a controlled taxpayer to apply its provisions at will, nor does it grant any right to compel the district director to apply such provisions. It is not intended (except in the case of the computation of consolidated taxable income under a consolidated return) to effect in any case such a distribution, apportionment, or allocation of gross income, deductions, credits, or allowances, or any item of gross income, deductions, credits, or allowances, as would produce a result equivalent to a computation of consolidated taxable income under subchapter A, chapter 6 of the Code.

(c) **Application.** Transactions between one controlled taxpayer and another will be subjected to special scrutiny to ascertain whether the common control is being used to reduce, avoid, or escape taxes. In determining the true taxable income of a controlled taxpayer, the district director is not restricted to the case of improper accounting, to the case of a fraudulent, colorable, or sham transaction, or to the case of a device designed to reduce or avoid tax by shifting or distorting income, deductions, credits, or allowances. The authority to determine true taxable income extends to any case in which either by inadvertence or design the taxable income, in whole or in part, of a controlled taxpayer, is other than it would have been had the taxpayer in the conduct of his affairs been an uncontrolled taxpayer dealing at arm's length with another uncontrolled taxpayer.

(d) **Method of allocation.** (1) The method of allocating, apportioning, or distributing income, deductions, credits, and allowances to be used by the district director in any case, including the form of the adjustments and the character and source of amounts allocated, shall be determined with reference to the substance of the particular transactions or arrangements which result in the avoidance of taxes or the failure to clearly reflect income. The appropriate adjustments may take the form of an increase or decrease in gross income, increase or decrease in deductions (including depreciation), increase or decrease in basis of assets (including inventory), or any other adjustment which may be appropriate under the circumstances. See § 1.482–2 for specific rules relating to methods of allocation in the case of several types of business transactions.

(2) Whenever the district director makes adjustments to the income of one member of a group of controlled taxpayers (such adjustments being referred to in this paragraph as "primary" adjustments) he shall also make appropriate correlative adjustments to the income of any other member of the group involved in the allocation. The correlative adjustment shall actually be made if the U.S. income tax liability of the other member would be affected for any pending taxable year. Thus, if the district director makes an allocation of income, he shall not only increase the income of one member of the group, but shall decrease the income of the other member if such adjustment would have an effect on the U.S. income tax liability of the other member for any pending taxable year. For the purposes of this subparagraph, a "pending taxable year" is any taxable year with respect to which the U.S. income tax return of the other member has been filed by the time the allocation is made, and with respect to which a credit or refund is not barred by the operation of any law or rule of law. If a correlative adjustment is not actually made because it would have no effect on the U.S. income tax liability of the other member involved in the allocation for any pending taxable year, such adjustment shall nevertheless be deemed to have been made for the purpose of determining the U.S. income tax liability of such member for a later taxable year, or for the purposes of determining the U.S. income tax liability of any person for any taxable year. The district director shall furnish to the taxpayer with respect to which the primary adjustment is made a written statement of the amount and nature of the correlative adjustment which is deemed to have been made. For purposes of this subparagraph, a primary adjustment shall not be considered to have been made (and therefore a correlative adjustment is not required to be made) until the first occurring of the following events with respect to the primary adjustment:

(i) The date of assessment of the tax following execution by the taxpayer of a Form 870 (Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment) with respect to such adjustment,

(ii) Acceptance of a Form 870–AD (Offer of Waiver of Restriction on Assessment and Collection Deficiency in Tax and Acceptance of Overassessment),

(iii) Payment of the deficiency,

(iv) Stipulation in the Tax Court of the United States, or

(v) Final determination of tax liability by offer-in-compromise, closing agreement, or court action.

The principles of this subparagraph may be illustrated by the following examples in each of which it is assumed that X and Y are members of the same group of controlled entities and that they

regularly compute their incomes on the basis of a calendar year:

Example (1). Assume that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length rental charge for Y's use of X's tangible property in 1966; that X consents to an assessment reflecting such adjustment by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. The primary adjustment is therefore considered to have been made in 1968. Assume further that both X and Y are United States corporations and that Y had net operating losses in 1963, 1964, 1965, 1966, and 1967. Although a correlative adjustment would not have an effect on Y's U.S. income tax liability for any pending taxable year, an adjustment increasing Y's net operating loss for 1966 shall be deemed to have been made for the purposes of determining Y's U.S. income tax liability for 1968 or a later taxable year to which the increased operating loss may be carried. The district director shall notify X in writing of the amount and nature of the adjustment which is deemed to have been made to Y.

Example (2). Assume that X and Y are United States corporations; that X is in the business of rendering engineering services; that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length fee for the rendition of engineering services by X in 1966 relating to the construction of Y's factory; that X consents to an assessment reflecting such adjustment by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. Assume further that fees for such services would properly constitute a capital expenditure by Y, and that Y does not place the factory in service until 1969. Although a correlative adjustment (increase in basis) would not have an effect on Y's U.S. income tax liability for a pending taxable year, an adjustment increasing the basis of Y's assets for 1966 shall be deemed to have been made in 1968 for the purpose of computing allowable depreciation or gain or loss on disposition for 1969 and any future taxable year. The district director shall notify X in writing of the amount and nature of the adjustment which is deemed to have been made to Y.

Example (3). Assume that X is a U.S. taxpayer and Y is a foreign taxpayer not engaged in a trade or business in the United States; that in 1968 the district director proposes to adjust X's income for 1966 to reflect an arm's length interest charge on a loan made to Y; that X consents to an assessment reflecting such allocation by executing a Waiver, Form 870; and that an assessment of the tax with respect to such adjustment is made in 1968. Although a correlative adjustment would not have an effect on Y's U.S. income tax liability, an adjustment in Y's income for 1966 shall be deemed to have been made in 1968 for the purposes of determining the amount of Y's earnings and profits for 1966 and subsequent years, and of any other effect it may have on any person's U.S. income tax liability for any taxable year. The district director shall notify X in writing of the amount and nature of the allocation which is deemed to have been made to Y.

(3) In making distributions, apportionments, or allocations between two members of a group of controlled entities with respect to particular transactions, the district director shall consider the effect upon such members of an arrangement between them for reimbursement within a reasonable period before or after the taxable year if the taxpayer can establish that such an arrangement in fact existed during the taxable year under consideration. The district director shall also consider the effect of any other nonarm's length transaction between them in the taxable year which, if taken into account, would result in a set-off against any allocation which would otherwise be made, provided the taxpayer is able to establish with reasonable specificity that the transaction was not at arm's length and the amount of the appropriate arm's length charge. For purposes of the preceding sentence, the term arm's length refers to the amount which was charged or would have been charged in independent transactions with unrelated parties under the same or similar circumstances considering all the relevant facts and without regard to the rules found in § 1.482-2 by which certain charges are deemed to be equal to arm's length. For example, assume that one member of a group performs services which benefit a second member, which would in itself require an allocation to reflect an arm's length charge for the performance of such services. Assume further that the first member can establish that during the same taxable year the second member engages in other nonarm's length transactions which benefit the first member, such as by selling products to the first member at a discount, or purchasing products from the first member at a premium, or paying royalties to the first member in an excessive amount. In such case, the value of the benefits received by the first member as a result of the other activities will be set-off against the allocation which would otherwise be made. If the effect of the set-off is to change the characterization or source of the income or deductions, or otherwise distort taxable income, in such a manner as to affect the United States tax liability of any member, allocations will be made to reflect the correct amount of each category of income or deductions. In order to establish that a set-off to the adjustments proposed by the district director is appropriate, the taxpayer must notify the district director of the basis of any claimed set-off at any time before the expiration of the period ending 30 days after the date of a letter by which the district director transmits an examination report notifying the taxpayer of proposed adjustments or before July 16, 1968, whichever is later. The principles of this subparagraph may be illustrated by the following examples, in each of which it is assumed that P and S are calendar year corporations and are both members of the same group of controlled entities:

Example (1). P performs services in 1966 for the benefit of S in connection with S's manufacture and sale of a product. S does not pay P for such services in 1966, but in consideration for such services, agrees in 1966 to pay P a percentage of the amount of sales of the product in 1966 through 1970. In 1966 it appeared this agreement would provide adequate considera-

tion for the services. No allocation will be made with respect to the services performed by P.

Example (2). P renders services to S in connection with the construction of S's factory. An arm's length charge for such services, determined under paragraph (b) of § 1.482–2, would be $100,000. During the same taxable year P makes available to S a machine to be used in such construction. P bills S $125,000 for the services, but does not bill for the use of the machine. No allocation will be made with respect to the excessive charge for services or the undercharge for the machine if P can establish that the excessive charge for services was equal to an arm's length charge for the use of the machine, and if the taxable income and income tax liabilities of P and S are not distorted.

Example (3). Assume the same facts as in example (2), except that, if P had reported $25,000 as rental income and $25,000 less service income, it would have been subject to the tax on personal holding companies. Allocations will be made to reflect the correct amounts of rental income and service income.

(4) If the members of a group of controlled taxpayers engage in transactions with one another, the district director may distribute, apportion, or allocate income, deductions, credits, or allowances to reflect the true taxable income of the individual members under the standards set forth in this section and in § 1.482–2 notwithstanding the fact that the ultimate income anticipated from a series of transactions may not be realized or is realized during a later period. For example, if one member of a controlled group sells a product at less than an arm's length price to a second member of the group in one taxable year and the second member resells the product to an unrelated party in the next taxable year, the district director may make an appropriate allocation to reflect an arm's length price for the sale of the product in the first taxable year, notwithstanding that the second member of the group had not realized any gross income from the resale of the product in the first year. Similarly, if one member of a group lends money to a second member of the group in a taxable year, the district director may make an appropriate allocation to reflect an arm's length charge for interest during such taxable year even if the second member does not realize income during such year. The provisions of this subparagraph apply even if the gross income contemplated from a series of transactions is never, in fact, realized by the other members.

(5) Section 482 may, when necessary to prevent the avoidance of taxes or to clearly reflect income, be applied in circumstances described in sections of the Code (such as section 351) providing for nonrecognition of gain or loss. See, for example, "National Securities Corporation v. Commissioner of Internal Revenue", 137 F.2d 600 (3d Cir. 1943), cert. denied 320 U.S. 794 (1943).

(6) If payment or reimbursement for the sale, exchange, or use of property, the rendition of services, or the advance of other consideration among members of a group of controlled entities was prevented, or would have been prevented, at the time of the transaction because of currency or other restrictions imposed under the laws of any foreign country, any distributions, apportionments, or allocations which may be made under section 482 with respect to such transactions may be treated as deferrable income or deductions, providing the taxpayer has, for the year to which the distributions, apportionments, or allocations relate, elected to use a method of accounting in which the reporting of deferrable income is deferred until the income ceases to be deferrable income. Under such method of accounting, referred to in this section as the deferred income method of accounting, any payments or reimbursements which were prevented or would have been prevented, and any deductions attributable directly or indirectly to such payments or reimbursements, shall be deferred until they cease to be deferrable under such method of accounting. If such method of accounting has not been elected with respect to the taxable year to which the allocations under section 482 relate, the taxpayer may elect such method with respect to such allocations (but not with respect to other deferrable income) at any time before the first occurring of the following events with respect to the allocations:

(i) Execution by the taxpayer of Form 870 (Waiver of Restrictions on Assessment and Collection of Deficiency in Tax and Acceptance of Overassessment);

(ii) Expiration of the period ending 30 days after the date of a letter by which the district director transmits an examination report notifying the taxpayer of proposed adjustments reflecting such allocations or before July 16, 1968, whichever is later; or

(iii) Execution of a closing agreement or offer-in-compromise.

The principles of this subparagraph may be illustrated by the following example in which it is assumed that X, a domestic corporation, and Y, a foreign corporation, are members of the same group of controlled entities:

Example. X, which is in the business of rendering a certain type of service to unrelated parties, renders such services for the benefit of Y in 1965. The direct and indirect costs allocable to such services are $60,000, and an arm's length charge for such services is $100,000. Assume that the district director proposes to increase X's income by $100,000, but that the country in which Y is located would have blocked payment

in 1965 for such services. If, prior to the first occurring of the events described in subdivisions (i), (ii), or (iii) of this subparagraph, X elects to use the deferred income method of accounting with respect to such allocation, the $100,000 allocation and the $60,000 of costs are deferrable until such amounts cease to be deferrable under X's method of accounting.

[T.D. 6595, 27 FR 3598, April 14, 1962, as amended by T.D. 6952, 33 FR 5848, April 16, 1968]

§ 1.482–2 Determination of taxable income in specific situations.

(a) Loans or advances—(1) Interest on bona fide indebtedness—(i) In general. Where one member of a group of controlled entities makes a loan or advance directly or indirectly to, or otherwise becomes a creditor of, another member of such group and either charges no interest, or charges interest at a rate which is not equal to an arm's length rate of interest (as defined in paragraph (a)(2) of this section) with respect to such loan or advance, the district directory may make appropriate allocations to reflect an arm's length rate of interest for the use of such loan or advance.

(ii) Application of paragraph (a) of this section—(A) Interest on bona fide indebtedness. Paragraph (a) of this section applies only to determine the appropriateness of the rate of interest charged on the principal amount of a bona fide indebtedness between members of a group of controlled entities, including—

(1) Loans or advances of money or other consideration (whether or not evidenced by a written instrument), and

(2) Indebtedness arising in the ordinary course of business from sales, leases, or the rendition of services by or between members of the group, or any other similar extension of credit.

(B) Alleged indebtedness. This paragraph (a) does not apply to so much of an alleged indebtedness which is not in fact a bona fide indebtedness, even if the stated rate of interest thereon would be within the safe haven rates prescribed in paragraph (a)(2)(iii) of this section. For example, paragraph (a) of this section does not apply to payments with respect to all or a portion of such alleged indebtedness where in fact all or a portion of an alleged indebtedness is a contribution to the capital of a corporation or a distribution by a corporation with respect to its shares. Similarly, this paragraph (a) does not apply to payments with respect to an alleged purchase-money debt instrument given in consideration for an alleged sale of property between two controlled entities where in fact the transaction constitutes a lease of the property. Payments made with respect to alleged indebtedness (including alleged stated interest thereon) shall be treated according to their substance. See § 1.482-2(a)(3)(i).

(iii) Period for which interest shall be charged—(A) General rule. This paragraph (a)(1)(iii) is effective for indebtedness arising after June 30, 1988. See 26 CFR 1.482-2(a)(3) (revised as of April 1, 1988) for indebtedness arising before July 1, 1988. Except as otherwise provided in paragraphs (a)(1)(iii)(B) through (E) of this section, the period for which interest shall be charged with respect to a bona fide indebtedness between controlled entities begins on the day after the day the indebtedness arises and ends on the day the indebtedness is satisfied (whether by payment, offset, cancellation, or otherwise.) Paragraphs (a)(2)(iii)(B) through (E) of this section provide certain alternative periods during which interest is not required to be charged on certain indebtedness. These exceptions apply only to indebtedness described in paragraph (a)(1)(ii)(A)(2) of this section (relating to indebtedness incurred in the ordinary course of business from sales, services, etc., between members of the group) and not evidenced by a written instrument requiring the payment of interest. Such amounts are hereinafter referred to as "intercompany trade receivables". The period for which interest is not required to be changed on intercompany trade receivables under this paragraph (a)(1)(iii) is called the "interest-free period". In general, an intercompany trade receivable arises at the time economic performance occurs (within the meaning of section 461(h) and the regulations thereunder) with respect to the underlying transaction between controlled entities. For purpose of this paragraph (a)(1)(iii), the term "United States" includes any possession of the United States, and the term "foreign country" excludes any possession of the United States.

(B) Exception for certain intercompany transactions in the ordinary course of business. Interest is not required to be charged on an intercompany trade receivable until the first day of the third calendar month following the month in which the intercompany trade receivable arises.

(C) Exception for trade or business of debtor member located outside the United States. In the case of an intercompany trade receivable arising from a transaction in the ordinary course of a trade or business which is actively conducted outside the United States by the debtor member, interest is not required to be charged until the first day of the fourth calendar month following the month in which such intercompany trade receivable arises.

(D) Exception for regular trade practice of creditor member or others in creditor's industry. If the creditor member or unrelated persons in the creditor member's industry, as a regular trade practice, allow unrelated parties a longer period without charging interest than that described in paragraph (a)(1)(iii) (B) or (C) of this section (whichever is applicable) with respect to transactions which are similar to transactions that give rise to intercompany trade receivables, such longer interest-free period shall be allowed with respect a comparable amount of intercompany trade receivables.

(E) Exception for property purchased for resale in a foreign country—(1) General rule. If in the ordinary course of business one member of the group (the "related purchaser") purchases property from another member of the group (the "related seller") for resale to unrelated persons located in a particular foreign country, the related purchaser and the related seller may use as the interest-free period for the intercompany trade receivables arising during the related seller's taxable year from the purchase of such property within the same product group an interest-free period equal the sum of—

(i) The number of days in the related purchaser's average collection period (as determined under paragraph (a)(1)(iii)(E)(2) of this section) for sales of property within the same product group sold in the ordinary course of business to unrelated persons located in the same foreign country, plus

(ii) Ten (10) calendar days.

The interest-free period under this paragraph (a)(1)(iii)(E), however, shall in no event exceed 183 days. The related purchaser does not have to conduct business outside the United States in order to be eligible to use the interest-free period of this paragraph (a)(1)(iii)(E). The interest-free period under this paragraph (a)(1)(iii)(E) shall not apply to intercompany trade receivables attributable to property which is manufactured, produced, or constructed (within the meaning of § 1.954-3(a)(4)) by the related purchaser. For purposes of this paragraph (a)(1)(iii)(E) a product group includes all products within the same three-digit Standard Industrial Classification (SIC) Code (as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President).

(2) Average collection period. An average collection period for purposes of this paragraph (a)(1)(iii)(E) is determined as follows:

(i) Step 1. Determine total sales (less returns and allowances) by the related purchaser in the product group to unrelated persons located in the same foreign country during the related purchaser's last taxable year ending on or before the first day of the related seller's taxable year in which the intercompany trade receivable arises.

(ii) Step 2. Determine the related purchaser's average month-end accounts receivable balance with respect to sales described in paragraph (a)(1)(iii)(E)(2)(i) for the related purchaser's last taxable year ending on or before the first day of the related seller's taxable year in which the intercompany trade receivable arises.

(iii) Step 3. Compute a receivables turnover rate by dividing the total sales amount described in paragraph (a)(1)(iii)(E)(2)(i) of this section by the average receivables balance described in paragraph (a)(1)(iii)(E)(2)(ii) of this section.

(iv) Step 4. Divide the receivables turnover rate determined under (a)(1)(iii)(E)(2)(iii) of this section into 365, and round the result to the nearest whole number to determine the number of days in the average collection period.

If the related purchaser makes sales in more than one foreign country, or sells property in more than one product group in any foreign country, separate computations of an average collection period, by product group within each country, are required. If the related purchaser resells fungible property in more than one foreign country and the intercompany trade receivables arising from the related party purchase of such fungible property cannot reasonably be identified with resales in particular foreign countries, then solely for the purpose of assigning an interest-free period to such intercompany trade receivables under this paragraph (a)(1)(iii)(E), an amount of each such intercompany trade receivable shall be treated as allocable to a particular foreign country in the same proportion that the related purchaser's sales of such fungible property in such foreign country during the period described in paragraph (a)(1)(iii)(E)(2)(i) of this section bears to the related purchaser's sales of all such fungible property in all such foreign countries during such period. An interest-free period under this paragraph (a)(1)(iii)(E) shall not apply to any intercompany trade receivables arising in a taxable year of the related seller if the related purchaser made no sales described in paragraph (a)(1)(iii)(E)(2)(i) of this section from which the appropriate interest-free period may be determined.

(3) Illustration. The interest-free period provided under paragraph (a)(1)(iii)(E) of this section may be illustrated by the following example:

Example—(i) Facts. X and Y use the calendar year as the taxable year and are members of the same group of controlled entities within the meaning of section 482. For Y's 1988 calendar taxable year X and Y intend to use the interest-free period determined under this paragraph (a)(1)(iii)(E) for intercompany trade receivables attributable to X's purchases of certain products from Y for resale by X in the ordinary course of business to unrelated persons in country Z. For its 1987 calendar taxable year all of X's sales in country Z were of products within a single product group based upon a three-digit SIC code, were not manufactured, produced, or constructed (within the meaning of § 1.954-3(a)(4)) by X, and were sold in the ordinary course of X's trade or business to unrelated persons located only in country Z. These sales and the month-end accounts receivable balances (for such sales and for such sales uncollected from prior months) are as follows:

Month (1987)	Sales	Accounts receivable
January	$500,000	$2,835,850
February	600,000	2,840,300
March	450,000	2,850,670
April	550,000	2,825,700
May	650,000	2,809,360
June	525,000	2,803,200
July	400,000	2,825,850
August	425,000	2,796,240
September	475,000	2,839,390
October	525,000	2,650,550
November	450,000	2,775,450
December	650,000	2,812,000
Totals	6,200,000	$33,665,160

(ii) Average collection period. X's total sales within the same product group to unrelated persons within country Z for the period are $6,200,000. The average receivables balance for the period is $2,805,430 ($33,665,160/12). The average collection period in whole days is determined as follows:

$$\text{Receivables turnover rate} = \frac{\$6{,}200{,}000}{\$2{,}805{,}430} = 2.21$$

$$\text{Average collection period} = \frac{365}{2.21} = \text{165.16 days,}$$

rounded to the nearest whole day = 165 days.

(iii) Interest-free period. Accordingly, for intercompany trade receivables incurred by X during Y's 1988 calendar taxable year attributable to the purchase of property from Y for resale to unrelated persons located in country Z and included in the product group, X may use an interest-free period of 175 days (165 days in the average collection period plus 10 days, but not in excess of a maximum of 183 days). All other intercompany trade receivables incurred by X are subject to the interest-free periods described in paragraphs (a)(1)(iii) (B), (C), or (D), whichever are applicable. If X makes sales in other foreign countries in addition to country Z or makes sales of property in more than one product group in any foreign country, separate computations of X's average collection period, by product group within each country, are required in order for X and Y to determine an interest-free period for such product groups in such foreign countries under this paragraph (a)(1)(iii)(E).

(iv) **Payment; book entries.** (A) Except as otherwise provided in this paragraph (a)(1)(iv), in determining the period of time for which an amount owed by one member of the group to another member is outstanding, payments or other credits to an account are considered to be applied against the earliest amount outstanding, that is, payments or credits are applied against amounts in a first-in, first-out (FIFO) order. Thus, tracing payments to individual intercompany trade receivables is generally not required in order to determine whether a particular intercompany trade receivable has been paid within the applicable interest-free period determined under paragraph (a)(1)(iii) of this section. The application of this paragraph (a)(1)(iv)(A) may be illustrated by the following example:

Example—(i) Facts. X and Y are members of a group of controlled entities within the meaning of section 482. Assume that the balance of intercompany trade receivables owed by X to Y on June 1 is $100, and that all of the $100 balance represents amounts incurred by X to Y during the month of May. During the month of June X incurs an additional $200 of intercompany trade receivables to Y. Assume that on July 15, $60 is properly credited against X's intercompany account to Y, and that $240 is properly credited against the intercompany account on August 31. Assume that under paragraph (a)(1)(iii)(B) of this section interest must be charged on X's intercompany trade receivables to Y beginning with the first day of the third calendar month following the month the intercompany trade receivables arise, and that no alternative interest-free period applies. Thus, the interest-free period for intercompany trade receivables incurred during the month of May ends on July 31, and the interest-free period for intercompany trade receivables incurred during the month of June ends on August 31.

(ii) Application of payments. Using a FIFO payment order, the aggregate payments of $300 are applied first to the opening June balance, and then to the additional amounts incurred during the month of June. With respect to X's June opening balance of $100, no interest is required to be accrued on $60 of such balance paid by X on July 15, because such portion was paid within its interest-free period. Interest for 31 days, from August 1 to August 31 inclusive, is required to be accrued on the $40 portion of the opening balance not paid until August 31. No interest is required to be accrued on the $200 of intercompany trade receivables X incurred to Y during June because the $240 credited on August 31, after eliminating the $40 of indebtedness remaining from periods before June, also eliminated the $20 incurred by X during June prior to the end of the interest-free period for that amount. The amount of interest incurred by X to Y on the $40 amount during August creates bona fide indebtedness between controlled entities and is subject to the provisions of paragraph (a)(1)(iii)(A) of this section without regard to any of the exceptions contained in paragraphs (a)(1)(iii) (B) through (E) of this section.

(B) Notwithstanding the first-in, first-out payment application rule described in paragraph (a)(1)(iv)(A) of this section, the taxpayer may

apply payments or credits against amounts owed in some other order on its books in accordance with an agreement or understanding of the related parties if the taxpayer can demonstrate that either it or others in its industry, as a regular trade practice, enter into such agreements or understandings in the case of similar balances with unrelated parties.

(2) **Arm's length interest rate—(i) In general.** For purposes of section 482 and paragraph (a) of this section, an arm's length rate of interest shall be a rate of interest which was charged, or would have been charged, at the time the indebtedness arose, in independent transactions with or between unrelated parties under similar circumstances. All relevant factors shall be considered, including the principal amount and duration of the loan, the security involved, the credit standing of the borrower, and the interest rate prevailing at the situs of the lender or creditor for comparable loans between unrelated parties.

(ii) Funds obtained at situs of borrower. Notwithstanding the other provisions of paragraph (a)(2) of this section, if the loan or advance represents the proceeds of a loan obtained by the lender at the situs of the borrower, the arm's length rate for any taxable year shall be equal to the rate actually paid by the lender increased by an amount which reflects the costs or deductions incurred by the lender in borrowing such amounts and making such loans, unless the taxpayer establishes a more appropriate rate under the standards set forth in paragraph (a)(2)(i) of this section.

(iii) Safe haven interest rates for certain loans and advances made after May 8, 1986—(A) Applicability—(1) General rule. Except as otherwise provided in paragraph (a)(2) of this section, paragraph (a)(2)(iii)(B) of this section applies with respect to the rate of interest charged and to the amount of interest paid or accrued in any taxable year—

(i) Under a term loan or advance between members of a group of controlled entities where (except as provided in paragraph (a)(2)(iii)(A)(2)(ii)) of this section the loan or advance is entered into after May 8, 1986, and

(ii) After May 8, 1986, under a demand loan or advance between such controlled entities.

(2) Grandfather rule for existing loans. The safe haven rates prescribed in paragraph (a)(2)(iii)(B) of this section shall not apply, and the safe haven rates prescribed in 26 CFR § 1.482-2(a)(2)(iii) (revised as of April 1, 1985) shall apply to—

(i) Term loans or advances made before May 9, 1986, and

(ii) Term loans or advances made before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(B) Safe haven interest rate based on applicable Federal rate. Except as otherwise provided in this paragraph (a)(2), in the case of a loan or advance between members of a group of controlled entities, an arm's length rate of interest referred to in paragraph (a)(2)(i) of this section shall be for purposes of Chapter 1 of the Code—

(1) The rate of interest actually charged if that rate is—

(i) Not less than 100 percent of the applicable Federal rate (the "lower limit"), and

(ii) Not greater than 130 percent of the applicable Federal rate (the "upper limit'), or

(2) If either no interest is charged or if the rate of interest charged is less than the lower limit, then an arm's length rate of interest shall be equal to the lower limit, compounded semiannually, or

(3) If the rate of interest charged is greater than the upper limit, then an arm's length rate of interest shall be equal to the upper limit, compounded semiannually,

unless the taxpayer establishes a more appropriate compound rate of interest under paragraph (a)(2)(i) of this section. However, if the compound rate of interest actually charged is greater than the upper limit and less than the rate determined under paragraph (a)(2)(i) of this section, or if the compound rate actually charged is less than the lower limit and greater than the rate determined under paragraph (a)(2)(i) of this section, then the compound rate actually charged shall be deemed to be an arm's length rate under paragraph (a)(2)(i) of this section. In the case of any sale-leaseback described in section 1274(e), the lower limit shall be 110 percent of the applicable Federal rate, compounded semiannually.

(C) Applicable Federal rate. For purposes of paragraph (a)(2)(iii)(B) of this section, the term "applicable Federal rate" means, in the case of a loan or advance to which this section applies and having a term of—

(1) Not over 3 years, the Federal short-term rate.

(2) Over 3 years but not over 9 years, the Federal mid-term rate, or

(3) Over 9 years, the Federal long-term rate, as determined under section 1274(d) in effect on the date such loan or advance is made. In the case of any sale or exchange between controlled entities, the lower limit shall be the lowest of the applicable Federal rates in effect for any month in the 3-calendar-month period ending with the first calendar month in which there is a binding written contract in effect for such sale or exchange (the "lowest 3-month rate", as defined in section 1274(d)(2)). In the case of a demand loan or advance to which this section applies, the "applicable Federal rate" means the Federal short-term rate determined under section 1274(d) (determined without regard to the lowest 3-month short-term rate determined under section 1274(d)(2)) in effect for each day on which any amount of such loan or advance (including unpaid accrued interest determined under paragraph (a)(2) of this section) is outstanding.

(D) Lender in business of making loans. If the lender in a loan or advance transaction to which paragraph (a)(2) of this section applies is regularly engaged in the trade or business or making loans or advances to unrelated parties, the safe haven rates prescribed in paragraph (a)(2)(iii)(B) of this section shall not apply, and the arm's length interest rate to be used shall be determined under the standards described in paragraph (a)(2)(i) of this section, including reference to the interest rates charged in such trade or business by the lender on loans or advances of a similar type made to unrelated parties at and about the time the loan or advance to which paragraph (a)(2) of this section applies was made.

(E) Foreign currency loans. The safe haven interest rates prescribed in paragraph (a)(2)(iii)(B) of this section do not apply to any loan or advance the principal or interest of which is expressed in a currency other than U.S. dollars.

(3) Coordination with interest adjustments required under certain other Code sections. If the stated rate of interest on the stated principal amount of a loan or advance between controlled entities is subject to adjustment under section 482 and is also subject to adjustment under any other section of the Code (for example, section 467, 483, 1274 or 7872), section 482 and paragraph (a) of this section may be applied to such loan or advance in addition to such other Code section. After the enactment of the Tax Reform Act of 1984, Pub. L. 98-369, and the enactment of Pub. L. 99-121, such other Code sections include sections 467, 483, 1274 and 7872. The order in which the different provisions shall be applied is as follows:

(i) First, the substance of the transaction shall be determined; for this purpose, all the relevant facts and circumstances shall be considered and any law or rule of law (assignment of income, step transaction, etc.) may apply. Only the rate of interest with respect to the stated principal amount of the bona fide indebtedness (within the meaning of paragraph (a)(1) of this section), if any, shall be subject to adjustment under section 482, paragraph (a) of this section, and any other Code section.

(ii) Second, the other Code section shall be applied to the loan or advance to determine whether any amount other than stated interest is to be treated as interest, and if so, to determine such amount according to the provisions of such other Code section.

(iii) Third, whether or not the other Code section applies to adjust the amounts treated as interest under such loan or advance, section 482 and paragraph (a) of this section may then be applied by the district director to determine whether the rate of interest charged on the loan or advance, as adjusted by any other Code section, is greater or less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

(iv) Fourth, section 482 and paragraphs (b) through (e) of this section, if applicable, may be applied by the district director to make any appropriate allocations, other than an interest rate adjustment, to reflect an arm's length transaction based upon the principal amount of the loan or advance and the interest rate as adjusted under paragraph (a)(3) (i), (ii) or (iii) of this section. For example, assume that two commonly controlled taxpayers enter into a deferred payment sale of tangible property and no interest is provided, and assume also that section 483 is applied to treat a portion of the stated sales price as interest, thereby reducing the stated sales price. If after this recharacterization of a portion of the stated sales price as interest, the recomputed sales price does not reflect an arm's length sales price under the principles of paragraph (e) of this section, the district director may make other appropriate allocations (other than an interest rate adjustment) to reflect an arm's length sales price.

(4) Examples. The principles of paragraph (a)(3) of this section may be illustrated by the following examples:

Example (1). An individual, A, transfers $20,000 to a corporation controlled by A in exchange for the corporation's note

which bears adequate stated interest. The district director recharacterizes the transaction as a contribution to the capital of the corporation in exchange for preferred stock. Under paragraph (a)(3)(i) of this section, section 1.482-2(a) does not apply to the transaction because there is no bona fide indebtedness.

Example (2). B, an individual, is an employee of Z corporation, and is also the controlling shareholder of Z. Z makes a term loan of $15,000 to B at a rate of interest that is less than the applicable Federal rate. In this instance the other operative Code section is section 7872. Under section 7872(b), the difference between the amount loaned and the present value of all payments due under the loan using a discount rate equal to 100 percent of the applicable Federal rate is treated as an amount of cash transferred from the corporation to B and the loan is treated as having original issue discount equal to such amount. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may also be applied by the district director to determine if the rate of interest charged on this $15,000 loan (100 percent of the AFR, compounded semiannually, as adjusted by section 7872) is an arm's length rate of interest. Because the rate of interest on the loan, as adjusted by section 7872, is within the safe haven range of 100-130 percent of the AFR, compounded semiannually, no further interest rate adjustments under section 482 and paragraph (a) of this section will be made to this loan.

Example (3). The facts are the same as in example (2) except that the amount lent by Z to B is 9,000, and that amount is the aggregate outstanding amount of loans between Z and B. Under the $10,000 de minimis exception of section 7872(c)(3), no adjustment for interest will be made to this $9,000 loan under section 7872. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $9,000 loan to determine whether the rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

Example (4). X and Y are commonly controlled taxpayers. At a time when the applicable Federal rate is 12 percent, compounded semiannually, X sells property to Y in exchange for a note with a stated rate of interest of 18 percent, compounded semiannually. Assume that the other applicable Code section to the transaction is section 483. Section 483 does not apply to this transaction because, under section 483(d), there is not total unstated interest under the contract using the test rate of interest equal to 100 percent of the applicable Federal rate. Under paragraph (a)(3)(iii) of this section, section 482 and paragraph (a) of this section may be applied by the district director to determine whether the rate of interest under the note is excessive, that is, to determine whether the 18 percent stated interest rate under the note exceeds an arm's length rate of interest.

Example (5). Assume that A and B are commonly controlled taxpayers and that the applicable Federal rate is 10 percent, compounded semiannually. On June 30, 1986, A sells property to B and receives in exchange B's purchase-money note in the amount of $2,000,000. The stated interest rate on the note is 9%, compounded semiannually, and the stated redemption price at maturity on the note is $2,000,000. Assume that the other applicable Code section to this transaction is section 1274. As provided in section 1274A(a) and (b), the discount rate for purposes of section 1274 will be nine percent, compounded semiannually, because the stated principal amount of B's note does not exceed $2,800,000. Section 1274 does not apply to this transaction because there is adequate stated interest on the debt instrument using a discount rate equal to 9%, compounded semiannually, and the stated redemption price at maturity does not exceed the stated principal amount. Under paragraph (a)(3)(iii) of this section, the district director may apply section 482 and paragraph (a) of this section to this $2,000,000 note to determine whether the 9% rate of interest charged is less than an arm's length rate of interest, and if so, to make appropriate allocations to reflect an arm's length rate of interest.

(b) Performance of services for another—(1) General rule. Where one member of a group of controlled entities performs marketing, managerial, administrative, technical, or other services for the benefit of, or on behalf of another member of the group without charge, or at a charge which is not equal to an arm's length charge as defined in subparagraph (3) of this paragraph, the district director may make appropriate allocations to reflect an arm's length charge for such services.

(2) Benefit test. (i) Allocations may be made to reflect arm's length charges with respect to services undertaken for the joint benefit of the members of a group of controlled entities, as well as with respect to services performed by one member of the group exclusively for the benefit of another member of the group. Any allocations made shall be consistent with the relative benefits intended from the services, based upon the facts known at the time the services were rendered, and shall be made even if the potential benefits anticipated are not realized. No allocations shall be made if the probable benefits to the other members were so indirect or remote that unrelated parties would not have charged for such services. In general, allocations may be made if the service, at the time it was performed, related to the carrying on of an activity by another member or was intended to benefit another member, either in the member's overall operations or in its day-to-day activities. The principles of this subdivision may be illustrated by the following examples in each of which it is assumed that X and Y are corporate members of the same group of controlled entities:

Example (1). X's International Division engages in a wide range of sales promotion activities. Although most of these activities are undertaken exclusively for the benefit of X's international operations, some are intended to jointly benefit both X and Y and others are undertaken exclusively for the benefit of Y. The district director may make an allocation to reflect an arm's length charge with respect to the activities undertaken for the joint benefit of X and Y consistent with the relative benefits intended as well as with respect to the services performed exclusively for the benefit of Y.

Example (2). X operates an international airline, and Y owns and operates hotels in several cities which are serviced by X. X, in conjunction with its advertising of the airline, often pictures Y's hotels and mentions Y's name. Although such advertising was primarily intended to benefit X's airline operations, it was reasonable to anticipate that there would be substantial benefits to Y resulting from patronage by travelers who responded to X's advertising. Since an unrelated hotel operator would have been charged for such advertising, the

district director may make an appropriate allocation to reflect an arm's length charge consistent with the relative benefits intended.

Example (3). Assume the same facts as in Example (2) except that X's advertising neither mentions nor pictures Y's hotels. Although it is reasonable to anticipate that increased air travel attributable to X's advertising will result in some benefit to Y due to increased patronage by air travelers, the district director will not make an allocation with respect to such advertising since the probable benefit to Y was so indirect and remote that an unrelated hotel operator would not have been charged for such advertising.

(ii) Allocations will generally not be made if the service is merely a duplication of a service which the related party has independently performed or is performing for itself. In this connection, the ability to independently perform the service (in terms of qualification and availability of personnel) shall be taken into account. The principles of this subdivision may be illustrated by the following examples, in each of which it is assumed that X and Y are corporate members of the same group of controlled entities:

Example (1). At the request of Y, the financial staff of X makes an analysis to determine the amount and source of the borrowing needs of Y. Y does not have personnel qualified to make the analysis, and it does not undertake the same analysis. The district director may make an appropriate allocation to reflect an arm's length charge for such analysis.

Example (2). Y, which has a qualified financial staff, makes an analysis to determine the amount and source of its borrowing needs. Its report, recommending a loan from a bank, is submitted to X. X's financial staff reviews the analysis to determine whether X should advise Y to reconsider its plan. No allocation should be made with respect to X's review.

(3) Arm's length charge. For the purpose of this paragraph an arm's length charge for services rendered shall be the amount which was charged or would have been charged for the same or similar services in independent transactions with or between unrelated parties under similar circumstances considering all relevant facts. However, except in the case of services which are an integral part of the business activity of either the member rendering the services or the member receiving the benefit of the services (as described in subparagraph (7) of this paragraph), the arm's length charge shall be deemed equal to the costs or deductions incurred with respect to such services by the member or members rendering such services unless the taxpayer establishes a more appropriate charge under the standards set forth in the first sentence of this subparagraph. Where costs or deductions are a factor in applying the provisions of this paragraph adequate books and records must be maintained by taxpayers to permit verification of such costs or deductions by the Internal Revenue Service.

(4) Costs or deductions to be taken into account. (i) Where the amount of an arm's length charge for services is determined with reference to the costs or deductions incurred with respect to such services, it is necessary to take into account on some reasonable basis all the costs or deductions which are directly or indirectly related to the service performed.

(ii) Direct costs or deductions are those identified specifically with a particular service. These include, but are not limited to, costs or deductions for compensation, bonuses, and travel expenses attributable to employees directly engaged in performing such services, for material and supplies directly consumed in rendering such services, and for other costs such as the cost of overseas cables in connection with such services.

(iii) Indirect costs or deductions are those which are not specifically identified with a particular activity or service but which relate to the direct costs referred to in subdivision (ii) of this subparagraph. Indirect costs or deductions generally include costs or deductions with respect to utilities, occupancy, supervisory and clerical compensation, and other overhead burden of the department incurring the direct costs or deductions referred to in subdivision (ii) of this subparagraph. Indirect costs or deductions also generally include an appropriate share of the costs or deductions relating to supporting departments and other applicable general and administrative expenses to the extent reasonably allocable to a particular service or activity. Thus, for example, if a domestic corporation's advertising department performs services for the direct benefit of a foreign subsidiary, in addition to direct costs of such department, such as salaries of employees and fees paid to advertising agencies or consultants, which are attributable to such foreign advertising, indirect costs must be taken into account on some reasonable basis in determining the amount of costs or deductions with respect to which the arm's length charge to the foreign subsidiary is to be determined. These generally include depreciation, rent, property taxes, other costs of occupancy, and other overhead costs of the advertising department itself, and allocations of costs from other departments which service the advertising department, such as the personnel, accounting, payroll, and maintenance departments, and other applicable general and administrative expenses including compensation of top management.

(5) Costs and deductions not to be taken into account. Costs or deductions of the member rendering the services which are not to be taken into

account in determining the amount of an arm's length charge for services include—

(i) Interest expense on indebtedness not incurred specifically for the benefit of another member of the group,

(ii) Expenses associated with the issuance of stock and maintenance of shareholder relations, and

(iii) Expenses of compliance with regulations or policies imposed upon the member rendering the services by its government which are not directly related to the service in question.

(6) **Methods.** (i) Where an arm's length charge for services rendered is determined with reference to costs or deductions, and a member has allocated and apportioned costs or deductions to reflect arm's length charges by employing in a consistent manner a method of allocation and apportionment which is reasonable and in keeping with sound accounting practice, such method will not be disturbed. If the member has not employed a method of allocation and apportionment which is reasonable and in keeping with sound accounting practice, the method of allocating and apportioning costs or deductions for the purpose of determining the amount of arm's length charges shall be based on the particular circumstances involved.

(ii) The methods of allocation and apportionment referred to in this subparagraph are applicable both in allocating and apportioning indirect costs to a particular activity or service (see subparagraph (4)(iii) of this paragraph), and in allocating and apportioning the total costs (direct and indirect) of a particular activity or service where such activity or service is undertaken for the joint benefit of two or more members of a group (see subparagraph (2)(i) of this paragraph). While the use of one or more bases may be appropriate under the circumstances in establishing the method of allocation and apportionment, appropriate consideration should be given to all bases and factors, including, for example, total expenses, asset size, sales, manufacturing expenses, payroll, space utilized, and time spent. The costs incurred by supporting departments may be apportioned to other departments on the basis of reasonable overall estimates, or such costs may be reflected in the other departments' costs by means of application of reasonable departmental overhead rates. Allocations and apportionments of costs or deductions must be made on the basis of the full cost as opposed to the incremental cost. Thus, if an electronic data processing machine, which is rented by the taxpayer, is used for the joint benefit of itself and other members of a controlled group, the determination of the arm's length charge to each member must be made with reference to the full rent and cost of operating the machine by each member, even if the additional use of the machine for the benefit of the other members did not increase the cost to the taxpayer.

(iii) Practices actually employed to apportion costs or expenses in connection with the preparation of statements and analyses for the use of management, creditors, minority shareholders, joint venturers, clients, customers, potential investors, or other parties or agencies in interest shall be considered by the district director. Similarly, in determining the extent to which allocations are to be made to or from foreign members of a controlled group, practices employed by the domestic members of a controlled group in apportioning costs between themselves shall also be considered if the relationships with the foreign members of the group are comparable to the relationships between the domestic members of the group. For example, if, for purposes of reporting to public stockholders or to a governmental agency, a corporation apportions the costs attributable to its executive officers among the domestic members of a controlled group on a reasonable and consistent basis, and such officers exercise comparable control over foreign members of such group, such domestic apportionment practice will be taken into consideration in determining the amount of allocations to be made to the foreign members.

(7) **Certain services.** An arm's length charge shall not be deemed equal to costs or deductions with respect to services which are an integral part of the business activity of either the member rendering the services (referred to in this subparagraph as the "renderer") or the member receiving the benefit of the services (referred to in this subparagraph as the "recipient"). Subdivisions (i) through (iv) of this subparagraph describe those situations in which services shall be considered an integral part of the business activity of a member of a group of controlled entities.

(i) Services are an integral part of the business activity of a member of a controlled group where either the renderer or the recipient is engaged in the trade or business of rendering similar services to one or more unrelated parties.

(ii)(*a*) Services are an integral part of the business activity of a member of a controlled group where the renderer renders services to one or more related parties as one of its principal activities. Except in the case of services which constitute a

manufacturing, production, extraction, or construction activity, it will be presumed that the renderer does not render services to related parties as one of its principal activities if the cost of services of the renderer attributable to the rendition of services for the taxable year to related parties do not exceed 25 percent of the total costs or deductions of the renderer for the taxable year. Where the cost of services rendered to related parties is in excess of 25 percent of the total costs or deductions of the renderer for the taxable year or where the 25-percent test does not apply, the determination of whether the rendition of such services is one of the principal activities of the renderer will be based on the facts and circumstances of each particular case. Such facts and circumstances may include the time devoted to the rendition of the services, the relative cost of the services, the regularity with which the services are rendered, the amount of capital investment, the risk of loss involved, and whether the services are in the nature of supporting services or independent of the other activities of the renderer.

(b) For purposes of the 25-percent test provided in this subdivision (ii), the cost of services rendered to related parties shall include all costs or deductions directly or indirectly related to the rendition of such services including the cost of services which constitute a manufacturing, production, extraction, or construction activity; and the total costs or deductions of the renderer for the taxable year shall exclude amounts properly reflected in the cost of goods sold of the renderer. Where any of the costs or deductions of the renderer do not reflect arm's length consideration and no adjustment is made under any provision of the Internal Revenue Code to reflect arm's length consideration, the 25-percent test will not apply if, had an arm's-length charge been made, the costs or deductions attributable to the renderer's rendition of services to related entities would exceed 25 percent of the total costs or deductions of the renderer for the taxable year.

(c) For purposes of the 25-percent test in this subdivision (ii), a consolidated group (as defined in this subdivision (c)) may, at the option of the taxpayer, be considered as the renderer where one or more members of the consolidated group render services for the benefit of or on behalf of a related party which is not a member of the consolidated group. In such case, the cost of services rendered by members of the consolidated group to any related parties not members of the consolidated group, as well as the total costs or deductions of the members of the consolidated group, shall be considered in the aggregate to determine if such services constitute a principal activity of the renderer. Where a consolidated group is considered the renderer in accordance with this subdivision (c), the costs or deductions referred to in this subdivision (ii) shall not include costs or deductions paid or accrued to any member of the consolidated group. In addition to the preceding provisions of this subdivision (c), if part or all of the services rendered by a member of a consolidated group to any related party not a member of the consolidated group are similar to services rendered by any other member of the consolidated group to unrelated parties as part of a trade or business, the 25-percent test in this subdivision (ii) shall be applied with respect to such similar services without regard to this subdivision (c). For purposes of this subdivision (c), the term "consolidated group" means all members of a group of controlled entities created or organized within a single country and subjected to an income tax by such country on the basis of their combined income.

(iii) Services are an integral part of the business activity of a member of a controlled group where the renderer is peculiarly capable of rendering the services and such services are a principal element in the operations of the recipient. The renderer is peculiarly capable of rendering the services where the renderer, in connection with the rendition of such services, makes use of a particularly advantageous situation or circumstance such as by utilization of special skills and reputation, utilization of an influential relationship with customers, or utilization of its intangible property (as defined in paragraph (d)(3) of this section). However, the renderer will not be considered peculiarly capable of rendering services unless the value of the services is substantially in excess of the costs or deductions of the renderer attributable to such services.

(iv) Services are an integral part of the business activity of a member of a controlled group where the recipient has received the benefit of a substantial amount of services from one or more related parties during its taxable year. For purposes of this subdivision, services rendered by one or more related parties shall be considered substantial in amount if the total costs or deductions of the related party or parties rendering services to the recipient during its taxable year which are directly or indirectly related to such services exceed an amount equal to 25 percent of the total costs or deductions of the recipient during its taxable year. For purposes of the preceding sentence, the total costs or deductions of the recipient shall include the renderers' costs or deductions directly or indirectly related to the rendition of such services and

shall exclude any amounts paid or accrued to the renderers by the recipient for such services and shall also exclude any amounts paid or accrued for materials the cost of which is properly reflected in the cost of goods sold to the recipient. At the option of the taxpayer, where the taxpayer establishes that the amount of the total costs or deductions of a recipient for the recipient's taxable year are abnormally low due to the commencement or cessation of an operation by the recipient, or other unusual circumstances of a nonrecurring nature, the costs or deductions referred to in the preceding two sentences shall be the total of such amount for the 3-year period immediately preceding the close of the taxable year of the recipient (or for the first 3 years of operation of the recipient if the recipient had been in operation for less than 3 years as of the close of the taxable year in which the services in issue were rendered).

(v) The principles of subdivisions (i) through (iv) of this subparagraph may be illustrated by the following examples:

Application of subdivision (i):

Example (1). Y is engaged in the business of selling merchandise and X, an entity related to Y, is a printing company regularly engaged in printing and mailing advertising literature for unrelated parties. X also prints circulars advertising Y's products, mails the circulars to potential customers of Y, and in addition, performs the art work involved in the preparation of the circulars. Since the printing, mailing, and art work services rendered by X to Y are similar to the printing and mailing services rendered by X as X's trade or business, the services rendered to Y are an integral part of the business activity of X as described in subdivision (i) of this subparagraph.

Application of subdivision (ii):

Example (2). V, W, X, and Y are members of the same group of controlled entities. Each member of the group files a separate income tax return. X renders wrecking services to V, W, and Y, and, in addition, sells building materials to unrelated parties. The total costs or deductions incurred by X for the taxable year (exclusive of amounts properly reflected in the cost of goods sold of X) are $4 million. The total costs or deductions of X for the taxable year which are directly or indirectly related to the services rendered to V, W, and Y are $650,000. Since $650,000 is less than 25 percent of the total costs or deductions of X (exclusive of amounts properly reflected in the cost of goods sold of X) for the taxable year ($4,000,000×25%=$1,000,000), the services rendered by X to V, W, and Y will not be considered one of X's principal activities within the meaning of subdivision (ii) of this subparagraph.

Example (3). Assume the same facts as in example (2), except that the total costs or deductions of X for the taxable year which are directly or indirectly related to the services rendered to V, W, and Y are $1,800,000. Assume in addition, that there is a high risk of loss involved in the rendition of the wrecking services by X, that X has a large investment in the wrecking equipment, and that a substantial amount of X's time is devoted to the rendition of wrecking services to V, W, and Y. Since $1,800,000 is greater than 25 percent of the total costs or deductions of X for the taxable year (exclusive of amounts properly reflected in the cost of goods sold of X), *i.e.*, $1 million, the services rendered by X to V, W, and Y will not be automatically excluded from classification as one of the principal activities of X as in example (2), and consideration must be given to the facts and circumstances of the particular case. Based on the facts and circumstances in this case, X would be considered to render wrecking services to related parties as one of its principal activities. Thus, the wrecking services are an integral part of the business activity of X as described in subdivision (ii) of this subparagraph.

Example (4). Z is a domestic corporation and has several foreign subsidiaries. Z and X, a domestic subsidiary of Z, have exercised the privilege granted under section 1501 to file a consolidated return and, therefore, constitute a "consolidated group" within the meaning of subdivision (ii)(c) of this subparagraph. Pursuant to (c) of subdivision (ii), the taxpayer treats X and Z as the renderer. The sole function of X is to provide accounting, billing, communication, and travel services to the foreign subsidiaries of Z. Z also provides some other services for the benefit of its foreign subsidiaries. The total costs or deductions of X and Z related to the services rendered for the benefit of the foreign subsidiaries is $750,000. Of that amount, $710,000 represents the costs of X, which are X's total operating costs. The total costs or deductions of X and Z for the taxable year with respect to their operations (exclusive of amounts properly reflected in the cost of goods sold of X and Z) is $6,500,000. Since the total costs or deductions related to the services rendered to the foreign subsidiaries ($750,000) is less than 25 percent of the total costs or deductions of X and Z (exclusive of amounts properly reflected in the costs of goods sold of X or Z) in the aggregate ($6,500,000×25%=$1,625,-000), the services rendered by X and Z to the foreign subsidiaries will not be considered one of the principal activities of X and Z within the meaning of subdivision (ii) of this subparagraph.

Example (5). Assume the same facts as in example (4), except that all the communication services rendered for the benefit of the foreign subsidiaries are rendered by X and that Z renders communication services to unrelated parties as part of its trade or business. X is regularly engaged in rendering communication services to foreign subsidiaries and devotes a substantial amount of its time to this activity. The costs or deductions of X related to the rendition of the communication services to the foreign subsidiaries are $355,000. By application of the provisions of (c) of subdivision (ii) of this subparagraph, the services provided by X and Z to related entities other than the communication services will not be considered one of the principal activities of X and Z. However, since Z renders communication services to unrelated parties as a part of its trade or business, the communication services rendered by X to the foreign subsidiaries will be subject to the provisions of subdivision (ii) without regard to (c) of subdivision (ii). Since, the cost or deductions of X related to the rendition of the communication services ($355,000) are in excess of 25 percent of the total costs or deductions of X (exclusive of amounts properly reflected in the cost of goods sold of X) for the taxable year ($710,000×25%=$177,500), the determination of whether X renders the communication services as one of its principal activities will depend on the particular facts and circumstances. The given facts and circumstances indicate that X renders the communication services as one of its principal activities.

Example (6). X and Y are members of the same group of controlled entities. Y produces and sells product D. As a part of the production process, Y sends materials to X who converts the materials into component parts. This conversion activity constitutes only a portion of X's operations. X then ships the component parts back to Y who assembles them (along with other components) into the finished product for

sale to unrelated parties. Since the services rendered by X to Y constitute a manufacturing activity, the 25-percent test in subdivision (ii) of this subparagraph does not apply.

Example (7). X and Y are members of the same group of controlled entities. X manufactures product D for distribution and sale in the United States, Canada, and Mexico. Y manufactures product D for distribution and sale in South and Central America. Due to a breakdown of machinery, Y is forced to cease its manufacturing operations for a 1-month period. In order to meet demand for product D during the shutdown period, Y sends partially finished goods to X. X, for that period, completes the manufacture of product D for Y and ships the finished product back to Y. The costs or deductions of X related to the manufacturing services rendered to Y are $750,000. The total costs or deductions of X are $24,000,000. Since the services in issue constitute a manufacturing activity, the 25-percent test in subdivision (ii) of this subparagraph does not apply. However, under these facts and circumstances—*i.e.*, the insubstantiality of the services rendered to Y in relation to X's total operations, the lack of regularity with which the services are rendered, and the short duration for which the services are rendered—X's rendition of manufacturing services to Y is not considered one of X's principal activities within the meaning of subdivision (ii) of this subparagraph.

Example (8). Assume the same facts as in example (7) except that, instead of temporarily ceasing operations, Y requests assistance from X in correcting the defects in the manufacturing equipment. In response, X sends a team of engineers to discover and correct the defects without the necessity of a shutdown. Although the services performed by the engineers were related to a manufacturing activity, the services are essentially supporting in nature and, therefore, do not constitute a manufacturing, production, extraction, or construction activity. Thus, the 25-percent test in subdivision (ii) of this subparagraph applies.

Example (9). X is a domestic manufacturing corporation. Y, a foreign subsidiary of X, has decided to construct a plant in Country A. In connection with the construction of Y's plant, X draws up the architectural plans for the plant, arranges the financing of the construction, negotiates with various Government authorities in Country A, invites bids from unrelated parties for several phases of construction, and negotiates, on Y's behalf, the contracts with unrelated parties who are retained to carry out certain phases of the construction. Although the unrelated parties retained by X for Y perform the physical construction, the aggregate services performed by X for Y are such that they, in themselves, constitute a construction activity. Thus, the 25-percent test in subdivision (ii) of this subparagraph does not apply with respect to such services.

Application of subdivision (iii):

Example (10). X and Y are members of the same group of controlled entities. X is a finance company engaged in financing automobile loans. In connection with such loans it requires the borrower to have life insurance in the amount of the loan. Although X's borrowers are not required to take out life insurance from any particular insurance company, at the same time that the loan agreement is being finalized, X's employees suggest that the borrower take out life insurance from Y, which is an agency for life insurance companies. Since there would be a delay in the processing of the loan if some other company were selected by the borrower, almost all of X's borrowers take out life insurance through Y. Because of this utilization of its influential relationship with its borrowers, X is peculiarly capable of rendering selling services to Y and, since a substantial amount of Y's business is derived from X's borrowers, such selling services are a principal element in the operation of Y's insurance business. In addition, the value of the services is substantially in excess of the costs incurred by X. Thus, the selling services rendered by X to Y are an integral part of the business activity of a member of the controlled group as described in subdivision (iii) of this subparagraph.

Example (11). X and Y are members of the same group of controlled entities. Y is a manufacturer of product E. In past years product E has not always operated properly because of imperfections present in the finished product. X owns an exclusive patented process by which such imperfections can be detected and removed prior to sale of the product, thereby greatly increasing the marketability of the product. In connection with its manufacturing operations Y sends its products to X for inspection which involves utilization of the patented process. The inspection of Y's products by X is not one of the principal activities of X. However, X is peculiarly capable of rendering the inspection services to Y because of its utilization of the patented process. Since this inspection greatly increases the marketability of product E it is extremely valuable. Such value is substantially in excess of the cost incurred by X in rendition of such services. Because of the impact of the inspection on sales, such services are a principal element in the operations of Y. Thus, the inspection services rendered by X to Y are an integral part of the business activity of a member of the controlled group as described in subdivision (iii) of this subparagraph.

Example (12). Assume the same facts as in example (11) except that Y owns the patented process for detecting the imperfections. Y, however, does not have the facilities to implement the inspection process. Therefore, Y sends its products to X for inspection which involves utilization of the patented process owned by Y. Since Y owns the patent, X is not peculiarly capable of rendering the inspection services to Y within the meaning of subdivision (iii) of this subparagraph.

Example (13). Assume the same facts as in example (12) except that X and Y both own interests in the patented process as a result of having developed the process pursuant to a bona fide cost sharing plan (within the meaning of paragraph (d)(4) of this section). Since Y owns the requisite interest in the patent, X is not peculiarly capable of rendering the inspection services to Y within the meaning of subdivision (iii) of this subparagraph.

Example (14). X and Y are members of the same group of controlled entities. X is a large manufacturing concern. X's accounting department has, for many years, maintained the financial records of Y, a distributor of X's products. Although X is able to render these accounting services more efficiently than others due to its thorough familiarity with the operations of Y, X is not peculiarly capable of rendering the accounting services to Y because such familiarity does not, in and of itself, constitute a particularly advantageous situation or circumstance within the meaning of subdivision (iii) of this subparagraph. Furthermore, under these circumstances, the accounting services are supporting in nature and, therefore, do not constitute a principal element in the operations of Y. Thus, the accounting services rendered by X to Y are not an integral part of the business activity of either X or Y within the meaning of subdivision (iii) of this subparagraph.

Application of subdivision (iv):

Example (15). Corporations X, Y, and Z are members of the same group of controlled entities. X is a manufacturer, and Y and Z are distributors of X's products. X provides a variety of services to Y including billing, shipping, accounting, and other general and administrative services. During Y's taxable year, on several occasions, Z renders selling and other promotional services to Y. None of the services rendered to Y constitute one of the principal activities of any of the renderers within the meaning of subdivision (ii) of this subparagraph.

Y's total costs and deductions for Y's taxable year (exclusive of amounts paid to X and Z for services rendered and amounts paid for goods purchased for resale) are $1,600,000. The total direct and indirect costs of X and Z for services rendered to Y during Y's taxable year are as follows:

Services provided by X:	
Billing	$50,000
Shipping	250,000
Accounting	150,000
Other	200,000
Services provided by Z: Selling	500,000
Total costs	1,150,000

Since the total costs or deductions of X and Z related to the rendition of services to Y exceed the amount equal to 25 percent of the total costs or deductions of Y (exclusive of amounts paid to X and Z for the services rendered and amounts paid for goods purchased for resale) plus the total costs or deductions of X and Z related to the rendition of services to Y ($1,150,000÷[$1,600,000+$1,150,000]=41.8%), the services rendered by X and Z to Y are substantial within the meaning of subdivision (iv) of this subparagraph. Thus, the services rendered by X and Z to Y are an integral part of the business activity of Y as described in subdivision (iv) of this subparagraph.

Example (16). Assume the same facts as in example (15) except that the taxpayer establishes that, due to a major change in the operations of Y, Y's total costs or deductions for Y's taxable year were abnormally low. Y has always used the calendar year as its taxable year. Y's total costs and deductions for the 2 years immediately preceding the taxable year in issue (exclusive of amounts paid to X and Z for services rendered and amounts paid for goods purchased for resale) were $6 million and $6,200,000, respectively. The total direct and indirect costs of X and Z for services rendered to Y were $1,150,000 for each of the 3 years. Applying the same formula to the costs or deductions for the 3 years immediately preceding the close of the taxable year in issue, the costs or deductions of X and Z related to the rendition of services to Y (3×$1,150,000=$3,450,000) amount to 20 percent of the sum of the total costs or deductions of Y (exclusive of amounts paid to X and Z for the services rendered and amounts paid for goods purchased for resale) plus the total costs or deductions of X and Z related to the rendition of services to Y ($3,450,000÷[$1,600,000+$6,000,000+$6,200,000+$3,450,000]=20%). If the taxpayer chooses to use the 3-year period, the services rendered by X and Z to Y are not substantial within the meaning of subdivision (iv) of this subparagraph. Thus, the services will not be an integral part of the business activity of a member of the controlled group as described in subdivision (iv) of this subparagraph.

(8) Services rendered in connection with the transfer of property. Where tangible or intangible property is transferred, sold, assigned, loaned, leased, or otherwise made available in any manner by one member of a group to another member of the group and services are rendered by the transferor to the transferee in connection with the transfer, the amount of any allocation that may be appropriate with respect to such transfer shall be determined in accordance with the rules of paragraph (c), (d), or (e) of this section whichever is appropriate and a separate allocation with respect to such services under this paragraph shall not be made. Services are rendered in connection with the transfer of property where such services are merely ancillary and subsidiary to the transfer of the property or to the commencement of effective use of the property by the transferee. Whether or not services are merely ancillary and subsidiary to a property transfer is a question of fact. Ancillary and subsidiary services could be performed, for example, in promoting the transaction by demonstrating and explaining the use of the property, or by assisting in the effective "starting-up" of the property transferred, or by performing under a guarantee relating to such effective starting-up. Thus, where an employee of one member of a group, acting under the instructions of his employer, reveals a valuable secret process owned by his employer to a related entity, and at the same time supervises the integration of such process into the manufacturing operation of the related entity, such services could be considered to be rendered in connection with the transfer, and, if so considered, shall not be the basis for a separate allocation. However, if the employee continues to render services to the related entity by supervising the manufacturing operation after the secret process has been effectively integrated into such operation, a separate allocation with respect to such additional services may be made in accordance with the rules of this paragraph.

(c) Use of tangible property—(1) General rule. Where possession, use, or occupancy of tangible property owned or leased by one member of a group of controlled entities (referred to in this paragraph as the owner) is transferred by lease or other arrangement to another member of such group (referred to in this paragraph as the user) without charge or at a charge which is not equal to an arm's length rental charge (as defined in subdivision (i) of subparagraph (2) of this paragraph), the district director may make appropriate allocations to properly reflect such arm's length charge. Where possession, use, or occupancy of only a portion of such property is transferred, the determination of the arm's length charge and the allocation shall be made with reference to the portion transferred.

(2) Arm's length charge—(i) In general. For purposes of paragraph (c) of this section, an arm's length rental charge shall be the amount of rent which was charged, or would have been charged for the use of the same or similar property, during the time it was in use, in independent transactions with or between unrelated parties under similar circumstances considering the period and location of the use, the owner's investment in the property or rent paid for the property, expenses of main-

taining the property, the type of property involved, its condition, and all other relevant facts.

(ii) Safe haven rental charge. See 26 CFR 1.482-2(c)(2)(ii) (revised as of April 1, 1985), for the determination of safe haven rental charges in the case of certain leases entered into before May 9, 1986, and for leases entered into before August 7, 1986, pursuant to a binding written contract entered into before May 9, 1986.

(iii) Subleases. (A) Except as provided in paragraph (c)(2)(iii)(B) of this section, where possession, use, or occupancy of tangible property, which is leased by the owner (lessee) from an unrelated party is transferred by sublease or other arrangement to the user, an arm's length rental charge shall be considered to be equal to all the deductions claimed by the owner (lessee) which are attributable to the property for the period such property is used by the user. Where only a portion of such property was transferred, any allocations shall be made with reference to the portion transferred. The deductions to be considered include the rent paid or accrued by the owner (lessee) during the period of use and all other deductions directly and indirectly connected with the property paid or accrued by the owner (lessee) during such period. Such deductions include deductions for maintenance and repair, utilities, management and other similar deductions.

(B) The provisions of paragraph (c)(2)(iii)(A) of this section shall not apply if either—

(1) The taxpayer establishes a more appropriate rental charge under the general rule set forth in paragraph (c)(2)(i) of this section, or

(2) During the taxable year, the owner (lessee) or the user was regularly engaged in the trade or business of renting property of the same general type as the property in question to unrelated persons.

(d) Transfer or use of intangible property—(1) In general. (i) Except as otherwise provided in subparagraph (4) of this paragraph, where intangible property or an interest therein is transferred, sold, assigned, loaned, or otherwise made available in any manner by one member of a group of controlled entities (referred to in this paragraph as the transferor) to another member of the group (referred to in this paragraph as the transferee) for other than an arm's length consideration, the district director may make appropriate allocations to reflect an arm's length consideration for such property or its use. Subparagraph (2) of this paragraph provides rules for determining the form an amount of an appropriate allocation, subparagraph (3) of this paragraph provides a definition of "intangible property", and subparagraph (4) of this paragraph provides rules with respect to certain cost-sharing arrangements in connection with the development of intangible property. For purposes of this paragraph, an interest in intangible property may take the form of the right to use such property.

(ii)(a) In the absence of a bona fide cost-sharing arrangement (as defined in subparagraph (4) of this paragraph), where one member of a group of related entities undertakes the development of intangible property as a developer within the meaning of (c) of this subdivision, no allocation with respect to such development activity shall be made under the rules of this paragraph or any other paragraph of this section (except as provided in (b) of this subdivision) until such time as any property developed, or any interest therein, is or is deemed to be transferred, sold, assigned, loaned, or otherwise made available in any manner by the developer to a related entity in a transfer subject to the rules of this paragraph. Where a member of the group other than the developer acquires an interest in the property developed by virtue of obtaining a patent or copyright, or by any other means, the developer shall be deemed to have transferred such interest in such property to the acquiring member in a transaction subject to the rules of this paragraph. For example, if one member of a group (the developer) undertakes to develop a new patentable product and the costs of development are incurred by that entity over a period of 3 years, no allocation with respect to that entity's activity shall be made during such period. The amount of any allocation that may be appropriate at the expiration of such development period when, for example, the patent on the product is transferred, or deemed transferred, to a related entity for other than an arm's length consideration, shall be determined in accordance with the rules of this paragraph.

(b) Where one member of a group renders assistance in the form of loans, services, or the use of tangible or intangible property to a developer in connection with an attempt to develop intangible property, the amount of any allocation that may be appropriate with respect to such assistance shall be determined in accordance with the rules of the appropriate paragraph or paragraphs of this section. Thus, where one entity allows a related entity, which is the developer, to use tangible property, such as laboratory equipment, in connection with the development of intangible property,

the amount of any allocation that may be appropriate with respect to such use shall be determined in accordance with the rules of paragraph (c) of this section. In the event that the district director does not exercise his discretion to make allocations with respect to the assistance rendered to the developer, the value of the assistance shall be allowed as a set-off against any allocation that the district director may make under this paragraph as a result of the transfer of the intangible property to the entity rendering the assistance.

(c) The determination as to which member of a group of related entities is a developer and which members of the group are rendering assistance to the developer in connection with its development activities shall be based upon all the facts and circumstances of the individual case. Of all the facts and circumstances to be taken into account in making this determination, greatest weight shall be given to the relative amounts of all the direct and indirect costs of development and the corresponding risks of development borne by the various members of the group, and the relative values of the use of any intangible property of members of the group which is made available without adequate consideration for use in connection with the development activity, which property is likely to contribute to a substantial extent in the production of intangible property. For this purpose, the risk to be borne with respect to development activity is the possibility that such activity will not result in the production of intangible property or that the intangible property produced will not be of sufficient value to allow for the recovery of the costs of developing it. A member will not be considered to have borne the costs and corresponding risks of development unless such member is committed to bearing such costs in advance of, or contemporaneously with, their incurrence and without regard to the success of the project. Other factors that may be relevant in determining which member of the group is the developer include the location of the development activity, the capabilities of the various members to carry on the project independently, and the degree of control over the project exercised by the various members.

(d) The principles of this subdivision (ii) may be illustrated by the following examples in which it is assumed that X and Y are corporate members of the same group:

Example (1). X, at the request of Y, undertakes to develop a new machine which will function effectively in the climate in which Y's factory is located. Y agrees to bear all the direct and indirect costs of the project whether or not X successfully develops the machine. Assume that X does not make any of its own intangible property available for use in connection with the project. The machine is successfully developed and Y obtains possession of the intangible property necessary to produce such machine. Based on the facts and circumstances as stated, Y shall be considered to be the developer of the intangible property and, therefore, Y shall not be treated as having obtained the property in a transfer subject to the rules of this paragraph. Any amount which may be allocable with respect to the assistance rendered by X shall be determined in accordance with the rules of (b) of this subdivision.

Example (2). Assume the same facts as in example (1) except that Y agrees to reimburse X for its costs only in the event that the property is successfully developed. In such case X is the developer and Y is deemed to have received the property in a transfer subject to the rules of this paragraph. Therefore, the district director may make an allocation to reflect an arm's length consideration for such property.

Example (3). In 1967 X undertakes to develop product M in its research and development department. X incurs direct and indirect costs of $1 million per year in connection with the project in 1967, 1968, and 1969. In connection with the project, X employs the formula for compound N, which it owns, and which is likely to contribute substantially to the success of the project. The value of the use of the formula for compound N in connection with this project is $750,000. In 1968, 4 chemists employed by Y spent 6 months working on the project in X's laboratory. The salary and other expenses connected with the chemists' employment for that period ($100,000) are paid by Y, for which no charge is made to X. In 1969, product M is perfected and Y obtains patents thereon. X is considered to be the developer of product M since, among other things, it bore the greatest relative share of the costs and risks incurred in connection with this project and made available intangible property (formula for compound N) which was likely to contribute substantially in the development of product M. Accordingly, no allocation with respect to X's development activity should be made before 1969. The property is deemed to have been transferred to Y at that time by virtue of the fact that Y obtained the patent rights to product M. In such case the district director may make an allocation to reflect an arm's length consideration for such transfer. In the event that the district director makes such an allocation and he has not made or does not make an allocation for 1968 with respect to the services of the chemists in accordance with the principles of paragraph (b) of this section, the value of the assistance shall be allowed as a set-off against the amount of the allocation reflecting an arm's length consideration for the transfer of the intangible property.

(2) Arm's length consideration. (i) An arm's length consideration shall be in a form which is consistent with the form which would be adopted in transactions between unrelated parties under the same circumstances. To the extent appropriate, an arm's length consideration may take any one or more of the following forms: (a) Royalties based on the transferee's output, sales, profits, or any other measure; (b) lump-sum payments; or (c) any other form, including reciprocal licensing rights, which might reasonably have been adopted by unrelated parties under the circumstances, provided that the parties can establish that such form was adopted pursuant to an arrangement which in fact existed between them. However, where the transferee pays nominal or no consideration for the property or interest therein and where the

transferor has retained a substantial interest in the property, an allocation shall be presumed not to take the form of a lump-sum payment.

(ii) In determining the amount of an arm's length consideration, the standard to be applied is the amount that would have been paid by an unrelated party for the same intangible property under the same circumstances. Where there have been transfers by the transferor to unrelated parties involving the same or similar intangible property under the same or similar circumstances the amount of the consideration for such transfers shall generally be the best indication of an arm's length consideration.

(iii) Where a sufficiently similar transaction involving an unrelated party cannot be found, the following factors, to the extent appropriate (depending upon the type of intangible property and the form of the transfer), may be considered in arriving at the amount of the arm's length consideration:

(a) The prevailing rates in the same industry or for similar property,

(b) The offers of competing transferors or the bids of competing transferees,

(c) The terms of the transfer, including limitations on the geographic area covered and the exclusive or nonexclusive character of any rights granted,

(d) The uniqueness of the property and the period for which it is likely to remain unique,

(e) The degree and duration of protection afforded to the property under the laws of the relevant countries,

(f) Value of services rendered by the transferor to the transferee in connection with the transfer within the meaning of paragraph (b)(8) of this section,

(g) Prospective profits to be realized or costs to be saved by the transferee through its use or subsequent transfer of the property,

(h) The capital investment and starting up expenses required of the transferee,

(i) The next subdivision is (j),

(j) The availability of substitutes for the property transferred,

(k) The arm's length rates and prices paid by unrelated parties where the property is resold or sublicensed to such parties,

(*l*) The costs incurred by the transferor in developing the property, and

(m) Any other fact or circumstance which unrelated parties would have been likely to consider in determining the amount of an arm's length consideration for the property.

(3) Definition of intangible property. (i) Solely for the purposes of this section, intangible property shall consist of the items described in subdivision (ii) of this subparagraph, provided that such items have substantial value independent of the services of individual persons.

(ii) The items referred to in subdivision (i) of this subparagraph are as follows:

(a) Patents, inventions, formulas, processes, designs, patterns, and other similar items;

(b) Copyrights, literary, musical, or artistic compositions, and other similar items;

(c) Trademarks, trade names, brand names, and other similar items;

(d) Franchises, licenses, contracts, and other similar items;

(e) Methods, programs, systems, procedures, campaigns, surveys, studies, forecasts, estimates, customer lists, technical data, and other similar items.

(4) Sharing of costs and risks. Where a member of a group of controlled entities acquires an interest in intangible property as a participating party in a bona fide cost sharing arrangement with respect to the development of such intangible property, the district director shall not make allocations with respect to such acquisition except as may be appropriate to reflect each participant's arm's length share of the costs and risks of developing the property. A bona fide cost sharing arrangement is an agreement, in writing, between two or more members of a group of controlled entities providing for the sharing of the costs and risks of developing intangible property in return for a specified interest in the intangible property that may be produced. In order for the arrangement to qualify as a bona fide arrangement, it must reflect an effort in good faith by the participating members to bear their respective shares of all the costs and risks of development on an arm's length basis. In order for the sharing of costs and risk to be considered on an arm's length basis, the terms and conditions must be comparable to those which would have been adopted by unrelated parties similarly situated had they entered into such

an arrangement. If an oral cost sharing arrangement, entered into prior to April 16, 1968, and continued in effect after that date, is otherwise in compliance with the standards prescribed in this subparagraph, it shall constitute a bona fide cost sharing arrangement if it is reduced to writing prior to January 1, 1969.

(e) Sales of tangible property—(1) In general. (i) Where one member of a group of controlled entities (referred to in this paragraph as the "seller") sells or otherwise disposes of tangible property to another member of such group (referred to in this paragraph as the "buyer") at other than an arm's length price (such a sale being referred to in this paragraph as a "controlled sale"), the district director may make appropriate allocations between the seller and the buyer to reflect an arm's length price for such sale or disposition. An arm's length price is the price that an unrelated party would have paid under the same circumstances for the property involved in the controlled sale. Since unrelated parties normally sell products at a profit, an arm's length price normally involves a profit to the seller.

(ii) Subparagraphs (2), (3), and (4) of this paragraph describe three methods of determining an arm's-length price and the standards for applying each method. They are, respectively, the comparable uncontrolled price method, the resale price method, and the cost-plus method. In addition, a special rule is provided in subdivision (v) of this subparagraph for use (notwithstanding any other provision of this subdivision) in determining an arm's-length price for an ore or mineral. If there are comparable uncontrolled sales as defined in subparagraph (2) of this paragraph, the comparable uncontrolled price method must be utilized because it is the method likely to result in the most accurate estimate of an arm's-length price (for the reason that it is based upon the price actually paid by unrelated parties for the same or similar products). If there are no comparable uncontrolled sales, then the resale price method must be utilized if the standards for its application are met because it is the method likely to result in the next most accurate estimate in such instances (for the reason that, in such instances, the arm's-length price determined under such method is based more directly upon actual arm's-length transactions than is the cost-plus method). A typical situation where the resale price method may be required is where a manufacturer sells products to a related distributor which, without further processing, resells the products in uncontrolled transactions. If all the standards for the mandatory application of the resale price method are not satisfied, then, as provided in subparagraph (3)(iii) of this paragraph, either that method or the cost-plus method may be used, depending upon which method is more feasible and is likely to result in a more accurate estimate of an arm's-length price. A typical situation where the cost-plus method may be appropriate is where a manufacturer sells products to a related entity which performs substantial manufacturing, assembly, or other processing of the product or adds significant value by reason of its utilization of its intangible property prior to resale in uncontrolled transactions.

(iii) Where the standards for applying one of the three methods of pricing described in subdivision (ii) of this subparagraph are met, such method must, for the purposes of this paragraph, be utilized unless the taxpayer can establish that, considering all the facts and circumstances, some method of pricing other than those described in subdivision (ii) of this subparagraph is clearly more appropriate. Where none of the three methods of pricing described in subdivision (ii) of this subparagraph can reasonably be applied under the facts and circumstances as they exist in a particular case, some appropriate method of pricing other than those described in subdivision (ii) of this subparagraph, or variations on such methods, can be used.

(iv) The methods of determining arm's length prices described in this section are stated in terms of their application to individual sales of property. However, because of the possibility that a taxpayer may make controlled sales of many different products, or many separate sales of the same product, it may be impractical to analyze every sale for the purposes of determining the arm's length price. It is therefore permissible to determine or verify arm's length prices by applying the appropriate methods of pricing to product lines or other groupings where it is impractical to ascertain an arm's length price for each product or sale. In addition, the district director may determine or verify the arm's length price of all sales to a related entity by employing reasonable statistical sampling techniques.

(v) The price for a mineral product which is sold at the stage at which mining or extraction ends shall be determined under the provisions of §§ 1.613–3 and 1.613–4.

(2) Comparable uncontrolled price method. (i) Under the method of pricing described as the "comparable uncontrolled price method", the arm's length price of a controlled sale is equal to the price paid in comparable uncontrolled sales,

adjusted as provided in subdivision (ii) of this subparagraph.

(ii) "Uncontrolled sales" are sales in which the seller and the buyer are not members of the same controlled group. These include (a) sales made by a member of the controlled group to an unrelated party, (b) sales made to a member of the controlled group by an unrelated party, and (c) sales made in which the parties are not members of the controlled group and are not related to each other. However, uncontrolled sales do not include sales at unrealistic prices, as for example where a member makes uncontrolled sales in small quantities at a price designed to justify a nonarm's length price on a large volume of controlled sales. Uncontrolled sales are considered comparable to controlled sales if the physical property and circumstances involved in the uncontrolled sales are identical to the physical property and circumstances involved in the controlled sales, or if such properties and circumstances are so nearly identical that any differences either have no effect on price, or such differences can be reflected by a reasonable number of adjustments to the price of uncontrolled sales. For this purpose, differences can be reflected by adjusting prices only where such differences have a definite and reasonably ascertainable effect on price. If the differences can be reflected by such adjustment, then the price of the uncontrolled sale as adjusted constitutes the comparable uncontrolled sale price. Some of the differences which may affect the price of property are differences in the quality of the product, terms of sale, intangible property associated with the sale, time of sale, and the level of the market and the geographic market in which the sale takes place. Whether and to what extent differences in the various properties and circumstances affect price, and whether differences render sales noncomparable, depends upon the particular circumstances and property involved. The principles of this subdivision may be illustrated by the following examples, in each of which it is assumed that X makes both controlled and uncontrolled sales of the identical property:

Example (1). Assume that the circumstances surrounding the controlled and the uncontrolled sales are identical, except for the fact that the controlled sales price is a delivered price and the uncontrolled sales are made f.o.b. X's factory. Since differences in terms of transportation and insurance generally have a definite and reasonably ascertainable effect on price, such differences do not normally render the uncontrolled sales noncomparable to the controlled sales.

Example (2). Assume that the circumstances surrounding the controlled and uncontrolled sales are identical, except for the fact that X affixes its valuable trademark in the controlled sales, and does not affix its trademark in uncontrolled sales. Since the effects on price of differences in intangible property associated with the sale of tangible property, such as trademarks, are normally not reasonably ascertainable, such differences would normally render the uncontrolled sales noncomparable.

Example (3). Assume that the circumstances surrounding the controlled and uncontrolled sales are identical, except for the fact that X, a manufacturer of business machines, makes certain minor modifications in the physical properties of the machines to satisfy safety specifications or other specific requirements of a customer in controlled sales, and does not make these modifications in uncontrolled sales. Since minor physical differences in the product generally have a definite and reasonably ascertainable effect on prices, such differences do not normally render the uncontrolled sales noncomparable to the controlled sales.

(iii) Where there are two or more comparable uncontrolled sales susceptible of adjustment as defined in subdivision (ii) of this subparagraph, the comparable uncontrolled sale or sales requiring the fewest and simplest adjustments provided in subdivision (ii) of this subparagraph should generally be selected. Thus, for example, if a taxpayer makes comparable uncontrolled sales of a particular product which differ from the controlled sale only with respect to the terms of delivery, and makes other comparable uncontrolled sales of the product which differ from the controlled sale with respect to both terms of delivery and terms of payment, the comparable uncontrolled sales differing only with respect to terms of delivery should be selected as the comparable uncontrolled sale.

(iv) One of the circumstances which may affect the price of property is the fact that the seller may desire to make sales at less than a normal profit for the primary purpose of establishing or maintaining a market for his products. Thus, a seller may be willing to reduce the price of a product, for a time, in order to introduce his product into an area or in order to meet competition. However, controlled sales may be priced in such a manner only if such price would have been charged in an uncontrolled sale under comparable circumstances. Such fact may be demonstrated by showing that the buyer in the controlled sale made corresponding reductions in the resale price to uncontrolled purchasers, or that such buyer engaged in substantially greater sales promotion activities with respect to the product involved in the controlled sale than with respect to other products. For example, assume X, a manufacturer of batteries, commences to sell car batteries to Y, a subsidiary of X, for resale in a new market. In its existing markets X's batteries sell to independent retailers at $20 per unit, and X sells them to wholesalers at $17 per unit. Y also sells X's batteries to independent retailers at $20 per unit. X's batteries are not known in the new market in which Y is operating. In order to engage compet-

itively in the new market Y incurs selling and advertising costs substantially higher than those incurred for its sales of other products. Under these circumstances X may sell to Y, for a time, at less than $17 to take into account the increased selling and advertising activities of Y in penetrating and establishing the new market. This may be done even though it may result in a transfer price from X to Y which is below X's full costs of manufacturing the product.

(3) **Resale price method.** (i) Under the pricing method described as the "resale price method", the arm's length price of a controlled sale is equal to the applicable resale price (as defined in subdivision (iv) or (v) of this subparagraph), reduced by an appropriate markup, and adjusted as provided in subdivision (ix) of this subparagraph. An appropriate markup is computed by multiplying the applicable resale price by the appropriate markup percentage as defined in subdivision (vi) of this subparagraph. Thus, where one member of a group of controlled entities sells property to another member which resells the property in uncontrolled sales, if the applicable resale price of the property involved in the uncontrolled sale is $100 and the appropriate markup percentage for resales by the buyer is 20 percent, the arm's length price of the controlled sale is $80 ($100 minus 20 percent × $100), adjusted as provided in subdivision (ix) of this subparagraph.

(ii) The resale price method must be used to compute an arm's length price of a controlled sale if all the following circumstances exist:

(a) There are no comparable uncontrolled sales as defined in subparagraph (2) of this paragraph.

(b) An applicable resale price, as defined in subdivision (iv) or (v) of this subparagraph, is available with respect to resales made within a reasonable time before or after the time of the controlled sale.

(c) The buyer (reseller) has not added more than an insubstantial amount to the value of the property by physically altering the product before resale. For this purpose packaging, repacking, labeling, or minor assembly of property does not constitute physical alteration.

(d) The buyer (reseller) has not added more than an insubstantial amount to the value of the property by the use of intangible property. See § 1.482–2(d)(3) for the definition of intangible property.

(iii) Notwithstanding the fact that one or both of the requirements of subdivision (ii)(c) or (d) of this subparagraph may not be met, the resale price method may be used if such method is more feasible and is likely to result in a more accurate determination of an arm's length price than the use of the cost plus method. Thus, even though one of the requirements of such subdivision is not satisfied, the resale price method may nevertheless be more appropriate than the cost plus method because the computations and evaluations required under the former method may be fewer and easier to make than under the latter method. In general, the resale price method is more appropriate when the functions performed by the seller are more extensive and more difficult to evaluate than the functions performed by the buyer (reseller). The principle of this subdivision may be illustrated by the following examples in each of which it is assumed that corporation X developed a valuable patent covering product M which it manufactures and sells to corporation Y in a controlled sale, and for which there is no comparable uncontrolled sale:

Example (1). Corporation Y adds a component to product M and resells the assembled product in an uncontrolled sale within a reasonable time after the controlled sale of product M. Assume further that the addition of the component added more than an insubstantial amount to the value of product M, but that Y's function in purchasing the component and assembling the product prior to sale was subject to reasonably precise valuation. Although the controlled sale and resale does not meet the requirements of subdivision (ii)(c) of this subparagraph, the resale price method may be used under the circumstances because that method involves computations and evaluations which are fewer and easier to make than under the cost plus method. This is because X's use of a patent may be more difficult to evaluate in determining an appropriate gross profit percentage under the cost plus method, than is evaluation of Y's assembling function in determining the appropriate markup percentage under the resale price method.

Example (2). Corporation Y resells product M in an uncontrolled sale within a reasonable time after the controlled sale after attaching its valuable trademark to it. Assume further that it can be demonstrated through comparison with other uncontrolled sales of Y that the addition of Y's trademark to a product usually adds 25 percent to the markup on its sales. On the other hand, the effect of X's use of its patent is difficult to evaluate in applying the cost plus method because no reasonable standard of comparison is available. Although the controlled sale and resale does not meet the requirements of subdivision (ii)(d) of this subparagraph, the resale price method may be used because that method involves computations and evaluation which are fewer and easier to make than under the cost plus method. That is because, under the circumstances, X's use of a patent is more difficult to evaluate in determining an appropriate gross profit percentage under the cost plus method, than is evaluation of the use of Y's trademark in determining the appropriate markup percentage under the resale price method.

(iv) For the purposes of this subparagraph the "applicable resale price" is the price at which it is anticipated that property purchased in the controlled sale will be resold by the buyer in an

uncontrolled sale. The "applicable resale price" will generally be equal to either the price at which current resales of the same property are being made or the resale price of the particular item of property involved.

(v) Where the property purchased in the controlled sale is resold in another controlled sale, the "applicable resale price" is the price at which such property is finally resold in an uncontrolled sale, providing that the series of sales as a whole meets all the requirements of subdivision (ii) of this subparagraph or that the resale price method is used pursuant to subdivision (iii) of this subparagraph. In such case, the determination of the appropriate markup percentage shall take into account the function or functions performed by all members of the group participating in the series of sales and resales. Thus, if X sells a product to Y in a controlled sale, Y sells the product to Z in a controlled sale, and Z sells the product in an uncontrolled sale, the resale price method must be used if Y and Z together have not added more than an insubstantial amount to the value of the product through physical alteration or the application of intangible property, and the final resale occurs within a reasonable time of the sale from X to Y. In such case, the applicable resale price is the price at which Z sells the product in the uncontrolled sale, and the appropriate markup percentage shall take into account the functions performed by both Y and Z.

(vi) For the purposes of this subparagraph, the appropriate markup percentage is equal to the percentage of gross profit (expressed as a percentage of sales) earned by the buyer (reseller) or another party on the resale of property which is both purchased and resold in an uncontrolled transaction, which resale is most similar to the applicable resale of the property involved in the controlled sale. The following are the most important characteristics to be considered in determining the similarity of resales:

(a) The type of property involved in the sales. For example: machine tools, men's furnishings, small household appliances.

(b) The functions performed by the reseller with respect to the property. For example: packaging, labeling, delivering, maintenance of inventory, minor assembly, advertising, selling at wholesale, selling at retail, billing, maintenance of accounts receivable, and servicing.

(c) The effect on price of any intangible property utilized by the reseller in connection with the property resold. For example: patents, trademarks, trade names.

(d) The geographic market in which the functions are performed by the reseller.

In general, the similarity to be sought relates to the probable effect upon the markup percentage of any differences in such characteristics between the uncontrolled purchases and resales on the one hand and the controlled purchases and resales on the other hand. Thus, close physical similarity of the property involved in the sales compared is not required under the resale price method since a lack of close physical similarity is not necessarily indicative of dissimilar markup percentages.

(vii) Whenever possible, markup percentages should be derived from uncontrolled purchases and resales of the buyer (reseller) involved in the controlled sale, because similar characteristics are more likely to be found among different resales of property made by the same reseller than among sales made by other resellers. In the absence of resales by the same buyer (reseller) which meet the standards of subdivision (vi) of this subparagraph, evidence of an appropriate markup percentage may be derived from resales by other resellers selling in the same or a similar market in which the controlled buyer (reseller) is selling providing such resellers perform comparable functions. Where the function performed by the reseller is similar to the function performed by a sales agent which does not take title, such sales agent will be considered a reseller for the purpose of determining an appropriate markup percentage under this subparagraph and the commission earned by such sales agent, expressed as a percentage of the sales price of the goods, may constitute the appropriate markup percentage. If the controlled buyer (reseller) is located in a foreign country and information on resales by other resellers in the same foreign market is not available, then markup percentages earned by United States resellers performing comparable functions may be used. In the absence of data on markup percentages of particular sales or groups of sales, the prevailing markup percentage in the particular industry involved may be appropriate.

(viii) In calculating the markup percentage earned on uncontrolled purchases and resales, and in applying such percentage to the applicable resale price to determine the appropriate markup, the same elements which enter into the computation of the sales price and the costs of goods sold of the property involved in the comparable uncontrolled purchases and resales should enter into such computation in the case of the property

involved in the controlled purchases and resales. Thus, if freight-in and packaging expense are elements of the cost of goods sold in comparable uncontrolled purchases, then such elements should also be taken into account in computing the cost of goods sold of the controlled purchase. Similarly, if the comparable markup percentage is based upon net sales (after reduction for returns and allowances) of uncontrolled resellers, such percentage must be applied to net sales of the buyer (reseller).

(ix) In determining an arm's length price appropriate adjustment must be made to reflect any material differences between the uncontrolled purchases and resales used as the basis for the calculation of the appropriate markup percentage and the resales of property involved in the controlled sale. The differences referred to in this subdivision are those differences in functions or circumstances which have a definite and reasonably ascertainable effect on price. The principles of this subdivision may be illustrated by the following example:

Example. Assume that X and Y are members of the same group of controlled entities and that Y purchases electric mixers from X and electric toasters from uncontrolled entities. Y performs substantially similar functions with respect to resales of both the mixers and the toasters, except that it does not warrant the toasters, but does provide a 90-day warranty for the mixers. Y normally earns a gross profit on toasters of 20 percent of gross selling price. The 20-percent gross profit on the resale of toasters is an appropriate markup percentage, but the price of the controlled sale computed with reference to such rate must be adjusted to reflect the difference in terms (the warranty).

(4) **Cost plus method.** (i) Under the pricing method described as the "cost plus method", the arm's length price of a controlled sale of property shall be computed by adding to the cost of producing such property (as computed in subdivision (ii) of this subparagraph), an amount which is equal to such cost multiplied by the appropriate gross profit percentage (as computed in subdivision (iii) of this subparagraph), plus or minus any adjustments as provided in subdivision (v) of this subparagraph.

(ii) For the purposes of this subparagraph, the cost of producing the property involved in the controlled sale, and the costs which enter into the computation of the appropriate gross profit percentage shall be computed in a consistent manner in accordance with sound accounting practices for allocating or apportioning costs, which neither favors nor burdens controlled sales in comparison with uncontrolled sales. Thus, if the costs used in computing the appropriate gross profit percentage are comprised of the full cost of goods sold, including direct and indirect costs, then the cost of producing the property involved in the controlled sales must be comprised of the full cost of goods sold, including direct and indirect costs. On the other hand, if the costs used in computing the appropriate gross profit percentage are comprised only of direct costs, the cost of producing the property involved in the controlled sale must be comprised only of direct costs. The term "cost of producing", as used in this subparagraph, includes the cost of acquiring property which is held for resale.

(iii) For the purposes of this subparagraph, the appropriate gross profit percentage is equal to the gross profit percentage (expressed as a percentage of cost) earned by the seller or another party on the uncontrolled sale or sales of property which are most similar to the controlled sale in question. The following are the most important characteristics to be considered in determining the similarity of the uncontrolled sale or sales:

(a) The type of property involved in the sales. For example: machine tools, men's furnishings, small household appliances.

(b) The functions performed by the seller with respect to the property sold. For example: contract manufacturing, product assembly, selling activity, processing, servicing, delivering.

(c) The effect of any intangible property used by the seller in connection with the property sold. For example: patents, trademarks, trade names.

(d) The geographic market in which the functions are performed by the seller. In general, the similarity to be sought relates to the probable effect upon the margin of gross profit of any differences in such characteristics between the uncontrolled sales and the controlled sale. Thus, close physical similarity of the property involved in the sales compared is not required under the cost plus method since a lack of close physical similarity is not necessarily indicative of dissimilar profit margins. See subparagraph (2)(iv) of this paragraph, relating to sales made at less than a normal profit for the primary purpose of establishing or maintaining a market.

(iv) Whenever possible, gross profit percentages should be derived from uncontrolled sales made by the seller involved in the controlled sale, because similar characteristics are more likely to be found among sales of property made by the same seller than among sales made by other sellers. In the absence of such sales, evidence of an appropriate gross profit percentage may be derived from similar uncontrolled sales by other sellers whether or

not such sellers are members of the controlled group. Where the function performed by the seller is similar to the function performed by a purchasing agent which does not take title, such purchasing agent will be considered a seller for the purpose of determining an appropriate gross profit percentage under this subparagraph and the commission earned by such purchasing agent, expressed as a percentage of the purchase price of the goods, may constitute the appropriate gross profit percentage. In the absence of data on gross profit percentages of particular sales or groups of sales which are similar to the controlled sale, the prevailing gross profit percentages in the particular industry involved may be appropriate.

(v) Where the most similar sale or sales from which the appropriate gross profit percentage is derived differ in any material respect from the controlled sale, the arm's length price which is computed by applying such percentage must be adjusted to reflect such differences to the extent such differences would warrant an adjustment of price in uncontrolled transactions. The differences referred to in this subdivision are those differences which have a definite and reasonably ascertainable effect on price.

[T.D. 6952, 33 FR 5849, April 16, 1968; 33 FR 6290, April 25, 1968, as amended by T.D. 6964, 33 FR 10569, July 25, 1968; T.D. 6998, 84 FR 933, Jan. 22, 1969; 34 FR 1380, Jan. 29, 1969; T.D. 7170, 37 FR 5373, March 15, 1972; T.D. 7394, 41 FR 1280, Jan. 7, 1976; T.D. 7747, 46 FR 86459, Dec. 31, 1980; T.D. 7781, 46 FR 34569, July 2, 1981; T.D. 7920, 48 FR 50712, Nov. 3, 1983; T.D. 8204, 53 FR 18278, May 23, 1988; T.D. 8204, 53 FR 20718, June 6, 1988]

§ 1.483–1 Computation of interest on certain deferred payments.

(a) Computation of amount constituting interest —(1) General rule. For all purposes of the Internal Revenue Code, in the case of any contract for the sale or exchange of property, there shall be treated as interest that part of a payment to which section 483 applies (see paragraph (b) of this section) which bears the same ratio to the amount of such payment as the total unstated interest (as defined in paragraph (c) of this section) under such contract bears to the total of the payments to which section 483 applies which are due under such contract. Thus, the amount to be treated as interest under section 483 is determined by multiplying each payment to which such section applies by a fraction, the numerator of which is the total unstated interest under the contract, and the denominator of which is the total of all the payments to which section 483 applies which are due under such contract. The effect of this ratio is to allocate the total unstated interest on a pro rata basis among the total payments to which section 483 applies. Accordingly, the total amount to be treated as interest for a taxable year with respect to a contract under which there are payments which include unstated interest is an amount equal to the unstated interest allocated to the payments under the contract for such year plus any stated interest reportable under the contract for such year. See paragraph (b)(2) of this section for rules relating to allocation of contract price, payments, and stated interest; paragraph (e) of this section for rules relating to indefinite payments; paragraph (f) of this section for rules relating to changes in terms of contract; and paragraph (b) of § 1.483–2 for exceptions and limitations to the application of section 483.

(2) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to make three payments of $2,000 each, such payments being due, respectively, at the end of each year for the next 3 years. No interest is provided for in the contract. Assume that section 483 applies to each of the payments, and that the total unstated interest under the contract is $559.88. The portion of each $2,000 payment which is treated as interest is $186.63

($2,000 × $559.88 ÷ $6000.00).

Example (2). On December 31, 1963, A sells property to B under a contract which provides that B is to make payments of $4,000, $3,000, and $2,000, such payments being due, respectively, at the end of each year for the next 3 years. No interest is provided for in the contract. Assume that section 483 applies to each of the payments, and that the total unstated interest under the contract is $750.31. The portion of the $4,000 payment which is treated as interest is $333.47

($4,000 × $750.31 ÷ $9000.00),

the portion of the $3,000 payment which is treated as interest is $250.10

($3,000 × $750.30 ÷ $9000.00),

and the portion of the $2,000 payment which is treated as interest is $166.74

($2,000 × $750.31 ÷ $9000.00).

Example (3). On December 31, 1963, A sells property to B under a contract which provides that B is to make payments of $2,040 ($2,000 sales price plus $40 interest), $2,080 ($2,000 sales price plus $80 interest), and $2,120 ($2,000 sales price plus $120 interest), such payments being due, respectively, 1, 2, and 3 years from the date of sale. Assume that both A and B are calendar year taxpayers, that section 483 applies to each of the payments, and that the total unstated interest under the contract is $345.85. The portion of each $2,000 payment (sales price) which is treated as interest is $115.28

($2,000 × $345.85 ÷ $6,000.00).

Thus, for 1964, the total amount to be treated as interest by A and B with respect to the contract is $155.28 ($115.28 unstated interest plus $40 stated interest), for 1965 such total amount is

$195.28 ($115.28 unstated interest plus $80 stated interest), and for 1966 such total amount is $235.28 ($115.28 unstated interest plus $120 stated interest).

(b) **Payments to which section 483 applies—(1) In general.** Except as provided in subparagraph (4) of this paragraph, section 483 applies to any payment made after December 31, 1963, on account of the sale or exchange of property occurring after June 30, 1963, which payment constitutes part or all of the sales price and which is due more than 6 months after the date of such sale or exchange under a contract—

(i) Under which one or more of the payments are due more than 1 year after the date of such sale or exchange, and

(ii) Under which there is "total unstated interest" (within the meaning of paragraph (d) of this section).

For purposes of the preceding sentence, the term "sales price" does not include any interest payments provided for in the contract. The term "sale or exchange" includes any transaction treated as a sale or exchange for purposes of the Code. For purposes of section 483, a payment may be made in cash, stock or securities, or other property (except as provided in subparagraph (5) of this paragraph). Section 483 does not apply to any deferred payments under a contract under which all of the payments are due no more than 1 year after the date of the sale or exchange. Section 483 does not apply to a distribution in complete liquidation of a corporation, regardless of whether the corporation is liquidated in one distribution or in a series of distributions. For special rules relating to the time a sale or exchange takes place in the case of a disposal of timber, coal, or domestic iron ore, which qualifies under section 631 (relating to gain or loss in the case of timber, coal, or domestic iron ore), see that section and the regulations thereunder. See paragraph (e) of this section for special rules relating to indefinite payments, and paragraph (f) of this section for rules relating to the effect of a late payment on the determination of the due date of such payment. Section 483 may apply whether the contract providing for deferred payments is expressed (whether written or oral) or implied. In general, for purposes of section 483, all sales or exchanges involving deferred payments are considered as made under a contract.

(2) **Allocation of contract price, payments, and stated interest.** If payments are due under a contract both for the sale or exchange of property to which section 483 applies (for example, capital assets) and for either the sale or exchange of property to which such section does not apply (for example, the transfer of patents described in section 1235(a)) or services rendered or to be rendered, the parties to the contract may agree at the time of the sale or exchange on a reasonable determination of the portion of the contract price and the stated interest (if any), and of each payment due under the contract, which is allocable to each such type of property and to services. However, if the parties do not so agree on a reasonable determination of the allocation of the contract price, or the stated interest (if any), or each payment due under the contract, the district director shall make such reasonable determination.

(3) **Effect of other provisions of law.** If there is total unstated interest under a contract, a portion of each payment to which section 483 applies shall be treated as interest to the extent provided in such section, notwithstanding that some other provision of law (for example, section 1245, relating to gain from dispositions of certain depreciable property) would, without regard to section 483, treat a portion of the payment as ordinary income or in some other manner. In such a case, section 483 shall apply first and the other provisions of law shall apply only to the remainder of the payment not treated as interest under section 483. For example, if a portion of a payment is treated as interest under section 483 and such portion would otherwise be treated as gain from the sale or exchange of property which is not a capital asset under section 1232(a)(2)(B) (relating to corporate bonds issued on or before May 27, 1969, and Government bonds), section 483 shall apply first and section 1232(a)(2)(B) shall apply only to the remainder of the payment after the interest portion has been determined. In such case, in order to avoid a double inclusion in income, for purposes of section 1232(b) the "stated redemption price at maturity" shall be reduced by any amount treated as interest under section 483. If, however, with respect to an evidence of indebtedness issued by a corporation after May 27, 1969, any amount of original issue discount is ratably includible in the gross income of the holder under section 1232(a)(3), there will be no unstated interest to which section 483 applies since paragraph (d)(3) of this section provides for a zero test rate of interest for determining whether there is total unstated interest with respect to such an evidence of indebtedness.

(4) **Effective date.** Section 483 does not apply to any payments on account of a sale or exchange made pursuant to a binding written contract (including an irrevocable written option) entered into before July 1, 1963. For purposes of the preced-

ing sentence, a restricted stock option (as defined in section 424(b)) shall be considered as irrevocable. For rules relating to certain stock options granted prior to January 1, 1965, see paragraph (a)(2) of § 1.483–2. For purposes of this subparagraph, if, after June 30, 1963 (or December 31, 1964, in the case of certain stock options granted prior to such date), there is a substantial change in the terms of such a contract or option, then any payments made pursuant to such changed contract or option shall not be considered as payments on account of a sale or exchange made pursuant to a contract or option entered into before July 1, 1963 (or January 1, 1965, as the case may be). For example, a payment made after December 31, 1963, pursuant to a "buy-sell" agreement entered into before July 1, 1963, between shareholders, is not subject to section 483 unless such agreement is substantially changed after June 30, 1963. For purposes of this subparagraph, a mere prepayment or early payment of part or all of the sales price or stated interest, or a change in the sales price arising from an independent appraisal or a mechanical formula, if such appraisal or formula is specified in the contract, or the mere transfer of the obligation to make or of the right to receive deferred payments under a contract, is not considered a substantial change in the terms of the contract. Furthermore, a late payment of part or all of the sales price or stated interest shall not be considered a substantial change in the terms of the contract if such payment is made no later than 90 days after the date the payment was due under the contract, or, if the payment is made after such 90-day period, any additional interest provided for under the terms of the contract or under local law is collected.

(5) Evidence of indebtedness. For purposes of section 483, an evidence of indebtedness (whether or not negotiable and whether or not includible in gross income) of the purchaser given in consideration for the sale or exchange of property is not a payment, and any payment due under such evidence of indebtedness shall be treated as due under the contract for the sale or exchange.

(6) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to pay $3,000 on the date of sale, $1,000 on June 1, 1964, and $1,000 on December 26, 1964. No interest is provided for in the contract. Since none of the payments under the contract is due more than 1 year after the date of the sale, section 483 does not apply to any of the payments due under the contract.

Example (2). The facts are the same as in example (1), except that there is an additional $1,000 payment due on June 1, 1965. Since, under the contract, there is at least one payment due more than 1 year after the date of the sale, section 483 applies to any definite payment under the contract which is due more than 6 months after the date of the sale. Thus, section 483 applies to the $1,000 payments due on December 26, 1964, and on June 1, 1965.

Example (3). On December 31, 1963, A sells property to which section 483 applies and renders services to B under a contract which provides that B is to pay $10,000 on the date of sale, $5,000 on December 31, 1964, and $5,000 on December 31, 1965. No interest is provided for in the contract. Assume that the parties make no allocation of the contract price between property and services but that a reasonable allocation of the $20,000 total contract price and of each $5,000 payment is 75 percent for the sale of the property and 25 percent for the services rendered. The district director may allocate the contract price and each payment in those proportions and section 483 would then apply to 75 percent of each $5,000 payment ($3,750) since this is the portion that was allocated to the sale of the property.

Example (4). On December 31, 1963, M Corporation redeems 500 shares of its stock from A, one of its shareholders. M pays A $10,000 on the date of redemption and gives A a non-interest bearing promissory note which provides that M is to pay A $2,000 at the end of each of the next 5 years. Section 483 applies to each of the $2,000 payments.

Example (5). On December 31, 1963, A sells property to B under a contract which provides that B is to pay A $10,000 on the date of sale and transfer to A a total of 4,000 shares of X Corporation stock owned by B, 2,000 of such shares being due on June 30, 1965, and 2,000 shares on June 30, 1966. No interest is provided for in the contract. Section 483 applies to each of the transfers of X stock to A. See paragraph (e) of this section for special rules relating to indefinite payments.

Example (6). On December 31, 1963, M Corporation sells 500 shares of its stock to A, one of its employees, for a lump-sum payment of $10,000. At the same time, A borrows $10,000 from M Corporation and gives M a non-interest bearing promissory note which provides that A is to pay M $2,000 at the end of each of the next 5 years. Section 483 applies to any payments made by A under the promissory note in the same manner as if such payments were being made under a deferred-payment contract for the sale or exchange of the stock.

Example (7). M Corporation and N Corporation each owns one-half of the stock of O Corporation. On December 31, 1963, pursuant to a reorganization qualifying under section 368(a)(1)(B), M contracts to acquire the one-half interest held by N for an initial distribution on such date of 30,000 shares of M voting stock, and a nonassignable right to receive up to 10,000 additional shares of M's voting stock during the next 3 years, provided the net profits of O Corporation exceed certain amounts specified in the contract. No interest is provided for in the contract. No additional shares are received in 1964 or in 1965, but in 1966 the annual earnings of O Corporation exceed the specified amount and on December 31, 1966, an additional 3,000 M voting shares are transferred to N. Section 483 applies to the transfer of the 3,000 M voting shares to N on December 31, 1966. See example (2) of paragraph (e)(3) of this section for an illustration of the computation of total unstated interest in this case.

Example (8). P Corporation and Q Corporation each owns one-half of the stock of R Corporation. On December 31, 1963, pursuant to a reorganization qualifying under section 368(a)(1)(B), P contracts to acquire the one-half interest held by Q for a distribution on such date of 40,000 shares of P voting stock. As a part of the plan of reorganization, Q

immediately places 10,000 of such voting shares in escrow. The escrow agreement provides that all or a portion of the stock placed in escrow is to be returned to P within 3 years (together with dividends and earnings thereon) if R's net profits do not exceed certain amounts specified in the agreement and that Q Corporation is entitled to vote the escrowed stock until such time as it may be returned to P Corporation. The agreement further provides that the escrow will terminate at the end of 3 years and that any stock then remaining in escrow (together with dividends and earnings thereon) is to be redelivered to Q Corporation. Q Corporation currently includes in income all dividends and earnings thereon with respect to the escrowed stock. Since Q Corporation is treated as having received, on December 31, 1963, all payments due under the exchange, section 483 does not apply to the transfer of any of the escrowed stock to Q Corporation.

(c) **Total unstated interest—(1) In general.** For purposes of paragraph (a) of this section (that is, for purposes of determining the portion of a payment to which section 483 applies which is to be treated as interest), the term "total unstated interest" means, with respect to a contract for the sale or exchange of property, an amount equal to the excess of—

(i) The sum of the payments to which section 483 applies which are due under the contract (within the meaning of paragraph (b) of this section), over

(ii) The sum of the present values of such payments and the present values of any stated interest payments due under the contract.

(2) **Present value of a payment—(i) In general.** The present value of any interest payment due under the contract not more than 6 months after the date of the sale or exchange is an amount equal to 100 percent of such payment. The present value of any other interest payment, and of any payment to which section 483 applies, which is due under the contract shall be determined by discounting such payment at the interest rate prescribed by paragraph (c)(2)(ii) of this section, from the nearest date (to the date such payment is actually due under the contract) which marks a 6-month interval from the date of the sale or exchange. For purposes of computing the present value of a payment at such rate, column (b) of the appropriate table set forth in paragraph (g)(2) of this section shall be used.

(ii) **Prescribed interest rates.** (A) For payments on account of a sale or exchange of property entered into before July 24, 1975, as well as a sale or exchange of property pursuant to a binding written contract (including an irrevocable written option) entered into before such date, the interest rate prescribed by paragraph (c)(2)(ii)(A) shall be 5 percent per annum compounded semiannually. (See paragraph (c)(4) of this section for special rules where there has been a substantial change in the terms of a binding written contract entered into before July 24, 1975.)

(B) For payments on account of a sale or exchange of property entered into on or after July 24, 1975, and before July 1, 1981, except a sale or exchange entered into pursuant to a binding written contract (including an irrevocable written option) entered into before July 24, 1975, the interest rate prescribed by paragraph (c)(2)(ii)(B) of this section shall be 7 percent per annum compounded semiannually. For payments on account of a sale or exchange of property entered into on or after July 1, 1981, pursuant to a binding written contract (including an irrevocable written option) entered into after July 23, 1975, and before September 29, 1980, the interest rate prescribed by paragraph (c)(2)(ii)(B) of this section shall be 7 percent per annum compounded semiannually. (See paragraph (c)(5) of this section for special rules where there has been a substantial change in the terms of a binding written contract entered into after July 23, 1975 and before September 29, 1980.)

(C) For payments on account of a sale or exchange of property entered into on or after July 1, 1981, except a sale or exchange entered into pursuant to a binding written contract (including an irrevocable written option) entered into before September 29, 1980, the interest rate described by paragraph (c)(2)(ii)(C) of this section shall be 10 percent per annum compounded semiannually. (See paragraph (c)(5) of this section for special rules where there has been a substantial change in the terms of a binding written contract entered into before September 29, 1980.)

(3) **Examples.** The provisions of this paragraph may be illustrated by the following examples: (Note that examples (1) through (6) use Tables I through VI because such tables generally apply to transactions entered into before July 1, 1981, and that the principles illustrated by such examples would apply for transactions entered into on or after July 1, 1981, in which case Tables VII through IX would generally be applied.):

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to make three payments of $2,000 each, such payments being due, respectively, at the end of each year for the next 3 years. No interest is provided for in the contract. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $559.88, computed as follows:

Sum of payments to which sec. 483 applies...	$6,000.00
Less: Present value of $2,000 due every 12 months for 3 years ($2,000 × 2.72006 (factor for 3 years, col. (b), Table III))..........	5,440.12
Total unstated interest................	559.88

Example (2). On December 31, 1963, A sells property to B under a contract which provides that B is to make two payments of $1,000 each, payable August 1, 1964 and November 1, 1964, and a third payment of $2,000, payable March 1, 1965. No interest is provided for in the contract. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $168.96, computed as follows:

Sum of payments to which sec. 483 applies...		$4,000.00
Less:		
Present value of $1,000 due August 1, 1964 ($1,000 × 0.97561 (factor 6 to 9 months col. (b), Table I))	$975.61	
Present value of $1,000 due November 1, 1964 ($1,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I)).	951.81	
Present value of $2,000 due March 1, 1965 ($2,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))	1,903.62	3,831.04
Total unstated interest		168.96

Example (3). On December 31, 1963, A sells property to B under a contract which provides that B is to make payments of $2,040 ($2,000 sales price plus $40 interest), $2,080 ($2,000 sales price plus $80 interest), and $2,120 ($2,000 sales price plus $120 interest), such payments being due, respectively, 1, 2, and 3 years from the date of sale. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $345.85, computed as follows:

Sum of payments to which sec. 483 applies...		$6,000.00
Less:		
Present value of $2,040 due 1 year from date of sale ($2,040 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))	$1,941.69	
Present value of $2,080 due 2 years from date of sale ($2,080 × 0.90595 (factor for 21 to 27 months, col. (b), Table I))	1,884.38	
Present value of $2,120 due 3 years from date of sale ($2,120 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))	1,828.08	5,654.15
Total unstated interest		345.85

Example (4). The facts are the same as in example (3), except that the first payment of $2,040 ($2,000 sales price plus $40 interest) is due on March 1, 1964. Since this payment is not due more than 6 months after the date of the sale, the $2,000 payment of sales price is not a payment to which section 483 applies. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $247.54, computed as follows:

Sum of payments to which sec. 483 applies...		$4,000.00
Less:		
Present value of $40 stated interest due March 1, 1964 ($40 × 1.00000 (0 to 6 months, col. (b), Table I))	$40.00	
Present value of $2,080 due 2 years from date of sale ($2,080 × 0.90595 (factor for 21 to 27 months, col. (b), Table I))	1,884.38	
Present value of $2,120 due 3 years from date of sale ($2,120 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))	$1,828.08	$3,752.46
Total unstated interest		247.54

Example (5). On December 31, 1974, A sells property to B under a contract which provides that B is to make four payments of $2,000 each, such payments being due, respectively, at the end of each year for the next four years. No interest is provided for in the contract. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $918.38 (using Table III because the sale occurred before July 24, 1975). The computation is as follows:

Sum of payments to which sec. 483 applies...	$8,000.00
Less: Present value of $2,000 due every 12 months for 4 years ($2,000 × 3.54081 (factor for 4 years, col. (b), Table III))	7,081.62
Total unstated interest	918.38

Example (6). On December 31, 1975, A sells property to B under a contract which provides that B is to make three payments of $2,000 each, such payments being due, respectively, at the end of each year for the next 3 years. No interest is provided for in the contract. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $763.10 (using Table VI rather than Table III because the contract was entered into after July 24, 1975). The computation is as follows:

Sum of payments to which sec. 483 applies...	$6,000.00
Less: Present value of $2,000 due every 12 months for 3 years ($2,000 × 2.61845 (factor for 3 years, col. (b), Table VI))	5,236.90
Total unstated interest	763.10

Example (7). On December 31, 1981, A sells property to B under a contract which provides that B is to make two payments of $1,000 each, payable August 1, 1982, and November 1, 1982, and a third payment of $2,000, payable March 1, 1983. No interest is provided for in the contract. For purposes of paragraph (a) of this section, the total unstated interest under the contract is $326.53 computed as follows:

Sum of payments to which sec. 483 applies...		$4,000.00
Less:		
Present value of $1,000 due August 1, 1982 ($1,000 × .95238 (factor for 6 to 9 months, col. (b), Table VII))	$952.38	
Present value of $1,000 due November 1, 1982 ($1,000 × .90703 (factor for 9 to 15 months, col. (b), Table VII))	907.03	
Present value of $2,000 due March 1, 1983 ($2,000 × .90703 (factor for 9 to 15 months, col. (b), Table VII))	1,814.06	3,673.47
Total unstated interest		326.53

(4) Special rules for binding contracts entered into before July 24, 1975. (i) Payments made pursuant to a sale or exchange occurring before July 24, 1975, shall continue to be subject to the 5 percent prescribed interest rate of paragraph

(c)(2)(ii)(A) of this section and the 4 percent prescribed test rate of paragraph (d)(1)(ii)(A) of this section even though there has been a change in the terms of the contract.

(ii) Where payments are made pursuant to the sale or exchange of property on or after July 24, 1975, and before July 1, 1981, but under the terms of a binding written contract (including an irrevocable written option) entered into before July 24, 1975, and there has been a substantial change (within the meaning of paragraph (b)(4) of this section) in terms of such contract, then if the change occurs on or after July 24, 1975, the 7 percent prescribed interest rate of paragraph (c)(2)(ii)(B) of this section and the 6 percent prescribed test rate of paragraph (d)(1)(ii)(B) of this section shall be applied to payments made after the occurrence of such substantial change. If the change occurs before July 24, 1975, the payments shall continue to be subject to the 5 percent prescribed interest rate of paragraph (c)(2)(ii)(A) of this section and the 4 percent prescribed test rate of paragraph (d)(1)(ii)(A) of this section.

(iii) Where payments are made pursuant to a sale or exchange occurring on or after July 1, 1981, but under the terms of a binding written contract (including an irrevocable written option) entered into before July 24, 1975, and there has been a substantial change (within the meaning of paragraph (b)(4) of this section) in the terms of such contract on or after July 24, 1975, then the prescribed interest rate and the prescribed test rate applied to payments made after the occurrence of the substantial change shall be 7 percent and 6 percent, respectively, if the change is made before September 29, 1980, and 10 percent and 9 percent, respectively, if the change is made after September 29, 1980. If the change occurs before July 24, 1975, the payments shall continue to be subject to the 5 percent prescribed interest rate of paragraph (c)(2)(ii)(A) of this section and the 4 percent prescribed test rate of paragraph (d)(1)(ii)(A) of this section.

(5) Special rule for binding contracts entered into on or after July 24, 1975, and before September 29, 1980. Payments made pursuant to a sale or exchange occurring after July 23, 1975, and before July 1, 1981, except a sale or exchange entered into pursuant to a binding written contract (including an irrevocable written option) entered into before July 24, 1975, shall continue to be subject to the 7 percent prescribed interest rate of paragraph (c)(2)(ii)(B) of this section and the 6 percent prescribed test rate of paragraph (d)(1)(ii)(B) of this section even though there has been a change in the terms of the contract. However, where payments are made pursuant to a sale or exchange occurring on or after July 1, 1981, but under the terms of a binding written contract entered into after July 24, 1975 and before September 29, 1980, and there has been a substantial change (within the meaning of paragraph (b)(4) of this section) in the terms of such contract on or after September 29, 1980, then the 10 percent prescribed interest rate of paragraph (c)(2)(ii)(C) of this section and the 9 percent prescribed test rate of paragraph (d)(1)(ii)(C) of this section shall be applied to payments made after the occurrence of such substantial change. If the substantial change occurs before September 29, 1980, then the payments shall continue to be subject to the 7 percent interest rate of paragraph (c)(2)(ii)(B) of this section and the 6 percent test rate of paragraph (d)(1)(ii)(B) of this section.

(d) Test of whether there is total unstated interest under a contract—(1) In general—(i) How to apply prescribed test rate. Except as provided in paragraph (d)(2) and (3) of this section for purposes of determining whether section 483 applies to payments under a contract (that is, for purposes of paragraph (b)(1)(ii) of this section), the determination of whether there is total unstated interest under a contract shall be made in accordance with the method for computing total unstated interest provided in paragraph (c) of this section, except that column (a) of the appropriate table contained in paragraph (g)(2) of this section (which provides for discounting payments at the appropriate test rate prescribed by paragraph (d)(1)(ii) of this section) shall be used to determine the present value of a payment. If, after applying the appropriate test rate, there is total unstated interest (regardless of amount) with respect to a contract, section 483 applies to the payments described in paragraph (b) of this section which are due under the contract. In such case, the amount of total unstated interest under the contract which is includible in or deductible from income must be computed by using the higher interest rate prescribed in paragraph (c) of this section, and then allocating such amount among the payments due under the contract in the manner provided in paragraph (a) of this section.

(ii) Prescribed test rates. (A) For payments on account of a sale or exchange of property entered into before July 24, 1975, as well as a sale or exchange of property entered into pursuant to a binding written contract (including an irrevocable written option) entered into before such date, the test rate prescribed by paragraph (d)(1)(ii)(A) of this section shall be 4 percent per annum simple

interest. (See paragraph (c)(4) of this section for special rules where there has been a substantial change in the terms of a binding written contract entered into before July 24, 1975.)

(B) For payments on account of a sale or exchange of property entered into on or after July 24, 1975, and before July 1, 1981, except a sale or exchange entered into pursuant to a binding written contract (including an irrevocable written option) entered into before July 24, 1975, the test rate prescribed by paragraph (d)(1)(ii)(B) of this section shall be 6 percent per annum simple interest. For payments on account of a sale or exchange of property entered into on or after July 1, 1981, pursuant to a binding written contract (including an irrevocable written option) entered into after July 23, 1975, and before September 29, 1980, the test rate prescribed by paragraph (d)(1)(ii)(B) of this section shall be 6 percent per annum simple interest. (See paragraph (c)(5) of this section for special rules where there has been a substantial change in the terms of a contract entered into after July 23, 1975 and before September 29, 1980.)

(C) For payments on account of a sale or exchange of property entered into on or after July 1, 1981, except a sale or exchange entered into pursuant to a binding written contract (including an irrevocable written option) entered into before September 29, 1980, the test rate prescribed by paragraph (d)(1)(ii)(C) of this section shall be 9 percent per annum simple interest. (See paragraph (c)(5) of this section for special rules where there has been a substantial change in the terms of a contract entered into before September 29, 1980).

(2) Alternative test where contract rate is at least that prescribed in paragraph (d)(1)(ii) of this section. The method provided in paragraph (d)(1) of this section for determining whether there is total unstated interest need not be used in the case of a contract which provides for interest at a rate of at least that prescribed in paragraph (d)(1)(ii) of this section, payable on each installment of principal at the time such installment is payable. For purposes of paragraph (b)(1)(ii) of this section, there is no total unstated interest under such a contract and, therefore, section 483 does not apply to payments under such a contract. For purposes of this paragraph, simple interest means straight interest computed on the principal amount of a payment from the time of the sale or exchange to the time the payment is required to be made. As an illustration of the meaning of simple interest, if a contract provides for payments totaling $6,000 in 3 equal installments of $2,000 plus 4 percent per annum simple interest, such installments of principal and interest being due 1, 2, and 3 years, respectively, from the date of the sale, the amount of interest due with the first installment is $80 ($2,000×0.04×1), the amount of interest due with the second installment is $160 ($2,000×0.04×2), and the amount of interest due with the third installment is $240 ($2,000×0.04×3).

(3) Test rate for certain obligations. The test rate of interest for determining whether there is total unstated interest shall be zero in the case of—

(i) A contract under which the purchaser is the United States, a State, or any other governmental body described in section 103 (relating to interest on certain governmental obligations), and under which the deferred payments are made pursuant to an obligation to which section 103 applies, or

(ii) An evidence of indebtedness which is issued after May 27, 1969, by a corporation in an exchange for property (other than money) which results under paragraph (b)(2)(iii) of § 1.1232–3 in creating original issue discount subject to ratable inclusion under section 1232(a)(3) in the holder's gross income.

(4) Examples. The provisions of this paragraph may be illustrated by the following examples (Note that examples (1) through (6) use Tables I through VI, because such tables apply generally to transactions entered into before July 1, 1981, and that the principles illustrated by such examples would apply for transactions entered into on or after July 1, 1981, in which case Tables VII through IX would generally be applied.):

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to make payments at the end of each of the next 3 years of $2,000 principal, plus 5 percent per annum simple interest. Since the interest rate specified in the contract with respect to each payment is higher than the test rate (4 percent per annum simple interest), it is not necessary to compute whether there is total unstated interest under subparagraph (1) of this paragraph, and section 483 does not apply to any payments due under the contract.

Example (2). The facts are the same as in example (1), except that the interest rate provided in the contract is 2 percent per annum simple interest. Since the interest rate specified in the contract is less than the test rate (4 percent per annum simple interest), section 483 applies to each of the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from income, see paragraph (c) of this section.

Example (3). On December 31, 1963, A sells property to B under a contract which provides that B is to make payments of $2,040 ($2,000 sales price plus $40 interest), $2,080 ($2,000 sales price plus $80 interest), and $2,120 ($2,000 sales price plus $120 interest), such payments being due, respectively, 1, 2,

and 3 years from the date of sale. The determination of whether there is total unstated interest under the contract is made in the following manner:

(i) Sum of payments to which sec. 483 applies		$6,000.00
(ii) Sum of:		
Present value of $2,040 due 1 yr. from date of sale ($2,040 × 0.96154 (factor for 9 to 15 months, col. (a), Table I)) ..	$1,961.54	
Present value of $2,080 due 2 years from date of sale ($2,080 × 0.92593 (factor for 21 to 27 months, col. (a), Table I)) ..	1,925.93	
Present value of $2,120 due 3 years from date of sale ($2,120 × 0.89286 (factor for 33 to 39 months, col. (a), Table I)) ..	1,892.86	
Total		5,780.33

Since the sum of the payments to which section 483 applies ($6,000) exceeds the sum of the present values of such payments and the present values of the stated interest payments ($5,780.33), there is total unstated interest under the contract and the provisions of section 483 apply to the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from income, see paragraph (c) of this section.

Example (4). (i) On December 31, 1963, A sells property to B under a contract which provides that B is to make four $1,000 payments, each payment bearing 4 percent per annum simple interest. Such payments are due, respectively, 1, 2, 3, and 4 years from the date of sale. Thus, the payments would be: $1,040 ($1,000 sales price plus $40 interest), $1,080 ($1,000 sales price plus $80 interest), $1,120 ($1,000 sales price plus $120 interest), and $1,160 ($1,000 sales price plus $160 interest). The total interest stated in the contract for the 4-year period is $400. Since the interest rate specified in the contract between A and B is equal to the test rate (4 percent per annum simple interest), subparagraph (2) of this paragraph applies. Therefore, it is not necessary to compute whether there is total unstated interest under subparagraph (1) of this paragraph, and section 483 does not apply to any payments due under the contract.

(ii) On the same date, A sells property to C under a contract which provides that C is to make four payments of $1,000 each, such payments being due, respectively, 1, 2, 3, and 4 years from the date of sale. No interest is due until the last payment at which time C is to pay $400 interest. Since the contract between A and C does not provide for interest at a rate of at least 4 percent per annum, payable on each installment of principal at the time such installment is payable, subparagraph (2) of this paragraph does not apply and the determination of whether there is total unstated interest must be made under subparagraph (1) of this paragraph, as follows:

(*a*) Sum of payments to which sec. 483 applies		$4,000.00
(*b*) Sum of:		
Present value of $1,000 due every 12 months for 4 years ($1,000 × 3.64240 (factor for 4 years, col. (a), Table III))	$3,642.40	
Present value of $400 stated interest due 4 years from date of sale ($400 × 0.86207 (factor for 45 to 51 months, col. (a), Table I))	344.83	
Total		3,987.23

Since the sum of the payments to which section 483 applies ($4,000) exceeds the sum of the present values of such payments and the present value of the stated interest payment ($3,987.23), there is total unstated interest under the contract, and the provisions of section 483 apply to the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from income, see paragraph (c) of this section.

Example (5). (i) The facts are the same as in Example (4), except that the date of the sale of property to both B and C is December 31, 1973. Although three of the four payments under the contracts between A and B and between A and C are to be made after July 24, 1975, the test rate of 4 percent per annum simple interest is still applied to all payments in determining for purposes of this paragraph whether there is total unstated interest under either contract because in each case the sale occurred before July 24, 1975.

(ii) Since the interest rate specified in the contract between A and B is equal to the test rate of 4 percent per annum simple interest, paragraph (d)(2) of this section applies. Therefore, it is not necessary to compute whether there is total unstated interest under paragraph (d)(1) of this section, and section 483 does not apply to any payments due under the contract.

(iii) Since the contract between A and C does not provide for interest at a rate of at least 4 percent per annum, payable on each installment of principal at the time such installment is payable, paragraph (d)(2) of this section does not apply and the determination of whether there is total unstated interest must be made under paragraph (d)(1) of this section, in the same manner, and using the same tables, as computed in Example (4)(ii). Since the sum of the payments to which section 483 applies ($4,000) exceeds the sum of the present value of such payments and the present value of the stated interest payment ($3,987.23), there is total unstated interest under the contract and the provisions of section 483 apply to the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from gross income, the rules in paragraph (c) of this section are applied, using Tables I and III and not Tables IV and VI.

Example (6). On December 31, 1975, A sells property to B under a contract which provides that B is to make payments of $2,040 ($2,000 sales price plus $40 interest), $2,080 ($2,000 sales price plus $80 interest), and $2,120 ($2,000 sales price plus $120 interest), such payments being due, respectively, 1, 2, and 3 years from the date of sale. Because the contract was entered into after July 24, 1975, the determination of whether there is total unstated interest under the contract is made using Table IV instead of Table I in the following manner:

(i) Sum of payments to which sec. 483 applies	$6,000.00
(ii) Sum of:	
Present value of $2,040 due 1 yr. from date of sale ($2,040 × 0.94340 (factor for 9 to 15 months, col. (a), Table IV))	1,924.54
Present value of $2,080 due 2 yrs. from date of sale ($2,080 × 0.89286 (factor for 21 to 27 months, col. (a), Table IV))	1,857.15
Present value of $2,120 due 3 yrs. from date of sale ($2,120 × 0.84746 (factor for 33 to 39 months, col. (a), Table IV))	1,796.62
Total	5,578.31

Since the sum of the payments to which section 483 applies ($6,000) exceeds the sum of the present values of such payments and the present values of the stated interest payments

($5,578.31), there is total unstated interest under the contract and the provisions of section 483 apply to the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from income, see paragraph (c) of this section.

Example (7). On December 31, 1981, A sells property to B under a contract which provides that B is to make payments of $2,040 ($2,000 sales price plus $40 interest), $2,080 ($2,000 sales price plus $80 interest), and $2,120 ($2,000 sales price plus $120 interest), such payments being due, respectively, 1, 2, and 3 years from the date of sale. Because the contract was entered into after July 1, 1981, the determination of whether there is total unstated interest under the contract is made using Table VII in the following manner:

(i) Sum of payment to which sec. 483 applies		$6,000.00
(ii) Sum of:		
Present value of $2,040 due 1 yr. from date of sale ($2,040 × .91743 (factor for 9 to 15 months, col. (a), Table VII))	$1,871.56	
Present value of $2,080 due 2 yrs. from date of sale ($2,080 × .84746 (factor for 21 to 27 months, col. (a), Table VII))	1,762.72	
Present value of $2,120 due 3 yrs. from date of sale ($2,120 × .78740 (factor for 33 to 39 months, col. (a), Table VII))	1,669.29	5,303.57
Total unstated interest		696.43

Since the sum of the payments to which section 483 applies ($6,000) exceeds the sum of the present values of such payments and the present values of the stated interest payments ($5,303.57), there is total unstated interest under the contract, and the provisions of section 483 apply to the payments of sales price due under the contract. For the method of computing the amount of total unstated interest which is includible in or deductible from income, see paragraph (c) of this section.

(e) Payments that are indefinite as to time, liability, or amount—(1) In general. In the case of a contract for the sale or exchange of property under which there are any indefinite payments, section 483 shall be separately applied to each such indefinite payment as if it (and any amount of interest attributable to such indefinite payment) was the only payment due under the contract, and the effect of the application of section 483 shall be determined at the time such payment is made. For purposes of section 483, a payment shall be considered as indefinite if the liability for, or the amount or due date of, such payment cannot be determined at the time of the sale or exchange. Thus, if, at the time of the sale or exchange, some or all of the payments under the contract are indefinite, the determination as to whether there is total unstated interest (see paragraph (d) of this section), and if so, the computation of the amount of total unstated interest which is includible in or deductible from income (see paragraph (c) of this section), shall be made separately with respect to each indefinite payment as of the time it is received, taking into account the time interval between the sale or exchange and the receipt of the payment (to the nearest 6-month interval). Section 483 shall be applied separately to the aggregate of any definite payments which may also be due under the contract. Section 483 does not apply to any indefinite payment which is made no more than 1 year after the date of the sale or exchange even if there are other payments (definite or indefinite) under the contract made more than a year after such date. The provisions of this subparagraph shall apply notwithstanding the fact that the obligation under which such payment is made has been valued and the transaction treated as "closed" for purposes of determining gain or loss. See paragraph (b)(5) of this section for rules relating to evidence of indebtedness. See paragraph (b)(1)(i) of § 1.483–2 for rule relating to the effect on indefinite payments of the exception for contracts with a sales price of $3,000 or less.

(2) Contingent interest. If a deferred-payment contract provides for contingent interest, no part of such contingent interest shall be taken into account for purposes of section 483 until it is actually paid. For example, contingent interest shall not be taken into account in determining whether there is total unstated interest under the contract. For purposes of section 483, interest shall be considered as contingent if the liability for, or the amount or due date of, such interest cannot be determined at the time of the sale or exchange. If any part of the interest provided for in the contract is not contingent interest, such part shall be taken into account as stated interest for purposes of section 483. In case any amount of contingent interest is actually paid, such payment shall be treated in accordance with the rules prescribed for indefinite payments in subparagraph (1) of this paragraph if the payment of the portion of the sales price to which the interest is attributable is indefinite, or in accordance with the rules prescribed for changes in the terms of the contract (see paragraph (f) of this section) if the payment of the portion of the sales price to which the interest is attributable is definite. If the contract provides that all or a definite part of the interest must in all events be paid by a date specified in the contract (whether or not in certain circumstances it must be paid earlier), then such interest (or the definite part thereof) shall not be considered contingent interest and shall be taken into account as stated interest due on such specified date. If any amount of interest described in the preceding sentence is actually paid before such specified date then such

payment shall be treated in accordance with the rules prescribed for indefinite payments in subparagraph (1) of this paragraph if the payment of the portion of the sales price to which the interest is attributable is indefinite, or in accordance with the rules prescribed for changes in the terms of the contract (see paragraph (f) of this section) if the payment of the portion of the sales price to which the interest is attributable is definite.

(3) **Examples.** The provisions of this paragraph may be illustrated by the following examples (Note that examples (1) through (7) use Tables I through VI, because such tables apply generally to transactions entered into before July 1, 1981, and that the principles illustrated by such examples would apply for transactions entered into on or after July 1, 1981, in which case Tables VII and IX would generally be applied.):

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to pay $40,000 at the time of sale and $10,000 on December 29th of each year for the next 3 years, unless profits derived from the property exceed a specified amount during the year, in which case, in such year, B is to pay $12,000. No interest is provided for in the contract. For the year 1964, profits have exceeded the specified amount and B pays $12,000. For 1965 B pays only $10,000, but for 1966 profits have again exceeded the specified amount and B pays $12,000. Since, on the date of sale, there are definite payments due under the contract, total unstated interest is computed with respect to the aggregate of such definite payments. The total unstated interest under the contract, determined as of December 31, 1963, is $2,799.40, computed as follows:

Sum of definite payments to which sec. 483 applies	$30,000.00
Less: Present value of $10,000 due every 12 months for 3 years ($10,000 × 2.72006 (factor for 3 years, col. (b), Table III))	27,200.60
Total unstated interest	2,799.40

At the time of receipt of the indefinite portion ($2,000) of the first payment ($12,000), additional unstated interest is not computed on the amount of such indefinite portion since payment was made no more than 1 year after the date of the sale. At the time of receipt of the indefinite portion ($2,000) of the last payment ($12,000), additional unstated interest is computed based on the amount of such indefinite portion. The additional unstated interest at the end of the third year is $275.40, computed as follows:

Indefinite portion of payment to which sec. 483 applies	$2,000.00
Less: Present value of such portion ($2,000 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))	1,724.60
Total unstated interest	275.40

Example (2). M Corporation and N Corporation each own one-half of the stock of O Corporation. On December 31, 1963, pursuant to a reorganization qualifying under section 368(a)(1)(B), M contracts to acquire the one-half interest held by N for an initial distribution on such date of 30,000 shares of M voting stock, and a non-assignable right to receive up to 10,000 additional shares of M's voting stock during the next 3 years, provided the net profits of O Corporation exceed certain amounts specified in the contract. No interest is provided for in the contract. No additional shares are received in 1964 or in 1965, but in 1966 the annual earnings of O Corporation exceed the specified amount and on December 31, 1966, an additional 3,000 M voting shares are transferred to N. The fair market value of such shares on the date of transfer is $60,000 ($20 per share). The total unstated interest applicable to the indefinite payment is $8,262, computed as follows:

Indefinite payment to which sec. 483 applies	$60,000.00
Less: Present value of such payment ($60,000 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))	51,738.00
Total unstated interest	8,262.00

See paragraph (a)(2) of § 1.483–2 for the effect on a reorganization defined in section 368(a)(1) of treating a portion of voting stock as interest under section 483.

Example (3). On December 31, 1963, A sells property to B under a contract which provides that B is to make one payment on May 1, 1965. No interest is provided for in the contract and, at the time of sale, the adjusted basis of the property to A is $2,000. Assume that the amount of the payment is indefinite but that the contract has an ascertainable fair market value of $8,000. For the year 1963, A includes $6,000 ($8,000 value of contract minus $2,000 adjusted basis) in gross income from the sale of the property and the transaction is treated as "closed" for purposes of determining gain or loss. On May 1, 1965, A collects $9,000 on the contract (which is more than the valuation that was placed on the contract in 1963). Section 483 applies to the $9,000 payment and $642.60 is treated as total unstated interest, computed as follows:

Indefinite payment to which sec. 483 applies	$9,000.00
Less: Present value of such payment ($9,000 × 0.92860 (factor for 15 to 21 months, col. (b), Table I))	8,357.40
Total unstated interest	642.60

The excess of the amount collected ($9,000) reduced by the amount treated as unstated interest ($642.60) under section 483 is $8,357.40. The excess of such amount ($8,357.40) over the value of the contract as determined in 1963 ($8,000) shall be included in income in accordance with the other applicable provisions of the Code. Thus, $357.40 is included in income.

Example (4). The facts are the same as in example (3), except that on May 1, 1965, A collects only $6,000 on the contract (which is less than the valuation that was placed on the contract in 1963). Section 483 applies to the $6,000 payment and $428.40 is treated as total unstated interest, computed as follows:

Indefinite payment to which sec. 483 applies	$6,000.00
Less: Present value of such payment ($6,000 × 0.92860 (factor for 15 to 21 months, col. (b), Table I))	5,571.60
Total unstated interest	428.40

The amount collected ($6,000) reduced by the amount treated as unstated interest ($428.40) under section 483 is $5,571.60. The excess of the value of the contract as determined in 1963 ($8,000) over such amount ($5,571.60) shall be treated as a loss in accordance with the other applicable provisions of the Code. Thus, $2,428.40 is treated as a loss.

Example (5). On December 31, 1963, A sells a capital asset which has an adjusted basis in A's hands of $100,000 to B

under a contract which provides that B is to make payments on January 15th of 1965, 1966 and 1967, the amount of such payments being dependent solely on the profits derived from the property. No interest is provided for in the contract. Assume that this is a rare and extraordinary case (see paragraph (a)(2) of § 1.453–6) in which the contract does not have an ascertainable fair market value and that A is permitted to apply payments of sales price in reduction of basis before being required to include any amount as gain on the transaction. For 1965, B pays A $50,000, for 1966 $100,000, and for 1967 $100,000.

(i) For the year 1965, the $50,000 payment would be allocated $2,409.50 as total unstated interest and $47,590.50 as return of capital, computed as follows:

(*a*) Indefinite payment to which sec. 483 applies	$50,000.00
Less: Present value of such payment ($50,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))	47,590.50
Total unstated interest	2,409.50
(*b*) Return of capital	47,590.50

(ii) For the year 1966, the $100,000 payment would be allocated $9,405 as total unstated interest, $52,409.50 as return of capital, and $38,185.50 as capital gain, computed as follows:

(*a*) Indefinite payment to which sec. 483 applies	$100,000.00
Less: Present value of such payment ($100,000 × 0.90595 (factor for 21 to 27 mos., col. (b), Table I))	90,595.00
Total unstated interest	9,405.00
(*b*) Payment of principal	90,595.00
Plus: Amount of capital returned in 1965	47,590.50
	138,185.50
Less: Adjusted basis of property	100,000.00
Capital gain	38,185.50

(iii) For the year 1967, the $100,000 payment would be allocated $13,770 as total unstated interest and $86,230 as capital gain, computed as follows:

(*a*) Indefinite payment to which sec. 483 applies	$100,000.00
Less: Present value of such payment ($100,000 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))	86,230.00
Total unstated interest	13,770.00
(*b*) Capital gain	86,230.00

Example (6). The facts are the same as those in Example (1), except that the property is sold on December 31, 1973, and all other relevant dates are 10 years later. Although two of the three payments due under the contract are to be made after July 24, 1975, total unstated interest is computed in the same manner, and using the same tables as in Example (1), because the sale of property occurred before July 24, 1975. Thus, total unstated interest under the contract, determined as of December 31, 1973, is $2,799.40, and the additional unstated interest at the end of the third year (1976) is $275.40.

Example (7). On December 31, 1975, A sells property to B under a contract which provides that B is to pay $40,000 at the time of the sale and $10,000 on December 29th of each year for the next three years, unless profits exceed a specified amount during the year, in which case, B is to pay $12,000 in that year. No interest is provided for in the contract. For the year 1976 profits have exceeded the specified amount and B pays $12,000. For 1977 B pays only $10,000, but for 1978 profits have again exceeded the specified amount and B pays $12,000. Since, on the date of sale, there are definite payments due under the contract, total unstated interest is computed with respect to the aggregate of such definite payments. The total unstated interest under the contract, determined as of December 31, 1975 is $3,815.50 (using Tables IV and VI rather than Tables I and III because the contract was entered into after July 24, 1975). The computation is as follows:

Sum of definite payments to which sec. 483 applies	$30,000.00
Less: Present value of $10,000 due every 12 months for 3 years ($10,000 × 2.61845 (factor for 3 years, col. (b), Table VI))	26,184.50
Total unstated interest	3,815.50

At the time of receipt of the indefinite portion ($2,000) of the first payment ($12,000), additional unstated interest is not computed on the amount of such indefinite portion since payment was made no more than 1 year after the date of the sale. At the time of receipt of the indefinite portion ($2,000) of the last payments ($12,000), additional unstated interest is computed based on the amount of such indefinite portion.

The additional *unstated interest at the end of the third year is $373.00, computed as follows:*

Indefinite portion of payment to which sec. 483 applies	$2,000.00
Less: Present value of such portion ($2,000 × 0.81350 (factor for 33 to 39 months, col. (b), Table IV))	1,627.00
Total unstated interest	373.00

Example (8). M Corporation and N Corporation each own one-half of the stock of O Corporation. On December 31, 1981, pursuant to a reorganization qualifying under section 368(a)(1)(b), M contracts to acquire the one half interest held by N for an initial distribution on such date of 30,000 shares of M voting stock, and a non-assignable right to receive up to 10,000 additional shares of M's voting stock during the next 3 years provided the net profits of O Corporation exceed certain amounts specified in the contract. No interest is provided for in the contract. No additional shares are received in 1982, or 1983, but in 1984, the annual earnings of O Corporation exceed the specified amount and on December 31, 1984, an additional 3,000 voting shares are transferred to N. The fair market value of such shares on the date of transfer is $60,000 ($20 per share). The total unstated interest applicable to the indefinite payment is computed as follows:

Indefinite payment to which sec. 483 applies	$60,000.00
Less:	
Present value of such payment ($60,000 × .74622 (factor for 33 to 39 months, col. (b), Table VII))	44,773.20
Total unstated interest	$15,226.80

See paragraph (a)(2) of § 1.483–2 for the effect on a reorganization defined in section 368(a)(1) of treating a portion of voting stock as interest under section 483.

(f) **Changes in terms of contract—(1) In general.** If the liability for, or the amount or due date of, any payment (including interest) under a contract for the sale or exchange of property is changed during any taxable year (referred to as the "year of change"), the total unstated interest under the contract shall be recomputed under the

rules of paragraphs (c) and (d) of this section (as if the original contract had contained the changed terms) and allocated (in the manner provided in subparagraph (4) of this paragraph) with adjustment for prior interest (including unstated interest) payments. The provisions of this paragraph apply regardless of whether there was total unstated interest under the original contract. In general, a late payment or an early payment (including a prepayment) is considered a change in the due date of such payment to the date on which the payment is actually made, and therefore is considered a change in the terms of the contract. However, for purposes of the preceding sentence, the due date of a payment shall not be considered changed merely because the payment is late (or early), provided the payment is made no later (or earlier) than 90 days after (or before) the date the payment was due under the contract. Furthermore, any additional interest which is paid by the purchaser because of a late payment, either under the terms of the contract or under the provisions of local law, shall be taken into account as stated interest for purposes of any recomputation of total unstated interest under the contract. In general, a novation is considered a change in the terms of the contract. However, for special rules relating to the transfer of the obligation to make deferred payments or of the right to receive deferred payments, see subparagraph (6) of this paragraph. A default in remaining payments under a contract (regardless of whether the property is repossessed or the debtor is released from liability under the contract) is also considered a change in the terms of the contract for purposes of section 483. In such case, the contract shall be considered as having been changed so as to provide for a reduction in the stated sales price to the amount that has actually been paid by the debtor as of the date of the default, and total unstated interest shall be recomputed based on such revised contract. Any payments subsequently made by or on behalf of the debtor with respect to his obligation (including payments on a deficiency judgment) shall be treated as indefinite payments under the contract in accordance with the rules prescribed in paragraph (e) of this section. For purposes of section 483, the value of the repossessed property is not considered a payment under the contract.

(2) Effect of change in terms of contract on characterization as principal or interest. Except as otherwise provided in this paragraph, the characterization as principal or interest of any portion of a payment under a contract for the sale or exchange of property is not changed as a result of events occurring after the close of the taxable year in which the payment is made. Thus, for example, if a portion of a payment was characterized as interest for a prior year, and such characterization resulted in a corporation being treated as a personal holding company for such prior year, any change in the terms of the contract does not decrease the portion of such payment characterized as interest for purposes of redetermining personal holding company status for such prior year. However, the parties to a contract may change its terms so as to alter for the year of change and for any subsequent years the characterization as principal and interest of any portion of a payment under the contract.

(3) Effect on basis of change in terms of contract. If the terms of the contract are changed so that the amount of total unstated interest (if any) under the revised contract differs from the amount of total unstated interest (if any) under the original contract, the basis to the purchaser of any property which was sold or exchanged under the original contract (or to any other person whose basis for such property is determined in whole or in part by reference to the basis of the purchaser) shall be redetermined as of the date of the change by taking into account any recomputation of total unstated interest. Thus, such purchaser (or such other person) shall redetermine his basis only if he has not sold, exchanged, or otherwise disposed of such property at the time the change in the terms of the contract is made.

(4) Allocation of recomputed total unstated interest. **(i)** If the amount of total unstated interest recomputed under the contract (as changed) exceeds the amount of total unstated interest previously returned as income or deducted under the contract (prior to the change in terms), such excess amount shall be allocated on a pro rata basis among the remaining definite payments due under the revised contract; that is, there shall be treated as interest that part of a definite payment (due under the revised contract) to which section 483 applies which bears the same ratio to the amount of such payment as such excess amount bears to the total of the remaining definite payments to which section 483 applies which are due under such revised contract. For purposes of this subdivision, the determination of whether a payment is definite shall be made at the time the contract is changed.

(ii) If the amount of total unstated interest recomputed under the contract (as changed) is less than the amount of total unstated interest previously returned as income or deducted (under the contract prior to the change in terms) the amount

of the difference shall be deducted from the income of the seller or added to the income of the purchaser for the year of the change.

(5) Examples. The provisions of paragraph (f)(1) through (5) of this section may be illustrated by the following examples (Note that the examples use Tables I through III because the examples deal with transactions to which these tables apply. These tables generally apply to transactions entered into after July 30, 1963, and before July 24, 1975. The principles illustrated by the examples also apply to all other transactions to which section 483 applies. However, Tables IV through VI are used for transactions to which those tables apply, generally transactions entered into after July 23, 1975, and before July 1, 1981. In addition, Tables VII through IX are used for transactions to which those tables apply, generally transactions entered into on or after July 1, 1981):

Example (1). (i) On December 31, 1963, A, a calendar year taxpayer, sells a capital asset (which A has held more than 6 months and which has an adjusted basis to A of $4,000) to B under a contract which provides that B is to make three payments of $2,000 each, such payments being due on December 31st of 1964, 1965, and 1966. No interest is provided for in the contract. After applying section 483, total unstated interest is determined to be $559.88, and the amount of each $2,000 payment which is treated as interest is determined to be $186.63. For the year 1963, A includes $1,440.12 ($5,440.12 ($6,000 value of B's obligation minus $559.88 total unstated interest) minus $4,000 adjusted basis) as long-term capital gain on the sale of the property. In 1964, A includes $186.63 as interest income. On June 1, 1965, A and B change the terms of the contract making the balance of the payments due immediately. Total unstated interest under the revised contract is $381.98, computed as follows:

Sum of payments to which sec. 483 applies...		$6,000.00
Less:		
Present value of $2,000 due December 31, 1964 ($2,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))..	$1,903.62	
Present value of $4,000 due June 1, 1965 ($4,000 × 0.92860 (factor for 15 to 21 months, col. (b), Table I))..........	3,714.40	5,618.02
Total unstated interest (recomputed)............	381.98	

(ii) The portion of the recomputed total unstated interest to be allocated to the final definite payment of $4,000 is $195.35, computed as follows:

Total unstated interest (recomputed)	$381.98
Less: Portion of original total unstated interest previously included in income	186.63
Total unstated interest allocated to final definite payment	195.35

(iii) Since after the change in the terms of the contract a lesser portion of B's payments is treated as interest, a correspondingly greater portion of B's payments is treated as part of the sales price. Accordingly, for the year 1965, A includes as long-term capital gain an additional $177.90, which may be computed as follows:

Total unstated interest (original).............	$559.88
Less: Total unstated interest (recomputed)....	381.98
Additional long-term capital gain for 1965	177.90

Example (2). (i) The facts are the same as in example (1), except that on June 1, 1965, A and B change the terms of the contract by providing that the last two payments shall be due on December 31st of 1966 and 1968. The total unstated interest under the revised contract is $809.38, computed as follows:

Sum of payments to which sec. 483 applies...		$6,000.00
Less:		
Present value of $2,000 due December 31, 1964 ($2,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))..	$1,903.62	
Present value of $2,000 due December 31, 1966 ($2,000 × 0.86230 (factor for 33 to 39 months, col. (b), Table I))..	1,724.60	
Present value of $2,000 due December 31, 1968 ($2,000 × 0.78120 (factor for 57 to 63 months, col. (b), Table I))..	1,562.40	5,190.62
Total unstated interest (recomputed) ...		809.38

(ii) The portion of the recomputed total unstated interest to be allocated among the remaining payments under the contract is $622.75, computed as follows:

Total unstated interest (recomputed)	$809.88
Less: Portion of original total unstated interest previously included in income	186.63
Total unstated interest allocated to remaining payments..................	622.75

(iii) The portion of each remaining $2,000 payment which is treated as interest under the revised contract is $311.38

($2,000×$622.75÷$4,000.00)

(iv) Since after the change in the term of the contract a greater portion of B's payments is treated as interest, a correspondingly lesser portion of B's payments is treated as part of the sales price. Accordingly, for the year 1965, A would treat as long-term capital loss the amount of $249.50, which may be computed as follows:

Total unstated interest (recomputed)	$809.38
Less: Total unstated interest (original)	559.88
Amount treated as long-term capital loss for 1965	249.50

Example (3). (i) The facts are the same as in example (1), except that in May 1965 A and B change the terms of the contract by reducing the sales price to a total of $3,000, and by agreeing that B is to pay the remaining balance of $1,000 on June 1, 1965. Total unstated interest under the revised contract is $167.78, computed as follows:

Sum of payments to which sec. 483 applies...		$3,000.00
Less:		
Present value of $2,000 due December 31, 1964 ($2,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))..	$1,903.62	

Present value of $1,000 due June 1, 1965 ($1,000 × 0.92860 (factor for 15 to 21 months, col. (b), Table I))	$928.60	$2,832.22
Total unstated interest (recomputed) ...		167.78

(ii) Since the amount of the recomputed total unstated interest under the contract as changed ($167.78) is less than the amount of total unstated interest previously returned as income ($186.63), the amount of the difference ($18.85) shall be deducted from A's income for 1965, and such amount shall be added to B's income for such year.

Example (4). (i) The facts are the same as in example (1), except that B fails to make the payment due on December 31, 1965, and A repossesses the property. The contract is considered as having been changed in 1965 to provide for one $2,000 payment due at the end of 1964. Total unstated interest under the revised contract is $96.38, computed as follows:

Sum of payments to which sec. 483 applies...	$2,000.00
Less: Present value of $2,000 due December 31, 1964 ($2,000 × 0.95181 (factor for 9 to 15 months, col. (b), Table I))	1,903.62
Total unstated interest (recomputed) ...	96.33

(ii) Since the amount of the recomputed total unstated interest under the contract as changed ($96.38) is less than the amount of total unstated interest previously returned as income ($186.63), the amount of the difference ($90.25) shall be deducted from A's income for 1965, and such amount shall be added to B's income for such year.

Example (5). (i) On December 31, 1963, A sells property to B under a contract which provides that B is to make a $1,000 payment at the end of each year for the next 4 years, each payment bearing 4 percent per annum simple interest. Thus, the payments will be in the following amounts: $1,040 ($1,000 sales price plus $40 interest), $1,080 ($1,000 sales price plus $80 interest), $1,120 ($1,000 sales price plus $120 interest), and $1,160 ($1,000 sales price plus $160 interest). Since the interest rate specified in the contract is equal to the test rate (4 percent per annum simple interest) provided in paragraph (d)(2) of this section, it is determined, as of December 31, 1963, that there is no total unstated interest under the contract. B makes the first two payments on time, but the third payment, which is due on December 31, 1966, is not made until December 31, 1967, a year late. At the same time, B makes the final payment. A does not collect any additional interest on the late payment. Since the third payment is more than 90 days late, the date of the payment is considered changed to December 31, 1967. Accordingly, a new determination of whether there is total unstated interest under the revised contract must be made by applying the method provided in paragraph (d)(1) of this section, as follows:

(a) Sum of payments to which sec. 483 applies		$4,000.00
(b) Sum of:		
Present value of $1,040 due 1 year from date of sale ($1,040 × 0.96154 (factor for 9 to 15 months, col. (a), Table I)) ..	$1,000.00	
Present value of $1,080 due 2 years from date of sale ($1,080 × 0.92593 (factor for 21 to 27 months, col. (a), Table I)) ..	1,000.00	
Present value of $2,280 due 4 years from date of sale ($2,280 × 0.86207 (factor for 45 to 51 months, col. (a), Table I)) ..	1,965.52	3,965.52

Since the sum of the payments to which section 483 applies ($4,000) exceeds the sum of the present values of such payments and the present values of the stated interest payments ($3,965.52), there is total unstated interest under the revised contract and the provisions of section 483 now apply to the payments due under the contract.

(ii) The amount of total unstated interest to be allocated to the final $2,000 payment of sales price under the contract and which is includible in A's income and deductible from B's income for 1967 is $160.38, computed as follows:

Sum of payments to which sec. 483 applies...		$4,000.00
Less:		
Present value of $1,040 due 1 year from date of sale ($1,040 × 0.95181 (factor for 9 to 15 months, col. (b), Table I)) ..	$989.88	
Present value of $1,080 due 2 years from date of sale ($1,080 × 0.90595 (factor for 21 to 27 months, col. (b), Table I)) ..	978.43	
Present value of $2,280 due 4 years from date of sale ($2,280 × 0.82075 (factor for 45 to 51 months, col. (b), Table I)) ..	1,871.31	3,839.62
Total unstated interest		160.38

Example (6). The facts are the same as in example (5). On December 31, 1963 (the date of the sale), the basis of the property in the hands of B is $4,000. On March 1, 1968, after all the payments have been made under the contract, B sells the property. Assuming that there were no adjustments to the basis of the property, B's basis for purposes of determining gain or loss on the sale of the property would be $3,839.62 ($4,000 original basis minus $160.38 unstated interest). On the other hand, if B sold the property on November 1, 1966 (prior to the date of the change) his basis for the property would be $4,000.

Example (7). The facts are the same as in example (5), except that the property is sold on December 31, 1973, and all other relevant dates are 10 years later. Although the change in the contract takes place after July 24, 1975, on December 31, 1977, under this paragraph the recomputation of total unstated interest is required to be made as if the original contract had contained the changed terms. Since the sale occurred before July 24, 1975, the test rate for purposes of applying paragraph (d) to the revised contract is still 4 percent per annum simple interest, and the interest rate to be used in computing the amount of total unstated interest under paragraph (c) is still 5 percent per annum compounded semiannually. Thus, the determination of whether there is total unstated interest under the revised contract, and the computation of total unstated interest to be allocated to the final $2,000 payment, are both made by applying Table I (and not Table IV), in the same manner as in example (5). Therefore, the total unstated interest to be allocated to the final $2,000 payment is $160.38.

Example (8). The facts are the same as in example (5), except that the property is sold on December 31, 1973, and all other relevant dates are 10 years later. In addition, when the final $2,000 payment is made on December 31, 1977, interest of $320 is also paid on such amount. Although the change in the contract takes place after July 24, 1975, on December 31, 1977, under this paragraph the recomputation of total unstated interest is required to be made as if the original contract had contained the changed terms. Since the sale occurred before July 24, 1975, the test rate for purposes of applying paragraph (d) to the revised contract is still 4 percent per annum simple interest. Since the $320 of interest which is paid in addition to

the final $2,000 payment is equal to the test rate of 4 percent per annum simple interest, paragraph (d)(2) of this section applies. Therefore, it is not necessary to compute whether there is total unstated interest under paragraph (d)(1) of this section, and section 483 does not apply to the final $2,000 payment.

(6) Transfer of obligation to make or contract right to receive deferred payments. (i) If an obligation to make deferred payments (whether definite or indefinite) under a contract under which there is total unstated interest is transferred by sale, exchange, distribution, or other disposition (for example, if the purchaser under a deferred-payment contract for the sale or exchange of property later transfers that property and the transferee either assumes the purchaser's obligation to the seller or takes the property subject to such obligation), the following rules shall apply—

(a) The person who has the right to receive payments under the obligation shall not be affected with respect to section 483 merely by reason of such transfer.

(b) The transferor of the obligation to make deferred payments shall not be entitled to any deductions for unstated interest with respect to payments due under the obligation after the date of the transfer, unless, by reason of the default of the transferee, the transferor is liable for and makes payments under the obligation.

(c) Section 483 shall apply to the transferee in the same manner that it applied to the transferor; that is, the transferee is entitled to the same deductions (if otherwise allowable) for unstated interest as the transferor would have been entitled to if the transfer had not occurred. Thus, the transferee may be entitled to deduct unstated interest notwithstanding that the sales price to the transferee is no more than $3,000. However, if section 163(b) (relating to deduction for interest on certain installment purchases) applies to the transferee, he shall compute his interest deductions under that section (see paragraph (b)(2) of § 1.483–2) regardless of whether the transferor so computed his interest deductions.

(d) A separate determination must be made, in accordance with the rules prescribed in this section and in § 1.483–2, as to the application of section 483 to the contract between the transferor and the transferee under which the obligation to make the deferred payments is transferred. For purposes of such separate determination, the assumption by the transferee of the obligation of the transferor shall be treated as a payment made at the time of the transfer.

The rules set forth in this subdivision shall apply regardless of whether the transferor is completely released from liability with respect to the person having the right to receive the payments, or remains liable to such person under the obligation if the transferee defaults.

(ii) If a right to receive deferred payments (whether definite or indefinite) under a contract under which there is total unstated interest is transferred by sale, exchange, distribution, or other disposition, the following rules shall apply (except to the extent that such transfer constitutes an assignment of future income)—

(a) The person who has the obligation to make payments under the contract shall not be affected with respect to section 483 merely by reason of such transfer.

(b) The transferor of the contract right to receive deferred payments shall treat any amount realized (as defined in section 1001(b)) from the transferee as the final payment under his contract with the person having the obligation to make the payments, and shall recompute his total unstated interest under such contract under the rules provided in subparagraphs (1) through (5) of this paragraph.

(c) The transferee of such contract right shall treat the payments he receives from the person having the obligation to make the payments as if they were received under a contract for the sale or exchange of property entered into with such person on the date of the transfer. Thus, the transferee shall determine, in accordance with the rules prescribed in this section and in § 1.483–2, the applicability of section 483 to such payments.

(d) A separate determination must be made, in accordance with the rules prescribed in this section and in § 1.483–2, as to the application of section 483 to the contract between the transferor and transferee under which the contract right to receive the deferred payments is transferred.

The rules set forth in this subdivision shall apply regardless of whether the transferor is made liable (under the contract with the transferee) for any payments which are not received by the transferee by reason of the default of the person having the obligation to make such payments.

(iii) If section 483 does not apply to an obligation to make or a contract right to receive deferred payments (for example, because of an exception set forth in section 483(f)), the following rules shall apply in the case of a transfer of such

obligation or contract right, whether by sale, exchange, distribution, or other disposition—

(a) Section 483 shall not become applicable to the obligation or contract right merely by reason of such a transfer. However, if the transferee and the person having the obligation to make (or the right to receive) the payments under the contract change its terms, a determination must be made as to whether section 483 applies to the contract as changed. For example, if the only reason section 483 did not apply to a deferred-payment contract was because no payment was due more than 1 year after the date of the sale or exchange, any change in the terms of the contract by the transferee and such person, which makes a payment fall due more than 1 year after the date of such sale or exchange would make section 483 apply to the contract. For special rules relating to the application of the effective date provisions to transfer, see paragraph (b)(4) of this section.

(b) A separate determination must be made as to the application of section 483 to the contract between the transferor and the transferee under which an obligation to make or a contract right to receive deferred payments is transferred. For purposes of such separate determination, the assumption by the transferee of the obligation of the transferor shall be treated as an evidence of indebtedness of the transferee.

(iv) The provisions of paragraph (f)(6) of this section may be illustrated by the following examples (Note that the examples use Tables I through III because the examples deal with transactions to which these tables apply. These tables apply generally to transactions entered into after July 30, 1963, and before July 24, 1975. The principles illustrated by the examples also apply to all other transactions to which section 483 applies. However, Tables IV and VI are used for transactions to which these tables apply, generally transactions entered into after July 23, 1975, and before July 1, 1981. In addition, Tables VII through IX are used for transactions to which those tables apply, generally transactions entered into on or after July 1, 1981):

Example (1). (a) On December 31, 1963, A sells property to B under a contract which provides that B is to make four payments of $2,000 each, such payments being due, respectively, at the end of each year for the next 4 years. No interest is provided for in the contract. Assume that section 483 applies to each of the payments and that the portion of each payment which is treated as interest is $229.60. On January 1, 1966, B transfers other property to C in exchange for C's non-interest-bearing promissory note which provides that C is to pay B $1,000 at the end of each of the next 4 years, and C's assumption of the obligation to make the two remaining $2,000 payments to A.

(b) With respect to each of the two remaining $2,000 payments, C may deduct $229.60 and A continues to include such amount in income. B has no deductions with respect to the payments by C.

(c) With respect to the contract between B and C, section 483 applies to each of the $1,000 payments to be made by C at the end of each of the next 4 years, and total unstated interest with respect to such payments must be computed in the manner provided in paragraph (c) of this section and then allocated in the manner provided in paragraph (a) of this section. Because the assumption of B's obligation by C is treated as a payment made at the time of the transfer, section 483 does not apply to the two remaining $2,000 payments for purposes of the contract between B and C.

Example (2). (a) The facts are the same as in example (1), except that on January 1, 1966, A transfers his contract right to receive the two remaining $2,000 payments to C in exchange for property having a fair market value of $3,000.

(b) B is not affected by the transaction and continues to deduct $229.60 with respect to each of the two remaining $2,000 payments. A treats his contract with B as having been changed to provide for two payments of $2,000 each, due December 31st of 1964 and 1965, respectively, and a final payment of $3,000 (the fair market value of the property transferred by C to A), due January 1, 1966. A recomputes his total unstated interest in accordance with the rules provided in paragraph (c) of this section (as if the original contract with B had contained the changed terms) and allocates such unstated interest in the manner provided in subparagraph (4) of this paragraph.

(c) C treats the two remaining $2,000 payments from B as if they are due under a contract for the sale of property entered into with B on January 1, 1966. Thus, C computes total unstated interest under paragraph (c) of this section as if he had entered into a contract subject to section 483 which provided for $2,000 due December 31, 1966, and $2,000 due December 31, 1967, and then allocates such total unstated interest in the manner provided in paragraph (a) of this section.

(d) With respect to the contract between A and C, section 483 does not apply because there are no deferred payments.

Example (3). (a) On December 31, 1963, A, a holder described in section 1235(b), sells property, consisting of all substantial rights to a patent, to B under a contract which provides that B is to pay A $1,000 at the end of each year for the next 10 years. No interest is provided for in the contract, but section 483 does not apply because the deferred payments are made pursuant to a transfer described in section 1235(a) (see paragraph (b)(4) of § 1.483–2). On January 1, 1972, B, who is not a holder described in section 1235(b), sells the patent right to C under a contract which provides that C is to assume B's remaining obligation to pay A $1,000 at the end of each year for the next 2 years. There is no other consideration and no interest provided for in the contract between B and C.

(b) Since section 483 did not apply to the contract between A and B, B was not entitled to a deduction for unstated interest with respect to his obligation. Accordingly, section 483 does not become applicable to the obligation merely by reason of its transfer to C. Thus, C is not entitled to a deduction for unstated interest with respect to the obligation he has assumed and A is not required to include any unstated interest income.

(c) With respect to the contract between B and C, section 483 does not apply because the sales price under such contract is no more than $3,000, so that the exception set forth in section 483(f)(1) is applicable.

Example (4). (a) The facts are the same as in example (3), except that B sells the patent right to C on January 1, 1966, under a separate contract which provides that C is to assume B's remaining obligation to pay A $1,000 at the end of each year for the next 8 years. There is no other consideration and no interest provided for in the contract between B and C.

(b) Since section 483 did not apply to the contract between A and B, B was not entitled to a deduction for unstated interest with respect to his obligation. Accordingly, section 483 does not become applicable to the obligation merely by reason of its transfer to C. Thus, C is not entitled to a deduction for unstated interest because he is B's transferee.

(c) With respect to the contract between B and C, section 483 applies, and for purposes of paragraph (a) of this section, total unstated interest under such contract is $1,553.09, computed as follows:

Sum of payments to which sec. 483 applies...	$8,000.00
Less: Present value of $1,000 due every 12 months for 8 years ($1,000 × 6.44691 (factor for 8 years, col. (b), Table III))	6,446.91
Total unstated interest	1,553.09

Thus, C may deduct and B must include in income, $194.14—

($1,000×$1,553.09÷$8,000.00)

with respect to each payment C makes to A.

Example (5). (a) The facts are the same as in example (1), except that A sells property to B on December 31, 1973, and all other relevant dates are 10 years later.

(b) Although the transfer of property by B to C takes place after July 24, 1975, A is not affected with respect to section 483 merely by reason of such transfer (see paragraph (f)(6)(i)(a) of this section), and section 483 is applied to C in the same manner as it applied to B as if the transfer of the obligation to make the two remaining $2,000 payments had not been made (see paragraph (f)(6)(i)(c) of this section). With respect to each of the two remaining $2,000 payments, therefore, C may deduct $229.60, and A continues to include such amount in income. B has no deductions with respect to such payments by C.

(c) With respect to the contract between B and C, section 483 applies to each of the $1,000 payments to be made by C at the end of the next 4 years, and total unstated interest with respect to such payments must be computed in the manner provided in paragraph (c) of this section. Since the contract between B and C is treated as a new contract (see paragraph (f)(6)(i)(d) of this section), Tables IV to VI (and not Tables I to III) are used in making the computation because the transfer of property by B to C takes place on January 1, 1976, which is after July 24, 1975. Because the assumption of B's obligation is treated as a payment made at the time of the transfer, section 483 does not apply to the two remaining payments for purposes of the contract between B and C.

Example (6). (a) The facts are the same as in example (1), except that A sells property to B on January 31, 1973, and all other relevant dates are 10 years later. In addition, on January 1, 1976, A transfers his contract right to receive the two remaining $2,000 payments to C in exchange for property having a fair market value of $3,000.

(b) Although the transfer of his contract right by A to C takes place after July 24, 1975, B is not affected by the transaction (See paragraph (f)(6)(ii)(a) of this section) and B continues to deduct $229.60 with respect to each of the two remaining $2,000 payments. A treats his contract with B as having been changed to provide for two payments of $2,000 each, due December 31st of 1974 and 1975, respectively, and a final payment of $3,000 (the fair market value of the property transferred by C to A) due January 1, 1976. A recomputes his total unstated interest in accordance with the rules provided in paragraph (c) of this section and allocates such unstated interest in the manner provided in paragraph (f)(4) of this section. Since the sale to B took place before July 24, 1975, and since the recomputation is made as if the original contract with B had contained the changed terms, Tables I to III are used in making the recomputation and not Tables IV to VI.

(c) C treats the two remaining $2,000 payments from B as if they are due under a contract for the sale of property entered into with B on January 1, 1976. Thus, C, computes total unstated interest under paragraph (c) of the section as if he had entered into a contract subject to section 483 which provided for $2,000 due December 31, 1976, and $2,000 due December 31, 1977, and then allocates such total unstated interest in the manner provided in paragraph (a) of this section. Since January 1, 1976, is after July 24, 1975, Tables IV to VI (and not Tables I to III) are applied in computing such total unstated interest.

(d) With respect to the contract between A and C, section 483 does not apply because there are no deferred payments.

(g) Present value tables—(1) Computation of present value. If the purpose of the present value computation is to determine under paragraph (d) of this section whether there is total unstated interest under a contract, column (a) of the appropriate table set forth in paragraph (g)(2) of this section shall be used. For the rules relating to certain governmental obligations, see paragraph (d)(3) of this section. If the purpose of the present value computation is to determine under paragraph (c) of this section the amount of total unstated interest under a contract to be included in or deducted from income (that is, after it has already been determined by using column (a) of the appropriate table that the contract contains total unstated interest), column (b) of the appropriate table set forth in paragraph (g)(2) of this section shall be used. If a contract provides for deferred payments for a period in excess of 60 years, the factor (or factors) necessary may be obtained upon request to the Commissioner of Internal Revenue, Washington, D.C. 20224. In general, such request must be accompanied by a copy of the contract (or the proposed contract) and other relevant instruments.

(2) Tables. The following tables shall be used for computing the present value of a payment to which section 483 applies and the present value of any interest payment due under a contract:

TABLE I—PRESENT VALUE OF DEFERRED PAYMENT—APPLICABLE TO CONTRACTS ENTERED INTO BEFORE JULY 24, 1975 TO WHICH PARAGRAPHS (c)(2)(ii)(A) AND (d)(1)(ii)(A) OF THIS SECTION APPLY

[COL. (A) 4 PERCENT SIMPLE INTEREST—COL. (B) 5 PERCENT INTEREST, COMPOUNDED SEMIANNUALLY]

Number of months deferred: More than	But not more than	Col. (a)—Present value of $1 at 4 percent simple interest	Col. (b)—Present value of $1 at 5 percent compounded semiannually
0	6	1.00000	1.00000
6	9	.98039	.97561

Number of months deferred: More than	But not more than	Col. (a)—Present value of $1 at 4 percent simple interest	Col. (b)—Present value of $1 at 5 percent compounded semiannually
9	15	.96154	.95181

[1] Present value of $1 at 9 percent simple interest.
[2] Present value of $1 at 10 percent compounded semiannually.

(3) Instructions for Table I. Table I is the basic present value table, and may be used for computing the present value of any payment or payments regardless of the amount of the payments or the interval the payments are deferred. The present value of a payment is computed under Table I as follows:

(i) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of months the payment under the contract is deferred; and

(ii) Multiply the amount of the payment by the factor determined under subdivision (i) of this subparagraph.

For example, the present value, using a rate of 4 percent per annum simple interest, of a payment of $1,000 due 3 years (36 months) from the date of sale is $892.86 ($1,000×0.89286 (factor for 33 to 39 months, col. (a), Table I)).

(4) Instructions for Table II. (i) Table II shows the present value of a series of equal deferred payments due at 6-month intervals. For purposes of determining whether the payments under a contract are due at 6-month intervals and whether such payments are equal in amount, a payment shall be treated as due on the nearest date (to the date such payment is actually due under the contract) which marks a 6-month interval from the date of the sale or exchange. For example, a payment due 13 months, 14 months, or exactly 15 months from the date of sale would be treated as due 12 months from such date, and a payment due 15 months and 1 day, 16 months, or 17 months from the date of sale would be treated as due 18 months from such date. In the case of a

payment due 6 months or less from the date of the sale or exchange, see subdivision (iii) of this subparagraph.

(ii) Table II may be used, without adjustment, for computing the present value of a series of equal payments, under a contract under which the first payment is actually due more than 6 months but not more than 9 months from the date of the sale or exchange, and all payments thereafter are due at regular 6-month intervals with respect to the date of the first payment (all such payments being treated under the rule of subdivision (i) of this subparagraph as due on the nearest date which marks a 6-month interval from the date of the sale or exchange). The present value of such a series of equal payments is computed under Table II as follows:

(a) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred; and

(b) Multiply the amount of a single payment under the contract by the factor determined under (a) of this subdivision.

For example, the present value, using a rate of 4 percent per annum simple interest, of a series of eight $1,000 payments, the first payment being due 7 months from the date of sale, and the remaining seven payments being due, respectively, every 6 months thereafter (so that under the rule of subdivision (i) of this subparagraph the final payment is deferred 4 years), is $7,352.47 ($1,000×7.35247 (factor for 4 years, col. (a), Table II)).

(iii) Table II may also be used, with adjustment, for computing the present value of a series of equal payments under a contract under which the first payment is actually due not more than 6 months from the date of the sale or exchange, and all payments thereafter are due at regular 6-month intervals with respect to the date of the first payment (all such payments being treated under the rule of subdivision (i) of this subparagraph as due on the nearest date which marks a 6-month interval from the date of the sale or exchange), provided that no payment is actually due (before application of subdivision (i) of this subparagraph) more than 6 months but not more than 9 months from the date of the sale or exchange. The present value of such a series of equal payments is computed under Table II as follows:

(a) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred;

(b) Adjust the factor determined under (a) of this subdivision by increasing such factor either by 0.01961 (1 minus the column (a) factor for deferral of payment for 0.5 years; in this case 0.98039) if the present value computation is made under column (a), or by 0.02439 (1 minus the column (b) factor for the deferral of payment for 0.5 years; in this case 0.97561) if the present value computation is made under column (b); and

(c) Multiply the amount of a single payment under the contract by the adjusted factor determined under (b) of this subdivision.

For example, the present value, using a rate of 4 percent per annum simple interest, of a series of eight $1,000 payments, the first payment being due exactly 6 months from the date of sale, and the remaining seven payments being due, respectively every 6 months thereafter (so that under the rule of subdivision (i) of this subparagraph the final payment is deferred 4 years), is $7,372.08 ($1,000×7.35247 plus 0.01961).

(iv) Table II may also be used, with adjustment, for computing the present value of a series of equal payments under a contract under which the first payment is due more than 6 months from the date of the sale or exchange and is due on the anniversary (that is, the exact multiple of a 6-month interval) of the date of the sale or exchange, and all payments thereafter are due at regular 6-month intervals with respect to the date of the first payment (all such payments being treated under the rule of subdivision (i) of this subparagraph as due on the nearest date which marks a 6-month interval from the date of the sale or exchange). The present value of such a series of equal payments is computed as follows:

(a) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred;

(b) Multiply the amount of a single payment under the contract by the factor determined under (a) of this subdivision;

(c) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the 6-month period immediately preceding the 6-month period in which the initial payment under the contract is due;

(d) Multiply the amount of a single payment under the contract by the factor determined under (c) of this subdivision; and

(e) Subtract the amount determined under (d) of this subdivision from the amount determined under (b) of this subdivision to obtain the present value.

For example, Table II may be used to compute the present value, using a rate of 4 percent per annum simple interest, of a series of eight $1,000 payments, the first payment being due exactly 12 months from the date of sale, and the remaining seven payments being due, respectively, every 6 months thereafter (so that under the rule of subdivision (i) of this subparagraph the final payment is deferred 4.5 years). Such computation, including the adjustment, is made as follows:

$1,000 × 8.19993 (factor for 4.5 years, col. (a), Table II)	$8,199.93
Less adjustment: $1,000 × 0.98039 (factor for 0.5 year, col. (a), Table II)	980.39
Present value	7,219.54

(5) Instructions for Table III. (i) Table III shows the present value of a series of equal deferred payments due at 12-month intervals with respect to the date of the sale or exchange. For purposes of determining whether the payments under a contract are due at 12-month intervals and whether such payments are equal in amount, a payment shall be treated as due on the nearest date (to the date such payment is actually due under the contract) which marks a 6-month interval from the date of the sale or exchange. For example, a payment due 13 months, 14 months, or exactly 15 months from the date of sale would be treated as due 12 months from such date, and a payment due 21 months and 1 day, 22 months, or 23 months from the date of sale would be treated as due 24 months from such date.

(ii) Table III may be used, without adjustment, for computing the present value of a series of equal payments, under a contract under which the first payment is actually due more than 9 months but not more than 15 months from the date of the sale or exchange, and all payments thereafter are due at regular 12-month intervals with respect to the date of the first payment (all such payments being treated under the rule of subdivision (i) of this subparagraph or due on the nearest date which marks a 6-month interval from the date of the sale or exchange). The present value of such a series of equal payments is computed under Table III as follows:

(a) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred; and

(b) Multiply the amount of a single payment under the contract by the factor determined under (a) of this subdivision.

For example, the present value, using an interest rate of 5 percent per annum compounded semiannually of a series of eight $1,000 payments, the first payment being due 12 months from the date of sale, and the remaining seven payments being due, respectively, every 12 months thereafter (so that under the rule of subdivision (i) of this subparagraph the final payment is deferred 8 years) is $6,446.91 ($1,000×6.44691 (factor for 8 years, col. (b), Table III)).

(iii) Table III may also be used, with adjustment, for computing the present value of a series of equal payments under a contract in which the first payment is due more than 12 months from the date of the sale or exchange and is due on the anniversary (that is, the exact multiple of a 12-month interval) of the date of the sale or exchange, and all payments thereafter are due at regular 12-month intervals with respect to the date of the first payment (all such payments being treated under the rule of subdivision (i) of this subparagraph as due on the nearest date which marks a 6-month interval from the date of the sale or exchange). The present value of such a series of equal payments is computed under Table III as follows:

(a) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred;

(b) Multiply the amount of a single payment under the contract by the factor determined under (a) of this subdivision;

(c) Determine the factor contained in the applicable present value column (that is, col. (a) or col. (b)) for the year immediately preceding the year in which the initial payment under the contract is due;

(d) Multiply the amount of a single payment under the contract by the factor determined under (c) of this subdivision; and

(e) Subtract the amount determined under (d) of this subdivision from the amount determined under (b) of this subdivision to obtain the present value.

For example, Table III may be used to compute the present value, using an interest rate of 5 percent, compounded semiannually, of a series of eight $1,000 payments, the first payment being due

exactly 3 years from the date of sale, and the remaining seven payments being due, respectively, every 12 months thereafter (so that under the rule of subdivision (i) of this subparagraph the final payment is deferred 10 years). Such computation, including the adjustment, is made as follows:

$1,000 × 7.69335 (factor for 10 years, col. (b), Table III)	$7,698.35
Less adjustment: $1,000 × 1.85777 (factor for 2 years, col. (b), Table III)	1,857.77
Present value	5,840.58

If, in the preceding example, the first payment had been due 3½ years (instead of 3 years) from the date of sale, the method of computation described could not be used and Table I should be used for the present value computation.

(6) **Instructions for Table IV.** In general, the instructions for Table I are applicable to Table IV, taking into account the change in the rate of imputed interest for contracts entered into after July 23, 1975, and before July 1, 1981, to which paragraphs (c)(2)(ii)(B) and (d)(1)(ii)(B) of this section apply.

(7) **Instructions for Table V.** (i) In general, the instructions for Table II are applicable to Table V, taking into account the change in the rate of imputed interest for contracts entered into after July 23, 1975, and before July 1, 1981, to which paragraphs (c)(2)(ii)(B) and (d)(1)(ii)(B) of this section apply.

(ii) Notwithstanding the preceding subdivision, where a contract entered into after July 23, 1975, and before July 1, 1981, is otherwise described in paragraph (g)(4)(iii) of this section, then the present value of a series of equal payments described in that subsection shall be computed under Table V as follows:

(a) Determine the factor contained in the applicable present rate column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred;

(b) Adjust the factor determined under (a) of this subdivision by increasing such factor either by 0.02913 (1 minus the column (a) factor for deferral of payment for 0.5 years; in this case 0.97087) if the present value computation is made under column (a), or by 0.03382 (1 minus the column (b) factor for deferral of payment for 0.5 years; in this case 0.96618) if the present value computation is made under column (b); and

(c) Multiply the amount of a single payment under the contract by the adjusted factor determined under paragraph (g)(7)(ii)(b) of this section.

For example, the present value, using a rate of 6 percent per annum simple interest, of a series of eight $1,000 payments, the first payment being due exactly 6 months from the date of sale, and the remaining seven payments being due, respectively every 6 months thereafter (so that under the rule of paragraph (g)(7)(i) of this section the final payment is deferred 4 years), is $7,103.62 ($1,000×(7.07449 plus 0.02913)).

(8) **Instructions for Table VI.** In general, the instructions for Table III are applicable to Table VI, taking into account the change in the rate of imputed interest for contracts entered into after July 23, 1975, and before July 1, 1981, to which paragraphs (c)(2)(ii)(B) and (d)(1)(ii)(B) of this section apply.

(9) **Instructions for Table VII.** In general, the instructions for Table I are applicable to Table VII, taking into account the change in the rate of imputed interest for contracts entered into on or after July 1, 1981, to which paragraphs (c)(2)(ii)(C) and (d)(1)(ii)(C) of this section apply.

(10) **Instructions for Table VIII.** (i) In general, the instructions for Table II are applicable to Table VIII, taking into account the change in the rate of imputed interest for contracts entered into on or after July 1, 1981, to which paragraphs (c)(2)(ii)(C) and (d)(1)(ii)(C) of this section apply.

(ii) Notwithstanding the preceding subdivision, where a contract entered into on or after July 1, 1981, is otherwise described in paragraph (g)(4)(iii) of this section, then the present value of a series of equal payments described in that subsection shall be computed under Table VIII as follows:

(a) Determine the factor contained in the applicable present rate column (that is, col. (a) or col. (b)) for the appropriate number of years the final payment under the contract is deferred;

(b) Adjust the factor determined under (a) of this subdivision by increasing such factor either by .04306 (1 minus the column (a) factor for deferral of payment for 0.5 years; in this case .95694) if the present value computation is made under column (a), or by .04762 (1 minus the column (b) factor for deferral of payment for 0.5 years; in this case .95238) if the present value computation is made under column (b); and

(c) Multiply the amount of a single payment under the contract by the adjusted factor determined under paragraph (g)(10)(ii) of this section.

For example, the present value, using a rate of 9 percent per annum simple interest, of a series of

eight $1,000 payments, the first payment being due exactly 6 months from the date of sale and the remaining seven payments being due, respectively, every 6 months thereafter (so that under the rule of paragraph (g)(10)(i) of this section the final payment is deferred 4 years), is $6,745.43 ($1,000 × (6.70237 plus .04306)).

(11) Instructions for Table IX. In general, the instructions for Table III are applicable to Table IX, taking into account the change in the rate of imputed interest for contracts entered into on or after July 1, 1981, to which paragraphs (c)(2)(ii)(C) and (d)(1)(ii)(C) of this section apply.
[T.D. 6873, 31 FR 942, Jan. 25, 1966; 31 FR 2427, Feb. 5, 1966, as amended by T.D. 7164, 36 FR 24997, Dec. 28, 1971; T.D. 7394, 41 FR 1281, Jan. 7, 1976; 41 FR 2642, Jan. 19, 1976; T.D. 7781, 46 FR 34570, July 2, 1981]

§ 1.483–2 Treatment as interest for purposes of Code; exceptions and limitations to application of section 483.

(a) Treatment as interest for purposes of Code—(1) Effect on income, deductions, basis, etc.—(i) In general. Generally, a contract under which there is total unstated interest (within the meaning of section 483(a)) shall be treated as if such interest were actually provided for in the contract, and such unstated interest shall constitute interest for all purposes of the Code. Thus, for example, except as provided in paragraph (b)(1) of this section, in the case of a sale of property, total unstated interest shall not be treated as part of the selling price of such property. Unless unstated interest is charged to the capital account under section 266 (relating to carrying charges), the basis to the purchaser of property sold or exchanged shall not include any amount treated by the purchaser as total unstated interest under the contract pursuant to section 483. For rules relating to the effect on basis of a change in the terms of the contract, see paragraph (f)(3) of § 1.483–1.

(ii) Cash and accrual method of reporting unstated interest income and deductions. Any amount treated as interest under section 483 by the seller shall be included as interest income for the taxable year in which the payment is received in the case of a cash method taxpayer and for the taxable year in which the payment is due in the case of an accrual method taxpayer. Any amount treated as interest under section 483 by the purchaser shall (if otherwise allowable) be deducted as interest for the taxable year in which the payment is made in the case of a cash method taxpayer and for the taxable year in which the payment is due in the case of an accrual method taxpayer. Notwithstanding the rules of this subdivision with respect to unstated interest, interest which is stated in the contract shall be treated in accordance with the rules of the Code otherwise applicable. For rules relating to defaults, see paragraph (f)(1) of § 1.483–1.

(iii) Example. The provisions of subdivision (ii) of this subparagraph may be illustrated by the following example:

Example. On December 31, 1963, A, a calendar year accrual method taxpayer, sells property to B, a calendar year cash method taxpayer, under a contract which provides that B is to make three payments of $2,000 each, such payments being due, respectively, as of December 31, 1966, 1967, and 1968. No interest is provided for in the contract. Assume that the total unstated interest under the contract is $1,071.50 and that the portion of each payment which is treated as interest is $357.17. B makes the first two payments on time, but the third payment is not made until January 31, 1969. For 1964 and 1965, A does not include, nor does B deduct, any amount as interest with respect to the contract. For 1966 and 1967, A includes $357.17 each year as interest income and B deducts the same amount each year as an interest expense. For 1968, A includes $357.17 as accrued interest income but B is not entitled to an interest deduction. For 1969, B may deduct $357.17 as an interest expense with respect to the contract.

(2) Other effects of treating portion of sales price as unstated interest. This subparagraph sets forth some illustrations of the effects of treating a portion of the sales price as unstated interest. These illustrations are not all-inclusive. The treatment as unstated interest under section 483 of a portion of a payment which would otherwise be treated as part of the sales price may have the effect of increasing the amount of a nondeductible loss because of the application of section 165(c) (relating to limitation on losses of individuals) or of an unallowable deduction because of section 267 (relating to losses, expenses, and interest with respect to transactions between related taxpayers), or of changing the character of gains and losses or increasing the amount of an allowable loss under section 1231 (relating to property used in the trade or business). Such treatment may affect eligibility to use the installment method of accounting under section 453(b)(2) (relating to limitation on installment method), except that section 483 shall have no effect in determining whether payments received prior to January 1, 1964, in the taxable year of sale exceed 30 percent of the selling price of the property. Furthermore, the application of section 483 may affect the treatment of a stock option under part II, subchapter D, chapter 1 of the Code, except that section 483 shall have no effect in determining whether options granted prior to January 1, 1965, meet the requirements of section 422(b)(4), 423(b)(6), 424(b)(1), or 424(c).

Amounts treated as unstated interest under section 483 may, if otherwise qualified under section 266 (relating to carrying charges), be charged to the capital account. The treatment of any portion of voting stock as interest under section 483 will not prevent an otherwise eligible acquisition from qualifying as a reorganization under section 368(a)(1) (relating to definitions of corporate reorganizations), although the payment of cash or property other than voting stock will prevent certain acquisitions from so qualifying. See section 368(a)(1)(B) and (C) and the regulations thereunder for rules relating to the extent to which voting stock must be exchanged by the acquiring corporation in certain reorganizations. Unstated interest shall be treated as interest for purposes of applying the source rules contained in section 861(a)(1) (relating to income from sources within the United States) and section 862(a)(1) (relating to income from sources without the United States), and for purposes of computing the amount of personal holding company income under section 543 (relating to personal holding company income) and section 1372(e)(5) (relating to election by a small business corporation).

(b) Exceptions and limitations to the application of section 483—(1) Sales price of $3,000 or less—(i) Determination of sales price. Section 483 shall not apply to any payment on account of the sale or exchange of property if it can be determined at the time of such sale or exchange that the sales price cannot exceed $3,000. For purposes of determining the amount of the sales price, the amount of any downpayment and any amount treated as unstated interest under section 483 shall be included, but interest provided for in the contract shall not be included. If property which is encumbered by a liability is sold or exchanged, the amount of the liability (whether the property is merely taken subject to the liability or whether the liability is assumed by the purchaser) shall be included as a part of the sales price. The $3,000 exception provided by this subparagraph does not apply to a contract under which payments are indefinite as to liability or amount if the total of the payments (exclusive of interest specified in the contract) due under the contract could exceed $3,000, notwithstanding that such payments do not subsequently exceed such amount. If the district director ascertains from the surrounding facts and circumstances that a single transaction with a sales price in excess of $3,000 has been fragmented into more than one separate transaction each with a sales price less than $3,000 in order to avoid the operation of the provisions of section 483, he may determine that section 483 applies.

(ii) Examples. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). On December 31, 1963, A sells property to B under a contract which provides that B is to make four payments of $700 each, such payments being due, respectively, every 6 months for the next 2 years. No interest is provided for in the contract. Since the total sales price ($2,800) under the contract is not in excess of $3,000, section 483 does not apply.

Example (2). On December 31, 1963, A sells property to B under a contract which provides that B is to make four payments as follows: $721 ($700 principal plus $21 interest), $742 ($700 principal plus $42 interest), $763 ($700 principal plus $63 interest), and $784 ($700 principal plus $84 interest), such payments being due, respectively, every 6 months for the next 2 years. Since the total sales price ($2,800) exclusive of stated interest ($210) does not exceed $3,000, section 483 does not apply, even though the total dollar amount of the contract, including both principal and stated interest ($3,010), exceeds $3,000.

Example (3). On December 31, 1963, A sells property to B under a contract which provides that B is to make three payments of $800 each, such payments being due June 30, 1964, December 31, 1964, and June 30, 1965. A fourth payment of $800 is to be made on December 31, 1965, but only if the profit derived from the property exceeds an amount specified in the contract. No interest is provided for in the contract. Section 483 applies to the contract even though the three definite payments ($2,400) do not exceed $3,000, because the total payments due under the contract could exceed such amount. Furthermore, section 483 applies even though, subsequently, the profit derived from the property does not exceed the amount specified in the contract, so that only $2,400 is actually paid under the contract.

Example (4). A divides a 100 acre tract of unimproved real property into four equal parcels and sells them to B under four separate contracts dated, respectively, December 31, 1963, January 31, 1964, February 29, 1964, and March 30, 1964. Each contract provides for payments of $1,000 at the time of sale and $1,000 at the end of 1 year. No interest is provided in any of the contracts. The district director may determine that section 483 applies to the four contracts if he ascertains that a single transaction with a sales price in excess of $3,000 has been fragmented into four separate transactions each with a sales price less than $3,000 in order to avoid the operation of the provisions of section 483.

(2) Carrying charges. In the case of the purchaser, the tax treatment of amounts paid on account of the sale or exchange of property shall be determined without regard to section 483 if such amounts are treated under section 163(b) (relating to deduction for interest on certain installment purchases) as if they included interest. Accordingly, if the provisions of section 163(b) apply to a contract, the purchaser shall, with respect to payments under the contract, compute his interest deductions under that section (without regard to section 483), even though such amount differs from the amount to be treated as interest

income by the seller as computed under the provisions of section 483.

(3) Capital asset or section 1231 property—(i) Treatment of seller. In the case of the seller, the determination of the tax treatment of any amounts received on account of the sale or exchange of property shall be made without regard to section 483 if no part of any gain on such sale or exchange would (if the property were sold at a gain) be considered as gain from the sale or exchange of a capital asset or property described in section 1231 (relating to property used in the trade or business and involuntary conversions). The determination of whether the exception of the preceding sentence applies shall be made without regard to whether any gain or loss is realized on the sale or exchange, whether any realized gain or loss would be recognized, or whether some other provision of law, such as section 1245 (relating to gain from dispositions of certain depreciable property) or section 1250 (relating to gain from dispositions of certain depreciable realty) applies, or would apply, to some or all of the gain. For example, the provisions of section 483 apply to deferred payments of stock or securities by a corporation which is a party to a reorganization, notwithstanding that under section 354(a) no gain or loss is recognized on the transaction. Similarly, the provisions of section 483 apply to deferred payments made to a corporation for its stock, notwithstanding the nonrecognition of gain or loss to the corporation under section 1032 (relating to exchange of stock for property).

(ii) Treatment of purchaser. The purchaser under a contract under which there are payments to which section 483 applies shall determine the amount of any interest deduction under such section, notwithstanding that section 483 does not apply to the seller because of the provisions of subdivision (i) of this subparagraph.

(4) Sales or exchanges of patents. Section 483 does not apply to any payments made pursuant to a transfer described in section 1235(a) (relating to sale or exchange of patents). The preceding sentence does not apply to transfers which are not described in section 1235(a) but which receive capital gain treatment under another section of the Code.

(5) Annuities. Section 483 does not apply to any amount the liability for which depends in whole or in part on the life expectancy of one or more individuals and which constitutes an amount received as an annuity to which section 72 (relating to annuities, etc.) applies. Thus, in the case of both the purchaser and the seller, any such amount is not considered a payment to which section 483 applies.

[T.D. 6873, 31 FR 952, Jan. 25, 1966]

§ 1.483–2T Adequate stated interest for certain contracts entered into after February 28, 1985 (temporary).

A contract entered into after February 28, 1985, to which section 483 applies shall not be treated as having unstated interest provided that the contract would not have unstated interest if, in lieu of the applicable Federal rate computed under the statutory method of section 1274(d), there were substituted the lowest of—

(a) The applicable Federal rate computed under the alternate method set forth in § 1.1274–6T for the month for which the determination is being made;

(b) The applicable Federal rate computed under the alternate method for the month preceding the month for which the determination is being made; or

(c) The applicable Federal rate computed under the alternate method for the second month preceding the month for which the determination is being made.

The rates described in paragraphs (b) and (c) of this section do not apply in determining total unstated interest under section 483(b). For illustrations of the application of this section, see § 1.1274–3T(b).

[T.D. 8010, 50 FR 6938, Feb. 19, 1985]

EXEMPT ORGANIZATIONS

General Rule

§ 1.501(a)–1 Exemption from taxation.

(a) In general; proof of exemption. (1) Section 501(a) provides an exemption from income taxes for organizations which are described in section 501(c) or (d) and section 401(a), unless such organization is a "feeder organization" (see section

502), or unless it engages in a transaction described in section 503. However, the exemption does not extend to "unrelated business taxable income" of such an organization (see part III (Section 511 and following), subchapter F, chapter 1 of the Code).

(2) An organization, other than an employees' trust described in section 401(a), is not exempt from tax merely because it is not organized and operated for profit. In order to establish its exemption, it is necessary that every such organization claiming exemption file an application form as set forth below with the district director for the internal revenue district in which is located the principal place of business or principal office of the organization. Subject only to the Commissioner's inherent power to revoke rulings because of a change in the law or regulations or for other good cause, an organization that has been determined by the Commissioner or the district director to be exempt under section 501(a) or the corresponding provision of prior law may rely upon such determination so long as there are no substantial changes in the organization's character, purposes, or methods of operation. An organization which has been determined to be exempt under the provisions of the Internal Revenue Code of 1939 or prior law is not required to secure a new determination of exemption merely because of the enactment of the Internal Revenue Code of 1954 unless affected by substantive changes in law made by such Code.

(3) An organization claiming exemption under section 501(a) and described in any paragraph of section 501(c) other than section 501(c)(1) shall file the form of application prescribed by the Commissioner and shall include thereon such information as required by such form and the instructions issued with respect thereto. For rules relating to the obtaining of a determination of exempt status by an employees' trust described in section 401(a), see the regulations under section 401.

(b) Additional proof by particular classes of organizations. (1) Organizations mentioned below shall submit with and as a part of their applications the following information:

(i) Mutual insurance companies shall submit copies of the policies or certificates of membership issued by them.

(ii) In the case of title holding companies described in section 501(c)(2), if the organization for which title is held has not been specifically notified in writing by the Internal Revenue Service that it is held to be exempt under section 501(a), the title holding company shall submit the information indicated herein as necessary for a determination of the status of the organization for which title is held.

(iii) An organization described in section 501(c)(3) shall submit with, and as a part of, an application filed after July 26, 1959, a detailed statement of its proposed activities.

(2) In addition to the information specifically called for by this section, the Commissioner may require any additional information deemed necessary for a proper determination of whether a particular organization is exempt under section 501(a), and when deemed advisable in the interest of an efficient administration of the internal revenue laws, he may in the cases of particular types of organizations prescribe the form in which the proof of exemption shall be furnished.

(3) An organization claiming to be specifically exempted by section 6033(a) from filing annual returns shall submit with and as a part of its application a statement of all the facts on which it bases its claim.

(c) "Private shareholder or individual" defined. The words "private shareholder or individual" in section 501 refer to persons having a personal and private interest in the activities of the organization.

(d) Requirement of annual returns. For the annual return requirements of organizations exempt under section 501(a), see section 6033 and § 1.6033–1.

(e) Certain Puerto Rican pension, etc., trusts. Effective for taxable years beginning after December 31, 1973, section 1022(i)(1) of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 942) provides that trusts under certain Puerto Rican pension, etc., plans (as defined under P.R. Laws Ann. tit. 13, section 3165, and the articles thereunder), all of the participants of which are residents of the Commonwealth of Puerto Rico, are to be treated only for purposes of section 501(a) as trusts described in section 401(a). The practical effect of section 1022(i)(1) is to exempt these trusts from U.S. income tax on income from their U.S. investments. For purposes of section 1022(i)(1), the term "residents of the Commonwealth of Puerto Rico" means bona fide residents of Puerto Rico, and persons who perform labor or services primarily within the Commonwealth of Puerto Rico, regardless of residence for other purposes, and the term "participants" is

restricted to current employees who are not excluded under the eligibility provisions of the plan.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6972, 33 FR 12899, Sept. 12, 1968; T.D. 7428, 41 FR 34619, Aug. 16, 1976; T.D. 7859, 47 FR 54298, Dec. 2, 1982]

§ 1.501(c)(2)–1 Corporations organized to hold title to property for exempt organizations.

(a) A corporation described in section 501(c)(2) and otherwise exempt from tax under section 501(a) is taxable upon its unrelated business taxable income. For taxable years beginning before January 1, 1970, see § 1.511–2(c)(4). Since a corporation described in section 501(c)(2) cannot be exempt under section 501(a) if it engages in any business other than that of holding title to property and collecting income therefrom, it cannot have unrelated business taxable income as defined in section 512 other than income which is treated as unrelated business taxable income solely because of the applicability of section 512(a)(3)(C); or debt financed income which is treated as unrelated business taxable income solely because of section 514; or certain interest, annuities, royalties, or rents which are treated as unrelated business taxable income solely because of section 512(b)(3)(B)(ii) or (13). Similarly, exempt status under section 501(c)(2) shall not be affected where certain rents from personal property leased with real property are treated as unrelated business taxable income under section 512(b)(3)(A)(ii) solely because such rents attributable to such personal property are more than incidental when compared to the total rents received or accrued under the lease, or under section 512(b)(3)(B)(i) solely because such rents attributable to such personal property exceed 50 percent of the total rents received or accrued under the lease.

(b) A corporation described in section 501(c)(2) cannot accumulate income and retain its exemption, but it must turn over the entire amount of such income, less expenses, to an organization which is itself exempt from tax under section 501(a).
[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7658, 45 FR 33972, May 21, 1980]

§ 1.501(c)(3)–1 Organizations organized and operated for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals.

(a) Organizational and operational tests. (1) In order to be exempt as an organization described in section 501(c)(3), an organization must be both organized and operated exclusively for one or more of the purposes specified in such section. If an organization fails to meet either the organizational test or the operational test, it is not exempt.

(2) The term "exempt purpose or purposes", as used in this section, means any purpose or purposes specified in section 501(c)(3), as defined and elaborated in paragraph (d) of this section.

(b) Organizational test—(1) In general. (i) An organization is organized exclusively for one or more exempt purposes only if its articles of organization (referred to in this section as its "articles") as defined in subparagraph (2) of this paragraph:

(a) Limit the purposes of such organization to one or more exempt purposes; and

(b) Do not expressly empower the organization to engage, otherwise than as an insubstantial part of its activities, in activities which in themselves are not in furtherance of one or more exempt purposes.

(ii) In meeting the organizational test, the organization's purposes, as stated in its articles, may be as broad as, or more specific than, the purposes stated in section 501(c)(3). Therefore, an organization which, by the terms of its articles, is formed "for literary and scientific purposes within the meaning of section 501(c)(3) of the Code" shall, if it otherwise meets the requirements in this paragraph, be considered to have met the organizational test. Similarly, articles stating that the organization is created solely "to receive contributions and pay them over to organizations which are described in section 501(c)(3) and exempt from taxation under section 501(a)" are sufficient for purposes of the organizational test. Moreover, it is sufficient if the articles set for the purpose of the organization to be the operation of a school for adult education and describe in detail the manner of the operation of such school. In addition, if the articles state that the organization is formed for "charitable purposes", such articles ordinarily shall be sufficient for purposes of the organizational test (see subparagraph (5) of this paragraph for rules relating to construction of terms).

(iii) An organization is not organized exclusively for one or more exempt purposes if its articles expressly empower it to carry on, otherwise than as an insubstantial part of its activities, activities which are not in furtherance of one or more

exempt purposes, even though such organization is, by the terms of such articles, created for a purpose that is no broader than the purposes specified in section 501(c)(3). Thus, an organization that is empowered by its articles "to engage in a manufacturing business", or "to engage in the operation of a social club" does not meet the organizational test regardless of the fact that its articles may state that such organization is created "for charitable purposes within the meaning of section 501(c)(3) of the Code."

(iv) In no case shall an organization be considered to be organized exclusively for one or more exempt purposes, if, by the terms of its articles, the purposes for which such organization is created are broader than the purposes specified in section 501(c)(3). The fact that the actual operations of such an organization have been exclusively in furtherance of one or more exempt purposes shall not be sufficient to permit the organization to meet the organizational test. Similarly, such an organization will not meet the organizational test as a result of statements or other evidence that the members thereof intend to operate only in furtherance of one or more exempt purposes.

(v) An organization must, in order to establish its exemption, submit a detailed statement of its proposed activities with and as a part of its application for exemption (see paragraph (b) of § 1.501(a)–1).

(2) Articles of organization. For purposes of this section, the term "articles of organization" or "articles" includes the trust instrument, the corporate charter, the articles of association, or any other written instrument by which an organization is created.

(3) Authorization of legislative or political activities. An organization is not organized exclusively for one or more exempt purposes if its articles expressly empower it—

(i) To devote more than an insubstantial part of its activities to attempting to influence legislation by propaganda or otherwise; or

(ii) Directly or indirectly to participate in, or intervene in (including the publishing or distributing of statements), any political campaign on behalf of or in opposition to any candidate for public office; or

(iii) To have objectives and to engage in activities which characterize it as an "action" organization as defined in paragraph (c)(3) of this section. The terms used in subdivisions (i), (ii), and (iii) of this subparagraph shall have the meanings provided in paragraph (c)(3) of this section.

(4) Distribution of assets on dissolution. An organization is not organized exclusively for one or more exempt purposes unless its assets are dedicated to an exempt purpose. An organization's assets will be considered dedicated to an exempt purpose, for example, if, upon dissolution, such assets would, by reason of a provision in the organization's articles or by operation of law, be distributed for one or more exempt purposes, or to the Federal Government, or to a State or local government, for a public purpose, or would be distributed by a court to another organization to be used in such manner as in the judgment of the court will best accomplish the general purposes for which the dissolved organization was organized. However, an organization does not meet the organizational test if its articles or the law of the State in which it was created provide that its assets would, upon dissolution, be distributed to its members or shareholders.

(5) Construction of terms. The law of the State in which an organization is created shall be controlling in construing the terms of its articles. However, any organization which contends that such terms have under State law a different meaning from their generally accepted meaning must establish such special meaning by clear and convincing reference to relevant court decisions, opinions of the State attorney-general, or other evidence of applicable State law.

(6) Applicability of the organizational test. A determination by the Commissioner or a district director that an organization is described in section 501(c)(3) and exempt under section 501(a) will not be granted after July 26, 1959 (regardless of when the application is filed), unless such organization meets the organizational test prescribed by this paragraph. If, before July 27, 1959, an organization has been determined by the Commissioner or district director to be exempt as an organization described in section 501(c)(3) or in a corresponding provision of prior law and such determination has not been revoked before such date, the fact that such organization does not meet the organizational test prescribed by this paragraph shall not be a basis for revoking such determination. Accordingly, an organization which has been determined to be exempt before July 27, 1959, and which does not seek a new determination of exemption is not required to amend its articles of organization to conform to the rules of this paragraph, but any organization which seeks a

determination of exemption after July 26, 1959, must have articles of organization which meet the rules of this paragraph. For the rules relating to whether an organization determined to be exempt before July 27, 1959, is organized exclusively for one or more exempt purposes, see 26 CFR (1939) 39.101(6)–1 (Regulations 118) as made applicable to the Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167; C.B. 1954–2, 47).

(c) Operational test—(1) Primary activities. An organization will be regarded as "operated exclusively" for one or more exempt purposes only if it engages primarily in activities which accomplish one or more of such exempt purposes specified in section 501(c)(3). An organization will not be so regarded if more than an insubstantial part of its activities is not in furtherance of an exempt purpose.

(2) Distribution of earnings. An organization is not operated exclusively for one or more exempt purposes if its net earnings inure in whole or in part to the benefit of private shareholders or individuals. For the definition of the words "private shareholder or individual", see paragraph (c) of § 1.501(a)–1.

(3) "Action" organizations. (i) An organization is not operated exclusively for one or more exempt purposes if it is an "action" organization as defined in subdivisions (ii), (iii), or (iv) of this subparagraph.

(ii) An organization is an "action" organization if a substantial part of its activities is attempting to influence legislation by propaganda or otherwise. For this purpose, an organization will be regarded as attempting to influence legislation if the organization—

(a) Contacts, or urges the public to contact, members of a legislative body for the purpose of proposing, supporting, or opposing legislation; or

(b) Advocates the adoption or rejection of legislation.

The term "legislation", as used in this subdivision, includes action by the Congress, by any State legislature, by any local council or similar governing body, or by the public in a referendum, initiative, constitutional amendment, or similar procedure. An organization will not fail to meet the operational test merely because it advocates, as an insubstantial part of its activities, the adoption or rejection of legislation.

(iii) An organization is an "action" organization if it participates or intervenes, directly or indirectly, in any political campaign on behalf of or in opposition to any candidate for public office.

The term "candidate for public office" means an individual who offers himself, or is proposed by others, as a contestant for an elective public office, whether such office be national, State, or local. Activities which constitute participation or intervention in a political campaign on behalf of or in opposition to a candidate include, but are not limited to, the publication or distribution of written or printed statements or the making of oral statements on behalf of or in opposition to such a candidate.

(iv) An organization is an "action" organization if it has the following two characteristics: (a) Its main or primary objective or objectives (as distinguished from its incidental or secondary objectives) may be attained only by legislation or a defeat of proposed legislation; and (b) it advocates, or campaigns for, the attainment of such main or primary objective or objectives as distinguished from engaging in nonpartisan analysis, study, or research and making the results thereof available to the public. In determining whether an organization has such characteristics, all the surrounding facts and circumstances, including the articles and all activities of the organization, are to be considered.

(v) An "action" organization, described in subdivisions (ii) or (iv) of this subparagraph, though it cannot qualify under section 501(c)(3), may nevertheless qualify as a social welfare organization under section 501(c)(4) if it meets the requirements set out in paragraph (a) of § 1.501(c)(4)–1.

(d) Exempt purposes—(1) In general. (i) An organization may be exempt as an organization described in section 501(c)(3) if it is organized and operated exclusively for one or more of the following purposes:

(a) Religious,

(b) Charitable,

(c) Scientific,

(d) Testing for public safety,

(e) Literary,

(f) Educational, or

(g) Prevention of cruelty to children or animals.

(ii) An organization is not organized or operated exclusively for one or more of the purposes specified in subdivision (i) of this subparagraph unless it serves a public rather than a private

interest. Thus, to meet the requirement of this subdivision, it is necessary for an organization to establish that it is not organized or operated for the benefit of private interests such as designated individuals, the creator or his family, shareholders of the organization, or persons controlled, directly or indirectly, by such private interests.

(iii) Since each of the purposes specified in subdivision (i) of this subparagraph is an exempt purpose in itself, an organization may be exempt if it is organized and operated exclusively for any one or more of such purposes. If, in fact, an organization is organized and operated exclusively for an exempt purpose or purposes, exemption will be granted to such an organization regardless of the purpose or purposes specified in its application for exemption. For example, if an organization claims exemption on the ground that it is "educational", exemption will not be denied if, in fact, it is "charitable".

(2) Charitable defined. The term "charitable" is used in section 501(c)(3) in its generally accepted legal sense and is, therefore, not to be construed as limited by the separate enumeration in section 501(c)(3) of other tax-exempt purposes which may fall within the broad outlines of "charity" as developed by judicial decisions. Such term includes: Relief of the poor and distressed or of the underprivileged; advancement of religion; advancement of education or science; erection or maintenance of public buildings, monuments, or works; lessening of the burdens of Government; and promotion of social welfare by organizations designed to accomplish any of the above purposes, or (i) to lessen neighborhood tensions; (ii) to eliminate prejudice and discrimination; (iii) to defend human and civil rights secured by law; or (iv) to combat community deterioration and juvenile delinquency. The fact that an organization which is organized and operated for the relief of indigent persons may receive voluntary contributions from the persons intended to be relieved will not necessarily prevent such organization from being exempt as an organization organized and operated exclusively for charitable purposes. The fact that an organization, in carrying out its primary purpose, advocates social or civic changes or presents opinion on controversial issues with the intention of molding public opinion or creating public sentiment to an acceptance of its views does not preclude such organization from qualifying under section 501(c)(3) so long as it is not an "action" organization of any one of the types described in paragraph (c)(3) of this section.

(3) Educational defined—(i) In general. The term "educational", as used in section 501(c)(3), relates to—

(a) The instruction or training of the individual for the purpose of improving or developing his capabilities; or

(b) The instruction of the public on subjects useful to the individual and beneficial to the community.

An organization may be educational even though it advocates a particular position or viewpoint so long as it presents a sufficiently full and fair exposition of the pertinent facts as to permit an individual or the public to form an independent opinion or conclusion. On the other hand, an organization is not educational if its principal function is the mere presentation of unsupported opinion.

(ii) Examples of educational organizations. The following are examples of organizations which, if they otherwise meet the requirements of this section, are educational:

Example (1). An organization, such as a primary or secondary school, a college, or a professional or trade school, which has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where the educational activities are regularly carried on.

Example (2). An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or other similar programs. Such programs may be on radio or television.

Example (3). An organization which presents a course of instruction by means of correspondence or through the utilization of television or radio.

Example (4). Museums, zoos, planetariums, symphony orchestras, and other similar organizations.

(4) Testing for public safety defined. The term "testing for public safety", as used in section 501(c)(3), includes the testing of consumer products, such as electrical products, to determine whether they are safe for use by the general public.

(5) Scientific defined. (i) Since an organization may meet the requirements of section 501(c)(3) only if it serves a public rather than a private interest, a "scientific" organization must be organized and operated in the public interest (see subparagraph (1)(ii) of this paragraph). Therefore, the term "scientific", as used in section 501(c)(3), includes the carrying on of scientific research in the public interest. Research when taken alone is a word with various meanings; it is not synonymous with "scientific"; and the nature of particular research depends upon the purpose which it serves. For research to be "scientific", within the meaning of section 501(c)(3), it must be

carried on in furtherance of a "scientific" purpose. The determination as to whether research is "scientific" does not depend on whether such research is classified as "fundamental" or "basic" as contrasted with "applied" or "practical". On the other hand, for purposes of the exclusion from unrelated business taxable income provided by section 512(b)(9), it is necessary to determine whether the organization is operated primarily for purposes of carrying on "fundamental", as contrasted with "applied", research.

(ii) Scientific research does not include activities of a type ordinarily carried on as an incident to commercial or industrial operations, as, for example, the ordinary testing or inspection of materials or products or the designing or construction of equipment, buildings, etc.

(iii) Scientific research will be regarded as carried on in the public interest—

(a) If the results of such research (including any patents, copyrights, processes, or formulae resulting from such research) are made available to the public on a nondiscriminatory basis;

(b) If such research is performed for the United States, or any of its agencies or instrumentalities, or for a State or political subdivision thereof; or

(c) If such research is directed toward benefiting the public. The following are examples of scientific research which will be considered as directed toward benefiting the public, and, therefore, which will be regarded as carried on in the public interest: (1) Scientific research carried on for the purpose of aiding in the scientific education of college or university students; (2) scientific research carried on for the purpose of obtaining scientific information, which is published in a treatise, thesis, trade publication, or in any other form that is available to the interested public; (3) scientific research carried on for the purpose of discovering a cure for a disease; or (4) scientific research carried on for the purpose of aiding a community or geographical area by attracting new industry to the community or area or by encouraging the development of, or retention of, an industry in the community or area. Scientific research described in this subdivision will be regarded as carried on in the public interest even though such research is performed pursuant to a contract or agreement under which the sponsor or sponsors of the research have the right to obtain ownership or control of any patents, copyrights, processes, or formulae resulting from such research.

(iv) An organization will not be regarded as organized and operated for the purpose of carrying on scientific research in the public interest and, consequently, will not qualify under section 501(c)(3) as a "scientific" organization, if—

(a) Such organization will perform research only for persons which are (directly or indirectly) its creators and which are not described in section 501(c)(3), or

(b) Such organization retains (directly or indirectly) the ownership or control of more than an insubstantial portion of the patents, copyrights, processes, or formulae resulting from its research and does not make such patents, copyrights, processes, or formulae available to the public. For purposes of this subdivision, a patent, copyright, process, or formula shall be considered as made available to the public if such patent, copyright, process, or formula is made available to the public on a nondiscriminatory basis. In addition, although one person is granted the exclusive right to the use of a patent, copyright, process, or formula, such patent, copyright, process, or formula shall be considered as made available to the public if the granting of such exclusive right is the only practicable manner in which the patent, copyright, process, or formula can be utilized to benefit the public. In such a case, however, the research from which the patent, copyright, process, or formula resulted will be regarded as carried on in the public interest (within the meaning of subdivision (iii) of this subparagraph) only if it is carried on for a person described in subdivision (iii)(b) of this subparagraph or if it is scientific research described in subdivision (iii)(c) of this subparagraph.

(v) The fact that any organization (including a college, university, or hospital) carries on research which is not in furtherance of an exempt purpose described in section 501(c)(3) will not preclude such organization from meeting the requirements of section 501(c)(3) so long as the organization meets the organizational test and is not operated for the primary purpose of carrying on such research (see paragraph (e) of this section, relating to organizations carrying on a trade or business). See paragraph (a)(5) of § 1.513-2, with respect to research which constitutes an unrelated trade or business, and section 512(b)(7), (8), and (9), with respect to income derived from research which is excludable from the tax on unrelated business income.

(vi) The regulations in this subparagraph are applicable with respect to taxable years beginning after December 31, 1960.

(e) Organizations carrying on trade or business—(1) In general. An organization may meet the requirements of section 501(c)(3) although it operates a trade or business as a substantial part of its activities, if the operation of such trade or business is in furtherance of the organization's exempt purpose or purposes and if the organization is not organized or operated for the primary purpose of carrying on an unrelated trade or business, as defined in section 513. In determining the existence or nonexistence of such primary purpose, all the circumstances must be considered, including the size and extent of the trade or business and the size and extent of the activities which are in furtherance of one or more exempt purposes. An organization which is organized and operated for the primary purpose of carrying on an unrelated trade or business is not exempt under section 501(c)(3) even though it has certain religious purposes, its property is held in common, and its profits do not inure to the benefit of individual members of the organization. See, however, section 501(d) and § 1.501(d)–1, relating to religious and apostolic organizations.

(2) Taxation of unrelated business income. For provisions relating to the taxation of unrelated business income of certain organizations described in section 501(c)(3), see sections 511 to 515, inclusive, and the regulations thereunder.

(f) Applicability of regulations in this section. The regulations in this section are, except as otherwise expressly provided, applicable with respect to taxable years beginning after July 26, 1959. For the rules applicable with respect to taxable years beginning before July 27, 1959, see 26 CFR (1939) 39.101(6)–1 (Regulations 118) as made applicable to the Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167; C.B. 1954–2, 47).
[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6525, 26 FR 189, Jan. 11, 1961; T.D. 6939, 32 FR 17661, Dec. 12, 1967; T.D. 7428, 41 FR 34620, Aug. 16, 1976]

§ 1.501(c)(4)–1 Civic organizations and local associations of employees.

(a) Civic organizations—(1) In general. A civic league or organization may be exempt as an organization described in section 501(c)(4) if—

(i) It is not organized or operated for profit; and

(ii) It is operated exclusively for the promotion of social welfare.

(2) Promotion of social welfare—(i) In general. An organization is operated exclusively for the promotion of social welfare if it is primarily engaged in promoting in some way the common good and general welfare of the people of the community. An organization embraced within this section is one which is operated primarily for the purpose of bringing about civic betterments and social improvements. A "social welfare" organization will qualify for exemption as a charitable organization if it falls within the definition of "charitable" set forth in paragraph (d)(2) of § 1.501(c)(3)–1 and is not an "action" organization as set forth in paragraph (c)(3) of § 1.501(c)(3)–1.

(ii) Political or social activities. The promotion of social welfare does not include direct or indirect participation or intervention in political campaigns on behalf of or in opposition to any candidate for public office. Nor is an organization operated primarily for the promotion of social welfare if its primary activity is operating a social club for the benefit, pleasure, or recreation of its members, or is carrying on a business with the general public in a manner similar to organizations which are operated for profit. See, however, section 501(c)(6) and § 1.501(c)(6)–1, relating to business leagues and similar organizations. A social welfare organization may qualify under section 501(c)(4) even though it is an "action" organization described in paragraph (c)(3)(ii) or (iv) of § 1.501(c)(3)–1 if it otherwise qualifies under this section.

(b) Local associations of employees. Local associations of employees described in section 501(c)(4) are expressly entitled to exemption under section 501(a). As conditions to exemption, it is required (1) that the membership of such an association be limited to the employees of a designated person or persons in a particular municipality, and (2) that the net earnings of the association be devoted exclusively to charitable, educational, or recreational purposes. The word "local" is defined in paragraph (b) of § 1.501(c)(12)–1. See paragraph (d)(2) and (3) of § 1.501(c)(3)–1 with reference to the meaning of "charitable" and "educational" as used in this section.

§ 1.501(c)(5)–1 Labor, agricultural, and horticultural organizations.

(a) The organizations contemplated by section 501(c)(5) as entitled to exemption from income taxation are those which:

(1) Have no net earnings inuring to the benefit of any member, and

(2) Have as their objects the betterment of the conditions of those engaged in such pursuits, the improvement of the grade of their products, and the development of a higher degree of efficiency in their respective occupations.

(b) Organizations described in section 501(c)(5) and otherwise exempt from tax under section 501(a) are taxable upon their unrelated business taxable income. See part II (section 511 and following), subchapter F, chapter 1 of the Code, and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.501(c)(6)–1 Business leagues, chambers of commerce, real estate boards, and boards of trade.

A business league is an association of persons having some common business interest, the purpose of which is to promote such common interest and not to engage in a regular business of a kind ordinarily carried on for profit. It is an organization of the same general class as a chamber of commerce or board of trade. Thus, its activities should be directed to the improvement of business conditions of one or more lines of business as distinguished from the performance of particular services for individual persons. An organization whose purpose is to engage in a regular business of a kind ordinarily carried on for profit, even though the business is conducted on a cooperative basis or produces only sufficient income to be self-sustaining, is not a business league. An association engaged in furnishing information to prospective investors, to enable them to make sound investments, is not a business league, since its activities do not further any common business interest, even though all of its income is devoted to the purpose stated. A stock or commodity exchange is not a business league, a chamber of commerce, or a board of trade within the meaning of section 501(c)(6) and is not exempt from tax. Organizations otherwise exempt from tax under this section are taxable upon their unrelated business taxable income. See part II (section 511 and following), subchapter F, chapter 1 of the Code, and the regulations thereunder.

§ 1.501(c)(7)–1 Social clubs.

(a) The exemption provided by section 501(a) for organizations described in section 501(c)(7) applies only to clubs which are organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, but does not apply to any club if any part of its net earnings inures to the benefit of any private shareholder. In general, this exemption extends to social and recreation clubs which are supported solely by membership fees, dues, and assessments. However, a club otherwise entitled to exemption will not be disqualified because it raises revenue from members through the use of club facilities or in connection with club activities.

(b) A club which engages in business, such as making its social and recreational facilities available to the general public or by selling real estate, timber, or other products, is not organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, and is not exempt under section 501(a). Solicitation by advertisement or otherwise for public patronage of its facilities is prima facie evidence that the club is engaging in business and is not being operated exclusively for pleasure, recreation, or social purposes. However, an incidental sale of property will not deprive a club of its exemption.

§ 1.501(c)(8)–1 Fraternal beneficiary societies.

(a) A fraternal beneficiary society is exempt from tax only if operated under the "lodge system" or for the exclusive benefit of the members so operating. "Operating under the lodge system" means carrying on its activities under a form of organization that comprises local branches, chartered by a parent organization and largely self-governing, called lodges, chapters, or the like. In order to be exempt it is also necessary that the society have an established system for the payment to its members or their dependents of life, sick, accident, or other benefits.

(b) Revoked by: T.D. 7061, 35 FR 74770, Sept. 23, 1970.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7061, 35 FR 14770, Sept. 23, 1970]

§ 1.501(c)(9)–1 Voluntary employees' beneficiary associations, in general.

To be described in section 501(c)(9) an organization must meet all of the following requirements:

(a) The organization is an employees' association,

(b) Membership in the association is voluntary,

(c) The organization provides for the payment of life, sick, accident, or other benefits to its members or their dependents or designated benefi-

ciaries, and substantially all of its operations are in furtherance of providing such benefits, and

(d) No part of the net earnings of the organization inures, other than by payment of the benefits referred to in paragraph (c) of this section, to the benefit of any private shareholder or individual. [T.D. 7750, 45 FR 1721, Jan. 7, 1981]

§ 1.501(c)(9)–2 Membership in a voluntary employees' beneficiary association; employees; voluntary association of employees.

(a) Membership—(1) In general. The membership of an organization described in section 501(c)(9) must consist of individuals who become entitled to participate by reason of their being employees and whose eligibility for membership is defined by reference to objective standards that constitute an employment-related common bond among such individuals. Typically, those eligible for membership in an organization described in section 501(c)(9) are defined by reference to a common employer (or affiliated employers), to coverage under one or more collective bargaining agreements (with respect to benefits provided by reason of such agreement(s)), to membership in a labor union, or to membership in one or more locals of a national or international labor union. For example, membership in an association might be open to all employees of a particular employer, or to employees in specified job classifications working for certain employers at specified locations and who are entitled to benefits by reason of one or more collective bargaining agreements. In addition, employees of one or more employers engaged in the same line of business in the same geographic locale will be considered to share an employment-related bond for purposes of an organization through which their employees provide benefits. Employees of a labor union also will be considered to share an employment-related common bond with members of the union, and employees of an association will be considered to share an employment-related common bond with members of the association. Whether a group of individuals is defined by reference to a permissible standard or standards is a question to be determined with regard to all the facts and circumstances, taking into account the guidelines set forth in this paragraph. Exemption will not be denied merely because the membership of an association includes some individuals who are not employees (within the meaning of paragraph (b) of this section), provided that such individuals share an employment-related bond with the employee-members. Such individuals may include, for example, the proprietor of a business whose employees are members of the association. For purposes of the preceding two sentences, an association will be considered to be composed of employees if 90 percent of the total membership of the association on one day of each quarter of the association's taxable year consists of employees (within the meaning of paragraph (b) of this section).

(2) Restrictions—(i) In general. Eligibility for membership may be restricted by geographic proximity, or by objective conditions or limitations reasonably related to employment, such as a limitation to a reasonable classification of workers, a limitation based on a reasonable minimum period of service, a limitation based on maximum compensation, or a requirement that a member be employed on a full-time basis. Similarly, eligibility for benefits may be restricted by objective conditions relating to the type or amount of benefits offered. Any objective criteria used to restrict eligibility for membership or benefits may not, however, be selected or administered in a manner that limits membership or benefits to officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association. Similarly, eligibility for benefits may not be subject to conditions or limitations that have the effect of entitling officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association to benefits that are disproportionate in relation to benefits to which other members of the association are entitled. See § 1.501(c)(9)–4(b). Whether the selection or administration of objective conditions has the effect of providing disproportionate benefits to officers, shareholders, or highly compensated employees generally is to be determined on the basis of all the facts and circumstances.

(ii) Generally permissible restrictions or conditions. In general the following restrictions will not be considered to be inconsistent with § 1.501(c)(9)–2(a)(2)(i) or § 1.501(c)(9)–4(b):

(A) In the case of an employer-funded organization, a provision that excludes or has the effect of excluding from membership in the organization or participation in a particular benefit plan employees who are members of another organization or covered by a different plan, funded or contributed to by the employer, to the extent that such other organization or plan offers similar benefits on comparable terms to the excluded employees.

(B) In the case of an employer funded-organization, a provision that excludes from membership, or limits the type or amount of benefits provided to, individuals who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that the benefit or benefits provided by the organization were the subject of good faith bargaining between such employee representatives and such employer or employers.

(C) Restrictions or conditions on eligibility for membership or benefits that are determined through collective bargaining, by trustees designated pursuant to a collective bargaining agreement, or by the collective bargaining agents of the members of an association or trustees named by such agent or agents.

(D) The allowance of benefits only on condition that a member or recipient contribute to the cost of such benefits, or the allowance of different benefits based solely on differences in contributions, provided that those making equal contributions are entitled to comparable benefits.

(E) A requirement that a member (or a member's dependents) meet a reasonable health standard related to eligibility for a particular benefit.

(F) The provision of life benefits in amounts that are a uniform percentage of the compensation received by the individual whose life is covered.

(G) The provision of benefits in the nature of wage replacement in the event of disability in amounts that are a uniform percentage of the compensation of the covered individuals (either before or after taking into account any disability benefits provided through social security or any similar plan providing for wage replacement in the event of disability).

(3) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). Pursuant to a collective bargaining agreement entered into by X Corporation and W, a labor union which represents all of X Corporation's hourly-paid employees, the X Corporation Union Benefit Plan is established to provide life insurance benefits to employees of X represented by W. The Plan is funded by contributions from X, and is jointly administered by X and W. In order to provide its non-unionized employees with comparable life insurance benefits, X also establishes and funds the X Corporation Life Insurance Trust. The Trust will not be ineligible for exemption as an organization described in section 501(c)(9) solely because membership is restricted to those employees of X who are not members of W.

Example (2). The facts are the same as in Example (1) except that the life insurance benefit provided to the non-unionized employees of X differs from the life insurance benefit provided to the unionized employees of X pursuant to the collective bargaining agreement. The trust will not be ineligible for exemption as an organization described in section 501(c)(9) solely because the life insurance benefit provided to X's non-unionized employees is not same as the life insurance benefit provided to X's unionized employees.

Example (3). S corporation established a plan to provide health benefits to all its employees. In accordance with the provisions of the plan each employee may secure insurance coverage by making an election under which the employee agrees to contribute periodically to the plan an amount which is determined solely by whether the employee elects a high option coverage or a low option coverage and on whether the employee is unmarried or has a family. As an alternative, the employee may elect high or low options, self only or self and family, coverage through a local prepaid group medical plan. The contributions required of those electing the prepaid group medical plan also vary with the type of coverage selected, and differ from those required of employees electing insurance. The difference between the amount contributed by employees electing the various coverages and the actual cost of purchasing the coverage is made up through contributions by S to the plan, and under the plan, S provides approximately the same proportion of the cost for each coverage. To fund the plan, S established an arrangement in the nature of a trust under applicable local law and contributes all employee contributions, and all amounts which by the terms of the plan it is required to contribute, to the trust. The terms of the plan do not provide for disproportionate benefits to the employees of S and will not be considered inconsistent with § 1.501(c)(9)–2(a)(2)(i).

Example (4). The facts are the same as in Example (3) except that, for those employees or former employees covered by Medicare, the plan provides a distinct coverage which supplements Medicare benefits. Eligibility for Medicare is an objective condition relating to a type of benefit offered, and the provision of separate coverage for those eligible for Medicare will not be considered inconsistent with § 1.501(c)(9)–2(a)(2)(i).

(b) Meaning of "employee". Whether an individual is an "employee" is determined by reference to the legal and bona fide relationship of employer and employee. The term "employee" includes the following:

(1) An individual who is considered an employee:

(i) For employment tax purposes under Subtitle C of the Internal Revenue Code and the regulations thereunder, or

(ii) For purposes of a collective bargaining agreement,

whether or not the individual could qualify as an employee under applicable common law rules. This would include any person who is considered an employee for purposes of the Labor Management Relations Act of 1947, 61 Stat. 136, as amended, 29 U.S.C. 141 (1979).

(2) An individual who became entitled to membership in the association by reason of being or having been an employee. Thus, an individual

who would otherwise qualify under this paragraph will continue to qualify as an employee even though such individual is on leave of absence, works temporarily for another employer or has an independent contractor, or has been terminated by reason of retirement, disability or layoff. For example, an individual who in the normal course of employment is employed intermittently by more than one employer in an industry characterized by short-term employment by several different employers will not, by reason of temporary unemployment, cease to be an employee within the meaning of this paragraph.

(3) The surviving spouse and dependents of an employee (if, for purposes of the 90-percent test of § 1.501(c)(9)–2(a)(1) they are considered to be members of the association).

(c) Description of voluntary association of employees—(1) Association. To be described in section 501(c)(9) and this section there must be an entity, such as a corporation or trust established under applicable local law, having an existence independent of the member-employees or their employer.

(2) Voluntary. Generally, membership in an association is voluntary if an affirmative act is required on the part of an employee to become a member rather than the designation as a member due to employee status. However, an association shall be considered voluntary although membership is required of all employees, provided that the employees do not incur a detriment (for example, in the form of deductions from pay) as the result of membership in the association. An employer is not deemed to have imposed involuntary membership on the employee if membership is required as the result of a collective bargaining agreement or as an incident of membership in a labor organization.

(3) Of employees. To be described in this section, an organization must be controlled—

(i) By its membership,

(ii) By independent trustee(s) (such as a bank), or

(iii) By trustees or other fiduciaries at least some of whom are designated by, or on behalf of, the membership. Whether control by or on behalf of the membership exists is a question to be determined with regard to all of the facts and circumstances, but generally such control will be deemed to be present when the membership (either directly or through its representative) elects, appoints or otherwise designates a person or persons to serve as chief operating officer(s), administrator(s), or trustee(s) of the organization. For purposes of this paragraph an organization will be considered to be controlled by independent trustees if it is an "employee welfare benefit plan", as defined in section 3(1) of the Employee Retirement Income Security Act of 1974 (ERISA), and, as such, is subject to the requirements of Parts 1 and 4 of Subtitle B, Title I of ERISA. Similarly, a plan will be considered to be controlled by its membership if it is controlled by one or more trustees designated pursuant to a collective bargaining agreement (whether or not the bargaining agent of the represented employees bargained for and obtained the right to participate in selecting the trustees).

(4) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). X, a labor union, represents all the hourly-paid employees of Y Corporation. A health insurance benefit plan was established by X and Y as the result of a collective bargaining agreement entered into by them. The plan established the terms and conditions of membership in, and the benefits to be provided by, the plan. In accordance with the terms of the agreement, Y Corporation is obligated to establish a trust fund and make contributions thereto at specified rates. The trustees, some of whom are designated by X and some by Y, are authorized to hold and invest the assets of the trust and to make payments on instructions issued by Y Corporation in accordance with the conditions contained in the plan. The interdependent benefit plan agreement and trust indenture together create a voluntary employees' beneficiary association over which the employees possess the requisite control through the trustees designated by their representative X.

Example (2). Z Corporation unilaterally established an educational benefit plan for its employees. The purpose of the plan is to provide payments for job-related educational or training courses, such as apprenticeship training programs, for Z Corporation employees, according to objective criteria set forth in the plan. Z establishes a separate bank account which it uses to fund payments to the plan. Contributions to the account are to be made at the discretion of and solely by Z Corporation, which also administers the plan and retains control over the assets in the fund. Z Corporation's educational benefit plan and the related account do not constitute an association having an existence independent of Z Corporation and therefore do not constitute a voluntary employees' beneficiary association.

Example (3). A, an individual, is the incorporator and chief operating officer of Lawyers' Beneficiary Association (LBA). LBA is engaged in the business of providing medical benefits to members of the Association and their families. Membership is open only to practicing lawyers located in a particular metropolitan area who are neither self-employed nor partners in a law firm. Membership in LBA is solicited by insurance agents under the control of X Corporation (owned by A) which, by contract with LBA, is the exclusive sales agent. Medical benefits are paid from a trust account containing periodic "contributions" paid by the members, together with proceeds from the investment of those contributions. Contribution and benefit levels are set by LBA. The "members" of LBA do not hold meetings, have no right to elect officers or directors of the Association, and no right to replace trustees. Collectively, the

subscribers for medical benefits from LBA cannot be said to control the association and membership is neither more than nor different from the purchase of an insurance policy from a stock insurance company. LBA is not a voluntary employees' beneficiary association.

Example (4). U corporation unilaterally established a plan to provide benefits to its employees. In accordance with the provisions of the plan, each employee may secure insurance or benefit coverage by making an election under which the employee agrees to contribute to the plan an amount which is determined solely by whether the employee elects a high option coverage or a low option coverage and on whether the employee elects self only or self and family coverage. The difference between the amount contributed by employees electing the various coverages and the actual cost of the coverage is made up through contributions by U to the plan. To fund the plan, U established an arrangement in the nature of a trust under applicable local law and contributed all employee contributions, and all amounts which by the term of the plan it was required to provide to the plan, to the trust. The trust constitutes an "employee welfare benefit plan" within the meaning of, and subject to relevant requirements of, ERISA. It will be considered to meet the requirements of § 1.501(c)(9)–2(c)(3).

[T.D. 7750, 46 FR 1723, Jan. 7, 1981]

§ 1.501(c)(9)–3 Voluntary employees' beneficiary associations; life, sick, accident, or other benefits.

(a) **In general.** The life, sick, accident, or other benefits provided by a voluntary employees' beneficiary association must be payable to its members, their dependents, or their designated beneficiaries. For purposes of section 501(c)(9), "dependent" means the member's spouse; any child of the member or the member's spouse who is a minor or a student (within the meaning of section 151(e)(4)); any other minor child residing with the member; and any other individual who an association, relying on information furnished to it by a member, in good faith believes is a person described in section 152(a). Life, sick, accident, or other benefits may take the form of cash or noncash benefits. A voluntary employees' beneficiary association is not operated for the purpose of providing life, sick, accident, or other benefits unless substantially all of its operations are in furtherance of the provision of such benefits. Further, an organization is not described in this section if it systematically and knowingly provides benefits (of more than a *de minimis* amount) that are not permitted by paragraphs (b), (c), (d), or (e) of this section.

(b) **Life benefits.** The term "life benefits" means a benefit (including a burial benefit or a wreath) payable by reason of the death of a member or dependent. A "life benefit" may be provided directly or through insurance. It generally must consist of current protection, but also may include a right to convert to individual coverage on termination of eligibility for coverage through the association, or a permanent benefit as defined in, and subject to the conditions in, the regulations under section 79. A "life benefit" also includes the benefit provided under any life insurance contract purchased directly from an employee-funded association by a member or provided by such an association to a member. The term "life benefit" does not include a pension, annuity or similar benefit, except that a benefit payable by reason of the death of an insured may be settled in the form of an annuity to the beneficiary in lieu of a lump-sum death benefit (whether or not the contract provides for settlement in a lump sum).

(c) **Sick and accident benefits.** The term "sick and accident benefits" means amounts furnished to or on behalf of a member or a member's dependents in the event of illness or personal injury to a member or dependent. Such benefits may be provided through reimbursement to a member or a member's dependents for amounts expended because of illness or personal injury, or through the payment of premiums to a medical benefit or health insurance program. Similarly, a sick and accident benefit includes an amount paid to a member in lieu of income during a period in which the member is unable to work due to sickness or injury. Sick benefits also include benefits designed to safeguard or improve the health of members and their dependents. Sick and accident benefits may be provided directly by an association to or on behalf of members and their dependents, or may be provided indirectly by an association through the payment of premiums or fees to an insurance company, medical clinic, or other program under which members and their dependents are entitled to medical services or to other sick and accident benefits. Sick and accident benefits may also be furnished in noncash form, such as, for example, benefits in the nature of clinical care services by visiting nurses, and transportation furnished for medical care.

(d) **Other benefits.** The term "other benefits" includes only benefits that are similar to life, sick, or accident benefits. A benefit is similar to a life, sick, or accident benefit if—

(1) It is intended to safeguard or improve the health of a member or a member's dependents, or

(2) It protects against a contingency that interrupts or impairs a member's earning power.

(e) **Examples of "other benefits".** Paying vacation benefits, providing vacation facilities, reimbursing vacation expenses, and subsidizing recreational activities such as athletic leagues are con-

sidered "other benefits". The provision of child-care facilities for preschool and school-age dependents are also considered "other benefits." The provision of job readjustment allowances, income maintenance payments in the event of economic dislocation, temporary living expense loans and grants at times of disaster (such as fire or flood), supplemental unemployment compensation benefits (as defined in section 501(c)(17)(D)(i) of the Code), severance benefits (under a severance pay plan within the meaning of 29 CFR 2510.3–2(b)) and education or training benefits or courses (such as apprentice training programs) for members, are considered "other benefits" because they protect against a contingency that interrupts earning power. Personal legal service benefits which consist of payments or credits to one or more organizations or trusts described in section 501(c)(20) are considered "other benefits". Except to the extent otherwise provided in these regulations, as amended from time to time, "other benefits" also include any benefit provided in the manner permitted by paragraphs (5) et seq. of section 302(c) of the Labor Management Relations Act of 1947, 61 Stat. 136, as amended, 29 U.S.C. 186(c) (1979).

(f) Examples of nonqualifying benefits. Benefits that are not described in paragraphs (d) or (e) of this section are not "other benefits". Thus, "other benefits" do not include the payment of commuting expenses, such as bridge tolls or train fares, the provision of accident or homeowner's insurance benefits for damage to property, the provision of malpractice insurance, or the provision of loans to members except in times of distress (as permitted by § 1.501(c)(9)–3(e)). "Other benefits" also do not include the provision of savings facilities for members. The term "other benefits" does not include any benefit that is similar to a pension or annuity payable at the time of mandatory or voluntary retirement, or a benefit that is similar to the benefit provided under a stock bonus or profit-sharing plan. For purposes of section 501(c)(9) and these regulations, a benefit will be considered similar to that provided under a pension, annuity, stock bonus or profit-sharing plan if it provides for deferred compensation that becomes payable by reason of the passage of time, rather than as the result of an unanticipated event. Thus, for example, supplemental unemployment benefits, which generally become payable by reason of unanticipated layoff, are not, for purposes of these regulations, considered similar to the benefit provided under a pension, annuity, stock bonus or profit-sharing plan.

(g) Examples. The provisions of this section may be further illustrated by the following examples:

Example (1). V was organized in connection with a vacation plan created pursuant to a collective bargaining agreement between M, a labor union, which represents certain hourly paid employees of T corporation and T. The agreement calls for the payment by T to V of a specified sum per hour worked by T employees who are covered by the collective bargaining agreement. T includes the amounts in the covered employees' wages and withholds income and FICA taxes. The amounts are paid by T to V to provide vacation benefits provided under the collective bargaining agreement. Generally, each covered employee receives a check in payment of his or her vacation benefit during the year following the year in which contributions were made by T to V. The amount of the vacation benefit is determined by reference to the contributions during the prior year to V by T on behalf of each employee, and is distributed in cash to each such employee. If the earnings on investments by V during the year preceding distribution are sufficient after deducting the expenses of administering the plan, each recipient of a vacation benefit is paid an amount, in addition to the contributions on his or her behalf, equal to his/her ratable share of the net earnings of V during such year. The plan provides a vacation benefit that constitutes an eligible "other benefit" described in section 501(c)(9) and § 1.501(c)(9)–3(e).

Example (2). The facts are the same as in Example 1, except that each covered employee of T is entitled, at his or discretion, to contribute up to an additional $1,000 each year to V, which agrees in respect of such sum to pay interest at a stated rate from the time of contribution until the time at which the contributing employee's vacation benefit is distributed. In addition, each employee may elect to leave all or a portion of his/her distributable benefit on deposit past the time of distribution, in which case interest will continue to accrue. Because the plan more closely resembles a savings arrangement than a vacation plan, the benefit payable to the covered employees of T is not a "vacation benefit" and is not an eligible "other benefit" described in section 501(c)(9) and § 1.501(c)(9)–3(d) or (e).

[T.D. 7750, 46 FR 1724, Jan. 7, 1981]

§ 1.501(c)(9)–4 Voluntary employees' beneficiary associations; inurement.

(a) General rule. No part of the net earnings of an employees' association may inure to the benefit of any private shareholder or individual other than through the payment of benefits permitted by § 1.501(c)(9)–3. The disposition of property to, or the performance of services for, a person for less than the greater of fair market value or cost (including indirect costs) to the association, other than as a life, sick, accident or other permissible benefit, constitutes prohibited inurement. Generally, the payment of unreasonable compensation to the trustees or employees of the association, or the purchase of insurance or services for amounts in excess of their fair market value from a company in which one or more of the association's trustees, officers or fiduciaries has an interest, will constitute prohibited inurement. Whether prohibited

inurement has occurred is a question to be determined with regard to all of the facts and circumstances, taking into account the guidelines set forth in this section. The guidelines and examples contained in this section are not an exhaustive list of the activities that may constitute prohibited inurement, or the persons to whom the association's earnings could impermissibly inure. See § 1.501(a)–1(c).

(b) Disproportionate benefits. For purposes of subsection (a), the payment to any member of disproportionate benefits, where such payment is not pursuant to objective and nondiscriminatory standards, will not be considered a benefit within the meaning of § 1.501(c)(9)–3 even though the benefit otherwise is one of the type permitted by that section. For example, the payment to highly compensated personnel of benefits that are disproportionate in relation to benefits received by other members of the association will constitute prohibited inurement. Also, the payment to similarly situated employees of benefits that differ in kind or amount will constitute prohibited inurement unless the difference can be justified on the basis of objective and reasonable standards adopted by the association or on the basis of standards adopted pursuant to the terms of a collective bargaining agreement. In general, benefits paid pursuant to standards or subject to conditions that do not provide for disproportionate benefits to officers, shareholders, or highly compensated employees will not be considered disproportionate. See § 1.501(c)(9)–2(a)(2) and (3).

(c) Rebates. The rebate of excess insurance premiums, based on the mortality or morbidity experience of the insurer to which the premiums were paid, to the person or persons whose contributions were applied to such premiums, does not constitute prohibited inurement. A voluntary employees' beneficiary association may also make administrative adjustments strictly incidental to the provision of benefits to its members.

(d) Termination of plan or dissolution of association. It will not constitute prohibited inurement if, on termination of a plan established by an employer and funded through an association described in section 501(c)(9), any assets remaining in the association, after satisfaction of all liabilities to existing beneficiaries of the plan, are applied to provide, either directly or through the purchase of insurance, life, sick, accident or other benefits within the meaning of § 1.501(c)(9)–3 pursuant to criteria that do not provide for disproportionate benefits to officers, shareholders, or highly compensated employees of the employer. See § 1.501(c)(9)–2(a)(2). Similarly, a distribution to members upon the dissolution of the association will not constitute prohibited inurement if the amount distributed to members are determined pursuant to the terms of a collective bargaining agreement or on the basis of objective and reasonable standards which do not result in either unequal payments to similarly situated members or in disproportionate payments to officers, shareholders, or highly compensated employees of an employer contributing to or otherwise funding the employees' association. Except as otherwise provided in the first sentence of this paragraph, if the association's corporate charter, articles of association, trust instrument, or other written instrument by which the association was created, as amended from time to time, provides that on dissolution its assets will be distributed to its members' contributing employers, or if in the absence of such provision the law of the state in which the association was created provides for such distribution to the contributing employers, the association is not described in section 501(c)(9).

(e) Example. The provisions of this section may be illustrated by the following example:

Example. Employees A, B and C, members of the X voluntary employees' beneficiary association, are unemployed. They receive unemployment benefits from X. Those to A include an amount in addition to those provided to B and C, to provide for A's retraining. B has been found pursuant to objective and reasonable standards not to qualify for the retraining program. C, although eligible for retraining benefits has declined X's additional payment to A for retraining does not constitute prohibited inurement.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§ 1.501(c)(9)–5 Voluntary employees' beneficiary associations; recordkeeping requirements.

(a) Records. In addition to such other records which may be required (for example, by section 512(a)(3) and the regulations thereunder), every organization described in section 501(c)(9) must maintain records indicating the amount contributed by each member and contributing employer, and the amount and type of benefits paid by the organization to or on behalf of each member.

(b) Cross reference. For provisions relating to annual information in returns with respect to payments, see section 6041 and the regulations thereunder.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§ 1.501(c)(9)–6 Voluntary employees' beneficiary associations; benefits includible in gross income.

(a) In general. Cash and noncash benefits realized by a person on account of the activities of an

organization described in section 501(c)(9) shall be included in gross income to the extent provided in the Internal Revenue Code of 1954, including, but not limited to, sections 61, 72, 101, 104 and 105 of the Code and regulations thereunder.

(b) Availability of statutory exclusions from gross income. The availability of any statutory exclusion from gross income with respect to contributions to, or the payment of benefits from, an organization described in section 501(c)(9) is determined by the statutory provision conferring the exclusion, and the regulations and rulings thereunder, not by whether an individual is eligible for membership in the organization or by the permissibility of the benefit paid. Thus, for example, if a benefit is paid by an employer-funded organization described in section 501(c)(9) to a member who is not an "employee", a statutory exclusion from gross income that is available only for "employees" would be unavailable in the case of a benefit paid to such individual. Similarly, the fact that, for example, under some circumstances educational benefits constitute "other benefits" does not of itself mean that such benefits are eligible for the exclusion of either section 117 or section 127 of the Code.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§ 1.501(c)(9)–7 Voluntary employees' beneficiary associations; section 3(4) of ERISA.

The term "voluntary employees' beneficiary association" in section 501(c)(9) of the Internal Revenue Code is not necessarily coextensive with the term "employees' beneficiary association" as used in section 3(4) of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1002(4), and the requirements which an organization must meet to be an "employees' beneficiary association" within the meaning of section 3(4) of ERISA are not necessarily identical to the requirements that an organization must meet in order to be a "voluntary employees' beneficiary association" within the meaning of section 501(c)(9) of the Code.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981]

§ 1.501(c)(9)–8 Voluntary employees' beneficiary associations; effective date.

(a) General rule. Except as otherwise provided in this section, the provisions of §§ 1.501(c)(9)–1 through 7 shall apply with respect to taxable years beginning after December 31, 1954.

(b) Pre-1970 taxable years. For taxable years beginning before January 1, 1970, section 501(c)(9)(B) (relating to the requirement that 85 percent or more of the association's income consist of amounts collected from members and contributed by employers), as in effect for such years, shall apply.

(c) Existing associations. Except as otherwise provided in paragraph (d), the provisions of §§ 1.501(c)(9)–2(a)(1) and (c)(3) shall apply with respect to taxable years beginning after December 31, 1980.

(d) Collectively-bargained plans. In the case of a voluntary employees' beneficiary association which receives contributions from one or more employers pursuant to one or more collective bargaining agreements in effect on December 31, 1980, the provisions of §§ 1.501(c)(9)–1 through 5 shall apply with respect to taxable years beginning after the date on which the agreement terminates (determined without regard to any extension thereof agreed to after December 31, 1980).

(e) Election. Notwithstanding paragraphs (c) and (d) of this section, an organization may choose to be subject to all or a portion of one or more of the provisions of these regulations for any taxable year beginning after December 31, 1954.

[T.D. 7750, 46 FR 1725, Jan. 7, 1981; 46 FR 11971, Feb. 12, 1981]

§ 1.501(c)(10)–1 Certain fraternal beneficiary societies.

(a) For taxable years beginning after December 31, 1969, an organization will qualify for exemption under section 501(c)(10) if it—

(1) Is a domestic fraternal beneficiary society order, or association, described in section 501(c)(8) and the regulations thereunder except that it does not provide for the payment of life, sick, accident, or other benefits to its members, and

(2) Devotes its net earnings exclusively to religious, charitable, scientific, literary, educational, and fraternal purposes.

Any organization described in section 501(c)(7), such as, for example, a national college fraternity, is not described in section 501(c)(10) and this section.

[T.D. 7172, 37 FR 5618, March 17, 1972]

§ 1.501(c)(12)–1 Local benevolent life insurance associations, mutual irrigation and telephone companies, and like organizations.

(a) An organization described in section 501(c)(12) must receive at least 85 percent of its

income from amounts collected from members for the sole purpose of meeting losses and expenses. If an organization issues policies for stipulated cash premiums, or if it requires advance deposits to cover the cost of the insurance and maintains investments from which more than 15 percent of its income is derived, it is not entitled to exemption. On the other hand, an organization may be entitled to exemption, although it makes advance assessments for the sole purpose of meeting future losses and expenses, provided that the balance of such assessments remaining on hand at the end of the year is retained to meet losses and expenses or is returned to members.

(b) The phrase "of a purely local character" applies to benevolent life insurance associations, and not to the other organizations specified in section 501(c)(12). It also applies to any organization seeking exemption on the ground that it is an organization similar to a benevolent life insurance association. An organization of a purely local character is one whose business activities are confined to a particular community, place, or district, irrespective, however, of political subdivisions. If the activities of an organization are limited only by the borders of a State it cannot be considered to be purely local in character.

(c) For taxable years of a mutual or cooperative telephone company beginning after December 31, 1974, the 85 percent member-income test described in paragraph (a) of this section is applied without taking into account income received or accrued from another telephone company for the performance of communication services involving the completion of long distance calls to, from, or between members of the mutual or cooperative telephone company. For example, if, in one year, a cooperative telephone company receives $85x from its members for telephone calls, $15x as interest income, and $20x as credits under long distance interconnection agreements with other telephone companies for the performance of communication services involving the completion of long distance calls to, from, or between the cooperative's members (whether or not the credits may be offset, in whole or in part, by amounts due the other companies under the interconnection agreements), the member-income fraction is calculated without taking into account, either in the numerator or denominator, the $20x credits received from the other telephone companies.

In this example, the 85 percent member-income test is satisfied because at least 85 percent

$$\frac{\text{member income}}{\text{total income}} = \frac{85x}{85x + 15x} = \frac{85}{100} = 85\%$$

of the cooperative's total income is derived from member income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended at 44 FR 59523, Oct. 16, 1979]

§ 1.501(c)(13)–1 Cemetery companies and crematoria.

(a) **Nonprofit mutual cemetery companies.** A nonprofit cemetery company may be entitled to exemption if it is owned by and operated exclusively for the benefit of its lot owners who hold such lots for bona fide burial purposes and not for the purpose of resale. A mutual cemetery company which also engages in charitable activities, such as burial of paupers, will be regarded as operating in conformity with this standard. Further, the fact that a mutual cemetery company limits its membership to a particular class of individuals, such as members of a family, will not affect its status as mutual so long as all the other requirements of section 501(c)(13) are met.

(b) **Nonprofit cemetery companies and crematoria.** Any nonprofit corporation, chartered solely for the purpose of the burial, or (for taxable years beginning after December 31, 1970) the cremation of bodies, and not permitted by its charter to engage in any business not necessarily incident to that purpose, is exempt from income tax, provided that no part of its net earnings inures to the benefit of any private shareholder or individual.

(c) **Preferred stock—(1) In general.** Except as provided in subparagraph (3) of this paragraph, a cemetery company or crematorium is not described in section 501(c)(13) if it issues preferred stock on or after November 28, 1978.

(2) **Transitional rule for preferred stock issued prior to November 28, 1978.** In the case of preferred stock issued prior to November 28, 1978, a cemetery company or crematorium which issued such stock shall not fail to be exempt from income tax solely because it issued preferred stock which entitled the holders to dividends at a fixed rate, not exceeding the legal rate of interest in the State of incorporation or 8 percent per annum, whichever is greater, on the value of the consideration for which the stock was issued, if its articles of incorporation require:

(i) That the preferred stock be retired at par as rapidly as funds therefor become available from operations, and

(ii) That all funds not required for the payment of dividends upon or for the retirement of preferred stock be used by the company for the care and improvement of the cemetery property. The term "legal rate of interest" shall mean the rate of interest prescribed by law in the State of incorporation which prevails in the absence of an agreement between contracting parties fixing a rate.

(3) Transitional rule for preferred stock issued on or after November 28, 1978. In the case of preferred stock issued on or after November 28, 1978, a cemetery company or crematorium shall not fail to be exempt from income tax if its articles of incorporation and the preferred stock meet the requirements of paragraph (c)(2) and if such stock is issued pursuant to a plan which has been reduced to writing and adopted prior to November 28, 1978. The adoption of the plan must be shown by the acts of the duly constituted responsible officers and appear upon the official records of the cemetery company or crematorium.

(d) Sales to exempt cemetery companies and crematoria. Except as provided in paragraph (c)(2) or (c)(3) of this section (relating to transitional rules for preferred stock), no person may have any interest in the net earnings of a tax-exempt cemetery company or crematorium. Thus, a cemetery company or crematorium is not exempt from tax if property is transferred to such organization in exchange for an interest in the net earnings of the organization so long as such interest remains outstanding. An interest in a cemetery company or crematorium that constitutes an equity interest within the meaning of section 385 will be considered an interest in the net earnings of the cemetery. However, an interest in a cemetery company or crematorium that does not constitute an equity interest within the meaning of section 385 may nevertheless constitute an interest in the net earnings of the organization. Thus, for example, a bond or other evidence of indebtedness issued by a cemetery company or crematorium which provides for a fixed rate of interest but which, in addition, provides for additional interest payments contingent upon the revenues or income of the organization is considered an interest in the net earnings of the organization. Similarly, a convertible debt obligation issued by a cemetery company or crematorium after July 7, 1975, is considered an interest in the net earnings of the organization.

[T.D. 7698, 45 FR 33972, May 21, 1980]

§ 1.501(c)(14)-1 Credit unions and mutual insurance funds.

Credit unions (other than Federal credit unions described in section 501(c)(1)) without capital stock, organized and operated for mutual purposes and without profit, are exempt from tax under section 501(a). Corporations or associations without capital stock organized before September 1, 1951 and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of, shares or deposits in:

(a) Domestic building and loan associations as defined in section 7701(a)(19),

(b) Cooperative banks without capital stock organized and operated for mutual purposes and without profit, or

(c) Mutual savings banks not having capital stock represented by shares,

are also exempt from tax under section 501(a). In addition, corporations or associations of the type described in the preceding sentence which were organized on or after September 1, 1951, but before September 1, 1957, are exempt from tax under section 501(a) for taxable years beginning after December 31, 1959.

[T.D. 6493, 25 FR 9219, Sept. 27, 1960]

§ 1.501(c)(15)-1 Mutual insurance companies or associations.

(a) Taxable years beginning after December 31, 1962. An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed $150,000:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61-7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and the regulations thereunder.

(ii) Dividends, as described in § 1.61-9.

(iii) Rents and royalties, as described in § 1.61-8.

(iv) The entering into of any lease, mortgage, or other instrument or agreement from which the company may derive interest, rents, or royalties.

(v) The alteration or termination of any instrument or agreement described in subdivision (iv) of this subparagraph.

(2) The gross income from any trade or business (other than an insurance business) carried on by the company or association, or by a partnership of which the company or association is a partner.

(3) Premiums (including deposits and assessments).

(b) Taxable years beginning after December 31, 1954, and before January 1, 1963. An insurance company or association described in section 501(c)(15) and paragraph (a) of this section is exempt under section 501(a) if the gross amount received during the taxable year from the sum of the items described in paragraph (a)(1), (2), and (3) of this section does not exceed $75,000.

(c) No double inclusion of income. In computing the gross income from any trade or business (other than an insurance business) carried on by the company or association, or by a partnership of which the company or association is a partner, any item described in section 822(b)(1)(A), (B), or (C) and paragraph (a)(1) of this section shall not be considered as gross income arising from the conduct of such trade or business, but shall be taken into account under section 822(b)(1)(A), (B), or (C) and paragraph (a)(1) of this section.

(d) Taxable years beginning after December 31, 1953, and before January 1, 1955. An insurance company or association described in section 501(c)(15) is exempt under section 501(a) if it is a mutual company or association (other than life or marine) or if it is a mutual interinsurer or reciprocal underwriter (other than life or marine) and if the gross amount received during the taxable year from the sum of the following items does not exceed $75,000:

(1) The gross amount of income during the taxable year from—

(i) Interest (including tax-exempt interest and partially tax-exempt interest), as described in § 1.61–7. Interest shall be adjusted for amortization of premium and accrual of discount in accordance with the rules prescribed in section 822(d)(2) and § 1.822–3.

(ii) Dividends, as described in § 1.61–9.

(iii) Rents (but excluding royalties), as described in § 1.61–8.

(2) Premiums (including deposits and assessments).

(e) Exclusion of capital gains. Gains from sales or exchanges of capital assets to the extent provided in subchapter P (section 1201 and following, relating to capital gains and losses), chapter 1 of the Code, shall be excluded from the amounts described in this section.

[T.D. 6662, 28 FR 6972, July 29, 1963]

§ 1.501(c)(16)–1 Corporations organized to finance crop operations.

A corporation organized by a farmers' cooperative marketing or purchasing association, or the members thereof, for the purpose of financing the ordinary crop operations of such members or other producers is exempt, provided the marketing or purchasing association is exempt under section 521 and the financing corporation is operated in conjunction with the marketing or purchasing association. The provisions of § 1.521–1 relating to a reserve or surplus and to capital stock shall also apply to corporations coming under this section.

§ 1.501(c)(17)–1 Supplemental unemployment benefit trusts.

(a) Requirements for qualification. (1) A supplemental unemployment benefit trust may be exempt as an organization described in section 501(c)(17) if the requirements of subparagraphs (2) through (6) of this paragraph are satisfied.

(2) The trust is a valid, existing trust under local law and is evidenced by an executed written document.

(3) The trust is part of a written plan established and maintained by an employer, his employees, or both the employer and his employees, solely for the purpose of providing supplemental unemployment compensation benefits (as defined in section 501(c)(17)(D) and paragraph (b)(1) of § 1.501(c)(17)–1).

(4) The trust is part of a plan which provides that the corpus and income of the trust cannot (in the taxable year, and at any time thereafter, before the satisfaction of all liabilities to employees covered by the plan) be used for, or diverted to, any purpose other than the providing of supplemental unemployment compensation benefits. Thus, if the plan provides for the payment of any benefits other than supplemental unemployment compensation benefits as defined in paragraph (b) of this section, the trust will not be entitled to exemption as an organization described in section 501(c)(17). However, the payment of any necessary or appropriate expenses in connection with the administra-

tion of a plan providing supplemental unemployment compensation benefits shall be considered a payment to provide such benefits and shall not affect the qualification of the trust.

(5) The trust is part of a plan whose eligibility conditions and benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. See sections 401(a)(3)(B) and 401(a)(4) and §§ 1.401–3 and 1.401–4. However, a plan is not discriminatory within the meaning of section 501(c)(17)(A)(iii), relating to the requirement that the benefits paid under the plan be nondiscriminatory, merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan. Accordingly, the benefits provided for highly paid employees may be greater than the benefits provided for lower paid employees if the benefits are determined by reference to their compensation; but, in such a case, the plan will not qualify if the benefits paid to the higher paid employees bear a larger ratio to their compensation than the benefits paid to the lower paid employees bear to their compensation. In addition, section 501(c)(17)(B) sets forth certain other instances in which a plan will not be considered discriminatory (see paragraph (c) of § 1.501(c)(17)–2).

(6) The trust is part of a plan which requires that benefits are to be determined according to objective standards. Thus, a plan may provide similarly situated employees with benefits which differ in kind and amount, but may not permit such benefits to be determined solely in the discretion of the trustees.

(b) **Meaning of terms.** The following terms are defined for purposes of section 501(c)(17):

(1) **Supplemental unemployment compensation benefits.** The term "supplemental unemployment compensation benefits" means only—

(i) Benefits paid to an employee because of his involuntary separation from the employment of the employer, whether or not such separation is temporary, but only when such separation is one resulting directly from a reduction in force, the discontinuance of a plant or operation, or other similar conditions; and

(ii) Sick and accident benefits subordinate to the benefits described in subdivision (i) of this subparagraph.

(2) **Employee.** The term "employee" means an individual whose status is that of an employee under the usual common-law rules applicable in determining the employer-employee relationship. The term "employee" also includes an individual who qualifies as an "employee" under the State or Federal unemployment compensation law covering his employment, whether or not such an individual could qualify as an employee under such common-law rules.

(3) **Involuntary separation from the employment of the employer.** Whether a "separation from the employment of the employer" occurs is a question to be decided with regard to all the facts and circumstances. However, for purposes of section 501(c)(17), the term "separation" includes both a temporary separation and a permanent severance of the employment relationship. Thus, for example, an employee may be separated from the employment of his employer even though at the time of separation it is believed that he will be reemployed by the same employer. Whether or not an employee is "involuntarily" separated from the employment of the employer is a question of fact. However, normally, an employee will not be deemed to have separated himself voluntarily from the employment of his employer merely because his collective bargaining agreement provides for the termination of his services upon the happening of a condition subsequent and that condition does in fact occur. For example, if the collective bargaining agreement provides that the employer may automate a given department and thereby dislocate several employees, the fact that the employees' collective bargaining agent has consented to such a condition will not render any employee's subsequent unemployment for such cause voluntary.

(4) **Other similar conditions.** Involuntary separation directly resulting from "other similar conditions" includes, for example, involuntary separation from the employment of the employer resulting from cyclical, seasonal, or technological causes. Some causes of involuntary separation from the employment of the employer which are not similar to those enumerated in section 501(c)(17)(D)(i) are separation for disciplinary reasons or separation because of age.

(5) **Subordinate sick and accident benefits.** In general, a sick and accident benefit payment is an amount paid to an employee in the event of his illness or personal injury (whether or not such illness or injury results in the employee's separation from the service of his employer). In addition, the phrase "sick and accident benefits" in-

cludes amounts provided under the plan to reimburse an employee for amounts he expends because of the illness or injury of his spouse or a dependent (as defined in section 152). Sick and accident benefits may be paid by a trust described in section 501(c)(17) only if such benefits are subordinate to the separation payments provided under the plan of which the trust forms a part. Whether the sick and accident benefits provided under a supplemental unemployment compensation benefit plan are subordinate to the separation benefits provided under such plan is a question to be decided with regard to all the facts and circumstances.

[T.D. 6972, 33 FR 12900, Sept. 12, 1968]

§ 1.501(c)(17)–2 General rules.

(a) Supplemental unemployment compensation benefits. Supplemental unemployment compensation benefits as defined in section 501(c)(17)(D) and paragraph (b)(1) of § 1.501(c)(17)–1 may be paid in a lump sum or installments. Such benefits may be paid to an employee who has, subsequent to his separation from the employment of the employer, obtained other part-time, temporary, or permanent employment. Furthermore, such payments may be made in cash, services, or property. Thus, supplemental unemployment compensation benefits provided to involuntarily separated employees may include, for example, the following: Furnishing of medical care at an established clinic, furnishing of food, job training and schooling, and job counseling. If such benefits are furnished in services or property, the fair market value of the benefits must satisfy the requirements of section 501(c)(17)(A)(iii), relating to nondiscrimination as to benefits. However, supplemental unemployment compensation benefits may be provided only to an employee and only under circumstances described in paragraph (b)(1) of § 1.501(c)(17)–1. Thus, a trust described in section 501(c)(17) may not provide, for example, for the payment of a death, vacation, or retirement benefit.

(b) Sick and accident benefits. If a trust described in section 501(c)(17) provides for the payment of sick and accident benefits, such benefits may only be provided for employees who are eligible for receipt of separation benefits under the plan of which the trust is a part. However, the sick and accident benefits need not be provided for all the employees who are eligible for receipt of separation benefits, so long as the plan does not discriminate in favor of persons with respect to whom discrimination is proscribed in section 501(c)(17)(A)(ii) and (iii). Furthermore, the portion of the plan which provides for the payment of sick and accident benefits must satisfy the nondiscrimination requirements of section 501(c)(17)(A)(ii) and (iii) without regard to the portion of the plan which provides for the payment of benefits because of involuntary separation.

(c) Correlation with other plans. **(1)** In determining whether a plan meets the requirements of section 501(c)(17)(A)(ii) and (iii), any benefits provided under any other plan shall not be taken into consideration except in the particular instances enumerated in section 501(c)(17)(B)(i), (ii), and (iii). In general, these three exceptions permit a plan providing for the payment of supplemental unemployment compensation benefits to satisfy the nondiscrimination requirements in section 501(c)(17)(A)(ii) and (iii) if the plan is able to satisfy such requirements when it is correlated with one or more of the plans described in section 501(c)(17)(B).

(2) Under section 501(c)(17)(B)(i), a plan will not be considered discriminatory merely because the benefits under the plan which are first determined in a nondiscriminatory manner (within the meaning of section 501(c)(17)(A)) are then reduced by any sick, accident, or unemployment compensation benefits received under State or Federal law, or are reduced by a portion of these benefits if determined in a nondiscriminatory manner. Under this exception, a plan may, for example, satisfy the requirements of section 501(c)(17)(A)(iii) if it provides for the payment of an unemployment benefit and the amount of such benefit is determined as a percentage of the employee's compensation which is then reduced by any unemployment benefit which the employee receives under a State plan. In addition, a plan could provide for the reduction of such a plan benefit by a percentage of the State benefit. Furthermore, a plan may also satisfy the requirements of section 501(c)(17)(A) if it provides for the payment to an employee of an amount which when added to any State unemployment benefit equals a percentage of the employee's compensation.

(3) Under section 501(c)(17)(B)(ii), a plan will not be considered discriminatory merely because the plan provides benefits only for employees who are not eligible to receive sick, accident, or unemployment compensation benefits under State or Federal law. In such a case, however, the benefits provided under the plan seeking to satisfy the requirements of section 501(c)(17) must be the same benefits, or a portion of the same benefits if determined in a nondiscriminatory manner, which

such ineligible employees would receive under State or Federal law if they were eligible for such benefits. Under this exception, for example, an employer may establish a plan only for employees who have exhausted their benefits under the State law, and, if the plan provides for such employees the same benefits which they would receive under the State plan, the State plan and the plan of the employer will be considered as one plan in determining whether the requirements relating to nondiscrimination in section 501(c)(17)(A) are satisfied. Furthermore, such a plan could also qualify even though it does not provide all of the benefits provided under the State plan. Thus, a plan could provide for the payment of a reduced amount of the benefits, or for the payment of only certain of the types of benefits, provided by the State plan. For example, if the State plan provides for the payment of sick, accident, and separation benefits, the plan of the employer may provide for the payment of only separation benefits, or for the payment of an amount equal to only one-half of the State provided benefit. However, if a plan provides benefits for employees who are not eligible to receive the benefits provided under a State plan and such benefits are greater or of a different type than those under the State plan, the plan of the employer must satisfy the requirements of section 501(c)(17)(A) without regard to the benefits and coverage provided by the State plan.

(4) Under section 501(c)(17)(B)(iii), a plan is not considered discriminatory merely because the plan provides benefits only for employees who are not eligible to receive benefits under another plan which satisfies the requirements of section 501(c)(17)(A) and which is funded solely by contributions of the employer. In such a case, the plan seeking to qualify under section 501(c)(17) must provide the same benefits, or a portion of such benefits if determined in a nondiscriminatory manner, as are provided for the employees under the plan funded solely by employer contributions. Furthermore, this exception only applies if the employees eligible to receive benefits under both plans would satisfy the requirements in section 501(c)(17)(A)(ii), relating to nondiscrimination as to coverage. The plan of the employer which is being correlated with the plan seeking to satisfy the requirements of section 501(c)(17) may be a plan which forms part of a voluntary employees' beneficiary association described in section 501(c)(9), if such plan satisfies all the requirements of section 501(c)(17)(A). Under this exception, for example, if an employer has established a plan providing for the payment of supplemental unemployment compensation benefits for his hourly wage employees and such plan satisfies the requirements of section 501(c)(17)(A) (even though the plan forms part of a voluntary employees' beneficiary association described in section 501(c)(9)), the salaried employees of such employee may establish a plan for themselves, and, if such plan provides for the same benefits as the plan covering hourly-wage employees, both plans may be considered as one plan in determining whether the plan covering the salaried employees satisfies the requirement that it be nondiscriminatory as to coverage. The foregoing example would also be applicable if the benefits provided for the salaried employees were funded solely or in part by employer contributions.

(d) **Permanency of the plan.** A plan providing for the payment of supplemental unemployment compensation benefits contemplates a permanent as distinguished from a temporary program. Thus, although there may be reserved the right to change or terminate the plan, and to discontinue contributions thereunder, the abandonment of the plan for any reason other than business necessity within a few years after it has taken effect will be evidence that the plan from its inception was not a bona fide program for the purpose of providing supplemental unemployment compensation benefits to employees. Whether or not a particular plan constitutes a permanent arrangement will be determined by all of the surrounding facts and circumstances. However, merely because a collective bargaining agreement provides that a plan may be modified at the termination of such agreement, or that particular provisions of the plan are subject to renegotiation during the duration of such agreement, does not necessarily imply that the plan is not a permanent arrangement. Moreover, the fact that the plan provides that the assets remaining in the trust after the satisfaction of all liabilities (including contingent liabilities) under the plan may be returned to the employer does not imply that the plan is not a permanent arrangement nor preclude the trust from qualifying under section 501(c)(17).

(e) **Portions of years.** A plan must satisfy the requirements of section 501(c)(17) throughout the entire taxable year of the trust in order for the trust to be exempt for such year. However, section 501(c)(17)(C) provides that a plan will satisfy the nondiscrimination as to classification requirements of section 501(c)(17)(A) if on at least one day in each quarter of the taxable year of the trust it satisfies such requirements.

(f) **Several trusts constituting one plan.** Several trusts may be designated as constituting part of

one plan which is intended to satisfy the requirements of section 501(c)(17), in which case all of such trusts taken as a whole must meet the requirements of such section. The fact that a combination of trusts fails to satisfy the requirements of section 501(c)(17) as one plan does not prevent such of the trusts as satisfy the requirements of section 501(c)(17) from qualifying for exemption under that section.

(g) Plan of several employers. A trust forming part of a plan of several employers, or the employees of several employers, will be a supplemental unemployment benefit trust described in section 501(c)(17) if all the requirements of that section are otherwise satisfied.

(h) Investment of trust funds. No specific limitations are provided in section 501(c)(17) with respect to investments which may be made by the trustees of a trust qualifying under that section. Generally, the contributions may be used by the trustees to purchase any investments permitted by the trust agreement to the extent allowed by local law. However, the tax-exempt status of the trust will be forfeited if the investments made by the trustees constitute "prohibited transactions" within the meaning of section 503. See section 503 and the regulations thereunder. In addition, such a trust will be subject to tax under section 511 with respect to any "unrelated business taxable income" (as defined in section 512) realized by it from its investments. See sections 511 to 515, inclusive, and the regulations thereunder.

(i) Allocations. If a plan which provides sick and accident benefits is financed solely by employer contributions to the trust, and such sick and accident benefits are funded by payment of premiums on an accident or health insurance policy (whether on a group or individual basis) or by contributions to a separate fund which pays such sick and accident benefits, the plan must specify that portion of the contributions to be used to fund such benefits. If a plan which is financed in whole or in part by employee contributions provides sick and accident benefits, the plan must specify the portion, if any, of employee contributions allocated to the cost of funding such benefits, and must allocate the cost of funding such benefits between employer contributions and employee contributions.

(j) Required records and returns. Every trust described in section 501(c)(17) must maintain records indicating the amount of separation benefits and sick and accident benefits which have been provided to each employee. If a plan is financed, in whole or in part, by employee contributions to the trust, the trust must maintain records indicating the amount of each employee's total contributions allocable to separation benefits. In addition, every trust described in section 501(c)(17) which makes one or more payments totaling $600 or more in 1 year to an individual must file an annual information return in the manner described in paragraph (b)(1) of § 1.6041–2. However, if the payments from such trust are subject to income tax withholding under section 3402(*o*) and the regulations thereunder, the trust must file, in lieu of such annual information return, the returns of income tax withheld from wages required by section 6011 and the regulations thereunder. In such circumstances, the trust must also furnish the statements to the recipients of trust distributions required by section 6051 and the regulations thereunder.

[T.D. 6972, 33 FR 12901, Sept. 12, 1968, as amended by T.D. 7068, 35 FR 17328, Nov. 11, 1970]

§ 1.501(c)(17)–3 Relation to other sections of the Code.

(a) Taxability of benefit distributions—(1) Separation benefits. If the separation benefits described in section 501(c)(17)(D)(i) are funded entirely by employer contributions, then the full amount of any separation benefit payment received by an employee is includible in his gross income under section 61(a). If any such separation benefit is funded by both employer and employee contributions, or solely by employee contributions, the amount of any separation benefit payment which is includible in the gross income of the employee is the amount by which such distribution and any prior distributions of such separation payments exceeds the employee's total contributions to fund such separation benefits.

(2) Sick and accident benefits. Any benefit payment received from the trust under the part of the plan, if any, which provides for the payment of sick and accident benefits must be included in gross income under section 61(a), unless specifically excluded under section 104 or 105 and the regulations thereunder. See section 105(b) and § 1.105–2 for benefit payments expended for medical care, benefit payments in excess of actual medical expenses, and benefit payments which an employee is entitled to receive irrespective of whether or not he incurs expenses for medical care. See section 213 and § 1.213–1(g) for benefit payments representing reimbursement for medical expenses paid in prior years. See § 1.501(c)(17)–2(i) for the requirement that a trust described in section 501(c)(17) which receives em-

ployee contributions must be part of a written plan which provides for the allocation of the cost of funding sick and accident benefits.

(b) Exemption as a voluntary employees' beneficiary association. Section 501(c)(17)(E) contemplates that a trust forming part of a plan providing for the payment of supplemental unemployment compensation benefits may, if it qualifies, apply for exemption from income tax under section 501(a) either as a voluntary employees' beneficiary association described in section 501(c)(9) or as a trust described in section 501(c)(17).

(c) Returns. A trust which is described in section 501(c)(17) and which is exempt from tax under section 501(a) must file a return in accordance with section 6033 and the regulations thereunder. If such a trust realizes any unrelated business taxable income, as defined in section 512, the trust is also required to file a return with respect to such income.

(d) Effective date. Section 501(c)(17) shall apply to taxable years beginning after December 31, 1959, and shall apply to supplemental unemployment benefit trusts regardless of when created or organized.

[T.D. 6972, 33 FR 12902, Sept. 12, 1968]

§ 1.501(c)(18)–1 Certain funded pension trusts.

(a) In general. Organizations described in section 501(c)(18) are trusts created before June 25, 1959, forming part of a plan for the payment of benefits under a pension plan funded only by contributions of employees. In order to be exempt, such trusts must also meet the requirements set forth in section 501(c)(18)(A), (B), and (C), and in paragraph (b) of this section.

(b) Requirements for qualification. A trust described in section 501(c)(18) must meet the following requirements—

(1) Local law. The trust must be a valid, existing trust under local law, and must be evidenced by an executed written document.

(2) Funding. The trust must be funded solely from contributions of employees who are members of the plan. For purposes of this section, the term "contributions of employees" shall include earnings on, and gains derived from, the assets of the trust which were contributed by employees.

(3) Creation before June 25, 1959—(i) In general. The trust must have been created before June 25, 1959. A trust created before June 25, 1959 is described in section 501(c)(18) and this section even though changes in the makeup of the trust have occurred since that time so long as these are not fundamental changes in the character of the trust or in the character of the beneficiaries of the trust. Increases in the beneficiaries of the trust by the addition of employees in the same or related industries, whether such additions are of individuals or of units (such as local units of a union) will generally not be considered a fundamental change in the character of the trust. A merger of a trust created after June 25, 1959 into a trust created before such date is not in itself a fundamental change in the character of the latter trust if the two trusts are for the benefit of employees of the same or related industries.

(ii) Examples. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Assume that trust C, for the benefit of members of participating locals of National Union X, was established in 1950 and adopted by 29 locals before June 25, 1959. The subsequent adoption of trust C by additional locals of National Union X in 1962 will not constitute a fundamental change in the character of trust C, since such subsequent adoption is by employees in a related industry.

Example (2). Assume the facts as stated in example (1), except that in 1965 National Union X merged with National Union Y, whose members are engaged in trades related to those engaged in by X's members. Assume further that trust D, the employee funded pension plan and fund for employees of Y, was subsequently merged into trust C. The merger of trust D into trust C would not in itself constitute a fundamental change in the character of trust C, since both C and D are for the benefit of employees of related industries.

(4) Payment of benefits. The trust must provide solely for the payment of pension or retirement benefits to its beneficiaries. For purposes of this section, the term "retirement benefits" is intended to include customary and incidental benefits, such as death benefits within the limits permissible under section 401.

(5) Diversion. The trust must be part of a plan which provides that, before the satisfaction of all liabilities to employees covered by the plan, the corpus and income of the trust cannot (within the taxable year and at any time thereafter) be used for, or diverted to, any purpose other than the providing of pension or retirement benefits. Payment of expenses in connection with the administration of a plan providing pension or retirement benefits shall be considered a payment to provide such benefits and shall not affect the qualification of the trust.

(6) Discrimination. The trust must be part of a plan whose eligibility conditions and benefits do not discriminate in favor of employees who are

officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. See sections 401(a)(3)(B) and 401(a)(4) and §§ 1.401–3 and 1.401–4. However, a plan is not discriminatory within the meaning of section 501(c)(18) merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan. Accordingly, the benefits provided for highly paid employees may be greater than the benefits provided for lower paid employees if the benefits are determined by reference to their compensation; but, in such a case, the plan will not qualify if the benefits paid to the higher paid employees are a larger portion of compensation than the benefits paid to lower paid employees.

(7) Objective standards. The trust must be part of a plan which requires that benefits be determined according to objective standards. Thus, while a plan may provide similarly situated employees with benefits which differ in kind and amount, these benefits may not be determined solely in the discretion of the trustees.

(c) Effective date. The provisions of section 501(c)(18) and this section shall apply with respect to taxable years beginning after December 31, 1969.

[T.D. 7172, 37 FR 5618, March 17, 1972]

§ 1.501(c)(19)–1 War veterans organizations.

(a) In general. (1) For taxable years beginning after December 31, 1969, a veterans post or organization which is organized in the United States or any of its possessions may be exempt as an organization described in section 501(c)(19) if the requirements of paragraphs (b) and (c) of this section are met and if no part of its net earnings inures to the benefit of any private shareholder or individual. Paragraph (b) of this section contains the membership requirements such a post or organization must meet in order to qualify under section 501(c)(19). Paragraph (c) of this section outlines the purposes, at least one of which such a post or organization must have in order to so qualify.

(2) In addition, an auxiliary unit or society described in paragraph (d) of this section of such a veterans post or organization and a trust or foundation described in paragraph (e) of this section for such post or organization may be exempt as an organization described in section 501(c)(19).

(b) Membership requirements. (1) In order to be described in section 501(c)(19) under paragraph (a)(1) of this section, an organization must meet the membership requirements of section 501(c)(19)(B) and this paragraph. There are two requirements that must be met under this paragraph. The first requirement is that at least 75 percent of the members of the organization must be war veterans. For purposes of this section the term "war veterans" means persons, whether or not present members of the United States Armed Forces, who have served in the Armed Forces of the United States during a period of war (including the Korean and Vietnam conflicts).

(2) The second requirement of this paragraph is that at least 97.5 percent of all members of the organization must be described in one or more of the following categories:

(i) War veterans,

(ii) Present or former members of the United States Armed Forces,

(iii) Cadets (including only students in college or university ROTC programs or at Armed Services academies), or

(iv) Spouses, widows, or widowers of individuals referred to in paragraph (b)(2)(i), (ii) or (iii) of this section.

(c) Exempt purposes. In addition to the requirements of paragraphs (a)(1) and (b) of this section, in order to be described in section 501(c)(19) under paragraph (a)(1) of this section an organization must be operated exclusively for one or more of the following purposes:

(1) To promote the social welfare of the community as defined in § 1.501(c)(4)–1(a)(2).

(2) To assist disabled and needy war veterans and members of the United States Armed Forces and their dependents, and the widows and orphans of deceased veterans,

(3) To provide entertainment, care, and assistance to hospitalized veterans or members of the Armed Forces of the United States,

(4) To carry on programs to perpetuate the memory of deceased veterans and members of the Armed Forces and to comfort their survivors,

(5) To conduct programs for religious, charitable, scientific, literary, or educational purposes,

(6) To sponsor or participate in activities of a patriotic nature,

(7) To provide insurance benefits for their members or dependents of their members or both, or

(8) To provide social and recreational activities for their members.

(d) Auxiliary units or societies for war veterans organizations. A unit or society may be exempt as an organization described in section 501(c)(19) and paragraph (a)(2) of this section if it is an auxiliary unit or society of a post or organization of war veterans described in paragraph (a)(1) of this section. A unit or society is an auxiliary unit or society or such a post or organization if it meets the following requirements:

(1) It is affiliated with, and organized in accordance with, the bylaws and regulations formulated by an organization described in paragraph (a)(1) of this section,

(2) At least 75 percent of its members are either war veterans, or spouses of war veterans, or are related to a war veteran within two degrees of consanguinity (*i.e.*, grandparent, brother, sister, grandchild, represent the most distant allowable relationships),

(3) All of its members are either members of an organization described in paragraph (a)(1) of this section, or spouses of a member of such an organization or are related to a member of such an organization, within two degrees of consanguinity, and

(4) No part of its net earnings inures to the benefit of any private shareholder or individual.

(e) Trusts or foundations. A trust or foundation may be exempt as an organization described in section 501(c)(19) and paragraph (a)(2) of this section if it is a trust or foundation for a post or organization of war veterans described in paragraph (a)(1) of this section. A trust or foundation is a trust or foundation for such a post or organization if it meets the following requirements:

(1) The trust or foundation is in existence under local law and, if organized for charitable purposes, has a dissolution provision described in § 1.501(c)(3)–1(b)(4).

(2) The corpus or income cannot be diverted or used other than for the funding of a post or organization of war veterans described in paragraph (a)(1) of this section, for section 170(c)(4) purposes, or as an insurance set aside (as defined in § 1.512(a)–4(b)).

(3) The trust income is not unreasonably accumulated and, if the trust or foundation is not an insurance set aside, a substantial portion of the income is in fact distributed to such post or organization or for section 170(c)(4) charitable purposes, and

(4) It is organized exclusively for one or more of those purposes enumerated in paragraph (c) of this section.

[T.D. 7438, 41 FR 44392, Oct. 8, 1976]

§ 1.501(c)(21)–1 Black lung trusts—certain terms.

(a) Created or organized in the United States. A trust is not "created or organized in the United States" unless it is maintained at all times as a domestic trust in the United States. For this purpose, section 7701(a)(9) limits the term "United States" to the District of Columbia and States of the United States.

(b) Insurance company. The term "insurance company" means an insurance, surety, bonding or other company whose liability for the kinds of claims to which section 501(c)(21)(A)(i) applies is as an insurer or guarantor of the liabilities of another.

(c) Black Lung Acts. The term "Black Lung Acts" includes any State law providing compensation for disability or death due to pneumoconiosis even though the State law compensates for other kinds of injuries. In such a case, section 501(c)(21) applies only to the extent that the liability is attributable to disability or death due to pneumoconiosis. For this purpose, the term "pneumoconiosis" has the same meaning as it has under federal law. See 30 U.S.C. 902.

(d) Insurance exclusively covering such liability. The term "insurance exclusively covering such liability" includes insurance that covers risk for liabilities in addition to the liabilities to which section 501(c)(21)(A)(i) applies. In such a case, payment for premiums may be made from the trust only to the extent of that portion of the premiums that has been separately allocated and stated by the insurer as attributable solely to coverage of the liabilities to which section 501(c)(21)(A)(i) applies.

(e) Administrative and other incidental expenses. The term "administrative and other incidental expenses" means expenditures that are appropriate and helpful to the trust making them in carrying out the purposes for which its assets may be used under section 501(c)(21)(B). The term includes any excise tax imposed on the trust under section 4952 (relating to taxes on taxable expendi-

tures) and reasonable expenses, such as legal expenses, incurred by the trust in connection with an assertion against the trust of liability for a taxable expenditure. The term does not include an excise tax imposed on the trustee or on other disqualified persons under section 4951 (relating to taxes on self-dealing) or under section 4953 (relating to tax on excess contributions to black lung benefit trusts) or any expenses incurred in connection with the assertion of these taxes other than expenses that are treated as part of reasonable compensation under section 4951(d)(2)(C). See §§ 53.4941(d)–2(f)(3) and (d)–3(c) for interpretations of similar provisions under section 4941(d)(2)(E), relating to reasonable compensation for private foundation disqualified persons.

(f) **Public debt securities of the United States.** The term "public debt securities of the United States" means obligations that are taken into consideration for purposes of the public debt limit. See, for example 31 U.S.C. 757b.

(g) **Obligations of a State or local government.** The term "obligations of a State or local government" means the obligations of a State or local governmental unit the interest on which is exempt from tax under section 103(a). See § 1.103–1(a).

(h) **Time or demand deposits.** The term "time or demand deposits" includes checking accounts, savings accounts, certificates of deposit or other time or demand deposits. The term does not include common or collective trust funds such as a common trust fund as defined in section 584.
[44 FR 52197, Sept. 7, 1979]

§ 1.501(c)(21)–2 Same—trust instrument.

As trust does not meet the requirements of section 501(c)(21) if it is not established and maintained pursuant to a written instrument. The trust instrument must definitely and affirmatively prohibit a diversion or use of trust assets that is not permitted under section 501(c)(21)(B) or section 4953(c), whether by operation or natural termination of the trust, by power of revocation or amendment by the happening of a contingency by collateral arrangement, or by any other means. No particular form for the trust instrument is required. A trust may meet the requirements of section 501(c)(21) although the trust instrument fails to contain provisions the effects of which are to prohibit acts that are subject to section 4951 (relating to taxes on self-dealing), section 4952 (relating to taxes on taxable expenditures) or the retention of contributions subject to section 4953 (relating to tax on excess contributions to black lung benefit trusts).
[44 FR 52197, Sept. 7, 1979]

§ 1.501(d)–1 Religious and apostolic associations or corporations.

(a) Religious or apostolic associations or corporations are described in section 501(d) and are exempt from taxation under section 501(a) if they have a common treasury or community treasury, even though they engage in business for the common benefit of the members, provided each of the members includes (at the time of filing his return) in his gross income his entire pro rata share, whether distributed or not, of the net income of the association or corporation for the taxable year of the association or corporation ending with or during his taxable year. Any amount so included in the gross income of a member shall be treated as a dividend received.

(b) For annual return requirements of organizations described in section 501(d), see section 6033 and paragraph (a)(5) of § 1.6033–1.

§ 1.501(e)–1 Cooperative hospital service organizations.

(a) **General rule.** Section 501(e) is the exclusive and controlling section under which a cooperative hospital service organization can qualify as a charitable organization. A cooperative hospital service organization which meets the requirements of section 501(e) and this section shall be treated as an organization described in section 501(c)(3), exempt from taxation under section 501(a), and referred to in section 170(b)(1)(A)(iii) (relating to percentage limitations on charitable contributions). In order to qualify for tax exempt status, a cooperative hospital service organization must—

(1) Be organized and operated on a cooperative basis,

(2) Perform, on a centralized basis, only one or more specifically enumerated services which, if performed directly by a tax exempt hospital, would constitute activities in the exercise or performance of the purpose or function constituting the basis for its exemption, and

(3) Perform such service or services solely for two or more patron-hospitals as described in paragraph (d) of this section.

(b) **Organized and operated on a cooperative basis**—(1) **In general.** In order to meet the requirements of section 501(e), the organization must be organized and operated on a cooperative

basis (whether or not under a specific statute on cooperatives) and must allocate or pay all of its net earnings within 8½ months after the close of the taxable year to its patron-hospitals on the basis of the percentage of its services performed for each patron. To "allocate" its net earnings to its patron-hospitals, the organization must make appropriate bookkeeping entries and provide timely written notice to each patron-hospital disclosing to the patron-hospital the amount allocated to it on the books of the organization. For the record-keeping requirements of a section 501(e) organization, see § 1.521-1(a)(1).

(2) Percentage of services defined. The percentage of services performed for each patron-hospital may be determined on the basis of either the value or the quantity of the services provided by the organization to the patron-hospital, provided such basis is realistic in terms of the actual cost of the services to the organization.

(3) Retention of net earnings. Exemption will not be denied a cooperative hospital service organization solely because the organization, instead of paying all net earnings to its patron-hospitals, retains an amount for such purposes as retiring indebtedness, expanding the services of the organization, or for any other necessary purpose and allocates such amounts to its patrons. However, such funds may not be accumulated beyond the reasonably anticipated needs of the organization. See, § 1.537-1(b). Whether there is an improper accumulation of funds depends upon the particular circumstances of each case. Moreover, where an organization retains net earnings for necessary purposes, the organization's records must show each patron's rights and interests in the funds retained. For purposes of this paragraph, the term "net earnings" does not include capital contributions to the organization and such contributions need not satisfy the allocation or payment requirements.

(4) Nonpatronage and other income. An organization described in section 501(e) may, in addition to net earnings, receive membership dues and related membership assessment fees, gifts, grants and income from nonpatronage sources such as investment of retained earnings. However, such an organization cannot be exempt if it engages in any business other than that of providing the specified services, described in paragraph (c), for the specified patron-hospitals, described in paragraph (d). Thus, an organization described in section 501(e) generally cannot have unrelated business taxable income as defined in section 512, although it may earn certain interest, annuities, royalties, and rents which are excluded from unrelated business taxable income because of the modifications contained in sections 512(b)(1), (2) or (3). An organization described in section 501(e) may, however, have debt-financed income which is treated as unrelated business taxable income solely because of the applicability of section 514. In addition, exempt status under section 501(e) will not be affected where rent from personal property leased with real property is treated as unrelated business taxable income under section 512(b)(3)(A)(ii) solely because the rent attributable to the personal property is more than incidental or under section 512(b)(3)(B)(i) solely because the rent attributable to the personal property exceeds 50 percent of the total rent received or accrued under the lease. Exemption will not be affected solely because the determination of the amount of rent depends in whole or in part on the income or profits derived from the property leased. See, section 512(b)(3)(B)(ii). An organization described in section 501(e) may also derive nonpatronage income from sources that are incidental to the conduct of its exempt purposes or functions. For example, income derived from the operation of a cafeteria or vending machines primarily for the convenience of its employees or the disposition of by-products in substantially the same state they were in on completion of the exempt function (e.g., the sale of silver waste produced in the processing of x-ray film) will not be considered unrelated business taxable income. See, section 513(a)(2) and § 1.513–1(d)(4)(ii). The nonpatronage and other income permitted under this subparagraph (4) must be allocated or paid as provided in subparagraph (1) or retained as provided in subparagraph (3).

(5) Stock ownership—(i) Capital stock of organization. An organization does not meet the requirements of section 501(e) unless all of the organization's outstanding capital stock, if there is such stock, is held solely by its patron-hospitals. However, no amount may be paid as dividends on the capital stock of the organization. For purposes of the preceding sentence, the term "capital stock" includes common stock (whether voting or nonvoting), preferred stock, or any other form evidencing a proprietary interest in the organization.

(ii) Stock ownership as a condition for obtaining credit. If by statutory requirement a cooperative hospital service organization must be a shareholder in a United States or state chartered corporation as a condition for obtaining credit from that corporate-lender, the ownership of shares and the

payment of dividends thereon will not for such reason be a basis for the denial of exemption to the organization. See, e.g., National Consumer Cooperative Bank, 12 U.S.C. 3001 et seq.

(c) **Scope of services—(1) Permissible services.** An organization meets the requirements of section 501(e) only if the organization performs, on a centralized basis, one or more of the following services and only such services: data processing, purchasing (including the purchasing and dispensing of drugs and pharmaceuticals to patron-hospitals), warehousing, billing and collection, food, clinical (including radiology), industrial engineering (including the installation, maintenance and repair of biomedical and similar equipment), laboratory, printing, communications, record center, and personnel (including recruitment, selection, testing, training, education and placement of personnel) services. An organization is not described in section 501(e) if, in addition to or instead of one or more of these specified services, the organization performs any other service (other than services referred to under paragraph (b)(4) that are incidental to the conduct of exempt purposes or functions).

(2) **Illustration.** The provisions of this subparagraph may be illustrated by the following example.

Example. An organization performs industrial engineering services on a cooperative basis solely for patron-hospitals each of which is an organization described in section 501(c)(3) and exempt from taxation under section 501(a). However, in addition to this service, the organization operates laundry services for its patron-hospitals. This cooperative organization does not meet the requirements of this paragraph because it performs laundry services not specified in this paragraph.

(d) **Patron-hospitals—(1) Defined.** Section 501(e) only applies if the organization performs its services solely for two or more patron-hospitals each of which is—

(i) An organization described in section 501(c)(3) which is exempt from taxation under section 501(a),

(ii) A constituent part of an organization described in section 501(c)(3) which is exempt from taxation under section 501(a) and which, if organized and operated as a separate entity, would constitute an organization described in section 501(c)(3), or

(iii) Owned and operated by the United States, a State, the District of Columbia, or a possession of the United States, or a political subdivision or an agency or instrumentality of any of the foregoing.

(2) **Business with nonvoting patron-hospitals.** Exemption will not be denied a cooperative hospital service organization solely because the organization (whether organized on a stock or membership basis) transacts business with patron-hospitals which do not have voting rights in the organization and therefore do not participate in the decisions affecting the operation of the organization. Where the organization has both patron-hospitals with voting rights and patron-hospitals without such rights, the organization must provide at least 50 percent of its services to patron-hospitals with voting rights in the organization. Thus, the percentage of services provided to nonvoting patrons may not exceed the percentage of such services provided to voting patrons. A patron-hospital will be deemed to have voting rights in the cooperative hospital service organization if the patron-hospital may vote directly on matters affecting the operation of the organization or if the patron-hospital may vote in the election of cooperative board members. Notwithstanding that an organization may have both voting and nonvoting patron-hospitals, patronage refunds must nevertheless be allocated or paid to all patron-hospitals solely on the basis specified in paragraph (b) of this section.

(3) **Services to other organizations.** An organization does not meet the requirements of section 501(e) if, in addition to performing services for patron-hospitals (entities described in subdivisions (i), (ii) or (iii) of subparagraph (1)), the organization performs any service for any other organization. For example, a cooperative hospital service organization is not exempt if it performs services for convalescent homes for children or the aged, vocational training facilities for the handicapped, educational institutions which do not provide hospital care in their facilities, and proprietary hospitals. However, the provision of the specified services between or among cooperative hospital service organizations meeting the requirements of section 501(e) and this section is permissible. Also permissible is the provision of the specified services to entities which are not patron-hospitals, but only if such services are de minimis and are mandated by a governmental unit as, for example, a condition for licensing.

(e) **Effective dates.** An organization, other than an organization performing clinical services, may meet the requirements of section 501(e) and be a tax exempt organization for taxable years ending after June 28, 1968. An organization performing clinical services may meet the requirements of section 501(e) and be a tax exempt organization for taxable years ending after December 31, 1976.

However, pursuant to the authority contained in section 7805(b) of the Internal Revenue Code, these regulations shall not become effective with respect to an organization which has received a ruling or determination letter from the Internal Revenue Service recognizing its exemption under section 501(e) until January 2, 1987.

[T.D. 8100, 51 FR 31615, Sept. 4, 1986; 51 FR 33593, Sept. 22, 1986]

§ 1.501(k)–1 Communist-controlled organizations.

Under section 11(b) of the Internal Security Act of 1950 (50 U.S.C. 790(b)), as amended, which is made applicable to the Code by section 7852(b) of that Code, no organization is entitled to exemption under sections 501(a) or 521(a) for any taxable year if at any time during such year such organization is registered under section 7 of such Act or if there is in effect a final order of the Subversive Activities Control Board established by section 12 of such Act requiring such organization to register under section 7 of such Act, or determining that it is a Communist-infiltrated organization.

[T.D. 8100, 51 FR 31615, Sept. 4, 1986]

§ 1.502–1 Feeder organizations.

(a) In the case of an organization operated for the primary purpose of carrying on a trade or business for profit, exemption is not allowed under section 501 on the ground that all the profits of such organization are payable to one or more organizations exempt from taxation under section 501. In determining the primary purpose of an organization, all the circumstances must be considered, including the size and extent of the trade or business and the size and extent of those activities of such organization which are specified in the applicable paragraph of section 501.

(b) If a subsidiary organization of a tax-exempt organization would itself be exempt on the ground that its activities are an integral part of the exempt activities of the parent organization, its exemption will not be lost because, as a matter of accounting between the two organizations, the subsidiary derives a profit from its dealings with its parent organization, for example, a subsidiary organization which is operated for the sole purpose of furnishing electric power used by its parent organization, a tax-exempt educational organization, in carrying on its educational activities. However, the subsidiary organization is not exempt from tax if it is operated for the primary purpose of carrying on a trade or business which would be an unrelated trade or business (that is, unrelated to exempt activities) if regularly carried on by the parent organization. For example, if a subsidiary organization is operated primarily for the purpose of furnishing electric power to consumers other than its parent organization (and the parent's tax-exempt subsidiary organizations), it is not exempt since such business would be an unrelated trade or business if regularly carried on by the parent organization. Similarly, if the organization is owned by several unrelated exempt organizations, and is operated for the purpose of furnishing electric power to each of them, it is not exempt since such business would be an unrelated trade or business if regularly carried on by any one of the tax-exempt organizations. For purposes of this paragraph, organizations are related only if they consist of—

(1) A parent organization and one or more of its subsidiary organizations; or

(2) Subsidiary organizations having a common parent organization.

An exempt organization is not related to another exempt organization merely because they both engage in the same type of exempt activities.

(c) In certain cases an organization which carries on a trade or business for profit but is not operated for the primary purpose of carrying on such trade or business is subject to the tax imposed under section 511 on its unrelated business taxable income.

(d) Exception—(1) Taxable years beginning before January 1, 1970. For purposes of section 502 and this section, for taxable years beginning before January 1, 1970, the term "trade or business" does not include the rental by an organization of its real property (including personal property leased with the real property).

(2) Taxable years beginning after December 31, 1969. For purposes of section 502 and this section, for taxable years beginning after December 31, 1969, the term "trade or business" does not include—

(i) The deriving of rents described in section 512(b)(3)(A),

(ii) Any trade or business in which substantially all the work in carrying on such trade or business is performed for the organization without compensation, or

(iii) Any trade or business (such as a "thrift shop") which consists of the selling of merchandise, substantially all of which has been received by the organization as gifts or contributions.

For purposes of the exception described in subdivision (i) of this subparagraph, if the rents derived by an organization would not be excluded from unrelated business income pursuant to section 512(b)(3) and the regulations thereunder, the deriving of such rents shall be considered a "trade or business".

(3) **Cross references and special rules.** (i) For determination of when rents are excluded from the tax on unrelated business income see section 512(b)(3) and the regulations thereunder.

(ii) The rules contained in § 1.513-1(e)(1) shall apply in determining whether a trade or business is described in section 502(b)(2) and subparagraph (2)(ii) of this paragraph.

(iii) The rules contained in § 1.513-1(e)(3) shall apply in determining whether a trade or business is described in section 502(b)(3) and subparagraph (2)(iii) of this paragraph.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6662, 28 FR 6973, July 29, 1963; T.D. 7033, 35 FR 19997, Dec. 31, 1970]

§ 1.503(a)-1 Denial of exemption to certain organizations engaged in prohibited transactions.

(a)(1) Prior to January 1, 1970, section 503 applies to those organizations described in sections 501(c)(3), 501(c)(17), and section 401(a) except—(i) A religious organization (other than a trust);

(ii) An educational organization which normally maintains a regular faculty and curriculum and normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on;

(iii) An organization which normally receives a substantial part of its support (exclusive of income received in the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501(a)) from the United States or any State or political subdivision thereof or from direct or indirect contributions from the general public,

(iv) An organization which is operated, supervised, controlled or principally supported by a religious organization (other than a trust) which is itself not subject to the provisions of this section; and

(v) An organization the principal purposes or functions of which are the providing of medical or hospital care or medical education or medical research or agricultural research.

(2) Effective January 1, 1970, and prior to January 1, 1975, section 503 shall apply only to organizations described in section 501(c)(17) or (18) or section 401(a).

(3) Effective January 1, 1975, section 503 shall apply only to organization described in section 501(c)(17) or (18) or described in section 401(a) and referred to in section 4975(g)(2) or (3).

(b) The prohibited transactions enumerated in section 503(b) are in addition to and not in limitation of the restrictions contained in section 501(c)(3), (17), or (18) or section 401(a). Even though an organization has not engaged in any of the prohibited transactions referred to in section 503(b), it still may not qualify for tax exemptions in view of the general provisions of section 501(c)(3), (17), or (18) or section 401(a). Thus, if a trustee or other fiduciary of the organization (whether or not he is also a creator of such organization) enters into a transaction with the organization, such transaction will be closely scrutinized in the light of the fiduciary principle requiring undivided loyalty to ascertain whether the organization is in fact being operated for the stated exempt purpose.

(c) **An organization—(1)** Described in section 501(c)(3) which after July 1, 1950, but before January 1, 1970, has engaged in any prohibited transaction as defined in section 503(b), unless it is excepted by the provisions of paragraph (a)(1) of this section;

(2) Described in section 401(a) and referred to in section 4975(g)(2) or (3) which after March 1, 1954, has engaged in any prohibited transaction as defined in section 503(b);

(3) Described in section 401(a) and not referred to in section 4975(g)(2) or (3) which after March 1, 1954, but before January 1, 1975, has engaged in any prohibited transaction as defined in section 503(b) or which after December 31, 1962, but before January 1, 1975, has engaged in any prohibited transaction as defined in section 503(g) prior to its repeal by section 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978);

(4) Described in section 501(c)(17) which after December 31, 1959, has engaged in any prohibited transaction as defined in section 503(b); or

(5) Described in section 501(c)(18) which after December 31, 1969, has engaged in any prohibited transaction described in section 503(b);

shall not be exempt from taxation under section 501(a) for any taxable year subsequent to the taxable year in which there is mailed to it a notice in writing by the Commissioner that it has engaged in such prohibited transactions. Such notification by the Commissioner shall be by registered or certified mail to the last known name and address of the organization. However, notwithstanding the requirement of notification by the Commissioner, the exemption shall be denied with respect to any taxable year if such organization during or prior to such taxable year commenced the prohibited transaction with the purpose of diverting income or corpus from its exempt purposes and such transaction involved a substantial party of the income or corpus of such organization. For the purpose of this section, the term "taxable year" means the established annual accounting period of the organization; or, if the organization has no such established annual accounting period, the "taxable year" of the organizations means a calendar year. See 26 CFR § 1.503(j)–1 (rev. as of Apr. 1, 1974) for provisions relating to the definition of prohibited transactions in the case of trusts benefitting certain owner-employees after December 31, 1962, but prior to January 1, 1975. See also section 2003(c)(1)(B) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978) in the case of an organization described in section 401(a) with respect to which a disqualified person elects to pay a tax in the amount and manner provided with respect to the tax imposed by section 4975 of the Code so that the organization may avoid denial of exemption under section 503.

(d) The application of section 503(b) may be illustrated by the following examples:

Example (1). A creates a foundation in 1954 ostensibly for educational purposes. B, a trustee, accumulates the foundation's income from 1957 until 1959 and then uses a substantial part of this accumulated income to send A's children to college. The foundation would lose its exemption for the taxable years 1957 through 1959 and for subsequent taxable years until it regains its exempt status.

Example (2). If under the facts in example (1) such private benefit was the purpose of the foundation from its inception, such foundation is not exempt by reason of the general provisions of section 501(c)(3), without regard to the provisions of section 503, for all years since its inception, that is, for the taxable years 1954 through 1959 and subsequent taxable years, since under section 501(c)(3) the organization must be organized and operated exclusively for exempt purposes. See § 1.501(c)(3)–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5074, Apr. 14, 1964; T.D. 6972, 33 FR 12902, Sept. 12, 1968; T.D. 7428, 41 FR 34621, Aug. 16, 1976]

§ 1.503(b)–1 Prohibited transactions.

(a) In general. The term "prohibited transaction" means any transaction set forth in section 503(b) engaged in by any organization described in paragraph (a) of § 1.503(a)–1. Whether a transaction is a prohibited transaction depends on the facts and circumstances of the particular case. This section is intended to deny tax-exempt status to such organizations which engage in certain transactions which inure to the private advantage of (1) the creator of such organization (if it is a trust); (2) any substantial contributor to such organization; (3) a member of the family (as defined in section 267(c)(4) of an individual who is such creator of or such substantial contributor to such organization; or (4) a corporation controlled, as set forth in section 503(b), by such creator or substantial contributor.

(b) Loans as prohibited transactions under section 503(b)(1)—(1) Adequate security. For the purposes of section 503(b)(1), which treats as prohibited transactions certain loans by an organization without receipt of adequate security and a reasonable rate of interest, the term "adequate security" means something in addition to and supporting a promise to pay, which is so pledged to the organization that it may be sold, foreclosed upon, or otherwise disposed of in default of repayment of the loan, the value and liquidity of which security is such that it may reasonably be anticipated that loss of principal or interest will not result from the loan. Mortgages or liens on property, accommodation endorsements of those financially capable of meeting the indebtedness, and stock or securities issued by corporations other than the borrower may constitute security for a loan to the persons or organizations described in section 503(b). Stock of a borrowing corporation does not constitute adequate security. A borrower's evidence of indebtedness, irrespective of its name, is not security for a loan, whether or not it was issued directly to the exempt organization. However, if any such evidence of indebtedness provides for security that may be sold, foreclosed upon, or otherwise disposed of in default of repayment of the loan, there may be adequate security for such loan. If an organization subject to section 503(b) purchases debentures issued by a person specified in section 503(b), the purchase is considered, for purposes of section 503(b)(1), as a loan made by the purchaser to the issuer on the date of such purchase. For example, if an exempt organization subject to section 503(b) makes a purchase

through a registered security exchange of debentures issued by a person described in section 503(b), and owned by an unknown third party, the purchase will be considered as a loan to the issuer by the purchaser. For rules relating to loan of funds to, or investment of funds in stock or securities of, persons described in section 503(b) by an organization described in section 401(a), see paragraph (b)(5) of § 1.401–1.

(2) **Effective dates.** The effective dates for the application of the definition of adequate security in paragraph (b)(1) of this paragraph are:

(i) March 15, 1956, for loans (other than debentures) made after March 15, 1956;

(ii) January 31, 1957, for loans (other than debentures) made before March 16, 1956, and continued after January 31, 1957;

(iii) November 8, 1956, for debentures which were purchased after November 8, 1956;

(iv) December 1, 1958, for debentures which were purchased before November 9, 1956, and held after December 1, 1958;

(v) If an employees' pension, stock bonus, or profit-sharing trust described in section 401(a) made a loan before March 1, 1954, repayable by its terms after December 31, 1955, and which would constitute a prohibited transaction if made on or after March 1, 1954, the loan shall not constitute a prohibited transaction if held until maturity (determined without regard to any extension or renewal thereof);

(vi) January 1, 1960, for loans (including the purchase of debentures) made by supplemental unemployment benefit trusts, described in section 501(c)(17);

(vii) January 1, 1970, for loans (including the purchase of debentures) made by employees' contribution pension plan trusts described in section 501(c)(18).

(3) **Certain exceptions to section 503(b)(1).** See section 503(e) and § 1.503(e)–1, 1.503(e)–2, and 1.503(e)–3 for special rules providing that certain obligations acquired by trusts described in section 401(a) or section 501(c)(17) or (18) shall not be treated as loans made without the receipt of adequate security for purposes of section 503(b)(1). See section 503(f) and § 1.503(f)–1 for an exception to the application of sections 503(b)(1) for certain loans made by employees' trusts described in section 401(a).

(c) **Examples.** The principles of this section are illustrated by the following examples: (Assume that section 503(e) and (f) are not applicable.)

Example (1). A, creator of an exempt trust subject to section 503, borrows $100,000 from such trust in 1960, giving his unsecured promissory note. The net worth of A is $1,000,000. The net worth of A is not "security" for such loan and the transaction is a prohibited transaction. If, however, the note is secured by a mortgage on property of sufficient value, or is accompanied by acceptable collateral of sufficient value, or carries with it the secondary promise of repayment by an accommodation endorser financially capable of meeting the indebtedness, it may be adequately secured. However, subordinated debentures bonds of a partnership which are guaranteed by the general partners are not adequately secured since the general partners are liable for the firm's debt and their guaranty adds no additional security.

Example (2). Assume the same facts as in example (1) except that A's promissory note in the amount of $100,000 to the trust is secured by property which has a fair market value of $75,000. A's promissory note secured to the extent of $75,000 is not adequately secured within the meaning of section 503(b)(1) since the security at the time of the transaction must be sufficient to repay the indebtedness, interest, and charges which may pertain thereto.

Example (3). Corporation M, a substantial contributor to an exempt organization subject to section 503, borrows $150,000 from such organization in 1960, giving its promissory note accompanied by stock of the borrowing corporation with a fair market value of $200,000. Since promissory notes and debentures have priority over stock in the event of liquidation of the corporation, stock of a borrowing corporation is not adequate security. Likewise, debenture bonds which are convertible on default into voting stock of the issuing corporation do not constitute "adequate security" under section 503(b)(1).

Example (4). B, creator of an exempt trust subject to section 503, borrows $100,000 from such trust in 1960, giving his secured promissory note at the rate of 3 percent interest. The prevailing rate of interest charged by financial institutions in the community where the transaction takes place is 5 percent for a loan of the same duration and similarly secured. The loan by the trust to the grantor is a prohibited transaction since section 503(b)(1) requires both adequate security and a reasonable rate of interest. Further, a promise to repay the loan plus a percentage of future profits which may be greater than the prevailing rate of interest does not meet the reasonable rate of interest requirement.

Example (5). N Corporation, a substantial contributor to an exempt organization subject to section 503 borrows $50,000 on or after March 16, 1956, from the organization. If the loan is not adequately secured, the organization has committed a prohibited transaction at the time the loan was made. If the loan had been made on or before March 15, 1956, and is continued after January 31, 1957, it must be adequately secured on February 1, 1957, or it will be considered a prohibited transaction on that date. However, if the exempt organization were an employees' trust, described in section 401(a), and the loan were made before March 1, 1954, repayable by its terms after December 31, 1955, it would not have to be adequately secured on February 1, 1957. Moreover, if the exempt organization were a supplemental unemployment benefit trust, described in section 501(c)(17), and the loan were made before January 1, 1960, repayable by its terms after December 31, 1959, it would not have to be adequately secured on January 1, 1960.

Example (6). An exempt organization subject to section 503 purchases a debenture issued by O Corporation, which is a substantial contributor to the organization. The organization purchases the debenture in an arm's length transaction from a third person on or after November 9, 1956. The purchase is considered as a loan by the organization to O Corporation. The loan must be adequately secured when it is made, or it is considered as a prohibited transaction at that time. If the organization purchased the debenture before November 9, 1956, and holds it after December 1, 1958, the debenture must be adequately secured on December 2, 1958, or it will then be considered as a prohibited transaction. However, if the organization were an employees' trust described in section 401(a), and if the debenture were purchased before March 1, 1954, and its maturity date is after December 31, 1955, the debenture does not have to be adequately secured. Moreover, if the organization were an employees' contribution pension plan trust described in section 501(c)(18), and if the debenture were purchased before January 1, 1970, and its maturity date is after December 31, 1969, the debenture does not have to be adequately secured.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5074, Apr. 14, 1964; T.D. 6972, 33 FR 12903, Sept. 12, 1968; T.D. 7428, 41 FR 34621, Aug. 16, 1976]

§ 1.503(c)–1 Future status of organizations denied exemption.

(a) Any organization described in section 501(c)(3), (17), or (18), or an employees' trust described in section 401(a), which is denied exemption under section 501(a) by reason of the provisions of section 503(a), may file, in any taxable year following the taxable year in which notice of denial was issued, a claim for exemption. In the case of organizations described in section 501(c)(3), (17), or (18), the appropriate exemption application shall be used for this purpose, and shall be filed with the district director. In the case of an employees' trust described in section 401(a), the information described in § 1.404(a)–2 shall be submitted with a letter claiming exemption. All employees' trust described in section 401(a) shall submit this information to the district director with whom a request for a determination as to its qualification under section 401 and exemption under section 501 may be submitted under paragraph (s) of § 601.201 of this chapter (Statement of Procedural Rules). A claim for exemption must contain or have attached to it, in addition to the information generally required of such an organization claiming exemption as an organization described in section 501(c)(17), or (18), or section 401(a) (or section 501(c)(3) prior to January 1, 1970), a written declaration made under the penalties of perjury by principal officer of such organization authorized to make such declaration that the organization will not knowingly again engage in a prohibited transaction, (as defined in section 503(b) (or 4975(c) if such section applies to such organization)). In the case of section 501(c)(3) organizations which have lost their exemption after December 31, 1969, pursuant to section 503, a claim for exemption must contain or have attached to it a written agreement made under penalties of perjury by a principal officer of such organization authorized to make such agreement that the organization will not violate the provisions of chapter 42. In addition, such organization must comply with the rules for governing instruments as prescribed in § 1.508–3. See § 1.501(a)–1 for proof of exemption requirements in general.

(b) If the Commissioner is satisfied that such organization will not knowingly again engage in a prohibited transaction (as defined under section 503(b) or 4975(c), as applicable to such organization) or in the case of a section 501(c)(3) organization, will not violate the provisions of chapter 42, and the organization also satisfied all the other requirements under section 501(c)(3), (17), or (18), or section 401(a), the organization will be so notified in writing. In such case the organization will be exempt (subject to the provisions of section 501(c)(3), or sections 501(c)(17), (18) or 401(a), and 503, and 504 when applicable) with respect to the taxable years subsequent to the taxable year in which the claim described in section 503(c) is filed. Section 503 contemplates that an organization denied exemption because of the terms of such section will be subject to taxation for at least one full taxable year. For the purpose of this section, the term "taxable year" means the established annual accounting period of the organization; or, if the organization has no such established annual accounting period, the "taxable year" of the organization means the calendar year.

(c) For taxable years beginning after December 31, 1969, the denial of an exemption pursuant to this section, for a taxable year prior to January 1, 1970, of an organization described in section 501(c)(3) shall not cause such organization to cease to be described in section 501(c)(3) for purposes of part II of subchapter F, chapter 1 and for purposes of the application of chapter 42 taxes.

(d) In the case of an organization described in section 501(c)(3), which has lost its exemption pursuant to section 503, and which has not notified the Commissioner that it is applying for recognition of its exempt status under section 508(a) and this section, no gift or contribution made after December 31, 1969, which would otherwise be deductible under section 170, 642(c), or 545(b)(2) shall be allowed as a deduction. For rules relating to the denial of deductions with respect to gifts or

contributions made before January 1, 1970, see, § 1.503(e)–4.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6972, 33 FR 12904, Sept. 12, 1968; T.D. 7428, 41 FR 34622, Aug. 16, 1976; T.D. 7896, 48 FR 23815, May 27, 1983]

§ 1.503(d)–1 Cross references.

For provisions relating to loans described in section 503(b)(1) by a trust described in section 401(a), see § 1.503(b)–1 and section 503 (e) and (f) and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5074, Apr. 14, 1964; T.D. 7428, 41 FR 34623, Aug. 16, 1976]

§ 1.503(e)–1 Special rules.

(a) In general. **(1)** Section 503(e) provides that for purposes of section 503(b)(1)(relating to loans made without the receipt of adequate security and a reasonable rate of interest) the acquisition of a bond, debenture, note, or certificate or other evidence of indebtedness shall not be treated as a loan made without the receipt of adequate security if certain requirements are met. Those requirements are described in § 1.503(e)–2.

(2) Section 503(e) does not affect the requirement in section 503(b)(1) of a reasonable rate of interest. Thus, although the acquisition of a certificate of indebtedness which meets all of the requirements of section 503(e) and of § 1.503(e)–2 will not be considered as a loan made without the receipt of adequate security, the acquisition of such an indebtedness does constitute a prohibited transaction if the indebtedness does not bear a reasonable rate of interest.

(3) The provisions of section 503(e) do not limit the effect of section 401(a) and § 1.401–2, section 501(c)(17)(A)(i), or section 501(c)(18)(A), all relating to the use of diversion of corpus or income of the respective employee trusts. Furthermore, the provisions of section 503(e) do not limit the effect of any of the provisions of section 503 other than section 503(b)(1). Thus, for example, although a loan made by employees' trust described in section 503(a)(1)(B) meets all the requirements of section 503(e) and therefore is not treated as a loan made without the receipt of adequate security, such an employees' trust making such a loan will lose its exempt status if the loan is not considered as made for the exclusive benefit of the employees or their beneficiaries. Similarly, a loan which meets the requirements of section 503(e) will constitute a prohibited transaction within the meaning of section 503(b)(6) if it results in a substantial diversion of the trust's income or corpus to a person described in section 503(b).

(b) Definitions. For purposes of section 503(e):

(1) The term "obligation" means bond, debenture, note, or certificate or other evidence of indebtedness.

(2) The term "issuer" includes any person described in section 503(b) who issues an obligation.

(3)(i) The term "person independent of the issuer" means a person who is not related to the issuer by blood, by marriage, or by reason of any substantial business interests. Persons who will be considered not to be independent of the issuer include but are not limited to:

(a) The spouse, ancestor, lineal descendant, or brother or sister (whether by whole or half blood) of an individual who is the issuer of an obligation;

(b) A corporation controlled directly or indirectly by an individual who is the issuer, or directly or indirectly by the spouse, ancestor, lineal descendant, or brother or sister (whether by whole or half blood) of an individual who is the issuer;

(c) A corporation which directly or indirectly controls, or is controlled by, a corporate issuer;

(d) A controlling shareholder of a corporation which is the issuer, or which controls the issuer;

(e) An officer, director, or other employee of the issuer, of a corporation controlled by the issuer, or of a corporation which controls the issuer;

(f) A fiduciary of any trust created by the issuer, by a corporation which controls the issuer, or by a corporation which is controlled by the issuer; or

(g) A corporation controlled by a person who controls a corporate issuer.

(ii) For purposes of paragraph (b)(3)(i) of this section, the term "control" means, with respect to a corporation, direct or indirect ownership of 50 percent or more of the total combined voting power of all voting stock or 50 percent or more of the total value of shares of all classes of stock. If the aggregate amount of stock in a corporation owned by an individual and by the spouse, ancestors, lineal descendants, brothers and sisters (whether by whole or half blood) of the individual is 50 percent or more of the total combined voting power of all voting stock or is 50 percent or more of the total value of all classes of stock, then each

of these persons shall be considered as the controlling shareholder of the corporation.

(iii) In determining family relationships for purposes of paragraph (b)(3)(i) of this subparagraph, a legally adopted child of an individual shall be treated as a child of such individual by blood.

(4) The term "issue" means all the obligations of a issuer which are offered for sale on substantially the same terms. Obligations shall be considered offered for sale on substantially the same terms if such obligation would, at the same time and under the same circumstances, be traded on the market at the same price. On the other hand, if the terms on which obligations are offered for sale differ in such manner as would cause such obligations to be traded on the market at different prices, then such obligations are not part of the same issue. The following are examples of terms which, if different, would cause obligations to be traded on the market at different prices: (i) Interest rate; (ii) Maturity date; (iii) Collateral; and (iv) Conversion provisions.

The fact that obligations are offered for sale on different dates will not preclude such obligations from being part of the same issue if they all mature on the same date and if the terms on which they are offered for sale are otherwise the same, since such obligations would, at the same time and under the same conditions, be traded on the market at the same price. Obligations shall not be considered part of the same issue merely because they are part of the same authorization or because they are registered as part of the same issue with the Securities and Exchange Commission.

[T.D. 6493, 25 FR 9216, Sept. 27, 1960, as amended by T.D. 6972, 33 FR 12904, Sept. 12, 1968; T.D. 7428, 41 FR 34623, Aug. 16, 1976]

§ 1.503(e)–2 Requirements.

(a) In general. The requirements which must be met under section 503(e) for an obligation not to be treated as a loan made without the receipt of adequate security for purposes of section 503(b)(1) are described in paragraphs (b), (c), and (d) of this section. For purposes of this section, the term "employee trust" shall mean any of the three kinds of organizations described in section 503(a)(1).

(b) Methods of acquisition—(1) In general. The employee trust must acquire the obligation of the market, by purchase from an underwriter, or by purchase from the issuer, in the manner described in subparagraph (2), (3), or (4) of this paragraph.

(2) On the market. **(i)** An obligation is acquired on the market when it is purchased through a national securities exchange which is registered with the Securities and Exchange Commission, or when it is purchased in an over-the-counter transaction. For purposes of the preceding sentence, securities purchased through an exchange which is not a national securities exchange registered with the Securities and Exchange Commission shall be treated as securities purchased in an over-the-counter transaction.

(ii)(a) If the obligation is listed on a national securities exchange registered with the Securities and Exchange Commission, it must be purchased through such an exchange or in an over-the-counter transaction at a price not greater than the price of the obligation prevailing on such an exchange at the time of the purchase by the employee trust.

(b) For purposes of section 503(e), the price of the obligation prevailing at the time of the purchase means the price which accurately reflects the market value of the obligation. In the case of an obligation purchased through a national securities exchange which is registered with the Securities and Exchange Commission, the price paid for the obligation will be considered the prevailing price of the obligation. In the case of an obligation purchased in an over-the-counter transaction, the prevailing price may be the price at which the last sale of the obligation was affected on such national securities exchange immediately before the employee trust's purchase of such obligation on the same day or may be the mean between the highest and lowest prices at which sales were effected on such exchange on the same day or on the immediately preceding day or on the last day during which there were sales of such obligation or may be a price determined by any other method which accurately reflects the market value of the obligation.

(iii)(a) If the obligation is not listed on a national securities exchange which is registered with the Securities and Exchange Commission, it must be purchased in an over-the-counter transaction at a price not greater than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer.

(b) For purposes of section 503(e) the offering price for the obligation at the time of the purchase means the price which accurately reflects the market value of the obligation. The offering price may be the price at which the last sale of the obligation to a person independent of the issuer was effected immediately before the employee

trust's purchase of such obligation on the same day or may be the mean between the highest and lowest prices at which sales to persons independent of the issuer were effected on the same day or on the last day during which they were sales of such obligation or may be a price determined by any other method which accurately reflects the market value of the obligation. The offering price for an obligation must be a valid price for the amount of the obligations which the trust is purchasing. For example, if an employees' trust described in section 503(a)(1)(B) purchases 1,000 bonds of the employer corporation at the offering price established by current prices for a lot of 10 such bonds, such offering price may not be a valid price for 1,000 bonds and the purchase may therefore not meet the requirements of this subdivision. For a purchase of an obligation to qualify under this subdivision, there must be sufficient current prices quoted by persons independent of the issuer to establish accurately the current value of the obligation. Thus, if there are no current prices quoted by persons independent of the issuer, an over-the-counter transaction will not qualify under this subparagraph even though the obligation was purchased in an arms's length transaction from a person independent of the issuer.

(iv) For purposes of this section, an over-the-counter transaction is one not executed on a national securities exchange which is registered with the Securities and Exchange Commission. An over-the-counter transaction may be made through a dealer or an exchange which is not such a national securities exchange or may be made directly from the seller to the purchaser.

(3) From an underwriter. An obligation may be purchased from an underwriter if it is purchased at a price not greater than:

(i) The public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, or

(ii) The price at which a substantial portion of the issue including such obligation is acquired by persons independent of the issuer,

whichever is the lesser price. For purposes of this subparagraph, a portion of the issue will be considered substantial if the purchasers of such portion by persons independent of the issuer are sufficient to establish that fair market value of the obligations included in such issue. In determining whether the purchases are sufficient to establish the fair market value, all the surrounding facts and circumstances will be considered, including the number of independent purchasers, the aggregate amount purchased by each such independent purchaser, and the number of transactions. In the case of a large issue, purchases of a small percentage of the outstanding obligations may be considered purchases of a substantial portion of the issue; whereas, in the case of a small issue, purchases of a larger percentage of the outstanding obligations will ordinarily be required. The requirement in paragraph (b)(3)(ii) of this section contemplates purchase of the obligations by persons independent of the issuer contemporaneously with the purchase by the employee trust. If a substantial portion has been purchased at different prices, the price of the portion may be based on the average of such prices, and if several substantial portions have been sold to persons independent of the issuer, the price of any of the substantial portions may be used for purposes of this subparagraph.

(4) From the issuer. An obligation may be purchased directly from the issuer at a price not greater than the price paid currently for a substantial portion of the same issue by persons independent of the issuer. This requirement contemplates purchase of a substantial portion of the same issue by persons independent of the issuer contemporaneously with the purchase by the employee trust. For purposes of this subparagraph, a portion of the issue will be considered substantial if the purchases of such portion by persons independent of the issuer are sufficient to establish the fair market value of the obligations included in such issue. In determining whether the purchases are sufficient to establish the fair market value, all the surrounding facts and circumstances will be considered, including the number of independent purchasers, the aggregate amount purchased by each such independent purchaser, and the number of transactions. In the case of a large issue, purchases of a small percentage of the outstanding obligations may be considered purchases of a substantial portion of the issue; whereas, in the case of a small issue, purchases of a larger percentage of the outstanding obligations will ordinarily be required. The price paid for a substantial portion of the issue may be determined in the manner provided in paragraph (b)(3) of this section.

(c) Limitations on holdings of obligations. (1) Immediately following acquisition of the obligation by the employee trust:

(i) Not more than 25 percent of the aggregate amount of the obligations issued in such issue and outstanding immediately after acquisition by the trust may be held by the trust, and

(ii) At least 50 percent of such aggregate amount must be held by persons independent of the issuer.

(2)(i) For purposes of paragraph (c)(1) of this section, an obligation is not considered as outstanding if it is held by the issuer. For example, if an obligation which has been issued and outstanding is repurchased and held by the issuer, without cancellation or retirement, such an obligation is not considered outstanding.

(ii) For purposes of paragraph (c)(1) of this section, the amounts of the obligations held by the trust and by persons independent of the issuer shall be computed on the basis of the face amount of the obligations.

(d) Limitation on amount invested in obligations. (1)(i) Immediately following acquisition of the obligation, not more 25 percent of the assets of the employee trust may be invested in all obligations of all persons described in section 503(b). For purposes of determining the amount of the trust's assets which are invested in obligations of persons described in section 503(b) immediately following acquisition of the obligation, those obligations shall be valued as follows:

(a) Those obligations included in the acquisition in respect of which the percentage test in the first sentence of this subdivision is being applied shall be valued at their adjusted basis, as provided in section 1011, relating to adjusted basis for determining gain or loss; and

(b) All other obligations of persons described in section 503(b) which were part of the trust's assets immediately before the acquisition of the obligations described in (d)(1)(i)(a) of this section shall be valued at their fair market value on the day that the obligations described in (d)(1)(i)(a) of this section were acquired. For purposes of determining the total amount of the assets of the trust (including obligations of persons described in section 503(b)), there shall be used the fair market value of those assets on the day the obligation is acquired.

(ii) The application of the rules in paragraph (d)(1)(i) of this section may be illustrated by the following example:

Example. On February 1, 1960, an exempt employees' trust described in section 401(a) purchases unsecured debentures issued by the employer corporation for $1,000. At the time of this purchase, such debentures have a fair market value of $1,200. Immediately after the purchase of such unsecured debentures, the assets of the trust consist of the following:

	Cost	Fair market value on Feb. 1, 1960
(a) Assets other than obligations of persons described in sec. 503(b)	$5,000	$7,800
(b) Obligations of persons described in sec. 503(b) acquired before Feb. 1, 1960	500	1,000
(c) Unsecured debentures of employer purchased on Feb. 1, 1960	1,000	1,200

Immediately following acquisition of the unsecured debentures by the trust, the percent of the assets of the trust that are invested in all obligations of all persons described in section 503(b) is computed as follows:

(1) Obligations of persons described in section 503(b) acquired before Feb. 1, 1960 (valued at fair market value)	$1,000
(2) Unsecured debentures of employer purchased on Feb. 1, 1960 (valued at cost)	1,000
(3) Total amount of trust's assets invested in obligations of persons described in section 503(b) ((1) plus (2))	2,000
(4) Assets of the trust other than obligations of persons described in section 503(b) (valued at fair market value on Feb. 1, 1960)	7,800
(5) Obligations of persons described in section 503(b) acquired before Feb. 1, 1960 (valued at fair market value on Feb. 1, 1960)	1,000
(6) Unsecured debentures of employer purchased on Feb. 1, 1960 (valued at fair market value on Feb. 1, 1960)	$1,200
(7) Total assets of the trust valued at fair market value on Feb. 1, 1960 (sum of (4), (5), and (6))	10,000
(8) Percent of assets of the trust invested in all obligations of all persons described in section 503(b) immediately following purchase of unsecured debentures on Feb. 1, 1960 ((3) ÷ (7), that is, $2,000 ÷ $10,000))	20%

(2) In determining for purposes of subparagraph (1) of this paragraph the amount invested in obligations of persons described in section 503(b), there shall be included amounts invested in any obligations issued by any such person, irrespective of whether the obligation is secured, and irrespective of whether the obligation meets the conditions of section 503(e) or section 503(f). Obligations of persons described in section 503(b) other than the issuer of the obligation to which section 503(e) applies are also included within the 25 percent limitation. For example, if on February 19, 1959, an exempt employees' trust described in section 401(a) purchases unsecured debentures issued by the employer corporation in a transaction effected on the New York Stock Exchange, and if immediately after the purchase 10 percent of the trust's assets is invested in such debentures and 20 percent of its assets is invested in a loan made with

adequate security on January 12, 1959, to the wholly-owned subsidiary of the employer corporation, then the purchase of the employer's debentures will not qualify under section 503(e), since 30 percent of the trust's assets are then invested in obligations of persons described in section 503(b).

(e) **Change of terms of an obligation.** A change in terms of an obligation is considered as the acquisition of a new obligation. If such new obligation is not adequately secured, the requirements of section 503(e) must be met at the time the terms of the obligation are changed for such section to be applicable to such new loan.

[T.D. 6493, 25 FR 9217, Sept. 27, 1960, as amended by T.D. 6972, 33 FR 12904, Sept. 12, 1968; T.D. 7428, 41 FR 34624, Aug. 16, 1976]

§ 1.503(e)–3 Effective dates.

(a) Section 503(e) and §§ 1.503(e)–1 and 1.503(e)–3 are effective in the case of an employees' trust described in section 401(a) for taxable years ending after March 15, 1956. Thus, if during a taxable year ending before March 16, 1956, an employees' trust made a loan which meets the requirements of section 503(e), such loan will not be treated as made without the receipt of adequate security and will not cause the loss of exemption for taxable years ending after March 15, 1956, although such loan was not considered adequately secured when made. (However, section 503 does not apply to organizations described in section 401(a) not referred to in section 4975(g)(2) or (3) for transactions occurring after December 31, 1974.)

(b)(1) In the case of obligations acquired by an employees' trust described in section 401(a) before September 2, 1958, which were held on that date, the requirements described in paragraphs (c) and (d) of § 1.503(e)–2 which were not satisfied immediately following the acquisition shall be treated as satisfied at that time if those requirements would have been satisfied had the obligations been acquired on September 2, 1958. For example, on January 3, 1955, an employees' trust described in section 401(a) purchased through the New York Stock Exchange unsecured debentures issued by the employer corporation. Under section 503(e) the acquisition of such debentures by the trust will not be treated for taxable years ending after March 15, 1956, as a loan made without the receipt of adequate security if the debentures were held by the employees' trust on September 2, 1958, and if the requirements of paragraphs (c) and (d) of § 1.503(e)–2 which were not met on January 3, 1955, were met on September 2, 1958, as if that date were the date of acquisition.

(2) In the case of obligations acquired before September 2, 1958, which were not held by the employees' trust described in section 401(a) on that date, only the requirements described in paragraph (b) of § 1.503(e)–2 must be satisfied for section 503(e) to be applicable to such acquisition. For example, if on December 5, 1956, an employees' trust lent money to the employer corporation by purchasing a debenture issued by the employer and if the trust sold the debenture on August 1, 1958, such loan would not be treated as made without the receipt of adequate security if the requirement described in paragraph (b) of § 1.503(e)–2 was met on December 5, 1956.

(c) Section 503(e) and §§ 1.503(e)–1 and 1.503(e)–2 are effective in the case of trusts described in section 501(c)(17) with respect to loans made, renewed, or, in the case of demand loans, continued after December 31, 1959, and in the case of trusts described in section 501(c)(18) with respect to loans made, renewed or, in the case of demand loans, continued after December 31, 1969.

(d) See paragraph (b)(2) of § 1.503(b)–1 for the effective dates for the application of the definition of adequate security.

[T.D. 6493, 25 FR 9218, Sept. 27, 1960, as amended by T.D. 6972, 33 FR 12905, Sept. 12, 1968; T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§ 1.503(e)–4 Disallowance of charitable deductions for certain gifts made before January 1, 1970.

Paragraphs (a), (b), and (c) of this section shall apply only to gifts or contributions made before January 1, 1970, to an organization described in section 501(c)(3). For rules relating to the denial of deductions with respect to gifts or contributions made after December 31, 1969, see § 1.503(c)–1(d).

(a) No gift or contribution which would otherwise be allowable as a charitable or other deductions under section 170, 642(c), or 545(b)(2) shall be allowed as a deduction if made to an organization described in section 501(c)(3) which at the time the gift or contribution is made is not exempt under section 501(a) by reason of the provisions of section 503.

(b) If an organization which is described in section 501(c)(3) is not exempt because it engaged in a prohibited transaction involving a substantial part of its income of corpus with the purpose of diverting its income or corpus from its exempt

purposes, and if the organization receives a gift or contribution during, or prior to, its taxable year in which such prohibited transaction occurred, then a deduction by the donor with respect to the gift or contribution shall not be disallowed under section 503(b) unless the donor (or any member of his family if the donor is an individual) is a party to such prohibited transaction. For the purpose of the preceding sentence "family" is defined in section 267(c)(4) and includes brothers and sisters, whether by whole or half blood, spouse, ancestors, and lineal descendants. See the regulations under section 267(c).

(c) The application of § 1.503(e)–4 may be illustrated by the following example:

Example. In 1954, Corporation M, which files its income tax returns on the calendar year basis, creates a foundation purportedly for charitable purposes and deducts from its gross income for that year the amount of the gift to the foundation. Corporation M makes additional gifts to this foundation in 1955, 1956, and 1957, and takes charitable deductions for such years. B, an individual, also contributes to the foundation in 1955, 1956, and 1957, and takes charitable deductions for such years. In 1955, the foundation commences purposely to divert its corpus to the benefit of Corporation M, and a substantial amount of such corpus is so diverted by the close of the taxable year 1956. For 1955 and subsequent taxable years, the exemption allowed the foundation as an organization described in section 501(c)(3) is denied by reason of the provisions of section 503(a). Both Corporation M and individual B would be disallowed any deduction for the contributions made during 1957 to the foundation. Moreover, the charitable deductions taken by Corporation M for contributions to the foundation in the years 1955 and 1956 would also be disallowed since Corporation M was a party to the prohibited transactions. If the facts and surrounding circumstances indicate that the contribution in 1954 by Corporation M was for the purpose of the prohibited transaction, then the charitable deduction for the year 1954 shall also be disallowed with respect to Corporation M, since the prohibited transaction would then have commenced with the making of such contribution and the exemption allowed the foundation would then be denied for 1954 by reason of the provisions of § 1.503(e)–4. B's deductions for his contributions for the years 1955 and 1956 will not be disallowed since he was not a party to the prohibited transaction.

[T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§ 1.503(f)–1 Loans by employers who are prohibited from pledging assets.

(a) In general. (1) Section 503(f) provides that section 503(b)(1) shall not apply to a loan made to the employer by an employees' trust described in section 401(a) if the loan bears a reasonable rate of interest and certain conditions are met. Section 503(f) also applies to the renewal of loans to the employer and, in the case of demand loans, to the continuation of such loans.

(2) The provisions of section 503(f) do not limit the effect of section 401(a) and § 1.401–2, relating to use or diversion of corpus or income of an employees' trust, or the effect of any of the provisions of section 503 other than section 503(b)(1). Consequently, although a loan made by an employees' trust described in section 503(a)(1)(B) meets all the requirements of section 503(f) and therefore is not treated as a loan made without the receipt of adequate security, an employees' trust making such a loan will lose its exempt status if the loan is not considered as made for the exclusive benefit of the employees or their beneficiaries. Similarly, a loan which meets the requirements of section 503(f) will constitute a prohibited transaction within the meaning of section 503(b)(6) if it results in a substantial diversion of the trust's income or corpus to a person described in section 503(b).

(b) Conditions. (1) Section 503(f) applies to a loan only if, with respect to the making or renewal of the loan, the conditions described in paragraphs (b)(2), (3), and (4) of this section are met. For purpose of this paragraph, the mere continuance of a demand loan is not considered as the making or renewal of such a loan.

(2) The employer must be prohibited (at the time of the making or renewal of the loan) by any law of the United States or regulations thereunder from directly or indirectly pledging, as security for such a loan, a particular class or classes of his assets the value of which (at such time) represents more than one-half of the value of all his assets. If a loan is made or renewed when the employer is prohibited by a law of the United States (or the regulations thereunder) from pledging a class of his assets, the qualification of such a loan under section 503(f) will not be affected by a subsequent change in such law or regulations permitting the employer to pledge such assets, unless such loan is renewed after such change. See section 8(a) of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78h(a)), which prohibits certain persons from pledging a class of assets as security for loans, and 12 CFR 220.5(a) (credit by brokers, dealers, and members of national securities exchanges).

(3) The making or renewal, as the case may be, must be approved in writing as an investment which is consistent with the exempt purposes of the trust by a trustee who is independent of the employer, and such written approval must not have been previously refused by any other such trustee. A trustee is independent of the employer, for purposes of this subparagraph, if he is entirely free of influence or controlled by the employer. For example, if the employer is a partnership, then

a partner in such partnership, or a member of a partner's family would not be considered independent of the employer. Similarly, an employee of the employer would not be considered independent of the employer. For purposes of this subparagraph, the term "trustee" means, with respect to any trust for which there are two trustees who are independent of the employer, both of such trustees and, with respect to any trust for which there are more than two such independent trustees, a majority of the trustees independent of the employer.

(4)(i) Immediately following the making or renewal, as the case may be, the aggregate amount lent by the trust to the employer, without the receipt of adequate security must not exceed 25 percent of the value of all the assets of the trust.

(ii) For purposes of paragraph (b)(4)(i) of this section, the determination as to whether any amount lent by the trust to the employer is a loan made without the receipt of adequate security shall be made without regard to section 503(e). Thus, if an employees' trust makes a loan on January 2, 1959, to the employer without adequate security (but which loan is not considered as made without adequate security under section 503(e)), and if immediately after making such loan 10 percent of the value of all its assets is invested in such loan, then the trust may on that day invest not more than an additional 15 percent of its assets in a loan which would be considered made without adequate security if it were not for the provisions of section 503(f).

(iii) For purposes of paragraph (b)(4)(i) of this section, in determining the value of all the assets of the trust, there shall be used the fair market value of those assets on the day of the making or renewal.

(c) Reasonable rate of interest. Section 503(f) only applies if, in addition to meeting the conditions described in paragraph (b) of this section, the loan bears a reasonable rate of interest when it is made, renewed, or, in the case of demand loans, during the period of its existence.

(d) Change of terms of loan. A change in the terms of a loan (including a reduction in the security for a loan) is considered as the making of a new loan. If such a new loan is not adequately secured, the requirements of section 503(f) must be met at the time the terms of the loan are changed for such section to be applicable to such new loan.

(e) Effective date. (1) This section and section 503(f) are effective for taxable years ending after September 2, 1958, but only with respect to periods after such date. Thus, if a loan was made on or before September 2, 1958, without the receipt of adequate security and if, when such loan was made, it met all of the requirements of section 503(f) and this section, then the loan is not subject to section 503(b)(1) after September 2, 1958, and would not constitute a prohibited transaction after that date because of a lack of adequate security.

(2) See paragraph (b)(2) of § 1.503(b)–1 for the effective dates for application of the definition of adequate security.

[T.D. 6493, 25 FR 9219, Sept. 27, 1960, renumbered and amended by T.D. 7428, 41 FR 34626, Aug. 16, 1976]

§ 1.504–1 Denial of exemption.

(a) The restrictions enumerated in section 504 are in addition to and not in limitation of the restrictions contained in section 501(c)(3). Even though an organization has not violated any of the terms of section 504, it still may not qualify for tax exemption in view of the general provisions of section 501(c)(3). Thus, if a trustee or other fiduciary of the organization (whether or not he is also a creator of such organization) enters into a transaction with the organization, such transaction will be closely scrutinized in the light of the fiduciary principle requiring undivided loyalty to ascertain whether the organization is in fact being operated for the stated exempt purposes.

(b)(1) Any organization described in section 501(c)(3) other than an organization described in section 503(b)(1) through (5), inclusive, shall not be exempt under section 501(a) if the amounts accumulated out of income during the taxable year, or any prior taxable year, and not actually paid out for exempt purposes by the end of the taxable year, are unreasonable. Amounts accumulated out of income become unreasonable when more income is accumulated than is needed, or when the duration of the accumulation is longer than is needed in order to carry out the purpose constituting the basis for the organization's exemption. Furthermore, such an organization shall not be exempt under section 501(a) if amounts accumulated out of income are used to a substantial degree for purposes or functions other than those constituting the basis for the organization's exemption, or if such amounts are invested in such a manner as to jeopardize the carrying out of the purpose or function constituting the basis for the organization's exemption.

(2) The provisions for the denial of exemption for unreasonable accumulations of income will not apply to income attributable to property of a

decedent dying before January 1, 1951, which is transferred under his will to a trust created by such will. In the case of a trust created by the will of a decedent dying on or after January 1, 1951, where income is required to be accumulated by the trust, the denial of exemption for unreasonable accumulations of income under paragraph (b)(1) of this section will apply only to income accumulated during a taxable year of the trust beginning more than 21 years after the date of death of the last life in being designated in the trust instrument.

(c) For the purpose of section 504, the term "income" means gains, profits, and income determined under the principles applicable in determining the earnings or profits of a corporation. The amount accumulated out of income during the taxable year or any prior taxable year shall be determined under the principles applicable in determining the accumulated earnings or profits of a corporation. In determining the reasonableness of an accumulation out of income, there will be disregarded the following:

(1) The accumulation of gain upon the sale or exchange of a donated asset to the extent that such gain represents the excess of the fair market value of such asset when acquired by the organization over its substituted basis in the hands of the organization;

(2) The accumulation of gain upon the sale or exchange of property held for the production of investment income, such as dividends, interest, and rents, where the proceeds of such sale or exchange are within a reasonable time reinvested in property acquired and held in good faith for the production of investment income.

(d) Whether the conditions specified in paragraphs (1), (2), and (3) of section 504(a) are present in any case must be determined from all the facts. The conditions specified in section 504(a)(1), (2), and (3) may result from the use of only one organization or of a chain of two or more organizations.

(e) An organization that has lost its exemption by reason of the provisions of section 504 may, in order to reestablish its exemption, file a claim for exemption with the district director. Form 1023, the exemption application, shall be used for this purpose in accordance with the provisions of § 1.501(a)–1.

(f) In the case of an organization described in section 501(c)(3) denied exemption under section 501(a) solely by reason of the provisions of section 504, deductions otherwise allowable under section 170, 545(b)(2), or 642(c) for gifts or contributions to such organization shall not be disallowed for the year during which the exemption is denied and prior years.

(g) In the case of an organization described in section 501(c)(3) denied exemption under section 501(a) solely by reason of the provisions of section 504, such organization will not cease to be described in section 501(c)(3) for purposes of Part II of subchapter F, chapter 1 and for purposes of the application of chapter 42 taxes.

(h) Section 504 shall result in a loss of exemption to any organization only as a result of a transaction occurring prior to January 1, 1970. [T.D. 6500, 25 FR 11737, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7428, 41 FR 34627, Aug. 16, 1976]

§ 1.505(c)–1T Questions and answers relating to the notification requirement for recognition of exemption under paragraphs (9), (17) or (20) of section 501(c) (temporary).

Q–1: What does section 505(c) of the Internal Revenue Code provide?

A–1: Section 505(c) provides that an organization will not be recognized as exempt under section 501(c)(9) as a voluntary employees' beneficiary association, under section 501(c)(17) as a trust forming part of a plan providing for the payment of supplemental unemployment compensation benefits, or under section 501(c)(20) as a trust forming part of a qualified group legal services plan unless notification is given to the Internal Revenue Service. The notification required of a trust created pursuant to section 501(c)(20) and forming part of a qualified group legal services plan is set forth in Q&A-2. The notification required of an organization organized after July 18, 1984, and applying for exempt status as an organization described in section 501(c)(9) or (17) is set forth in Q&A-3 through Q&A-8. The notification required of an organization organized on or before July 18, 1984, and claiming exemption as an organization described in section 501(c)(9) or (17) is set forth in Q&A-9 through Q&A-11. However, an organization that has previously notified the Internal Revenue Service of its claim to exemption under section 501(c)(9), (17), or (20) or its claim to exemption under those sections pursuant to another provision of the Code, is not required, under section 505(c), to submit a renotification (See Q&A-2 and Q&A-12).

Section 501(c)(20) Trusts

Q–2: What is the notice required of a trust created pursuant to section 501(c)(20) and forming part of a qualified group legal services plan under section 120?

A–2: (a) A trust claiming exemption as an organization described in section 501(c)(20) will be recognized as exempt if the exclusive function of the trust is to form part of a qualified group legal services plan or plans. Exemption of the trust under section 501(c)(20) will generally be dependent upon and coextensive with recognition of the plan as a qualified group legal services plan. Therefore, a trust organized pursuant to section 501(c)(20) after July 18, 1984, need not file a separate notice with the Internal Revenue Service of its claim to exemption because the notice required by section 120(c)(4) will suffice for purposes of section 505(c), provided a copy of the trust instrument is filed with the Form 1024 submitted by the group legal services plan. If the trust instrument has not been filed with the Form 1024 submitted by the group legal services plan, the trust must comply with (and exemption will be dependent upon) the filing applicable to a trust organized on or before July 18, 1984. For the notice required and effective dates of exemption of a qualified group legal services plan under section 120, see § 1.120-3.

(b) A trust organized on or before July 18, 1984, that claims exempt status as a trust described in section 501(c)(20) and that forms part of a qualified group legal services plan which has been recognized as exempt under section 120, must file a copy of its trust instrument with the Internal Revenue Service before February 4, 1987. If a copy of the trust instrument is filed within the time provided, the trust's exemption will be recognized retroactively to the date the qualified group legal services plan was recognized as exempt under section 120. However, if a copy of the trust instrument is filed after the time provided, exemption will be recognized only for the period after the copy of the trust instrument is filed with the Internal Revenue Service. See Q&A-7 for a further discussion of "date of filing." A trust that has previously filed a copy of its trust instrument with the Service need not refile that document.

Section 501(c) (9) and (17) Organizations Organized After July 18, 1984

Q–3: What is the notice required of an organization or trust, organized after July 18, 1984, that is applying for recognition of tax exempt status under section 501(c)(9) or (17)?

A–3: An organization or trust that is organized after July 18, 1984, will not be treated as described in paragraphs (9) or (17) of section 501(c), unless the organization notifies the Internal Revenue Service that it is applying for recognition of exemption. In addition, unless the required notice is given in the manner and within the time prescribed by these regulations, an organization will not be treated as exempt for any period before the giving of the required notice. The notice is filed by submitting a properly completed and executed Form 1024, "Application for Recognition of Exemption Under Section 501(a) or for Determination Under Section 120" together with the additional information required under Q&A-4 and Q&A-5. The notice is filed with the district director for the key district in which the organization's principal place of business or principal office is located.

The notice may be filed by either the plan administrator (as defined in section 414(g)) or the trustee. The Internal Revenue Service will not accept a Form 1024 for any organization or trust before such entity has been organized.

Q–4: What information, in addition to the information required by Form 1024, must be submitted by an organization or trust seeking recognition of exemption under section 501(c) (9) or (17)?

A–4: A notice will not be considered complete unless, in addition to a properly completed and executed Form 1024, the organization or trust submits a full description of the benefits available to participants under section 501(c)(9) or (17). Moreover, both the terms and conditions of eligibility for membership and the terms and conditions of eligibility for benefits must be set forth. This information may be contained in a separate document, such as a "plan document," or it may be contained in the creating document of the entity (e.g., the articles of incorporation or association, or a trust indenture). For benefits provided through a policy or policies of insurance, all such policies must be included with the notice. Where individual policies of insurance are provided to the participants, single exemplar copies, typical of policies generally issued to participants, are acceptable, provided they adequately describe all forms of insurance available to participants. In providing a full description of the benefits available, the benefits provided must be sufficiently described so that each benefit is definitely determinable. A benefit is definitely determinable if the amount of the benefit, its duration, and the persons eligible to receive it are ascertainable from the plan document or other instrument. Thus, a benefit is not definitely determinable if the rules governing either

its amount, its duration, or its recipients are not ascertainable from the plan document or other instrument but are instead subject to the discretion of a person or committee. Likewise, a benefit is not definitely determinable if the amount for any individual is based upon a percentage share of any item that is within the discretion of the employer. However, a disability benefit will not fail to be considered definitely determinable merely because the determination of whether an individual is disabled is made under established guidelines by an authorized person or committee.

Q–5: What is the notice required of collectively bargained plans?

A–5: If an organization or trust claiming exemption under section 501(c)(9) or (17) is organized and maintained pursuant to a collective bargaining agreement between employee representatives and one or more employer, only one Form 1024 is required to be filed for the organization or trust, regardless of the number of employers originally participating in the agreement. Moreover, once a Form 1024 is filed pursuant to a collective bargaining agreement, an additional Form 1024 is not required to be filed by an employer who thereafter participates in that agreement. When benefits are provided pursuant to a collective bargaining agreement, the notice will not be considered complete unless, in addition to a properly completed and executed Form 1024, a copy of the collective bargaining agreement is also submitted together with the additional information delineated in Q&A-4.

Q–6: When must the required notice be filed by an organization or trust, organized after July 18, 1984, that seeks recognition of exemption under section 501(c)(9) or (17)?

A–6: An organization or trust applying for exemption must file the required notice by the later of February 4, 1987 or 15 months from the end of the month in which the organization or trust was organized. An extension of time for filing the required notice may be granted by the district director if the request is submitted before the end of the applicable period and it is demonstrated that additional time is needed.

Q–7: What is the effective date of exemption for a new organization or trust, organized after July 18, 1984, that has submitted the required notice?

A–7: If the required notice is filed within the time provided by these regulations, the organization's exemption will be recognized retroactively to the date the organization was organized, provided its purpose, organization and operation (including compliance with the applicable nondiscrimination requirements) during the period prior to the date of the determination letter are in accordance with the applicable law. However, if the required notice is filed after the time provided by these regulations, exemption will be recognized only for the period after the application is filed with the Internal Revenue Service. The date of filing is the date of the United States postmark on the cover in which an exemption application is mailed or, if no postmark appears on the cover, the date the application is stamped as received by the Service. If an extension for filing the required notice has been granted to the organization, a notice filed on or before the last day specified in the extension will be considered timely and not the otherwise applicable date under Q&A-6.

Q–8: What is the effect on exemption of the filing of an incomplete notice?

A–8: Although a properly completed and executed Form 1024 together with the required additional information (See Q&A-4 and Q&A-5) must be submitted to satisfy the notice required by section 505(c), the failure to file, within the time specified, all of the information necessary to complete such notice will not alone be sufficient to deny recognition of exemption from the date of organization to the date the completed information is submitted to the Service. If the notice which is filed with the Service within the required time is substantially complete, and the organization supplies the necessary additional information requested by the Service within the additional time allowed, the original notice will be considered timely. However, if the notice is not substantially complete or the additional information is not provided within the additional time allowed, exemption will be recognized only from the date of filing of the additional information.

Section 501(c)(9) and (17) Organizations Organized on or Before July 18, 1984

Q–9: What is the notice required of an organization or trust organized on or before July 18, 1984, that claims exempt status as an organization described in section 501(c)(9) or (17)?

A–9: Section 505(c) provides a special rule for existing organizations and trusts organized on or before July 18, 1984. Such an organization or trust will not be treated as described in paragraphs (9) or (17) of section 501(c) unless the organization or trust notifies the Internal Revenue Service in the manner and within the time prescribed in these regulations that it is claiming exemption under the particular section. The type of notice, the manner for filing that notice, and the addition-

al information required is the same as that set forth in Q&A-3 through Q&A-5 for new organizations.

Q–10: When must the required notice be filed by an organization or trust organized on or before July 18, 1984?

A–10: An organization or trust organized on or before July 18, 1984, that claims exempt status as an organization described in section 501(c)(9) or (17), must file the required notice before February 4, 1987. An extension of time for filing the required notice may be granted by the district director if the request is submitted before the due date of the notice and it is demonstrated that additional time is needed.

Q–11: What is the effective date of exemption for an organization or trust organized on or before July 18, 1984, that has submitted the required notice?

A–11: If the required notice is filed within the time provided by these regulations, the organization's exemption will be recognized retroactively to the date the organization was organized, provided its purpose, organization and operation (including compliance with the applicable nondiscrimination requirements) during the period prior to the date of the determination letter are in accordance with the applicable law. If, on the other hand, the required notice is filed after the time provided by these regulations, exemption will be recognized only for the period after the notice is received by the Internal Revenue Service. See Q&A-7 for a further discussion of "date of filing." See also Q&A-8 for the effect on exemption of a notice that has been timely filed but is incomplete.

Exceptions to Notice Requirement

Q–12: Are any organizations or trusts claiming recognition of exemption as an organization described in section 501(c)(9) or (17) excepted from the notice requirement of section 505(c)?

A–12: An organization or trust that has previously notified the Internal Revenue Service of its claim to exemption by filing Form 1024 is not required, under section 505(c), to renotify the Service. Thus, an organization that has filed a Form 1024 that is pending with the Service need not refile that form. Also, an organization that has received a ruling or determination letter from the Service recognizing its exemption from taxation need not submit the notification required by section 505(c).

[T.D. 8073, 51 FR 4330, Feb. 4, 1986]

Private Foundations

§ 1.507–1 General rule.

(a) In general. Except as provided in § 1.507–2, the status of any organization as a private foundation shall be terminated only if—

(1) Such organization notifies the district director of its intent to accomplish such termination, or

(2)(i) With respect to such organization, there have been either willful repeated acts (or failures to act), or a willful and flagrant act (or failure to act), giving rise to liability for tax under chapter 42, and

(ii) The Commissioner notifies such organization that, by reason of subdivision (i) of this subparagraph, such organization is liable for the tax imposed by section 507(c),

and either such organization pays the tax imposed by section 507(c) (or any portion not abated under section 507(g)) or the entire amount of such tax is abated under section 507(g).

(b) Termination under section 507(a)(1). **(1)** In order to terminate its private foundation status under paragraph (a)(1) of this section, an organization must submit a statement to the district director of its intent to terminate its private foundation status under section 507(a)(1). Such statement must set forth in detail the computation and amount of tax imposed under section 507(c). Unless the organization requests abatement of such tax pursuant to section 507(g), full payment of such tax must be made at the time the statement is filed under section 507(a)(1). An organization may request the abatement of all of the tax imposed under section 507(c), or may pay any part thereof and request abatement of the unpaid portion of the amount of tax assessed. If the organization requests abatement of the tax imposed under section 507(c) and such request is denied, the organization must pay such tax in full upon notification by the Internal Revenue Service that such tax will not be abated. For purposes of subtitle F of the Code, the statement described in this subparagraph, once filed, shall be treated as a return.

(2) Termination of private foundation status under section 507(a)(1) does not relieve a private foundation, or any disqualified person with respect

thereto, of liability for tax under chapter 42 with respect to acts or failures to act prior to termination or for any additional taxes imposed for failure to correct such acts or failures to act. See subparagraph (8) of this paragraph as to the possible imposition of transferee liability in cases not involving termination of private foundation status.

(3) In the case of an organization which has terminated its private foundation status under section 507(a) and continues in operation thereafter, if such organization wishes to be treated as described in section 501(c)(3), then pursuant to section 509(c) and § 1.509(c)–1 such organization must apply for recognition of exemption as an organization described in section 501(c)(3) in accordance with the provisions of section 508(a).

(4) See § 53.4947–1(c)(7) of this chapter as to the application of section 507(a) to certain split-interest trusts.

(5) For purposes of section 508(d)(1), the Internal Revenue Service shall make notice to the public (such as by publication in the Internal Revenue Bulletin) of any notice received from a private foundation pursuant to section 507(a)(1) or of any notice given to a private foundation pursuant to section 507(a)(2).

(6) If a private foundation transfers all or part of its assets to one or more other private foundations (or one or more private foundations and one or more section 509(a)(1), (2), (3), or (4) organizations) pursuant to a transfer described in section 507(b)(2) and § 1.507–3(c), such transferor foundation will not have terminated its private foundation status under section 507(a)(1). See § 1.507–3, however, for the special rules applicable to private foundations participating in section 507(b)(2) transfers.

(7) Neither a transfer of all of the assets of a private foundation nor a significant disposition of assets (as defined in § 1.507–3(c)(2)) by a private foundation (whether or not any portion of such significant disposition of assets is made to another private foundation) shall be deemed to result in a termination of the transferor private foundation under section 507(a) unless the transferor private foundation elects to terminate pursuant to section 507(a)(1) or section 507(a)(2) is applicable. Thus, if a private foundation transfers all of its assets to one or more persons, but less than all of its net assets to one or more organizations described in section 509(a)(1) which have been in existence and so described for a continuous period of 60 calendar months, for purposes of this paragraph such transferor foundation will not be deemed by reason of such transfer to have terminated its private foundation status under section 507(a) or (b) unless section 507(a)(2) is applicable. Such foundation will continue to be treated as a private foundation for all purposes. For example, if a private foundation transfers all of its net assets to a section 509(a)(2) organization in 1971 and receives a bequest in 1973, the bequest will be regarded as having been made to a private foundation and the foundation will be subject to the provisions of chapter 42 with respect to such funds. If a private foundation makes a transfer of all of its net assets to a section 509(a)(2) or (3) organization, for example, it must retain sufficient income or assets to pay the tax imposed under section 4940 for that portion of its taxable year prior to such transfer. For additional rules applicable to a transfer by a private foundation of all of its net assets to a section 509(a)(1) organization which has not been in existence and so described for a continuous period of 60 calendar months, see § 1.507–3(e).

(8) If a private foundation makes a transfer described in subparagraph (7) of this paragraph and prior to, or in connection with, such transfer, liability for any tax under chapter 42 is incurred by the transferor foundation, transferee liability may be applied against the transferee organization for payment of such taxes. For purposes of this subparagraph, liability for any tax imposed under chapter 42 for failure to correct any act or failure to act shall be deemed incurred on the date on which the act or failure to act giving rise to the initial tax liability occurred.

(9) A private foundation which transfers all of its net assets is required to file the annual information return required by section 6033, and the foundation managers are required to file the annual report of a private foundation required by section 6056, for the taxable year in which such transfer occurs. However, neither such foundation nor its foundation managers will be required to file such returns for any taxable year following the taxable year in which the last of any such transfers occurred, if at no time during the subsequent taxable years in question the foundation has either legal or equitable title to any assets or engages in any activity.

(c) Involuntary termination under section 507(a)(2). (1) For purposes of section 507(a)(2)(A), the term "willful repeated acts (or failures to act)" means at least two acts or failures to act both of which are voluntary, conscious, and intentional.

(2) For purposes of section 507(a)(2)(A), a "willful and flagrant act (or failure to act)" is one which is voluntarily, consciously, and knowingly committed in violation of any provision of chapter 42 (other than section 4940 or 4948(a)) and which appears to a reasonable man to be a gross violation of any such provision.

(3) An act (or failure to act) may be treated as an act (or failure to act) by the private foundation for purposes of section 507(a)(2) even though tax is imposed upon one or more foundation managers rather than upon the foundation itself.

(4) For purposes of section 507(a)(2), the failure to correct the act or acts (or failure or failures to act) which gave rise to liability for tax under any section of chapter 42 by the close of the correction period for such section may be a willful and flagrant act (or failure to act).

(5) No motive to avoid the restrictions of the law or the incurrence of any tax is necessary to make an act (or failure to act) willful. However, a foundation's act (or failure to act) is not willful if the foundation (or a foundation manager, if applicable) does not know that it is an act of self-dealing, a taxable expenditure, or other act (or failure to act) to which chapter 42 applies. Rules similar to the regulations under chapter 42 (see, for example, § 53.4945–1(a)(2)(iii) of this chapter) shall apply in determining whether a foundation or a foundation manager "knows" that an act (or failure to act) is an act of self-dealing a taxable expenditure or other such act (or failure to act). [T.D. 7233, 37 FR 28157, Dec. 21, 1972, as amended by T.D. 7290, 38 FR 31833, Nov. 19, 1973]

§ 1.507–2 Special rules; transfer to, or operation as, public charity.

(a) Transfer to public charities—(1) General rule. Under section 507(b)(1)(A) a private foundation, with respect to which there have not been either willful repeated acts (or failures to act) or a willful and flagrant act (or failure to act) giving rise to liability for tax under chapter 42, may terminate its private foundation status by distributing all of its net assets to one or more organizations described in section 170(b)(1)(A) (other than in clauses (vii) and (viii)) each of which has been in existence and so described for a continuous period of at least 60 calendar months immediately preceding such distribution. Since section 507(a) does not apply to such a termination, a private foundation which makes such a termination is not required to give the notification described in section 507(a)(1). A private foundation which terminates its private foundation status under section 507(b)(1)(A) does not incur tax under section 507(c) and, therefore, no abatement of such tax under section 507(g) is required.

(2) Effect of current ruling—(i) Distributions before final regulations. With respect to distributions made before (insert day after the date these regulations are filed by the Office of the Federal Register), an organization to which a distribution of net assets is made will qualify as an organization "described in section 170(b)(1)(A) (other than clauses (vii) and (viii))" for purposes of meeting the requirements of section 507(b)(1)(A) without a further showing if such distributee organization:

(A) Has been in existence for a continuous period of at least 60 calendar months preceding the distribution described in subparagraph (1) of this paragraph;

(B) Has received a ruling or determination letter that it is an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1)(A);

(C) The facts and circumstances forming the basis for the issuance of the ruling have not substantially changed during the 60-month period referred to in (A) of this subdivision; and

(D) The ruling or determination letter referred to in (B) of this subdivision has not been revoked expressly or by a subsequent change of the law or regulations under which the ruling was issued.

(ii) Distributions after final regulations. With respect to distributions made after December 29, 1972, a private foundation seeking to terminate its private foundation status pursuant to section 507(b)(1)(A) may rely on a ruling or determination letter issued to a potential distributee organization that such distributee organization is an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1)(A) in accordance with the provisions of § 1.509(a)–7.

(3) Organizations described in more than one clause of section 170(b)(1)(A). For purposes of this paragraph and section 507(b)(1)(A), the parenthetical term "other than in clauses (vii) and (viii)" shall refer only to an organization which is described only in section 170(b)(1)(A)(vii) or (viii). Thus, an organization described in clause (i), (ii), (iii), (iv), (v), or (vi) of section 170(b)(1)(A) will not be precluded from being a distributee described in section 507(b)(1)(A) merely because it also appears to meet the description of an organization described in section 170(b)(1)(A)(vii) or (viii).

(4) Applicability of chapter 42 to foundations terminating under section 507(b)(1)(A). Except as provided in subparagraph (5) of this paragraph, an organization which terminates its private foundation status pursuant to section 507(b)(1)(A) will remain subject to the provisions of chapter 42 until the distribution of all of its net assets to distributee organizations described in section 507(b)(1)(A) has been completed.

(5) Special transitional rule. (i) Section 4940(a) imposes a tax upon private foundations with respect to the carrying on of activities for each taxable year. For purposes of section 4940, an organization which terminates its private foundation status under section 507(b)(1)(A) by the end of the period described in subdivision (ii) of this subparagraph will not be considered as carrying on activities within the meaning of section 4940 during such period. Such organization will therefore not be subject to the tax imposed under section 4940(a) for such period.

(ii) The period referred to in subdivision (i) of this subparagraph is the 12-month period beginning with the first day of the organization's first taxable year which begins after December 31, 1969, but such period shall not be treated as ending before February 20, 1973. In the case of a private foundation distributing assets pursuant to section 507(b)(1)(A) to a medical research organization or a community trust (or in the case of a private foundation seeking to terminate into such an organization or trust pursuant to section 507(b)(1)(B)), the period described in this subdivision shall not be treated as ending before—

(A) In the case of a distribution to a medical research organization, March 29, 1976; or

(B) In the case of a community trust, May 11, 1977.

(iii) If the period described in subdivision (ii) of this subparagraph has not expired prior to the due date for the organization's annual return required to be filed by section 6033 or 6012 (determined with regard to any extension of time for filing the return) for its first taxable year which begins after December 31, 1969 (or for any other taxable year ending before the expiration of the period referred to in subdivision (ii) of this subparagraph), and if the organization has not terminated its private foundation status under section 507(b)(1)(A) by such date, then notwithstanding the provisions of subdivision (ii) of this subparagraph, the organization must take either of the following courses of action:

(A) Complete and file its annual return, including the line relating to excise taxes on investment income, by such date, and pay the tax on investment income imposed under section 4940 at the time it files its annual return. If such organization subsequently terminates its private foundation status under section 507(b)(1)(A) within the period specified in subdivision (ii) of this subparagraph, it may file a claim for refund of the tax paid under section 4940; or

(B) Complete and file its annual return, except for the line relating to excise taxes on investment income, by such date, and, in lieu of paying the tax on investment income imposed under section 4940, file a statement with its annual return which establishes that the organization has taken affirmative action by such date to terminate its private foundation status under section 507(b)(1)(A). Such statement must indicate the type of affirmative action taken and explain how such action will result in the termination of its private foundation status under section 507(b)(1)(A). Such affirmative action may include making application to the appropriate State court for approval of the distribution of all net assets pursuant to section 507(b)(1)(A) in the case of a charitable trust, or the passage of a resolution by the organization's governing body directing the distribution of all net assets pursuant to section 507(b)(1)(A) in the case of a not-for-profit corporation. A written commitment or letter of agreement by the trustee or governing body to one or more section 509(a)(1) distributees indicating an intent to distribute all of the organization's net assets to such distributees will also constitute appropriate affirmative action for purposes of this subdivision. An organization may take such affirmative action and may terminate its private foundation status under section 507(b)(1)(A) in reliance upon 26 CFR 13.12 (rev. as of Jan. 1, 1972) and upon the provisions of the notices of proposed rule making under sections 170(b)(1)(A), 507(b)(1), and 509. Thus, if a distributee organization meets the requirements of the provisions of the notices of proposed rulemaking under sections 170(b)(1)(A), 507, or 509 as a distributee under section 507(b)(1)(A), the distributor organization may terminate its private foundation status under section 507(b)(1)(A) in reliance upon such provisions prior to the expiration of the period described in subdivision (ii) of this subparagraph. If such organization, however, fails to terminate its private foundation status under section 507(b)(1)(A) within the period specified in subdivision (ii) of this subparagraph by failing to meet the requirements of either the notices of proposed rulemaking under section

170(b)(1)(A), 507(b)(1), or 509 or the final regulations published under these Code sections, the tax imposed under section 4940 shall be treated as if due from the due date for its annual return (determined without regard to any extension of time for filing its return).

(6) **Return required from organizations terminating private foundation status under section 507(b)(1)(A).** (i) An organization which terminates its private foundation status under section 507(b)(1)(A) is required to file a return under the provisions of section 6043(b), rather than under the provisions of section 6050.

(ii) An organization which terminates its private foundation status under section 507(b)(1)(A) is not required to comply with section 6104(d) for the taxable year in which such termination occurs. For purposes of this subdivision, the term "taxable year" shall include the period described in subparagraph (5)(ii) of this paragraph.

(7) **Distribution of net assets.** A private foundation will meet the requirement that it "distribute all of its net assets" within the meaning of section 507(b)(1)(A) only if it transfers all of its right, title, and interest in and to all of its net assets to one or more organizations referred to in section 507(b)(1)(A).

(8) **Effect of restrictions and conditions upon distributions of net assets—(i) In general.** In order to effectuate a transfer of "all of its right, title, and interest in and to all of its net assets" within the meaning of paragraph (a)(7) of this section, a transferor private foundation may not impose any material restriction or condition that prevents the transferee organization referred to in section 507(b)(1)(A) (herein sometimes referred to as the "public charity") from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes. Whether or not a particular condition or restriction imposed upon a transfer of assets is "material" (within the meaning of paragraph (a)(8) of this section) must be determined from all of the facts and circumstances of the transfer. Some of the more significant facts and circumstances to be considered in making such a determination are:

(A) Whether the public charity (including a participating trustee, custodian, or agent in the case of a community trust) is the owner in fee of the assets it receives from the private foundation;

(B) Whether such assets are to be held and administered by the public charity in a manner consistent with one or more of its exempt purposes;

(C) Whether the governing body of the public charity has the ultimate authority and control over such assets, and the income derived therefrom; and

(D) Whether, and to what extent, the governing body of the public charity is organized and operated so as to be independent from the transferor.

(ii) **Independent governing body.** As provided in paragraph (a)(8)(i)(D) of this section, one of the more significant facts and circumstances to be considered in making the determination whether a particular condition or restriction imposed upon a transfer of assets is "material" within the meaning of paragraph (a)(8) of this section is whether, and the extent to which, the governing body is organized and operated so as to be independent from the transferor. In turn, the determination as to such factor must be determined from all of the facts and circumstances. Some of the more significant facts and circumstances to be considered in making such a determination are:

(A) Whether, and to what extent, members of the governing body are comprised of persons selected by the transferor private foundation or disqualified persons with respect thereto, or are themselves such disqualified persons;

(B) Whether, and to what extent, members of the governing body are selected by public officials acting in their capacities as such; and

(C) How long a period of time each member of the governing body may serve as such. In the case of a transfer that is a community trust, the community trust shall meet paragraph (a)(8)(ii)(C) of this section if it meets the requirements of § 1.170A-9(e)(13)(iv) (other than § 1.170A-9(e)(13)(iv)(C) or (D)), relating to rules for governing body.

(iii) **Factors not adversely affecting determination.** The presence of some or all of the following factors will not be considered as preventing the transferee "from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes" (within the meaning of paragraph (a)(8)(i) of this section):

(A) Name. The fund is given a name or other designation which is the same as or similar to that of the transferor private foundation or otherwise memorializes the creator of the foundation or his family.

(B) Purpose. The income and assets of the fund are to be used for a designated purpose or for one or more particular section 509(a)(1), (2), or (3) organizations, and such use is consistent with the charitable, educational, or other basis for the exempt status of the public charity under section 501(c)(3).

(C) Administration. The transferred assets are administered in an identifiable or separate fund, some or all of the principal of which is not to be distributed for a specified period, if the public charity (including a participating trustee, custodian, or agent in the case of a community trust) is the legal and equitable owner of the fund and the governing body exercises ultimate and direct authority and control over such fund, as, for example, a fund to endow a chair at a university or a medical research fund at a hospital. In the case of a community trust, the transferred assets must be administered in or as a component part of the community trust within the meaning of § 1.170A–9(e)(11).

(D) Restrictions on disposition. The transferor private foundation transfers property the continued retention of which by the transferee is required by the transferor if such retention is important to the achievement of charitable or other similar purposes in the community because of the peculiar features of such property, as, for example, where a private foundation transfers a woodland preserve which is to be maintained by the public charity as an arboretum for the benefit of the community. Such a restriction does not include a restriction on the disposition of an investment asset or the distribution of income.

(iv) Adverse factors. The presence of any of the following factors will be considered as preventing the transferee "from freely and effectively employing the transferred assets, or the income derived therefrom, in furtherance of its exempt purposes" (within the meaning of paragraph (a)(8)(i) of this section):

(A) Distributions. (1) With respect to distributions made after April 19, 1977, the transferor private foundation, a disqualified person with respect thereto, or any person or committee designated by, or pursuant to the terms of an agreement with, such a person (hereinafter referred to as "donor"), reserves the right, directly or indirectly, to name (other than by designation in the instrument of transfer of particular section 509(a)(1), (2), or (3) organizations) the persons to which the transferee public charity must distribute, or to direct the timing of such distributions (other than by direction in the instrument of transfer that some or all of the principal, as opposed to specific assets, not be distributed for a specified period) as, for example, by a power of appointment. The Internal Revenue Service will examine carefully whether the seeking of advice by the transferee from, or the giving of advice by, any donor after the assets have been transferred to the transferee constitutes an indirect reservation of a right to direct such distributions. In any such case, the reservation of such a right will be considered to exist where the only criterion considered by the public charity in making a distribution of income or principal from a donor's fund is advice offered by the donor. Whether there is a reservation of such a right will be determined from all of the facts and circumstances, including, but not limited to, the facts contained in paragraph (a)(8)(iv)(A)(2) and (3) of this section.

(2) The presence of some or all of the following factors will indicate that the reservation of such a right does not exist:

(i) There has been an independent investigation by the staff of the public charity evaluating whether the donor's advice is consistent with specific charitable needs most deserving of support by the public charity (as determined by the public charity);

(ii) The public charity has promulgated guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity and the donor's advice is consistent with such guidelines;

(iii) The public charity has instituted an educational program publicizing to donors and other persons the guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity;

(iv) The public charity distributes funds in excess of amounts distributed from the donor's fund to the same or similar types of organizations or charitable needs as those recommended by the donor; and

(v) The public charity's solicitations (written or oral) for funds specifically state that such public charity will not be bound by advice offered by the donor.

(3) The presence of some or all of the following factors will indicate the reservation of such a right does exist:

(i) The solicitations (written or oral) of funds by the public charity state or imply, or a pattern of

conduct on the part of the public charity creates an expectation, that the donor's advice will be followed;

(ii) The advice of a donor (whether or not restricted to a distribution of income or principal from the donor's trust or fund) is limited to distributions of amounts from the donor's fund, and the factors described in paragraph (a)(8)(iv)(A)(2) or (i) or (ii) of this section are not present;

(iii) Only the advice of the donor as to distributions of such donor's fund is solicited by the public charity and no procedure is provided for considering advice from persons other than the donor with respect to such fund; and

(iv) For the taxable year and all prior taxable years the public charity follows the advice of all donors with respect to their funds substantially all of the time.

(B) Other action or withholding of action. The terms of the transfer agreement, or any expressed or implied understanding, required the public charity to take or withhold action with respect to the transferred assets which is not designed to further one or more of the exempt purposes of the public charity, and such action or withholding of action would, if performed by the transferor private foundation with respect to such assets, have subjected the transferor to tax under chapter 42 (other than with respect to the minimum investment return requirement of section 4942(e)).

(C) Assumption of leases, etc. The public charity assumes leases, contractual obligations, or liabilities of the transferor private foundation, or takes the assets thereof subject to such liabilities (including obligations under commitments or pledges to donees of the transferor private foundation), for purposes inconsistent with the purposes or best interests of the public charity, other than the payment of the transferor's chapter 42 taxes incurred prior to the transfer to the public charity to the extent of the value of the assets transferred.

(D) Retention of investment assets. The transferee public charity is required by any restriction or agreement (other than a restriction or agreement imposed or required by law or regulatory authority), express or implied, to retain any securities or other investment assets transferred to it by the private foundation. In a case where such transferred assets consistently produce a low annual return of income, the Internal Revenue Service will examine carefully whether the transferee is required by any such restriction or agreement to retain such assets.

(E) Right of first refusal. An agreement is entered into in connection with the transfer of securities or other property which grants directly or indirectly to the transferor private foundation or any disqualified person with respect thereto a right of first refusal with respect to the transferred securities or other property when and if disposed of by the public charity, unless such securities or other property was acquired by the transferor private foundation subject to such right of first refusal prior to October 9, 1969.

(F) Relationships. An agreement is entered into between the transferor private foundation and the transferee public charity which establishes irrevocable relationships with respect to the maintenance or management of assets transferred to the public charity, such as continuing relationships with banks, brokerage firms, investment counselors, or other advisors with regard to the investments or other property transferred to the public charity (other than a relationship with a trustee, custodian, or agent for a community trust acting as such). The transfer of property to a public charity subject to contractual obligations which were established prior to November 11, 1976 between the transferor private foundation and persons other than disqualified persons with respect to such foundation will not be treated as prohibited under the preceding sentence, but only if such contractual obligations were not entered into pursuant to a plan to terminate the private foundation status of the transferor under section 507(b)(1)(A) and if the continuation of such contractual obligations is in the best interests of the public charity.

(G) Other conditions. Any other condition is imposed on action by the public charity which prevents it from exercising ultimate control over the assets received from the transferor private foundation for purposes consistent with its exempt purposes.

(v) Examples. The provisions of paragraph (a)(8) of this section may be illustrated by the following examples:

Example (1). The M Private Foundation transferred all of its net assets to the V Cancer Institute, a public charity described in section 170(b)(1)(A)(iii). Prior to the transfer, M's activities consisted of making grants to hospitals and universities to further research into the causes of cancer. Under the terms of the transfer, V is required to keep M's assets in a separate fund and use the income and principal to further cancer research. Although the assets may be used only for a limited purpose, this purpose is consistent with and in furtherance of V's exempt purposes, and does not prevent the

transfer from being a distribution for purposes of section 507(b)(1)(A).

Example (2). The N Private Foundation transferred all of its net assets to W University, a public charity described in section 170(b)(1)(A)(ii). Under the terms of the transfer, W is required to use the income and principal to endow a chair at the university to be known as the "John J. Doe Memorial Professorship", named after N's creator. Although the transferred assets are to be used for a specified purpose by W, this purpose is in furtherance of W's exempt educational purposes, and there are no conditions on investment or reinvestment of the principal or income. The use of the name of the foundation's creator for the chair is not a restriction which would prevent the transfer from being a distribution for purposes of section 507(b)(1)(A).

Example (3). The O Private Foundation transferred all of its net assets to X Bank as trustee for the P Community Trust, a community trust which is a public charity described in section 170(b)(1)(A)(vi). Under the terms of the transfer, X is to hold the assets in trust for P and is directed to distribute the income annually to the Y Church, a public charity described in Section 170(b)(1)(A)(i). The distribution of income to Y Church is consistent with P's exempt purposes. If the trust created by this transfer otherwise meets the requirements of § 1.170A-9(e)(11) as a component part of P Community Trust, and assets transferred by O to X will be treated as distributed to one or more public charities within the meaning of section 507(b)(1)(A). The direction to distribute the income to Y Church meets the conditions of paragraph (a)(8)(iii)(B) of this section and will therefore not disqualify the transfer under section 507(b)(1)(A).

Example (4). The U Private Foundation transferred all of its net assets to Z Bank as trustee for the R Community Trust, a community trusl which is a public charity described in section 170(b)(1)(A)(vi). Under the terms of the transfer, Z is to hold the assets in trust for R and distribute the income to those public charities described in section 170(b)(1)(A)(i) through (vi) that are designated by B, the creator of U. R's governing body has no authority during B's lifetime to vary B's direction. Under the terms of the transfer, it is intended that Z retain the transferred assets in their present form for a period of 20 years, or until the date of B's death if it occurs before the expiration of such period. Upon the death of B, R will have the power to distribute the income to such public charities as it selects and may dispose of the corpus as it sees fit.

Under paragraph (a)(8)(iv)(A) or (D) of this section, as a result of the restrictions imposed with respect to the transferred assets, there has been no distribution of all U's net assets within the meaning of section 507(b)(1)(A) at the time of the transfer. In addition, U has not transferred its net assets to a component part of R Community Trust, but rather to a separate trust described in § 1.170A-9(e)(14).

(vi) Transitional rule. If the governing instrument of the public charity (or an instrument of transfer) lacks the factors described in paragraph (a)(8)(i)(D) or (ii) of this section, but with respect to gifts or bequests acquired before January 1, 1982, the public charity changes its governing instrument (or instrument of transfer) by the later of November 11, 1977, or one year after the gift or bequest is acquired, in order to conform such instrument to such provisions, then such an instrument shall be treated as consistent with such provisions for taxable years beginning prior to the date of change. In addition, if prior to the later of such dates, the organization has instituted court proceedings in order to conform such an instrument, then it may apply (prior to the later of such dates) for an extension of the period to conform such instrument to such provisions. Such application shall be made to the Commissioner of Internal Revenue, Attention E:EO, Washington, D.C. 20224. The Commissioner, at the Commissioner's discretion, may grant such an extension, if in the Commissioner's opinion such a change will conform the instrument to such provisions, and the change will be made within a reasonable time.

(b) Operation as a public charity—(1) In general. Under section 507(b)(1)(B) an organization can terminate its private foundation status if the organization:

(i) Meets the requirements of section 509(a)(1), (2), or (3) by the end of the 12-month period (as extended by paragraph (c)(3)(i) of this section) beginning with its first taxable year which begins after December 31, 1969, or for a continuous period of 60 calendar months beginning with the first day of any taxable year which begins after December 31, 1969;

(ii) In compliance with section 507(b)(1)(B)(ii) and subparagraph (3) of this paragraph, properly notifies the district director before the commencement of such 12-month or 60-month period or before March 29, 1973 that it is terminating its private foundation status; and

(iii) Properly establishes immediately after the expiration of such 12-month or 60-month period that such organization has complied with the requirements of section 509(a)(1), (2), or (3) by the end of the 12-month period or during the 60-month period, as the case may be, in the manner described in subparagraph (4) of this paragraph.

(2) Relationship of section 507(b)(1)(B) to section 507(a), (c), and (g). Since section 507(a) does not apply to a termination described in section 507(b)(1)(B), a private foundation's notification that it is commencing a termination pursuant to section 507(b)(1)(B) will not be treated as a notification described in section 507(a) even if the private foundation does not successfully terminate its private foundation status pursuant to section 507(b)(1)(B). A private foundation which terminates its private foundation status under section 507(b)(1)(B) does not incur tax under section 507(c) and, therefore, no abatement of such tax under section 507(g) is required.

(3) Notification of termination. In order to comply with the requirements under section

507(b)(1)(B)(ii), an organization shall before the commencement of the 12-month or 60-month period under section 507(b)(1)(B)(i) (or before March 29, 1973) or, in the case of the 12-month period for a community trust, before May 11, 1977, notify the district director of its intention to terminate its private foundation status.

Such notification shall contain the following information:

(i) The name and address of the private foundation;

(ii) Its intention to terminate its private foundation status;

(iii) Whether the 12-month or 60-month period shall apply;

(iv) The Code section under which it seeks classification (section 509(a)(1), (2), or (3));

(v) If section 509(a)(1) is applicable, the clause of section 170(b)(1)(A) involved;

(vi) The date its regular taxable year begins; and

(vii) The date of commencement of the 12-month or 60-month period.

(4) **Establishment of termination.** In order to comply with the requirements under section 507(b)(1)(B)(iii), an organization shall within 90 days after the expiration of the 12-month or 60-month period, file such information with the district director as is necessary to make a determination as to the organization's status as an organization described under section 509(a)(1), (2), or (3) and the regulations thereunder. See paragraphs (c) and (d) of this section as to the information required to be submitted under this subparagraph.

(5) **Incomplete information; 12- and 60-month terminations.** The failure to supply, within the required time, all of the information required by subparagraph (3) or (4) of this paragraph is not alone sufficient to constitute a failure to satisfy the requirements of section 507(b)(1)(B). If the information which is submitted within the required time is incomplete and the organization supplies the necessary additional information at the request of the Commissioner within the additional time period allowed by him, the original submission will be considered timely.

(6) **Application of special rules and filing requirements.** An organization which has terminated its private foundation status under section 507(b)(1)(B) is not required to comply with the special rules set forth in section 508(a) and (b). Such organization is also not required to file a return under the provisions of section 6043(b) or 6050 by reason of termination of its private foundation status under the provisions of section 507(b)(1)(B).

(7) **Extension of time to assess deficiencies.** If a private foundation files a notification (described in subparagraph (3) of this paragraph) that it intends to begin a 60-month termination pursuant to section 507(b)(1)(B) and does not file a request for an advance ruling pursuant to paragraph (e) of this section, such private foundation may file with the notification described in subparagraph (3) of this paragraph a consent under section 6501(c)(4) to the effect that the period of limitation upon assessment under section 4940 for any taxable year within the 60-month termination period shall not expire prior to 1 year after the date of the expiration of the time prescribed by law for the assessment of a deficiency for the last taxable year within the 60-month period. Such consents, if filed, will ordinarily be accepted by the Commissioner. See paragraph (f)(3) of this section for an illustration of the procedure required to obtain a refund of the tax imposed by section 4940 in a case where such a consent is not in effect.

(c) **Twelve-month terminations—(1) Method of determining normal sources of support—(i) In general.** The 12-month termination provisions of section 507(b)(1)(B) permit a private foundation to terminate its private foundation status by changing its organizational structure, its operations, the sources of its support, or any combination thereof, in order to conform to the requirements of section 509(a)(1), (2), or (3) by the end of the 12-month period.

(ii) **Support requirements for 12-month termination under section 170(b)(1)(A)(vi).** A private foundation attempting to meet the requirements of section 509(a)(1) as an organization described in section 170(b)(1)(A)(vi) will be considered "normally" to receive a substantial part of its support from governmental units or direct or indirect contributions from the general public if it can establish that it has changed the sources of its support before the close of the 12-month period to those of an organization described in section 170(b)(1)(A)(vi) and it can reasonably be expected to maintain its publicly supported status for subsequent years. In order to establish these facts, an organization shall submit all information sufficient to make a determination under § 1.170A–9(e) as if such provisions applied, including a description of all organizational and operational changes which have occurred during the 12-month period. It

shall also submit detailed information with respect to its sources of support for the 12-month period, as well as for the four taxable years immediately preceding the 12-month period. In applying the tests contained in § 1.170A-9(e), however, data from periods preceding the 12-month period shall be disregarded except for purposes of determining whether the organization has effectively changed its sources of support and whether it can reasonably be expected to maintain such publicly supported status for subsequent years. Thus, for example, in applying the mathematical tests of § 1.170A-9(e) only data for the 12-month period may enter into the computation.

(iii) Support requirements for 12-month terminations under section 170(b)(1)(A)(iv). Section 170(b)(1)(A)(iv) describes an organization which "normally" receives a substantial part of its support (exclusive of income from related activities) from the United States or any State or political subdivision thereof, or from the general public, and which is organized and operated exclusively to receive, hold, invest, and administer property and to make expenditures to or for the benefit of certain colleges or universities. For purposes of the 12-month termination period, the rule set forth in subdivision (ii) of this subparagraph with respect to section 170(b)(1)(A)(vi) organizations shall be applicable in determining whether an organization "normally" receives a substantial part of its support from the sources required under section 170(b)(1)(A)(iv).

(iv) Support requirements for 12-month terminations under section 509(a)(2). An organization attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 509(a)(2) by the end of the 12-month period will be considered as "normally" receiving its support in compliance with the one-third support requirements of section 509(a)(2) if:

(A) For the 12-month period under section 507(b)(1)(B), the organization receives more than one-third of its support from gifts, grants, contributions, membership fees, and gross receipts from related activities (as limited by section 509(a)(2)(A)(ii)) and not more than one-third of its support from items described in section 509(a)(2)(B), and

(B) The organization can establish that it can reasonably be expected to maintain its continued public support for subsequent years. In order to establish a reasonable expectation of continued public support, an organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, and any changes in its foundation managers (as defined in section 4946(b)(1)). Duplicate copies of its governing instrument and bylaws, with an indication of any amendments made, and detailed information with respect to its sources of support for the 4 taxable years immediately preceding the 12-month period shall also be submitted as part of the evidence that the organization can reasonably be expected to maintain its publicly supported status.

(2) Organizational and operational tests—(i) Section 509(a)(3) organizations—(A) In general. An organization attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 509(a)(3) by the end of the 12-month period is required to meet the organizational and operational test of section 509(a)(3)(A), in addition to the requirements of section 509(a)(3)(B) and (C), by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969. An organization may qualify under section 509(a)(3)(A) even though its original governing instrument did not limit its purposes to those set forth in section 509(a)(3)(A) and even though it operated for some other purpose before the end of the 12-month period, if it has amended its governing instrument and changed its operations to conform to the requirements of section 509(a)(3) by the end of the 12-month period.

(B) Proof of changed status. In order to establish that an organization described in (A) of this subdivision will continue to be operated exclusively for the required purposes in years subsequent to the end of the 12-month period, such organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, any changes in foundation managers (as defined in section 4946(b)(1)), and duplicate copies of its governing instrument and bylaws, with an indication of any amendments made. A detailed statement of the relationship between such organization and the specified organizations described in section 509(a)(1) or (2) (as required by section 509(a)(3)(A) and (B)) and all pertinent information to establish that the organization does not violate the control requirements of section 509(a)(3)(C) shall also be submitted.

(ii) Section 509(a)(1) organizations other than those described in section 170(b)(1)(A)(vi)—(A) In general. An organization attempting to terminate its private foundation status under section

507(b)(1)(B) by meeting the requirements of section 170(b)(1)(A)(i), (ii), (iii), (iv), or (v) by the end of the 12-month period is required to be operated as an organization described in clauses (i), (ii), (iii), (iv), or (v) of section 170(b)(1)(A) by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969.

(B) Proof of changed status. In order to establish that it will continue to be operated as an organization described in section 509(a)(1) in years subsequent to the end of the 12-month period, the organization shall submit a detailed statement describing its past and current operations, any organizational or operational changes and when such changes have occurred, and any changes in its foundation managers (as defined in section 4946(b)(1)). Duplicate copies of its governing instrument and bylaws, with an indication of any amendments made, and its financial statements for the 4-taxable years immediately preceding the 12-month period shall also be submitted as evidence that the organization can reasonably be expected to maintain its status as an organization described in section 170(b)(1)(A)(i), (ii), (iii), (iv), or (v).

(3) Extensions of the 12-month period. (i) For purposes of this section, an organization may accomplish a 12-month termination if it meets the requirements of section 507(b)(1)(B) and this paragraph for such a termination with respect to any of the following periods:

(A) The 12-month period beginning with the organization's first taxable year which begins after December 31, 1969;

(B) The period described in paragraph (a)(5)(ii) of this section; or

(C) Any period consisting of two or more taxable years beginning with the organization's first taxable year beginning after December 31, 1969, and ending with any taxable year ending before the end of the period described in paragraph (a)(5)(ii) of this section.

(ii) An organization will be considered as "normally" meeting the requirements of section 170(b)(1)(A)(iv) or (vi) or 509(a)(2), as the case may be, if it meets the requirements of such provision with respect to any period described in subdivision (i)(A), (B), or (C) of this subparagraph. Thus, for example, an organization on a calendar year basis which seeks to convert to a section 509(a)(2) organization under section 507(b)(1)(B) may meet the one-third support requirement based on the aggregate support received during a period described in subdivision (i)(A), (B), or (C) of this subparagraph, for purposes of subparagraph (1)(iv) of this paragraph.

(4) Status of organization subsequent to the 12-month period. For purposes of sections 507 through 509, an organization, the status of which as a private foundation is terminated under section 507(b)(1), shall (except as provided in paragraph (b)(6) of this section) be treated as an organization created on the day after the date of such termination. However, termination of private foundation status under the provisions of section 507(b)(1)(B) is based upon an organization's submission of information establishing compliance by the end of the 12-month period with the requirements of subparagraph (1) or (2) of this paragraph. Therefore, if in the 4 taxable years immediately following the end of the 12-month period, the sources of support or the methods of operation of the organization are materially different from the facts and circumstances presented during the 12-month period upon which the determination under section 507(b)(1)(B)(iii) was made (and such material difference adversely affects such determination), the organization will be deemed not to have satisfied the requirements of section 507(b)(1)(B). Under such circumstances, section 509(c) will not apply and the organization will continue to remain subject to the provisions of section 507. However, the status of grants and contributions under sections 170, 4942, and 4945 will not be affected until the Internal Revenue Service makes notice to the public (such as by publication in the Internal Revenue Bulletin) that the organization has been deleted from classification as an organization described in section 509(a)(1), (2), or (3) unless the donor (1) was in part responsible for, or was aware of, the act or failure to act that resulted in the organization's inability to satisfy the requirements of section 507(b)(1)(B), or (2) had knowledge that such organization would be deleted from classification as an organization described in section 509(a)(1), (2), or (3). Prior to the making of any grant or contribution which allegedly will not result in the grantee's loss of classification under section 509(a)(1), (2), or (3), a potential grantee organization may request a ruling whether such grant or contribution may be made without such loss of classification. A request for such ruling may be filed by the grantee organization with the district director. The issuance of such ruling will be at the sole discretion of the Commissioner.

(d) Sixty-month terminations—(1) Method of determining normal sources of support. (i) In order to meet the requirement of section

507(b)(1)(B) for the 60-month termination period as a section 509(a)(1) or (2) organization, an organization must meet the requirements of section 509(a)(1) or (2), as the case may be, for a continuous period of at least 60 calendar months. In determining whether an organization seeking status under section 509(a)(1) as an organization described in section 170(b)(1)(A)(iv) or (vi) or under section 509(a)(2) "normally" meets the requirements set forth under such sections, support received in taxable years prior to the commencement of the 60-month period shall not be taken into consideration, except as otherwise provided in this section. Therefore, in such cases rules similar to the rules applicable to new organizations would apply.

(ii) For purposes of section 507(b)(1)(B), an organization will be considered to be a section 509(a)(1) organization described in section 170(b)(1)(A)(vi) for a continuous period of 60 calendar months only if the organization satisfies the provisions of § 1.170A–9(e) based upon aggregate data for such entire period, rather than for any shorter period set forth in § 1.170A–9(e). Except for the substitution of such 60-month period for the periods described in § 1.170A–9(e), all other provisions of such regulations pertinent to determining an organization's normal sources of support shall remain applicable.

(iii) For purposes of section 507(b)(1)(B), an organization will be considered to be a section 509(a)(2) organization only if such organization meets the support requirements set forth in section 509(a)(2)(A) and (B) for the continuous period of 60 calendar months prescribed under section 507(b)(1)(B), rather than for any shorter period set forth in the regulations under section 509(a)(2). Except for the substitution of such 60-month period for the periods described in the regulations under section 509(a)(2), all other provisions of such regulations pertinent to determining an organization's normal sources of support shall remain applicable.

(2) Organizational and operational tests. In order to meet the requirements of section 507(b)(1)(B) for the 60-month termination period as an organization described in section 170(b)(1)(A)(i), (ii), (iii), (iv), or (v) or section 509(a)(3), as the case may be, an organization must meet the requirements of the applicable provision for a continuous period of at least 60 calendar months. For purposes of section 507(b)(1)(B), an organization will be considered to be such an organization only if it satisfies the requirements of the applicable provision (including with respect to section 509(a)(3), the organizational and operational test set forth in subparagraph (A) thereof) at the commencement of such 60-month period and continuously thereafter during such period.

(e) Advance rulings for 60-month terminations—(1) In general. An organization which files the notification required by section 507(b)(1)(B)(ii) that it is commencing a 60-month termination may obtain an advance ruling from the Commissioner that it can be expected to satisfy the requirements of section 507(b)(1)(B)(i) during the 60-month period. Such an advance ruling may be issued if the organization can reasonably be expected to meet the requirements of section 507(b)(1)(B)(i) during the 60-month period. The issuance of a ruling will be discretionary with the Commissioner.

(2) Basic consideration. In determining whether an organization can reasonably be expected (within the meaning of subparagraph (1) of this paragraph) to meet the requirements of section 507(b)(1)(B)(i) for the 60-month period, the basic consideration is whether its organizational structure (taking into account any revisions made prior to the beginning of the 60-month period), proposed programs or activities, intended method of operation, and projected sources of support are such as to indicate that the organization is likely to satisfy the requirements of section 509(a)(1), (2), or (3) and paragraph (d) of this section during the 60-month period. In making such a determination, all pertinent facts and circumstances shall be considered.

(3) Reliance by grantors and contributors. For purposes of sections 170, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522, grants or contributions to an organization which has obtained a ruling referred to in this paragraph will be treated as made to an organization described in section 509(a)(1), (2), or (3), as the case may be, until notice that such advance ruling is being revoked is made to the public (such as by publication in the Internal Revenue Bulletin). The preceding sentence shall not apply, however, if the grantor or contributor was responsible for, or aware of, the act or failure to act that resulted in the organization's failure to meet the requirements of section 509(a)(1), (2), or (3), or acquired knowledge that the Internal Revenue Service had given notice to such organization that its advance ruling would be revoked. Prior to the making of any grant or contribution which allegedly will not result in the grantee's failure to meet the requirements of section 509(a)(1), (2), or (3), a potential grantee organization may request a ruling whether such grant or contribution may be made without

such failure. A request for such ruling may be filed by the grantee organization with the district director. The issuance of such ruling will be at the sole discretion of the Commissioner. The organization must submit all information necessary to make a determination on the factors referred to in subparagraph (2) of this paragraph. If a favorable ruling is issued, such ruling may be relied upon by the grantor or contributor of the particular contribution in question for purposes of sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522.

(4) Reliance by organization. An organization obtaining an advance ruling pursuant to this paragraph cannot rely on such a ruling. Consequently, if the organization does not pay the tax imposed by section 4940 for any taxable year or years during the 60-month period, and it is subsequently determined that such tax is due for such year or years (because the organization did not in fact complete a successful termination pursuant to section 507(b)(1)(B) and was not treated as an organization described in section 509(a)(1), (2), or (3) for such year or years), the organization is liable for interest in accordance with section 6601 if any amount of tax under section 4940 has not been paid on or before the last date prescribed for payment. However, since any failure to pay such tax during the 60-month period (or prior to the revocation of such ruling) is due to reasonable cause, the penalty under section 6651 with respect to the tax imposed by section 4940 shall not apply.

(5) Extension of time to assess deficiencies. The advance ruling described in subparagraph (1) of this paragraph shall be issued only if such organization's request for an advance ruling is filed with a consent under section 6501(c)(4) to the effect that the period of limitation upon assessment under section 4940 for any taxable year within the advance ruling period shall not expire prior to 1 year after the date of the expiration of the time prescribed by law for the assessment of a deficiency for the last taxable year within the 60-month period.

(f) Effect on grantors or contributors and on the organization itself—(1) Effect of satisfaction of requirements for termination—(i) Treatment during the termination period. In the event that an organization satisfies the requirements of section 507(b)(1)(B) for termination of its private foundation status by the end of the 12-month period or during the continuous 60-month period, such organization shall be treated for such entire 12-month or 60-month period in the same manner as an organization described in section 509(a)(1), (2), or (3).

(ii) Twelve-month terminations by fiscal year organizations. In the case of an organization which operates on a fiscal year basis and terminates its private foundation status by the end of the 12-month period beginning with its first taxable year which begins after December 31, 1969, such 12-month period shall, for purposes of this paragraph, be treated as including the period between January 1, 1970, and the last day of the taxable year immediately preceding its first taxable year which begins after December 31, 1969, so long as the requirements of section 507(b)(1)(B) and paragraph (c) of this section are met by the end of the 12-month period (including such additional period).

(2) Failure to meet termination requirements—(i) In general. Except as otherwise provided in subdivision (ii) of this subparagraph and paragraph (e) of this section, any organization which fails to satisfy the requirements of section 507(b)(1)(B) for termination of its private foundation status by the end of the 12-month period or during the continuous 60-month period shall be treated as a private foundation for the entire 12-month or 60-month period, for purposes of sections 507 through 509 and chapter 42, and grants or contributions to such an organization shall be treated as made to a private foundation for purposes of sections 170, 507(b)(1)(A), 4942, and 4945.

(ii) Certain 60-month terminations. Notwithstanding subdivision (i) of this subparagraph, if an organization fails to satisfy the requirements of section 509(a)(1), (2), or (3) for the continuous 60-month period but does satisfy the requirements of section 509(a)(1), (2), or (3), as the case may be, for any taxable year or years during such 60-month period, the organization shall be treated as a section 509(a)(1), (2), or (3) organization for such taxable year or years and grants or contributions made during such taxable year or years shall be treated as made to an organization described in section 509(a)(1), (2), or (3). In addition, sections 507 through 509 and chapter 42 shall not apply to such organization for any taxable year within such 60-month period for which it does meet such requirements. For purposes of determining whether an organization satisfies the requirements of section 509(a)(1), (2), or (3) for any taxable year in the 60-month period, the organization shall be treated as if it were a new organization with its first taxable year beginning on the date of the commencement of the 60-month period. Thus, for

example, if an organization were attempting to terminate its private foundation status under section 507(b)(1)(B) by meeting the requirements of section 170(b)(1)(A)(vi), the rules under § 1.170A–9(e) relating to the initial determination of status of a new organization would apply.

(iii) Aggregate tax benefit. For purposes of section 507(d), the organization's aggregate tax benefit resulting from the organization's section 501(c)(3) status shall continue to be computed from the date from which such computation would have been made, but for the notice filed under section 507(b)(1)(B)(ii), except that any taxable year within such 60-month period for which such organization meets the requirements of section 509(a)(1), (2), or (3) shall be excluded from such computations.

(iv) Excess business holdings. See section 4943 and the regulations thereunder for rules relating to decreases in a private foundation's holdings in a business enterprise which are caused by the foundation's failure to terminate its private foundation status after giving the notification for termination under section 507(b)(1)(B)(ii).

(3) Example. The provisions of this paragraph may be illustrated by the following example:

Example. Y, a calendar year private foundation, notifies the district director that it intends to terminate its private foundation status by converting into a publicly supported organization described in section 170(b)(1)(A)(vi) and that its 60-month termination period will commence on January 1, 1974. Y does not obtain a ruling described in paragraph (e) of this section. Based upon its support for 1974 Y does not qualify as a publicly supported organization within the meaning of § 1.170A–9(e) and this paragraph. Consequently, in order to avoid the risks of penalties and interest if Y fails to terminate within the 60-month period, Y files its return as a private foundation and pays the tax imposed by section 4940. Similarly, based upon its support for the period 1974 through 1975, fails to qualify as such a publicly supported organization and files its return and pays the tax imposed by section 4940 for both 1975 and 1976. Since a consent (described in paragraph (b)(7) of this section) which would prevent the period of limitation from expiring is not in effect, in order to be able to file a claim for refund, Y and the district director agree to extend the period of limitation for all taxes imposed under chapter 42. However, based upon its support for the period 1974 through 1976 Y does qualify as a publicly supported organization, and therefore shall not be treated as a private foundation for either 1977 or 1978 even if it fails to terminate within the 60-month period. However, based upon the aggregate data for the entire 60-month period (1974 through 1978), Y does qualify as an organization described in section 170(b)(1)(A)(vi). Consequently, pursuant to this paragraph, Y is treated as if it had been a publicly supported organization for the entire 60-month period. Y files claim for refund for the taxes paid under section 4940 for the years 1974, 1975, and 1976, and such taxes are refunded.

(g) Special transitional rules for organizations operating as public charities. Section 4940 imposes a tax upon private foundations with respect to the carrying on of activities for each taxable year. For purposes of section 4940, an organization which terminates its private foundation status under section 507(b)(1)(B) by the end of the period described in paragraph (a)(5)(ii) of this section will not be considered as carrying on activities within the meaning of section 4940 during such period. Such organization will therefore not be subject to the tax imposed under section 4940 for such period. Consequently, in the case of an organization seeking to terminate its private foundation status under section 507(b)(1)(B) if the period described in paragraph (a)(5)(ii) of this section has not expired prior to the due date for the organization's annual return required to be filed under section 6033 or 6012 (determined with regard to any extension of time for filing the return) for its first taxable year which begins after December 31, 1969 (or any other taxable year ending before the expiration of the period described in paragraph (a)(5)(ii) of this paragraph) and if the organization has not terminated its private foundation status under section 507(b)(1)(B) by such date, then notwithstanding the provisions of paragraph (f) of this section, the organization must take either of the following courses of action:

(1) Complete and file its annual return including the line relating to excise taxes on investment income, by such date, and pay the tax on investment income imposed under section 4940 at the time it files its annual return. If such organization subsequently terminates its private foundation status under section 507(b)(1)(B) within a period specified in paragraph (c)(3)(i) of this section, it may file a claim for refund of the tax paid under section 4940; or

(2) Complete and file its annual return, except for the line relating to excise taxes on investment income, by such date, and in lieu of paying the tax on investment income imposed under section 4940, file a statement with its annual return which establishes that the organization has taken affirmative action by such date to terminate its private foundation status under section 507(b)(1)(B). Such statement must indicate the type of affirmative action taken and explain how such action will result in the termination of its private foundation status under section 507(b)(1)(B). Such affirmative action may include making application to the appropriate State court for approval to amend the provisions of the organization's trust instrument to limit payments to specified section 509(a)(1) or (2) beneficiaries pursuant to section 509(a)(3) in the case of a charitable trust; commencing a fund-

raising drive among the general public in the case of an organization seeking to become a section 170(b)(1)(A)(vi) or 509(a)(2) organization; or the passage of a resolution by the organization's governing body or the filing of an amendment to the organization's articles of incorporation permitting a change in the operations of the organization to enable it to conform to the provisions of section 509(a)(1), (2), or (3) in the case of a not-for-profit corporation. An organization may take such affirmative action and may terminate its private foundation status under section 507(b)(1)(B) in reliance upon 26 CFR 13.12 (rev. as of Jan. 1, 1972) and upon the provisions of the notices of proposed rulemaking under sections 170(b)(1)(A), 507(b)(1), and 509. Thus, if an organization meets the requirement of the provisions of the notice of proposed rulemaking as a section 509(a)(3) organization, such organization may terminate its private foundation status under section 507(b)(1)(B) in reliance upon such provisions prior to the expiration of the period described in paragraph (a)(5)(ii) of this section. If such organization, however, fails to terminate its private foundation status under section 507(b)(1)(B) within the period specified in paragraph (a)(5)(ii) of this section by failing to meet the requirements of either the notices of proposed rulemaking under section 170(b)(1)(A), 507(b)(1), or 509 or the final regulations published under these Code sections, the tax imposed under section 4940 shall be treated as if due from the due date for its annual return (determined without regard to any extension of time, for filing its return).

[T.D. 7248, 38 FR 861, Jan. 5, 1973; 38 FR 3598, Feb. 8, 1973; 38 FR 4259, Feb. 12, 1973, as amended by T.D. 7290, 38 FR 31833, Nov. 19, 1973; T.D. 7440, 41 FR 50654, Nov. 17, 1976; 41 FR 52454, Nov. 30, 1976; T.D. 7465, 42 FR 4437, Jan. 25, 1977; T.D. 7784, 47 FR 37889, July 23, 1981]

§ 1.507-3 Special rules; transferee foundations.

(a) General rule. (1) For purposes of Part II, Subchapter F, Chapter 1 of the Code, in the case of a transfer of assets of any private foundation to another private foundation pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization, or reorganization, the transferee organization shall not be treated as a newly created organization. Thus, in the case of a significant disposition of assets to one or more private foundations within the meaning of paragraph (c) of this section, the transferee organization shall not be treated as a newly created organization. A transferee organization to which this paragraph applies shall be treated as possessing those attributes and characteristics of the transferor organization which are described in subparagraphs (2), (3), and (4) of this paragraph.

(2)(i) A transferee organization to which this paragraph applies shall succeed to the aggregate tax benefit of the transferor organization in an amount determined as follows: Such amount shall be an amount equal to the amount of such aggregate tax benefit multiplied by a fraction the numerator of which is the fair market value of the assets (less encumbrances) transferred to such transferee and the denominator of which is the fair market value of the assets of the transferor (less encumbrances) immediately before the transfer. Fair market value shall be determined as of the time of the transfer.

(ii) Notwithstanding subdivision (i) of this subparagraph, a transferee organization which is not effectively controlled (within the meaning of § 1.482-1(a)(3)), directly or indirectly, by the same person or persons who effectively control the transferor organization shall not succeed to an aggregate tax benefit in excess of the fair market value of the assets transferred at the time of the transfer.

(iii) This subparagraph may be illustrated by the following examples:

Example (1). Pursuant to a transfer described in section 507(b)(2), F, a private foundation, transfers to G, a private foundation, all of its assets, which have a fair market value of $400,000. Immediately before the transfer F's aggregate tax benefit was $200,000, and G's aggregate tax benefit was $300,000. After the transfer G's aggregate tax benefit is $500,000 ($200,000 + $300,000).

Example (2). Pursuant to a transfer described in section 507(b)(2), M, a private foundation, transfers all of its assets, which immediately prior to the transfer have a fair market value of $100,000. The assets were transferred to the following organizations at the following fair market values (determined at the time of transfer) $40,000 to N, a private foundation, $30,000 to O, a private foundation, and $30,000 to P, an organization described in section 170(b)(1)(A)(vi). Immediately before the transfer M's aggregate tax benefit was $50,000. Therefore, N succeeds to M's aggregate tax benefit to the extent of $20,000 ($50,000 × $40,000/$100,000) and O succeeds to M's aggregate tax benefit to the extent of $15,000 ($50,000 × $30,000/$100,000). The remaining $15,000 of M's aggregate tax benefit is retained by M as M has not terminated under section 507.

Example (3). Assume the same facts as in Example (2) except that the transfers were made as follows: M transferred $30,000 to N on January 1, 1972, $40,000 to P on July 1, 1972, and $30,000 to O on December 31, 1972. Further, assume that the fair market value of the assets and the aggregate tax benefit do not change during 1972 and that O is not effectively controlled (directly or indirectly) by the same person or persons who effectively control M. N succeeds to M's aggregate tax benefit to the extent of $15,000 ($50,000 × $30,000/$100,000). However, since $40,000 of the remaining $70,000 ($100,000–

$30,000) of assets of M was transferred to P on July 1, 1972, immediately before the transfer to O, the fair market value of the assets held by M is $30,000 ($70,000–$40,000). On the other hand, because P is not a private foundation, M's aggregate tax benefit immediately before the transfer to O remains $35,000 ($50,000–$15,000). Therefore, before applying subdivision (ii) of this subparagraph, O would succeed to $35,000 ($35,000 × $30,000/$30,000) of M's aggregate tax benefit. However, applying subdivision (ii) of this subparagraph since M transferred only $30,000 to O, O shall succeed to only $30,000 of M's aggregate tax benefit. The remaining $5,000 ($35,000–$30,000) of M's aggregate tax benefit is retained by M as M has not terminated under section 507.

(3) For purposes of section 507(d)(2), in the event of a transfer of assets described in section 507(b)(2), any person who is a "substantial contributor" (within the meaning of section 507(d)(2)) with respect to the transferor foundation shall be treated as a "substantial contributor" with respect to the transferee foundation, regardless of whether such person meets the $5,000-two percent test with respect to the transferee organization at any time. If a private foundation makes a transfer described in section 507(b)(2) to two or more transferee private foundations, any person who is a "substantial contributor" with respect to the transferor foundation prior to such transfer shall be considered a "substantial contributor" with respect to each transferee private foundation.

(4) If a private foundation incurs liability for one or more of the taxes imposed under chapter 42 (or any penalty resulting therefrom) prior to, or as a result of, making a transfer of assets described in section 507(b)(2) to one or more private foundations, in any case where transferee liability applies each transferee foundation shall be treated as receiving the transferred assets subject to such liability to the extent that the transferor foundation does not satisfy such liability.

(5) Except as provided in subparagraph (9) of this paragraph, a private foundation is required to meet the distribution requirements of section 4942 for any taxable year in which it makes a section 507(b)(2) transfer of all or part of its net assets to another private foundation. Such transfer shall itself be counted toward satisfaction of such requirements to the extent the amount transferred meets the requirements of section 4942(g). However, where the transferor has disposed of all of its assets, the recordkeeping requirements of section 4942(g)(3)(B) shall not apply during any period in which it has no assets. Such requirements are applicable for any taxable year other than a taxable year during which the transferor has no assets.

(6) For purposes of section 4943(c)(4), (5), and (6), whenever a private foundation makes a section 507(b)(2) transfer of all or part of its net assets to another private foundation, the applicable period of time described in section 4943(c)(4), (5), or (6) shall include both the period during which the transferor foundation held such assets and the period during which the transferee foundation holds such assets.

(7) Except as provided in subparagraph (9) of this paragraph, where the transferor has disposed of all of its assets, during any period in which the transferor has no assets, section 4945(d)(4) and (h) shall not apply to the transferee or the transferor with respect to any "expenditure responsibility" grants made by the transferor. However, the exception contained in this subparagraph shall not apply with respect to any information reporting requirements imposed by section 4945 and the regulations thereunder for any year in which any such transfer is made.

(8)(i) Except as provided in subdivision (ii) of this subparagraph or subparagraph (6) or (9) of this paragraph or whenever a private foundation makes a transfer of assets described in section 507(b)(2) to one or more private foundations, the transferee foundation:

(a) Will not be treated as being in existence prior to January 1, 1970, with respect to any transferred assets;

(b) Will not be treated as holding the transferred assets prior to January 1, 1970; and

(c) Will not be treated as having engaged in, or become subject to, any transaction, lease, contract, or other obligation with respect to the transferred assets prior to January 1, 1970.

(ii) Notwithstanding subdivision (i) of this subparagraph, the provisions enumerated in (a) through (g) of this subdivision shall apply to the transferee foundation with respect to the assets transferred to the same extent and in the same manner that they would have applied to the transferor foundation had the transfer described in section 507(b)(2) not been effected:

(a) Section 4940(c)(4)(B) and the regulations thereunder with respect to basis of property,

(b) Section 4942(f)(4) and the regulations thereunder with respect to distributions of income,

(c) Section 101(*l*)(2) of the Tax Reform Act of 1969 (83 Stat. 533), as amended by sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729), with respect to the provisions of section 4941,

(d) Section 101(*l*)(3)(A) of the Tax Reform Act of 1969 (83 Stat. 534) with respect to the provisions of section 4942, but only if the transferor qualified for the application of such section immediately before the transfer, and at least 85 percent of the fair market value of the net assets of the transferee immediately after the transfer was received pursuant to the transfer,

(e) Section 101(*l*)(3)(B) through (E) of the Tax Reform Act of 1969 (83 Stat. 534) with respect to the provisions of section 4942,

(f) Section 101(*l*)(5) of the Tax Reform Act of 1969 (83 Stat. 535) with respect to the provisions of section 4945, and

(g) Section 101(*l*)(6) of the Tax Reform Act of 1969 (83 Stat. 535) with respect to the provisions of section 508(e).

(9)(i) If a private foundation transfers all of its net assets to one or more private foundations which are effectively controlled (within the meaning of § 1.482–1(a)(3)), directly or indirectly, by the same person or persons which effectively controlled the transferor private foundation, for purposes of chapter 42 (section 4940 et seq.) and part II of subchapter F of chapter 1 of the Code (sections 507 through 509) such a transferee private foundation shall be treated as if it were the transferor. However, where proportionality is appropriate, such a transferee private foundation shall be treated as if it were the transferor in the proportion which the fair market value of the assets (less encumbrances) transferred to such transferee bears to the fair market value of the assets (less encumbrances) of the transferor immediately before the transfer.

(ii) Subdivision (i) of this subparagraph shall not apply to the requirements under sections 6033, 6056, and 6104 which must be complied with by the transferor private foundation, nor to the requirement under section 6043 that the transferor file a return with respect to its liquidation, dissolution, or termination.

(iii) This subparagraph may be illustrated by the following examples:

Example (1). The trustees of X charitable trust, a private foundation, form the Y charitable corporation, also a private foundation, in order to facilitate the conduct of their activities. The trustees of X are also the directors of Y. Y has the same charitable purposes as X. All of the assets of X are transferred to Y, and Y continues to carry on X's charitable activities. Under such circumstances, Y shall be treated as if it were X for the purposes of subdivision (i) of this subparagraph. Thus, for example, Y will be permitted to take advantage of any special rules or savings provisions with respect to chapter 42 to the same extent as X could have if X had continued in existence.

Example (2). A and B are the trustees of the P charitable trust, a private foundation, and are the only substantial contributors to P. On July 1, 1973, in order to facilitate accomplishment of diverse charitable purposes, A and B create and control the R Foundation, the S Foundation and the T Foundation and transfer the net assets of P to R, S, and T. As of the end of 1973, P has an outstanding grant to Foundation W and has been required to exercise expenditure responsibility with respect to this grant under sections 4945(d)(4) and (h). Under these circumstances, R, S, and T shall each be treated as if they are P in the proportion the fair market value of the assets transferred to each bears to the fair market value of the assets of P immediately before the transfer. Since R, S, and T are treated as P, absent a specific provision for exercising expenditure responsibility with respect to the grant to W, each of them is required to exercise expenditure responsibility with respect to such grant. If, as a part of the transfer to R, P assigned, and R assumed, P's duties with respect to the expenditure responsibility grant to W, only R would be required to exercise expenditure responsibility with respect to the grant to W. Since R, S, and T are treated as P rather than as recipients of "expenditure responsibility" grants, there are no expenditure responsibility requirements which must be exercised under sections 4945(d)(4) and (h) with respect to the transfers of assets to R, S, and T.

(10) For certain rules relating to filing requirements where a private foundation has transferred all its net assets, see § 1.507–1(b)(9).

(b) Status of transferee organization under section 507(b)(2). Since a transfer of assets pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization or reorganization to an organization not described in section 501(c)(3) (other than an organization described in section 509(a)(4)) or 4947 is a taxable expenditure under section 4945(d)(5), in order for such a transfer of assets not to be a taxable expenditure, it must be to an organization described in section 501(c)(3) (other than an organization described in section 509(a)(4)) or treated as described in section 501(c)(3) under section 4947. See § 53.4945–6(c)(3) of this chapter. Consequently, unless such a transferee is an organization described in section 509(a)(1), (2), or (3), the transferee is a private foundation and the rules of section 507(b)(2) and paragraph (a) of this section apply. On the other hand, if such a transfer of assets is made to a transferee organization which is not described in either section 501(c)(3) (other than an organization described in section 509(a)(4)) or 4947, and in order to correct the making of a taxable expenditure, such assets are transferred to a private foundation, section 507(b)(2) and paragraph (a) of this section shall apply as if the transfer of assets had been made directly to such private foundation.

(c) Section 507(b)(2) transfers. (1) A transfer of assets is described in section 507(b)(2) if it is made by a private foundation to another private

foundation pursuant to any liquidation, merger, redemption, recapitalization, or other adjustment, organization, or reorganization. This shall include any organization or reorganization described in subchapter C of chapter 1. For purposes of section 507(b)(2), the terms "other adjustment, organization, or reorganization" shall include any partial liquidation or any other significant disposition of assets to one or more private foundations, other than transfers for full and adequate consideration or distributions out of current income. For purposes of this paragraph, a distribution out of current income shall include any distribution described in section 4942(h)(1)(A) and (B).

(2) The term "significant disposition of assets to one or more private foundations" shall include any disposition for a taxable year where the aggregate of:

(i) The dispositions to one or more private foundations for the taxable year, and

(ii) Where any disposition to one or more private foundations for the taxable year is part of a series of related dispositions made during prior taxable years, the total of the related dispositions made during such prior taxable years, is 25 percent or more of the fair market value of the net assets of the foundation at the beginning of the taxable year (in the case of subdivision (i) of this subparagraph) or at the beginning of the first taxable year in which any of the series of related dispositions was made (in the case of subdivision (ii) of this subparagraph). A "significant disposition of assets" may occur in a single taxable year (as in subdivision (i) of this subparagraph) or over the course of two or more taxable years (as in subdivision (ii) of this subparagraph). The determination whether a significant disposition has occurred through a series of related distributions (within the meaning of subdivision (ii) of this subparagraph) will be made on the basis of all the facts and circumstances of the particular case. However, if one or more persons who are disqualified persons (within the meaning of section 4946) with respect to the transferor private foundation are also disqualified persons with respect to any of the transferee private foundations, such fact shall be evidence that the transfer is part of a series of related dispositions (within the meaning of subdivision (ii) of this subparagraph). In the case of a series of related dispositions described in subdivision (ii) of this subparagraph, each transferee private foundation shall (on any date) be subject to the provisions of section 507(b)(2) (with respect to all such dispositions made to it on or before such date) to the extent described in paragraphs (a) and (b) of this section.

(3) A private foundation which fails to meet the requirements of section 507(b)(1)(A) for a taxable year may be required to file a return under section 6043(b) by reason of a transfer of assets to one or more sections 509(a)(1), (2), or (3) organizations. Hence, such filing does not necessarily mean that a section 507(b)(2) transfer has occurred. See § 1.6043-3(f)(1).

(4) This paragraph applies to any section 507(b)(2) transfer made by a private foundation referred to in section 170(b)(1)(E)(i), (ii), or (iii).

(5) The provisions of this paragraph may be illustrated by the following examples:

Example (1). M is a private foundation on the calendar year basis. It has net assets worth $100,000 as of January 1, 1971. In 1971, in addition to distributions out of current income, M transfers $10,000 to N, $10,000 to O, and $10,000 to P. N, O, and P are all private foundations. Under subparagraph (2)(i) of this paragraph, M has made a significant disposition of its assets in 1971 since M has disposed of more than 25 percent of its net assets (with respect to the fair market value of such assets as of January 1, 1971). M has therefore made section 507(b)(2) transfers within the meaning of this paragraph, and section 507(b)(2) applies to the transfers made to N, O, and P.

Example (2). U, a tax-exempt private foundation on the calendar year basis, has net assets worth $100,000 as of January 1, 1971. As part of a series of related dispositions in 1971 and 1972, U transfers in 1971, in addition to distributions out of current income, $10,000 to private foundation X and $10,000 to private foundation Y, and in 1972, in addition to distributions out of current income, U transfers $10,000 to private foundation Z. Under subparagraph (2)(ii) of this paragraph, U is treated as having made a series of related dispositions in 1971 and 1972. The aggregate of the 1972 disposition (under subparagraph (2)(i) of this paragraph) and the series of related dispositions (under subparagraph (2)(ii) of this paragraph) is $30,000, which is more than 25 percent of the fair market value of U's net assets as of the beginning of 1971 ($100,000), the first year in which any such disposition was made. Thus, U has made a significant disposition of its assets and has made transfers described in section 507(b)(2). The provisions of paragraphs (a) and (b) of this section apply to each of the transferees as of the date on which it received assets from U.

(d) Inapplicability of section 507(a) to section 507(b)(2) transfers. Unless a private foundation voluntarily gives notice pursuant to section 507(a)(1), a transfer of assets described in section 507(b)(2) will not constitute a termination of the transferor's private foundation status under section 507(a)(1). Such transfer must, nevertheless, satisfy the requirements of any pertinent provisions of chapter 42. See subparagraphs (5) through (7) of paragraph (a) of this section. However, if such transfer constitutes an act or failure to act which is described in section 507(a)(2)(A), then such transfer will be subject to the provisions of section 507(a)(2) rather than section 507(b)(2). For example, X, a private nonoperating foundation,

transfers all of its net assets to Y, a private operating foundation, in 1971. X does not file the notice referred to in section 507(a)(1) and the transfer does not constitute either a willful and flagrant act (or failure to act), or one of a series of willful repeated acts (or failures to act), giving rise to liability for tax under chapter 42. Under these circumstances, the transfer is described in section 507(b)(2) and the provisions of paragraph (a) of this section apply with respect to Y. The private foundation status of X has not been terminated under section 507(a).

(e) **Transfers to certain section 509(a)(1), (2), or (3) organizations.** If a private foundation transfers all or part of its assets to one or more organizations described in section 509(a)(1), (2), or (3) and, within a period of 3 years from the date of such transfers, one or more of the transferee organizations lose their section 509(a)(1), (2), or (3) status and become private foundations, then for purposes of this section, a transfer of assets within the meaning of paragraph (c) of this section to such an organization which becomes a private foundation will be treated as a transfer described in section 507(b)(2), and the provisions of paragraph (a) of this section shall be treated as applying to such a transferee organization from the date on which any such transfer was made to it.

(f) **Certain transfers made during section 507(b)(1)(B) terminations.** If—

(1) During the course of the 12-month or 60-month period described in section 507(b)(1)(B), a private foundation makes one or more transfers to one or more private foundations;

(2) Such transfers are described in § 1.507–3(c)(1); and

(3) Even though the transferor foundation thereafter meets the requirements of section 507(b)(1)(B),

then for purposes of this section, the provisions of § 1.507–2(e) shall not apply with respect to such transfers, and such transfers will be treated as transfers described in section 507(b)(2) and § 1.507–3 rather than as transfers from an organization described in section 509(a)(1), (2), or (3).

[T.D. 7233, 37 FR 28158, Dec. 21, 1972; 38 FR 3189, Feb. 2, 1973, as amended by T.D. 7678, 44 FR 12415, Feb. 26, 1980]

§ 1.507–4 Imposition of tax.

(a) **General rule.** Section 507(c) imposes on each organization the private foundation status of which is terminated under section 507(a) a tax equal to the lower of:

(1) The amount which such organization substantiates by adequate records (or other corroborating evidence which may be required by the Commissioner) as the aggregate tax benefit (as defined in section 507(d)) resulting from the section 501(c)(3) status of such organization, or

(2) The value of the net assets of such organization.

(b) **Transfers not subject to section 507(c).** Private foundations which make transfers described in section 507(b)(1)(A) or (2) are not subject to the tax imposed under section 507(c) with respect to such transfers unless the provisions of section 507(a) become applicable. See §§ 1.507–1(b), 1.507–2(a)(6) and 1.507–3(d).

[T.D. 7233, 37 FR 28161, Dec. 21, 1972]

§ 1.507–5 Aggregate tax benefit; in general.

(a) **General rule.** For purposes of section 507(c)(1), the aggregate tax benefit resulting from the section 501(c)(3) status of any private foundation is the sum of:

(1) The aggregate increases in tax under chapters 1, 11, and 12 (or the corresponding provisions of prior law) which would have been imposed with respect to all substantial contributors to the foundation if deductions for all contributions made by such contributors to the foundation after February 28, 1913, had been disallowed,

(2) The aggregate increases in tax under chapter 1 (or the corresponding provisions of prior law) which would have been imposed with respect to the income of the private foundation for taxable years beginning after December 31, 1912, if (i) it had not been exempt from tax under section 501(a) (or the corresponding provisions of prior law), and (ii) in the case of a trust, deductions under section 642(c) (or the corresponding provisions of prior law) had been limited to 20 percent of the taxable income of the trust (computed without the benefit of section 642(c) but with the benefit of section 170(b)(1)(A)),

(3) The amount succeeded to from transferors under § 1.507–3(a) and section 507(b)(2), and

(4) Interest on the increases in tax determined under subparagraphs (1), (2), and (3) of this paragraph from the first date on which each such increase would have been due and payable to the

date on which the organization ceases to be a private foundation.

(b) Contributions. In computing the amount of the aggregate increases in tax under subparagraph (1) of this paragraph, all deductions attributable to a particular contribution shall be included. For example, if a substantial contributor has taken deductions under sections 170 and 2522 (or the corresponding provisions of prior law) with respect to the same contribution, the amount of each deduction shall be included in the computations under section 507(d)(1)(A). Accordingly, the aggregate tax benefit may exceed the fair market value of the property transferred.

[T.D. 7233, 37 FR 28161, Dec. 21, 1972]

§ 1.507–6 Substantial contributor defined.

(a) Definition—(1) In general. Except as provided in subparagraph (2) of this paragraph, the term "substantial contributor" means, with respect to a private foundation, any person (within the meaning of section 7701(a)(1)), whether or not exempt from taxation under section 501(a), who contributed or bequeathed an aggregate amount of more than $5,000 to the private foundation, if such amount is more than 2 percent of the total contributions and bequests received by the private foundation before the close of the taxable year of the private foundation in which a contribution or bequest is received by the foundation from such person. In the case of a trust, the term "substantial contributor" also means the creator of the trust. Such term does not include a governmental unit described in section 170(c)(1).

(2) Special rules. For purposes of sections 170(b)(1)(E)(iii), 507(d)(1), 508(d), 509(a)(1) and (3), and chapter 42, the term "substantial contributor" shall not include an organization which is described in section 509(a)(1), (2), or (3) or any other organization which is wholly owned by such section 509(a)(1), (2), or (3) organization. Furthermore, taking section 4941 (relating to taxes on self-dealing) in context, it would unduly restrict the activities of private foundations if the term "substantial contributor" were to include any section 501(c)(3) organizations. It was not intended, for example, that a large grant for charitable purposes from one private foundation to another would forever preclude the latter from making any grants to, or otherwise dealing with, the former. Accordingly, for purposes of section 4941 only, the term "substantial contributor" shall not only include any organization which is described in section 501(c)(3) (other than an organization described in section 509(a)(4)).

(b) Determination of substantial contributor—(1) In general. In determining under paragraph (a) of this section whether the aggregate of contributions and bequests from a person exceeds 2 percent of the total contributions and bequests received by a private foundation, both the total of such amounts received by the private foundation, and the aggregate of such amounts contributed and bequeathed by such person, shall be determined as of the last day of each taxable year commencing with the first taxable year ending after October 9, 1969. Generally, under section 507(d)(2) and this section, except for purposes of valuation under section 507(d)(2)(B)(i), all contributions and bequests made before October 9, 1969, are deemed to have been made on October 9, 1969. For purposes of section 509(a)(2) and the support test described in § 1.509(a)–3(c), contributions and bequests before October 9, 1969, will be taken into account in the year when actually made. For example, in the case of a contribution or bequest of $6,000 in 1967, such contribution or bequest shall be treated as made by a substantial contributor in 1967 for purposes of section 509(a)(2) and § 1.509(a)–3(c) if such person met the $5,000—2 percent test as of December 31, 1967, and December 31, 1969 (in the case of a calendar year accounting period). Although the determination of the percentage of total contributions and bequests represented by a given donor's contributions and bequests is not made until the end of the foundation's taxable year, a donor is a substantial contributor as of the first date when the foundation received from him an amount sufficient to make him a substantial contributor. Except as otherwise provided in this subparagraph, such amount is treated for all purposes as made by a substantial contributor. Thus, the total contributions and bequests received by the private foundation from all persons, and the aggregate contributions and bequests made by a particular person, are to be determined as of December 31, 1969 (in the case of a calendar year organization which was in existence on that date), and the amounts included in each respective total would be all contributions and bequests received by the organization on or before that date, and all contributions and bequests made by the person on or before that date. Thereafter, a similar determination is to be made with respect to such private foundation as of the end of each of its succeeding taxable years. Status as a substantial contributor, however, will date from the time when the donor first met the $5,000 and 2 percent test. Once a person is a

substantial contributor with respect to a private foundation, he remains a substantial contributor even though he might not be so classified if a determination were first made at some later date. For instance, even though the aggregate contributions and bequests of a person become less than 2 percent of the total received by a private foundation (for example, because of subsequent contributions and bequests by other persons), such person remains a substantial contributor with respect to the foundation.

(2) Examples. The provisions of paragraph (a) of this section and this paragraph (b) may be illustrated by the following examples:

Example (1). On January 1, 1968, A, an individual, gave $4,500 to M, a private foundation on a calendar year basis. On June 1, 1969, A gave M the further sum of $1,500. Throughout its existence, through December 31, 1969, M has received $250,000 in contributions and bequests from all sources. As of June 1, 1969, A is a substantial contributor to M for purposes of section 509(a)(2).

Example (2). On September 9, 1966, B, an individual, gave $3,500 to N, a private foundation on a calendar year basis. On March 15, 1970, B gave N the further sum of $3,500. Throughout its existence, through December 31, 1970, N has received $200,000 in contributions and bequests from all sources. B is a substantial contributor to N as of March 15, 1970, since that is the first date on which his contributions met the 2 percent-$5,000 test.

Example (3). On July 21, 1964, X, a corporation, gave $2,000 to O, a private foundation on a calendar year basis. As of December 31, 1969, O had received $150,000 from all sources. On September 17, 1970, X gave O the further sum of $3,100. Through September 17, 1970, O had received $245,000 from all sources as total contributions and bequests. Between September 17, 1970, and December 31, 1970, however, O received $50,000 in contributions and bequests from others. X is not a substantial contributor to O, since X's contributions to O were not more than 2 percent of the total contributions and bequests received by O by December 31, 1970, the end of O's taxable year, even though X's contributions met that test at one point during the year.

Example (4). On September 16, 1970, C, an individual, gave $10,000 to P, a private foundation on a calendar year basis. Throughout its existence, and through December 31, 1970, the close of its taxable year, P had received a total of $100,000 in contributions and bequests. On January 3, 1971, P received a bequest of $1 million. C is a substantial contributor to P since be was a substantial contributor as of September 16, 1970, and therefore remains one even though he no longer meets the 2-percent test on a later date after the end of the taxable year of the foundation in which he first became a substantial contributor.

(c) Special rules—(1) Contributions defined. The term "contribution" shall, for purposes of section 507(d)(2), have the same meaning as such term has under section 170(c) and also include bequests, legacies, devises, and transfers within the meaning of section 2055 or 2106(a)(2). Thus, for purposes of section 507(d)(2), any payment of money or transfer of property without adequate consideration shall be considered a "contribution". Where payment is made or property transferred as consideration for admissions, sales of merchandise, performance of services, or furnishing of facilities to the donor, the qualification of all or any part of such payment or transfer as a contribution under section 170(c) shall determine whether and to what extent such payment or transfer constitutes a "contribution" under section 507(d)(2).

(2) Valuation of contributions and bequests. Each contribution or bequest to a private foundation shall be valued at fair market value when actually received by the private foundation.

(3) Contributions and bequests by a spouse. An individual shall be considered, for purposes of this section, to have made all contributions and bequests made by his spouse during the period of their marriage. Thus, for example, where W contributed $500,000 to P, a private foundation, in 1941 and that amount exceeded 2 percent of the total contributions received by P as of the end of P's first taxable year ending after October 9, 1969, H (W's spouse at the time of the 1941 gift) is considered to have made such contribution (even if W died prior to October 9, 1969, or their marriage was otherwise terminated prior to such date). Similarly, any bequest or devise shall be treated as having been made by the decedent's surviving spouse.

[T.D. 7241, 37 FR 28743, Dec. 29, 1972; 38 FR 24206, Sept. 6, 1973]

§ 1.507–7 Value of assets.

(a) In general. For purposes of section 507(c), the value of the net assets shall be determined at whichever time such value is higher:

(1) The first day on which action is taken by the organization which culminates in its ceasing to be a private foundation, or

(2) The date on which it ceases to be a private foundation.

(b) Valuation dates. (1) In the case of a termination under section 507(a)(1), the date referred to in paragraph (a)(1) of this section shall be the date on which the terminating foundation gives the notification described in section 507(a)(1).

(2) In the case of a termination under section 507(a)(2), the date referred to in paragraph (a)(1) of this section shall be the date of occurrence of the willful and flagrant act (or failure to act) or the first of the series of willful repeated acts (or failures to act) giving rise to liability for tax under

chapter 42 and the imposition of tax under section 507(a)(2).

(c) Fair market value. For purposes of this section, fair market value shall be determined pursuant to the provisions of § 53.4942(a)–2(c)(4) of this chapter.

(d) Net assets. For purposes of section 507 and the regulations thereunder, the term "net assets" shall mean the gross assets of a private foundation reduced by all liabilities of the foundation, including appropriate estimated and contingent liabilities. Thus, a determination of net assets may reflect reductions for any liability or contingent liability for tax imposed upon the private foundation under chapter 42 with respect to acts or failures to act prior to termination, for any liability or contingent liability for failures to correct such acts or failures to act, or for any liability or estimated or contingent liability with respect to expenses associated with winding up the organization. If a private foundation's determination of net assets reflects any reduction for any estimated or contingent liability, such private foundation must establish, to the satisfaction of the Commissioner, the reasonableness of such reduction. If the amount of net assets reflects a reduction for any estimated or contingent liability, at the earlier of the final determination of the contingency or the termination of a reasonable time, any excess of the amount by which the gross assets was reduced over the amount of the liability shall be treated in the same manner as if such excess had been considered part of the net assets.

[T.D. 7233, 37 FR 28161, Dec. 21, 1972]

§ 1.507–8 Liability in case of transfers.

For purposes of determining liability for the tax imposed under section 507(c) in the case of assets transferred by the private foundation, such tax shall be deemed to have been imposed on the first day on which action is taken by the organization which culminates in its ceasing to be a private foundation. If an organization's private foundation status is terminated under section 507(a)(2), the first day on which action is taken which culminates in its ceasing to be a private foundation (within the meaning of section 507(f)) shall be the date described in § 1.507–7(b)(2). If an organization terminates its private foundation status under section 507(a)(1), the first day on which action is taken which culminates in its ceasing to be a private foundation (within the meaning of section 507(f)) shall be the date described in § 1.507–7(b)(1).

[T.D. 7233, 37 FR 28161, Dec. 21, 1972]

§ 1.507–9 Abatement of taxes.

(a) General rule. The Commissioner may at his discretion abate the unpaid portion of the assessment of any tax imposed by section 507(c), or any liability in respect thereof, if:

(1) The private foundation distributes all of its net assets to one or more organizations described in section 170(b)(1)(A) (other than in clauses (vii) or (viii)) each of which has been in existence and so described for a continuous period of at least 60 calendar months, or

(2) Effective assurance is given to the Commissioner in accordance with paragraphs (b) and (c) of this section that the assets of the organization which are dedicated to charitable purposes will, in fact, be used for charitable purposes.

The provisions of § 1.507–2(a)(2), (3), and (7) shall apply to distributions under subparagraph (1) of this paragraph. Since section 507(g) provides only for the abatement of tax imposed under section 507(c), no tax imposed under any provision of chapter 42 shall be abated under section 507(g). Where the taxpayer files a petition with the Tax Court with respect to a notice of deficiency regarding any tax under section 507(c), such tax shall be treated as having been assessed for the purposes of abatement of such tax under section 507(g) and the regulations thereunder.

(b) State proceedings. (1) The Commissioner may at his discretion abate the unpaid portion of the assessment of any tax imposed by section 507(c), or any liability in respect thereof, under the procedures outlined in subparagraphs (2) and (3) of this paragraph. Such tax may not be abated by the Commissioner unless he determines that corrective action as defined in paragraph (c) of this section has been taken. The Commissioner may not abate by reason of section 507(g) any amount of such tax which has already been collected since only the unpaid portion thereof can be abated.

(2) The appropriate State officer shall have 1 year from the date of notification prescribed in section 6104(c) that a notice of deficiency of tax imposed under section 507(c) has been issued with respect to a foundation, to advise the Commissioner that corrective action has been initiated pursuant to State law as may be ordered or approved by a court of competent jurisdiction. Corrective action may be initiated either by the appropriate State officer or by an organization described in section 509(a)(1), (2), or (3) which is a beneficiary of the private foundation and has enforceable

rights against such foundation under State law. Copies of all pleadings and other documents filed with the court at the initial stages of the proceedings shall be attached to the notification made by the State officer to the Commissioner. Prior to notification by the appropriate State officer that corrective action has been initiated, the Commissioner shall follow those procedures which would apply with respect to the assessment and collection of the tax imposed under section 507(c) without regard to section 507(g)(2). Subsequent to notification by the appropriate State officer that corrective action has been initiated, the Commissioner shall suspend action with respect to the assessment or collection of tax imposed under section 507(c) until notified of the final determination of such corrective action, as long as any such resulting delay does not jeopardize the collection of such tax and does not cause collection to be barred by operation of law or any rule of law. In any case where collection of such tax is about to be barred by operation of section 6502 and the Commissioner has not been advised of the final determination of corrective action, the Commissioner should make every effort to obtain appropriate agreements with the foundation subject to such tax to extend the period of limitations under section 6502(a)(2). Where such agreements are obtained, action with respect to the assessment and collection of such tax may be suspended to the extent not inconsistent with this subparagraph.

(3) Upon receipt of certification from the appropriate State officer that action has been ordered or approved by a court of competent jurisdiction, the Commissioner may abate the unpaid portion of the assessment of tax imposed by section 507(c), or any liability in respect thereof, if in his judgment such action is corrective action within the meaning of paragraph (c) of this section. In the event that such action is not corrective action, the Commissioner may in his discretion again suspend action on the assessment and collection of such tax until corrective action is obtained, or if in his judgment corrective action cannot be obtained, he may resume the assessment and collection of such tax.

(c) **Corrective action.** The term "corrective action" referred to in paragraph (b) of this section means vigorous enforcement of State laws sufficient to assure implementation of the provisions of chapter 42 and insure that the assets of such private foundation are preserved for such charitable or other purposes specified in section 501(c)(3). Except where assets of the terminated private foundation are transferred to an organization described in section 509(a)(1) through (4) the State is required to take such action to assure that the provisions of section 508(e)(1)(A) and (B) are applicable to the terminated foundation (or any transferee) with respect to such assets as if such organization were a private foundation. Thus, the governing instrument of such organization must include provisions with respect to such assets—

(1) Requiring its income therefrom for each taxable year to be distributed at such time and in such manner as not to subject such organization to tax under section 4942 (as if the organization were a private foundation),

(2) Prohibiting such organization from engaging in any act of self-dealing (as defined in section 4941(d) as if the organization were a private foundation),

(3) Prohibiting such organization from retaining any excess business holdings (as defined in section 4943(c) as if the organization were a private foundation),

(4) Prohibiting such organization from making any investments in such manner as to subject such organization to tax under section 4944 (as if the organization were a private foundation), and

(5) Prohibiting such organization from making any taxable expenditures (as defined in section 4945(d) as if the organization were a private foundation). Consequently, in cases where the preceding sentence applies, although the private foundation status of an organization is terminated for tax purposes, it is contemplated that its status under State law would remain unchanged, because the tax under section 507(c) has been abated solely because the Commissioner has been given effective assurance that there is vigorous enforcement of State laws sufficient to assure implementation of the provisions of chapter 42. Therefore, in such a case while chapter 42 will not apply to acts occurring subsequent to termination which previously would have resulted in the imposition of tax under chapter 42, it is contemplated that there will be vigorous enforcement of State laws (including laws made applicable by the provisions in the governing instrument) with respect to such acts. Notwithstanding the preceding three sentences, no amendment to the organization's governing instrument is necessary where there are provisions of State law which have the effect of requiring a terminated private foundation to which the rules of subparagraphs (1) through (5) of this paragraph apply to be subject to such rules whether or not there are such provisions in such terminated private foundation's governing instrument.

[T.D. 7233, 37 FR 28161, Dec. 21, 1972]

§ 1.508-1 Notices.

(a) **New organizations must notify the Commissioner that they are applying for recognition of section 501(c)(3) status—(1) In general.** Except as provided in subparagraph (3) of this paragraph, an organization that is organized after October 9, 1969, will not be treated as described in section 501(c)(3)—

(i) Unless such organization has given the Commissioner notice in the manner prescribed in subparagraph (2) of this paragraph; or

(ii) For any period before the giving of such notice, unless such notice is given in the manner and within the time prescribed in subparagraph (2) of this paragraph.

No organization shall be exempt from taxation under section 501(a) by reason of being described in section 501(c)(3) whenever such organization is not treated as described in section 501(c)(3) by reason of section 508(a) and this paragraph. See section 508(d)(2)(B) and § 1.508-2(b) regarding the deductibility of charitable contributions to an organization during the period such organization is not exempt under section 501(a) as an organization described in section 501(c)(3) by reason of failing to file a notice under section 508(a) and this subparagraph. See also § 1.508-2(b)(1)(viii) regarding the deductibility of charitable contributions to trusts described in section 4947(a)(1).

(2) **Filing of notice.** (i) For purposes of subparagraph (1) of this paragraph, except as provided in subparagraph (3) of this paragraph, an organization seeking exemption under section 501(c)(3) must file the notice described in section 508(a) within 15 months from the end of the month in which the organization was organized, or before March 22, 1973, whichever comes later. Such notice is filed by submitting a properly completed and executed Form 1023, exemption application. Notice should be filed with the district director. A request for extension of time for the filing of such notice should be submitted to such district director. Such request may be granted if it demonstrates that additional time is required.

(ii) Although the information required by Form 1023 must be submitted to satisfy the notice required by this section, the failure to supply, within the required time, all of the information required to complete such form is not alone sufficient to deny exemption from the date of organization to the date such complete information is submitted by the organization. If the information which is submitted within the required time is incomplete, and the organization supplies the necessary additional information at the request of the Commissioner within the additional time period allowed by him, the original notice will be considered timely.

(iii) For purposes of subdivision (i) of this subparagraph and paragraph (b)(2)(i) of this section, an organization shall be considered "organized" on the date it becomes an organization described in section 501(c)(3) (determined without regard to section 508(a)).

(iv) Since a trust described in section 4947(a)(2) is not an organization described in section 501(c)(3), it is not required to file a notice described in section 508(a).

(v) For the treatment of community trusts, and the trusts or funds comprising them, under section 508, see the special rules under § 1.170A-9(e).

(vi) A foreign organization shall, for purposes of section 508, be treated in the same manner as a domestic organization, except that section 508 shall not apply to a foreign organization which is described in section 4948(b).

(3) **Exceptions from notice.** (i) Subparagraphs (1) and (2) of this paragraph are inapplicable to the following organizations:

(a) Churches, interchurch organizations of local units of a church, conventions or associations of churches, or integrated auxiliaries of a church, such as a men's or women's organization, religious school, mission society, or youth group;

(b) Any organization which is not a private foundation (as defined in section 509(a)) and the gross receipts of which in each taxable year are normally not more than $5,000 (as described in subdivision (ii) of this subparagraph);

(c) Subordinate organizations (other than private foundations) covered by a group exemption letter;

(d) Solely for purposes of sections 507, 508(d)(1), 508(d)(2)(A) and 508(d)(3), 508(e), 509 and chapter 42, a trust described in section 4947(a)(1). (However, a trust described in section 501(c)(3) which was organized after October 9, 1969, shall be exempt under section 501(a) by reason of being described in section 501(c)(3) only if it files such notice); and

(e) Any other class of organization that the Commissioner from time to time excludes from the requirement of filing notice under section 508(a).

(ii) For purposes of subdivision (i)(b) of this subparagraph and paragraph (b)(7)(ii) of this sec-

tion, the gross receipts (as defined in subdivision (iii) of this subparagraph) of an organization are normally not more than $5,000 if—

(a) During the first taxable year of the organization the organization has received gross receipts of $7,500 or less;

(b) During its first 2 taxable years the aggregate gross receipts received by the organization are $12,000 or less; and

(c) In the case of an organization which has been in existence for at least 3 taxable years, the aggregate gross receipts received by the organization during the immediately preceding 2 taxable years, plus the current year are $15,000 or less.

If an organization fails to meet the requirements of (a), (b), or (c) of this subdivision, then with respect to the organization, such organization shall be required to file the notices described in section 508(a) and (b) within 90 days after the end of the period described in (a), (b), or (c) of this subdivision or before March 22, 1973, whichever is later, in lieu of the period prescribed in subparagraph (2)(i) of this paragraph. Thus, for example, if an organization meets the $7,500 requirement of (a) of this subdivision for its first taxable year, but fails to meet the $12,000 requirement of (b) of this subdivision for the period ending with its second taxable year, then such organization shall meet the notification requirements of section 508(a)(1) and 508(b) and subparagraph (2)(i) of this paragraph if it files such notification within 90 days after the close of its second taxable year. If an organization which has been in existence at least 3 taxable years meets the requirements of (a), (b), and (c) with respect to all prior taxable years, but fails to meet the requirements of (c) of this subdivision with respect to the current taxable year, then even if the organization fails to make such notification within 90 days after the close of the current taxable year, section 508(a)(1) and 508(b) shall not apply with respect to its prior years. In such a case, the organization shall not be treated as described in section 501(c)(3) for a period beginning with such current taxable year and ending when such notice is given under section 508(a)(2).

(iii) For a definition of "gross receipts" for purposes of subdivision (i)(b) of this subparagraph and paragraph (b)(7)(ii) of this section, see § 1.6033–2(g)(4).

(4) Voluntary filings by new organizations excepted from filing notice. Any organization excepted from the requirement of filing notice under section 508(a) will be exempt from taxation under section 501(c)(3) if it meets the requirements of that section, whether or not it files such notice. However, in order to establish its exemption with the Internal Revenue Service and receive a ruling or determination letter recognizing its exempt status, an organization excepted from the notice requirement by reason of subparagraph (3) of this paragraph should file proof of its exemption in the manner prescribed in § 1.501(a)–1.

(b) Presumption that old and new organizations are private foundations—(1) In general. Except as provided in subparagraph (7) of this paragraph, any organization (including an organization in existence on October 9, 1969) which is described in section 501(c)(3), and which does not notify the Commissioner within the time and in the manner prescribed in subparagraph (2) that it is not a private foundation, will be presumed to be a private foundation.

(2) Filing of notice. (i) Except as provided in subparagraph (7) of this paragraph, an organization must file the notice described in section 508(b) and subparagraph (1) of this paragraph within 15 months from the end of the month in which such organization was organized, or before March 22, 1973, whichever comes later. See paragraph (a)(2)(iii) of this section, for rules pertaining to when an organization is "organized".

(ii) Any organization filing notice under this paragraph that has received a ruling or determination letter from the Internal Revenue Service dated on or before July 13, 1970, recognizing its exemption from taxation under section 501(c)(3) (or the corresponding provisions of prior law), shall file the notice described in section 508(b) by submitting a properly completed and executed Form 4653, Notification Concerning Foundation Status.

(iii) The financial schedule on Form 4653 need be completed only if the organization is, or thinks it might be, described in section 170(b)(1)(A)(iv) or (vi) or section 509(a)(2).

(iv) Any organization filing notice under this paragraph that has not received a ruling or determination letter from the Internal Revenue Service dated on or before July 13, 1970, recognizing its exemption from taxation under section 501(c)(3) (or the corresponding provisions of prior law), shall file its notice by submitting a properly completed and executed Form 1023 and providing information that it is not a private foundation. The organization shall also submit all information required by the regulations under section 170 or 509 (whichever is applicable) necessary to establish recognition of its classification as an organization

described in section 509(a)(1), (2), (3), or (4). A Form 1023 submitted prior to July 14, 1970, will satisfy this requirement if the organization submits an additional statement that it is not a private foundation together with all pertinent additional information required. Any statement filed under this subdivision shall be accompanied by a written declaration by the principal officer, manager or authorized trustee that there is a reasonable basis in law and in fact for the statement that the organization so filing is not a private foundation, and that to the best of the knowledge and belief of such officer, manager or trustee, the information submitted is complete and correct.

(v) The notice filed under subdivision (ii) of this subparagraph should be filed in accordance with the instructions applicable to Form 4653. The notice required by subdivision (iv) of this subparagraph should be filed with the district director. An extension of time for the filing of such notice may be granted by the Director of the Internal Revenue Service Center or district director upon timely request by the organization to such person, if the organization demonstrates that additional time is required.

(3) Effect of notice upon the filing organization. (i) The notice filed under this paragraph may not be relied upon by the organization so filing unless and until the Internal Revenue Service notifies the organization that it is an organization described in paragraph (1), (2), (3), or (4), of section 509(a). For purposes of the preceding sentence, an organization that has filed notice under section 508(b), and has previously received a ruling that it is an organization described in section 170(b)(1)(A) (other than clauses (vii) and (viii) thereof), will be considered to have been notified by the Internal Revenue Service that it is an organization described in paragraph (1) of section 509(a) if (a) the facts and circumstances forming the basis for the issuance of such ruling have not substantially changed, and (b) the ruling issued under that section has not been revoked expressly or by a subsequent change of the law or regulations under which the ruling was issued.

(ii) If an organization has filed a notice under section 508(b) stating that it is not a private foundation and designating only one paragraph of section 509(a) under which it claims recognition of its classification (such as an organization described in section 509(a)(2)), and if it has received a ruling or determination letter which recognizes that it is not a private foundation but which fails to designate the paragraph under section 509(a) in which it is described, then such organization will be treated as described under the paragraph designated by it, until such ruling or determination letter is modified or revoked. The rule in the preceding sentence shall not apply to an organization which indicated that it does not know its status under section 509(a) or which claimed recognition of its status under more than one paragraph of section 509(a).

(4) Effect of notice upon grantors or contributors to the filing organization. In the case of grants, contributions, or distributions made prior to—

(i) In the case of community trusts, 6 months after the date on which corrective and clarifying regulations designated as § 1.170A–9(e)(10) become final;

(ii) In the case of medical research organizations, 6 months after the date on which corrective and clarifying regulations designated as § 1.170A–9(b)(2), become final, and

(iii) In all other cases, January 1, 1976, any organization which has properly filed the notice described in section 508(b) prior to March 22, 1973 will not be treated as a private foundation for purposes of making any determination under the internal revenue laws with respect to a grantor, contributor or distributor (as for example, a private foundation distributing all of its net assets pursuant to a section 507(b)(1)(A) termination) thereto, unless the organization is controlled directly or indirectly by such grantor, contributor or distributor, if by the 30th day after the day on which such notice is filed, the organization has not been notified by the Commissioner that the notice filed by such organization has failed to establish that such organization is not a private foundation. See subparagraph (6) of this paragraph for the effect of an adverse notice by the Internal Revenue Service. For purposes of this subparagraph, an organization which has properly filed notice described in section 508(b) prior to March 22, 1973, and which has claimed recognition of its status under only one paragraph of section 509(a) in such notice, will be treated only for purposes of grantors, contributors or distributors as having the classification claimed in the notice if the provisions of this subparagraph are otherwise satisfied.

(5) Statement that old and new organizations are operating foundations. (i) Any organization (including an organization in existence on October 9, 1969) which is described in section 501(c)(3) may submit a statement, in the form and manner provided for notice in subparagraph (2) of this

paragraph, that it is an operating foundation (as defined in section 4942(j)(3)) and include in such statement:

(a) Necessary supporting information as required by the regulations under section 4942(j)(3) to confirm such determination (including a statement identifying the clause of section 4942(j)(3)(B) that is applicable); and

(b) A written declaration by the principal officer, manager, or authorized trustee that there is a reasonable basis in law and in fact that the organization so filing is an operating foundation, and that to the best of the knowledge and belief of such officer, manager or trustee, the information submitted is complete and correct.

(ii) The statement filed under this subparagraph may not be relied upon by the organization so filing unless and until the Internal Revenue Service notifies the organization that it is an operating foundation described in section 4942(j)(3).

(iii) In the case of grants, contributions, or distributions made prior to March 22, 1973, any organization which has properly filed the statement described in this subparagraph prior to such date will be treated as an operating foundation for purposes of making any determination under the internal revenue laws with respect to a grantor, contributor, or distributor thereto, unless the organization is controlled directly or indirectly by such grantor, contributor, or distributor, if by the 30th day after the day on which such statement is filed, the organization has not been notified by the Commissioner or his delegate that its statement has failed to establish that such organization is an operating foundation. See subparagraph (6) of this paragraph for the effect of an adverse notice by the Internal Revenue Service.

(6) Effect of notice by Internal Revenue Service concerning organization's notice or statement. Subparagraph (4) and subdivision (iii) of subparagraph (5) of this paragraph shall have no effect:

(i) With respect to a grantor, contributor, or distributor to any organization for any period after the date on which the Internal Revenue Service makes notice to the public (such as by publication in the Internal Revenue Bulletin) that a grantor, contributor, or distributor to such organization can no longer rely upon the notice or statement submitted by such organization; and

(ii) Upon any grant, contribution, or distribution made to an organization on or after the date on which a grantor, contributor, or distributor acquired knowledge that the Internal Revenue Service has given notice to such organization that its notice or statement has failed to establish that such organization either is not a private foundation, or is an operating foundation, as the case may be.

(7) Exceptions from notice. Subparagraphs (1) and (2) of this paragraph are inapplicable to the following organizations:

(i) Churches, interchurch organizations of local units of a church, conventions or associations of churches, or integrated auxiliaries of a church, such as a men's or women's organization, religious school, mission society, or youth group;

(ii) Any organization which is not a private foundation (as defined in section 509(a)) and the gross receipts of which in each taxable year are normally not more than $5,000 (as determined under paragraph (a)(3)(ii) of this section);

(iii) Subordinate organizations (other than private foundations) covered by a group exemption letter but only if the parent or supervisory organization submits a notice covering the subordinates;

(iv) Trusts described in section 4947(a)(1); and

(v) Any other class of organization that the Commissioner from time to time excludes from the notification requirements of section 508(b).

(8) Voluntary filings by organizations excepted from filing notice. Any organization excepted from the requirement of filing notice under section 508(b) by reason of subdivisions (i), (ii), and (v) of subparagraph (7) of this paragraph may receive the benefits of subparagraph (4) of this paragraph by filing such notice.

[T.D. 7232, 37 FR 28289, Dec. 22, 1972, as amended by T.D. 7258, 38 FR 4258, Feb. 12, 1973; T.D. 7300, 38 FR 35304, Dec. 27, 1973; T.D. 7342, 40 FR 1237, Jan. 7, 1975; T.D. 7395, 41 FR 1063, Jan. 6, 1976]

§ 1.508–2 Disallowance of certain charitable, etc., deductions.

(a) Gift or bequest to organizations subject to section 507(c) tax—(1) General rule. No gift or bequest made to an organization upon which the tax provided by section 507(c) has been imposed shall be allowed as a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522, if such gift or bequest is made:

(i) By any person after notification has been made by the organization under section 507(a)(1)

or after notification has been made by the Commissioner under section 507(a)(2)(B), or

(ii) By a substantial contributor (as defined in section 507(d)(2)) in his taxable year which includes the first day on which action is taken by such organization which culminates in the imposition of tax under section 507(c) and any subsequent taxable year.

For purposes of subdivision (ii) of this subparagraph, the first day on which action is taken by an organization which culminates in the imposition of tax under section 507(c) shall be determined under the rules set forth in § 1.507–7(b)(1) and (2).

(2) Exception. Subparagraph (1) of this paragraph shall not apply if the entire amount of the unpaid portion of the tax imposed by section 507(c) is abated by the Commissioner under section 507(g).

(b) Gift or bequest to taxable private foundation, section 4947 trust, etc.—(1) General rule. (i) Except as provided in subparagraph (2) of this paragraph, no gift or bequest made to an organization shall be allowed as a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522, if such gift or bequest is made:

(a) To a private foundation or a trust described in section 4947(a)(2) in a taxable year for which it fails to meet the requirements of section 508(e) (determined without regard to section 508(e)(2)(B) and (C)), or

(b) To any organization in a period for which it is not treated as an organization described in section 501(c)(3) by reason of section 508(a).

(ii) For purposes of subdivision (i)(a) of this subparagraph the term "taxable year" refers to the taxable year of the donee or beneficiary organization. In the event a bequest is made to a private foundation or trust described in section 4947(a)(2) which is not in existence at the date of the testator's death (but which is created under the terms of the testator's will), the term "taxable year" shall mean the first taxable year of the private foundation or trust.

(iii) For purposes of subdivision (i)(a) of this subparagraph, an organization does not fail to meet the requirements of section 508(e) for a taxable year, unless it fails to meet such requirements for the entire year. Therefore, even if a donee organization fails to meet the requirements of section 508(e) on the date it receives a grant from a donor, the donor's grant will not be disallowed by operation of section 508(d)(2)(A) and subdivision (i)(a) of this subparagraph, if the organization meets the requirements of section 508(e) (determined without regard to section 508(e)(2)(B) or (C)) by the end of its taxable year.

(iv) No deduction will be disallowed under section 508(d)(2)(A) with respect to a deduction under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), or 2522 if during the taxable year in question, the private foundation or trust described in section 4947(a)(2) has instituted a judicial proceeding which is necessary to reform its governing instrument or other instrument in order to meet the requirements of section 508(e)(1). This subdivision shall not apply unless within a reasonable time such judicial proceedings succeed in so reforming such instrument.

(v) No deduction will be disallowed under section 508(d)(2)(A) and subdivision (i)(a) of this subparagraph for any taxable year beginning before January 1, 1972, with respect to a private foundation or trust described in section 4947 organized before January 1, 1970. See also § 1.508–3(g) regarding transitional rules for extending compliance with section 508(e)(1).

(vi)(a) In the case of a contribution or bequest to a trust described in section 4947(a)(2) other than to a trust to which subdivision (vii) of this subparagraph applies, no deduction shall be disallowed by reason of section 508(d)(2)(A) on the grounds that such trust's governing instrument contains no provisions with respect to section 4942. Similarly, if for a taxable year such trust is also a trust described in section 4947(b)(3), no deduction for such year shall be so disallowed on the grounds that the governing instrument contains no provision with respect to section 4943 or 4944.

(b) This subdivision may be illustrated by the following example:

Example. H executes a will on January 1, 1977, establishing a charitable remainder trust (as described in section 664) with income payable to W, his wife, for life, remainder to X university, an organization described in section 170(b)(1)(A)(ii). The will provides that the trust is prohibited from engaging in activities which would subject itself, its foundation manager or a disqualified person to taxes under section 4941 or 4945 of the Code. The will is silent as to sections 4942, 4943, and 4944. H dies February 12, 1978. Section 508(d)(2)(A) will not operate to disallow any deduction to H's estate under section 2055 with respect to such trust.

(vii)(a) In the case of a trust described in section 4947(a)(2) which by its terms will become a trust described in section 4947(a)(1) and the governing instrument of which is executed after March 22, 1973, the governing instrument shall not meet the requirements of section 508(e)(1) if it

does not contain provisions to the effect that the trust must comply with the provisions of section 4942, or sections 4942, 4943, and 4944 (as the case may be) to the extent such section or sections shall become applicable to such trust.

(b) This subdivision may be illustrated by the following example:

Example. H executes a will on January 1, 1977, establishing a charitable remainder trust (as described in section 664) with income payable to W, his wife, for life, remainder in trust in perpetuity for the benefit of an organization described in section 170(c). By its terms the trust will become a trust described in section 4947(a)(1), and will become a private foundation. The will provides that the trust is prohibited from engaging in activities which would subject itself, its foundation manager or a disqualified person to taxes under sections 4941 or 4945 of the Code. The will is silent as to sections 4942, 4943, and 4944. H dies February 12, 1978. Unless the trust's governing instrument is amended prior to the end of the trust's first taxable year, or judicial proceedings have been instituted under subdivision (iv) of this subparagraph, section 508(d)(2)(A) will operate to disallow any deduction to H's estate under section 2055 with respect to such trust.

(viii) Since a charitable trust described in section 4947(a)(1) is not required to file a notice under section 508(a), section 508(d)(2)(B) and subdivision (i)(b) of this subparagraph are not applicable to such a trust.

(2) Transitional rules. Any deduction which would otherwise be allowable under section 642(c)(2), 2106(a)(2), or 2055 shall not be disallowed under section 508(d)(2)(A) if such deduction is attributable to:

(i) Property passing under the terms of a will executed on or before October 9, 1969,

(a) If the decedent dies after October 9, 1969, but before October 9, 1972, without having amended any dispositive provision of the will after October 9, 1969, by codicil or otherwise,

(b) If the decedent dies after October 9, 1969, and at no time after that date had the right to change the portions of the will which pertains to the passing of property to, or for the use of, an organization described in section 170(c)(2)(B) or 2055(a), or

(c) If no dispositive provision of the will is amended by the decedent, by codicil or otherwise, before October 9, 1972, and the decedent is on October 9, 1972, and at all times thereafter under a mental disability (as defined in § 1.642(c)–2(b)(3)(ii)) to amend the will by codicil or otherwise, or

(ii) Property transferred in trust on or before October 9, 1969,

(a) If the grantor dies after October 9, 1969, but before October 9, 1972, without having amended, after October 9, 1969, any dispositive provision of the instrument governing the disposition of the property,

(b) If the property transferred was an irrevocable interest to, or for the use of, an organization described in section 170(c)(2)(B) or 2055(a),

(c) In the case of a deduction under section 2106(a)(2) or 2055; if no dispositive provision of the instrument governing the disposition of the property is amended by the grantor before October 9, 1972, and the grantor is on October 9, 1972, and at all times thereafter under a mental disability (as defined in § 1.642(c)–2(b)(3)(ii)) to change the disposition of the property, or

(d) In the case of a deduction under section 642(c)(2)(A), if the grantor is at all times after October 9, 1969, and up to, and including, the last day of the taxable year for which the deduction under such section is claimed, under a mental disability (as defined in § 1.642(c)–2(b)(3)(ii)) to change the terms of the trust.

See also § 1.508–3(g) regarding the extension of time for compliance with section 508(e), § 1.664–1(f)(3)(ii) and (g) regarding the special transitional rules for charitable remainder annuity and unitrusts described in section 664 which were created prior to December 31, 1972, and § 20.2055–2(e)(4) of this chapter regarding the rules for determining if the dispositive provisions have been amended.

[T.D. 7232, 37 FR 28291, Dec. 22, 1972]

§ 1.508–3 Governing instruments.

(a) General rule. A private foundation shall not be exempt from taxation under section 501(a) for a taxable year unless by the end of such taxable year its governing instrument includes provisions the effects of which are:

(1) To require distributions at such times and in such manner as not to subject the foundation to tax under section 4942, and

(2) To prohibit the foundation from engaging in any act of self-dealing (as defined in section 4941(d)), from retaining any excess business holdings (as defined in section 4943(c)), from making any investments in such manner as to subject the foundation to tax under section 4944, and from making any taxable expenditures (as defined in section 4945(d)).

(b) Effect and nature of governing instrument—(1) In general. Except as provided in paragraph (d) of this section, the provisions of a foundation's governing instrument must require or prohibit, as the case may be, the foundation to act or refrain from acting so that the foundation, and any foundation managers or other disqualified persons with respect thereto, shall not be liable for any of the taxes imposed by sections 4941, 4942, 4943, 4944, and 4945 of the Code or, in the case of a split-interest trust described in section 4947(a)(2), any of the taxes imposed by those sections of chapter 42 made applicable under section 4947. Specific reference to these sections of the Code will generally be required to be included in the governing instrument, unless equivalent language is used which is deemed by the Commissioner to have the same full force and effect. However, a governing instrument which contains only language sufficient to satisfy the requirements of the organizational test under § 1.501(c)(3)-1(b) will not be considered as meeting the requirements of this subparagraph, regardless of the interpretation placed on such language as a matter of law by a State court in a particular jurisdiction, unless the requirements of paragraph (d) of this section are satisfied.

(2) Corpus. A governing instrument does not meet the requirements of paragraph (a)(1) of this section if it expressly prohibits the distribution of capital or corpus.

(3) Savings provisions. For purposes of sections 508(d)(2)(A) and (e), a governing instrument need not include any provision which is inconsistent with section 101(*l*), (2), (3), (4), or (5) of the Tax Reform Act of 1969 (83 Stat. 533), as amended by sections 1301 and 1309 of the Tax Reform Act of 1976 (90 Stat. 1713, 1729), with respect to the organization. Accordingly, a governing instrument complying with the requirements of subparagraph (1) of this paragraph may incorporate any savings provision contained in section 101(*l*), (2), (3), (4), or (5) of the Tax Reform Act of 1969, as amended by sections 1301 and 1309 of the Tax Reform Act of 1976, as a specific exception to the general provisions of paragraph (a) of this section. In addition, in the absence of any express provisions to the contrary, the exceptions contained in such savings provisions will generally be regarded as contained in a governing instrument meeting the requirements of subparagraph (1) of this paragraph.

(4) Excess holdings. For purposes of paragraph (a)(2) of this section, the prohibition against "retaining any excess business holdings (as defined in section 4943(c))" shall be deemed only to prohibit the foundation from retaining any excess business holdings when such holdings would subject the foundation to tax under section 4943(a).

(5) Revoked ruling on status. In the case of an organization which—

(i) Has been classified as an organization described in section 509(a)(1), (2), (3), or (4), and

(ii) Subsequently receives a ruling or determination letter stating that it is no longer described in section 509(a)(1), (2), (3), or (4), but is a private foundation within the meaning of section 509,

such organization shall have 1 year from the date of receipt of such ruling or determination letter, or the final ruling or determination letter if a protest is filed to an earlier one, to meet the requirements of section 508(e). Section 508(d)(2)(A) shall not be applicable with respect to gifts and bequests made during this 1-year period if such requirements are met within the 1-year period.

(6) Judicial proceeding. For purposes of paragraphs (a), (b)(5), (d)(2), and (e)(3) of this section, an organization shall be deemed to have met the requirements of section 508(e) within a year, if a judicial proceeding which is necessary to reform its governing instrument or other instrument is instituted within the year and within a reasonable time the organization, in fact, meets the requirements of section 508(e). For purposes only of paragraphs (b)(5), (d)(2), and (e)(3) of this section, if an organization organized before January 1, 1970, institutes such a judicial proceeding within such 1-year period, section 508(e)(2)(C) shall be applied as if such proceeding had been instituted prior to January 1, 1972.

(c) Meaning of governing instrument. For purposes of section 508(e), the term "governing instrument" shall have the same meaning as the term "articles of organization" under § 1.501(c)(3)-1(b)(2). The bylaws of an organization shall not constitute its governing instrument for purposes of section 508(e).

(d) Effect of State law—(1) In general. A private foundation's governing instrument shall be deemed to conform with the requirements of paragraph (a) of this section if valid provisions of State law have been enacted which:

(i) Require it to act or refrain from acting so as not to subject the foundation to the taxes imposed by section 4941 (relating to taxes on self-dealing), 4942 (relating to taxes on failure to distribute income), 4943 (relating to taxes on excess business holdings), 4944 (relating to taxes on investments

which jeopardize charitable purpose), and 4945 (relating to taxable expenditures); or

(ii) Treat the required provisions as contained in the foundation's governing instrument.

(2) **Validity.** (i) Any provision of State law described in subparagraph (1) of this paragraph shall be presumed valid as enacted, and in the absence of State provisions to the contrary, to apply with respect to any foundation that does not specifically disclaim coverage under State law (either by notification to the appropriate State official or by commencement of judicial proceedings) except as provided in subdivisions (ii) and (iii) of this subparagraph.

(ii) If such provision is declared invalid or inapplicable with respect to a class of foundations by the highest appellate court of the State or by the Supreme Court of the United States, the foundations covered by the determination must meet the requirements of section 508(e) within 1 year from the date on which the time for perfecting an application for review by the Supreme Court expires. If such application is filed, the requirements of section 508(e) must be met within a year from the date on which the Supreme Court disposes of the case, whether by denial of the application for review or decision on the merits.

(iii) In addition, if such provision of State law is declared invalid or inapplicable with respect to a class of foundations by any court of competent jurisdiction which decision is not reviewed by a court referred to in subdivision (ii) of this subparagraph, and the Commissioner makes notice to the general public (such as by publication in the Internal Revenue Bulletin) that such provision has been so declared invalid or inapplicable, then all foundations in such State must meet the requirements of section 508(e), without reliance upon such statute to the extent declared invalid or inapplicable by such decision, within 1 year from the date such notice is made public.

(iv) This subparagraph shall not apply to any foundation that is subject to a final judgment entered by a court of competent jurisdiction, holding the law invalid or inapplicable with respect to such foundation. See paragraph (b)(6) of this section for the effect of certain judicial proceedings that are brought within 1 year.

(3) **Conflicting instrument.** For taxable years beginning after March 22, 1973 in order for a private foundation or trust described in section 4947(a)(2) to receive the benefit of coverage under any State statute which makes applicable the requirements of section 508(e)(1)(A) and (B), where the statute by its terms does not apply to a governing instrument which contains a mandatory direction conflicting with any of such requirements, such organization must indicate on its annual return required to be filed under section 6033 (or section 6012 in the case of a trust described in section 4947(a)) that its governing instrument contains no mandatory directions which conflict with the requirements of section 508(e)(1)(A) or (B), as incorporated by the State statute. General language in a governing instrument empowering the trustee to make investments without being limited to those investments authorized by law will not be regarded as a mandatory conflicting direction.

(4) **Exclusion from statute.** (i) For any taxable year beginning after March 22, 1973 in the case of a private foundation or trust described in section 4947(a)(2) subject to a State statute which makes applicable the requirements of section 508(e)(1)(A) and (B) to the governing instruments of such organizations, other than those which take action to be excluded therefrom (such as by filing a notice of exclusion or by instituting appropriate judicial proceedings), an organization will receive the benefit of such State statute only if it indicates on its annual return required to be filed under section 6033 (or section 6012 in the case of a trust described in section 4947(a)) that it has not so taken action to be excluded.

(ii) This paragraph permits certain organizations that are subject to the provisions of such a State law, to avoid changing their governing instruments in order to meet the requirements of section 508(e)(1). Since an organization which avoids the application of a provision or provisions of State law, such as by filing a notice of exclusion, is not entitled to the benefits of this paragraph, such an organization must meet the requirements of section 508(e)(1) without regard to this paragraph and except as provided in section 508(e)(2)(C) or paragraph (g)(1)(iii) of this section must change its governing instrument to the extent inconsistent with section 508(e)(1).

(5) **Treatment of prevailing conflicting clause.** If provisions of State law are inapplicable to a clause in a governing instrument which is contrary to the provisions of section 508(e)(1), the requirements of section 508(e)(2)(C) and paragraph (g)(1)(iii) of this section are not satisfied by a provision of State law which purports to eliminate the need for litigation under such circumstances. Therefore, except as otherwise provided in this section unless the governing instrument is changed or litigation is commenced pursuant to section

508(e)(2)(B) by an organization organized before January 1, 1970, or pursuant to paragraph (g)(1)(ii) of this section, to amend the nonconforming provision to meet the requirements of section 508(e)(1)(A) and (B), then pursuant to section 508(e), such organization will not be exempt from taxation.

(6) Retroactive application to grants or bequests. If valid provisions of such a State law apply retroactively to a taxable year within which an organization has received a grant or request, section 508(d)(2)(A) shall not apply so as to disallow such grant or bequest, but only if such valid provisions of State law are enacted within 2 years of such grant or bequest.

(e) Effect of section 508(e) upon section 4947 trusts—(1) Section 4947(a)(1) trusts. A charitable trust described in section 4947(a)(1) (unless also described in a paragraph of section 509(a)) is subject to all the provisions of paragraph (a) of this section.

(2) Section 4947(a)(2) trusts. A split-interest trust described in section 4947(a)(2), as long as it is so described, is subject to the provisions of paragraph (a)(2) of this section, except to the extent that section 4947 makes any such provisions inapplicable to certain trusts and certain amounts in trust. The governing instrument of a trust described in section 4947(a)(2) may except amounts described in section 4947(a)(2)(A), (B), and (C) from the requirements of paragraph (a)(2) of this section. In the case of a trust having amounts transferred to it both before May 27, 1969, and after May 26, 1969, its governing instrument may except from the provisions of paragraph (a)(2) of this section only those segregated amounts excluded from the application of section 4947(a)(2) by reason of section 4947(a)(2)(C) and the regulations thereunder. Also, the governing instrument of such a trust may exclude the application of sections 4943 and 4944 for any period during which such trust is described in section 4947(b)(3)(A) or (B). See § 53.4947–1(c) of this chapter for rules relating to the applicability of section 4947 to split-interest trusts and § 1.508–2(b)(1)(vi) and (vii) for rules relating to the deductibility of grants or bequests to such trusts.

(3) A section 4947(a)(2) trust becoming a section 4947(a)(1) trust. If the governing instrument of a trust described in section 4947(a)(2) meets the applicable requirements of paragraph (a)(2) of this section and such trust ceases to be so described and becomes instead a trust described in section 4947(a)(1), then such governing instrument must meet, prior to the end of 12 months from the date such trust first becomes described in section 4947(a)(1) (except as otherwise provided in this section) all the requirements of paragraph (a) of this section in order to comply with section 508(e).

(f) Special rules for existing private foundations. (1) Pursuant to section 508(e)(2), section 508(e)(1) and paragraph (a) of this section shall not apply in the case of any organization whose governing instrument was executed before January 1, 1970:

(i) To any taxable year beginning before January 1, 1972;

(ii) To any period after December 31, 1971, during the pendency of any judicial proceeding begun before January 1, 1972, by the private foundation which is necessary to reform, or to excuse such foundation from compliance with, its governing instrument or any other instrument in order to meet the requirements of section 508(e)(1); and

(iii) To any period after the termination of any judicial proceeding described in subdivision (ii) of this subparagraph during which its governing instrument or any other instrument does not permit it to meet the requirements of section 508(e)(1).

(2) For purposes of subparagraph (1) of this paragraph, and § 1.508–2(b)(1)(vi)(a), a governing instrument will not be treated as executed before the applicable date, if, after such date the dispositive provisions of the instrument are amended (determined under rules similar to the rules set forth in § 20.2055–2(e)(4) of this chapter).

(3) For purposes of subparagraph (1)(ii) and (iii) of this paragraph, a private foundation will be treated as meeting the requirements of section 508(e)(2)(B) and (C) if it has commenced a necessary and timely proceeding in an appropriate court of original jurisdiction and such court has ruled that the foundation's governing instrument or any other instrument does not permit it to meet the requirements of section 508(e)(1). Such foundation is not required to commence proceedings in any court of appellate jurisdiction in order to comply with section 508(e)(2)(C). See also § 1.508–2(b)(2).

(g) Extension of time for compliance with section 508(e). (1) Except as provided in subparagraph (2) of this paragraph, section 508(e)(1) shall not apply to any private foundation (regardless of when organized) with respect—

(i) To any taxable year beginning before the transitional date,

(ii) To any period on or after the transitional date during the pendency of any judicial proceeding begun before the transitional date by the private foundation which is necessary to reform, or to excuse such foundation from compliance with, its governing instrument or any other instrument in order to meet the requirements of section 508(e)(1), and

(iii) To any period after the termination of any judicial proceeding described in subdivision (ii) of this subparagraph during which its governing instrument or any other instrument does not permit it to meet the requirements of section 508(e)(1).

(2) Subparagraph (1) of this paragraph shall apply only to gifts or bequests referred to in section 508(d)(2)(A) that are made before the transitional date.

(3) For purposes of this paragraph the term "transitional dates" means the earlier of the following dates:

(i) In the case of a medical research organization, May 21, 1976 or in the case of a community trust February 10, 1977, or

(ii) The 91st day after the date an organization receives a final ruling or determination letter that it is a private foundation under section 509(a).
[T.D. 7232, 37 FR 28292, Dec. 22, 1972, as amended by T.D. 7440, 41 FR 50656, Nov. 17, 1976; T.D. 7678, 45 FR 12415, Feb. 26, 1980]

§ 1.508–4 Effective date.

Except as otherwise provided, §§ 1.508–1 through 1.508–3 shall take effect on January 1, 1970.
[T.D. 7232, 37 FR 28294, Dec. 22, 1972]

§ 1.509(a)–1 Definition of private foundation.

In general. Section 509(a) defines the term "private foundation" to mean any domestic or foreign organization described in section 501(c)(3) other than an organization described in section 509(a)(1), (2), (3), or (4). Organizations which fall into the categories excluded from the definition of "private foundation" are generally those which either have broad public support or actively function in a supporting relationship to such organizations. Organizations which test for public safety are also excluded.
[T.D. 7212, 37 FR 21907, Oct. 17, 1972]

§ 1.509(a)–2 Exclusion for certain organizations described in section 170(b)(1)(A).

(a) General rule. Organizations described in section 170(b)(1)(A) (other than in clauses (vii) and (viii)) are excluded from the definition of "private foundation" by section 509(a)(1). For the requirements to be met by organizations described in section 170(b)(1)(A)(i) through (vi), see § 1.170A–9 (a) through (e) and paragraph (b) of this section. For purposes of this section, the parenthetical language "other than in clauses (vii) and (viii)" used in section 509(a)(1) means "other than an organization which is described only in clause (vii) or (viii)." For purposes of this section, an organization may qualify as a section 509(a)(1) organization regardless of the fact that it does not satisfy section 170(c)(2) because:

(1) Its funds are not used within the United States or its possessions, or

(2) It was created or organized other than in, or under the law of, the United States, any State or territory, the District of Columbia, or any possession of the United States.

(b) Medical research organizations. In order to qualify under section 509(a)(1) as a medical research organization described in section 170(b)(1)(A)(iii), an organization must meet the requirements of section 170(b)(1)(A)(iii) and § 1.170A–9(c)(2), except that, solely for purposes of classification as a section 509(a)(1) organization, such organization need not be committed to spend every contribution for medical research before January 1 of the fifth calendar year which begins after the date such contribution is made.
[T.D. 7212, 37 FR 21907, Oct. 17, 1972]

§ 1.509(a)–3 Broadly, publicly supported organizations.

(a) In general—(1) General rule. Section 509(a)(2) excludes certain types of broadly, publicly supported organizations from private foundation status. An organization will be excluded under section 509(a)(2) if it meets the one-third support test under section 509(a)(2)(A) and the not-more-than-one-third support test under section 509(a)(2)(B).

(2) One-third support test. An organization will meet the one-third support test if it normally (within the meaning of paragraph (c), (d), or (e) of this section) receives more than one-third of its

support in each taxable year from any combination of:

(i) Gifts, grants, contributions, or membership fees, and

(ii) Gross receipts from admissions, sales of merchandise, performance of services, or furnishing of facilities, in an activity which is not an unrelated trade or business (within the meaning of section 513), subject to certain limitations described in paragraph (b) of this section,

from permitted sources. For purposes of this section, governmental units, organizations described in section 509(a)(1) and persons other than disqualified persons with respect to the organization shall be referred to as permitted sources. For purposes of this section, the amount of support received from the sources described in subdivisions (i) and (ii) of this subparagraph (subject to the limitations referred to in this subparagraph) will be referred to as the numerator of the one-third support total amount of support received (as defined in section 509(d)) will be referred to as the denominator of the one-third support fraction. For purposes of section 509(a)(2), paragraph (f) of this section distinguishes gifts and contributions from gross receipts; paragraph (g) of this section distinguishes grants from gross receipts; paragraph (h) of this section defines membership fees; paragraph (i) of this section defines "any bureau or similar agency of a governmental unit"; paragraph (j) of this section describes the treatment of certain indirect forms of support; paragraph (k) of this section describes the method of accounting for support; paragraph (*l*) of this section describes the treatment of gross receipts from section 513(a)(1), (2), or (3) activities; and paragraph (m) of this section distinguishes gross receipts from gross investment income.

(3) Not-more-than-one-third support test—(i) In general. An organization will meet the not-more-than-one-third support test under section 509(a)(2)(B) if it normally (within the meaning of paragraph (c), (d), or (e) of this section) receives not more than one-third of its support in each taxable year from the sum of its gross investment income (as defined in section 509(e)) and the excess (if any) of the amount of its unrelated business taxable income (as defined in section 512) derived from trades or businesses which were acquired by the organization after June 30, 1975, over the amount of tax imposed on such income by section 511. For purposes of this section the amount of support received from items described in section 509(a)(2)(B) will be referred to as the numerator of the not-more-than-one-third support fraction, and the total amount of support (as defined in section 509(d)) will be referred to as the denominator of the not-more-than-one-third support fraction. For purposes of section 509(a)(2), paragraph (m) of this section distinguishes gross receipts from gross investment income.

(ii) Trade or business. For purposes of section 509(a)(2)(B)(ii), a trade or business acquired after June 30, 1975, by an organization shall include, in addition to other trades or businesses:

(A) A trade or business acquired after such date from, or as a result of the liquidation of, an organization's subsidiary which is described in section 502 whether or not the subsidiary was held on June 30, 1975,

(B) A new trade or business commenced by an organization after such date.

(iii) Allocation of deductions between businesses acquired before, and businesses acquired after, June 30, 1975. Deductions which are allowable under section 512 but are not directly connected to a particular trade or business, such as deductions referred to in paragraphs (10) and (12) of section 512(b), shall be allocated in the proportion that the unrelated trade or business taxable income derived from trades or businesses acquired after June 30, 1975, bears to the organization's total unrelated business taxable income, both amounts being determined without regard to such deductions.

(iv) Allocation of tax. The tax imposed by section 511 shall be allocated in the same proportion as in paragraph (a)(3)(iii) of this section.

(4) Purposes. The one-third support test and the not-more-than-one-third support test are designed to insure that an organization which is excluded from private foundation status under section 509(a)(2) is responsive to the general public, rather than to the private interests of a limited number of donors or other persons.

(b) Limitation on gross receipts—(1) General rule. In computing the amount of support received from gross receipts under section 509(a)(2)(A)(ii) for purposes of the one-third support test of section 509(a)(2)(A), gross receipts from related activities received from any person, or from any bureau or similar agency of a governmental unit, are includible in any taxable year only to the extent that such receipts do not exceed the greater of $5,000 or 1 percent of the organization's support in such taxable year.

(2) **Examples.** The application of this paragraph may be illustrated by the examples set forth below. For purposes of these examples, the term "general public" is defined as persons other than disqualified persons and other than persons from whom the foundation receives gross receipts in excess of the greater of $5,000 or 1 percent of its support in any taxable year, and the term "gross receipts" is limited to receipts from activities which are not unrelated trade or business (within the meaning of section 513).

Example (1). For the taxable year 1970, X, an organization described in section 501(c)(3), received support of $10,000 from the following sources:

Bureau M (a governmental bureau from which X received gross receipts for services rendered)	$25,000
Bureau N (a governmental bureau from which X received gross receipts for services rendered)	25,000
General public (gross receipts for services rendered)	20,000
Gross investment income	15,000
Contributions from individual substantial contributors (defined as disqualified persons under section 4946(a)(2))	15,000
Total support	100,000

Since the $25,000 received from each bureau amounts to more than the greater of $5,000 or 1 percent of X's support for 1970 (1% of $100,000=$1,000) under section 509(a)(2)(A)(ii), each amount is includible in the numerator of the one-third support fraction only to the extent of $5,000. Thus, for the taxable year 1970, X received support from sources which are taken into account in meeting the one-third support test of section 509(a)(2)(A) computed as follows:

Bureau M	$5,000
Bureau N	5,000
General public	20,000
Total	30,000

Therefore, in making the computations required under paragraph (c), (d), or (e) of this section, only $30,000 is includible in the aggregate numerator and $100,000 is includible in the aggregate denominator of the support fraction.

Example (2). For the taxable year 1970, Y, an organization described in section 501(c)(3), received support of $600,000 from the following sources:

Bureau O (gross receipts for services rendered)	$10,000
Bureau P (gross receipts for services rendered)	10,000
General public (gross receipts for services rendered)	150,000
General public (contributions)	40,000
Gross investment income	150,000
Contributions from substantial contributors	240,000
Total support	600,000

Since the $10,000 received from each bureau amounts to more than the greater of $5,000 or 1 percent of Y's support for 1970 (1% of $600,000=$6,000), each amount is includible in the numerator of the one-third support fraction only to the extent of $6,000. Thus, for the taxable year 1970, Y received support from sources required to meet the one-third support test of section 509(a)(2)(A) computed as follows:

Bureau O	$6,000
Bureau P	6,000
General public (gross receipts)	150,000
General public (contributions)	40,000
Total	202,000

Therefore, in making the computations required under paragraph (c), (d), or (e) of this section, $202,000 is includible in the aggregate numerator and $600,000 is includible in the aggregate denominator of the support fraction.

(c) **"Normally"—(1) In general—(i) Definition.** The support tests set forth in section 509(a)(2) are to be computed on the basis of the nature of the organization's "normal" sources of support. An organization will be considered as "normally" receiving one-third of its support from any combination of gifts, grants, contributions, membership fees, and gross receipts from permitted sources (subject to the limitations described in paragraph (b) of this section) and not more than one-third of its support from items described in section 509(a)(2)(B) for its current taxable year and the taxable year immediately succeeding its current year, if, for the 4 taxable years immediately preceding the current taxable year, the aggregate amount of the support received during the applicable period from gifts, grants, contributions, membership fees, and gross receipts from permitted sources (subject to the limitations described in paragraph (b) of this section) is more than one-third, and the aggregate amount of the support received from items described in section 509(a)(2)(B) is not more than one-third of the total support of the organization for such 4-year period.

(ii) **Exception for material changes in sources of support.** If for the current taxable year there are substantial and material changes in an organization's sources of support other than changes arising from unusual grants excluded under subparagraph (3) of this paragraph, then in applying subdivision (i) of this subparagraph, neither the 4-year computation period, applicable to such year as an immediately succeeding taxable year, not the 4-year computation period, applicable to such year as a current taxable year shall apply, and in lieu of such computation periods there shall be applied a computation period consisting of the taxable year of substantial and material changes and the 4 taxable years immediately preceding such year. Thus, for example, if there are substantial and material changes in an organization's sources of support for taxable year 1976, then even though such organization meets the requirements of subdivision (i) of this subparagraph based on a computation period of taxable years 1971 through 1974 or 1972 through 1975, such an organization will not meet the requirements of section 509(a)(2)

unless it meets the requirements of subdivision (i) of this subparagraph for a computation period of the taxable years 1972 through 1976. See example (3) in subparagraph (6) of this paragraph for an illustration of this subdivision. An example of a substantial and material change is the receipt of an unusually large contribution or bequest which does not qualify as an unusual grant under subparagraph (3) of this paragraph. See subparagraph (5)(ii) of this paragraph as to the procedure for obtaining a ruling whether an unusually large grant may be excluded as an unusual grant.

(iii) Status of grantors and contributors. (a) If as a result of subdivision (ii) of this subparagraph, an organization is not able to meet the requirements of either the one-third support test described in paragraph (a)(2) of this section or the not-more-than-one-third support test described in paragraph (a)(3) of this section for its current taxable year, its status (with respect to a grantor or contributor under sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522) will not be affected until notice of change of status under section 509(a)(2) is made to the public (such as by publication in the Internal Revenue Bulletin). The preceding sentence shall not apply, however, if the grantor or contributor was responsible for, or was aware of, the substantial and material change referred to in subdivision (ii) of this subparagraph, or acquired knowledge that the Internal Revenue Service had given notice to such organization that it would be deleted from classification as section 509(a)(2) organization.

(b) A grantor or contributor other than one of the organization's founders, creators, or foundation managers (within the meaning of section 4946(b)) will not be considered to be responsible for, or aware of, the substantial and material change referred to in subdivision (ii) of this subparagraph if such grantor or contributor has made such grant or contribution in reliance upon a written statement by the grantee organization that such grant or contribution will not result in the loss of such organization's classification as not a private foundation under section 509(a). Such statement must be signed by a responsible officer of the grantee organization and must set forth sufficient information, including a summary of the pertinent financial data for the 4 preceding years, to assure a reasonably prudent man that his grant or contribution will not result in the loss of the grantee organization's classification as not a private foundation under section 509(a). If a reasonable doubt exists as to the effect of such grant or contribution, or if the grantor or contributor is one of the organization's founders, creators, or foundation managers, the procedure set forth in subparagraph (5)(ii) of this paragraph may be followed by the grantee organization for the protection of the grantor or contributor.

(iv) Special rule for new organizations. If an organization has been in existence for at least 1 taxable year consisting of at least 8 months, but for fewer than 5 taxable years, the number of years for which the organization has been in existence immediately preceding each current taxable year being tested will be substituted for the 4-year period described in subdivision (i) of this subparagraph to determine whether the organization "normally" meets the requirements of paragraph (a) of this section. However, if subdivision (ii) of this subparagraph applies, then the period consisting of the number of years for which the organization has been in existence (up to and including the current year) will be substituted for the 4-year period described in subdivision (i) of this subparagraph. An organization which has been in existence for at least 1 taxable year, consisting of 8 or more months, may be issued a ruling or determination letter if it "normally" meets the requirements of paragraph (a) of this section for the number of years described in this subdivision. Such an organization may apply for a ruling or determination letter under the provisions of this paragraph, rather than under the provisions of paragraph (d) of this section. The issuance of a ruling or determination letter will be discretionary with the Commissioner. See paragraph (e)(4) of this section as to the initial determination of the status of a newly created organization. This subdivision shall not apply to those organizations receiving an extended advance ruling under paragraph (d)(4) of this section.

(2) Terminations under section 507(b)(1)(B). For the special rules applicable to the term "normally" as applied to private foundations which elect to terminate their private foundation status pursuant to the 12-month or 60-month procedure provided in section 507(b)(1)(B), see the regulations under such section.

(3) Exclusion of unusual grants. For purposes of applying the 4-year aggregation test for support set forth in subparagraph (1) of this paragraph, one or more contributions (including contributions made prior to Jan. 1, 1970) may be excluded from the numerator of the one-third support fraction and from the denominator of both the one-third support and not-more-than-one-third support fractions only if such a contribution meets the requirements of this subparagraph. The exclusion pro-

vided by this subparagraph is generally intended to apply to substantial contributions and bequests from disinterested parties, which contributions or bequests:

(i) Are attracted by reason of the publicly supported nature of the organization;

(ii) Are unusual or unexpected with respect to the amount thereof; and

(iii) Would by reason of their size, adversely affect the status of the organization as normally meeting the one-third support test for any of the applicable periods described in paragraph (c), (d), or (e) of this section.

In the case of a grant (as defined in paragraph (g) of this section) which meets the requirements of this subparagraph, if the terms of the granting instrument (whether executed before or after 1969) require that the funds be paid to the recipient organization over a period of years, the amount received by the organization each year pursuant to the terms of such grant may be excluded for such year. However, no item described in section 509(a)(2)(B) may be excluded under this subparagraph. The provisions of this subparagraph shall apply to exclude unusual grants made during any of the applicable periods described in paragraph (c), (d), or (e) of this section. See subparagraph (5)(ii) of this paragraph as to reliance by a grantee organization upon an unusual grant ruling under this subparagraph.

(4) Determining factor. In determining whether a particular contribution may be excluded under subparagraph (3) of this paragraph, all pertinent facts and circumstances will be taken into consideration. No single factor will necessarily be determinative. Among the factors to be considered are:

(i) Whether the contribution was made by any person (or persons standing in a relationship to such person which is described in section 4946(a)(1)(C) through (G)) who created the organization, previously contributed a substantial part of its support or endowment, or stood in a position of authority, such as a foundation manager (within the meaning of section 4946(b)), with respect to the organization. A contribution made by a person other than those persons described in this subdivision will ordinarily be given more favorable consideration than a contribution made by a person described in this subdivision.

(ii) Whether the contribution was a bequest or an inter vivos transfer. A bequest will ordinarily be given more favorable consideration than an inter vivos transfer.

(iii) Whether the contribution was in the form of cash, readily marketable securities, or assets which further the exempt purposes of the organization, such as a gift of a painting to a museum.

(iv) Except in the case of a new organization, whether, prior to the receipt of the particular contribution, the organization (a) has carried on an actual program of public solicitation and exempt activities and (b) has been able to attract a significant amount of public support.

(v) Whether the organization may reasonably be expected to attract a significant amount of public support subsequent to the particular contribution. In this connection, continued reliance on unusual grants to fund an organization's current operating expenses (as opposed to providing new endowment funds) may be evidence that the organization cannot reasonably be expected to attract future support from the general public.

(vi) Whether, prior to the year in which the particular contribution was received, the organization met the one-third support test described in subparagraph (1) of this paragraph without the benefit of any exclusions of unusual grants pursuant to subparagraph (3) of this paragraph.

(vii) Whether neither the contributor nor any person standing in a relationship to such contributor which is described in section 4946(a)(1)(C) through (G) continues directly or indirectly to exercise control over the organization;

(viii) Whether the organization has a representative governing body as described in § 1.509(a)–3(d)(3)(i); and

(ix) Whether material restrictions or conditions (within the meaning of § 1.507–2(a)(8)) have been imposed by the transferor upon the transferee in connection with such transfer.

(5) Grantors and contributors. (i) As to the status of grants and contributions which result in substantial and material changes in the organization (as described in subparagraph (1)(ii) of this paragraph) and which fail to meet the requirements for exclusion under subparagraph (3) of this paragraph, see the rules prescribed in subparagraph (1)(iii) of this paragraph.

(ii) Prior to the making of any grant or contribution which will allegedly meet the requirements for exclusion under subparagraph (3) of this paragraph, a potential grantee organization may request a ruling whether such grant or contribution may be so excluded. Requests for such ruling

may be filed by the grantee organization with the district director. The issuance of such ruling will be at the sole discretion of the Commissioner. The organization must submit all information necessary to make a determination of the applicability of subparagraph (3) of this paragraph, including all information relating to the factors described in subparagraph (4) of this paragraph. If a favorable ruling is issued, such ruling may be relied upon by the grantor or contributor of the particular contribution in question for purposes of sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522 and by the grantee organization for purposes of subparagraph (3) of this paragraph.

(6) Examples. The application of the principles set forth in this paragraph is illustrated by the examples set forth below. For purposes of these examples, the term "general public" is defined as persons other than disqualified persons and other than persons from whom the foundation received gross receipts in excess of the greater of $5,000 or 1 percent of its support in any taxable year, the term "gross investment income" is as defined in section 509(e), and the term "gross receipts" is limited to receipts from activities which are not unrelated trade or business (within the meaning of section 513).

Example (1). For the years 1970 through 1973, X, an organization exempt under section 501(c)(3) which makes scholarship grants to needy students of a particular city, received support from the following sources:

1970	
Gross receipts (general public)	$35,000
Contributions (substantial contributors)	36,000
Gross investment income	29,000
Total support	100,000
1971	
Gross receipts (general public)	34,000
Contributions (substantial contributors)	35,000
Gross investment income	31,000
Total support	100,000
1972	
Gross receipts (general public)	35,000
Contributions (substantial contributors)	30,000
Gross investment income	35,000
Total support	100,000
1973	
Gross receipts (general public)	30,000
Contributions (substantial contributors)	39,000
Gross investment income	31,000
Total support	100,000

In applying section 509(a)(2) to the taxable year 1974 on the basis of subparagraph (1)(i) of this paragraph, the total amount of support from gross receipts from the general public ($134,000) for the period 1970 through 1973 was more than one-third, and the total amount of support from gross investment income ($126,000) was less than one-third, of its total support for the same period ($400,000). For the taxable years 1974 and 1975, X is therefore considered "normally" to receive more than one-third of its support from the public sources described in section 509(a)(2)(A) and less than one-third of its support from items described in section 509(a)(2)(B) since due to the pattern of X's support, there are no substantial and material changes in the sources of the organization's support in these years. The fact that X received less than one-third of its support from section 509(a)(2)(A) sources in 1973 and more than one-third of its support from items described in section 509(a)(2)(B) in 1972 does not affect its status since it met the "normally" test over a 4-year period.

Example (2). Assume the same facts as in example (1) except that in 1973 X also received an unexpected bequest of $50,000 from A, an elderly widow who was interested in encouraging the work of X, but had no other relationship to it. Solely by reason of the bequest, A became a disqualified person. X used the bequest to create five new scholarships. Its operations otherwise remained the same. Under these circumstances X could not meet the 4-year support test since the total amount received from gross receipts from the general public ($134,000) would not be more than one-third of its total support for the 4-year period ($450,000). Since A is a disqualified person, her bequest cannot be included in the numerator of the one-third support test under section 509(a)(2)(A). However, based on the factors set forth in subparagraph (4) of this paragraph, A's bequest may be excluded as an unusual grant under subparagraph (3) of this paragraph. Therefore, X will be considered to have met the support test for the taxable years 1974 and 1975.

Example (3). In 1970, Y, an organization described in section 501(c)(3), was created by A, the holder of all the common stock in M corporation, B, A's wife, and C, A's business associate. Each of the three creators made small cash contributions to Y to enable it to begin operations. The purpose of Y was to sponsor and equip athletic teams for underprivileged children in the community. Between 1970 and 1973, Y was able to raise small amounts of contributions through fund raising drives and selling admission to some of the sponsored sporting events. For its first year of operations, it was determined that Y was excluded from the definition of "private foundation" under the provisions of section 509(a)(2). A made small contributions to Y from time to time. At all times, the operations of Y were carried out on a small scale, usually being restricted to the sponsorship of two to four baseball teams of underprivileged children. In 1974, M recapitalized and created a first and second class of 6 percent nonvoting preferred stock, most of which was held by A and B. A then contributed 49 percent of his common stock in M to Y. A, B, and C continued to be active participants in the affairs of Y from its creation through 1974. A's contribution of M's common stock was substantial and constituted 90 percent of Y's total support for 1974. Although Y could satisfy the one-third support test on the basis of the four taxable years prior to 1974, a combination of the facts and circumstances described in subparagraph (4) of this paragraph preclude A's contribution of M's common stock in 1974 from being excluded as an unusual grant under subparagraph (3) of this paragraph. A's contribution in 1974 constituted a substantial and material change in Y's sources of support within the meaning of subparagraph (1)(ii) of this paragraph and on the basis of the 5-year period prescribed in subparagraph (1)(ii) of this paragraph (1970 to 1974), Y would not be considered as "normally" meeting the one-third support test described in paragraph (a)(2) of this section for the taxable years 1974 (the current taxable year) and 1975 (the immediately succeeding taxable year).

Example (4). M, an organization described in section 501(c)(3), was organized in 1971 to promote the appreciation of ballet in a particular region of the United States. Its principal activities will consist of erecting a theater for the performance

of ballet and the organization and operation of a ballet company. The governing body of M consists of 9 prominent unrelated citizens residing in the region who have either an expertise in ballet or a strong interest in encouraging appreciation of the art form. In order to provide sufficient capital for M to commence its activities, X, a private foundation, makes a grant of $500,000 in cash to M. Although A, the creator of X, is one of the nine members of M's governing body, was one of M's original founders, and continues to lend his prestige to M's activities and fund raising efforts, A does not, directly or indirectly, exercise any control over M. By the close of its first taxable year, M has also received a significant amount of support from a number of smaller contributions and pledges from other members of the general public. Upon the opening of its first season of ballet performances, M expects to charge admission to the general public. Under the above circumstances, the grant by X to M may be excluded as an unusual grant under subparagraph (3) of this paragraph for purposes of determining whether M meets the one-third support test under section 509(a)(2). Although A was a founder and member of the governing body of M, X's grant may be excluded.

Example (5). Assume the same facts as example (4). In 1974, during M's third season of operations, B, a widow, passed away and bequeathed $4 million to M. During 1971 through 1973, B had made small contributions to M, none exceeding $10,000 in any year. During 1971 through 1974, M had received approximately $550,000 from receipts for admissions and contributions from the general public. At the time of B's death, no person standing in a relationship to B described in section 4946(a)(1)(C) through (G) was a member of M's governing body. B's bequest was in the form of cash and readily marketable securities. The only condition placed upon the bequest was that it be used by M to advance the art of ballet. Under the above circumstances, the bequest of B to M may be excluded as an unusual grant under subparagraph (3) of this paragraph for purposes of determining whether M meets the one-third support test under section 509(a)(2).

Example (6). O is a research organization described in section 501(c)(3). O was created by A in 1971 for the purpose of carrying on economic studies primarily through persons receiving grants from O and engaging in the sale of economic publications. O's five-member governing body consists of A, A's sons, B, and C, and two unrelated economists. In 1971, A made a contribution to O of $100,000 to help establish the organization. During 1971 through 1974 A made annual contributions to O averaging $20,000 a year. During the same period, O received annual contributions from members of the general public averaging $15,000 per year and receipts from the sale of its publications averaging $50,000 per year. In 1974, B made an inter vivos contribution to O of $600,000 in cash and readily marketable securities. Under the above circumstances, B's contribution cannot be excluded as an unusual grant under subparagraph (3) of this paragraph for purposes of determining whether O meets the one-third support test.

Example (7). P is an educational organization described in section 501(c)(3). P was created in 1971. The governing body of P has 9 members, consisting of A, a prominent civic leader and 8 other unrelated civic leaders and educators in the community, who also participated in the creation of P. During 1971 through 1974, the principal source of income for P has been receipts from the sale of its educational periodicals. These sales have amounted to $200,000 for this period. Small contributions amounting to $50,000 have also been received during the same period from members of the governing body, including A, as well as other members of the general public. In 1974 A contributed $750,000 of the nonvoting stock of Y, a closely held corporation. A retained a substantial portion of the voting stock of Y. By a majority vote, the governing body decided to retain the Y stock for a period of at least 5 years. Under the above circumstances, A's contribution of the Y stock cannot be excluded as an unusual grant under subparagraph (3) of this paragraph for purposes of determining whether P meets the one-third support test.

(d) Advance rulings to newly created organizations—(1) In general. A ruling or determination letter that an organization is described in section 509(a)(2) will not be issued to a newly created organization prior to the close of its first taxable year consisting of at least 8 months. However, such organization may request a ruling or determination letter that it will be treated as a section 509(a)(2) organization for its first 2 taxable years (or its first 3 taxable years, if its first taxable year consists of less than 8 months). For purposes of this section such 2- or 3-year period, whichever is applicable, shall be referred to as the advance ruling period. Such an advance ruling or determination letter may be issued if the organization can reasonably be expected to meet the requirements of paragraph (a) of this section during the advance ruling period. The issuance of a ruling or determination letter will be discretionary with the Commissioner.

(2) Basic consideration. In determining whether an organization "can reasonably be expected" (within the meaning of subparagraph (1) of this paragraph) to meet the one-third support test under section 509(a)(2)(A) and the not-more-than-one-third support test under section 509(a)(2)(B) described in paragraph (a) of this section for its advance ruling period or extended advance ruling period as provided in subparagraph (4) of this paragraph, if applicable, the basic consideration is whether its organizational structure, proposed programs or activities, and intended method of operation are such as to attract the type of broadly based support from the general public, public charities, and governmental units which is necessary to meet such tests. While the factors which are relevant to this determination, and the weight accorded to each of them, may differ from case to case, depending on the nature and functions of the organization, a favorable determination will not be made where the facts indicate that an organization is likely during its advance or extended advance ruling period to receive less than one-third of its support from permitted sources (subject to the limitations of paragraph (b) of this section) or to receive more than one-third of its support from items described in section 509(a)(2)(B).

(3) Factors taken into account. All pertinent facts and circumstances shall be taken into account under subparagraph (2) of this paragraph in determining whether the organizational structure,

programs or activities, and method of operation of an organization are such as to enable it to meet the tests under section 509(a)(2) for its advance or extended advance ruling period. Some of the pertinent factors are:

(i) Whether the organization has or will have a governing body which is comprised of public officials, or individuals chosen by public officials acting in their capacity as such, of persons having special knowledge in the particular field or discipline in which the organization is operating, of community leaders, such as elected officials, clergymen, and educators, or, in the case of a membership organization, of individuals elected pursuant to the organization's governing instrument or bylaws by a broadly based membership. This characteristic does not exist if the membership of the organization's governing body is such as to indicate that it represents the personal or private interests of disqualified persons, rather than the interests of the community or the general public.

(ii) Whether a substantial portion of the organization's initial funding is to be provided by the general public, by public charities, or by government grants, rather than by a limited number of grantors or contributors who are disqualified persons with respect to the organization. The fact that the organization plans to limit its activities to a particular community or region or to a special field which can be expected to appeal to a limited number of persons will be taken into consideration in determining whether those persons providing the initial support for the organization are representative of the general public. On the other hand, the subsequent sources of funding which the organization can reasonably expect to receive after it has become established and fully operational will also be taken into account.

(iii) Whether a substantial proportion of the organization's initial funds are placed, or will remain, in an endowment, and whether the investment of such funds is unlikely to result in more than one-third of its total support being received from items described in section 509(a)(2)(B).

(iv) In the case of an organization which carries on fund-raising activities, whether the organization has developed a concrete plan for solicitation of funds from the general public on a community or area-wide basis; whether any steps have been taken to implement such plan; whether any firm commitments of financial or other support have been made to the organization by civic, religious, charitable, or similar groups within the community; and whether the organization has made any commitments to, or established any working relationships with, those organizations or classes of persons intended as the future recipients of its funds.

(v) In the case of an organization which carries on community services, such as slum clearance and employment opportunities, whether the organization has a concrete program to carry out its work in the community; whether any steps have been taken to implement that program; whether it will receive any part of its funds from a public charity or governmental agency to which it is in some way held accountable as a condition of the grant or contribution; and whether it has enlisted the sponsorship or support of other civic or community leaders involved in community service programs similar to those of the organization.

(vi) In the case of an organization which carries on educational or other exempt activities for, or on behalf of, members, whether the solicitation for dues-paying members is designed to enroll a substantial number of persons in the community, area, profession, or field of special interest (depending on the size of the area and the nature of the organization's activities); whether membership dues for individual (rather than institutional) members have been fixed at rates designed to make membership available to a broad cross-section of the public rather than to restrict membership to a limited number of persons; and whether the activities of the organization will be likely to appeal to persons having some broad common interest or purpose, such as educational activities in the case of alumni associations, musical activities in the case of symphony societies, or civic affairs in the case of parent-teacher associations.

(vii) In the case of an organization which provides goods, services, or facilities, whether the organization is or will be required to make its services, facilities, performances, or products available (regardless of whether a fee is charged) to the general public, public charities, or governmental units, rather than to a limited number of persons or organizations; whether the organization will avoid executing contracts to perform services for a limited number of firms or governmental agencies or bureaus; and whether the service to be provided is one which can be expected to meet a special or general need among a substantial portion of the general public.

(4) Extension of advance ruling period. (i) The advance ruling period described in subparagraph (1) of this paragraph shall be extended for a period of 3 taxable years after the close of the unextended

advance ruling period if the organization so requests, but only if such organization's request accompanies its request for an advance ruling and is filed with a consent under section 6501(c)(4) to the effect that the period of limitation upon assessment under section 4940 for any taxable year within the extended advance ruling period shall not expire prior to 1 year after the date of the expiration of the time prescribed by law for the assessment of a deficiency for the last taxable year within the extended advance ruling period. An organization's extended advance ruling period is 5 taxable years if its first taxable year consists of at least 8 months, or is 6 taxable years if its first taxable year is less than 8 months.

(ii) Notwithstanding subdivision (i) of this subparagraph, an organization which has received or applied for an advance ruling prior to October 16, 1972, may file its request for the 3-year extension within 90 days from such date, but only if it files the consents required in this section.

(iii) See paragraph (e)(4)(i)(d) of this section for the effect upon the initial determination of status of an organization which receives an advance ruling for an extended advance ruling period.

(e) **Status of newly created organizations—(1) Advance or extended advance ruling.** This subparagraph shall apply to a newly created organization which has received a ruling or determination letter under paragraph (d) of this section that it be treated as a section 509(a)(2) organization for its advance or extended advance ruling period. So long as such an organization's ruling or determination letter has not been terminated by the Commissioner before the expiration of the advance or extended advance ruling period, then whether or not such organization has satisfied the requirements of paragraph (a) of this section during such advance or extended advance ruling period, such an organization will be treated as an organization described in section 509(a)(2) in accordance with subparagraphs (2) and (3) of this paragraph, both for purposes of the organization and any grantor or contributor to such organization.

(2) **Reliance period.** Except as provided in subparagraphs (1) and (3) of this paragraph, an organization described in subparagraph (1) of this paragraph will be treated as an organization described in section 509(a)(2) for all purposes other than section 507(d) and 4940 for the period beginning with its inception and ending 90 days after its advance or extended advance ruling period. Such period will be extended until a final determination is made of such an organization's status only if the organization submits, within the 90-day period, information needed to determine whether it meets the requirements of paragraph (a) of this section for its advance or extended advance ruling period (even if such organization fails to meet the requirements of such paragraph (a)). However, since this subparagraph does not apply to section 4940, if it is subsequently determined that the organization was a private foundation from its inception, then the tax imposed by section 4940 shall be due without regard to the advance ruling or determination letter. Consequently, if any amount of tax under section 4940 in such a case is not paid on or before the last date prescribed for payment, the organization is liable for interest in accordance with section 6601. However, since any failure to pay such tax during the period referred to in this subparagraph is due to reasonable cause, the penalty under section 6651 with respect to the tax imposed by section 4940 shall not apply.

(3) **Grantors or contributors.** If a ruling or determination letter is terminated by the Commissioner prior to the expiration of the period described in subparagraph (2) of this paragraph, for purposes of sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522 the status of grants or contributions with respect to grantors or contributors to such organizations will not be affected until notice of change of status of such organization is made to the public (such as by publication of the Internal Revenue Bulletin). The preceding sentence shall not apply, however, if the grantor or contributor was responsible for, or aware of, the act or failure to act that resulted in the organization's loss of classification under section 509(a)(2) or acquired knowledge that the Internal Revenue Service had given notice to such organization that it would be deleted from such classification. See, however, § 1.509(a)–3(c)(5)(ii) for the procedures to be followed to protect the grantor or contributor from being considered responsible for, or aware of, the act or failure to act resulting in the grantee's loss of classification under section 509(a)(2).

(4) **Initial determination of status—(i) New organizations.** (a) The initial determination of status of a newly created organization is the first determination (other than by issuance of an advance ruling or determination letter under paragraph (d) of this section) that the organization will be considered as "normally" meeting the requirements of paragraph (a) of this section for a period beginning with its first taxable year.

(b) In the case of a new organization whose first taxable year is at least 8 months, except as provid-

ed for in subdivision (i)(d) of this subparagraph, the initial determination of status shall be based on a computation period of either the first taxable year or the first and second taxable years.

(c) In the case of a new organization whose first taxable year is less than 8 taxable months, except as provided for in subdivision (i)(d) of this subparagraph, the initial determination of status shall be based on a computation period of either the first and second taxable years or the first, second and third taxable years.

(d) In the case of an organization which has received a ruling or determination letter for an extended advance ruling period under paragraph (d)(4) of this section, the initial determination of status shall be based on a computation period of all of the taxable years in the extended advance ruling period. However, where the ruling or determination letter for an extended advance ruling period under paragraph (d)(4) of this section is terminated by the Commissioner prior to the expiration of the period described in subparagraph (2) of this paragraph, the initial determination of status shall be based on a computation period of the period provided for in (b) or (c) of this subdivision or, if greater, the number of years to which the advance ruling applies.

(e) An initial determination that an organization will be considered as "normally" meeting the requirements of paragraph (a) of this section shall be effective for each taxable year in the computation period plus (except as provided by paragraph (c)(1)(ii) of this section relating to material changes in sources of support) the two taxable years immediately succeeding the computation period. Therefore, in the case of an organization referred to in (b) of this subdivision to which paragraph (c)(1)(ii) of this section does not apply, with respect to its first, second, and third taxable years, such an organization shall be described in section 509(a)(2) if it meets the requirements of paragraph (a) of this section for either its first taxable year or for its first and second taxable years on an aggregate basis. In addition, if it meets the requirements of paragraph (a) of this section for its first and second taxable years it shall be described in section 509(a)(2) for its fourth taxable year. Once an organization is considered as "normally" meeting the requirements of paragraph (a) for a period specified under this subdivision, paragraph (c)(1)(i), (ii), or (iv) of this section shall apply.

(f) The provisions of this subdivision may be illustrated by the following examples:

Example (1). X, a calendar year organization described in section 501(c)(3), is created in February 1972 for the purpose of displaying African art. The support X received from the public in 1972 satisfies the one-third support and not-more-than-one-third support tests described in section 509(a)(2) for its first taxable year, 1972. X may therefore get an initial determination that it meets the requirements of paragraph (a) of this section for its first taxable year beginning in February 1972 and ending on December 31, 1972. This determination will be effective for taxable years 1972, 1973, and 1974.

Example (2). Assume the same facts as in example (1) except that X also receives a substantial contribution from one individual in 1972 which is not excluded from the denominator of the one-third support fraction described in section 509(a)(2) by reason of the unusual grant provision of subparagraph (c)(3) of this section. Because of this substantial contribution, X fails to satisfy the one-third support test over its first taxable year, 1972. However, the support received from the public over X's first and second taxable years in the aggregate satisfies the one-third support and not-more-than-one-third support tests. X may therefore get an initial determination that it meets the requirements of paragraph (a) of this section for its first and second taxable years in the aggregate beginning in February 1972 and ending on December 31, 1973. This determination will be effective for taxable years 1972, 1973, 1974, and 1975.

Example (3). Y, a calendar year organization described in section 501(c)(3), is created in July 1972 for the encouragement of the musical arts. Y requests and receives an extended advance ruling period of five full taxable years plus its initial short taxable year of 6 months under subparagraph (d)(4) of this section. The extended advance ruling period begins in July 1972 and ends on December 31, 1977. The support received from the public over Y's first through sixth taxable years in the aggregate will satisfy the one-third support and not-more-than-one-third support tests described in section 509(a)(2). Therefore, Y in 1978 may get an initial determination that it meets the requirements of paragraph (a) of this section in the aggregate over all the taxable years in its extended advance ruling period beginning in July 1972 and ending on December 31, 1977. This determination will be effective for taxable years 1972 through 1979.

Example (4). Assume the same facts as in example (3) except that the ruling for the extended advance ruling period is terminated prospectively at the end of 1975, so that Y may not rely upon such ruling for 1976 or any succeeding year. The support received from the public over Y's first through fourth taxable years (1972 through 1975) will not satisfy the one-third support and not-more-than-one-third support tests described in section 509(a)(2). Because the ruling was terminated, the computation period for Y's initial determination of status is the period 1972 through 1975. Since Y has not met the requirements of paragraph (a) of this section for such computation period, Y is not described in section 509(a)(2) for purposes of its initial determination of status. If Y is not described in section 509(a)(1), (3), or (4), then Y is a private foundation. As of 1976, Y shall be treated as a private foundation for all purposes (except as provided in subparagraph (3) of this paragraph with respect to grantors and contributors), and as of July 1972 for purposes of the tax imposed by section 4940 and for purposes of section 507(d) (relating to aggregate tax benefit).

(ii) **Advance rulings.** Unless a newly created organization has obtained a ruling or determination letter under paragraph (d) of this section that it be treated as a section 509(a)(2) organization for its advance or extended advance ruling period, it can not rely upon the possibility it will meet the

requirements of paragraph (a) of this section for a taxable year which begins before the close of either applicable computation period provided for in subdivision (i)(b) or (c) of this subparagraph. Therefore, an organization which has not obtained such a ruling or determination letter, in order to avoid the risks associated with subsequently being determined to be a private foundation, may comply with the rules applicable to private foundations, and may pay, for example, the tax imposed by section 4940. In that event, if the organization subsequently meets the requirements of paragraph (a) for either applicable computation period, it shall be treated as a section 509(a)(2) organization from its inception, and, therefore, any tax imposed under chapter 42 shall be refunded and section 509(b) shall not apply.

(iii) Penalties. If a newly created organization fails to obtain a ruling or determination letter under paragraph (d) of this section, and fails to meet the requirements of paragraph (a) of this section for the first applicable computation period provided for in subdivision (i)(b) or (c) of this subparagraph, see section 6651 for penalty for failure to file return and pay tax.

(iv) Examples. This subparagraph may be illustrated by the following examples:

Example (1). On January 1, 1972, A contributes $100,000 to X, an organization described in section 501(c)(3) which he created on such date. X is not described in section 509(a)(1), (3), or (4). X's governing instrument does not contain the provisions referred to in section 508(e). Therefore, A is not entitled to a deduction under section 170 for the $100,000 contribution by reason of section 508(d)(2)(A) unless X is described in section 509(a)(2). If X meets the requirements of section 509(a)(2) for 1972 and 1973 on an aggregate basis, then whether or not X met the requirements of section 509(a)(2) for 1972 based on the support received in 1972, X would not have to meet the governing instrument requirements of section 508(e), and section 508(d)(2)(A) would not prevent A from claiming the deduction under section 170 for 1972. If X fails to meet the requirements of section 509(a)(2) for both 1972 and, on an aggregate basis, 1972 and 1973, X would lose its exempt status under section 508(e) for both 1972 and 1973, and A would be barred by section 508(d)(2)(A) from claiming a deduction for the $100,000 contribution to X.

Example (2). Assume the same facts as in example (1) except that X's governing instrument contains provisions which meet the requirements of section 508(e) in the event X is a private foundation, but do not apply to X in the event X is not a private foundation. Whether or not X meets the requirements of section 509(a)(2) for 1972 based on the support received in 1972 or 1972 and 1973 on an aggregate basis, since X meets the requirements of section 508(e), section 508(d)(2)(A) would not bar A from claiming a deduction under section 170 for 1972 for the contribution to X.

(f) Gifts and contributions distinguished from gross receipts—(1) In general. In determining whether an organization normally receives more than one-third of its support from permitted sources, all "gifts" and "contributions" (within the meaning of section 509(a)(2)(A)(i)) received from permitted sources, are includible in the numerator of the support fraction in each taxable year. However, "gross receipts" (within the meaning of section 509(a)(2)(A)(ii)) from admissions, sales of merchandise, performance of services, or furnishing of facilities, in an activity which is not an unrelated trade or business, are includible in the numerator of the support fraction in any taxable year only to the extent that such gross receipts do not exceed the limitation with respect to the greater of $5,000 or 1 percent of support which is describing paragraph (b) of this section. The terms "gifts" and "contributions" shall, for purposes of section 509(a)(2), have the same meaning as such terms have under section 170(c) and also include bequests, legacies, devises, and transfers within the meaning of section 2055 or 2106(a)(2). Thus, for purposes of section 509(a)(2)(A), any payment of money or transfer of property without adequate consideration shall be considered a "gift" or "contribution." Where payment is made or property transferred as consideration for admissions, sales of merchandise, performance of services, or furnishing of facilities to the donor, the status of the payment or transfer under section 170(c) shall determine whether and to what extent such payment or transfer constitutes a "gift" or "contribution" under section 509(a)(2)(A)(i) as distinguished from "gross receipts" from related activities under section 509(a)(2)(A)(ii).

(2) Valuation of property. For purposes of section 509(a)(2), the amount includible in computing support with respect to gifts, grants or contributions of property or use of such property shall be the fair market or rental value of such property at the date of such gift or contribution.

(3) Example. The provisions of this paragraph may be illustrated by the following example:

Example. P is a local agricultural club described in section 501(c)(3). In order to encourage interest and proficiency by young people in farming and raising livestock, it makes awards at its annual fair for outstanding specimens of produce and livestock. Most of these awards are cash or other property donated by local businessmen. When the awards are made, the donors are given recognition for their donations by being identified as the donor of the award. The recognition given to donors is merely incidental to the making of the award to worthy youngsters. For these reasons, the donations will constitute "contributions" for purposes of section 509(a)(2)(A)(i). The amount includible in computing support with respect to such contributions is equal to the cash contributed or the fair market value of other property on the dates contributed.

(g) Grants distinguished from gross receipts—(1) In general. In determining whether an orga-

nization normally receives more than one-third of its support from public sources, all "grants" (within the meaning of section 509(a)(2)(A)(i)) received from permitted sources are includible in full in the numerator of the support fraction in each taxable year. However, "gross receipts" (within the meaning of section 509(a)(2)(A)(ii)) from admissions, sales of merchandise, performance of services, or furnishing of facilities, in an activity which is not an unrelated trade or business, are includible in the numerator of the support fraction in any taxable year only to the extent that such gross receipts do not exceed the limitation with respect to the greater of $5,000 or 1 percent of support which is described in paragraph (b) of this section. A grant is normally made to encourage the grantee organization to carry on certain programs or activities in furtherance of its exempt purposes. It may contain certain terms and conditions imposed by the grantor to insure that the grantee's programs or activities are conducted in a manner compatible with the grantor's own programs and policies and beneficial to the public. The grantee may also perform a service or produce a work product which incidentally benefits the grantor. Because of the imposition of terms and conditions, the frequent similarity of public purposes of grantor and grantee, and the possibility of benefit resulting to the grantor, amounts received as grants "for" the carrying on of exempt activities are sometimes difficult to distinguish from amounts received as gross receipts "from" the carrying on of exempt activities. The fact that the agreement, pursuant to which payment is made, is designated a "contract" or a "grant" is not controlling for purposes of classifying the payment under section 509(a)(2).

(2) **Distinguishing factors.** For purposes of section 509(a)(2)(A)(ii), in distinguishing the term "gross receipts" from the term "grants," the term "gross receipts" means amounts received from an activity which is not an unrelated trade or business, if a specific service, facility, or product is provided to serve the direct and immediate needs of the payor, rather than primarily to confer a direct benefit upon the general public. In general, payments made primarily to enable the payor to realize or receive some economic or physical benefit as a result of the service, facility, or product obtained will be treated as "gross receipts" with respect to the payee. The fact that a profitmaking organization would, primarily for its own economic or physical betterment, contract with a nonprofit organization for the rendition of a comparable service, facility or product from such organization constitutes evidence that any payments received by the nonprofit payee organization (whether from a governmental unit, a nonprofit or a profitmaking organization) for such services, facilities or products are primarily for the economic or physical benefit of the payor and would therefore be considered "gross receipts," rather than "grants" with respect to the payee organization. For example, if a nonprofit hospital described in section 170(b)(1)(A)(iii) engages an exempt research and development organization to develop a more economical system of preparing food for its own patients and personnel, and it can be established that a hospital operated for profit might engage the services of such an organization to perform a similar benefit for its economic betterment, such fact would constitute evidence that the payments received by the research and development organization constitute "gross receipts," rather than "grants." Research leading to the development of tangible products for the use or benefit of the payor will generally be treated as a service provided to serve the direct and immediate needs of the payor, while basic research or studies carried on in the physical or social sciences will generally be treated as primarily to confer a direct benefit upon the general public.

(3) **Examples.** The application of this paragraph may be illustrated by the following examples:

Example (1). M, a nonprofit research organization described in section 501(c)(3), engages in some contract research. It receives funds from the government to develop a specific electronic device needed to perfect articles of space equipment. The initiative for the project came solely from the government. Furthermore, the government could have contracted with profitmaking research organizations which carry on similar activities. The funds received from the government for this project are gross receipts and do not constitute "grants" within the meaning of section 509(a)(2)(A)(i). M provided a specific product at the government's request and thus was serving the direct and immediate needs of the payor within the meaning of subparagraph (2) of this paragraph.

Example (2). N is a nonprofit educational organization described in section 501(c)(3). Its principal activity is to operate institutes to train employees of various industries in the principles of management and administration. The government pays N to set up a special institute for certain government employees and to train them over a 2-year period. Management training is also provided by profitmaking organizations. The funds received are included as "gross receipts." The particular services rendered were to serve the direct and immediate needs of the government in the training of its employees within the meaning of subparagraph (2) of this paragraph.

Example (3). The Office of Economic Opportunity makes a community action program grant to O, an organization described in section 509(a)(1). O serves as a "delegate agency" of OEO for purposes of financing a local community action program. As part of this program, O signs an agreement with X, an educational and charitable organization described in section 501(c)(3), to carry out a housing program for the benefit of poor families. Pursuant to this agreement, O pays X out of the funds provided by OEO to build or rehabilitate low

income housing and to provide advisory services to other nonprofit organizations in order for them to meet similar housing objectives, all on a nonprofit basis. Payments made from O to X constitute "grants" for purposes of section 509(a)(2)(A) because such program is carried on primarily for the direct benefit of the community.

Example (4). P is an educational institute described in section 501(c)(3). It carries on studies and seminars to assist institutions of higher learning. It receives funds from the government to research and develop a program of black studies for institutions of higher learning. The performance of such a service confers a direct benefit upon the public. Because such program is carried on primarily for the direct benefit of the public, the funds are considered a "grant."

Example (5). Q is an organization described in section 501(c)(3) which carries on medical research. Its efforts have primarily been directed toward cancer research. Q sought funds from the government for a particular project being contemplated in connection with its work. In order to encourage its activities, the government gives Q the sum of $25,000. The research project sponsored by government funds is primarily to provide direct benefit to the general public, rather than to serve the direct and immediate needs of the government. The funds are therefore considered a "grant."

Example (6). R is a public service organization described in section 501(c)(3) and composed of State and local officials involved in public works activities. The Bureau of Solid Waste, Management of the Department of Health, Education, and Welfare paid R to study the feasibility of a particular system for disposal of solid waste. Upon completion of the study, R was required to prepare a final report setting forth its findings and conclusions. Although R is providing the Bureau of Solid Waste Management with a final report, such report is the result of basic research and study in the physical sciences and is primarily to provide direct benefit to the general public by serving to further the general functions of government, rather than a direct and immediate governmental need. The funds paid to R are therefore a "grant" within the meaning of section 509(a)(2).

Example (7). R is the public service organization referred to in example (6). W, a municipality described in section 170(c)(1), decides to construct a sewage disposal plant. W pays R to study a number of possible locations for such plant and to make recommendations to W, based upon a number of factors, as to the best location. W instructed R that in making its recommendation, primary consideration should be given to minimizing the costs of the project to W. Since the study commissioned by W was primarily directed toward producing an economic benefit to W in the form of minimizing the costs of its project, the services rendered are treated as serving W's direct and immediate needs and are includible as "gross receipts" by R.

Example (8). S is an organization described in section 501(c)(3). It was organized and is operated to further African development and strengthen understanding between the United States and Africa. To further these purposes, S receives funds from the Agency for International Development and the Department of State under which S is required to carry out the following programs: Selection, transportation, orientation, counseling, and language training of African students admitted to American institutions of higher learning; payment of tuition, other fees, and maintenance of such students; and operation of schools and vocational training programs in underdeveloped countries for residents of those countries. Since the programs carried on by S are primarily to provide direct benefit to the general public, all of the funds received by S from the Federal agencies are considered "grants" within the meaning of section 509(a)(2).

(h) Definition of membership fees—(1) General rule. For purposes of section 509(a)(2), the fact that a membership organization provides services, admissions, facilities, or merchandise to its members as part of its overall activities will not, in itself, result in the classification of fees received from members as "gross receipts" rather than "membership fees." If an organization uses membership fees as a means of selling admissions, merchandise, services, or the use of facilities to members of the general public who have no common goal or interest (other than the desire to purchase such admissions, merchandise, services, or use of facilities), then the income received from such fees shall not constitute "membership fees" under section 509(a)(2)(A)(i), but shall, if from a related activity, constitute "gross receipts" under section 509(a)(2)(A)(ii). On the other hand, to the extent the basic purpose for making the payment is to provide support for the organization rather than to purchase admissions, merchandise, services, or the use of facilities, the income received from such payment shall constitute "membership fees."

(2) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). M is a symphony society described in section 501(c)(3). Its primary purpose is to support the local symphony orchestra. The organization has three classes of membership. Contributing members pay annual dues of $10, sustaining members pay $25, and honorary members pay $100. The dues are placed in a maintenance fund which is used to provide financial assistance in underwriting the orchestra's annual deficit. Members have the privilege of purchasing subscriptions to the concerts before they go on sale to the general public, but must pay the same price as any other member of the public. They also are entitled to attend a number of rehearsals each season without charge. Under these circumstances, M's receipts from the members constitute "membership fees" for purposes of section 509(a)(2)(A)(i).

Example (2). N is a theater association described in section 501(c)(3). Its purpose is to support a repertory company in the community in order to make live theatrical performances available to the public. The organization sponsors six plays each year. Members of the organization are entitled to a season subscription to the plays. The fee paid as dues approximates the retail price of the six plays, less a 10-percent discount. Tickets to each performance are also sold directly to the general public. The organization also holds a series of lectures on the theater which members may attend. Under these circumstances, the fees paid by members as dues will be considered "gross receipts" from a related activity. Although the fees are designated as membership fees, they are actually admissions to a series of plays.

(i) "Bureau" defined—(1) In general. The term "any bureau or similar agency of a governmental unit" (within the meaning of section 509(a)(2)(A)(ii)), refers to a specialized operating unit of the executive, judicial, or legislative branch

of government where business is conducted under certain rules and regulations. Since the term "bureau" refers to a unit functioning at the operating, as distinct from the policymaking, level of government, it is normally descriptive of a subdivision of a department of government. The term "bureau," for purposes of section 509(a)(2)(A)(ii), would therefore not usually include those levels of government which are basically policymaking or administrative, such as the office of the Secretary or Assistant Secretary of a department, but would consist of the highest operational level under such policymaking or administrative levels. Each subdivision of a larger unit within the Federal Government, which is headed by a Presidential appointee holding a position at or above Level V of the Executive Schedule under 5 U.S.C. 5316, will normally be considered an administrative or policymaking, rather than an operating, unit. Amounts received from a unit functioning at the policymaking or administrative level of government will be treated as received from one bureau or similar agency of such unit. Units of a governmental agency above the operating level shall be aggregated and considered a separate bureau for this purpose. Thus, an organization receiving gross receipts from both a policymaking or administrative unit and an operational unit of a department will be treated as receiving gross receipts from two "bureaus" within the meaning of section 509(a)(2)(A)(ii). For purposes of this subparagraph, the Departments of Air Force, Army, and Navy are separate departments and each is considered as having its own policymaking, administrative, and operating units.

(2) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). The Bureau of Health Insurance is considered a "bureau" within the meaning of section 509(a)(2)(A)(ii). It is a part of the Department of Health, Education, and Welfare, whose Secretary performs a policymaking function, and is under the Social Security Administration, which is basically an administrative unit. The Bureau of Health Insurance is in the first operating level within the Social Security Administration. Similarly, the National Cancer Institute would be considered a "bureau," as it is an operating part of the National Institutes of Health within the Department of Health, Education, and Welfare.

Example (2). The Bureau for Africa and the Bureau for Latin America are considered "bureaus" within the meaning of section 509(a)(2)(A)(ii). Both are separate operating units under the administrator of the Agency for International Development, a policymaking official. If an organization received gross receipts from both of these bureaus, the amount of gross receipts received from each would be subject to the greater of $5,000 or 1 percent limitation under section 509(a)(2)(A)(ii).

Example (3). The Bureau of International Affairs of the Civil Aeronautics Board is considered a "bureau" within the meaning of section 509(a)(2)(A)(ii). It is an operating unit under the administrative office of the Executive Director. The subdivisions of the Bureau of International Affairs are Geographic Areas and Project Development Staff. If an organization received gross receipts from these subdivisions, the total gross receipts from these subdivisions would be considered gross receipts from the same "bureau," the Bureau of International Affairs, and would be subject to the greater of $5,000 or 1 percent limitation under section 509(a)(2)(A)(ii).

Example (4). The Department of Mental Health, a State agency which is an operational part of State X's Department of Public Health, is considered a "bureau." The Department of Public Health is basically an administrative agency and the Department of Mental Health is at the first operational level within it.

Example (5). The Aeronautical Systems Division of the Air Force Systems Command, and other units on the same level, are considered separate "bureaus" with the meaning of section 509(a)(2)(A)(ii). They are part of the Department of the Air Force which is a separate department for this purpose, as are the Army and Navy. The Secretary and the Under Secretary of the Air Force perform the policymaking function, the Chief of Staff and the Air Force Systems Command are basically administrative, having a comprehensive complement of staff functions to provide administration for the various divisions. The Aeronautical Systems Division and other units on the same level are thus the first operating level, as evidenced by the fact that they are the units that let contracts and perform the various operating functions.

Example (6). The Division of Space Nuclear Systems, the Division of Biology and Medicine, and other units on the same level within the Atomic Energy Commission are each separate "bureaus" within the meaning of section 509(a)(2)(A)(ii). The Commissioners (which make up the Commission) are the policymakers. The general manager and the various assistant general managers perform the administrative function. The various divisions perform the operating function as evidenced by the fact that each has separate programs to pursue and contracts specifically for these various programs.

(j) Grants from public charities—(1) General rule. For purposes of the one-third support test in section 509(a)(2)(A), grants (as defined in paragraph (g) of this section) received from an organization described in section 509(a)(1) (hereinafter referred to in this subparagraph as a "public charity") are generally includible in full in computing the numerator of the recipient's support fraction of the taxable year in question. It is sometimes necessary to determine whether the recipient of a grant from a public charity has received such support from the public charity as a grant, or whether the recipient has in fact received such support as an indirect contribution from a donor to the public charity. If the amount received is considered a grant from the public charity, it is fully includible in the numerator of the support fraction under section 509(a)(2)(A). However, if the amount received is considered to be an indirect contribution from one of the public charity's donors which has passed through the public charity to the recipient organization, such amount will retain its character as a contribution from such donor and, if, for example, the donor is a substan-

tial contributor (as defined in section 507(d)(2)) with respect to the ultimate recipient, such amount shall be excluded from the numerator of the support fraction under section 509(a)(2). If a public charity makes both an indirect contribution from its donor and an additional grant to the ultimate recipient, the indirect contribution shall be treated as made first.

(2) Indirect contributions. For purposes of subparagraph (1) of this paragraph, an indirect contribution is one which is expressly or impliedly earmarked by the donor as being for, or for the benefit of, a particular recipient (rather than for a particular purpose).

(3) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). M, a national foundation for the encouragement of the musical arts, is an organization described in section 170(b)(1)(A)(vi). A gives M a donation of $5,000 without imposing any restrictions or conditions upon the gift. M subsequently makes a $5,000 grant to X, an organization devoted to giving public performances of chamber music. Since the grant to X is treated as being received from M, it is fully includible in the numerator of X's support fraction for the taxable year of receipt.

Example (2). Assume M is the same organization described in example (1). B gives M a donation of $10,000, but requires that M spend the money for the purpose of supporting organizations devoted to the advancement of contemporary American music. M has complete discretion as to the organizations of the type described to which it will make a grant. M decides to make grants of $5,000 each to Y and Z, both being organizations described in section 501(c)(3) and devoted to furthering contemporary American music. Since the grants to Y and Z are treated as being received from M, Y and Z may each include one of the $5,000 grants in the numerator of its support fraction for purposes of section 509(a)(2)(A). Although the donation to M was conditioned upon the use of the funds for a particular purpose, M was free to select the ultimate recipient.

Example (3). N is a national foundation for the encouragement of art and is an organization described in section 170(b)(1)(A)(vi). Grants to N are permitted to be earmarked for particular purposes. O, which is an art workshop devoted to training young artists and claiming status under section 509(a)(2), persuades C, a private foundation, to make a grant of $25,000 to N. C is a disqualified person with respect to O. C made the grant to N with the understanding that N would be bound to make a grant to O in the sum of $25,000, in addition to a matching grant of N's funds to O in the sum of $25,000. Only the $25,000 received directly from N is considered a grant from N. The other $25,000 is deemed an indirect contribution from C to O and is to be excluded from the numerator of O's support fraction.

(k) Method of accounting. For purposes of section 509(a)(2), an organization's support will be determined solely on the cash receipts and disbursement method of accounting described in section 446(c)(1). For example, if a grantor makes a grant to an organization payable over a term of years, such grant will be includible in the support fraction of the grantee organization only when and to the extent amounts payable under the grant are received by the grantee.

(*l*) Gross receipts from section 513(a)(1), (2), or (3) activities. For purposes of section 509(a)(2)(A)(ii), gross receipts from activities described in section 513(a)(1), (2), or (3) will be considered gross receipts from activities which are not unrelated trade or business.

(m) Gross receipts distinguished from gross investment income. (1) For purposes of section 509(a)(2), where the charitable purpose of an organization described in section 501(c)(3) is accomplished through the furnishing of facilities for a rental fee or loans to a particular class of persons, such as aged, sick, or needy persons, the support received from such persons will be considered "gross receipts" (within the meaning of section 509(d)(2)) from an activity which is not an unrelated trade or business, rather than "gross investment income." However, if such organization also furnishes facilities or loans to persons who are not members of such class and such furnishing does not contribute importantly to the accomplishment of such organization's exempt purposes (aside from the need of such organization for income or funds or the use it makes of the profits derived), the support received from such furnishing will be considered "rents" or "interest" and therefore will be treated as "gross investment income" within the meaning of section 509(d)(4), unless such income is included in computing the tax imposed by section 511.

(2) The provisions of this paragraph may be illustrated by the following example:

Example. X, an organization described in section 501(c)(3), is organized and operated to provide living facilities for needy widows of deceased servicemen. X charges such widows a small rental fee for the use of such facilities. Since X is accomplishing its exempt purpose through the rental of such facilities, the support received from the widows is considered "gross receipts" within the meaning of section 509(d)(2). However, if X rents part of its facilities to persons having no relationship to X's exempt purpose, the support received from such rental will be considered "gross investment income" within the meaning of section 509(d)(4), unless such income is included in computing the tax imposed by section 511.

[T.D. 7212, 37 FR 21907, Oct. 17, 1972, as amended by T.D. 7784, 46 FR 37889, July 23, 1981]

§ 1.509(a)–4 Supporting organizations.

(a) In general. (1) Section 509(a)(3) excludes from the definition of "private foundation" those organizations which meet the requirements of subparagraphs (A), (B), and (C) thereof.

(2) Section 509(a)(3)(A) provides that a section 509(a)(3) organization must be organized, and at all times thereafter operated, exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more specified organizations described in section 509(a)(1) or (2). Section 509(a)(3)(A) describes the nature of the support or benefit which a section 509(a)(3) organization must provide to one or more section 509(a)(1) or (2) organizations. For purposes of section 509(a)(3)(A), paragraph (b) of this section generally describes the organizational and operational tests; paragraph (c) of this section describes permissible purposes under the organizational test; paragraph (d) of this section describes the requirement of supporting or benefiting one or more "specified" publicly supported organizations; and paragraph (e) of this section describes permissible beneficiaries and activities under the operational test.

(3) Section 509(a)(3)(B) provides that a section 509(a)(3) organization must be operated, supervised, or controlled by or in connection with one or more organizations described in section 509(a)(1) or (2). Section 509(a)(3)(B) and paragraph (f) of this section describe the nature of the relationship which must exist between the section 509(a)(3) and section 509(a)(1) or (2) organizations. For purposes of section 509(a)(3)(B), paragraph (g) of this section defines "operated, supervised, or controlled by"; paragraph (h) of this section defines "supervised or controlled in connection with;" and paragraph (i) of this section defines "operated in connection with."

(4) Section 509(a)(3)(C) provides that a section 509(a)(3) organization must not be controlled directly or indirectly by disqualified persons (other than foundation managers or organizations described in section 509(a)(1) or (2)). Section 509(a)(3)(C) and paragraph (j) of this section prescribe a limitation on the control over the section 509(a)(3) organization.

(5) For purposes of this section, the term "supporting organization" means either an organization described in section 509(a)(3) or an organization seeking section 509(a)(3) status, depending upon its context. For purposes of this section, the term "publicly supported organization" means an organization described in section 509(a)(1) or (2).

(b) Organizational and operational tests. (1) Under subparagraph (A) of section 509(a)(3), in order to qualify as a supporting organization, an organization must be both organized and operated exclusively "for the benefit of, to perform the functions of, or to carry out the purposes of" (hereinafter referred to in this section as being organized and operated "to support or benefit") one or more specified publicly supported organizations. If an organization fails to meet either the organizational or the operational test, it cannot qualify as a supporting organization.

(2) In the case of supporting organizations created prior to January 1, 1970, the organizational and operational tests shall apply as of January 1, 1970. Therefore, even though the original articles of organization did not limit its purposes to those required under section 509(a)(3)(A) and even though it operated before January 1, 1970, for some purpose other than those required under section 509(a)(3)(A), an organization will satisfy the organizational and operational tests if, on January 1, 1970, and at all times thereafter, it is so constituted as to comply with these tests. For the special rules pertaining to the application of the organizational and operational tests to organizations terminating their private foundation status under the 12-month or 60-month termination period provided under section 507(b)(1)(B) by becoming "public" under section 509(a)(3), see the regulations under section 507(b).

(c) Organizational test—(1) In general. An organization is organized exclusively for one or more of the purposes specified in section 509(a)(3)(A) only if its articles of organization (as defined in § 1.501(c)(3)–1(b)(2)):

(i) Limit the purposes of such organization to one or more of the purposes set forth in section 509(a)(3)(A);

(ii) Do not expressly empower the organization to engage in activities which are not in furtherance of the purposes referred to in subdivision (i) of this subparagraph;

(iii) State the specified publicly supported organizations on whose behalf such organization is to be operated (within the meaning of paragraph (d) of this section); and

(iv) Do not expressly empower the organization to operate to support or benefit any organization other than the specified publicly supported organizations referred to in subdivision (iii) of this subparagraph.

(2) **Purposes.** In meeting the organizational test, the organization's purposes, as stated in its articles, may be as broad as, or more specific than, the purposes set forth in section 509(a)(3)(A). Therefore, an organization which, by the terms of its articles, is formed "for the benefit of" one or

more specified publicly supported organizations shall, if it otherwise meets the other requirements of this paragraph, be considered to have met the organizational test. Similarly, articles which state that an organization is formed "to perform the publishing functions" of a specified university are sufficient to comply with the organizational test. An organization which is "operated, supervised, or controlled by" (within the meaning of paragraph (g) of this section) or "supervised or controlled in connection with" (within the meaning of paragraph (h) of this section) one or more sections 509(a)(1) or (2) organizations to carry out the purposes of such organizations, will be considered as meeting the requirements of this paragraph if the purposes set forth in its articles are similar to, but no broader than, the purposes set forth in the articles of its controlling section 509(a)(1) or (2) organizations. If, however, the organization by which it is operated, supervised, or controlled is a publicly supported section 501(c)(4), (5), or (6) organization (deemed to be a section 509(a)(2) organization for purposes of section 509(a)(3) under the provisions of section 509(a)), the supporting organization will be considered as meeting the requirements of this paragraph if its articles require it to carry on charitable, etc., activities within the meaning of section 170(c)(2).

(3) Limitations. An organization is not organized exclusively for the purposes set forth in section 509(a)(3)(A) if its articles expressly permit it to operate to support or benefit any organization other than those specified publicly supported organizations referred to in subparagraph (1)(iii) of this paragraph. Thus, for example, an organization will not meet the organizational test under section 509(a)(3)(A) if its articles expressly empower it to pay over any part of its income to, or perform any service for, any organization other than those publicly supported organizations specified in its articles (within the meaning of paragraph (d) of this section). The fact that the actual operations of such organization have been exclusively for the benefit of the specified publicly supported organizations shall not be sufficient to permit it to meet the organizational test.

(d) Specified organizations—(1) In general. In order to meet the requirements of section 509(a)(3)(A), an organization must be organized and operated exclusively to support or benefit one or more "specified" publicly supported organizations. The manner in which the publicly supported organizations must be "specified" in the articles for purposes of section 509(a)(3)(A) will depend upon whether the supporting organization is "operated, supervised, or controlled by" or "supervised or controlled in connection with" (within the meaning of paragraphs (g) and (h) of this section) such organizations or whether it is "operated in connection with" (within the meaning of paragraph (i) of this section) such organizations.

(2) Nondesignated publicly supported organizations; requirements. (i) Except as provided in subdivision (iv) of this subparagraph, in order to meet the requirements of subparagraph (1) of this paragraph, the articles of the supporting organization must designate each of the "specified" organizations by name unless:

(a) The supporting organization is operated, supervised, or controlled by (within the meaning of paragraph (g) of this section), or is supervised or controlled in connection with (within the meaning of paragraph (h) of this section) one or more publicly supported organizations; and

(b) The articles of organization of the supporting organization require that it be operated to support or benefit one or more beneficiary organizations which are designated by class or purpose and which include:

(1) The publicly supported organizations referred to in (a) of this subdivision (without designating such organizations by name); or

(2) Publicly supported organizations which are closely related in purpose or function to those publicly supported organizations referred to in subdivision (i)(a) or this subparagraph (without designating such organization by name).

(ii) If a supporting organization is described in subdivision (i)(a) of this subparagraph, it will not be considered as failing to meet the requirements of subparagraph (1) of this paragraph that the publicly supported organizations be specified merely because its articles of organization permit the conditions described in subparagraphs (3)(i), (ii), and (iii) and (4)(i)(a) and (b) of this paragraph.

(iii) This subparagraph may be illustrated by the following examples:

Example (1). X is an organization described in section 501(c)(3) which operates for the benefit of institutions of higher learning in the State of Y. X is controlled by these institutions (within the meaning of paragraph (g) of this section) and such institutions are all section 509(a)(1) organizations. X's articles will meet the organizational test if they require X to operate for the benefit of institutions of higher learning or educational organizations in the State of Y (without naming each institution). X's articles would also meet the organizational test if they provided for the giving of scholarships to enable students to attend institutions of higher learning but only in the State of Y.

Example (2). M is an organization described in section 501(c)(3) which was organized and operated by representatives of N church to run a home for the aged. M is controlled (within the meaning of paragraph (g) of this section) by N church, a section 509(a)(1) organization. The care of the sick and the aged are longstanding temporal functions and purposes of organized religion. By operating a home for the aged, M is operating to support or benefit N church in carrying out one of its temporal purposes. Thus M's articles will meet the organizational test if they require M to care for the aged since M is operating to support one of N church's purposes (without designating N church by name).

(iv) A supporting organization will meet the requirements of subparagraph (1) of this paragraph even though its articles do not designate each of the "specified" organizations by name if:

(a) There has been an historic and continuing relationship between the supporting organization and the section 509(a)(1) or (2) organizations, and

(b) By reason of such relationship, there has developed a substantial identity of interests between such organizations.

(3) Nondesignated publicly supported organizations; scope of rule. If the requirements of subparagraph (2)(i)(a) of this paragraph are met, a supporting organization will not be considered as failing the test of being organized for the benefit of "specified" organizations solely because its articles:

(i) Permit the substitution of one publicly supported organization within a designated class for another publicly supported organization either in the same or a different class designated in the articles;

(ii) Permit the supporting organization to operate for the benefit of new or additional publicly supported organizations of the same or a different class designated in the articles; or

(iii) Permit the supporting organization to vary the amount of its support among different publicly supported organizations within the class or classes of organizations designated by the articles.

For example, X is an organization which operates for the benefit of private colleges in the State of Y. If X is controlled by these colleges (within the meaning of paragraph (g) of this section) and such colleges are all section 509(a)(1) organizations, X's articles will meet the organization test even if they permit X to operate for the benefit of any new colleges created in State Y in addition to the existing colleges or in lieu of one which has ceased to operate, or if they permit X to vary its support by paying more to one college than to another in a particular year.

(4) Designated publicly supported organizations. (i) If an organization is organized and operated to support one or more publicly supported organizations and it is "operated in connection with" such organization or organizations, then, except as provided in subparagraph (2)(iv) of this paragraph, its articles of organization must, for purposes of satisfying the organizational test under section 509(a)(3)(A), designate the "specified" organizations by name. Under the circumstances described in this subparagraph, a supporting organization which has one or more "specified" organizations designated by name in its articles, will not be considered as failing the test of being organized for the benefit of "specified" organizations solely because its articles:

(a) Permit a publicly supported organization which is designated by class or purpose, rather than by name, to be substituted for the publicly supported organization or organizations designated by name in the articles, but only if such substitution is conditioned upon the occurrence of an event which is beyond the control of the supporting organization, such as loss of exemption, substantial failure or abandonment of operations, or dissolution of the publicly supported organization or organizations designated in the articles;

(b) Permit the supporting organization to operate for the benefit of a beneficiary organization which is not a publicly supported organization, but only if such supporting organization is currently operating for the benefit of a publicly supported organization and the possibility of its operating for the benefit of other than a publicly supported organization is a remote contingency; or

(c) Permit the supporting organization to vary the amount of its support between different designated organizations, so long as it meets the requirements of the integral part test set forth in paragraph (i)(3) of this section with respect to at least one beneficiary organization.

(ii) If the beneficiary organization referred to in subdivision (i)(b) of this subparagraph is not a publicly supported organization, the supporting organization will not then meet the operational test of paragraph (e)(1) of this section. Therefore, if a supporting organization substituted in accordance with such subdivision (i)(b) a beneficiary other than a publicly supported organization and operated in support of such beneficiary organization, the supporting organization would not be described in section 509(a)(3).

(iii) This subparagraph may be illustrated by the following example:

Example. X is a charitable trust described in section 4947(a)(1) organized in 1968. Under the terms of its trust instrument, X's trustees are required to pay over all of X's annual income to M University Medical School for urological research. If M University Medical School is unable or unwilling to devote these funds to urological research, the trustees are required to pay all of such income to N University Medical School. However if N University Medical School is also unable or unwilling to devote these funds to urological research, X's trustees are directed to choose a similar organization willing to apply X's funds for urological research. From 1968 to 1973, X pays all of its net income to M University Medical School pursuant to the terms of the trust. M and N are publicly supported organizations. Although the contingent remainderman may not be a publicly supported organization, the possibility that X may operate for the benefit of other than a publicly supported organization is, in 1973, a remote possibility, and X will be considered as operating for the benefit of a "specified" publicly supported organization under subdivision (i)(b) of this subparagraph. However, if, at some future date, X actually substituted a nonpublicly supported organization as beneficiary, X would fail the requirements of the operational test set forth in paragraph (e)(1) of this section.

(e) Operational test—(1) Permissible beneficiaries. A supporting organization will be regarded as "operated exclusively" to support one or more specified publicly supported organizations (hereinafter referred to as the "operational test") only if it engages solely in activities which support or benefit the specified publicly supported organizations. Such activities may include making payments to or for the use of, or providing services or facilities for, individual members of the charitable class benefited by the specified publicly supported organization. A supporting organization may also, for example, make a payment indirectly through another unrelated organization to a member of a charitable class benefited by the specified publicly supported organization, but only if such a payment constitutes a grant to an individual rather than a grant to an organization. In determining whether a grant is indirectly to an individual rather than to an organization the same standard shall be applied as in § 53.4945–4(a)(4) of this chapter. Similarly, an organization will be regarded as "operated exclusively" to support or benefit one or more specified publicly supported organizations even if it supports or benefits an organization, other than a private foundation, which is described in section 501(c)(3) and is operated, supervised, or controlled directly by or in connection with such publicly supported organizations, or which is described in section 511(a)(2)(B). However, an organization will not be regarded as operated exclusively if any part of its activities is in furtherance of a purpose other than supporting or benefiting one or more specified publicly supported organizations.

(2) Permissible activities. A supporting organization is not required to pay over its income to the publicly supported organizations in order to meet the operational test. It may satisfy the test by using its income to carry on an independent activity or program which supports or benefits the specified publicly supported organizations. All such support must, however, be limited to permissible beneficiaries in accordance with subparagraph (1) of this paragraph. The supporting organization may also engage in fund raising activities, such as solicitations, fund raising dinners, and unrelated trade or business to raise funds for the publicly supported organizations, or for the permissible beneficiaries.

(3) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). M is a separately incorporated alumni association of X University and is an organization described in section 501(c)(3). X University is designated in M's articles as the sole beneficiary of its support. M uses all of its dues and income to support its own program of educational activities for alumni, faculty, and students of X University and to encourage alumni to maintain a close relationship with the university and to make contributions to it. M does not distribute any of its income directly to X for the latter's general purposes. M pays no part of its funds to, or for the benefit of, any organization other than X. Under these circumstances, M is considered as operated exclusively to perform the functions and carry out the purpose of X. Although it does not pay over any of its funds to X, it carries on a program which both supports and benefits X.

Example (2). N is a separately incorporated religious and educational organization described in section 501(c)(3). It was formed and is operated by Y Church to provide religious training for the members of the church. While it does not maintain a regular faculty, N conducts a Sunday school, weekly adult education lectures on religious subjects, and other similar activities for the benefit of the church members. All of its funds are disbursed in furtherance of such activities and no part of its funds is paid to, or for the benefit of, any organization other than Y Church. N is considered as operated exclusively to perform the educational functions of Y Church and to carry out its religious purposes by providing various forms of religious instruction.

Example (3). P is an organization described in section 501(c)(3). Its primary activity is providing financial assistance to S, a publicly supported organization which aids underdeveloped nations in Central America. P's articles of organization designate S as the principal recipient of P's assistance. However, P also makes a small annual general purpose grant to T, a private foundation engaged in work similar to that carried on by S. T performs a particular function that assists in the overall aid program carried on by S. Even though P is operating primarily for the benefit of S, a specified publicly supported organization, it is not considered as operated exclusively for the purposes set forth in section 509(a)(3)(A). The grant to T, a private foundation, prevents it from complying with the operational test under section 509(a)(3)(A).

Example (4). Assume the same facts as example (3), except that T is a section 501(c)(3) organization other than a private foundation and is operated in connection with S. Under these circumstances, P will be considered as operated exclusively to support S within the meaning of section 509(a)(3)(A).

Example (5). Assume the same facts as example (3) except that instead of the annual general purpose grant made to T,

each grant made by P to T is specifically earmarked for the training of social workers and teachers, designated by name, from Central America. Under these circumstances, P's grants to T would be treated as grants to the individual social workers and teachers under section 4945(d)(3) and § 53.4945–4(a)(4), rather than as grants to T under section 4945(d)(4). These social workers and teachers are part of the charitable class benefitted by S. P would thus be considered as operating exclusively to support S within the meaning of section 509(a)(3)(A).

(f) Nature of relationship required between organizations—(1) In general. Section 509(a)(3)(B) describes the nature of the relationship required between a section 501(c)(3) organization and one or more publicly supported organizations in order for such section 501(c)(3) organization to qualify under the provisions of section 509(a)(3). To meet the requirements of section 509(a)(3), an organization must be operated, supervised, or controlled by or in connection with one or more publicly supported organizations. If an organization does not stand in one of such relationships (as provided in this paragraph) to one or more publicly supported organizations, it is not an organization described in section 509(a)(3).

(2) Types of relationships. Section 509(a)(3)(B) sets forth three different types of relationships, one of which must be met in order to meet the requirements of subparagraph (1) of this paragraph. Thus, a supporting organization may be:

(i) Operated, supervised, or controlled by,

(ii) Supervised or controlled in connection with, or

(iii) Operated in connection with, one or more publicly supported organizations.

(3) Requirements of relationships. Although more than one type of relationship may exist in any one case, any relationship described in section 509(a)(3)(B) must insure that:

(i) The supporting organization will be responsive to the needs of demands of one or more publicly supported organizations; and

(ii) The supporting organization will constitute an integral part of, or maintain a significant involvement in, the operations of one or more publicly supported organizations.

(4) General description of relationships. In the case of supporting organizations which are "operated, supervised, or controlled by" one or more publicly supported organizations, the distinguishing feature of this type of relationship is the presence of a substantial degree of direction by the publicly supported organizations over the conduct of the supporting organization, as described in paragraph (g) of this section. In the case of supporting organizations which are "supervised or controlled in connection with" one or more publicly supported organizations, the distinguishing feature is the presence of common supervision or control among the governing bodies of all organizations involved, such as the presence of common directors, as described in paragraph (h) of this section. In the case of a supporting organization which is "operated in connection with" one or more publicly supported organizations, the distinguishing feature is that the supporting organization is responsive to, and significantly involved in the operations of, the publicly supported organization, as described in paragraph (i) of this section.

(g) Meaning of "operated, supervised, or controlled by". (1)(i) Each of the items "operated by," "supervised by," and "controlled by," as used in section 509(a)(3)(B), presupposes a substantial degree of direction over the policies, programs, and activities of a supporting organization by one or more publicly supported organizations. The relationship required under any one of these terms is comparable to that of a parent and subsidiary, where the subsidiary is under the direction of, and accountable or responsible to, the parent organization. This relationship is established by the fact that a majority of the officers, directors, or trustees of the supporting organization are appointed or elected by the governing body, members of the governing body, officers acting in their official capacity, or the membership of one or more publicly supported organizations.

(ii) A supporting organization may be "operated, supervised, or controlled by" one or more publicly supported organizations within the meaning of section 509(a)(3)(B) even though its governing body is not comprised of representatives of the specified publicly supported organizations for whose benefit it is operated within the meaning of section 509(a)(3)(A). A supporting organization may be "operated, supervised, or controlled by" one or more publicly supported organizations (within the meaning of section 509(a)(3)(B)) and be operated "for the benefit of" one or more different publicly supported organizations (within the meaning of section 509(a)(3)(A)) only if it can be demonstrated that the purposes of the former organizations are carried out by benefitting the latter organizations.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example (1). X is a university press which is organized and operated as a nonstock educational corporation to perform the

publishing and printing for M University, a publicly supported organization. Control of X is vested in a Board of Governors appointed by the Board of Trustees of M University upon the recommendation of the president of the university. X is considered to be operated, supervised, or controlled by M University within the meaning of section 509(a)(3)(B).

Example (2). Y Council was organized under the joint sponsorship of seven independent publicly supported organizations, each of which is dedicated to the advancement of knowledge in a particular field of social science. The sponsoring organizations organized Y Council as a means of pooling their ideas and resources for the attainment of common objectives, including the conducting of scholarly studies and formal discussions in various fields of social science. Under Y Council's by-laws, each of the seven sponsoring organizations elects three members to Y's board of trustees for 3-year terms. Y's board also includes the president of Y Council and eight other individuals elected at large by the board. Pursuant to policies established or approved by the board, Y Council engages in research, planning, and evaluation in the social sciences and sponsors or arranges conferences, seminars, and similar programs for scholars and social scientists. It carries out these activities through its own full-time professional staff, through a part-time committee of scholars, and through grant recipients. Under the above circumstances, Y Council is subject to a substantial degree of direction by the sponsoring publicly supported organizations. It is therefore considered to be operated, supervised, or controlled by such sponsoring organizations within the meaning of section 509(a)(3)(B).

Example (3). Z is a charitable trust created by A in 1972. It has three trustees, all of whom are appointed by M University, a publicly supported organization. The trust was organized and is operated to pay over all of its net income for medical research to N, O, and P, each of which is specified in the trust, is a hospital described in section 509(a)(1), and is located in the same city as M. Members of M's biology department are permitted to use the research facilities of N, O, and P. Under subparagraph (1)(ii) of this paragraph, Z is considered to be operated, supervised, or controlled by M within the meaning of section 509(a)(3)(B), even though it is operated for the benefit of N, O, and P within the meaning of section 509(a)(3)(A).

(h) Meaning of "supervised or controlled in connection with". (1) In order for a supporting organization to be "supervised or controlled in connection with" one or more publicly supported organizations, there must be common supervision or control by the persons supervising or controlling both the supporting organization and the publicly supported organizations to insure that the supporting organization will be responsive to the needs and requirements of the publicly supported organizations. Therefore, in order to meet such requirement, the control or management of the supporting organization must be vested in the same persons that control or manage the publicly supported organizations.

(2) A supporting organization will not be considered to be "supervised or controlled in connection with" one or more publicly supported organizations if such organization merely makes payments (mandatory or discretionary) to one or more named publicly supported organizations, even if the obligation to make payments to the named beneficiaries is enforceable under State law by such beneficiaries and the supporting organization's governing instrument contains provisions whose effect is described in section 508(e)(1)(A) and (B). Such arrangements do not provide a sufficient "connection" between the payor organization and the needs and requirements of the publicly supported organizations to constitute supervision or control in connection with such organizations.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, a philanthropist, founded X school for orphan boys (a publicly supported organization). At the same time A founded X school, he also established Y trust into which he transferred all of the operating assets of the school, together with a substantial endowment for it. Under the provisions of the trust instrument, the same persons who control and manage the school also control and manage the trust. The sole function of Y trust is to hold legal title to X school's operating and endowment assets, to invest the endowment assets and to apply the income from the endowment to the benefit of the school in accordance with direction from the school's governing body. Under these circumstances, Y trust is organized and operated "for the benefit of" X school and is "supervised or controlled in connection with" such organization within the meaning of section 509(a)(3). The fact that the same persons control both X and Y insures Y's responsiveness to X's needs.

Example (2). In 1972, B, a philanthropist, created P, a charitable trust for the benefit of Z, a symphony orchestra described in section 509(a)(2). B transferred 100 shares of common stock to P. Under the terms of the trust instrument, the trustees (none of whom is under the control of B) were required to pay over all of the income produced by the trust assets to Z. The governing instrument of P contains certain provisions whose effect is described in section 508(e)(1)(A) and (B). Under applicable State law, Z can enforce the provisions of the trust instrument and compel payment to Z in a court of equity. There is no relationship between the trustees of P and the governing body of Z. Under these circumstances P is not supervised or controlled in connection with a publicly supported organization. Because of the lack of any common supervision or control by the trustees of P and the governing body of Z, P is not supervised or controlled in connection with Z within the meaning of section 509(a)(3)(B).

Example (3). T is a charitable trust described in section 501(c)(3) and created under the will of D. Prior to his death, D was a leader and very active in C church, a publicly supported organization. D created T to perpetuate his interest in, and assistance to, C. The sole purpose of T was to provide financial support for C and its related institutions. All of the original named trustees of T are members of C, are leaders in C, and hold important offices in one or more of C's related institutions. Successor trustees of T are by the terms of the charitable trust instrument to be chosen by the remaining trustees and are also to be members of C. All of the original trustees have represented that any successor trustee will be a leader in C and will hold an important office in one or more of C's related institutions. By reason of the foregoing relationship T and its trustees are responsive to the needs and requirements of C and its related institutions. Under these circumstances, T trust is organized and operated "for the benefit of" C and is "supervised or controlled in connection with" C and its related institutions within the meaning of section 509(a)(3)(B).

(i) Meaning of "operated in connection with"—(1) General rule. (i) Except as provided in subdivisions (ii) and (iii) of this subparagraph and subparagraph (4) of this paragraph, a supporting organization will be considered as being operated in connection with one or more publicly supported organizations only if it meets the "responsiveness test" which is defined in subparagraph (2) of this paragraph and the "integral part test" which is defined in subparagraph (3) of this paragraph.

(ii) In the case of an organization which was supporting or benefiting one or more publicly supported organizations before November 20, 1970, additional facts and circumstances, such as a historic and continuing relationship between organizations, may be taken into account, in addition to the factors described in subparagraph (2) of this paragraph, to establish compliance with the responsiveness test.

(iii) If—

(a) A supporting organization can establish that it has met the integral part test set forth in subparagraph (3)(iii) of this paragraph for any 5-year period, and

(b) Such organization cannot meet the requirements of such test for its current taxable year solely because the amount received by one or more of the publicly supported beneficiary organizations from such supporting organization is no longer sufficient, with respect to such beneficiary organizations, to satisfy subparagraph (3)(iii) of this paragraph, and

(c) There has been a historic and continuing relationship of support between such organizations between the end of such 5-year period and the taxable year in question,

then such supporting organization will be considered as meeting the requirements of the integral part test in subparagraph (3)(iii) of this paragraph for such taxable year.

(2) Responsiveness test. (i) For purposes of this paragraph, a supporting organization will be considered to meet the "responsiveness test" if the organization is responsive to the needs or demands of the publicly supported organizations within the meaning of this subparagraph. In order to meet this test, either subdivision (ii) or subdivision (iii) of this subparagraph must be satisfied.

(ii)(a) One or more officers, directors, or trustees of the supporting organization are elected or appointed by the officers, directors, trustees, or membership of the publicly supported organizations;

(b) One or more members of the governing bodies of the publicly supported organizations are also officers, directors, or trustees of, or hold other important offices in, the supporting organization; or

(c) The officers, directors, or trustees of the supporting organization maintain a close and continuous working relationship with the officers, directors, or trustees of the publicly supported organizations; and

(d) By reason of (a), (b), or (c) of this subdivision, the officers, directors or trustees of the publicly supported organizations have a significant voice in the investment policies of the supporting organization, the timing of grants, the manner of making them, and the selection of recipients by such supporting organization, and in otherwise directing the use of the income or assets of such supporting organization.

(iii)(a) The supporting organization is a charitable trust under State law;

(b) Each specified publicly supported organization is a named beneficiary under such charitable trust's governing instrument; and

(c) The beneficiary organization has the power to enforce the trust and compel an accounting under State law.

(3) Integral part test; general rule. (i) For purposes of this paragraph, a supporting organization will be considered to meet the "integral part test" if it maintains a significant involvement in the operations of one or more publicly supported organizations and such publicly supported organizations are in turn dependent upon the supporting organization for the type of support which it provides. In order to meet this test, either subdivision (ii) or subdivision (iii) of this subparagraph must be satisfied.

(ii) The activities engaged in for or on behalf of the publicly supported organizations are activities to perform the functions of, or to carry out the purposes of, such organizations, and, but for the involvement of the supporting organization, would normally be engaged in by the publicly supported organizations themselves.

(iii)(a) The supporting organization makes payments of substantially all of its income to or for the use of one or more publicly supported organizations, and the amount of support received by one or more of such publicly supported organizations is sufficient to insure the attentiveness of

such organizations to the operations of the supporting organization. In addition, a substantial amount of the total support of the supporting organization must go to those publicly supported organizations which meet the attentiveness requirement of this subdivision with respect to such supporting organization. Except as provided in (b) of this subdivision, the amount of support received by a publicly supported organization must represent a sufficient part of the organization's total support so as to insure such attentiveness. In applying the preceding sentence, if such supporting organization makes payments to, or for the use of, a particular department or school of a university, hospital or church, the total support of the department or school shall be substituted for the total support of the beneficiary organization.

(b) Even where the amount of support received by a publicly supported beneficiary organization does not represent a sufficient part of the beneficiary organization's total support, the amount of support received from a supporting organization may be sufficient to meet the requirements of this subdivision if it can be demonstrated that in order to avoid the interruption of the carrying on of a particular function or activity, the beneficiary organization will be sufficiently attentive to the operations of the supporting organization. This may be the case where either the supporting organization or the beneficiary organization earmarks the support received from the supporting organization for a particular program or activity, even if such program or activity is not the beneficiary organization's primary program or activity so long as such program or activity is a substantial one.

(c) This subdivision may be illustrated by the following examples:

Example (1). X, an organization described in section 501(c)(3), pays over all of its annual net income to Y, a museum described in section 509(a)(2). X meets the responsiveness test described in subparagraph (2) of this paragraph. In recent years, Y has earmarked the income received from X to underwrite the cost of carrying on a chamber music series consisting of 12 performances a year which are performed for the general public free of charge at its premises. Because of the expense involved in carrying on these recitals, Y is dependent upon the income from X for their continuation. Under these circumstances, X will be treated as providing Y with a sufficient portion of Y's total support to assure Y's attentiveness to X's operations, even though the chamber music series is not the primary part of Y's activities.

Example (2). M, an organization described in section 501(c)(3), pays over all of its annual net income to the Law School of N University, a publicly supported organization. M meets the responsiveness test described in subparagraph (2) of this paragraph. M has earmarked the income paid over to N's Law School to endow a chair in its Department of International Law. Without M's continued support, N might not continue to maintain this chair. Under these circumstances, M will be treated as providing N with a sufficient portion of N's total support to assure N's attentiveness to M's operations.

(d) All pertinent factors, including the number of beneficiaries, the length and nature of the relationship between the beneficiary and supporting organization and the purpose to which the funds are put (as illustrated by subdivision (iii)(b) and (c) of this subparagraph), will be considered in determining whether the amount of support received by a publicly supported beneficiary organization is sufficient to insure the attentiveness of such organization to the operations of the supporting organization. Normally the attentiveness of a beneficiary organization is motivated by reason of the amounts received from the supporting organization. Thus, the more substantial the amount involved, in terms of a percentage of the publicly supported organization's total support the greater the likelihood that the required degree of attentiveness will be present. However, in determining whether the amount received from the supporting organization is sufficient to insure the attentiveness of the beneficiary organization to the operations of the supporting organization (including attentiveness to the nature and yield of such supporting organization's investments), evidence of actual attentiveness by the beneficiary organization is of almost equal importance. An example of acceptable evidence of actual attentiveness is the imposition of a requirement that the supporting organization furnish reports at least annually for taxable years beginning after December 31, 1971, to the beneficiary organization to assist such beneficiary organization in insuring that the supporting organization has invested its endowment in assets productive of a reasonable rate of return (taking appreciation into account) and has not engaged in any activity which would give rise to liability for a tax imposed under sections 4941, 4943, 4944, and 4945 if such organization were a private foundation. The imposition of such requirement within 120 days after October 16, 1972, will be deemed to have retroactive effect to January 1, 1970, for purposes of determining whether a supporting organization has met the requirements of this subdivision for its first two taxable years beginning after December 31, 1969. The imposition of such requirement is, however, merely one of the factors in determining whether a supporting organization is complying with this subdivision and the absence of such requirement will not preclude an organization from classification as a supporting organization based on other factors.

(e) However, where none of the beneficiary organizations is dependent upon the supporting organization for a sufficient amount of the benefi-

ciary organization's support within the meaning of this subdivision, the requirements of this subparagraph will not be satisfied, even though such beneficiary organizations have enforceable rights against such organization under State law.

(4) Integral part test; transitional rule. (i) A trust (whether or not exempt from taxation under section 501(a)) which on November 20, 1970, has met and continues to meet the requirements of subdivisions (ii) through (vi) of this subparagraph shall be treated as meeting the requirements of the integral part test (whether or not it meets the requirements of subparagraph (3)(ii) or (iii) of this paragraph) if for taxable years beginning after October 16, 1972, the trustee of such trust makes annual written reports to all of the beneficiary publicly supported organizations with respect to such trust setting forth a description of the assets of the trust, including a detailed list of the assets and the income produced by such assets. A trust organization which meets the requirements of this subparagraph may request a ruling that it is described in section 509(a)(3) in such manner as the Commissioner may prescribe.

(ii) All the unexpired interests in the trust are devoted to one or more purposes described in section 170(c)(1) or (2)(B) and a deduction was allowed with respect to such interests under section 170, 545(b)(2), 556(b)(2), 642(c), 2055, 2106(a)(2), 2522, or corresponding provisions of prior law (or would have been allowed such a deduction if the trust had not been created before 1913).

(iii) The trust was created prior to November 20, 1970, and did not receive any grant, contribution, bequest or other transfer on or after such date. For purpose of this subdivision, a split-interest trust described in section 4947(a)(2) which was created prior to November 20, 1970, which was irrevocable on such date, and which becomes a charitable trust described in section 4947(a)(1) after such date shall be treated as having been created prior to such date;

(iv) The trust is required by its governing instrument to distribute all of its net income currently to a designated publicly supported beneficiary organization. Where more than one publicly supported beneficiary organization is designated in the governing instrument of a trust, all of the net income must be distributable and must be distributed currently to each of such beneficiary organizations in fixed shares pursuant to such governing instrument. For purposes of this subdivision, the governing instrument of a charitable trust shall be treated as requiring distribution to a designated beneficiary organization where the trust instrument describes the charitable purpose of the trust so completely that such description can apply to only one existing beneficiary organization and is of sufficient particularity as to vest in such organization rights against the trust enforceable in a court possessing equitable powers;

(v) The trustee of the trust does not have discretion to vary either the beneficiaries or the amounts payable to the beneficiaries. For purposes of this subdivision, a trustee shall not be treated as having such discretion where the trustee has discretion to make payments of principal to the single section 509(a)(1) or (2) organization that is currently entitled to receive all of the trust's income or where the trust instrument provides that the trustee may cease making income payments to a particular charitable beneficiary in the event of certain specific occurrences, such as the loss of exemption under section 501(c)(3) or classification under section 509(a)(1) or (2) by the beneficiary or the failure of the beneficiary to carry out its charitable purpose properly;

(vi) None of the trustees would be disqualified persons within the meaning of section 4946(a) (other than foundation managers under 4946(a)(1)(B)) with respect to the trust if such trust were treated as a private foundation.

(5) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). N is a nonprofit publishing organization described in section 501(c)(3). It does all of the publishing and printing for the churches of a particular denomination (which are publicly supported organizations). Control of the organization is vested in a five-man Board of Directors, which includes one church official and four lay members of the congregations of that denomination. N does no other printing or publishing. It publishes all of the churches' religious as well as secular tracts and materials. Under these circumstances, N is considered as being "operated in connection with" a number of publicly supported organizations. Publishing religious literature is an integral part of the churches' activities; it is carried on by N on behalf of the churches, and there is sufficient direction of N's activities by the churches to insure responsiveness by N to their needs.

Example (2). O, an alumni association described in section 501(c)(3), was formed to promote a spirit of loyalty among graduates of Y University, a publicly supported organization, and to effect united action in promoting the general welfare of the university. A special committee of Y's governing board meets with O and makes recommendations as to the allocation of O's program of gifts and scholarships to the university and its students. O also provides certain functions which would otherwise be part of Y's functions, such as maintaining records of alumni. O publishes a bulletin to keep alumni aware of the activities of the university. Under these circumstances O is considered to be operated in connection with Y within the meaning of section 509(a)(3)(B).

Example (3). P is a trust created under the will of A for the purpose of furthering musical education. As a means of accomplishing its purposes P founded X, a school of music described in section 509(a)(1). The trust instrument is thereafter amended to name X specifically as the beneficiary of the trust. X can enforce its equitable rights as trust beneficiary under State law. Members of the governing body of X form a minority of the foundation managers of P. For many years the organizations have been operated in close association with each other. P provides the principal endowment fund for the operation of X. In addition, while the governing body of X concerns itself with artistic policies, the foundation managers of P handle the budgetary concerns of X. X's annual budget is prepared with the assistance of P's foundation managers and is approved by P. Under these circumstances, P is considered to be operated in connection with X within the meaning of section 509(a)(3)(B).

Example (4). Q is a charitable trust described in section 501(c)(3) and created under the will of C. Prior to his death, C built H Hospital and deeded it to I University for use as a training and clinical facility for I's medical school. Both H and I are publicly supported organizations. C created Q to perpetuate his interest in, and assistance to, H Hospital. The sole purpose of Q was to provide financial support for H, the beneficiary organization named in C's will. H can enforce its equitable rights as trust beneficiary under State law. After the death of C, Q continued to provide substantial support for H. It was primarily responsible for the erecting of a new hospital building, as well as the construction of other facilities for the hospital. In addition, each medical department of H indicates during the year what its greatest needs are. Once these requests are approved by the medical director of I University's Medical School, they are presented to Q, and subject to the amount of Q's income (all of which is applied to H), these requests are honored and the new equipment of facility is supplied through Q's funds. The governing body of Q and those of H and I are completely independent. However, based on the above facts, Q is responsive to the needs of H, Q maintains a substantial involvement in the conduct of H, and H is substantially dependent upon the receipt of support from Q. Accordingly, Q is operated in connection with one or more section 509(a)(1) organizations within the meaning of section 509(a)(3)(B).

Example (5). R is a charitable trust created under the will of B, who died in 1971. Its purpose is to hold assets as an endowment for S, a hospital, T, a university, and U, a national medical research organization (all being publicly supported organizations and specifically named in the trust instrument), and to distribute all of the income each year in equal shares among the three named beneficiaries. S, T, and U have certain enforceable rights against R under State law, including the right to compel an accounting. Except for making these annual payments, the trustees of R have no further contacts or relationships with S, T, or U. The payments by R to such organizations do not comprise a sufficient amount of support to meet the requirements of subparagraph (3) of this paragraph for any of these organizations. Although R meets the responsiveness test described in subparagraph (2) of this paragraph, it does not meet the integral part test described in subparagraph (3) of this paragraph. R is not, therefore, considered as operated in connection with one or more publicly supported organizations within the meaning of section 509(a)(3)(B). However, if B had died prior to November 20, 1970, R could, upon meeting all of the requirements of subparagraph (4) of this paragraph, be considered as operated in connection with one or more of publicly supported organizations within the meaning of section 509(a)(3)(B).

Example (6). S is a charitable trust described in section 501(c)(3). S was created under the will of C in 1910 for the purpose of providing aged and indigent women with care and shelter. Prior to his death in 1910, C helped to create T, a home for aged women, through a substantial inter vivos contribution. Although T is not specifically named in C's will, the trustees of S (who are completely independent of T) have paid over all of S's income to T in furtherance of the trust's purposes since the death of C. S establishes that between 1910 and 1955, the amount of support received by T from S was sufficient support to satisfy the provisions of § 1.509(a)–4(i)(3)(iii). In 1956, T merged with U, a home for aged and indigent men, and V, a nursing home. S continued to pay all its income to W, the organization resulting from the merger of T, U, and V. However, as a result of the merger and certain changes in the methods of financing the operations, the payments made by S after 1955 no longer were sufficient to satisfy the integral part test of § 1.509(a)–4(i)(3)(iii). W qualifies as an organization described in section 509(a)(2). For the taxable year 1971, S meets the responsiveness test under § 1.509(a)–4(i)(2)(ii). Although W is not a named beneficiary under S's governing instrument, pursuant to § 1.509(a)–4(i)(1)(ii) the historic and continuing relationship between the organizations will be taken into account to establish compliance with the responsiveness test. Furthermore, pursuant to § 1.509(a)–4(i)(1)(iii), under the facts set forth above, the integral part test under § 1.509(a)–4(i)(3)(iii) will be considered as being satisfied for the taxable year 1971. Thus S will be considered as "operated in connection with" W for the taxable year 1971.

(j) **Control by disqualified persons—(1) In general.** Under the provisions of section 509(a)(3)(C) a supporting organization may not be controlled directly or indirectly by one or more disqualified persons (as defined in section 4946) other than foundation managers and other than one or more publicly supported organizations. If a person who is a disqualified person with respect to a supporting organization, such as a substantial contributor to the supporting organization, is appointed or designated as a foundation manager of the supporting organization by a publicly supported beneficiary organization to serve as the representative of such publicly supported organization, then for purposes of this paragraph such person will be regarded as a disqualified person, rather than as a representative of the publicly supported organization. An organization will be considered "controlled," for purposes of section 509(a)(3)(C), if the disqualified persons, by aggregating their votes or positions of authority, may require such organization to perform any act which significantly affects its operation or may prevent such organization from performing such act. This includes, but is not limited to, the right of any substantial contributor or his spouse to designate annually the recipients, from among the publicly supported organizations of the income attributable to his contribution to the supporting organization. Except as provided in subparagraph (2) of this paragraph, a supporting organization will be considered to be controlled directly or indirectly by one or more

disqualified persons if the voting power of such persons is 50 percent or more of the total voting power of the organization's governing body or if one or more of such persons have the right to exercise veto power over the actions of the organization. Thus, if the governing body of a foundation is composed of five trustees, none of whom has a veto power over the actions of the foundation, and no more than two trustees are at any time disqualified persons, such foundation will not be considered to be controlled directly or indirectly by one or more disqualified persons by reason of this fact alone. However, all pertinent facts and circumstances including the nature, diversity, and income yield of an organization's holdings, the length of time particular stocks, securities, or other assets are retained, and its manner of exercising its voting rights with respect to stocks in which members of its governing body also have some interest, will be taken into consideration in determining whether a disqualified person does in fact indirectly control an organization.

(2) **Proof of independent control.** Notwithstanding subparagraph (1) of this paragraph, an organization shall be permitted to establish to the satisfaction of the Commissioner that disqualified persons do not directly or indirectly control it. For example, in the case of a religious organization operated in connection with a church, the fact that the majority of the organization's governing body is composed of lay persons who are substantial contributors to the organization will not disqualify the organization under section 509(a)(3)(C) if a representative of the church, such as a bishop or other official, has control over the policies and decisions of the organization.

(k) **Organizations operated in conjunction with certain section 501(c)(4), (5), or (6) organizations.** (1) For purposes of section 509(a)(3), an organization which is operated in conjunction with an organization described in section 501(c)(4), (5), or (6) (such as a social welfare organization, labor or agricultural organization, business league, or real estate board) shall, if it otherwise meets the requirements of section 509(a)(3), be considered an organization described in section 509(a)(3) if such section 501(c)(4), (5), or (6) organization would be described in section 509(a)(2) if it were an organization described in section 501(c)(3). The section 501(c)(4), (5), or (6) organization, which the supporting organization is operating in conjunction with, must therefore meet the one-third tests of a publicly supported organization set forth in section 509(a)(2).

(2) This paragraph may be illustrated by the following example:

Example. X medical association, described in section 501(c)(6), is supported by membership dues and funds resulting from the performance of its exempt activities. This support, which is entirely from permitted sources, constitutes more than one-third of X's support. X does not normally receive more than one-third of its support from items described in section 509(a)(2)(B). X organized and operated an endowment fund for the sole purpose of furthering medical education. The fund is an organization described in section 501(c)(3). Since more than one-third of X's support is derived from membership dues and from funds resulting from the performance of exempt purposes (all of which are from permitted sources) and not more than one-third of its support is from items described in section 509(a)(2)(B), it would be a publicly supported organization described in section 509(a)(2) if it were described in section 501(c)(3) rather than section 501(c)(6). Accordingly, if the fund otherwise meets the requirements of section 509(a)(3) with respect to X, it will be considered an organization described in section 509(a)(3).

[T.D. 7212, 37 FR 21916, Oct. 17, 1972, as amended by T.D. 7784, 46 FR 37890, July 23, 1981]

§ 1.509(a)–5 Special rules of attribution.

(a) **Retained character of gross investment income.** (1) For purposes of determining whether an organization meets the not-more-than-one-third support test set forth in section 509(a)(2)(B), amounts received by such organization from:

(i) An organization which seeks to be described in section 509(a)(3) by reason of its support of such organization; or

(ii) A charitable trust, corporation, fund, or association described in section 501(c)(3) (including a charitable trust described in section 4947(a)(1)) or a split interest trust described in section 4947(a)(2), which is required by its governing instrument or otherwise to distribute, or which normally does distribute, at least 25 percent of its adjusted net income (within the meaning of section 4942(f)) to such organization, and such distribution normally comprises at least 5 percent of such distributee organization's adjusted net income,

will retain their character as gross investment income (rather than gifts or contributions) to the extent that such amounts are characterized as gross investment income in the possession of the distributing organization described in subdivision (i) or (ii) of this subparagraph or, if the distributing organization is a split interest trust described in section 4947(a)(2), to the extent that such amounts would be characterized as gross investment income attributable to transfers in trust after May 26, 1969, if such trust were a private foundation. For purposes of this section, all income which is characterized as gross investment income in the possession of the distributing organization

shall be deemed to be distributed first by such organization and shall retain its character as such in the possession of the recipient of amounts described in this paragraph. If an organization described in subdivision (i) or (ii) of this subparagraph makes distributions to more than one organization, the amount of gross investment income deemed distributed shall be prorated among the distributees.

(2) For purposes of subparagraph (1) of this paragraph, amounts paid by an organization to provide goods, services, or facilities for the direct benefit of an organization seeking section 509(a)(2) status (rather than for the direct benefit of the general public) shall be treated in the same manner as amounts received by the latter organization. Such amounts will be treated as gross investment income to the extent that such amounts are characterized as gross investment income in the possession of the organization spending such amounts. For example, X is an organization described in subparagraph (1)(i) of this paragraph. It uses part of its funds to provide Y, an organization seeking section 509(a)(2) status, with certain services which Y would otherwise be required to purchase on its own. To the extent that the funds used by X to provide such services for Y are characterized as gross investment income in the possession of X, such funds will be treated as gross investment income received by Y.

(3) An organization seeking section 509(a)(2) status shall file a separate statement with its return required by section 6033, setting forth all amounts received from organizations described in paragraph (a)(1)(i) or (ii) of this section.

(b) Relationships created for avoidance purposes. (1) If a relationship between an organization seeking section 509(a)(3) status and an organization seeking section 509(a)(2) status:

(i) Is established or availed of after October 9, 1969, and

(ii) One of the purposes of establishing or utilizing such relationship is to avoid classification as a private foundation with respect to either organization, the character and amount of support received by the section 509(a)(3) organization will be attributed to the section 509(a)(2) organization for purposes of determining whether the latter meets the one-third support test and the not-more-than-one-third support test under section 509(a)(2). If a relationship described in this subparagraph is established or utilized by an organization seeking section 509(a)(3) status and two or more organizations seeking section 509(a)(2) status, the amount of support received by the former organization will be prorated among the latter organizations and the character of each class of support (as defined in section 509(d)) will be attributed pro rata to each such organization. The provisions of this paragraph and of paragraph (a) of this section are not mutually exclusive.

(2) In determining whether a relationship between one or more organizations seeking section 509(a)(2) status (hereinafter referred to as "beneficiary organizations") and an organization seeking section 509(a)(3) status (hereinafter referred to as the "supporting organization") has been established or availed of to avoid classification as a private foundation (within the meaning of subparagraph (1) of this paragraph), all pertinent facts and circumstances, including the following, shall be taken into account as evidence that a relationship was not established or availed of to avoid classification as a private foundation:

(i) The supporting organization is operated to support or benefit several specified beneficiary organizations.

(ii) The beneficiary organization has a substantial number of dues-paying members (in relation to the public it serves and the nature of its activities) and such members have an effective voice in the management of both the supporting and beneficiary organizations.

(iii) The beneficiary organization is composed of several membership organizations, each of which has a substantial number of members (in relation to the public it serves and the nature of its activities), and such membership organizations have an effective voice in the management of the supporting and beneficiary organizations.

(iv) The beneficiary organization receives a substantial amount of support from the general public, public charities, or governmental grants.

(v) The supporting organization uses its funds to carry on a meaningful program of activities to support or benefit the beneficiary organization and such use would, if such supporting organization were a private foundation, be sufficient to avoid the imposition of any tax upon such organization under section 4942.

(vi) The supporting organization is not able to exercise substantial control or influence over the beneficiary organization by reason of the former's receiving support or holding assets which are disproportionately large in comparison with the support received or the assets held by the latter.

(vii) Different persons manage the operations of the beneficiary and supporting organizations and each organization performs a different function.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). M, an organization described in section 509(a)(2), is a council composed of 10 learned societies. Each member society has a large membership of scholars interested in a particular academic area. In 1970 M established N, an organization seeking section 509(a)(3) status, for the purpose of carrying on research and study projects of interest to the member societies. The principal source of funds for N's activities is from foundation and government grants and contracts. The principal source of funds for M's activities after the creation of N is membership dues. M continued to maintain a wide variety of activities for its members, such as publishing periodicals and carrying on seminars and conferences. N is subject to complete control by the governing body of M. Under these circumstances, the relationship between these organizations is not one which is described in subparagraph (1) of this paragraph.

Example (2). Q is a local medical research organization described in section 509(a)(2). Its fixed assets are negligible and it carries on research activities on a limited scale. It also makes a limited number of grants to scientists and doctors who are engaged in medical research of interest to Q. It receives support through small government grants and a few research contracts from private foundations. R is an organization described in section 501(c)(3). As of January 1, 1970, R was classified as a private foundation under section 509. It has a substantial endowment which it uses to make grants to various charitable and scientific organizations described in section 501(c)(3). During 1970, R agrees to subsidize the research activities of Q. R amends its governing instrument to provide specifically that all of R's support will be used for research activities which are approved and supervised by Q. R also amends its bylaws to permit a minority of Q's board of directors to be members of R's governing body. R then gives timely notification under section 507(b)(1)(B)(ii) that R is terminating its private foundation status by meeting the requirements of section 509(a)(3) by the end of the 12-month period described in section 507(b)(1)(B)(i). For purposes of determining whether R has met the requirements of section 509(a)(3) by the end of the 12-month period, as well as determining Q's status under section 509(a)(2), the character and amount of support received by R will be attributed to Q.

(c) Effect on organizations claiming section 509(a)(3) status. If an organization claiming section 509(a)(2) status fails to meet either the one-third support test or the not-more-than-one-third support test under section 509(a)(2) by reason of the application of the provisions of paragraph (a) or (b) of this section, and such organization is one of the specified organizations (within the meaning of section 509(a)(3)(A)) for whose support or benefit an organization claiming section 509(a)(3) status is operated, the organization claiming section 509(a)(3) status will not be considered to be operated exclusively to support or benefit one or more section 509(a)(1) or (2) organizations.

[T.D. 7212, 37 FR 21922, Oct. 17, 1972, as amended by T.D. 7290, 38 FR 31834, Nov. 19, 1973; T.D. 7784, 46 FR 37890, July 23, 1981]

§ 1.509(a)–6 Classification under section 509(a).

If an organization is described in section 509(a)(1) and also in another paragraph of section 509(a), it will be treated as described in section 509(a)(1). For purposes of this section, the parenthetical language "other than in clauses (vii) and (viii)" used in section 509(a)(1) shall be construed to mean "other than an organization which is described only in clause (vii) or (viii)". For example, X is an organization which is described in section 170(b)(1)(A)(vi), but could also meet the description of section 170(b)(1)(A)(viii) as an organization described in section 509(a)(2). For purposes of the one-third support test in section 509(a)(2)(A), contributions from X to other organizations will be treated as support from an organization described in section 170(b)(1)(A)(vi) rather than from an organization described in section 170(b)(1)(A)(viii).

[T.D. 7212, 37 FR 21923, Oct. 17, 1972]

§ 1.509(a)–7 Reliance by grantors and contributors to section 509(a)(1), (2), and (3) organizations.

(a) General rule. Once an organization has received a final ruling or determination letter classifying it as an organization described in section 509(a)(1), (2), or (3), the treatment of grants and contributions and the status of grantors and contributors to such organization under sections 170, 507, 545(b)(2), 556(b)(2), 642(c), 4942, 4945, 2055, 2106(a)(2), and 2522 will not be affected by reason of a subsequent revocation by the service of the organization's classification as described in section 509(a)(1), (2), or (3) until the date on which notice of change of status is made to the public (such as by publication in the Internal Revenue Bulletin) or another applicable date, if any, specified in such public notice. In appropriate cases, however, the treatment of grants and contributions and the status of grantors and contributors to an organization described in section 509(a)(1), (2), or (3) may be affected pending verification of the continued classification of such organization under section 509(a)(1), (2), or (3). Notice to this affect will be made in a public announcement by the service. In such cases the effect of grants and contributions made after the date of the announcement will depend upon the statutory qualification of the organization as an organization described in section 509(a)(1), (2), or (3).

(b) Exceptions. (1) Paragraph (a) of this section shall not apply if the grantor or contributor:

(i) Had knowledge of the revocation of the ruling or determination letter classifying the organization as an organization described in section 509(a)(1), (2), or (3), or

(ii) Was in part responsible for, or was aware of, the act, the failure to act, or the substantial and material change on the part of the organization which gave rise to the revocation of the ruling or determination letter classifying the organization as an organization described in section 509(a)(1), (2), or (3).

(2) Paragraph (a) of this section shall not apply where a different rule is otherwise expressly provided in the regulations under sections 170(b)(1)(A), 507(b)(1)(B), or 509.

[T.D. 7212, 37 FR 21923, Oct. 17, 1972]

§ 1.509(b)-1 Continuation of private foundation status.

(a) In general. If an organization is a private foundation (within the meaning of section 509(a)) on October 9, 1969, or becomes a private foundation on any subsequent date, such organization shall be treated as a private foundation for all periods after October 9, 1969, or after such subsequent date, unless its status as such is terminated under section 507. Therefore, if an organization was described in section 501(c)(3) and was a private foundation within the meaning of section 509(a) on October 9, 1969, it shall be treated as a private foundation for all periods thereafter, even though it may also satisfy the requirements of an organization described in some other paragraph of section 501(c). For example, if on October 9, 1969, an organization was described in section 501(c)(3), but because of its activities, it could also have qualified as an organization described in section 501(c)(4), such organization will continue to be treated as a private foundation, if it was a private foundation within the meaning of section 509(a) on October 9, 1969.

(b) Taxable private foundations. If an organization is a private foundation on October 9, 1969, and it is determined that it is not exempt under section 501(a) as an organization described in section 501(c)(3) as of any date after October 9, 1969, such organization, even though it may operate thereafter as a taxable entity, will continue to be treated as a private foundation unless its status as such is terminated under section 507. For example, X organization is a private foundation on October 9, 1969. It is subsequently determined that, as of July 1, 1972, X is no longer exempt under section 501(a) as an organization described in section 501(c)(3) because, for example, it has not conformed its governing instrument pursuant to section 508(e). X will continue to be treated as a private foundation after July 1, 1972, unless its status as such is terminated under section 507. However, if an organization is not exempt under section 501(a) as an organization described in section 501(c)(3) on October 9, 1969, then it will not be treated as a private foundation within the meaning of section 509(a) by reason of section 509(b), unless it becomes a private foundation on a subsequent date.

[T.D. 7212, 37 FR 21924, Oct. 17, 1972]

§ 1.509(c)-1 Status of organization after termination of private foundation status.

(a) In general. For purposes of Part II of Subchapter F of this chapter, an organization whose status as a private foundation is terminated under section 507 shall be treated as an organization created on the day after the date of such termination. An organization whose private foundation status has been terminated under the provisions of section 507(a) will, if it continues to operate, be treated as a new organization and must, if it desires to be classified under section 501(c)(3), give notification that it is applying for recognition of section 501(c)(3) status pursuant to the provisions of section 508(a).

(b) Effect upon section 507(d)(1). If the private foundation status of an organization has been terminated under section 507(b)(1)(B) and the regulations thereunder, and:

(1) Such organization does not continue at all times thereafter to meet the requirements of section 509(a)(1), (2), or (3) (and is therefore no longer excluded from the definition of a private foundation); and

(2) The status of such organization as a private foundation is thereafter terminated under section 507(a),

then the tax imposed under section 507(c)(1) upon the aggregate tax benefit (described in section 507(d)(1)) resulting from section 501(c)(3) status shall be computed only upon the aggregate tax benefit resulting after the date on which the organization again becomes a private foundation under subparagraph (1) of this paragraph.

[T.D. 7212, 37 FR 21924, Oct. 17, 1972]

§ 1.509(d)–1 Definition of support

For purposes of section 509(a)(2), the term "support" does not include amounts received in repayment of the principal of a loan or other indebtedness. See, however, section 509(e) as to amounts received as interest on a loan or other indebtedness.

[T.D. 7212, 37 FR 21924, Oct. 17, 1972]

§ 1.509(e)–1 Definition of gross investment income.

For the distinction between gross receipts and gross investment income, see § 1.509(a)–3(m).

[T.D. 7212, 37 FR 21925, Oct. 17, 1972]

Taxation of Business Income of Certain Exempt Organizations

§ 1.511–1 Imposition and rates of tax.

Section 511(a) imposes a tax upon the unrelated business taxable income of certain organizations otherwise exempt from Federal income tax. Under section 511(a)(1), organizations described in section 511(a)(2)(A) and in paragraph (a) of § 1.511–2 and organizations described in section 511(a)(2)(B) are subject to normal tax and surtax at the corporate rates provided by section 11. Under section 511(b)(1), trusts described in section 511(b)(2) are subject to tax at the individual rates prescribed in section 1(d) of the Code as amended by the Tax Reform Act of 1969 (section 1 for taxable years ending before Jan. 1, 1971). The deduction for personal exemption provided in section 642(b) in the case of a trust taxable under subchapter J, chapter 1 of the Code, is not allowed in computing unrelated business taxable income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7117, 36 FR 9421, May 25, 1971]

§ 1.511–2 Organizations subject to tax.

(a) Organizations other than trusts and title holding companies. (1)(i) The taxes imposed by section 511(a)(1) apply in the case of any organization (other than a trust described in section 511(b)(2) or an organization described in section 501(c)(1)) which is exempt from taxation under section 501(a) (except as provided in sections 507 through 515). For special rules concerning corporations described in section 501(c)(2), see paragraph (c) of this section.

(ii) In the case of an organization described in section 501(c)(4), (7), (8), (9), (10), (11), (12), (13), (14)(A), (15), (16), or (18), the taxes imposed by section 511(a)(1) apply only for taxable years beginning after December 31, 1969. In the case of an organization described in section 501(c)(14)(B) or (C), the taxes imposed by section 511(a)(1) apply only for taxable years beginning after February 2, 1966.

(2) The taxes imposed by section 511(a) apply in the case of any college or university which is an agency or instrumentality of any government or any political subdivision thereof, or which is owned or operated by a government or any political subdivision thereof or by any agency or instrumentality of any one or more governments or political subdivisions. Such taxes also apply in the case of any corporation wholly owned by one or more such colleges or universities. As here used, the word "government" includes any foreign government (to the extent not contrary to any treaty obligation of the United States) and all domestic governments (the United States and any of its Territories or possessions, any State, and the District of Columbia). Elementary and secondary schools operated by such governments are not subject to the tax on unrelated business income.

(3)(i) For taxable years beginning before January 1, 1970, churches and associations or conventions of churches are exempt from the taxes imposed by section 511. The exemption is applicable only to an organization which itself is a church or an association or convention of churches. Subject to the provisions of subdivision (ii) of this subparagraph, religious organizations, including religious orders, if not themselves churches or associations or conventions of churches, and all other organizations which are organized or operated under church auspices, are subject to the tax imposed by section 511, whether or not they engage in religious, educational, or charitable activities approved by a church.

(ii) The term "church" includes a religious order or a religious organization if such order or organization (a) is an integral part of a church, and (b) is engaged in carrying out the functions of a church, whether as a civil law corporation or otherwise. In determining whether a religious order or organization is an integral part of a church, consideration will be given to the degree to which it is connected with, and controlled by, such church. A religious order or organization shall be considered to be engaged in carrying out the functions of a church if its duties include the

ministration of sacerdotal functions and the conduct of religious worship. If a religious order or organization is not an integral part of a church, or if such an order or organization is not authorized to carry out the functions of a church (ministration of sacerdotal functions and conduct of religious worship) then it is subject to the tax imposed by section 511 whether or not it engages in religious, educational, or charitable activities approved by a church. What constitutes the conduct of religious worship or the ministration of sacerdotal functions depends on the tenets and practices of a particular religious body constituting a church. If a religious order or organization can fully meet the requirements stated in this subdivision, exemption from the tax imposed by section 511 will apply to all its activities, including those which it conducts through a separate corporation (other than a corporation described in section 501(c)(2)) or other separate entity which it wholly owns and which is not operated for the primary purpose of carrying on a trade or business for profit. Such exemption from tax will also apply to activities conducted through a separate corporation (other than a corporation described in section 501(c)(2)) or other separate entity which is wholly owned by more than one religious order or organization, if all such orders or organizations fully meet the requirements stated in this subdivision and if such corporation or other entity is not operated for the primary purpose of carrying on a trade or business for profit.

(iii) For taxable years beginning after December 31, 1969, churches and conventions or associations of churches are subject to the taxes imposed by section 511, unless otherwise entitled to the benefit of the transitional rules of section 512(b)(14) and § 1.512(b)–1(i).

(b) Trusts—(1) In general. The taxes imposed by section 511(b) apply in the case of any trust which is exempt from taxation under section 501(a) (except as provided in sections 507 through 515), and which, if it were not for such exemption, would be subject to the provisions of subchapter J, Chapter 1, of the Code. An organization which is considered as "trustee" of a stock bonus, pension, or profit-sharing plan described in section 401(a), a supplemental unemployment benefit trust described in section 501(c)(17), or a pension plan described in section 501(c)(18) (regardless of the form of such organization) is subject to the taxes imposed by section 511(b)(1) on its unrelated business income. However, if such an organization conducts a business which is a separate taxable entity on the basis of all the facts and circumstances, for example, an association taxable as a corporation, the business will be taxable as a feeder organization described in section 502.

(2) Effective dates. In the case of a trust described in section 501(c)(3), the taxes imposed by section 511(b) apply for taxable years beginning after December 31, 1953. In the case of a trust described in section 401(a), the taxes imposed by section 511(b) apply for taxable years beginning after June 30, 1954. In the case of a trust described in section 501(c)(17), the taxes imposed by section 511(b) apply for taxable years beginning after December 31, 1959. In the case of any other trust described in subparagraph (1) of this paragraph, the taxes imposed by section 511(b) apply for taxable years beginning after December 31, 1969.

(c) Title holding companies—(1) In general. If a corporation described in section 501(c)(2) pays any amount of its net income for a taxable year to an organization exempt from taxation under section 501(a) (or would pay such an amount but for the fact that the expenses of collecting its income exceed its income), and if such corporation and such organization file a consolidated income tax return for such taxable year, then such corporation shall be treated, for purposes of the tax imposed by section 511(a), as being organized and operated for the same purposes as such organization, as well as for its title-holding purpose. Therefore, if an item of income of the section 501(c)(2) corporation is derived from a source which is related to the exempt function of the exempt organization to which such income is payable and with which such corporation files a consolidated return, such item is, together with all deductions directly connected therewith, excluded from the determination of unrelated business taxable income under section 512 and shall not be subject to the tax imposed by section 511(a). If, however, such item of income is derived from a source which is not so related, then such item, less all deductions directly connected therewith, is, subject to the modifications provided in section 512(b), unrelated business taxable income subject to the tax imposed by section 511(a).

(2) The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. The income of X, a section 501(c)(2) corporation, is required to be distributed to exempt organization A. During the taxable year X realizes net income of $900,000 from source M and $100,000 from source N. Source M is related to A's exempt function, while source N is not so related. X and A file a consolidated return for such taxable year. X has net

unrelated business income of $100,000, subject to the modifications in section 512(b).

(3) Cross reference. For rules relating generally to the filing of consolidated returns by certain organizations exempt from taxation under section 501(a), see section 1504(e) of the Code and § 1.1502-100.

(4) Effective dates. Subparagraphs (1) through (3) of this paragraph apply with respect to taxable years beginning after December 31, 1969. For taxable years beginning before January 1, 1970, a corporation described in section 501(c)(2) and otherwise exempt from taxation under section 501(a) is taxable upon its unrelated business taxable income only if such income is payable either—

(i) To a church or convention or association of churches, or

(ii) To any organization subject, for taxable years beginning before January 1, 1970, to the tax imposed by section 511(a)(1).

(d) The fact that any class of organizations exempt from taxation under section 501(a) is subject to the unrelated business income tax under section 511 and this section does not in any way enlarge the permissible scope of business activities of such class for purposes of the continued qualification of such class under section 501(a).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6971, 33 FR 12899, Sept. 12, 1968; T.D. 7183, 37 FR 7884, April 21, 1972; T.D. 7632, 44 FR 42681, July 20, 1979]

§ 1.511-3 Provisions generally applicable to the tax on unrelated business income.

(a) Assessment and collections. Since the taxes imposed by section 511 are taxes imposed by subtitle A of the Code, all provisions of law and of the regulations applicable to the taxes imposed by subtitle A are applicable to the assessment and collection of the taxes imposed by section 511. Organizations subject to the tax imposed by section 511(a)(1) are subject to the same provisions, including penalties, as are provided in the case of the income tax of other corporations. In the case of a trust subject to the tax imposed by section 511(b)(1), the fiduciaries for such trust are subject to the same provisions, including penalties, as are applicable to fiduciaries in the case of the income tax of other trusts. See section 6151, et seq., and the regulations prescribed thereunder, for provisions relating to payment of tax.

(b) Returns. For requirements of filing annual returns with respect to unrelated business taxable income by organizations subject to the tax on such income, see section 6012, paragraph (e) of § 1.6012-2, and paragraph (a)(5) of § 1.6012-3.

(c) Taxable years, method of accounting, etc. The taxable year (fiscal year or calendar year, as the case may be) of an organization shall be determined without regard to the fact that such organization may have been exempt from tax during any prior period. See sections 441 and 446, and the regulations thereunder in this part, and section 7701 and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration). Similarly, in computing unrelated business taxable income, the determination of the taxable year for which an item of income or expense is taken into account shall be made under the provisions of sections 441, 446, 451, and 461, and the regulations thereunder, whether or not the item arose during a taxable year beginning before, on, or after the effective date of the provisions imposing a tax upon unrelated business taxable income. If a method for treating bad debts was selected in a return of income (other than an information return) for a previous taxable year, the taxpayer must follow such method in its returns under section 511, unless such method is changed in accordance with the provisions of § 1.166-1. A taxpayer which has not previously selected a method for treating bad debts may, in its first return under section 511, exercise the option granted in § 1.166-1.

(d) Foreign tax credit. See section 515 for provisions applicable to the credit for foreign taxes provided in section 901.

§ 1.511-4 Minimum tax for tax preferences.

The tax imposed by section 56 applies to an organization subject to tax under section 511 with respect to items of tax preference which enter into the computation of unrelated business taxable income. For this purpose, only those items of income and those deductions entering into the determination of the tax imposed by this section are considered in the determination of the items of tax preference under section 57. For rules relating to the minimum tax for tax preferences, see sections 56 through 58 and the regulations thereunder.

[T.D. 7564, 43 FR 40494, Sept. 12, 1978]

§ 1.512(a)-1 Definition.

(a) In general. Except as otherwise provided in § 1.512(a)-3, § 1.512(a)-4, or paragraph (f) of this section, section 512(a)(1) defines "unrelated

business taxable income" as the gross income derived from any unrelated trade or business regularly carried on, less those deductions allowed by chapter 1 of the Code which are directly connected with the carrying on of such trade or business, subject to certain modifications referred to in § 1.512(b)–1. To be deductible in computing unrelated business taxable income, therefore, expenses, depreciation, and similar items not only must qualify as deductions allowed by chapter 1 of the Code, but also must be directly connected with the carrying on of unrelated trade or business. Except as provided in paragraph (d)(2) of this section, to be "directly connected with" the conduct of unrelated business for purposes of section 512, an item of deduction must have proximate and primary relationship to the carrying on of that business. In the case of an organization which derives gross income from the regular conduct of two or more unrelated business activities, unrelated business taxable income is the aggregate of gross income from all such unrelated business activities less the aggregate of the deductions allowed with respect to all such unrelated business activities. For the treatment of amounts of income or loss of common trust funds, see § 1.584–2(c)(3).

(b) Expenses attributable solely to unrelated business activities. Expenses, depreciation, and similar items attributable solely to the conduct of unrelated business activities are proximately and primarily related to that business activity, and therefore qualify for deduction to the extent that they meet the requirements of section 162, section 167, or other relevant provisions of the Code, connected with the conduct of that activity and are deductible in computing unrelated business activities are directly connected with the conduct of that activity and are deductible in computing unrelated business taxable income if they otherwise qualify for deduction under the requirements of section 162. Similarly, depreciation of a building used entirely in the conduct of unrelated business activities would be an allowable deduction to the extent otherwise permitted by section 167.

(c) Dual use of facilities or personnel. Where facilities are used both to carry on exempt activities and to conduct unrelated trade or business activities, expenses, depreciation and similar items attributable to such facilities (as, for example, items of overhead), shall be allocated between the two uses on a reasonable basis. Similarly, where personnel are used both to carry on exempt activities and to conduct unrelated trade or business activities, expenses and similar items attributable to such personnel (as, for example, items of salary) shall be allocated between the two uses on a reasonable basis. The portion of any such item so allocated to the unrelated trade or business activity is proximately and primarily related to that business activity, and shall be allowable as a deduction in computing unrelated business taxable income in the manner and to the extent permitted by section 162, section 167, or other relevant provisions of the Code. Thus, for example, assume that X, an exempt organization subject to the provisions of section 511, pays its president a salary of $20,000 a year. X derives gross income from the conduct of unrelated trade or business activities. The president devotes approximately 10 percent of his time during the year to the unrelated business activity. For purposes of computing X's unrelated business taxable income, a deduction of $2,000 (10 percent of $20,000), would be allowable for the salary paid to its president.

(d) Exploitation of exempt activities—(1) In general. In certain cases, gross income is derived from an unrelated trade or business activity which exploits an exempt activity. One example of such exploitation is the sale of advertising in a periodical of an exempt organization which contains editorial material related to the accomplishment of the organization's exempt purpose. Except as specified in subparagraph (2) of this paragraph and paragraph (f) of this section, in such cases, expenses, depreciation and similar items attributable to the conduct of the exempt activities are not deductible in computing unrelated business taxable income. Since such items are incident to an activity which is carried on in furtherance of the exempt purpose of the organization, they do not possess the necessary proximate and primary relationship to the unrelated trade or business activity and are therefore not directly connected with that business activity.

(2) Allowable deductions. Where an unrelated trade or business activity is of a kind carried on for profit by taxable organizations and where the exempt activity exploited by the business is a type of activity normally conducted by taxable organizations in pursuance of such business, expenses, depreciation, and similar items which are attributable to the exempt activity qualify as directly connected with the carrying on of the unrelated trade or business activity to the extent that:

(i) The aggregate of such items exceeds the income (if any) derived from or attributable to the exempt activity; and

(ii) The allocation of such excess to the unrelated trade or business activity does not result in

a loss from such unrelated trade or business activity.

Under the rule of the preceding sentence, expenses, depreciation and similar items paid or incurred in the performance of an exempt activity must be allocated first to the exempt activity to the extent of the income derived from or attributable to the performance of that activity. Furthermore, such items are in no event allocable to the unrelated trade or business activity exploiting such exempt activity to the extent that their deduction would result in a loss carryover or carryback with respect to that trade or business activity. Similarly, they may not be taken into account in computing unrelated business taxable income attributable to any unrelated trade or business activity not exploiting the same exempt activity. See paragraph (f) of this section for the application of these rules to periodicals published by exempt organizations.

(e) Example. Paragraphs (a) through (d) of this section are illustrated by the following example:

Example. W is an exempt business league with a large membership. Under an arrangement with an advertising agency W regularly mails brochures, pamphlets and other advertising materials to its members, charging the agency an agreed amount per enclosure. The distribution of the advertising materials does not contribute importantly to the accomplishment of the purpose for which W is granted exemption. Accordingly, the payments made to W by the advertising agency constitute gross income from an unrelated trade or business activity. In computing W's unrelated business taxable income, the expenses attributable solely to the conduct of the business, or allocable to such business under the rule of paragraph (c) of this section, are allowable as deductions in accordance with the provisions of section 162. Such deductions include the costs of handling and mailing, the salaries of personnel used full-time in the unrelated business activity and an allocable portion of the salaries of personnel used both to carry on exempt activities and to conduct the unrelated business activity. However, costs of developing W's membership and carrying on its exempt activities are not deductible. Those costs are necessary to the maintenance of the intangible asset exploited in the unrelated business activity—W's membership—but are incurred primarily in connection with W's fundamental purpose as an exempt organization. As a consequence, they do not have proximate and primary relationship to the conduct of the unrelated business activity and do not qualify as directly connected with it.

(f) Determination of unrelated business taxable income derived from sale of advertising in exempt organization periodicals—(1) In general. Under section 513 (relating to the definition of unrelated trade or business) and § 1.513-1, amounts realized by an exempt organization from the sale of advertising in a periodical constitute gross income from an unrelated trade or business activity involving the exploitation of an exempt activity; namely, the circulation and readership of the periodical developed through the production and distribution of the readership content of the periodical. Paragraph (d) of this section provides for the allowance of deductions attributable to the production and distribution of the readership content of the periodical. Thus, subject to the limitations of paragraph (d)(2) of this section, where the circulation and readership of an exempt organization periodical are utilized in connection with the sale of advertising in the periodical, expenses, depreciation, and similar items of deductions attributable to the production and distribution of the editorial or readership content of the periodical shall qualify as items of deductions directly connected with the unrelated advertising activity. Subparagraphs (2) through (6) of this paragraph provide rules for determining the amount of unrelated business taxable income attributable to the sale of advertising in exempt organization periodicals. Subparagraph (7) of this paragraph provides rules for determining when the unrelated business taxable income of two or more exempt organization periodicals may be determined on a consolidated basis.

(2) Computation of unrelated business taxable income attributable to sale of advertising—(i) Excess advertising costs. If the direct advertising costs of an exempt organization periodical (determined under subparagraph (6)(ii) of this paragraph) exceed gross advertising income (determined under subparagraph (3)(ii) of this paragraph), such excess shall be allowable as a deduction in determining unrelated business taxable income from any unrelated trade or business activity carried on by the organization.

(ii) Excess advertising income. If the gross advertising income of an exempt organization periodical exceeds direct advertising costs, paragraph (d)(2) of this section provides that items of deduction attributable to the production and distribution of the readership content of an exempt organization periodical shall qualify as items of deduction directly connected with unrelated advertising activity in computing the amount of unrelated business taxable income derived from the advertising activity to the extent that such items exceed the income derived from or attributable to such production and distribution, but only to the extent that such items do not result in a loss from such advertising activity. Furthermore, such items of deduction shall not qualify as directly connected with such advertising activity to the extent that their deduction would result in a loss carryback or carryover with respect to such advertising activity. Similarly, such items of deduction shall not be taken into account in computing unrelated business taxable income attributable to any unrelated

trade or business activity other than such advertising activity. Thus—

(a) If the circulation income of the periodical (determined under subparagraph (3)(iii) of this paragraph) equals or exceeds the readership costs of such periodical (determined under subparagraph (6)(iii) of this paragraph), the unrelated business taxable income attributable to the periodical is the excess of the gross advertising income of the periodical over direct advertising costs; but

(b) If the readership costs of an exempt organization periodical exceed the circulation income of the periodical, the unrelated business taxable income is the excess, if any, of the total income attributable to the periodical (determined under subparagraph (3) of this paragraph) over the total periodical costs (as defined in subparagraph (6)(i) of this paragraph).

See subparagraph (7) of this paragraph for rules relating to the consolidation of two or more periodicals.

(iii) Examples. The application of this paragraph may be illustrated by the following examples. For purposes of these examples it is assumed that the production and distribution of the readership content of the periodical is related to the organization's exempt purpose.

Example (1). X, an exempt trade association, publishes a single periodical which carries advertising. During 1971, X realizes a total of $40,000 from the sale of advertising in the periodical (gross advertising income) and $60,000 from the sales of the periodical to members and nonmembers (circulation income). The total periodical costs are $90,000 of which $50,000 is directly connected with the sale and publication of advertising (direct advertising costs) and $40,000 is attributable to the production and distribution of the readership content (readership costs). Since the direct advertising costs of the periodical ($50,000) exceed gross advertising income ($40,000), pursuant to subdivision (i) of this subparagraph, the unrelated business taxable income attributable to advertising is determined solely on the basis of the income and deductions directly connected with the production and sale of the advertising:

Gross advertising revenue	$40,000
Direct advertising costs	(50,000)
Loss attributable to advertising	(10,000)

X has realized a loss of $10,000 from its advertising activity. This loss is an allowable deduction in computing X's unrelated business taxable income derived from any other unrelated trade or business activity.

Example (2). Assume the facts as stated in example (1), except that the circulation income of X periodical is $100,000 instead of $60,000, and that of the total periodical costs, $25,000 are direct advertising costs, and $65,000 are readership costs. Since the circulation income ($100,000) exceeds the total readership costs ($65,000), pursuant to subdivision (ii)(a) of this subparagraph the unrelated business taxable income attributable to the advertising activity is $15,000, the excess of gross advertising income ($40,000) over direct advertising costs ($25,000).

Example (3). Assume the facts as stated in example (1), except that of the total periodical costs, $20,000 are direct advertising costs and $70,000 are readership costs. Since the readership costs of the periodical ($70,000), exceed the circulation income ($60,000), pursuant to subdivision (ii)(b) of this subparagraph the unrelated business taxable income attributable to advertising is the excess of the total income attributable to the periodical over the total periodical costs. Thus, X has unrelated business taxable income attributable to the advertising activity of $10,000 ($100,000 total income attributable to the periodical less $90,000 total periodical costs).

Example (4). Assume the facts as stated in example (1), except that the total periodical costs are $120,000 of which $30,000 are direct advertising costs and $90,000 are readership costs. Since the readership costs of the periodical ($90,000), exceed the circulation income ($60,000), pursuant to subdivision (ii)(b) of this subparagraph the unrelated business taxable income attributable to advertising is the excess, if any, of the total income attributable to the periodical over the total periodical costs. Since the total income of the periodical ($100,000) does not exceed the total periodical costs ($120,000), X has not derived any unrelated business taxable income from the advertising activity. Further, only $70,000 of the $90,000 of readership costs may be deducted in computing unrelated business taxable income since as provided in subdivision (ii) of this subparagraph, such costs may be deducted, to the extent they exceed circulation income, only to the extent they do not result in a loss from the advertising activity. Thus, there is no loss from such activity, and no amount may be deducted on this account in computing X's unrelated trade or business income derived from any other unrelated trade or business activity.

(3) Income attributable to exempt organization periodicals—(i) In general. For purposes of this paragraph the total income attributable to an exempt organization periodical is the sum of its gross advertising income and its circulation income.

(ii) Gross advertising income. The term "gross advertising income" means all amounts derived from the unrelated advertising activities of an exempt organization periodical (or for purposes of this paragraph in the case of a taxable organization, all amounts derived from the advertising activities of the taxable organization).

(iii) Circulation income. The term "circulation income" means the income attributable to the production, distribution or circulation of a periodical (other than gross advertising income) including all amounts realized from or attributable to the sale or distribution of the readership content of the periodical, such as amounts realized from charges made for reprinting or republishing articles and special items in the periodical and amounts realized from sales of back issues. Where the right to receive an exempt organization periodical is associated with membership or similar status in such organization for which dues, fees or other charges are received (hereinafter referred to as "membership receipts"), circulation income includes the portion of such membership receipts allocable to

the periodical (hereinafter referred to as "allocable membership receipts"). Allocable membership receipts is the amount which would have been charged and paid if—

(a) The periodical was that of a taxable organization.

(b) The periodical was published for profit, and

(c) The member was an unrelated party dealing with the taxable organization at arm's length.

See subparagraph (4) of this paragraph for a discussion of the factors to be considered in determining allocable membership receipts of an exempt organization periodical under the standard described in the preceding sentence.

(4) Allocable membership receipts. The allocable membership receipts of an exempt organization periodical shall be determined in accordance with the following rules:

(i) Subscription price charged to nonmembers. If 20 percent or more of the total circulation of a periodical consist of sales to nonmembers, the subscription price charged to such nonmembers shall determine the price of the periodical for purposes of allocating membership receipts to the periodical.

(ii) Subscription price to nonmembers. If paragraph (f)(4)(i) of this section does not apply and if the membership dues from 20 percent or more of the members of an exempt organization are less than those received from the other members because the former members do not receive the periodical, the amount of the reduction in membership dues for a member not receiving the periodical shall determine the price of the periodical for purposes of allocating membership receipts to the periodical.

(iii) Pro rata allocation of membership receipts. Since it may generally be assumed that membership receipts and gross advertising income are equally available for all the exempt activities (including the periodical) of the organization, the share of membership receipts allocated to the periodical, where paragraphs (f)(4)(i) and (ii) of this section do not apply, shall be an amount equal to the organization's membership receipts multiplied by a fraction the numerator of which is the total periodical costs and the denominator of which is such costs plus the cost of other exempt activities of the organization. For example, assume that an exempt organization has total periodical costs of $30,000 and other exempt costs of $70,000. Further assume that the membership receipts of the organization are $60,000 and that paragraphs (f)(4)(i) and (ii) of this section do not apply. Under these circumstances $18,000 ($60,000 times $30,000/$100,000) is allocated to the periodical's circulation income.

(5) Examples. The rules set forth in paragraph (f)(4) of this section may be illustrated by the following examples. For purposes of these examples it is assumed that the exempt organization periodical contains advertising, and that the production and distribution of the readership content of the periodical is related to the organization's exempt purpose.

Example (1). U is an exempt scientific organization with 10,000 members who pay annual dues of $15 per year. One of U's activities is the publication of a monthly periodical which is distributed to all of its members. U also distributes 5,000 additional copies of its periodical to nonmember subscribers at a cost of $10 per year. Pursuant to paragraph (f)(4)(i) of this section, since the nonmember circulation of U's periodical represents 33⅓ percent of its total circulation the subscription price charged to nonmembers will be used to determine the portion of U's membership receipts allocable to the periodical. Thus, U's allocable membership receipts will be $100,000 ($10 times 10,000 members), and U's total circulation income for the periodical will be $150,000 ($100,000 from members plus $50,000 from sales to nonmembers).

Example (2). Assume the facts as stated in example (1), except that U sells only 500 copies of its periodical to nonmembers, at a price of $10 per year. Assume further that U's members may elect not to receive the periodical, in which case their annual dues are reduced from $15 per year to $6 per year, and that only 3,000 members elect to receive the periodical and pay the full dues of $15 per year. U's stated subscription price to members of $9 consistently results in an excess of total income (including gross advertising income) attributable to the periodical over total costs of the periodical. Since the 500 copies of the periodical distributed to nonmembers represents only 14 percent of the 3,500 copies distributed, pursuant to paragraph (f)(4)(i) of this section, the $10 subscription price charged to nonmembers will not be used in determining the portion of membership receipts allocable to the periodical. On the other hand, since 70 percent of the members elect not to receive the periodical and pay $9 less per year in dues, pursuant to paragraph (f)(4)(ii) of this section, such $9 price will be used in determining the subscription price charged to members. Thus, the allocable membership receipts will be $9 per member, or $27,000 ($9 times 3,000 copies) and U's total circulation income will be $32,000 ($27,000 plus $5,000).

Example (3). (a) W, an exempt trade association, has 800 members who pay annual dues of $50 per year. W publishes a monthly journal the editorial content and advertising of which are directed to the business interests of its own members. The journal is distributed to all of W's members and no receipts are derived from nonmembers.

(b) W has total receipts of $100,000 of which $40,000 ($50 × 800) are membership receipts and $60,000 are gross advertising income. W's total costs for the journal and other exempt activities is $100,000. W has total periodical costs of $76,000 of which $41,000 are direct advertising costs and $35,000 are readership costs.

(c) Paragraph (f)(4)(i) of this section will not apply since no copies are available to nonmembers. Therefore, the allocation of membership receipts shall be made in accordance with

paragraph (f)(4)(iii) of this section. Based upon pro rata allocation of membership receipts (40,000) by a fraction the numerator of which is total periodical costs ($76,000) and the denominator of which is the total costs of the journal and the other exempt activities ($100,000), $30,400 ($76,000/$100,000 times $40,000) of membership receipts is circulation income.

(6) **Deductions attributable to exempt organization periodicals**—(i) **In general.** For purposes of this paragraph the term "total periodical costs" means the total deductions attributable to the periodical. For purposes of this paragraph the total periodical costs of an exempt organization periodical are the sum of the direct advertising costs of the periodical (determined under subdivision (ii) of this subparagraph) and the readership costs of the periodical (determined under subdivision (iii) of this subparagraph). Items of deduction properly attributable to exempt activities other than the publication of an exempt organization periodical may not be allocated to such periodical. Where items are attributable both to an exempt organization periodical and to other activities of an exempt organization, the allocation of such items must be made on a reasonable basis which fairly reflects the portion of such item properly attributable to each such activity. The method of allocation will vary with the nature of the item, but once adopted, a reasonable method of allocation with respect to an item must be used consistently. Thus, for example, salaries may generally be allocated among various activities on the basis of the time devoted to each activity; occupancy costs such as rent, heat and electricity may be allocated on the basis of the portion of space devoted to each activity; and depreciation may be allocated on the basis of space occupied and the portion of the particular asset utilized in each activity. Allocations based on dollar receipts from various exempt activities will generally not be reasonable since such receipts are usually not an accurate reflection of the costs associated with activities carried on by exempt organizations.

(ii) **Direct advertising costs.** (a) The direct advertising costs of an exempt organization periodical include all expenses, depreciation, and similar items of deduction which are directly connected with the sale and publication of advertising as determined in accordance with paragraphs (a), (b), and (c) of this section. These items are allowable as deductions in the computation of unrelated business income of the organization for the taxable year to the extent they meet the requirements of section 162, section 167, or other relevant provisions of the Code. The items allowable as deductions under this subdivision do not include any items of deduction attributable to the production or distribution of the readership content of the periodical.

(b) The items allowable as deductions under this subdivision would include agency commissions and other direct selling costs, such as transportation and travel expenses, office salaries, promotion and research expenses, and direct office overhead directly connected with the sale of advertising lineage in the periodical. Also included would be other items of deduction commonly classified as advertising costs under standard account classification, such as art work and copy preparation, telephone, telegraph, postage, and similar costs directly connected with advertising.

(c) In addition to the items of deduction normally included in standard account classifications relating to advertising costs, it is also necessary to ascertain the portion of mechanical and distribution costs attributable to advertising lineage. For this purpose, the general account classifications of items includible in mechanical and distribution costs ordinarily employed in business-paper and consumer publication accounting provide a guide for the computation. Thus, the mechanical and distribution costs in such cases would include the portion of the costs and other expenses of composition, presswork, binding, mailing (including paper and wrappers used for mailing), and the bulk postage attributable to the advertising lineage of the publication. The portion of mechanical and distribution costs attributable to advertising lineage of the periodical will be determined on the basis of the ratio of advertising lineage to total lineage of the periodical, and the application of that ratio to the total mechanical and distribution costs of the periodical, where records are not kept in such a manner as to reflect more accurately the allocation of mechanical and distributions costs to advertising lineage of the periodical, and where there is no factor in the character of the periodical to indicate that such an allocation would be unreasonable.

(iii) **Readership costs.** The "readership costs" of an exempt organization periodical include expenses, depreciation or similar items which are directly connected with the production and distribution of the readership content of the periodical and which would otherwise be allowable as deductions in determining unrelated business taxable income under section 512 and the regulations thereunder if such production and distribution constituted an unrelated trade or business activity. Thus, readership costs include all the items of deduction attributable to an exempt organization periodical which are not allocated to direct adver-

tising costs under subdivision (ii) of this subparagraph, including the portion of such items attributable to the readership content of the periodical, as opposed to the advertising content, and the portion of mechanical and distribution costs which is not attributable to advertising lineage in the periodical.

(7) Consolidation—(i) In general. Where an exempt organization subject to unrelated business income tax under section 511 publishes two or more periodicals for the production of income, it may treat the gross income from all (but not less than all) of such periodicals and the items of deduction directly connected with such periodicals (including readership costs of such periodicals), on a consolidated basis as if such periodicals were one periodical in determining the amount of unrelated business taxable income derived from the sale of advertising in such periodical. Such treatment must, however, be followed consistently and once adopted shall be binding unless the consent of the Commissioner is obtained as provided in sections 446(e) and § 1.446–1(e).

(ii) Production of income. For purposes of this subparagraph, an exempt organization periodical is "published for the production of income" if—

(a) The organization generally receives gross advertising income from the periodical equal to at least 25 percent of the readership costs of such periodical, and

(b) The publication of such periodical is an activity engaged in for profit.

For purposes of the preceding sentence, the determination whether the publication of a periodical is an activity engaged in for profit is to be made by reference to objective standards taking into account all the facts and circumstances involved in each case. The facts and circumstances must indicate that the organization carries on the activity with the objective that the publication of the periodical will result in economic profit (without regard to tax consequences), although not necessarily in a particular year. Thus, an exempt organization periodical may be treated as having been published with such an objective even though in a particular year its total periodical costs exceed its total income. Similarly, if an exempt organization begins publishing a new periodical, the fact that the total periodical costs exceed the total income for the startup years because of a lack of advertising sales does not mean that the periodical was published without an objective of economic profit. The organization may establish that the activity was carried on with such an objective. This might be established by showing, for example, that there is a reasonable expectation that the total income, by reason of an increase in advertising sales, will exceed costs within a reasonable time. See § 1.183–2 for additional factors bearing on this determination.

(iii) **Example.** This subparagraph may be illustrated by the following example:

Example. Y, an exempt trade association, publishes three periodicals which it distributes to its members: a weekly newsletter, a monthly magazine, and quarterly journal. Both the monthly magazine and the quarterly journal contain advertising which accounts for gross advertising income equal to more than 25 percent of their respective readership costs. Similarly, the total income attributable to each such periodical has exceeded the total deductions attributable to each such periodical for substantially all the years they have been published. The newsletter carries no advertising and its annual subscription price is not intended to cover the cost of publication. The newsletter is a service of Y distributed to all of its members in an effort to keep them informed of changes occurring in the business world and is not engaged in for profit. Under these circumstances, Y may consolidate the income and deductions from the monthly and quarterly journals in computing its unrelated business taxable income, but may not consolidate the income and deductions attributable to the publication of the newsletter with the income and deductions of its other periodicals since the newsletter is not published for the production of income.

(g) Foreign organizations—(1) In general. The unrelated business taxable income of a foreign organization exempt from taxation under section 501(a) consists of:

(i) The organization's unrelated business taxable income which is derived from sources within the United States but which is not effectively connected with the conduct of a trade or business within the United States, plus

(ii) The organization's unrelated business taxable income effectively connected with the conduct of a trade or business within the United States (whether or not such income is derived from sources within the United States).

To determine whether income realized by a foreign organization is derived from sources within the United States or is effectively connected with the conduct of a trade or business within the United States, see part 1, subchapter N, chapter 1 of the Code (section 861 and following) and the regulations thereunder.

(2) Effective dates. Subparagraph (1) of this paragraph applies to taxable years beginning after December 31, 1969. For taxable years beginning on or before December 31, 1969, the unrelated business taxable income of a foreign organization exempt from taxation under section 501(a) consists

of the organization's unrelated business taxable income which—

(i) For taxable years beginning after December 31, 1966, is effectively connected with the conduct of a trade or business within the United States, whether or not such income is derived from sources within the United States;

(ii) For taxable years beginning on or before December 31, 1966, is derived from sources within the United States.

(h) Effective date. Paragraphs (a) through (f) of this section are applicable with respect to taxable years beginning after December 12, 1967. However, if a taxpayer wishes to rely on the rules stated therein for taxable years beginning before December 13, 1967, he may do so.

[T.D. 6939, 32 FR 17660, Dec. 12, 1967, as amended by T.D. 7183, 37 FR 7885, Apr. 21, 1972; T.D. 7392, 40 FR 58638, Dec. 18, 1975; T.D. 7438, 41 FR 44392, Oct. 8, 1976; T.D. 7935, 49 FR 1694, Jan. 13, 1984]

§ 1.512(a)–2 Definition applicable to taxable years beginning before December 13, 1967.

(a) In general. The unrelated business taxable income which is subject to the tax imposed by section 511 is the gross income, derived by any organization to which section 511 applies, from any unrelated trade or business regularly carried on by it, less the deductions allowed by chapter 1 of the Code which are directly connected with the carrying on of such trade or business, subject to certain exceptions, additions, and limitations referred to below. In the case of an organization which regularly carries on two or more unrelated businesses, its unrelated business taxable income is the aggregate of its gross income from all such unrelated businesses, less the aggregate of the deductions allowed with respect to all such unrelated businesses. For provisions generally applicable to the unrelated business tax, see § 1.511–3, and for rules applicable to the determination of the adjusted basis of property, see paragraph (a)(2) of § 1.514(a)–1.

(b) Effective date. Except as provided in paragraph (f) of § 1.512(a)–1, this section is applicable with respect to taxable years beginning before December 13, 1967.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6939, 32 FR 17660, Dec. 12, 1967]

§ 1.512(a)–3 [Reserved]

§ 1.512(a)–4 Special rules applicable to war veterans organizations.

(a) In general. For taxable years beginning after December 31, 1969, this section provides special rules for the determination of the unrelated business taxable income of an organization described in section 501(c)(19). In general, the rules contained in sections 511 through 514 which are applicable to any organization listed in section 501(c) apply in determining the unrelated business taxable income of an organization described in section 501(c)(19). However, that amount which is paid by members to the organization for the purpose described in paragraph (b)(1) of this section, if set aside from other organizational monies and accounts in an insurance set aside, may be excluded from the unrelated business taxable income of the organization. The insurance set aside shall be used exclusively for providing insurance benefits, for the purposes specified in section 170(c)(4) of the Code, for the reasonable costs of administering the insurance program that are directly related to such set aside, or for the reasonable costs of distributing funds for section 170(c)(4) purposes. If an amount so set aside is used for any purposes other than those described in the preceding sentence, it shall be included in unrelated business taxable income without regard to any modifications provided by section 512(b), in the taxable year in which it is withdrawn from such set aside. Amounts will be considered to have been withdrawn from an insurance set aside if they are used in any manner inconsistent with providing insurance benefits, paying the reasonable costs of administering the insurance program for section 170(c)(4) purposes and for costs of distributing funds for section 170(c)(4) purposes. An example of a use of funds which would be considered a withdrawal would be the use of such funds as security for a loan.

(b) Insurance set aside—(1) Purpose of payments by members. Payments by members (including commissions on such payments earned by the set aside as agent for an insurance company) into an insurance set aside must be for the sole purpose of obtaining life, sick, accident or health insurance benefits from the organization or for the reasonable costs of administration of the insurance program, except that such purpose is not violated when excess funds from an experience gain are utilized for those purposes specified in section 170(c)(4) or the reasonable costs of distributing funds for such purposes. Funds for any other

purpose may not be set aside in the insurance set aside.

(2) Income from set aside. In addition to the payments by members described in paragraph (b)(1) of this section, only income from amounts in the insurance set aside (including commissions earned as agent for an insurance company) may be so set aside. Moreover unless such income is used for providing insurance benefits, for those purposes specified in section 170(c)(4), or for reasonable costs of administration, such income must be set aside within the period described in paragraph (b)(3) of this section in order to avoid being included as an item of unrelated business taxable income under section 512(a)(4).

(3) Time within which income must be set aside. Income from amounts in the insurance set aside generally must be set aside in the taxable year in which it would be includible in gross income but for this section. However, income set aside on or before the date prescribed for filing the organization's return of unrelated business taxable income (whether or not it had such income) for the taxable year (including any extension of time) may, at the election of the organization, be treated as having been set aside in such taxable year.

(4) Computation of income from set aside. Income from amounts in the insurance set aside shall consist solely of items of investment income from, and other gains derived from dealings in, property in the set aside. The deductions allowed against such items of income or other gains are those amounts which are related to the production of such income or other gains. Only the amounts of income or other gain which are in excess of such deductions may be set aside in the insurance set aside.

(5) Requirements for set aside. An amount is not properly set aside if the organization commingles it with any amount which is not to be set aside. However, adequate records describing the amount set aside and indicating that it is to be used for the designated purpose are sufficient. Amounts that are set aside need not be permanently committed to such use either under state law or by contract. Thus, for example, it is not necessary that the organization place these funds in an irrevocable trust. Although set aside income may be accumulated, any accumulation which is unreasonable in amount or duration is evidence that the income was not accumulated for the purposes set forth. For purposes of the preceding sentence, accumulations which are reasonably necessary for the purpose of providing life, sick, health, or accident insurance benefits on the basis of recognized mortality or morbidity tables and assumed rates of interest under an actuarially acceptable method would not be unreasonable even though such accumulations are quite large and the time between the receipt by the organization of such amounts and the date of payment of the benefits is quite long. For example, an accumulation of income for 20 years or longer which is determined to be reasonably necessary to pay life insurance benefits to members, their dependents or designated beneficiaries, generally would not be an unreasonable accumulation. Income which has been set aside may be invested, pending the action contemplated by the set aside, without being regarded as having been used for other purposes.

[T.D. 7438, 41 FR 44393, Oct. 8, 1976]

§ 1.512(a)–5T Questions and answers relating to the unrelated business taxable income of organizations described in paragraphs (9), (17) or (20) of section 501(c) (temporary).

Q–1: What does section 512(a)(3), as amended by the Tax Reform Act of 1984 (Act), provide with respect to organizations described in paragraphs (9), (17) or (20) of section 501(c)?

A–1: In general, section 512(a)(3), as amended by section 511 of the Act, extends the rules for determining the unrelated business income tax of voluntary employees' beneficiary associations (VEBAs) to supplemental unemployment compensation benefit trusts (SUBs) and group legal service organizations (GLSOs). The section also restricts the amount of income that may be set aside by such organizations for exempt purposes.

Q–2: What is the effective date of the amendments to section 512(a)(3)?

A–2: The amendments to section 512(a)(3) will apply to income earned by VEBAs, SUBs or GLSOs after December 31, 1985, in the taxable years of such organizations ending after such date. For purposes of applying section 512(a)(3) to the first taxable year of such an organization ending after December 31, 1985, the income of the VEBA, SUB or GLSO earned after December 31, 1985, will be determined by allocating the total income earned for such taxable year on the basis of the calendar year 1985 and 1986 months in such taxable year. However, if a VEBA, SUB or GLSO is part of a plan that is maintained pursuant to one or more collective bargaining agreements (a) between employee representatives and one or more employers, and (b) which are in effect on July 1, 1985 (or ratified on or before that date),

the amendments do not apply to income earned in a taxable year of a VEBA, SUB or GLSO beginning before the termination of the last of the collective bargaining agreements pursuant to which the plan is maintained (determined without regard to any extension of the contract agreed to after July 1, 1985). For purposes of the preceding sentence, any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added under section 511 of the Tax Reform Act 1984 (i.e., requirements under section 419, 419A, 512(a)(3)(E), and 4976) shall not be treated as a termination of such collective bargaining agreements.

Q–3: What amount of income may a VEBA, SUB or GLSO set aside for exempt purposes?

A–3: (a) Pursuant to section 512(a)(3)(E)(i), the amounts set aside in a VEBA, SUB, or GLSO (including a VEBA, SUB, or GLSO that is part of a 10 or more employer plan, as defined in section 419A(f)(6)(B)) as of the close of a taxable year of such VEBA, SUB, or GLSO to provide for the payment of life, sick, accident, or other benefits may not be taken into account for purposes of determining "exempt function income" to the extent that such amounts exceed the qualified asset account limit, determined under sections 419A(c) and 419A(f)(7), for such taxable year of the VEBA, SUB, or GLSO. In calculating the qualified asset account limit for this purpose, a reserve for post-retirement medical benefits under section 419A(c)(2)(A) is not to be taken into account.

(b) The exempt function income of a VEBA, SUB, or GLSO for a taxable year of such an organization, under section 512(a)(3)(B), includes: (1) Certain amounts paid by members of the VEBA, SUB, or GLSO within the meaning of the first sentence of section 512(a)(3)(B) ("member contributions"); and (2) other income of the VEBA, SUB, or GLSO (including earnings on member contributions) that is set aside for the payment of life, sick, accident, or other benefits to the extent that the total amount set aside in the VEBA, SUB or GLSO as of the close of the taxable year for any purpose (including member contributions and other income set aside in the VEBA, SUB, or GLSO as of the close of the year) does not exceed the qualified asset account limit for such taxable year of the organization. For purposes of section 512(c)(3)(B), member contributions include both employee contributions and employer contributions to the VEBA, SUB, or GLSO. In calculating the total amount set aside in a VEBA, SUB, or GLSO as of the close of a taxable year, certain assets with useful lives extending substantially beyond the end of the taxable year (e.g., buildings, and licenses) are not to be taken into account to the extent they are used in the provision of life, sick, accident, or other benefits. For example, cash and securities (and similar investments) held by a VEBA, SUB or GLSO are not disregarded in calculating the total amount set aside for this purpose because they are used to pay welfare benefits, rather than merely used in the provision of such benefits. Accordingly, the unrelated business taxable income of a VEBA, SUB, or GLSO for a taxable year of such an organization generally will equal the lesser of two amounts: the income of the VEBA, SUB, or GLSO for the taxable year (excluding member contributions); or, the excess of the total amount set aside as of the close of the taxable year (including member contributions, and excluding certain assets with a useful life extending substantially beyond the end of the taxable year to the extent they are used in the provision of welfare benefits) over the qualified asset account limit (calculated without regard to the otherwise permitted reserve for post-retirement medical benefits) for the taxable year. See § 1.419A-2T for special rules relating to collectively bargained welfare benefit funds.

(c) The income of a VEBA, SUB, or GLSO for any taxable year includes gain realized by the organization on the sale or disposition of any asset during such year. The gain realized by a VEBA, SUB, or GLSO on the sale or disposition of an asset is equal to the amount realized by the organization over the basis of such asset (in the hands of the organization), reduced by any qualified direct costs attributable to such asset (under paragraphs (b), (c), and (d) of Q&A–6 of § 1.419–1T).

Q–4: What transition rules apply to "existing reserves for post-retirement medical or life insurance benefits"?

A–4: (a) Section 512(a)(3)(E)(iii)(I) provides that income that is either directly or indirectly attributable to "existing reserves for post-retirement medical or life insurance benefits" will not be treated as unrelated business taxable income. An "existing reserve for post-retirement medical or life insurance benefits" (as defined in section 512(a)(3)(E)(iii)(II)) is the total amount of assets actually set aside in a VEBA, SUB, or GLSO on July 18, 1984 (calculated in the manner set forth in Q&A-3 of the regulation, and adjusted under paragraph (c) of Q&A–11 of § 1.419–1T), reduced by employer contributions to the fund on or before such date to the extent such contributions are not deductible for the taxable year of the employer containing July 18, 1984, and for any prior taxable

year of the employer, for purposes of providing such post-retirement benefits. For purposes of the preceding sentence only, an amount that was not actually set aside on July 18, 1984, will be treated as having been actually set aside on such date if (1) such amount was incurred by the employer (without regard to section 461(h)) as of the close of the last taxable year of the VEBA, SUB, or GLSO ending before July 18, 1984, and (2) such amount was actually contributed to the VEBA, SUB, or GLSO within 8½ months following the close of such taxable year.

(b) In addition, section 512(a)(3)(E)(iii)(I) applies to existing reserves for such post-retirement benefits only to the extent that such "existing reserves" do not exceed the amount that could be accumulated under the principles set forth in Revenue Rulings 69-382, 1969-2, C.B. 28; 69-478, 1969-2 C.B. 29; and 73-599, 1973-2 C.B. 40. Thus, amounts attributable to such excess "existing reserves" are not within this transition rule even though they were actually set aside on July 18, 1984.

(c) All post-retirement medical or life insurance benefits (or other benefits to the extent paid with amounts set aside to provide post-retirement medical or life insurance benefits) provided after July 18, 1984 (whether or not the employer has maintained a reserve or fund for such benefits) are to be charged, first, against the "existing reserves" within this transition rule (including amounts attributable to "existing reserves" within this transition rule) for post-retirement medical benefits or for post-retirement life insurance benefits (as the case may be) and, second, against all other amounts. For this purpose, the qualified direct cost of an asset with a useful life extending substantially beyond the end of the taxable year (as determined under Q&A-6 of § 1.419-1T) will be treated as a benefit provided and thus charged against the "existing reserve" based on the extent to which such asset is used in the provision of post-retirement medical benefits or post-retirement life insurance benefits (as the case may be). All plans of an employer providing post-retirement medical benefits are to be treated as one plan for purposes of section 512(a)(3)(E)(iii)(III), and all plans of an employer providing post-retirement life insurance benefits are to be treated as one plan for purposes of section 512(a)(3)(E)(iii)(III).

(d) In calculating the unrelated business taxable income of a VEBA, SUB, or GLSO for a taxable year of such organization, the total income of the VEBA, SUB, or GLSO for the taxable year is reduced by the income attributable to "existing reserves" within the transition rule before such income is compared to the excess of the total amount set aside as of the close of the taxable year over the qualified asset account limit for the taxable year. Thus, for example, assume that the total income of a VEBA for a taxable year is $1,000, and that the excess of the total amount of the VEBA set aside as of the close of the taxable year over the applicable qualified asset account limit is $600. Assume also that of the $1,000 of total income, $500 is attributable to "existing reserves" within the transition rule of section 512(a)(3)(E)(iii)(I). The unrelated business income of this VEBA for the taxable year is equal to the lesser of the following two amounts: (1) the total income of the VEBA for the taxable year ($1,000), reduced to the extent that such income is attributable to "existing reserves" within the transition rule ($500); or (2) the excess of the total amount set aside as of the close of the taxable year over the applicable qualified asset account limit ($600). Thus, the unrelated business income of this VEBA for the taxable year is $500.

[T.D. 8073, 51 FR 4332, Feb. 4, 1986; 51 FR 7262, March 3, 1986; 51 FR 11303, April 2, 1986]

§ 1.512(b)–1 Modifications.

Whether a particular item of income falls within any of the modifications provided in section 512(b) shall be determined by all the facts and circumstances of each case. For example, if a payment termed "rent" by the parties is in fact a return of profits by a person operating the property for the benefit of the tax-exempt organization or is a share of the profits retained by such organization as a partner or joint venturer, such payment is not within the modification for rents. The modifications provided in section 512(b) are as follows:

(a) **Dividends, interest, and annuities.** Dividends, interest, and annuities, and the deductions directly connected therewith, shall be excluded in computing unrelated business taxable income. However, for taxable years beginning after December 31, 1969, certain dividends, interest, and annuities derived from and certain deductions in connection with debt-financed property (as defined in section 514(b)), and certain interest and annuities derived from and certain deductions in connection with controlled organizations (as defined in paragraph (*l*) of this section) shall be included in computing unrelated business taxable income.

(b) **Royalties.** Royalties, including overriding royalties, and all deductions directly connected with such income shall be excluded in computing unrelated business taxable income. However, for

taxable years beginning after December 31, 1969, certain royalties from and certain deductions in connection with either, debt-financed property (as defined in section 514(b)) or controlled organizations (as defined in paragraph (*l*) of this section) shall be included in computing unrelated business taxable income. Mineral royalties shall be excluded whether measured by production or by gross or taxable income from the mineral property. However, where an organization owns a working interest in a mineral property, and is not relieved of its share of the development costs by the terms of any agreement with an operator, income received from such an interest shall not be excluded. To the extent not treated as a loan under section 636, payments in discharge of mineral production payments shall be treated in the same manner as royalty payments for the purpose of computing unrelated business taxable income. To the extent treated as a loan under section 636, the amount of any payment in discharge of a production payment which is the equivalent of interest shall be treated as interest for purposes of section 512(b)(1) and paragraph (a) of this section.

(c) Rents—(1) Taxable years beginning before January 1, 1970. For taxable years beginning before January 1, 1970, rents from real property (including personal property leased with the real property) and the deductions directly connected therewith shall be excluded in computing unrelated business taxable income, except that certain rents from, and certain deductions in connection with, a business lease (as defined in section 514(f)) shall be included in computing unrelated business taxable income. See subparagraph (5) of this paragraph for rules governing amounts received for the rendering of services.

(2) Taxable years beginning after December 31, 1969—(i) In general. For taxable years beginning after December 31, 1969, except as provided in subdivision (iii) of this subparagraph, rents from property described in subdivision (ii) of this subparagraph, and the deductions directly connected therewith, shall be excluded in computing unrelated business taxable income. However, notwithstanding subdivision (ii) of this subparagraph, certain rents from and certain deductions in connection with either debt-financed property (as defined in section 514(b)) or property rented to controlled organizations (as defined in paragraph (*l*) of this section) shall be included in computing unrelated business taxable income.

(ii) Excluded rents. The rents which are excluded from unrelated business income under section 512(b)(3)(A) and this paragraph are—

(a) Real property. All rents from real property; and

(b) Personal property. All rents from personal property leased with real property if the rents attributable to such personal property are an incidental amount of the total rents received or accrued under the lease, determined at the time personal property are an incidental amount service by the lessee.

For purposes of the preceding sentence, rents attributable to personal property generally are not an incidental amount of the total rents if such rents exceed 10 percent of the total rents from all the property leased. For example, if the rents attributable to the personal property leased are determined to be $3,000 per year, and the total rents from all property leased are $10,000 per year, then such $3,000 amount is not to be excluded from the computation of unrelated business taxable income by operation of section 512(b)(3)(A)(ii) and this paragraph, since such amount is not an incidental portion of the total rents.

(iii) Exception. Subdivision (ii) of this subparagraph shall not apply, if either—

(a) Excess personal property rents. More than 50 percent of the total rents are attributable to personal property, determined at the time such personal property is first placed in service by the lessee; or

(b) Net profits. The determination of the amount of such rents depends in whole or in part on the income or profits derived by any person from the property leased, other than an amount based on a fixed percentage or percentages of the gross receipts or sales. For purposes of the preceding sentence, the rules contained in paragraph (b)(3) and (6) (other than paragraph (b)(6)(ii)) of § 1.856–4 shall apply.

(iv) Illustration. This subparagraph may be illustrated by the following example:

Example. A, an exempt organization, owns a printing factory which consists of a building housing two printing presses and other equipment necessary for printing. On January 1, 1971, A rents the building and the printing equipment to B for $10,000 a year. The lease states that $9,000 of such rent is for the building and $1,000 for the printing equipment. However, it is determined that notwithstanding the terms of the lease $4,000, or 40 percent ($4,000/$10,000), of the rent is actually attributable to the printing equipment. During 1971, A has $3,000 of deductions, all of which are properly allocable to the land and building. Under these circumstances, A shall not take into account in computing its unrelated business taxable income the $6,000 of rent attributable to the building and the $3,000 of deductions directly connected with such rent. How-

ever, the $4,000 of rent attributable to the printing equipment is not excluded from the computation of A's unrelated business taxable income by operation of section 512(b)(3)(A)(ii) or this paragraph since such rent represents more than an incidental portion of the total rents.

(3) Definitions and special rules. For purposes of subparagraph (2) of this paragraph—

(i) Real property defined. The term "real property" means all real property, including any property described in sections 1245(a)(3)(C) and 1250(c) and the regulations thereunder.

(ii) Personal property defined. The term "personal property" means all personal property, including any property described in section 1245(a)(3)(B) and the regulations thereunder.

(iii) Multiple leases. If separate leases are entered into with respect to real and personal property, and such properties have an integrated use (*e.g.*, one or more leases for real property and another lease or leases for personal property to be used upon such real property), all such leases shall be considered as one lease.

(iv) Placed in service. Property is "placed in service" by the lessee when it is first subject to his use in accordance with the terms of the lease. For example, property subject to a lease entered into on November 1, 1971, for a term commencing on January 1, 1972, shall be considered as placed in service on January 1, 1972, regardless of when the property is first actually used by the lessee.

(v) Changes in rent charged or personal property rented. If—

(a) By reason of the placing of additional or substitute personal property in service, there is an increase of 100 percent or more in the rent attributable to all the personal property leased, or

(b) There is a modification of the lease by which there is a change in the rent charged (whether or not there is a change in the amount of personal property rented), the rent attributable to personal property shall be recomputed to determine whether the exclusion under subparagraph (2)(ii)(b) of this paragraph or the exception under subparagraph (2)(iii)(a) of this paragraph applies. Any change in the treatment of rents, attributable to a recomputation under this subdivision, shall be effective only with respect to rents for the period beginning with the event which occasioned the recomputation.

(4) Examples. Subparagraphs (2) and (3) of this paragraph may be illustrated by the following examples:

Example (1). On January 1, 1971, A, an exempt organization, executes two leases with B. One is for the rental of a computer, with a stated annual rent of $750. The other is for the rental of office space in which to use the computer, at a stated annual rent of $7,250. The total annual rent under both leases for 1971 is $8,000. At the time the computer is first placed in service, however, taking both leases into consideration, it is determined that notwithstanding the terms of the leases $3,000, or 37.5 percent ($3,000/$8,000), of the rent is actually attributable to the computer. Therefore, for 1971, only the $5,000 ($8,000–$3,000) attributable to the rental of the office space is excluded from the computation of A's unrelated business taxable income by operation of section 512(b)(3).

Example (2). Assume the facts as stated in example (1). Assume further that the leases to which the computer and office space are subject in example (1) provide that the rent may be increased or decreased, depending upon the prevailing rental value for similar computers and office space. On January 1, 1972, the total annual rent is increased in the computer lease to $2,000, and in the office space lease to $9,000. For 1972, it is determined that notwithstanding the terms of the leases $6,000, or 54.5 percent ($6,000/$11,000), of the total rent is actually attributable to the computer as of that time. Even though the rent attributable to personal property now exceeds 50 percent of the total rent, the rent attributable to real property will continue to be excluded, since there was no modification of the terms of the leases and since the increase in the rent was not attributable to the placing of new personal property in service. See subparagraph (3)(v) of this paragraph. Thus, for 1972 the $5,000 of rent attributable to the office space continues to be excluded from the computation of A's unrelated business taxable income by operation of section 512(b)(3).

Example (3). Assume the facts as stated in example (1), except that on January 1, 1973, B rents a second computer from A, which is placed in service on that date. The total rent is increased to $2,000 for the computer lease and to $10,000 for the office space lease. It is determined at the time the second computer is first placed in service that notwithstanding the terms of the leases $7,000 of the rent is actually attributable to the computers. Since the rent attributable to personal property has increased by more than 100 percent ($4,000/$3,000=133 percent), a redetermination must be made pursuant to subparagraph (3)(v)(a) of this paragraph. As a result, 58.3 percent ($7,000/$12,000) of the total rent is determined to be attributable to personal property. Accordingly, since more than 50 percent of the total rent A receives is attributable to the personal property leased, none of the rents are excluded from the computation of A's unrelated business taxable income by operation of section 512(b)(3).

Example (4). Assume the facts as stated in example (3), except that on June 30, 1975, the lease between B and A is modified. The total rent for the computer lease is reduced to $1,500 and the total rent for the office space lease is reduced to $7,500. Pursuant to subdivision (3)(v)(b) of this paragraph, a redetermination is made as of June 30, 1975. As of the modification date, it is determined that notwithstanding the terms of the leases, the rent actually attributable to the computers is $4,000, or 44.4 percent ($4,000/$9,000), of the total rent. Since less than 50 percent of the total rent is now attributable to personal property, the rent attributable to real property ($5,000), for periods after June 30, 1975, is excluded from the computation of A's unrelated business taxable income by operation of section 512(b)(3). However, the rent attributable to personal property ($4,000) is not excluded from unrelated business taxable income for such periods by operation of section 512(b)(3), since it represents more than an incidental portion of the total rent.

(5) **Rendering of services.** For purposes of this paragraph, payments for the use or occupancy of rooms and other space where services are also rendered to the occupant, such as for the use or occupancy of rooms or other quarters in hotels, boarding houses, or apartment houses furnishing hotel services, or in tourist camps or tourist homes, motor courts, or motels, or for the use of occupancy of space in parking lots, warehouses, or storage garages, does not constitute rent from real property. Generally, services are considered rendered to the occupant if they are primarily for his convenience and are other than those usually or customarily rendered in connection with the rental of rooms or other space for occupancy only. The supplying of maid service, for example, constitutes such service; whereas the furnishing of heat and light, the cleaning of public entrances, exits, stairways, and lobbies, the collection of trash, etc., are not considered as services rendered to the occupant. Payments for the use or occupancy of entire private residences or living quarters in duplex or multiple housing units, of offices in any office building, etc., are generally treated as rent from real property.

(d)(1) **Gains and losses from the sale, etc. of property.** There shall also be excluded from the computation of unrelated business taxable income gains or losses from the sale, exchange, or other disposition of property other than (i) stock in trade or other property of a kind which would properly be included in the inventory of the organization if on hand at the close of the taxable year, or (ii) property held primarily for sale to customers in the ordinary course of the trade or business. This exclusion does not apply with respect to the cutting of timber which is considered, upon the application of section 631(a), as a sale or exchange of such timber. In addition, for taxable years beginning after December 31, 1969, this exclusion does not apply to the gain derived from the sale or other disposition of debt-financed property (as defined in section 514(b)). Otherwise, the exclusion under section 512(b)(5) applies with respect to gains and losses from involuntary conversions, casualties, etc.

(2) There shall be excluded from the computation of unrelated business taxable income any gain from the lapse or termination after December 31, 1975, of options to buy or sell securities (as that term is defined in section 1236(c)). An option is considered terminated when the organization's obligation under the option ceases by any means other than by reason of the exercise or lapse of such option. If the exclusion is otherwise available it will apply whether or not the organization owns the securities upon which the option is written, that is, whether or not the option is "covered." However, income from the lapse or termination of an option is excludable only if the option is written in connection with the organization's investment activities. Thus, for example, if the securities upon which the options are written are held by the organization as inventory or for sale to customers in the ordinary course of a trade or business, the income from the lapse or termination will not be excludable under the provisions of this paragraph. Similarly, if an organization is engaged in the trade or business of writing options (whether or not such options are covered) the exclusion will not be available.

(e) **Net operating losses.** (1) The net operating loss deduction provided in section 172 shall be allowed in computing unrelated business taxable income. However, the net operating loss carryback or carryover (from a taxable year for which the taxpayer is subject to the provisions of section 511) shall be determined under section 172 without taking into account any amount of income or deduction which is not included under section 511 in computing unrelated business taxable income. For example, a loss attributable to an unrelated trade or business shall not be diminished by reason of the receipt of dividend income.

(2) For the purpose of computing the net operating loss deduction provided by section 172, any prior taxable year for which an organization was not subject to the provisions of section 511, or a corresponding provision of prior law, shall not be taken into account. Thus, if the organization was not subject to the provisions of section 511 or Supplement U of the Internal Revenue Code of 1939 for a preceding taxable year, the net operating loss is not a carryback to such preceding taxable year, and the net operating loss carryover to succeeding taxable years is not reduced by the taxable income for such preceding taxable year.

(3) A net operating loss carryback or carryover shall be allowed only from a taxable year for which the taxpayer is subject to the provisions of section 511, or a corresponding provision of prior law.

(4) In determining the span of years for which a net operating loss may be carried for purposes of section 172, taxable years in which an organization was not subject to the provisions of section 511 or a corresponding provision of prior law shall be taken into account. Thus, for example, if an organization is subject to the provisions of section 511 for the taxable year 1955 and has a net

operating loss for that year, the last taxable year to which any part thereof may be carried over is the year 1960 regardless of whether the organization is subject to the provisions of section 511 in any of the intervening taxable years.

(f) Research. (1) Income derived from research for the United States or any of its agencies or instrumentalities or a State or political subdivision thereof, and all deductions directly connected with such income, shall be excluded in computing unrelated business taxable income.

(2) In the case of a college, university, or hospital, all income derived from research performed for any person and all deductions directly connected with such income, shall be excluded in computing unrelated business taxable income.

(3) In the case of an organization operated primarily for the purpose of carrying on fundamental research (as distinguished from applied research) the results of which are freely available to the general public, all income derived from research performed for any person and all deductions directly connected with such income shall be excluded in computing unrelated business taxable income.

(4) For the purpose of §§ 1.512(a)–1, 1.512(a)–2, and this section, the term "research" does not include activities of a type ordinarily carried on as an incident to commercial or industrial operations, for example, the ordinary testing or inspection of materials or products or the designing or construction of equipment, buildings, etc. The term "fundamental research" does not include research carried on for the primary purpose of commercial or industrial application.

(g) Charitable, etc., contributions. (1) In computing the unrelated business taxable income of an organization described in section 511(a)(2) the deduction from gross income allowed by section 170 (relating to charitable contributions and gifts) shall be allowed, whether or not the contribution is directly connected with the carrying on of the trade or business. Section 512(b)(10) provides that this deduction shall not exceed 5 percent of the organization's unrelated business taxable income computed without regard to that deduction. The provisions of section 170(b)(2) are not applicable to contributions by the organizations described in section 511(a)(2).

(2) In computing the unrelated business taxable income of a trust described in section 511(b)(2), the deduction allowed by section 170 (relating to charitable contributions and gifts) shall be allowed whether or not the contribution is directly connected with the carrying on of the trade or business. The deduction is limited as provided in section 170(b)(1)(A) and (B), except that the amounts so allowed are determined on the basis of unrelated business taxable income computed without regard to this deduction (rather than on the basis of adjusted gross income). For purposes of this deduction, a distribution by a trust described in section 511(b)(2) made pursuant to the trust instrument to a beneficiary described in section 170 shall be treated in the same manner as gifts or contributions.

(3) The contribution, whether made by a trust or other exempt organization, must be paid to another organization to be allowable. For example, a university described in section 501(c)(3) which is exempt from tax and which operates an unrelated business, shall be allowed a deduction, not in excess of 5 percent of its unrelated business taxable income, for gifts or contributions to another university described in section 501(c)(3) for educational work but shall not be allowed any deduction for amounts expended in administering its own educational program.

(h) Specific deduction—(1) In general. In computing unrelated business taxable income a specific deduction from gross income of $1,000 is allowed. However, for taxable years beginning after December 31, 1969, such specific deduction is not allowed in computing the net operating loss under section 172 and paragraph (6) of section 512(b).

(2) Special rule for a diocese, province of a religious order, or a convention or association of churches. (i) In the case of a diocese, province of a religious order, or a convention or association of churches, there shall be allowed with respect to each parish, individual church, district, or other local unit a specific deduction equal to the lower of $1,000 or the gross income derived from an unrelated trade or business regularly conducted by such local unit. However, a diocese, province of a religious order, or a convention or association of churches shall not be entitled to a specific deduction for a local unit which, for a taxable year, files a separate return. In the case of a local unit which, for a taxable year, files a separate return, such local unit may claim a specific deduction equal to the lower of $1,000 or the gross income derived from any unrelated trade or business which it regularly conducts.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. X is an association of churches on the calendar year basis. X is divided into local units A, B, C, and D. During 1973, A, B, C, and D derive gross income of, respectively, $1,200, $800, $1,500, and $700 from unrelated businesses which they regularly conduct. Furthermore, for such taxable year, D files a separate return. X may claim a specific deduction of $1,000 with respect to A, $800 with respect to B, and $1,000 with respect to C. X may not claim a specific deduction with respect to D. D, however, may claim a specific deduction of $700 on its return.

(i) **Transitional period for churches.** (1)(i) In the case of an unrelated trade or business (as defined in section 513) carried on before May 27, 1969, by a church or convention or association of churches (as defined in § 1.511–2(a)(3)(ii)), or by the predecessor of a church or convention or association of churches which predecessor was itself a church or convention or association of churches, all gross income derived from such unrelated trade or business and all deductions directly connected with the carrying on of such unrelated trade or business shall be excluded from the determination of unrelated business taxable income under section 512(a) for all taxable years beginning before January 1, 1976. Notwithstanding the preceding sentence, in the case of income from debt-financed property (and the deductions attributable thereto), as defined in section 514, of a church or convention or association of churches or by the predecessor of a church or convention or association of churches, the provisions of paragraphs (a) through (e) of section 514 and paragraph (4) of section 512(b) shall apply for taxable years beginning after December 31, 1969.

(ii) The provisions of subdivision (i) may be illustrated by the following example:

Example. X, a church as defined in § 1.511–2(a)(3)(ii), realizes gross income from an unrelated business (as defined in section 513) of $100,000 for calendar year 1972. X's predecessor church, Y, began conducting such unrelated business in January 1, 1968. Of the $100,000 realized for calendar year 1972, $40,000 is attributable to debt-financed property (as defined in section 514). Since the unrelated business was conducted by Y prior to May 27, 1969, and since X's taxable year begins before January 1, 1976, that amount of the income realized from such business (and all deductions directly connected therewith) which is not attributable to debt-financed property shall be excluded from the determination of unrelated business taxable income under section 512(a). Therefore, of the $100,000 realized, $60,000 ($100,000 less $40,000 attributable to debt-financed property), and all deductions directly connected therewith shall be excluded from the determination of such unrelated business taxable income for purposes of imposition of the tax under section 511(a). The remaining $40,000 and the deductions attributable thereto shall be subject to the provisions of paragraphs (a) through (e) of section 514 and paragraph (4) of section 512(b).

(2) This paragraph shall not apply in the case of income from property, or deductions directly connected with such income, if title to the property is held by a corporation described in section 501(c)(2) for a church or convention or association of churches. Thus, if such income is derived from an unrelated trade or business, the corporation shall be liable for tax imposed by section 511(a) on such income.

(j) **Special rule for certain unrelated trades or businesses carried on by a religious order or by an educational institution maintained by such order.** (1) Except as provided in subparagraph (2) of this paragraph, gross income realized by a religious order (or an educational organization described in section 170(b)(1)(A)(ii) maintained by such order) from an unrelated trade or business, together with all deductions directly connected therewith, shall be excluded from the determination of unrelated business taxable income under section 512(a), if—

(i) The trade or business has been operated by such order or by such institution since before May 27, 1959,

(ii) The trade or business consists of providing services under a license issued by a Federal regulatory agency,

(iii) More than 90 percent of the net income from the business is, for each taxable year for which gross income from such business is so excluded by reason of section 512(b)(15) and this paragraph, devoted to religious, charitable, or educational purposes, and

(iv) It is established to the satisfaction of an officer no lower than the Regional Commissioner that the rates or other charges for such services are fully competitive with rates or other charges charged for such services by persons not exempt from taxation. Rates or other charges for such services shall be considered as fully competitive with rates or other charges charged for such services by persons not exempt from taxation if the rates charged by such unrelated trade or business are neither materially higher nor materially lower than the rates charged by similar businesses operating in the same general area.

(2) The provisions of this paragraph shall not apply with respect to income from debt-financed property (as defined in section 514) and the deductions attributable thereto. For taxable years beginning after December 31, 1969, such income and deductions are subject to the provisions of paragraphs (a) through (e) of section 514 and paragraph (4) of section 512(b).

(k) **Income and deductions from debt-financed property.** For taxable years beginning after December 31, 1969, in the case of debt-financed

property (as defined in section 514(b)), there shall be included in the unrelated business taxable income of an exempt organization, as an item of gross income derived from an unrelated trade or business, the amount of unrelated debt-financed income determined under section 514(a)(1) and § 1.514(a)–1(a), and there shall be allowed, as a deduction with respect to such income, the amount determined under section 514(a)(2) and § 1.514(a)–1(b).

***(l)* Interest, annuities, royalties, and rents from controlled organizations—(1) In general.** For taxable years beginning after December 31, 1969, if an exempt organization (hereinafter referred to as the "controlling organization") has control (as defined in subparagraph (4) of this paragraph) of another organization (hereinafter referred to as the "controlled organization"), the controlling organization shall include as an item of gross income in computing its unrelated business taxable income, the amount of interest, annuities, royalties, and rents derived from the controlled organization determined under subparagraph (2) or (3) of this paragraph. The preceding sentence shall apply whether or not the activity conducted by the controlling organization to derive such amounts represents a trade or business or is regularly carried on. Thus, amounts received by a controlling organization from the rental of its real property to a controlled organization may be included in the unrelated business taxable income of the controlling organization, even though the rental of such property is not an activity regularly carried on by the controlling organization.

(2) Exempt controlled organization—(i) In general. If the controlled organization is exempt from taxation under section 501(a), the amount referred to in subparagraph (1) of this paragraph is an amount which bears the same ratio to the interest, annuities, royalties, and rents received by the controlling organization from the controlled organization as the unrelated business taxable income of the controlled organization bears to whichever of the following amounts is the greater—

(a) The taxable income of the controlled organization, computed as though the controlled organization were not exempt from taxation under section 501(a), or

(b) The unrelated business taxable income of the controlled organization, both determined without regard to any amounts paid directly or indirectly to the controlling organization. The controlling organization shall be allowed all deductions directly connected with amounts included in gross income under the preceding sentence.

(ii) Examples. This subparagraph may be illustrated by the following examples:

Example (1). A, an exempt scientific organization described in section 501(c)(3), owns all the stock of B, another exempt scientific organization described in section 501(c)(3). During 1971, A rents space for a laboratory to B for $15,000 a year. A's total deductions for 1971 with respect to the leased property are $3,000: $1,000 for maintenance and $2,000 for depreciation. If B were not an exempt organization, its total taxable income would be $300,000, disregarding rent paid to A. B's unrelated business taxable income, disregarding rent paid to A, is $100,000. Under these circumstances, $4,000 of the rent paid by B will be included by A as net rental income in determining its unrelated business taxable income, computed as follows:

B's unrelated business taxable income (disregarding rent paid to A)	$100,000
B's taxable income (computed as though B were not exempt and disregarding rent paid to A)	300,000
Ratio ($100,000/$300,000)	⅓
Total rent	15,000
Total deductions	3,000
Rental income treated as gross income from an unrelated trade or business (⅓ of $15,000)	5,000
Less deductions directly connected with such income (⅓ of $3,000)	1,000
Net rental income included by A in computing its unrelated business taxable income	$4,000

Example (2). Assume the facts as stated in example (1), except that B's taxable income is $90,000 (computed as though B were not an exempt organization, and disregarding rents paid to A). B's unrelated business taxable income ($100,000) is therefore greater than its taxable income ($90,000). Thus, the ratio used to determine the portion of rent received by A which is to be taken into account is one since both the numerator and denominator of such ratio is B's unrelated business taxable income. Consequently, all the rent received by A from B ($15,000), and all the deductions directly connected therewith ($3,000), are included by A in computing its unrelated business taxable income.

(3) Nonexempt controlled organization—(i) In general. If the controlled organization is not exempt from taxation under section 501(a), the amount referred to in subparagraph (1) of this paragraph is an amount which bears the same ratio to the interest, annuities, royalties, and rents received by the controlling organization from the controlled organization as the "excess taxable income" (as defined in subdivision (ii) of this subparagraph) of the controlled organization bears to whichever of the following amounts is the greater—

(a) The taxable income of the controlled organization, or

(b) The excess taxable income of the controlled organization,

both determined without regard to any amount paid directly or indirectly to the controlling organization. The controlling organization shall be allowed all deductions which are directly connected with amounts included in gross income under the preceding sentence.

(ii) Excess taxable income. For purposes of this paragraph, the term "excess taxable income" means the excess of the controlled organization's taxable income over the amount of such taxable income which, if derived directly by the controlling organization, would not be unrelated business taxable income.

(iii) Examples. This subparagraph may be illustrated by the following examples:

Example (1). A, an exempt university described in section 501(c)(3), owns all the stock of M, a nonexempt organization. During 1971, M leases a factory and a dormitory from A for a total annual rent of $100,000. During the taxable year, M has $500,000 of taxable income, disregarding the rent paid to A: $150,000 from a dormitory for students of A university, and $350,000 from the operation of a factory which is a business unrelated to A's exempt purpose. A's deductions for 1971 with respect to the leased property are $4,000 for the dormitory and $16,000 for the factory. Under these circumstances, $56,000 of the rent paid by M will be included by A as net rental income in determining its unrelated business taxable income, computed as follows:

M's taxable income (disregarding rent paid to A)	$500,000
Less taxable income from dormitory	150,000
Excess taxable income	$350,000
Ratio ($350,000/$500,000)	7/10
Total rent paid to A	$100,000
Total deductions ($4,000 + $16,000)	20,000
Rental income treated as gross income from an unrelated trade or business (7/10 of $100,000)	70,000
Less deductions directly connected with such income (7/10 of $20,000)	14,000
Net rental income included by A in computing its unrelated business taxable income	$56,000

Example (2). Assume the facts as stated in example (1), except that M's taxable income (disregarding rent paid to A) is $300,000, consisting of $350,000 from the operation of the factory and a $50,000 loss from the operation of the dormitory. Thus, M's "excess taxable income" is also $300,000, since none of M's taxable income would be excluded from the computation of A's unrelated business taxable income if received directly by A. The ratio of M's "excess taxable income" to its taxable income is therefore one ($300,000/$300,000). Thus, all the rent received by A from M ($100,000), and all the deductions directly connected therewith ($20,000), are included in the computation of A's unrelated business taxable income.

(4) Control—(i) In general. For purposes of this paragraph—

(a) Stock corporation. In the case of an organization which is a stock corporation, the term "control" means ownership by an exempt organization of stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of such corporation.

(b) Nonstock organization. In the case of a nonstock organization, the term "control" means that at least 80 percent of the directors or trustees of such organization are either representatives of or directly or indirectly controlled by an exempt organization. A trustee or director is a representative of an exempt organization if he is a trustee, director, agent, or employee of such exempt organization. A trustee or director is controlled by an exempt organization if such organization has the power to remove such trustee or director and designate a new trustee or director.

(ii) Gain or loss of control. If control of an organization (as defined in subdivision (i) of this subparagraph) is acquired or relinquished during the taxable year, only the interest, annuities, royalties, and rents paid or accrued to the controlling organization in accordance with its method of accounting for that portion of the taxable year it has control shall be subject to the tax on unrelated business income.

(5) Amounts taxable under other provisions of the Code—(i) In general. Except as provided in subdivision (ii) of this subparagraph, section 512(b)(13) and this paragraph do not apply to amounts which are included in the computation of unrelated business taxable income by operation of any other provision of the Code. However, amounts which are not included in unrelated business taxable income by operation of section 512(a)(1), or which are excluded by operation of section 512(b)(1), (2), or (3), may be included in unrelated business taxable income by operation of section 512(b)(13) and this paragraph.

(ii) Debt-financed property. Rents deprived from the lease of debt-financed property by a controlling organization to a controlled organization are subject to the rules contained in section 512(b)(13) and this paragraph. Thus, if a controlling organization leases debt-financed property to a controlled organization, the amount of rents includible in the controlling organization's unrelated business taxable income shall first be determined under section 512(b)(13) and this paragraph, and only the portion of such rents not taken into account by operation of section 512(b)(13) are taken into account by operation of section 514. See example (3) of § 1.514(b)-1(b)(3).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6939, 32 FR 17661, Dec. 12, 1967; T.D. 7177, 37 FR 7089, April 8, 1972; T.D. 7183, 37 FR 7885, April 21, 1972; T.D. 7229, 37 FR 28142, Dec. 21, 1972; T.D. 7261, 38 FR 5466, March 1, 1973; 38 FR 6387, March 9, 1973; T.D. 7632, 44 FR 42681, July 20, 1979; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.512(c)–1 Special rules applicable to partnerships; in general.

In the event an organization to which section 511 applies is a member of a partnership regularly engaged in a trade or business which is an unrelated trade or business with respect to such organization, the organization shall include in computing its unrelated business taxable income so much of its share (whether or not distributed) of the partnership gross income as is derived from that unrelated business and its share of the deductions attributable thereto. For this purpose, both the gross income and the deductions shall be computed with the necessary adjustments for the exceptions, additions, and limitations referred to in section 512(b) and in § 1.512(b)–1. For example, if an exempt educational institution is a partner in a partnership which operates a factory and if such partnership also holds stock in a corporation, the exempt organization shall include in computing its unrelated business taxable income its share of the gross income from the operation of the factory, but not its share of any dividends received by the partnership from the corporation. If the taxable year of the organization differs from that of the partnership, the amounts included or deducted in computing unrelated business taxable income shall be based upon the income and deductions of the partnership for each taxable year of the partnership ending within or with the taxable year of the organization.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.513–1 Definition of unrelated trade or business.

(a) In general. As used in section 512 the term "unrelated business taxable income" means the gross income derived by an organization from any unrelated trade or business regularly carried on by it, less the deductions and subject to the modifications provided in section 512. Section 513 specifies with certain exceptions that the phrase "unrelated trade or business" means, in the case of an organization subject to the tax imposed by section 511, any trade or business the conduct of which is not substantially related (aside from the need of such organization for income or funds or the use it makes of the profits derived) to the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501 (or, in the case of an organization described in section 511(a)(2)(B), to the exercise or performance of any purpose or function described in section 501(c)(3)). (For certain exceptions from this definition, see paragraph (e) of this section. For a special definition of "unrelated trade or business" applicable to certain trusts, see section 513(b).) Therefore, unless one of the specific exceptions of section 512 or 513 is applicable, gross income of an exempt organization subject to the tax imposed by section 511 is includible in the computation of unrelated business taxable income if: (1) It is income from trade or business; (2) such trade or business is regularly carried on by the organization; and (3) the conduct of such trade or business is not substantially related (other than through the production of funds) to the organization's performance of its exempt functions.

(b) Trade or business. The primary objective of adoption of the unrelated business income tax was to eliminate a source of unfair competition by placing the unrelated business activities of certain exempt organizations upon the same tax basis as the nonexempt business endeavors with which they compete. On the other hand, where an activity does not possess the characteristics of a trade or business within the meaning of section 162, such as when an organization sends out low-cost articles incidental to the solicitation of charitable contributions, the unrelated business income tax does not apply since the organization is not in competition with taxable organizations. However, in general, any activity of a section 511 organization which is carried on for the production of income and which otherwise possesses the characteristics required to constitute "trade or business" within the meaning of section 162—and which, in addition, is not substantially related to the performance of exempt functions—presents sufficient likelihood of unfair competition to be within the policy of the tax. Accordingly, for purposes of section 513 the term "trade or business" has the same meaning it has in section 162, and generally includes any activity carried on for the production of income from the sale of goods or performance of services. Thus, the term "trade or business" in section 513 is not limited to integrated aggregates of assets, activities and good will which comprise businesses for the purposes of certain other provisions of the Internal Revenue Code. Activities of producing or distributing goods or performing services from which a particular amount of gross income is derived do not lose identity as trade or business merely because they are carried on within a larger aggregate of similar activities or within a larger complex of other endeavors which may, or may not, be related to the exempt purposes of the organization. Thus, for example, the regular sale of pharmaceutical supplies to the general public by a hospital pharmacy does not lose identity as trade or business

merely because the pharmacy also furnishes supplies to the hospital and patients of the hospital in accordance with its exempt purposes or in compliance with the terms of section 513(a)(2). Similarly, activities of soliciting, selling, and publishing commercial advertising do not lose identity as a trade or business even though the advertising is published in an exempt organization periodical which contains editorial matter related to the exempt purposes of the organization. However, where an activity carried on for the production of income constitutes an unrelated trade or business, no part of such trade or business shall be excluded from such classification merely because it does not result in profit.

(c) **Regularly carried on—(1) General principles.** In determining whether trade or business from which a particular amount of gross income derives is "regularly carried on," within the meaning of section 512, regard must be had to the frequency and continuity with which the activities productive of the income are conducted and the manner in which they are pursued. This requirement must be applied in light of the purpose of the unrelated business income tax to place exempt organization business activities upon the same tax basis as the nonexempt business endeavors with which they compete. Hence, for example, specific business activities of an exempt organization will ordinarily be deemed to be "regularly carried on" if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.

(2) **Application of principles in certain cases—(i) Normal time span of activities.** Where income producing activities are of a kind normally conducted by nonexempt commercial organizations on a year-round basis, the conduct of such activities by an exempt organization over a period of only a few weeks does not constitute the regular carrying on of trade or business. For example, the operation of a sandwich stand by a hospital auxiliary for only 2 weeks at a state fair would not be the regular conduct of trade or business. However, the conduct of year-round business activities for one day each week would constitute the regular carrying on of trade or business. Thus, the operation of a commercial parking lot on Saturday of each week would be the regular conduct of trade or business. Where income producing activities are of a kind normally undertaken by nonexempt commercial organizations only on a seasonal basis, the conduct of such activities by an exempt organization during a significant portion of the season ordinarily constitutes the regular conduct of trade or business. For example, the operation of a track for horse racing for several weeks of a year would be considered the regular conduct of trade or business because it is usual to carry on such trade or business only during a particular season.

(ii) **Intermittent activities; in general.** In determining whether or not intermittently conducted activities are regularly carried on, the manner of conduct of the activities must be compared with the manner in which commercial activities are normally pursued by nonexempt organizations. In general, exempt organization business activities which are engaged in only discontinuously or periodically will not be considered regularly carried on if they are conducted without the competitive and promotional efforts typical of commercial endeavors. For example, the publication of advertising in programs for sports events or music or drama performances will not ordinarily be deemed to be the regular carrying on of business. Similarly, where an organization sells certain types of goods or services to a particular class of persons in pursuance of its exempt functions or "primarily for the convenience" of such persons within the meaning of section 513(a)(2) (as, for example, the sale of books by a college bookstore to students or the sale of pharmaceutical supplies by a hospital pharmacy to patients of the hospital), casual sales in the course of such activity which do not qualify as related to the exempt function involved or as described in section 513(a)(2) will not be treated as regular. On the other hand, where the nonqualifying sales are not merely casual, but are systematically and consistently promoted and carried on by the organization, they meet the section 512 requirement of regularity.

(iii) **Intermittent activities; special rule in certain cases of infrequent conduct.** Certain intermittent income producing activities occur so infrequently that neither their recurrence nor the manner of their conduct will cause them to be regarded as trade or business regularly carried on. For example, income producing or fund raising activities lasting only a short period of time will not ordinarily be treated as regularly carried on if they recur only occasionally or sporadically. Furthermore, such activities will not be regarded as regularly carried on merely because they are conducted on an annually recurrent basis. Accordingly, income derived from the conduct of an annual dance or similar fund raising event for charity would not be income from trade or business regularly carried on.

(d) Substantially related—(1) In general. Gross income derives from "unrelated trade or business," within the meaning of section 513(a), if the conduct of the trade or business which produces the income is not substantially related (other than through the production of funds) to the purposes for which exemption is granted. The presence of this requirement necessitates an examination of the relationship between the business activities which generate the particular income in question—the activities, that is, of producing or distributing the goods or performing the services involved—and the accomplishment of the organization's exempt purposes.

(2) Type of relationship required. Trade or business is "related" to exempt purposes, in the relevant sense, only where the conduct of the business activities has causal relationship to the achievement of exempt purposes (other than through the production of income); and it is "substantially related," for purposes of section 513, only if the causal relationship is a substantial one. Thus, for the conduct of trade or business from which a particular amount of gross income is derived to be substantially related to purposes for which exemption is granted, the production or distribution of the goods or the performance of the services from which the gross income is derived must contribute importantly to the accomplishment of those purposes. Where the production or distribution of the goods or the performance of the services does not contribute importantly to the accomplishment of the exempt purposes of an organization, the income from the sale of the goods or the performance of the services does not derive from the conduct of related trade or business. Whether activities productive of gross income contribute importantly to the accomplishment of any purpose for which an organization is granted exemption depends in each case upon the facts and circumstances involved.

(3) Size and extent of activities. In determining whether activities contribute importantly to the accomplishment of an exempt purpose, the size and extent of the activities involved must be considered in relation to the nature and extent of the exempt function which they purport to serve. Thus, where income is realized by an exempt organization from activities which are in part related to the performance of its exempt functions, but which are conducted on a larger scale than is reasonably necessary for performance of such functions, the gross income attributable to that portion of the activities in excess of the needs of exempt functions constitutes gross income from the conduct of unrelated trade or business. Such income is not derived from the production or distribution of goods or the performance of services which contribute importantly to the accomplishment of any exempt purpose of the organization.

(4) Application of principles—(i) Income from performance of exempt functions. Gross income derived from charges for the performance of exempt functions does not constitute gross income from the conduct of unrelated trade or business. The following examples illustrate the application of this principle:

Example (1). M, an organization described in section 501(c)(3), operates a school for training children in the performing arts, such as acting, singing, and dancing. It presents performances by its students and derives gross income from admission charges for the performances. The students' participation in performances before audiences is an essential part of their training. Since the income realized from the performances derives from activities which contribute importantly to the accomplishment of M's exempt purposes, it does not constitute gross income from unrelated trade or business. (For specific exclusion applicable in certain cases of contributed services, see section 513(a)(1) and paragraph (e)(1) of this section.)

Example (2). N is a trade union qualified for exemption under section 501(c)(5). To improve the trade skills of its members, N conducts refresher training courses and supplies handbooks and technical manuals. N receives payments from its members for these services and materials. However, the development and improvement of the skills of its members is one of the purposes for which exemption is granted N; and the activities described contribute importantly to that purpose. Therefore, the income derived from these activities does not constitute gross income from unrelated trade or business.

Example (3). O is an industry trade association qualified for exemption under section 501(c)(6). It presents a trade show in which members of its industry join in an exhibition of industry products. O derives income from charges made to exhibitors for exhibit space and admission fees charged patrons or viewers of the show. The show is not a sales facility for individual exhibitors; its purpose is the promotion and stimulation of interest in, and demand for, the industry's products in general, and it is conducted in a manner reasonably calculated to achieve that purpose. The stimulation of demand for the industry's products in general is one of the purposes for which exemption is granted O. Consequently, the activities productive of O's gross income from the show—that is, the promotion, organization and conduct of the exhibition—contribute importantly to the achievement of an exempt purpose, and the income does not constitute gross income from unrelated trade or business. See also section 513(d) and regulations thereunder regarding sales activity.

(ii) Disposition of product of exempt functions. Ordinarily, gross income from the sale of products which result from the performance of exempt functions does not constitute gross income from the conduct of unrelated trade or business if the product is sold in substantially the same state it is in on completion of the exempt functions. Thus, in the case of an organization described in section 501(c)(3) and engaged in a program of rehabilita-

tion of handicapped persons, income from sale of articles made by such persons as a part of their rehabilitation training would not be gross income from conduct of unrelated trade or business. The income in such case would be from sale of products, the production of which contributed importantly to the accomplishment of purposes for which exemption is granted the organization—namely, rehabilitation of the handicapped. On the other hand, if a product resulting from an exempt function is utilized or exploited in further business endeavor beyond that reasonably appropriate or necessary for disposition in the state it is in upon completion of exempt functions, the gross income derived therefrom would be from conduct of unrelated trade or business. Thus, in the case of an experimental dairy herd maintained for scientific purposes by a research organization described in section 501(c)(3), income from sale of milk and cream produced in the ordinary course of operation of the project would not be gross income from conduct of unrelated trade or business. On the other hand, if the organization were to utilize the milk and cream in the further manufacture of food items such as ice cream, pastries, etc., the gross income from the sale of such products would be from the conduct of unrelated trade or business unless the manufacturing activities themselves contribute importantly to the accomplishment of an exempt purpose of the organization.

(iii) **Dual use of assets or facilities.** In certain cases, an asset or facility necessary to the conduct of exempt functions may also be employed in a commercial endeavor. In such cases, the mere fact of the use of the asset or facility in exempt functions does not, by itself, make the income from the commercial endeavor gross income from related trade or business. The test, instead, is whether the activities productive of the income in question contribute importantly to the accomplishment of exempt purposes. Assume, for example, that a museum exempt under section 501(c)(3) has a theater auditorium which is specially designed and equipped for showing of educational films in connection with its program of public education in the arts and sciences. The theater is a principal feature of the museum and is in continuous operation during the hours the museum is open to the public. If the organization were to operate the theater as an ordinary motion picture theater for public entertainment during the evening hours when the museum was closed, gross income from such operation would be gross income from conduct of unrelated trade or business.

(iv) **Exploitation of exempt functions.** In certain cases, activities carried on by an organization in the performance of exempt functions may generate good will or other intangibles which are capable of being exploited in commercial endeavors. Where an organization exploits such an intangible in commercial activities, the mere fact that the resultant income depends in part upon an exempt function of the organization does not make it gross income from related trade or business. In such cases, unless the commercial activities themselves contribute importantly to the accomplishment of an exempt purpose, the income which they produce is gross income from the conduct of unrelated trade or business. The application of this subdivision is illustrated in the following examples:

Example (1). U, an exempt scientific organization, enjoys an excellent reputation in the field of biological research. It exploits this reputation regularly by selling endorsements of various items of laboratory equipment to manufacturers. The endorsing of laboratory equipment does not contribute importantly to the accomplishment of any purpose for which exemption is granted U. Accordingly, the income derived from the sale of endorsements is gross income from unrelated trade or business.

Example (2). V, an exempt university, has a regular faculty and a regularly enrolled student body. During the school year, V sponsors the appearance of professional theater companies and symphony orchestras which present drama and musical performances for the students and faculty members. Members of the general public are also admitted. V advertises these performances and supervises advance ticket sales at various places, including such university facilities as the cafeteria and the university bookstore. V derives gross income from the conduct of the performances. However, while the presentation of the performances makes use of an intangible generated by V's exempt educational functions—the presence of the student body and faculty—the presentation of such drama and music events contributes importantly to the overall educational and cultural function of the university. Therefore, the income which V receives does not constitute gross income from the conduct of unrelated trade or business.

Example (3). W is an exempt business league with a large membership. Under an arrangement with an advertising agency, W regularly mails brochures, pamphlets and other commercial advertising materials to its members, for which service W charges the agency an agreed amount per enclosure. The distribution of the advertising materials does not contribute importantly to the accomplishment of any purpose for which W is granted exemption. Accordingly, the payments made to W by the advertising agency constitute gross income from unrelated trade or business.

Example (4). X, an exempt organization for the advancement of public interest in classical music, owns a radio station and operates it in a manner which contributes importantly to the accomplishment of the purposes for which the organization is granted exemption. However, in the course of the operation of the station the organization derives gross income from the regular sale of advertising time and services to commercial advertisers in the manner of an ordinary commercial station. Neither the sale of such time nor the performance of such services contributes importantly to the accomplishment of any purpose for which the organization is granted exemption. Notwithstanding the fact that the production of the advertising

income depends upon the existence of the listening audience resulting from performance of exempt functions, such income is gross income from unrelated trade or business.

Example (5). Y, an exempt university, provides facilities, instruction and faculty supervision for a campus newspaper operated by its students. In addition to news items and editorial commentary, the newspaper publishes paid advertising. The solicitation, sale, and publication of the advertising are conducted by students, under the supervision and instruction of the university. Although the services rendered to advertisers are of a commercial character, the advertising business contributes importantly to the university's educational program through the training of the students involved. Hence, none of the income derived from publication of the newspaper constitutes gross income from unrelated trade or business. The same result would follow even though the newspaper is published by a separately incorporated section 501(c)(3) organization, qualified under the university rules for recognition of student activities, and even though such organization utilizes its own facilities and is independent of faculty supervision, but carries out its educational purposes by means of student instruction of other students in the editorial and advertising activities and student participation in those activities.

Example (6). Z is an association exempt under section 501(c)(6), formed to advance the interests of a particular profession and drawing its membership from the members of that profession. Z publishes a monthly journal containing articles and other editorial material which contribute importantly to the accomplishment of purposes for which exemption is granted the organization. Income from the sale of subscriptions to members and others in accordance with the organization's exempt purposes, therefore, does not constitute gross income from unrelated trade or business. In connection with the publication of the journal, Z also derives income from the regular sale of space and services for general consumer advertising, including advertising of such products as soft drinks, automobiles, articles of apparel, and home appliances. Neither the publication of such advertisements nor the performance of services for such commercial advertisers contributes importantly to the accomplishment of any purpose for which exemption is granted. Therefore, notwithstanding the fact that the production of income from advertising utilizes the circulation developed and maintained in performance of exempt functions, such income is gross income from unrelated trade or business.

Example (7). The facts are as described in the preceding example, except that the advertising in Z's journal promotes only products which are within the general area of professional interest of its members. Following a practice common among taxable magazines which publish advertising, Z requires its advertising to comply with certain general standards of taste, fairness, and accuracy; but within those limits the form, content, and manner of presentation of the advertising messages are governed by the basic objective of the advertisers to promote the sale of the advertised products. While the advertisements contain certain information, the informational function of the advertising is incidental to the controlling aim of stimulating demand for the advertised products and differs in no essential respect from the informational function of any commercial advertising. Like taxable publishers of advertising, Z accepts advertising only from those who are willing to pay its prescribed rates. Although continuing education of its members in matters pertaining to their profession is one of the purposes for which Z is granted exemption, the publication of advertising designed and selected in the manner of ordinary commercial advertising is not an educational activity of the kind contemplated by the exemption statute; it differs fundamentally from such an activity both in its governing objective and in its method. Accordingly, Z's publication of advertising does not contribute importantly to the accomplishment of its exempt purposes; and the income which it derives from advertising constitutes gross income from unrelated trade or business.

(e) **Exceptions.** Section 513(a) specifically states that the term "unrelated trade or business" does not include—

(1) Any trade or business in which substantially all the work in carrying on such trade or business is performed for the organization without compensation; or

(2) Any trade or business carried on by an organization described in section 501(c)(3) or by a governmental college or university described in section 511(a)(2)(B), primarily for the convenience of its members, students, patients, officers, or employees; or, any trade or business carried on by a local association of employees described in section 501(c)(4) organized before May 27, 1969, which consists of the selling by the organization of items of work-related clothes and equipment and items normally sold through vending machines, through food dispensing facilities, or by snack bars, for the convenience of its members at their usual places of employment; or

(3) Any trade or business which consists of selling merchandise, substantially all of which has been received by the organization as gifts or contributions.

An example of the operation of the first of the exceptions mentioned above would be an exempt orphanage operating a retail store and selling to the general public, where substantially all the work in carrying on such business is performed for the organization by volunteers without compensation. An example of the first part of the second exception, relating to an organization described in section 501(c)(3) or a governmental college or university described in section 511(a)(2)(B), would be a laundry operated by a college for the purpose of laundering dormitory linens and the clothing of students. The latter part of the second exception, dealing with certain sales by local employee associations, will not apply to sales of these items at locations other than the usual place of employment of the employees; therefore sales at such other locations will continue to be treated as unrelated trade or business. The third exception applies to so-called "thrift shops" operated by a tax-exempt organization where those desiring to benefit such organization contribute old clothes, books, furniture, et cetera, to be sold to the general public with the proceeds going to the exempt organization.

(f) Special rule respecting publishing businesses prior to 1970. For a special rule for taxable years beginning before January 1, 1970, with respect to publishing businesses carried on by an organization, see section 513(c) of the Code prior to its amendment by section 121(c) of the Tax Reform Act of 1969 (83 Stat. 542).

(g) Effective date. This section is applicable with respect to taxable years beginning after December 12, 1967. However, if a taxpayer wishes to rely on the rules stated in this section for taxable years beginning before December 13, 1967, it may do so.

[T.D. 6939, 32 FR 17657, Dec. 12, 1967; 32 FR 17890, Dec. 14, 1967; 32 FR 17938, Dec. 15, 1967; T.D. 7107, 36 FR 6421, April 3, 1971; T.D. 7392, 40 FR 58642, Dec. 18, 1975; T.D. 7896, 48 FR 23817, May 27, 1983]

§ 1.513–2 Definition of unrelated trade or business applicable to taxable years beginning before December 13, 1967.

(a) In general. (1) As used in section 512(a), the term "unrelated business taxable income" includes only income from an unrelated trade or business regularly carried on, and the term "trade or business" has the same meaning as it has in section 162.

(2) The income of an exempt organization is subject to the tax on unrelated business income only if two conditions are present with respect to such income. The first condition is that the income must be from a trade or business which is regularly carried on by the organization. The second condition is that the trade or business must not be substantially related (aside from the need of the organization for income or funds or the use it makes of the profits derived) to the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501, or in the case of an organization described in section 511(a)(2)(B) (governmental colleges, etc.) to the exercise or performance of any purpose or function described in section 501(c)(3). Whether or not an organization is subject to the tax imposed by section 511 shall be determined by the application of these tests to the particular circumstances involved in each individual case. For certain exceptions from the term "unrelated trade or business," see paragraph (b) of this section.

(3) A trade or business is regularly carried on when the activity is conducted with sufficient consistency to indicate a continuing purpose of the organization to derive some of its income from such activity. An activity may be regularly carried on even though its performance is infrequent or seasonal.

(4) Ordinarily, a trade or business is substantially related to the activities for which an organization is granted exemption if the principal purpose of such trade or business is to further (other than through the production of income) the purpose for which the organization is granted exemption. In the usual case the nature and size of the trade or business must be compared with the nature and extent of the activities for which the organization is granted exemption in order to determine whether the principal purpose of such trade or business is to further (other than through the production of income) the purpose for which the organization is granted exemption. For example, the operation of a wheat farm is substantially related to the exempt activity of an agricultural college if the wheat farm is operated as a part of the educational program of the college, and is not operated on a scale disproportionately large when compared with the educational program of the college. Similarly, a university radio station or press is considered a related trade or business if operated primarily as an integral part of the educational program of the university, but is considered an unrelated trade or business if operated in substantially the same manner as a commercial radio station or publishing house. A trade or business not otherwise related does not become substantially related to an organization's exempt purpose merely because incidental use is made of the trade or business in order to further the exempt purpose. For example, the manufacture and sale of a product by an exempt college would not become substantially related merely because students as part of their educational program perform clerical or bookkeeping functions in the business. In some cases, the business may be substantially related because it is a necessary part of the exempt activity. For example, in the case of an organization described in section 501(c)(3) and engaged in the rehabilitation of handicapped persons, the business of selling articles made by such persons as a part of their rehabilitation training would not be considered an unrelated business since such business is a necessary part of the rehabilitation program.

(5) If an organization receives a payment pursuant to a contract or agreement under which such organization is to perform research which constitutes an unrelated trade or business, the entire amount of such payment is income from an unrelated trade or business. See, however, section 512(b), (7), (8), and (9), relating to the exclusion from unrelated business taxable income of income

derived from research for the United States, or any State, and of income derived from research performed for any person by a college, university, hospital, or organization operated primarily for the purpose of carrying on fundamental research the results of which are freely available to the general public.

(b) Exceptions. Section 513(a) specifically states that the term "unrelated trade or business" does not include—

(1) Any trade or business in which substantially all the work in carrying on such trade or business is performed for the organization without compensation; or

(2) Any trade or business carried on by an organization described in section 501(c)(3) or by a governmental college or university described in section 511(a)(2)(B), primarily for the convenience of its members, students, patients, officers, or employees; or

(3) Any trade or business which consists of selling merchandise, substantially all of which has been received by the organization as gifts or contributions.

An example of the operation of the first of the exceptions mentioned above would be an exempt orphanage operating a retail store and selling to the general public, where substantially all the work in carrying on such business is performed for the organization by volunteers without compensation. An example of the second exception would be a laundry operated by a college for the purpose of laundering dormitory linens and the clothing of students. The third exception applies to so-called "thrift shops" operated by a tax-exempt organization where those desiring to benefit such organization contribute old clothes, books, furniture, etc., to be sold to the general public with the proceeds going to the exempt organization.

(c) Special rules respecting publishing businesses. For a special rule with respect to publishing businesses carried on by an organization, see section 513(c) of the Code prior to its amendment by section 121(c) of the Tax Reform Act of 1969 (83 Stat. 542).

(d) Effective date. Except as provided in paragraph (g) of § 1.513–1, this section is applicable with respect to taxable years beginning before December 13, 1967.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6525, 26 FR 190, Jan. 11, 1961; T.D. 6939, 32 FR 17657, Dec. 12, 1967; T.D. 7392, 40 FR 58643, Dec. 18, 1975; 40 FR 60053, Dec. 31, 1975]

§ 1.513–3 Qualified convention and trade show activity.

(a) Introduction—(1) In general. Section 513(d) and § 1.513–3(b) provide that convention and trade show activities carried on by a qualifying organization in connection with a qualified convention or trade show will not be treated as unrelated trade or business. Consequently, income from qualified convention and trade shown activities, derived by a qualifying organization that sponsors the qualified convention or trade show, will not be subject to the tax imposed by section 511. Section 1.513–3(c) defines qualifying organizations and qualified conventions or trade shows. Section 1.513–3(d) concerns the treatment of income derived from certain activities, including rental of exhibition space at a qualified convention or trade show where sales activity is permitted, and the treatment of supplier exhibits at qualified conventions and trade shows.

(2) Effective date. This section is effective for taxable years beginning after October 4, 1976.

(b) Qualified activities not unrelated. A convention or trade show activity, as defined in section 513(d)(3)(A) and § 1.513–3(c)(4), will not be considered unrelated trade or business if it is conducted by a qualifying organization described in section 513(d)(3)(C) and § 1.513–3(c)(1), in conjunction with a qualified convention or trade show, as defined in section 513(d)(3)(B) and § 1.513–3(c)(2), sponsored by the qualifying organization. Such an activity is a qualified convention or trade show activity. A convention or trade show activity which is conducted by an organization described in section 501(c)(5) or (6), but which otherwise is not so qualified under this section, will be considered unrelated trade or business.

(c) Definitions—(1) Qualifying organization. Under section 513(d)(3)(C), a qualifying organization is one which—

(i) Is described in either section 501(c)(5) or (6), and

(ii) Regularly conducts as one of its substantial exempt purposes a qualified convention or trade show.

(2) Qualified convention or trade show. For purposes of this section, the term "qualified convention or trade show" means a show that meets the following requirements:

(i) It is conducted by a qualifying organization described in section 513(d)(3)(C);

(ii) At least one purpose of the sponsoring organization in conducting the show is the education of its members, or the promotion and stimulation of interest in, and demand for, the products or services of the industry (or segment thereof) of the members of the qualifying organization; and

(iii) The show is designed to achieve that purpose through the character of a significant portion of the exhibits or the character of conferences and seminars held at a convention or meeting.

(3) **Show.** For purposes of this section, the term "show" includes an international, national, state, regional, or local convention, annual meeting or show.

(4) **Convention and trade show activity.** For purposes of this section, convention and trade show activity means any activity of a kind traditionally carried on at shows. It includes, but is not limited to—

(i) Activities designed to attract to the show members of the sponsoring organization, members of an industry in general, and members of the public, to view industry products or services and to stimulate interest in, and demand for such products or services;

(ii) Activities designed to educate persons in the industry about new products or services or about new rules and regulations affecting the industry; and

(iii) Incidental activities, such as furnishing refreshments, of a kind traditionally carried on at such shows.

(d) **Certain activities—(1) Rental of exhibition space.** The rental of display space to exhibitors (including exhibitors who are suppliers) at a qualified trade show or at a qualified convention and trade show will not be considered unrelated trade or business even though the exhibitors who rent the space are permitted to sell or solicit orders.

(2) **Suppliers defined.** For purposes of subparagraph (1), a supplier's exhibit is one in which the exhibitor displays goods or services that are supplied to, rather than by, the members of the qualifying organization in the conduct of such members' own trades or businesses.

(e) **Example.** The provisions of this section may be illustrated by the following examples:

Example 1. X, an organization described in section 501(c)(6), was formed to promote the construction industry. Its membership is made up of manufacturers of heavy construction machinery many of whom own, rent, or lease one or more digital computers produced by various computer manufacturers. X is a qualifying organization under section 513(d)(3)(C) that regularly holds an annual meeting. At this meeting a national industry sales campaign and methods of consumer financing for heavy construction machinery are discussed. In addition, new construction machinery developed for use in the industry is on display with representatives of the various manufacturers present to promote their machinery. Both members and nonmembers attend this portion of the conference. In addition, manufacturers of computers are present to educate X's members. While this aspect of the conference is a supplier exhibit (as defined in paragraph (d) of this section), income earned from such activity by X will not constitute unrelated business taxable income to X because the activity is conducted as part of a qualified trade show described in § 1.513-3(c).

Example 2. Assume the same facts as in Example 1, but the only goods or services displayed are those of suppliers, the computer manufacturers. Selling and order taking are permitted. No member exhibits are maintained. Standing alone, this supplier exhibit (as defined in paragraph (d)(2) of this section) would constitute a supplier show and not a qualified convention or trade show. In this situation, however, the rental of exhibition space to suppliers is not unrelated trade or business. It is conducted by a qualifying organization in conjunction with a qualified convention or trade show. The show (the annual meeting) is a qualified convention or trade show because one of its purposes is the promotion and stimulation of interest in, and demand for, the products or services of the industry through the character of the annual meeting.

Example 3. Y is an organization described in section 501(c)(6). The organization conducts an annual show at which its members exhibit their products and services in order to promote public interest in the line of business. Potential customers are invited to the show, and sales and order taking are permitted. The organization secures the exhibition facility, undertakes the planning and direction of the show, and maintains exhibits designed to promote the line of business in general. The show is a qualified convention or trade show described in paragraph (c)(2) of this section. The provision of exhibition space to individual members is a qualified trade show activity, and is not unrelated trade or business.

Example 4. Z is an organization described in section 501(c)(6) that sponsors an annual show. As the sole activity at the show, suppliers to the members of Z exhibit their products and services for the purpose of stimulating the sale of their products. Selling and order taking are permitted. The show is a supplier show and does not meet the definition of a qualified convention show as it does not satisfy any of the three alternative bases for qualification. First, the show does not stimulate interest in the members' products through the character of product exhibits as the only products exhibited are those of suppliers rather than members. Second, the show does not stimulate interest in members' products through conferences or seminars as no such conferences are held at the show. Third, the show does not meet the definition of a qualified show on the basis of educational activities as the exhibition of suppliers' products is designed primarily to stimulate interest in, and sale of, suppliers' products. Thus, the organization's provision of exhibition space is not a qualified convention or trade show activity. Income derived from rentals of exhibition space to suppliers will be unrelated business taxable income under section 512.

[T.D. 7896, 48 FR 23817, May 27, 1983]

§ 1.513–5 Certain bingo games not unrelated trade or business

(a) In general. Under section 513(f), and subject to the limitations in paragraph (C) of this section, in the case of an organization subject to the tax imposed by section 511, the term "unrelated trade or business" does not include any trade or business that consists of conducting bingo games (as defined in paragraph (d) of this section).

(b) Exception. The provisions of this section shall not apply with respect to any bingo game otherwise excluded from the term "unrelated trade or business" by reason of section 513(a)(1) and § 1.513–1(e)(1) (relating to trades or businesses in which substantially all the work is performed without compensation).

(c) Limitations—(1) Bingo games must be legal. Paragraph (a) of this section shall not apply with respect to any bingo game conducted in violation of State or local law.

(2) No commercial competition. Paragraph (a) of this section shall not apply with respect to any bingo game conducted in a jurisdiction in which bingo games are ordinarily carried out on a commercial basis. Bingo games are "ordinarily carried out on a commercial basis" within a jurisdiction if they are regularly carried on (within the meaning of § 1.513–1(c)) by for-profit organizations in any part of that jurisdiction. Normally, the entire State will constitute the appropriate jurisdiction for determining whether bingo games are ordinarily carried out on a commercial basis. However, if State law permits local jurisdictions to determine whether bingo games may be conducted by for-profit organizations, or if State law limits or confines the conduct of bingo games by for-profit organizations to specific local jurisdictions, then the local jurisdiction will constitute the appropriate jurisdiction for determining whether bingo games are ordinarily carried out on a commercial basis.

(3) Examples. The application of this paragraph is illustrated by the examples that follow. In each example, it is assumed that the bingo games referred to are operated by individuals who are compensated for their services. Accordingly, none of the bingo games would be excluded from the term "unrelated trade or business" under section 513(a)(1).

Example (1). Church Z, a tax-exempt organization, conducts weekly bingo games in State O. State and local laws in State O expressly provide that bingo games may be conducted by tax-exempt organizations. Bingo games are not conducted in State O by any for-profit businesses. Since Z's bingo games are not conducted in violation of State or local law and are not the type of activity ordinarily carried out on a commercial basis in State O, Z's bingo games do not constitute unrelated trade or business.

Example (2). Rescue Squad X, a tax-exempt organization, conducts weekly bingo games in State M. State M has a statutory provision that prohibits all forms of gambling including bingo games. However, that law generally is not enforced by State officials against local charitable organizations such as X that conduct bingo games to raise funds. Since bingo games are illegal under State law, X's bingo games constitute unrelated trade or business regardless of the degree to which the State law is enforced.

Example (3). Veteran's organizations Y and X, both tax-exempt organizations, are organized under the laws of State N. State N has a statutory provision that permits bingo games to be conducted by tax-exempt organizations. In addition, State N permits bingo games to be conducted by for-profit organizations in city S, a resort community located in county R. Several for-profit organizations conduct nightly bingo games in city S. Y conducts weekly bingo games in city S. X conducts weekly bingo games in county R. Since State law confines the conduct of bingo games by for-profit organizations to city S, and since bingo games are regularly carried on there by those organizations, Y's bingo games conducted in city S constitute unrelated trade or business. However, X's bingo games conducted in county R outside of city S do not constitute unrelated trade or business.

(d) Bingo game defined. A bingo game is a game of chance played with cards that are generally printed with five rows of five squares each. Participants place markers over randomly called numbers on the cards in an attempt to form a preselected pattern such as a horizontal, vertical, or diagonal line, or all four corners. The first participant to form the preselected pattern wins the game. As used in this section, the term "bingo game" means any game of bingo of the type described above in which wagers are placed, winners are determined, and prizes or other property is distributed in the presence of all persons placing wagers in that game. The term "bingo game" does not refer to any game of chance (including, but not limited to, keno games, dice games, card games, and lotteries) other than the type of game described in this paragraph.

(e) Effective date. Section 513(f) and this section apply to taxable years beginning after December 31, 1969.

[T.D. 7699, 45 FR 33970, May 21, 1980]

§ 1.513-6 Certain hospital services not unrelated trade or business.

(a) In general. Under section 513(e), the furnishing of a service listed in section 501(e)(1)(A) by a hospital to one or more other hospitals will not constitute unrelated trade or business if—

(1) The service is provided solely to hospitals that have facilities to serve not more than 100 inpatients,

(2) The service would, if performed by the recipient hospital, constitute an activity consistent with that hospital's exempt purposes, and

(3) The service is provided at a fee not in excess of actual cost, including straight line depreciation and a reasonable rate of return on the capital goods used to provide the service. For purposes of this section, a rate of return on capital goods will be considered "reasonable" provided that it does not exceed, on an annual basis, the percentage described below which is based on the average of the rates of interest on special issues of public debt obligations issued to the Federal Hospital Insurance Trust Fund for each of the months included in the taxable year of the hospital during which the capital goods are used in providing the service. Determinations as to the cost of services and the applicable rate of return should be made as prescribed by 42 U.S.C. 1395x(v)(1) (A) and (B) and the regulations thereunder (permitting a health care facility to be reimbursed under the Medicare program for the "reasonable cost of (its) services," including, in the case of certain proprietary facilities, a "reasonable return on equity capital"). For taxable years beginning on or before May 14, 1986, the rate of return shall be one and one-half times the average of the rates of interest on public debt obligations described above which were in effect on or before April 20, 1983.

(b) Hospital defined. As used in this section the word "hospital" means a hospital described in section 170(b)(1)(A)(iii).

(c) Example. The provisions of this section are illustrated by the following example:

Example. A large metropolitan hospital provides various services to other hospitals. The hospital furnishes a purchasing service to hospitals N and O, a data processing service to hospitals R and S, and a food service to hospitals X and Y. All the hospitals are described in section 170(b)(1)(A)(iii). All the hospitals have facilities to serve not more than 100 inpatients except hospital N. The services are furnished at cost to all hospitals except that hospital R is charged a fee in excess of cost for its use of the data processing service. The purchasing service constitutes unrelated trade or business because it is not provided solely to hospitals having facilities to serve not more than 100 inpatients.

The data processing service constitutes unrelated trade or business because it is provided at a fee in excess of cost. The food service satisfies all three requirements of paragraph (a) of this section and does not constitute unrelated trade or business.

(d Effective date. Section 513(e) and this section apply to taxable years beginning after December 31, 1953.

[T.D. 8075, 51 FR 5322, Feb. 13, 1986; 51 FR 8490, March 12, 1986]

§ 1.514(a)–1 Unrelated debt-financed income and deductions.

(a) Income includible in gross income:

(1) Percentage of income taken into account— (i) In general. For taxable years beginning after December 31, 1969, there shall be included with respect to each debt-financed property (as defined in section 514 and § 1.514(b)–1) as an item of gross income derived from an unrelated trade or business the amount of unrelated debt-financed income (as defined in subdivision (ii) of this subparagraph). See paragraph (a)(5) of § 1.514(c)–1 for special rules regarding indebtedness incurred before June 28, 1966, applicable for taxable years beginning before January 1, 1972, and for special rules applicable to churches or conventions or associations of churches.

(ii) Unrelated debt-financed income. The "unrelated debt-financed income" with respect to each debt-financed property is an amount which is the same percentage (but not in excess of 100 percent) of the total gross income derived during the taxable year from or on account of such property as—

(a) The average acquisition indebtedness (as defined in subparagraph (3) of this paragraph) with respect to the property is of

(b) The average adjusted basis of such property (as defined in subparagraph (2) of this paragraph).

(iii) Debt/basis percentage. The percentage determined under subdivision (ii) of this subparagraph is hereinafter referred to as the "debt/basis percentage".

(iv) Example. Subdivisions (i), (ii), and (iii) of this subparagraph are illustrated by the following example. For purposes of this example it is assumed that the property is debt-financed property.

Example. X, an exempt trade association, owns an office building which in 1971 produces $10,000 of gross rental income. The average adjusted basis of the building for 1971 is $100,000, and the average acquisition indebtedness with respect to the building for 1971 is $50,000. Accordingly, the debt/basis percentage for 1971 is 50 percent (the ratio of $50,000 to $100,000). Therefore, the unrelated debt-financed income with respect to the building for 1971 is $5,000 (50 percent of $10,000).

(v) Gain from sale or other disposition. If debt-financed property is sold or otherwise dis-

posed of, there shall be included in computing unrelated business taxable income an amount with respect to such gain (or loss) which is the same percentage (but not in excess of 100 percent) of the total gain (or loss) derived from such sale or other disposition as—

(a) The highest acquisition indebtedness with respect to such property during the 12-month period, preceding the date of disposition, is of

(b) The average adjusted basis of such property.

The tax on the amount of gain (or loss) included in unrelated business taxable income pursuant to the preceding sentence shall be determined in accordance with the rules set forth in Subchapter P, Chapter 1 of the Code (relating to capital gains and losses). See also section 511(d) and the regulations thereunder (relating to the minimum tax for tax preferences).

(2) Average adjusted basis—(i) In general. The "average adjusted basis" of debt-financed property is the average amount of the adjusted basis of such property during that portion of the taxable year it is held by the organization. This amount is the average of:

(a) The adjusted basis of such property as of the first day during the taxable year that the organization holds the property, and

(b) The adjusted basis of such property as of the last day during the taxable year that the organization holds the property.

See section 1011 and the regulations thereunder for determination of the adjusted basis of property.

(ii) Adjustments for prior taxable years. For purposes of subdivision (i) of this subparagraph, the determination of the average adjusted basis of debt-financed property is not affected by the fact that the organization was exempt from taxation for prior taxable years. Proper adjustment must be made under section 1011 for the entire period since the acquisition of the property. For example, adjustment must be made for depreciation for all prior taxable years whether or not the organization was exempt from taxation for any such years. Similarly, the fact that only a portion of the depreciation allowance may be taken into account in computing the percentage of deductions allowable under section 514(a)(2) does not affect the amount of the adjustment for depreciation which is used in determining average adjusted basis.

(iii) Cross reference. For the determination of the basis of debt-financed property acquired in a complete or partial liquidation of a corporation in exchange for its stock, see § 1.514(d)–1.

(iv) Example. This subparagraph may be illustrated by the following example. For purposes of this example it is assumed that the property is debt-financed property.

Example. On July 10, 1970, X, an exempt educational organization, purchased an office building for $510,000, using $300,000 of borrowed funds. During 1970 the only adjustment to basis is $20,000 for depreciation. As of December 31, 1970, the adjusted basis of the building is $490,000 and the indebtedness is still $300,000. X files its return on a calendar year basis. Under these circumstances, the debt/basis percentage for 1970 is 60 percent, calculated in the following manner:

	Basis
As of July 10, 1970 (acquisition date)........	$510,000
As of December 31, 1970..................	490,000
Total	1,000,000

Average Adjusted basis:

$1,000,000÷2=$500,000

Debt/basis percentage:

Average acquisition indebtedness ($300,000)/Average adjusted basis ($500,000)=60 percent

For an illustration of the determination of the debt/basis percentage as changes in the acquisition indebtedness occur, see example (1) of subparagraph (3)(iii) of this paragraph.

(3) Average acquisition indebtedness—(i) In general. The "average acquisition indebtedness" with respect to debt-financed property is the average amount of the outstanding principal indebtedness during that portion of the taxable year the property is held by the organization.

(ii) Computation. The average acquisition indebtedness is computed by determining the amount of the outstanding principal indebtedness on the first day in each calendar month during the taxable year that the organization holds the property, adding these amounts together, and then dividing this sum by the total number of months during the taxable year that the organization held such property. A fractional part of a month shall be treated as a full month in computing average acquisition indebtedness.

(iii) Examples. The application of this subparagraph may be illustrated by the following examples. For purposes of these examples it is assumed that the property is debt-financed property.

Example (1). Assume the facts as stated in the example in subparagraph (2)(iv) of this paragraph, except that beginning July 20, 1970, the organization makes payments of $21,000 a month ($20,000 of which is attributable to principal and $1,000 to interest). In this situation, the average acquisition indebtedness for 1970 is $250,000. Thus, the debt/basis percentage for 1970 is 50 percent, calculated in the following manner:

Month:	*Indebtedness on the first day in each calendar month that the property is held*
July	$300,000
August	280,000
September	260,000
October	240,000
November	220,000
December	200,000
Total	1,500,000

Average acquisition indebtedness:

$1,500,000÷6 months=$250,000

Debt/basis percentage:

Average acquisition indebtedness ($250,000)/Average adjusted basis ($500,000)=50 percent

Example (2). Y, an exempt organization, owns stock in a corporation which it does not control. At the beginning of the year, Y has an outstanding principal indebtedness with respect to such stock of $12,000. Such indebtedness is paid off at the rate of $2,000 per month beginning January 30, so that it is retired at the end of 6 months. The average acquisition indebtedness for the taxable year is $3,500, calculated in the following manner:

Month:	*Indebtedness on the first day in each calendar month that the property is held*
January	$12,000
February	10,000
March	8,000
April	6,000
May	4,000
June	2,000
July thru December	0
Total	42,000

Average acquisition indebtedness:

$42,000÷6 months=$3,500

(4) Indeterminate price—(i) In general. If an exempt organization acquires (or improves) property for an indeterminate price, the initial acquisition indebtedness and the unadjusted basis shall be determined in accordance with subdivisions (ii) and (iii) of this paragraph, unless the organization has obtained the consent of the Commissioner to use another method to compute such amounts.

(ii) Unadjusted basis. For purposes of this subparagraph, the unadjusted basis of property (or of an improvement) is the fair market value of the property (or improvement) on the date of acquisition (or the date of completion of the improvement). The average adjusted basis of such property shall be determined in accordance with paragraph (a)(2) of this section.

(iii) Initial acquisition indebtedness. For purposes of this subparagraph, the initial acquisition indebtedness is the fair market value of the property (or improvement) on the date of acquisition (or the date of completion of the improvement) less any down payment or other initial payment applied to the principal indebtedness. The average acquisition indebtedness with respect to such property shall be computed in accordance with paragraph (a)(3) of this section.

(iv) Example. The application of this subparagraph may be illustrated by the following example. For purposes of this example it is assumed that the property is debt-financed property.

Example. On January 1, 1971, X, an exempt trade association, acquires an office building for a down payment of $310,000 and an agreement to pay 10 percent of the income generated by the building for 10 years. Neither the sales price nor the amount which X is obligated to pay in the future is certain. The fair market value of the building on the date of acquisition is $600,000. The depreciation allowance for 1971 is $40,000. Unless X obtains the consent of the Commissioner to use another method, the unadjusted basis of the property is $600,000 (the fair market value of the property on the date of acquisition), and the initial acquisition indebtedness is $290,000 (fair market value of $600,000 less initial payment of $310,000). Under these circumstances, the average adjusted basis of the property for 1971 is $580,000, calculated as follows:

[Initial fair market value+(initial fair market value less depreciation)]÷2=[$600,000+($600,000–$40,000)]÷2=$580,000.

If no payment other than the initial payment is made in 1971, the average acquisition indebtedness for 1971 is $290,000. Thus, the debt/basis percentage for 1971 is 50 percent, calculated as follows:

Average acquisition indebtedness÷average adjusted basis=$290,000÷$580,000=50 percent

(b) Deductions—(1) Percentage of deductions taken into account. Except as provided in subparagraphs (4) and (5) of this paragraph, there shall be allowed as a deduction with respect to each debt-financed property an amount determined by applying the debt/basis percentage to the sum of the deductions allowable under subparagraph (2) of this paragraph.

(2) Deductions allowable. The deductions allowable are those items allowed as deductions by chapter 1 of the Code which are directly connected with the debt-financed property or the income therefrom (including the dividends received deductions allowed by sections 243, 244, and 245), except that—

(i) The allowable deductions are subject to the modifications provided by section 512(b) on com-

putation of the unrelated business taxable income, and

(ii) If the debt-financed property is of a character which is subject to the allowance for depreciation provided in section 167, such allowance shall be computed only by use of the straight-line method of depreciation.

(3) Directly connected with. To be "directly connected with" debt-financed property or the income therefrom, an item of deduction must have proximate and primary relationship to such property or the income therefrom. Expenses, depreciation, and similar items attributable solely to such property are proximately and primarily related to such property or the income therefrom, and therefore qualify for deduction, to the extent they meet the requirements of subparagraph (2) of this paragraph. Thus, for example, if the straight-line depreciation allowance for an office building is $10,000 a year, an organization would be allowed a deduction for depreciation of $10,000 if the entire building were debt-financed property. However, if only one-half of the building were treated as debt-financed property, then the depreciation allowed as a deduction would be $5,000. (See example (2) of § 1.514(b)–1(b)(1)(iii).)

(4) Capital losses—(i) In general. If the sale or exchange of debt-financed property results in a capital loss, the amount of such loss taken into account in the taxable year in which the loss arises shall be computed in accordance with paragraph (a)(1)(v) of this section. If, however, any portion of such capital loss not taken into account in such year may be carried back or carried over to another taxable year, the debt/basis percentage is not applied to determine what portion of such capital loss may be taken as a deduction in the year to which such capital loss is carried.

(ii) Example. This subparagraph is illustrated by the following example. For purposes of this example it is assumed that the property is debt-financed property.

Example. X, an exempt educational organization, owns securities which are capital assets and which it has held for more than 6 months. In 1972 X sells the securities at a loss of $20,000. The debt/basis percentage with respect to computing the gain (or loss) derived from the sale of the securities is 40 percent. Thus, X has sustained a capital loss of $8,000 (40 percent of $20,000) with respect to the sale of the securities. For 1972 and the preceding three taxable years X has no other capital transactions. Under these circumstances, the $8,000 of capital loss may be carried over to the succeeding 5 taxable years without further application of the debt/basis percentage.

(5) Net operating loss—(i) In general. If, after applying the debt/basis percentage to the income derived from debt-financed property and the deductions directly connected with such income, such deductions exceed such income, the organization has sustained a net operating loss for the taxable year. This amount may be carried back or carried over to other taxable years in accordance with section 512(b)(6). However, the debt/basis percentage shall not be applied in such other years to determine the amounts that may be taken as a deduction in those years.

(ii) Example. This subparagraph may be illustrated by the following example. For purposes of this example it is assumed that the property is debt-financed property.

Example. During 1974, Y, an exempt organization, receives $20,000 of rent from a building which it owns. Y has no other unrelated business taxable income for 1974. For 1974 the deductions directly connected with this building are property taxes of $5,000, interest of $5,000 on the acquisition indebtedness, and salary of $15,000 to the manager of the building. The debt/basis percentage for 1974 with respect to the building is 50 percent. Under these circumstances, Y shall take into account in computing its unrelated business taxable income for 1974, $10,000 of income (50 percent of $20,000) and $12,500 (50 percent of $25,000) of the deductions directly connected with such income. Thus, for 1974 Y has sustained a net operating loss of $2,500 ($10,000 of income less $12,500 of deductions) which may be carried back or carried over to other taxable years without further application of the debt/basis percentage.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7229, 37 FR 28143, Dec. 21, 1972]

§ 1.514(a)–2 Business lease rents and deductions for taxable years beginning before January 1, 1970.

(a) Effective date. This section applies to taxable years beginning before January 1, 1970.

(b) In general—(1) Rents includible in gross income. There shall be included with respect to each business lease, as an item of gross income derived from an unrelated trade or business, an amount which is the same percentage (but not in excess of 100 percent) of the total rents derived during the taxable year under such lease as—

(i) The amount of the business lease indebtedness at the close of the taxable year of the lessor tax-exempt organization, with respect to the premises covered by such lease, is of

(ii) The adjusted basis of such premises at the close of such taxable year.

For definition of business lease as a lease for a term of more than 5 years, and for rules for determining the computation of such 5-year term in certain specific situations, see § 1.514(f)–1. For definition of business lease indebtedness and

allocation of business lease indebtedness where only a portion of the property is subject to a business lease, see § 1.514(g)–1.

(2) **Determination of basis.** For purposes of the unrelated business income tax the basis (unadjusted) of property is determined under section 1012, and the adjusted basis of property is determined under section 1011. The determination of the adjusted basis of property is not affected by the fact that the organization was exempt from tax for prior taxable years. Proper adjustment must be made under section 1011 for the entire period since the acquisition of the property. Thus adjustment must be made for depreciation for all taxable years whether or not the organization was exempt from tax for any of such years. Similarly, for taxable years during which the organization is subject to the tax on unrelated business taxable income the fact that only a portion of the deduction for depreciation is taken into account under paragraph (c)(1) of this section does not affect the amount of the adjustment for depreciation.

(3) **Examples.** The application of this paragraph may be illustrated by the following examples, in each of which it is assumed that the taxpayer makes its returns under section 511 on the basis of the calendar year, and that the lease is not substantially related to the purpose for which the organization is granted exemption from tax.

Example (1). Assume that a tax-exempt educational organization purchased property in 1952 for $600,000, using borrowed funds, and leased the building for a period of 20 years. Assume further that the adjusted basis of such building at the close of 1954 is $500,000 and that, at the close of 1954, $200,000 of the indebtedness incurred to acquire the property remains outstanding. Since the amount of the outstanding indebtedness is two-fifths of the adjusted basis of the building at the close of 1954, two-fifths of the gross rental received from the building during 1954 shall be included as an item of gross income in computing unrelated business taxable income. If, at the close of a subsequent taxable year, the outstanding indebtedness is $100,000 and the adjusted basis of the building is $400,000, one-fourth of the gross rental for such taxable year shall be included as an item of gross income in computing unrelated business taxable income for such taxable year.

Example (2). Assume that a tax-exempt organization owns a four-story building, that in 1954 it borrows $100,000 which it uses to improve the whole building, and that it thereafter in 1954 rents the first and second floors of the building under six-year leases at rentals of $4,000 a year. The third and fourth floors of the building are leased on a yearly basis during 1954. Assume, also, that the adjusted basis of the real property at the end of 1954 (after reflecting the expenditures for improving the building) is $200,000, allocable equally to each of the four stories. Under these facts, only one-half of the real property is subject to a business lease since only one-half is rented under a lease for more than 5 years. See § 1.514(f)–1. The percentage of the rent under such lease which is taken into account is determined by the ratio which the allocable part of the business lease indebtedness bears to the allocable part of the adjusted basis of the real property, that is, the ratio which one-half of the $100,000 of business lease indebtedness outstanding at the close of 1954, or $50,000, bears to one-half of the adjusted basis of the business lease premises at the close of 1954, or $100,000. The percentage of rent which is business lease income for 1954 is, therefore, one-half (the ratio of $50,000 to $100,000) of $8,000, or $4,000, and this amount of $4,000 is considered an item of gross income derived from an unrelated trade or business.

(c) **Deductions—(1) Deductions allowable against gross income.** The same percentage is used in determining both the portion of the rent and the portion of the deductions taken into account with respect to the business lease in computing unrelated business taxable income. Such percentage is applicable only to the sum of the following deductions allowable under section 161:

(i) Taxes and other expenses paid or accrued during the taxable year upon or with respect to the real property subject to the business lease;

(ii) Interest paid or accrued during the taxable year on the business lease indebtedness;

(iii) A reasonable allowance for exhaustion, wear and tear (including a reasonable allowance for obsolescence) of the real property subject to such lease.

Where only a portion of the real property is subject to the business lease, there shall be taken into account only those amounts of the above-listed deductions which are properly allocable to the premises covered by such lease.

(2) **Excess deductions.** The deductions allowable under subparagraph (1) of this paragraph with respect to a business lease are not limited by the amount included in gross income with respect to the rent from such lease. Any excess of such deductions over such gross income shall be applied against other items of gross income in computing unrelated business taxable income taxable under section 511(a).

(3) **Example.** The application of this paragraph may be illustrated by the following example:

Example. Assume the same facts as those in example (1) in paragraph (b)(3) of this section. Assume, also that for 1954 the organization pays taxes of $4,000 on the property, interest of $6,000 on its business lease indebtedness, and that the depreciation allowable for 1954 under section 167 is $10,000. Under the facts set forth in such example (1) and in this example, the deductions to be taken into account for 1954 in computing unrelated business taxable income would be two-fifths of the total of the deductions of $20,000, that is $8,000.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7229, 37 FR 28145, Dec. 21, 1972]

§ 1.514(b)-1 Definition of debt-financed property.

(a) In general. For purposes of section 514 and the regulations thereunder, the term "debt-financed property" means any property which is held to produce income (*e.g.*, rental real estate, tangible personal property, and corporate stock), and with respect to which there is an acquisition indebtedness (determined without regard to whether the property is debt-financed property) at any time during the taxable year. The term "income" is not limited to recurring income but applies as well to gains from the disposition of property. Consequently, when any property held to produce income by an organization which is not used in a manner described in section 514(b)(1)(A), (B), (C), or (D) is disposed of at a gain during the taxable year, and there was an acquisition indebtedness outstanding with respect to such property at any time during the 12-month period preceding the date of disposition (even though such period covers more than 1 taxable year), such property is "debt-financed property". For example, assume that on June 1, 1972, an organization is given mortgaged, unimproved property which it does not use in a manner described in section 514(b)(1)(A), (B), (C), or (D) and that the organization assumes payment of the mortgage on such property. On July 15, 1972, the organization sells such property for a gain. Such property is "debt-financed property" and such gain is taxable as unrelated debt-financed income. See section 514(c) and § 1.514(c)-1 for rules relating to when there is acquisition indebtedness with respect to property. See paragraph (a) of § 1.514(a)-1 for rules determining the amount of income or gain from debt-financed property which is treated as unrelated debt-financed income.

(b) Exceptions—(1) Property related to certain exempt purposes. (i) To the extent that the use of any property is substantially related (aside from the need of the organization for income or funds or the use it makes of the profits derived) to the exercise or performance by an organization of its charitable, educational, or other purpose or function constituting its basis for exemption under section 501 (or, in the case of an organization described in section 511(a)(2)(B), to the exercise or performance of any purpose or function designated in section 501(c)(3)) such property shall not be treated as "debt-financed property". See § 1.513-1 for principles applicable in determining whether there is a substantial relationship to the exempt purpose of the organization.

(ii) If substantially all of any property is used in a manner described in subdivision (i) of this subparagraph, such property shall not be treated as "debt-financed property". In general the preceding sentence shall apply if 85 percent or more of the use of such property is devoted to the organization's exempt purpose. The extent to which property is used for a particular purpose shall be determined on the basis of all the facts and circumstances. These may include (where appropriate)—

(a) A comparison of the portion of time such property is used for exempt purposes with the total time such property is used,

(b) A comparison of the portion of such property that is used for exempt purposes with the portion of such property that is used for all purposes, or

(c) Both the comparisons described in (a) and (b) of this subdivision.

(iii) This subparagraph may be illustrated by the following examples. For purposes of these examples it is assumed that the indebtedness is acquisition indebtedness.

Example (1). W, an exempt organization, owns a computer with respect to which there is an outstanding principal indebtedness and which is used by W in the performance of its exempt purpose. W sells time for the use of the computer to M corporation on occasions when the computer is not in full-time use by W. W uses the computer in furtherance of its exempt purpose more than 85 percent of the time it is in use and M uses the computer less than 15 percent of the total operating time the computer is in use. In this situation, substantially all the use of the computer is related to the performance of W's exempt purpose. Therefore, no portion of the computer is treated as debt-financed property.

Example (2). X, an exempt college, owns a four story office building which has been purchased with borrowed funds. In 1971, the lower two stories of the building are used to house computers which are used by X for administrative purposes. The top two stories are rented to the public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). The gross income derived by X from the building is $6,000, all of which is attributable to the rents paid by tenants. There are $2,000 of expenses, allocable equally to each use of the building. The average adjusted basis of the building for 1971 is $100,000, and the outstanding principal indebtedness throughout 1971 is $60,000. Thus, the average acquisition indebtedness for 1971 is $60,000. In accordance with subdivision (i) of this subparagraph, only the upper half of the building is debt-financed property. Consequently, only the rental income and the deductions directly connected with such income are to be taken into account in computing unrelated business taxable income. The portion of such amounts to be taken into account is determined by multiplying the $6,000 of rental income and $1,000 of deductions directly connected with such rental income by the debt/basis percentage. The debt/basis percentage is the ratio which the allocable part of the average acquisition indebtedness is of the allocable part of the average adjusted basis of the property, that is, the ratio which $30,000 (one-half

of $60,000) bears to $50,000 (one-half of $100,000). Thus, the debt/basis percentage for 1971 is 60 percent (the ratio of $30,000 to $50,000). Under these circumstances, X shall include net rental income of $3,000 in its unrelated business taxable income for 1971, computed as follows:

Total rental income	$6,000
Deductions directly connected with rental income	$1,000
Debt/basis percentage ($30,000/$50,000)	60%
Rental income treated as gross income from an unrelated trade or business (60 percent of $6,000)	$3,600
Less the allowable portion of deductions directly connected with such income (60 percent of $1,000)	$600
Net rental income included by X in computing its unrelated business taxable income pursuant to section 514	$3,000

Example (3). Assume the facts as stated in example (2) except that on December 31, 1971, X sells the building and realizes a long-term capital gain of $10,000. This is X's only capital transaction for 1971. An allocable portion of this gain is subject to tax. This amount is determined by multiplying the gain related to the nonexempt use, $5,000 (one-half of $10,000), by the ratio which the indebtedness for the 12-month period preceding the date of sale, $30,000 (one-half of $60,000), is of the allocable part of the average adjusted basis, $50,000 (one-half of $100,000). Thus, the debt/basis percentage with respect to computing the gain (or loss) derived from the sale of the building is 60 percent (the ratio of $30,000 to $50,000). Consequently, $3,000 (60 percent of $5,000) is a net section 1201 gain (capital gain net income for taxable years beginning after December 31, 1976). The portion of such gain which is taxable shall be determined in accordance with rules contained in subchapter P, chapter 1 of the Code (relating to capital gains and losses). See also section 511(d) and the regulations thereunder (relating to the minimum tax for tax preferences).

(2) Property used in an unrelated trade or business—(i) In general. To the extent that the gross income from any property is treated as income from the conduct of an unrelated trade or business, such property shall not be treated as "debt-financed property". However, any gain on the disposition of such property which is not included in the income of an unrelated trade or business by reason of section 512(b)(5) is includible as gross income derived "from or on account of debt-financed property" under paragraph (a)(1) of § 1.514(a)–1.

(ii) Amounts specifically taxable under other provisions of the Code. Section 514 does not apply to amounts which are otherwise included in the computation of unrelated business taxable income, such as rents from personal property includible pursuant to section 512(b)(13) or rents and interest from controlled organizations includible pursuant to section 512(b)(3). See paragraph (l)(5) of § 1.512(b)–1 for the rules determining the manner in which amounts are taken into account where such amounts may be included in the computation of unrelated business taxable income by operation of more than one provision of the Code.

(3) Examples. Subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples. For purposes of these examples it is assumed that the indebtedness is acquisition indebtedness.

Example (1). X, an exempt scientific organization, owns a 10-story office building. During 1972, four stories are occupied by X's administrative offices, and the remaining six stories are rented to the public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). On December 31, 1972, the building is sold and X realizes a long-term capital gain of $100,000. This is X's only capital transaction for 1972. The debt/basis percentage with respect to computing the gain (or loss) derived from the sale of the building is 30 percent. Since 40 percent of the building was used for X's exempt purpose, only 60 percent of the building is debt-financed property. Thus, only $60,000 of the gain (60 percent of $100,000) is subject to this section. Consequently, the amount of gain treated as unrelated debt-financed income is $18,000 ($60,000 multiplied by the debt/basis percentage of 30 percent). The portion of such $18,000 which is taxable shall be determined in accordance with the rules contained in subchapter P, chapter 1 of the Code. See also section 511(d) and the regulations thereunder (relating to the minimum tax for tax preferences).

Example (2). Y, an exempt organization, owns two properties, a restaurant and an office building. In 1972, all the space in the office building, except for the portion utilized by Y to house the administrative offices of the restaurant, is rented to the public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). The average adjusted basis of the office building for 1972 is $2 million. The outstanding principal indebtedness throughout 1972 is $1 million. Thus, the highest acquisition indebtedness in the calendar year of 1972 is $1 million. It is determined that 30 percent of the space in the office building is used for the administrative functions engaged in by the employees of the organization with respect to the restaurant. Since the income attributable to the restaurant is attributable to the conduct of an unrelated trade or business, only 70 percent of the building is treated as debt-financed property for purposes of determining the portion of the rental income which is unrelated debt-financed income. On December 31, 1972, the office building is sold and Y realizes a long-term capital gain of $250,000. This is Y's only capital transaction for 1972. In accordance with subparagraph (2)(i) of this paragraph, all the gain derived from this sale is taken into account in computing the amount of such gain subject to tax. The portion of such gain which is taxable is determined by multiplying the $250,000 gain by the debt/basis percentage. The debt/basis percentage is the ratio which the highest acquisition indebtedness for the 12-month period preceding the date of sale, $1 million, is of the average adjusted basis, $2 million. Thus, the debt/basis percentage with respect to computing the gain (or loss) derived from the sale of the building is 50 percent (the ratio of $1 million to $2 million). Consequently, $125,000 (50 percent of $250,000) is a net section 1201 gain (net capital gain for taxable years beginning after December 31, 1976). The amount of such gain which is taxable shall be determined in accordance with the rules contained in subchapter P, chapter 1 of the Code. See also section 511(d) and the regulations thereunder.

Example (3). (a) Z, an exempt university, owns all the stock of M, a nonexempt corporation. During 1971 M leases from Z University a factory unrelated to Z's exempt purpose and a

dormitory for the students of Z, for a total annual rent of $100,000: $80,000 for the factory and $20,000 for the dormitory. During 1971, M has $500,000 of taxable income, disregarding the rent paid to Z: $150,000 from the dormitory and $350,000 from the factory. The factory is subject to a mortgage of $150,000. Its average adjusted basis for 1971 is determined to be $300,000. Z's deductions for 1971 with respect to the leased property are $4,000 for the dormitory and $16,000 for the factory. In accordance with subdivision (ii) of this subparagraph, section 514 applies only to that portion of the rent which is excluded from the computation of unrelated business taxable income by operation of section 512(b)(3) and not included in such computation pursuant to section 512(b)(13). Since all the rent received by Z is derived from real property, section 512(b)(3) would exclude all such rent from computation of Z's unrelated business taxable income. However, 70 percent of the rent paid to Z with respect to the factory and 70 percent of the deductions directly connected with such rent shall be taken into account by Z in determining its unrelated business taxable income pursuant to section 512(b)(15), computed as follows:

M's taxable income (disregarding rent paid to Z)	$500,000
Less taxable income from dormitory	$150,000
Excess taxable income	$350,000
Ratio ($350,000/$500,000)	7/10
Total rent paid to Z	$100,000
Total deductions ($4,000 + $16,000)	$20,000
Rental income treated under section 512(b)(15) as gross income from an unrelated trade or business (7/10 of $100,000)	$70,000
Less deductions directly connected with such income (7/10 of $20,000)	$14,000
Net rental income included by Z in computing its unrelated business taxable income pursuant to section 512(b)(15)	$56,000

(b) Since only that portion of the rent derived from the factory and the deductions directly connected with such rent not taken into account pursuant to section 512(b)(15) may be included in computing unrelated business taxable income by operation of section 514, only $10,000 ($80,000 minus $70,000) of rent and $2,000 ($16,000 minus $14,000) of deductions are so taken into account. The portion of such amounts to be taken into account is determined by multiplying the $10,000 of income and $2,000 of deductions by the debt/basis percentage. The debt/basis percentage is the ratio which the average acquisition indebtedness ($150,000) is of the average adjusted basis of the property ($300,000). Thus, the debt/basis percentage for 1971 is 50 percent (the ratio of $150,000 to $300,000). Under these circumstances, Z shall include net rental income of $4,000 in its unrelated business taxable income for 1971, computed as follows:

Total rents	$10,000
Deductions directly connected with such rents	$2,000
Debt/basis percentage ($150,000/$300,000)	50%
Rental income treated as gross income from an unrelated trade or business (50 percent of $10,000)	$5,000
Less the allowable portion of deductions directly connected with such income (50 percent of $2,000)	$1,000
Net rental income included by Z in computing its unrelated business taxable income pursuant to section 514	$4,000

(4) Property related to research activities. To the extent that the gross income from any property is derived from research activities excluded from the tax on unrelated business income by paragraph (7), (8), or (9) of section 512(b), such property shall not be treated as "debt-financed property".

(5) Property used in "thrift shops", etc. To the extent that property is used in any trade or business which is excepted from the definition of "unrelated trade or business" by paragraph (1), (2), or (3) of section 513(a), such property shall not be treated as "debt-financed property".

(6) Use by a related organization. For purposes of subparagraph (1), (4), or (5) of this paragraph, use of property by a related exempt organization (as defined in paragraph (c)(2)(ii) of this section) for a purpose described in such subparagraphs shall be taken into account in order to determine the extent to which such property is used for a purpose described in such subparagraphs.

(c) Special rules—(1) Medical clinic. Property is not debt-financed property if it is real property subject to a lease to a medical clinic, and the lease is entered into primarily for purposes which are substantially related (aside from the need of such organization for income or funds or the use it makes of the rents derived) to the exercise or performance by the lessor of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501. For example, assume that an exempt hospital leases all of its clinic space to an unincorporated association of physicians and surgeons who, by the provisions of the lease, agree to provide all of the hospital's out-patient medical and surgical services and to train all of the hospital's residents and interns. In this situation, the rents received by the hospital from this clinic are not to be treated as unrelated debt-financed income.

(2) Related exempt uses—(i) In general. Property owned by an exempt organization and used by a related exempt organization or by an exempt organization related to such related exempt organization shall not be treated as "debt-financed property" to the extent such property is used by either organization in furtherance of the purpose constituting the basis for its exemption under section 501. Furthermore, property shall not be treated as "debt-financed property" to the extent such property is used by a related exempt organization for a purpose described in paragraph (b)(4) or (5) of this section.

(ii) Related organizations. For purposes of subdivision (i) of this subparagraph, an exempt

organization is related to another exempt organization only if—

(a) One organization is an exempt holding company described in section 501(c)(2) and the other organization receives the profits derived by such exempt holding company,

(b) One organization has control of the other organization within the meaning of paragraph (l)(4) of § 1.512(b)–1,

(c) More than 50 percent of the members of one organization are members of the other organization, or

(d) Each organization is a local organization which is directly affiliated with a common state, national, or international organization which is also exempt.

(iii) Examples. This subparagraph may be illustrated by the following examples. For purposes of these examples it is assumed that the indebtedness is acquisition indebtedness.

Example (1). M, an exempt trade association described in section 501(c)(6), leases 70 percent of the space of an office building for furtherance of its exempt purpose. The title to such building is held by N, an exempt holding company described in section 501(c)(2), which acquired title to the building with borrowed funds. The other 30 percent of the space in this office building is leased to L, a nonstock exempt trade association described in section 501(c)(6). L uses such office space in furtherance of its exempt purpose. The members of L's Board of Trustees serves for fixed terms and M's Board of Directors has the power to select all such members. N pays over to M all the profits it derives from the leasing of space in this building to M and L. Accordingly, M is "related" to N (as such term is defined in subdivision (ii)(a) of this subparagraph) and L is "related" to M (as such term is defined in subdivision (ii)(b) of this subparagraph). Under these circumstances, since all the available space in the building is leased to either an exempt organization related to the exempt organization holding title to the building or an exempt organization related to such related exempt organization, no portion of the building is treated as debt-financed property.

Example (2). W, an exempt labor union described in section 501(c)(5), owns a 10-story office building which has been purchased with borrowed funds. Five floors of the building are used by W in furtherance of its exempt purpose. Four of the other floors are rented to X which is an exempt voluntary employees' beneficiary association described in section 501(c)(9), operated for the benefit of W's members. X uses such office space in furtherance of its exempt purpose. Seventy percent of the members of W are also members of X. Accordingly, X is "related" to W (as such term is defined in subdivision (ii)(c) of this subparagraph). The remaining floor of the building is rented to the general public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). Under these circumstances, no portion of this building is treated as debt-financed property since more than 85 percent of the office space available in this building is used either by W or X, an exempt organization related to W, in furtherance of their respective exempt purpose. See paragraph (b)(1) of this section for rules relating to the use of property substantially related to an exempt purpose. See paragraph (b)(6) of this section for rules relating to uses by related exempt organizations.

Example (3). Assume the same facts as in example (2), except that W and X are each exempt local labor unions described in section 501(c)(5) having no common membership and are each affiliated with N, an exempt international labor union described in section 501(c)(5). Under these circumstances, no portion of this building is treated as debt-financed property since more than 85 percent of the office space available in this building is used either by W or X, an exempt organization related to W, in furtherance of their respective exempt purpose.

Example (4). Assume the same facts as in example (3), except that W and X are directly affiliated with different exempt international labor unions and that W and X are not otherwise affiliated with, or members of, a common exempt organization, other than an association of international labor unions. Under these circumstances, the portions of this building which are rented to X and to the general public are treated as debt-financed property since X is not related to W and W uses less than 85 percent of the building for its exempt purpose.

(3) Life income contracts. (i) Property shall not be treated as "debt-financed property" when—

(a) An individual transfers property to a trust or a fund subject to a contract providing that the income is to be paid to him or other individuals or both for a period of time not to exceed the life of such individual or individuals in a transaction in which the payments to the individual or individuals do not constitute the proceeds of a sale or exchange of the property so transferred, and

(b) The remainder interest is payable to an exempt organization described in section 501(c)(3).

(ii) Subdivision (i) of this subparagraph is illustrated by the following example.

Example. On January 1, 1967, A transfers property to X, an exempt organization described in section 501(c)(3), which immediately places the property in a fund. On January 1, 1971, A transfers additional property to X, which property is also placed in the fund. In exchange for each transfer, A receives income participation fund certificates which entitle him to a proportionate part of the fund's income for his life and for the life of another individual. None of the payments made by X are treated by the recipients as the proceeds of a sale or exchange of the property transferred. In this situation, none of the property received by X from A is treated as debt-financed property.

(d) Property acquired for prospective exempt use—(1) Neighborhood land—(i) In general. If an organization acquires real property for the principal purpose of using the land in the exercise or performance of its exempt purpose, commencing within 10 years of the time of acquisition, such property will not be treated as debt-financed property, so long as (a) such property is in the neighborhood of other property owned by the organization which is used in the performance of its exempt purpose, and (b) the organization does not abandon its intent to use the land in such a

manner within the 10-year period. The rule expressed in this subdivision is hereinafter referred to as the "neighborhood land rule".

(ii) "Neighborhood" defined. Property shall be considered in the "neighborhood" of property owned and used by the organization in the performance of its exempt purpose if the acquired property is contiguous with the exempt purpose property or would be contiguous with such property except for the interposition of a road, street, railroad, stream, or similar property. If the acquired property is not contiguous with exempt function property, it may still be in the "neighborhood" of such property, but only if it is within 1 mile of such property and the facts and circumstances of the particular situation make the acquisition of contiguous property unreasonable. Some of the criteria to consider in determining this question include the availability of land and the intended future use of the land. For example, a university attempts to purchase land contiguous to its present campus but cannot do so because the owners either refuse to sell or ask unreasonable prices. The nearest land of sufficient size and utility is a block away from the campus. The university purchases such land. Under these circumstances, the contiguity requirement is unreasonable and the land purchased would be considered "neighborhood land".

(iii) Exception. The neighborhood land rule shall not apply to any property after the expiration of 10 years from the date of acquisition. Further, the neighborhood land rule shall apply after the first 5 years of the 10-year period only if the organization establishes to the satisfaction of the Commissioner that future use of the acquired land in furtherance of the organization's exempt purpose before the expiration of the 10-year period is reasonably certain. In order to satisfy the Commissioner, the organization does not necessarily have to show binding contracts. However, it must at least have a definite plan detailing a specific improvement and a completion date, and some affirmative action toward the fulfillment of such a plan. This information shall be forwarded to the Commissioner of Internal Revenue, Washington, D.C. 20224, for a ruling at least 90 days before the end of the fifth year after acquisition of the land.

(2) Actual use. If the neighborhood land rule is inapplicable because—

(i) The acquired land is not in the neighborhood of other property used by the organization in performance of its exempt purpose, or

(ii) The organization (for the period after the first 5 years of the 10-year period) is unable to establish to the satisfaction of the Commissioner that the use of the acquired land for its exempt purposes within the 10-year period is reasonably certain,

but the land is actually used by the organization in furtherance of its exempt purpose within the 10-year period, such property (subject to the provisions of subparagraph (4) of this paragraph) shall not be treated as debt-financed property for any period prior to such conversion.

(3) Limitations—(i) Demolition or removal required. (a) Subparagraphs (1) and (2) of this paragraph shall apply with respect to any structure on the land when acquired by the organization, or to the land occupied by the structure, only so long as the intended future use of the land in furtherance of the organization's exempt purpose requires that the structure be demolished or removed in order to use the land in such a manner. Thus, during the first 5 years after acquisition (and for subsequent years if there is a favorable ruling in accordance with subparagraph (1)(iii) of this paragraph) improved property is not debt-financed so long as the organization does not abandon its intent to demolish the existing structures and use the land in furtherance of its exempt purpose. Furthermore, if there is an actual demolition of such structures, the use made of the land need not be the one originally intended. Therefore, the actual use requirement of this subdivision may be satisfied by using the land in any manner which furthers the exempt purpose of the organization.

(b) Subdivision (i)(a) of this subparagraph may be illustrated by the following examples. For purposes of the following examples it is assumed that but for the application of the neighborhood land rule such property would be debt-financed property.

Example (1). An exempt university acquires a contiguous tract of land on which there is an apartment building. The university intends to demolish the apartment building and build classrooms and does not abandon this intent during the first 4 years after acquisition. In the fifth year after acquisition it abandons the intent to demolish and sells the apartment building. Under these circumstances, such property is not debt-financed property for the first 4 years after acquisition even though there was no eventual demolition or use made of such land in furtherance of the university's exempt purpose. However, such property is debt-financed property as of the time in the fifth year that the intent to demolish the building is abandoned and any gain on the sale of property is subject to section 514.

Example (2). Assume the facts as stated in example (1) except that the university did not abandon its intent to demolish the existing building and construct a classroom building until the eighth year after acquisition when it sells the property.

Assume further that the university did not receive a favorable ruling in accordance with subparagraph (1)(iii) of this paragraph. Under these circumstances, the building is debt-financed property for the sixth, seventh, and eighth years. It is not, however, treated as debt-financed property for the first 5 years after acquisition.

Example (3). Assume the facts as stated in example (2) except that the university received a favorable ruling in accordance with subparagraph (1)(iii) of this paragraph. Under these circumstances, the building is not debt-financed property for the first 7 years after acquisition. It only becomes debt-financed property as of the time in the eighth year when the university abandoned its intent to demolish the existing structure.

Example (4). (1) Assume that a university acquires a contiguous tract of land containing an office building for the principal purpose of demolishing the office building and building a modern dormitory. Five years later the dormitory has not been constructed, and the university has failed to satisfy the Commissioner that the office building will be demolished and the land will be used in furtherance of its exempt purpose (and consequently has failed to obtain a favorable ruling under subparagraph (1)(iii) of this paragraph). In the ninth taxable year after acquisition the university converts the office building into an administration building. Under these circumstances, during the sixth, seventh, and eighth years after acquisition, the office building is treated as debt-financed property because the office building was not demolished or removed. Therefore, the income derived from such property during these years shall be subject to the tax on unrelated business income.

(2) Assume that instead of converting the office building to an administration building, the university demolishes the office building in the ninth taxable year after acquisition and then constructs a new administration building. Under these circumstances, the land would not be considered debt-financed property for any period following the acquisition, and the university would be entitled to a refund of taxes paid on the income derived from such property for the sixth through eighth taxable years after the acquisition in accordance with subparagraph (4) of this paragraph.

(ii) Subsequent construction. Subparagraphs (1) and (2) of this paragraph do not apply to structures erected on the land after the acquisition of the land.

(iii) Property subject to business lease. Subparagraphs (1) and (2) of this paragraph do not apply to property subject to a lease which is a business lease (as defined in § 1.514(f)–1) whether the organization acquired the property subject to the lease or whether it executed the lease subsequent to acquisition. If only a portion of the real property is subject to a lease, paragraph (c) of § 1.514(f)–1 applies in determining whether such lease is a business lease.

(4) Refund of taxes. (i) If an organization has not satisfied the actual use condition of subparagraph (2) of this paragraph or paragraph (e)(3) of this section before the date prescribed by law (including extensions) for filing the return for the taxable year, the tax for such year shall be computed without regard to the application of such actual use condition. However, if—

(a) A credit or refund of any overpayment of taxes is allowable for a prior taxable year as a result of the satisfaction of such actual use condition, and

(b) Such credit or refund is prevented by the operation of any law or rule of law (other than chapter 74, relating to closing agreements and compromises),

such credit or refund may nevertheless be allowed or made, if a claim is filed within 1 year after the close of the taxable year in which such actual use condition is satisfied. For a special rule with respect to the payment of interest at the rate of 4 percent per annum, see section 514(b)(3)(D), prior to its amendment by section 7(b) of the Act of January 3, 1975 (Pub. L. 93–625, 88 Stat. 2115).

(ii) This subparagraph may be illustrated by the following example. For purposes of this example it is assumed that but for the neighborhood land rule such property would be debt-financed property.

Example. Y, a calendar year exempt organization, acquires real property in January 1970, which is contiguous with other property used by Y in furtherance of its exempt purpose. However, Y does not satisfy the Commissioner by January 1975, that the existing structure will be demolished and the land will be used in furtherance of its exempt purpose. In accordance with this subparagraph, from 1975 until the property is converted to an exempt use, the income derived from such property shall be subject to the tax on unrelated business income. During July 1979, Y demolishes the existing structure on the land and begins using the land in furtherance of its exempt purpose. At this time Y may file claims for refund for the open years 1976 through 1978. Further, in accordance with this subparagraph, Y may also file a claim for refund for 1975, even though a claim for such taxable year may be barred by the statute of limitations, provided such claim is filed before the close of 1980.

(e) Churches—(1) In general. If a church or association or convention of churches acquires real property, for the principal purpose of using the land in the exercise or performance of its exempt purpose, commencing within 15 years of the time of acquisition, such property shall not be treated as debt-financed property so long as the organization does not abandon its intent to use the land in such a manner within the 15-year period.

(2) Exception. This paragraph shall not apply to any property after the expiration of the 15-year period. Further, this paragraph shall apply after the first 5 years of the 15-year period only if the church or association or convention of churches establishes to the satisfaction of the Commissioner that use of the acquired land in furtherance of the organization's exempt purpose before the expiration of the 15-year period is reasonably certain.

For purposes of the preceding sentence, the rules contained in paragraph (d)(1)(iii) of this section with respect to satisfying the Commissioner that the exempt organization intends to use the land within the prescribed time in furtherance of its exempt purpose shall apply.

(3) Actual use. If the church or association or convention of churches for the period after the first 5 years of the 15-year period is unable to establish to the satisfaction of the Commissioner that the use of the acquired land for its exempt purpose within the 15-year period is reasonably certain, but such land is in fact converted to an exempt use within the 15-year period, the land (subject to the provisions of paragraph (d)(4) of this section) shall not be treated as debt-financed property for any period prior to such conversion.

(4) Limitations. The limitations stated in paragraph (d)(3)(i) and (ii) of this section shall similarly apply to the rules contained in this paragraph. [T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7229, 37 FR 28146, Dec. 21, 1972; 39 FR 6607, Feb. 21, 1974; T.D. 7384, 40 FR 49322, Oct. 22, 1975; T.D. 7632, 44 FR 42681, July 20, 1979; T.D. 7728, 45 FR 72651, Nov. 3, 1980]

§ 1.514(c)–1 Acquisition indebtedness.

(a) In general—(1) Definition of acquisition indebtedness. For purposes of section 514 and the regulations thereunder, the term "acquisition indebtedness" means, with respect to any debt-financed property, the outstanding amount of—

(i) The principal indebtedness incurred by the organization in acquiring or improving such property.

(ii) The principal indebtedness incurred before the acquisition or improvement of such property if such indebtedness would not have been incurred but for such acquisition or improvement; and

(iii) The principal indebtedness incurred after the acquisition or improvement of such property if such indebtedness would not have been incurred but for such acquisition or improvement and the incurrence of such indebtedness was reasonably foreseeable at the time of such acquisition or improvement.

Whether the incurrence of an indebtedness is reasonably foreseeable depends upon the facts and circumstances of each situation. The fact that an organization did not actually foresee the need for the incurrence of an indebtedness prior to the acquisition or improvement does not necessarily mean that the subsequent incurrence of indebtedness was not reasonably foreseeable.

(2) Examples. The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). X, an exempt organization, pledges some of its investment securities with a bank for a loan and uses the proceeds of such loan to purchase an office building which it leases to the public for purposes other than those described in section 514(b)(1)(A), (B), (C), or (D). The outstanding principal indebtedness with respect to the loan constitutes acquisition indebtedness incurred prior to the acquisition which would not have been incurred but for such acquisition.

Example (2). Y, an exempt scientific organization, mortgages its laboratory to replace working capital used in remodeling an office building which Y rents to an insurance company for purposes not described in section 514(b)(1)(A), (B), (C), or (D). The indebtedness is "acquisition indebtedness" since such indebtedness, though incurred subsequent to the improvement of the office building, would not have been incurred but for such improvement, and the indebtedness was reasonably foreseeable when, to make such improvement, Y reduced its working capital below the amount necessary to continue current operations.

Example (3). (a) U, an exempt private preparatory school, as its sole educational facility owns a classroom building which no longer meets the needs of U's students. In 1971, U sells this building for $3 million to Y, a corporation which it does not control. U receives $1 million as a down payment from Y and takes back a purchase money mortgage of $2 million which bears interest at 10 percent per annum. At the time U became the mortgagee of the $2 million purchase money mortgage, U realized that it would have to construct a new classroom building and knew that it would have to incur an indebtedness in the construction of the new classroom building. In 1972, U builds a new classroom building for a cost of $4 million. In connection with the construction of this building, U borrows $2.5 million from X Bank pursuant to a deed of trust bearing interest at 6 percent per annum. Under these circumstances, $2 million of the $2.5 million borrowed to finance construction of the new classroom building would not have been borrowed but for the retention of the $2 million purchase money mortgage. Since such indebtedness was reasonably foreseeable, $2 million of the $2.5 million borrowed to finance the construction of the new classroom building is acquisition indebtedness with respect to the purchase money mortgage and the purchase money mortgage is debt-financed property.

(b) In 1972, U receives $200,000 in interest from Y (10 percent of $2 million) and makes a $150,000 interest payment to X (6 percent of $2.5 million). In addition, assume that for 1972 the debt/basis percentage is 100 percent ($2 million/$2 million). Accordingly, all the interest and all the deductions directly connected with such interest income are to be taken into account in computing unrelated business taxable income. Thus, $200,000 of interest income and $120,000 ($150,000 × $2 million/$2.5 million) of deductions directly connected with such interest income are taken into account. Under these circumstances, U shall include net interest income of $80,000 ($200,000 of income less $120,000 of deductions directly connected with such income) in its unrelated business taxable income for 1972.

Example (4). In 1972 X, an exempt organization, forms a partnership with A and B. The partnership agreement provides that all three partners shall share equally in the profits of the partnership, shall each invest $3 million, and that X shall be a limited partner. X invests $1 million of its own funds in

the partnership and $2 million of borrowed funds. The partnership purchases as its sole asset an office building which is leased to the general public for purposes other than those described in section 514(b)(1)(A), (B), (C), or (D). The office building cost the partnership $24 million of which $15 million is borrowed from Y bank. This loan is secured by a mortgage on the entire office building. By agreement with Y bank, X is held not to be personally liable for payment of such mortgage. By reason of section 702(b) the character of any item realized by the partnership and included in the partner's distributive share shall be determined as if the partner realized such item directly from the source from which it was realized by the partnership and in the same manner. Therefore, a portion of X's income from the building is debt-financed income. Under these circumstances, since both the $2 million indebtedness incurred by X in acquiring its partnership interest and $5 million, the allocable portion of the partnership's indebtedness incurred with respect to acquiring the office building which is attributable to X in computing the debt/basis percentage (one-third of $15 million), were incurred in acquiring income-producing property, X has acquisition indebtedness of $7 million ($2 million plus $5 million). Similarly, the allocable portion of the partnership's adjusted basis in the office building which is attributable to X in computing the debt/basis percentage is $8 million (one-third of $24 million). Assuming no payment with respect to either indebtedness and no adjustments to basis in 1972, X's average acquisition indebtedness is $7 million and X's average adjusted basis is $8 million for such year. Therefore, X's debt/basis percentage with respect to its share of the partnership income for 1972 is 87.5 percent ($7 million/$8 million).

(3) Changes in use of property. Since property used in a manner described in section 514(b)(1)(A), (B), (C), or (D) is not considered debt-financed property, indebtedness with respect to such property is not acquisition indebtedness. However, if an organization converts such property to a use which is not described in section 514(b)(1)(A), (B), (C), or (D) and such property is otherwise treated as debt-financed property, the outstanding principal indebtedness with respect to such property will thereafter be treated as "acquisition indebtedness". For example, assume that in 1971 a university borrows funds to acquire an apartment building as housing for married students. In 1974 the university rents the apartment building to the public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). The outstanding principal indebtedness is "acquisition indebtedness" as of the time in 1974 when the building is first rented to the public.

(4) Continued indebtedness. If—

(i) An organization sells or exchanges property, subject to an indebtedness (incurred in a manner described in subparagraph (1) of this paragraph),

(ii) Acquires another property without retiring the indebtedness, and

(iii) The newly acquired property is otherwise treated as debt-financed property,

the outstanding principal indebtedness with respect to the acquired property is "acquisition indebtedness", even though the original property was not debt-financed property. For example, to house its administrative offices, an exempt organization purchases a building with $600,000 of its own funds and $400,000 of borrowed funds secured by a pledge of its securities. It later sells the building for $1,000,000 without redeeming the pledge. It uses these proceeds to purchase an apartment building which it rents to the public for purposes not described in section 514(b)(1)(A), (B), (C), or (D). The indebtedness of $400,000 is "acquisition indebtedness" with respect to the apartment building even though the office building was not debt-financed property.

(5) Indebtedness incurred before June 28, 1966. For taxable years beginning before January 1, 1972, "acquisition indebtedness" does not include any indebtedness incurred before June 28, 1966, unless such indebtedness was incurred on rental real property subject to a business lease and such indebtedness constituted business lease indebtedness. Furthermore, in the case of a church or convention or association of churches, the preceding sentence applies without regard to whether the indebtedness incurred before June 28, 1966, constituted business lease indebtedness.

(b) Property acquired subject to lien—(1) Mortgages. Except as provided in subparagraphs (3) and (4) of this paragraph, whenever property is acquired subject to a mortgage, the amount of the outstanding principal indebtedness secured by such mortgage is treated as "acquisition indebtedness" with respect to such property even though the organization did not assume or agree to pay such indebtedness. The preceding sentence applies whether property is acquired by purchase, gift, devise, bequest, or any other means. Thus, for example, assume that an exempt organization pays $50,000 for real property valued at $150,000 and subject to a $100,000 mortgage. The $100,000 of outstanding principal indebtedness is "acquisition indebtedness" just as though the organization had borrowed $100,000 to buy the property.

(2) Other liens. For purposes of this paragraph, liens similar to mortgages shall be treated as mortgages. A lien is similar to a mortgage if title to property is encumbered by the lien for the benefit of a creditor. However, in the case where State law provides that a tax lien attaches to property prior to the time when such lien becomes due and payable, such lien shall not be treated as similar to a mortgage until after it has become due and payable and the organization has had an

opportunity to pay such lien in accordance with State law. Liens similar to mortgages include (but are not limited to):

(i) Deeds of trust,

(ii) Conditional sales contracts,

(iii) Chattel mortgages,

(iv) Security interests under the Uniform Commercial Code,

(v) Pledges,

(vi) Agreements to hold title in escrow, and

(vii) Tax liens (other than those described in the third sentence of this subparagraph).

(3) Certain encumbered property acquired by gift, bequest or devise—(i) Bequest or devise. Where property subject to a mortgage is acquired by an organization by bequest or devise, the outstanding principal indebtedness secured by such mortgage is not to be treated as "acquisition indebtedness" during the 10-year period following the date of acquisition. For purposes of the preceding sentence, the date of acquisition is the date the organization receives the property.

(ii) Gifts. If an organization acquires property by gift subject to a mortgage, the outstanding principal indebtedness secured by such mortgage shall not be treated as "acquisition indebtedness" during the 10-year period following the date of such gift, so long as—

(a) The mortgage was placed on the property more than 5 years before the date of the gift, and

(b) The property was held by the donor for more than 5 years before the date of the gift.

For purposes of the preceding sentence, the date of the gift is the date the organization receives the property.

(iii) Limitation. Subdivisions (i) and (ii) of this subparagraph shall not apply if—

(a) The organization assumes and agrees to pay all or any part of the indebtedness secured by the mortgage, or

(b) The organization makes any payment for the equity owned by the decedent or the donor in the property (other than a payment pursuant to an annuity excluded from the definition of "acquisition indebtedness" by paragraph (e) of this section).

Whether an organization has assumed and agreed to pay all or any part of an indebtedness in order to acquire the property shall be determined by the facts and circumstances of each situation.

(iv) Examples. The application of this subparagraph may be illustrated by the following examples:

Example (1). A dies on January 1, 1971. His will devises an office building subject to a mortgage to U, an exempt organization described in section 501(c)(3). U does not at any time assume the mortgage. For the period 1971 through 1980, the outstanding principal indebtedness secured by the mortgage is not acquisition indebtedness. However, after December 31, 1980, the outstanding principal indebtedness secured by the mortgage is acquisition indebtedness if the building is otherwise treated as debt-financed property.

Example (2). Assume the facts as stated in example (1) except that on January 1, 1975, U assumes the mortgage. After January 1, 1975, the outstanding principal indebtedness secured by the mortgage is acquisition indebtedness if the building is otherwise treated as debt-financed property.

(4) Bargain sale before October 9, 1969. Where property subject to a mortgage is acquired by an organization before October 9, 1969, the outstanding principal indebtedness secured by such mortgage is not to be treated as "acquisition indebtedness" during the 10-year period following the date of acquisition if—

(i) The mortgage was placed on the property more than 5 years before the purchase, and

(ii) The organization paid the seller a total amount no greater than the amount of the seller's cost (including attorney's fees) directly related to the transfer of such property to the organization, but in any event no more than 10 percent of the value of the seller's equity in the property transferred.

(c) Extension of obligations—(1) In general. An extension, renewal, or refinancing of an obligation evidencing a preexisting indebtedness is considered as a continuation of the old indebtedness to the extent the outstanding principal amount thereof is not increased. Where the principal amount of the modified obligation exceeds the outstanding principal amount of the preexisting indebtedness, the excess shall be treated as a separate indebtedness for purposes of section 514 and the regulations thereunder. For example, if the interest rate on an obligation incurred prior to June 28, 1966, by an exempt university is modified subsequent to such date, the modified obligation shall be deemed to have been incurred prior to June 28, 1966. Thus, such an indebtedness will not be treated as acquisition indebtedness for taxable years beginning before January 1, 1972, unless the original indebtedness was business lease indebtedness (as defined in § 1.514(g)–1).

(2) **Extension or renewal.** In general, any modification or substitution of the terms of an obligation by the organization shall be an extension or renewal of the original obligation, rather than the creation of a new indebtedness to the extent that the outstanding principal amount of the indebtedness is not increased. The following are examples of acts which result in the extension or renewal of an obligation:

(i) Substitution of liens to secure the obligation;

(ii) Substitution of obligees, whether or not with the consent of the organization;

(iii) Renewal, extension or acceleration of the payment terms of the obligation; and

(iv) Addition, deletion, or substitution of sureties or other primary or secondary obligors.

(3) **Allocation.** In cases where the outstanding principal amount of the modified obligation exceeds the outstanding principal amount of the unmodified obligation and only a portion of such refinanced indebtedness is to be treated as acquisition indebtedness, payments on the amount of the refinanced indebtedness shall be apportioned prorata between the amount of the preexisting indebtedness and the excess amount. For example, assume that an organization has an outstanding principal indebtedness of $500,000 which is treated as acquisition indebtedness. It borrows another $100,000, which is not acquisition indebtedness, from the same lending institution and gives the lender a $600,000 note for its total obligation. In this situation, a payment of $60,000 on the amount of the total obligation would reduce the acquisition indebtedness by $50,000 and the excess indebtedness by $10,000.

(d) **Indebtedness incurred in performing exempt purpose.** "Acquisition indebtedness" does not include the incurrence of an indebtedness inherent in the performance or exercise of the purpose or function constituting the basis of the organization's exemption. Thus, "acquisition indebtedness" does not include the indebtedness incurred by an exempt credit union in accepting deposits from its members or the obligation incurred by an exempt organization in accepting payments from its members to provide such members with insurance, retirement or other similar benefits.

(e) **Annuities—(1) Requirements.** The obligation to make payment of an annuity is not "acquisition indebtedness" if the annuity meets all the following requirements—

(i) It must be the sole consideration (other than a mortgage to which paragraph (b)(3) of this section applies) issued in exchange for the property acquired;

(ii) At the time of the exchange, the present value of the annuity (determined in accordance with subparagraph (2) of this paragraph) must be less than 90 percent of the value of the prior owner's equity in the property received in the exchange;

(iii) The annuity must be payable over the life of one individual in being at the time the annuity is issued, or over the lives of two individuals in being at such time; and

(iv) The annuity must be payable under a contract which—

(a) Does not guarantee a minimum number of payments or specify a maximum number of payments, and

(b) Does not provide for any adjustment of the amount of the annuity payments by reference to the income received from the transferred property or any other property.

(2) **Valuation.** For purposes of this paragraph, the value of an annuity at the time of exchange shall be computed in accordance with section 1011(b), § 1.1011–2(e)(1)(iii)(b)(2), and section 3 of Rev. Rul. 62–216, C.B. 1962–2, 30.

(3) **Examples.** The application of this paragraph may be illustrated by the following examples. For purposes of these examples it is assumed that the property transferred is used for purposes other than those described in section 514(b)(1)(A), (B), (C), or (D).

Example (1). On January 1, 1971, X, an exempt organization, receives property valued at $100,000 from donor A, a male aged 60. In return X promises to pay A $6,000 a year for the rest of A's life, with neither a minimum nor maximum number of payments specified. The annuity is payable on December 31, of each year. The amounts paid under the annuity are not dependent on the income derived from the property transferred to X. The present value of this annuity is $81,156, determined in accordance with Table A of Rev. Rul. 62–216. Since the value of the annuity is less than 90 percent of A's equity in the property transferred and the annuity meets all the other requirements of subparagraph (1) of this paragraph, the obligation to make annuity payments is not acquisition indebtedness.

Example (2). On January 1, 1971, B transfers an office building to Y, an exempt university, subject to a mortgage. In return Y agrees to pay B $5,000 a year for the rest of his life, with neither a minimum nor maximum number of payments specified. The amounts paid under the annuity are not dependent on the income derived from the property transferred to Y. It is determined that the actual value of the annuity is less than 90 percent of the value of B's equity in the property

transferred. Y does not assume the mortgage. For the taxable years 1971 through 1980, the outstanding principal indebtedness secured by the mortgage is not treated as acquisition indebtedness. Further, Y's obligation to make annuity payments to B never constitutes acquisition indebtedness.

(f) Certain Federal financing. "Acquisition indebtedness" does not include an obligation to finance the purchase, rehabilitation, or construction of housing for low and moderate income persons to the extent that it is insured by the Federal Housing Administration. Thus, for example, to the extent that an obligation is insured by the Federal Housing Administration under section 221(d)(3) (12 U.S.C. 1715(I)(d)(3)) or section 236 (12 U.S.C. 1715z–1) of title II of the National Housing Act, as amended, the obligation is not "acquisition indebtedness".

(g) Certain obligations of charitable remainder trusts. For purposes of section 664(c) and § 1.664–1(c), a charitable remainder trust (as defined in § 1.664–1(a)(1)(iii)(a)) does not incur "acquisition indebtedness" when the sole consideration it is required to pay in exchange for unencumbered property is an "annuity amount" or a "unitrust amount" (as defined in § 1.664–1(a)(1)(iii)(b) and (c)).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7229, 37 FR 28151, Dec. 21, 1972; 38 FR 21918, Aug. 14, 1973; T.D. 7698, 45 FR 33973, May 21, 1980]

§ 1.514(d)–1 Basis of debt-financed property acquired in corporate liquidation.

(a) If debt-financed property is acquired by an exempt organization in a complete or partial liquidation of a corporation in exchange for its stock, the organization's basis in such property shall be the same as it would be in the hands of the transferor corporation, increased by the amount of gain recognized to the transferor corporation upon such distribution and by the amount of any gain which is includible, on account of such distribution, in the gross income of the organization as unrelated debt-financed income.

(b) The application of this section may be illustrated by the following example:

Example. On July 1, 1970, T, an exempt trust, exchanges $15,000 of borrowed funds for 50 percent of the shares of M Corporation's stock. M uses $35,000 of borrowed funds in acquiring depreciable assets which are not used at any time for purposes described in section 514(b)(1)(A), (B), (C), or (D). On July 1, 1978, and for the 12-month period preceding this date, T's acquisition indebtedness with respect to M's stock has been $3,000. On this date, there is a complete liquidation of M Corporation to which section 331(a)(1) applies. In the liquidation T receives a distribution in kind of depreciable assets and assumes $7,000 of M's indebtedness which remains unpaid with respect to the depreciable assets. On this date, M's adjusted basis of these depreciable assets is $9,000, and such assets have a fair market value of $47,000. M recognizes gain of $6,000 with respect to this liquidation pursuant to sections 1245 and 1250. T realizes a gain of $25,000 (the difference between the excess of fair market value of the property received over the indebtedness assumed, $40,000 ($47,000–$7,000) and T's basis in M's stock, $15,000). A portion of this gain is to be treated as unrelated debt-financed income. This amount is determined by multiplying T's gain of $25,000 by the debt/basis percentage. The debt/basis percentage is 20 percent, the ratio which the average acquisition indebtedness ($3,000) is of the average adjusted basis ($15,000). Thus, $5,000 (20 percent of $25,000) is unrelated debt-financed income. This amount and the gain recognized pursuant to sections 1245 and 1250 are added to M's basis to determine T's basis in the property received. Consequently, T's basis in the property received from M Corporation is $20,000, determined as follows:

M Corporation's adjusted basis	$9,000
Gain recognized by M Corporation on the distribution	6,000
Unrelated debt-financed income recognized by T with respect to the distribution	5,000
T's transferred basis	20,000

[T.D. 7229, 37 FR 28153, Dec. 21, 1972]

§ 1.514(e)–1 Allocation rules.

Where only a portion of property is debt-financed property, proper allocation of the basis, indebtedness, income, and deductions with respect to such property must be made to determine the amount of income or gain derived from such property which is to be treated as unrelated debt-financed income. See examples (2) and (3) of paragraph (b)(1)(iii) of § 1.514(b)–1 and examples (1), (2), and (3) of paragraph (b)(3)(iii) of § 1.514(b)–1 for illustrations of proper allocation.

[T.D. 7229, 37 FR 28153, Dec. 21, 1972]

§ 1.514(f)–1 Definition of business lease.

(a) In general. The term "business lease" means any lease, with certain exceptions discussed in paragraph (c) of this section, for a term of more than 5 years of real property by an organization subject to section 511 (or by a partnership of which it is a member) if at the close of the organization's taxable year there is a business lease indebtedness as defined in section 514(g) and § 1.514(g)–1 with respect to such property. For the purpose of this section the term "real property" and the term "premises" include personal property of the lessor tax-exempt organization leased by it to a lessee of its real estate if the lease of such personal property is made under, or in connection with, the lease of such real estate. For amounts of business lease rents and deductions to be included in computing unrelated business taxable income for taxable years beginning before January 1, 1970, see § 1.514(a)–2.

(b) **Special rules.** (1) In computing the term of the lease, the period for which a lease may be renewed or extended by reason of an option contained therein shall be considered as part of the term. For example, a 3-year lease with an option for renewal for another such period is considered a lease for a term of 6 years. Another example is the case of a 1-year lease with option of renewal for another such term, where the parties at the end of each year renew the arrangement. In this case, during the fifth year (but not during the first 4 years), the lease falls within the 5-year rule, since the lease then involves 5 years and there is an option for the sixth year. In determining the term of the lease, an option for renewal of the lease is taken into account whether or not the exercise of the option depends upon conditions or contingencies.

(2) If the property is acquired subject to a lease, the term of such lease shall be considered to begin on the date of such acquisition. For example, if an exempt organization purchases, in whole or in part with borrowed funds, real property subject to a 10-year lease which has 3 years left to run, and such lease contains no right of renewal or extension, the lease shall be considered a 3-year lease and hence does not meet the definition of a business lease in section 514(f) and paragraph (a) of this section. However, if this lease contains an option to renew for a period of 3 years or more, it is a business lease.

(3) Under the provisions of section 514(f)(2)(B) a lease is considered as continuing for more than 5 years if the same lessee has occupied the premises for a total period of more than 5 years, whether the occupancy is under one or more leases, renewals, extensions, or continuations. Continued occupancy shall be considered to be by the same lessee if the occupants during the period are so related that losses in respect of sales or exchanges of property between them would be disallowed under section 267(a). Such period shall be considered as commencing not earlier than the date of the acquisition of the property by the tax-exempt organization or trust. This rule is applicable only in the sixth and succeeding years of such occupancy by the same lessee. See, however, paragraph (c)(3) of this section.

(c) **Exceptions.** (1) A lease shall not be considered a business lease if such lease is entered into primarily for a purpose which is substantially related (aside from the need of such organization for income or funds, or the use it makes of the rents derived) to the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption. For example, where a tax-exempt hospital leases real property owned by it to an association of doctors for use as a clinic, the rents derived under such lease would not be included in computing unrelated business taxable income if the clinic is substantially related to the carrying on of hospital functions. See § 1.513—1 for principles applicable in determining whether there is a substantial relationship to the exempt purpose of an organization.

(2) A lease is not a business lease if the lease is of premises in a building primarily designed for occupancy and occupied by the tax-exempt organization.

(3) If a lease for more than 5 years to a tenant is for only a portion of the real property, and space in the real property is rented during the taxable year under a lease for not more than 5 years to any other tenant of the tax-exempt organization, all leases of the real property for more than 5 years shall be considered as business leases during the taxable year only if—

(i) The rents derived from the real property during the taxable year under leases for more than 5 years represent 50 percent or more of the total rents derived during the taxable year from the real property; or the area of the premises occupied under leases for more than 5 years represents, at any time during the taxable year, 50 percent or more of the total area of the real property rented at such time; or

(ii) The rent derived from the real property during the taxable year from any tenant under a lease for more than 5 years, or from a group of tenants (under such leases) who are either members of an affiliated group (as defined in section 1504) or are partners, represents more than 10 percent of the total rents derived during the taxable year from such property; or the area of the premises occupied by any one such tenant, or by any such group of tenants, represents at any time during the taxable year more than 10 percent of the total area of the real property rented at such time.

In determining whether 50 percent or more of the total rents are derived from leases for more than 5 years, or whether 50 percent or more of the total area is occupied under leases for more than 5 years—

(iii) An occupancy which is considered to be a lease of more than 5 years solely by reason of the provisions of paragraph (b)(3) of this subpara-

graph shall not be treated as such a lease for purposes of subdivision (i) of this subparagraph, and

(iv) An occupancy which is considered to be a lease of more than 5 years solely by reason of the provisions of paragraph (b)(3) of this section shall be treated as such a lease for purposes of subdivision (ii) of this subparagraph, and

(v) If during the last half of the term of a lease a new lease is made to take effect after the expiration of such lease, the unexpired portion of the first lease will not be added to the second lease to determine whether such second lease is a lease for more than 5 years for purposes of subdivision (i) of this subparagraph.

(4) The application of subparagraph (3) of this paragraph may be illustrated by the following example:

Example. In 1954 an educational organization, which is on the calendar year basis, begins the erection of an 11-story apartment building using funds borrowed for that purpose, and immediately leases for a 10-year term the first floor to a real estate development company to sublet for stores and shops. As fast as the new apartments are completed, they are rented on an annual basis. At the end of 1959 all except the 10th and 11th floors are rented. Those two floors are completed during 1960 and rented. Assume that for 1954 and each subsequent taxable year through 1959, and for the taxable year 1963, the gross rental for the first floor represents more than 10 percent of the total gross rents derived during the taxable year from the building. Under this set of facts the 10-year lease of the first floor would be considered to be a business lease for all except the taxable years 1961, 1962, and 1964.

[T.D. 7229, 37 FR 28154, Dec. 21, 1972]

§ 1.514(g)–1 Business lease indebtedness.

(a) Definition. The term "business lease indebtedness" means, with respect to any real property leased by a tax-exempt organization for a term of more than 5 years, the unpaid amount of—

(1) The indebtedness incurred by the lessor tax-exempt organization in acquiring or improving such property;

(2) The indebtedness incurred by the lessor tax-exempt organization prior to the acquisition or improvement of such property if such indebtedness would not have been incurred but for such acquisition or improvement; and

(3) The indebtedness incurred by the lessor tax-exempt organization subsequent to the acquisition or improvement of such property if such indebtedness would not have been incurred but for such acquisition or improvement and the incurrence of the indebtedness was reasonably foreseeable at the time of such acquisition or improvement.

See paragraph (i) of this section with respect to subsidiary corporations.

(b) Examples. The rules of section 514(g) respecting business leases also cover certain cases where the leased property itself is not subject to an indebtedness. For example, they apply to cases such as the following:

Example (1). A university pledges some of its investment securities with a bank for a loan and uses the proceeds of such loan to purchase (either directly or through a subsidiary corporation) a building, which building is subject to a lease that then has more than 5 years to run. This would be an example of a business lease indebtedness incurred prior to the acquisition of the property which would not have been incurred but for such acquisition.

Example (2). If the building itself in example (1) in this paragraph is later mortgaged to raise funds to release the pledged securities, the lease would continue to be a business lease.

Example (3). If a scientific organization mortgages its laboratory building to replace working capital used in remodeling another one of its buildings or a building held by its subsidiary corporation, which other building is free of indebtedness and is subject to a lease that then has more than 5 years to run, the lease would be a business lease inasmuch as the indebtedness though incurred subsequent to the improvement of such property would not have been incurred but for such improvement, and the incurrence of the indebtedness was reasonably foreseeable when, to make such improvement, the organization reduced its working capital below the amount necessary to continue current operations.

(c) Property acquired subject to lien. Where real property is acquired subject to a mortgage or similar lien, whether the acquisition be by gift, bequest, devise, or purchase, the amount of the indebtedness secured by such mortgage or lien is a business lease indebtedness (unless paragraph (d)(1) of this section applies) even though the lessor does not assume or agree to pay the indebtedness. For example, a university pays $100,000 for real estate valued at $300,000 and subject to a $200,000 mortgage. For the purpose of the tax on unrelated business taxable income, the result is the same as if $200,000 of borrowed funds had been used to buy the property.

(d) Certain property acquired by gifts, etc. (1) Where real property was acquired by gift, bequest, or devise, before July 1, 1950, subject to a mortgage or other similar lien, the amount of such mortgage or other similar lien shall not be considered as an indebtedness of the lessor tax-exempt organization incurred in acquiring such property. An indebtedness not otherwise covered by this exception is not brought within the exception by reason of a transfer of the property between a parent and its subsidiary corporation.

(2) Where real property was acquired by gift, bequest, or devise, before July 1, 1950, subject to a lease requiring improvements in such property upon the happening of stated contingencies, indebtedness incurred in improving such property in accordance with the terms of such lease shall not be considered as indebtedness described in section 514(g) and in this section. An indebtedness not otherwise covered by this exception is not brought within the exception by reason of a transfer of the property between a parent and its subsidiary corporation.

(e) Certain corporations described in section 501(c)(2). In the case of a title holding corporation described in section 501(c)(2), all of the stock of which was acquired before July 1, 1950, by an organization described in section 501(c)(3), (5), or (6) (and more than one-third of such stock was acquired by such organization by gift or bequest), any indebtedness incurred by such corporation before July 1, 1950, and any indebtedness incurred by such corporation on or after such date in improving real property in accordance with the terms of a lease entered into before such date, shall not be considered an indebtedness described in section 514(g) and in this section with respect to either such section 501(c)(2) corporation or such section 501(c)(3), (5), or (6) organization.

(f) Certain trusts described in section 401(a). In the case of a trust described in section 401(a), or in the case of a corporation described in section 501(c)(2) all of the stock of which was acquired before March 1, 1954, by such a trust, any indebtedness incurred by such trust or such corporation before such date, in connection with real property which is leased before such date, and any indebtedness incurred by such trust or such corporation on or after such date necessary to carry out the terms of such lease, shall not be considered as an indebtedness described in section 514(g) and in this section.

(g) Business lease on portion of property. Where only a portion of the real property is subject to a business lease, proper allocation of the indebtedness applicable to the whole property must be made to the premises covered by the lease. See example (2) of paragraph (b)(3) of § 1.514(a)–2.

(h) Special rule applicable to trusts described in section 401(a). If an employees' trust described in section 401(a) lends any money to another such employees' trust of the same employer, for the purpose of acquiring or improving real property, such loan will not be treated as an indebtedness of the borrowing trust except to the extent that the loaning trust—

(1) Incurs any indebtedness in order to make such loan;

(2) Incurred indebtedness before the making of such loan which would not have been incurred but for the making of such loan; or

(3) Incurred indebtedness after the making of such loan which would not have been incurred but for the making of such loan and which was reasonably foreseeable at the time of making such loan.

(i) Subsidiary corporations. The provisions of section 514(f), (g), and (h) are applicable whether or not a subsidiary corporation of the type described in section 501(c)(2) is availed of in making the business lease. For example, assume a parent organization borrows funds to purchase realty and sets up a separate section 501(c)(2) corporation as a subsidiary to hold the property. Such subsidiary corporation leases the property for a period of more than 5 years, collects the rents and pays over all of the income, less expenses, to the parent organization, the parent organization being liable for the indebtedness. Under these assumed facts, the lease by section 501(c)(2) subsidiary corporation would be a business lease with respect to such subsidiary corporation, and the rental income would be subject to the tax, whether or not the subsidiary itself assumes the indebtedness and whether or not the property is subject to the indebtedness.

(j) Certain trusts described in section 501(c)(17). (1) In the case of a supplemental unemployment benefit trust described in section 501(c)(17), or in the case of a corporation described in section 501(c)(2) all of the stock of which was acquired before January 1, 1960, by such a trust, any indebtedness incurred by such trust or such corporation before such date, in connection with real property which is leased before such date, and any indebtedness incurred by such trust or such corporation on or after such date necessary to carry out the terms of such lease, shall not be considered as an indebtedness described in section 514(g) and in this section.

(2) If a supplemental unemployment benefit trust described in section 501(c)(17) lends any money to another such supplemental unemployment benefit trust forming part of the same plan, for the purpose of acquiring or improving real property, such loan will not be treated as an indebtedness of the borrowing trust except to the extent that the loaning trust—

(i) Incurs any indebtedness in order to make such loan;

(ii) Incurred indebtedness before the making of such loan which would not have been incurred but for the making of such loan; or

(iii) Incurred indebtedness after the making of such loan which would not have been incurred but for the making of such loan and which was reasonably foreseeable at the time of making such loan.

[T.D. 7229, 37 FR 28155, Dec. 21, 1972]

Farmers' Cooperatives

§ 1.521–1 Farmers' cooperative marketing and purchasing associations; requirements for exemption under section 521.

(a)(1) Cooperative associations engaged in the marketing of farm products for farmers, fruit growers, livestock growers, dairymen, etc., and turning back to the producers the proceeds of the sales of their products, less the necessary operating expenses, on the basis of either the quantity or the value of the products furnished by them, are exempt from income tax except as otherwise provided in section 522, or part I, subchapter T chapter 1 of the Code, and the regulations thereunder. For instance, cooperative dairy companies which are engaged in collecting milk and disposing of it or the products thereof and distributing the proceeds, less necessary operating expenses, among the producers upon the basis of either the quantity or the value of milk or of butterfat in the milk furnished by such producers, are exempt from the tax. If the proceeds of the business are distributed in any other way than on such a proportionate basis, the association does not meet the requirements of the Code and is not exempt. In other words, nonmember patrons must be treated the same as members insofar as the distribution of patronage dividends is concerned. Thus, if products are marketed for nonmember producers, the proceeds of the sale, less necessary operating expenses, must be returned to the patrons from the sale of whose goods such proceeds result, whether or not such patrons are members of the association. In order to show its cooperative nature and to establish compliance with the requirement of the Code that the proceeds of sales, less necessary expenses, be turned back to all producers on the basis of either the quantity or the value of the products furnished by them, it is necessary for such an association to keep permanent records of the business done both with members and nonmembers. The Code does not require, however, that the association keep ledger accounts with each producer selling through the association. Any permanent records which show that the association was operating during the taxable year on a cooperative basis in the distribution of patronage dividends to all producers will suffice. While under the Code patronage dividends must be paid to all producers on the same basis, this requirement is complied with if an association instead of paying patronage dividends to nonmember producers in cash, keeps permanent records from which the proportionate shares of the patronage dividends due to nonmember producers can be determined, and such shares are made applicable toward the purchase price of a share of stock or of a membership in the association. See, however, paragraph (c)(1) of § 1.1388–1 for the meaning of "payment in money" for purposes of qualifying a written notice of allocation.

(2) An association which has capital stock will not for such reason be denied exemption (i) if the dividend rate of such stock is fixed at not to exceed the legal rate of interest in the State of incorporation or 8 percent per annum, whichever is greater, on the value of the consideration for which the stock was issued, and (ii) if substantially all of such stock (with the exception noted below) is owned by producers who market their products or purchase their supplies and equipment through the association. Any ownership of stock by others than such actual producers must be satisfactorily explained in the association's application for exemption. The association will be required to show that the ownership of its capital stock has been restricted as far as possible to such actual producers. If by statutory requirement all officers of an association must be shareholders, the ownership of a share of stock by a nonproducer to qualify him as an officer will not destroy the association's exemption. Likewise, if a shareholder for any reason ceases to be a producer and the association is unable, because of a constitutional restriction or prohibition or other reason beyond the control of the association, to purchase or retire the stock of such nonproducer, the fact that under such circumstances a small amount of the outstanding capital stock is owned by shareholders who are no longer producers will not destroy the exemption. The restriction placed on the ownership of capital stock of an exempt cooperative association shall not apply to nonvoting preferred stock, provided

the owners of such stock are not entitled or permitted to participate, directly or indirectly, in the profits of the association, upon dissolution or otherwise, beyond the fixed dividends.

(3) The accumulation and maintenance of a reserve required by State statute, or the accumulation and maintenance of a reasonable reserve or surplus for any necessary purpose, such as to provide for the erection of buildings and facilities required in business or for the purchase and installation of machinery and equipment or to retire indebtedness incurred for such purposes, will not destroy the exemption. An association will not be denied exemption because it markets the products of nonmembers, provided the value of the products marketed for nonmembers does not exceed the value of the products marketed for members. Anyone who shares in the profits of a farmers' cooperative marketing association, and is entitled to participate in the management of the association, must be regarded as a member of such association within the meaning of section 521.

(b) Cooperative associations engaged in the purchasing of supplies and equipment for farmers, fruit growers, livestock growers, dairymen, etc., and turning over such supplies and equipment to them at actual cost, plus the necessary operating expenses, are exempt. The term "supplies and equipment" as used in section 521 includes groceries and all other goods and merchandise used by farmers in the operation and maintenance of a farm or farmer's household. The provisions of paragraph (a) of this section relating to a reserve or surplus and to capital stock shall apply to associations coming under this paragraph. An association which purchases supplies and equipment for nonmembers will not for such reason be denied exemption, provided the value of the purchases for nonmembers does not exceed the value of the supplies and equipment purchased for members, and provided the value of the purchases made for nonmembers who are not producers does not exceed 15 percent of the value of all its purchases.

(c) In order to be exempt under either paragraph (a) or (b) of this section an association must establish that it has no taxable income for its own account other than that reflected in a reserve or surplus authorized in paragraph (a) of this section. An association engaged both in marketing farm products and in purchasing supplies and equipment is exempt if as to each of its functions it meets the requirements of the Code. Business done for the United States or any of its agencies shall be disregarded in determining the right to exemption under section 521 and this section. An association to be entitled to exemption must not only be organized but actually operated in the manner and for the purposes specified in section 521.

(d) Cooperative organizations engaged in occupations dissimilar from those of farmers, fruit growers, and the like, are not exempt.

(e) An organization is not exempt from taxation under this section merely because it claims that it complies with the requirements prescribed therein. In order to establish its exemption every organization claiming exemption under section 521 is required to file a Form 1028. The Form 1028, executed in accordance with the instructions on the form or issued therewith, should be filed with the district director for the internal revenue district in which is located the principal place of business or principal office of the organization. However, an organization which has been granted exemption under the provisions of the Internal Revenue Code of 1939 or prior law may rely on that ruling, unless affected by substantive changes in the Internal Revenue Code of 1954 or any changes in the character, purposes, or methods of operation of the organization, and it is not necessary in such case for the organization to request a new determination as to its exempt status.

(f) A cooperative association will not be denied exemption merely because it makes payments solely in nonqualified written notices of allocation to those patrons who do not consent as provided in section 1388 and § 1.1388–1, but makes payments of 20 percent in cash and the remainder in qualified written notices of allocation to those patrons who do so consent. Nor will such an association be denied exemption merely because, in the case of patrons who have so consented, payments of less than $5 are made solely in nonqualified written notices of allocation while payments of $5 or more are made in the form of 20 percent in cash and the remainder in qualified written notices of allocation. In addition, a cooperative association will not be denied exemption if it pays a smaller amount of interest or dividends on nonqualified written notices of allocation held by persons who have not consented as provided in section 1388 and § 1.1388–1 (or on per-unit retain certificates issued to patrons who are not qualifying patrons with respect thereto within the meaning of § 1.61–5(d)(2)) than it pays on qualified written notices of allocation held by persons who have so consented (or on per-unit retain certificates issued to patrons who are qualifying patrons with respect thereto) provided that the amount of the interest or dividend reduction is reasonable in relation to

the fact that the association receives no tax benefit with respect to such nonqualified written notices of allocation (or such certificates issued to non-qualifying patrons) until redeemed. However, such an association will be denied exemption if it otherwise treats patrons who have not consented (or are not qualifying patrons) differently from patrons who have consented (or are qualifying patrons), either with regard to the original payment or allocation or with regard to the redemption of written notices of allocation or per-unit retain certificates. For example, if such an association pays patronage dividends in the form of written notices of allocation accompanied by qualified checks, and provides that any patron who does not cash his check within a specified time will forfeit the portion of the patronage dividend represented by such check, then the cooperative association will be denied exemption under this section as it does not treat all patrons alike.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6643, 28 FR 3162, April 2, 1963; T.D. 6855, 30 FR 13135, Oct. 15, 1965]

§ 1.522–1 Tax treatment of farmers' cooperative marketing and purchasing associations exempt under section 521.

(a) In general. (1) Section 522 is applicable to farmers', fruit growers', or like associations organized and operated on a cooperative basis in the manner prescribed in section 521. Although such an association is subject to both normal tax and surtax, as in the case of corporations generally, certain special rules for the computation of taxable income are provided in section 522(b) and § 1.522–2. For the purpose of any law which refers to organizations exempt from income taxes such an association shall, however, be considered as an organization exempt under section 501. Thus, the provisions of section 243, providing a credit for dividends received from a domestic corporation subject to taxation, are not applicable to dividends received from a cooperative association subject to section 522. The provisions of section 1501, relating to consolidated returns, are likewise not applicable.

(2) Rules governing the manner in which amounts allocated as patronage dividends, refunds, or rebates are to be taken into account in computing the taxable income of such an association are set forth in § 1.522–3. For the tax treatment, as to patrons, of amounts received during the taxable year as patronage dividends, rebates, or refunds, see section 61 and § 1.61–5.

(b) Meaning of terms. For purposes of §§ 1.522–1 to 1.522–3, inclusive, §§ 1.6044–1 and 1.61–5, the following terms shall have the meaning ascribed below:

(1) **Cooperative association.** The term "cooperative association" includes any corporation operating on a cooperative basis and allocating amounts to patrons on the basis of the business done with or for such patrons, except that the term does not include any cooperative or nonprofit corporation (including any cooperative or nonprofit corporation engaged in rural electrification) exempt from taxation under section 501(a) and described in section 501(c)(12) or (15) or any corporation subject to a tax imposed by subchapter L, chapter 1 of the Code (relating to insurance companies).

(2) **Patron.** The term "patron" includes any person with whom or for whom the cooperative association does business on a cooperative basis, whether a member or a nonmember of the cooperative association, and whether an individual, a trust, estate, partnership, company, corporation, or cooperative association.

(3) **Allocation.** The term "allocation" includes distributions made by a cooperative association to a patron in cash, merchandise, capital stock, revolving fund certificates, retain certificates, certificates of indebtedness, letters of advice, similar documents, or in any other manner whereby there is disclosed to a patron the dollar amount apportioned on the books of the association for the account of such patron. Thus, a mere credit to the account of a patron on the books of the cooperative association, without disclosure to the patron, is not an allocation.

(4) **Patronage dividends, rebates, and refunds.** The term "patronage dividend, rebate, or refund" includes any amount allocated by a cooperative association, to the account of a patron on the basis of the business done with or for such patron. The following are not patronage dividends, rebates, or refunds:

(i) Amounts distributed in redemption of capital stock, or in redemption or satisfaction of certificates of indebtedness, revolving fund certificates, retain certificates, letters of advice, or other similar documents;

(ii) Amounts allocated (whether in cash, merchandise, capital stock, revolving fund certificates, retain certificates, certificates of indebtedness, letters of advice, or in some other manner that discloses to each patron the amount of such dividend, refund, or rebate) by the association for

products of members or other patrons to the extent such amounts are fixed without reference to the earnings of the cooperative association. For this purpose, the term "earnings" includes the excess of amounts retained (or assessed) by the association to cover expenses or other items over the amount of such expenses or other items.

(c) Examples. The application of paragraph (b) of this section may be illustrated by the following examples:

Example (1). Cooperative A, a marketing association operating on a pooling basis, receives the products of patron W on January 5, 1954. On the same day Cooperative A advances to W 45 cents per unit for the products so delivered and allocates to him a "retain certificate" having a face value calculated at the rate of 5 cents per unit. During the operation of the pool, and before substantially all the products in the pool are disposed of, Cooperative A advances to W an additional 40 cents per unit, the amount being determined by reference to the market price of the products sold and the anticipated price of the unsold products. At the close of the pool on November 10, 1954, Cooperative A determines the excess of its receipts over the sum of its expenses and its previous advances to patrons, and allocates to W an additional 3 cents per unit and shares of the capital stock of A having an aggregate of face value calculated at the rate of 2 cents per unit.

The amount of patronage dividends, rebates, or refunds allocated to W during 1954 amount to 5 cents per unit, consisting of the aggregate of the following per-unit allocations: The amount of cash distribution (3 cents), and the face value of the capital stock of A (2 cents), which are fixed with reference to the earnings of A. The amount of the two distributions in cash (85 cents) and the face amount of the "retain certificate" (5 cents), which are fixed without reference to the earnings of A, do not constitute patronage dividends, rebates, or refunds.

Example (2). Cooperative B, a marketing association operating on a pooling basis, receives the products of patron X on March 5, 1954. On the same day Cooperative B pays to X $1.00 per unit for such products, this amount being determined by reference to the market price of the product when received, and issues to him a participation certificate having no face value but which entitles X on the close of the pool to the proceeds derived from the sale of his products less the previous payment of $1.00 and the expenses and other charges attributable to such products. On March 5, 1957, Cooperative B, having sold the products in the pool, having deducted the previous payments for such products, and having determined the expenses and other charges of the pool, redeems the participation certificate of X in cash for 10 cents per unit. The allocation made to X during 1957, amounting to 10 cents per unit, is a patronage dividend, rebate, or refund. Neither the payment to X in 1954 of $1.00 nor the issuance to him of the participation certificate in that year constitutes a patronage dividend, rebate, or refund within the meaning of this section.

Example (3). Cooperative C, a purchasing association, obtains supplies for patron Y on May 1, 1954, and receives in return therefor $100. On February 1, 1955, Cooperative C, having determined the excess of its receipts over its costs and expenses, allocates to Y a cash distribution of $1.00 and a revolving fund certificate of a face amount of $1.00. The amount of patronage dividends, rebates, or refunds allocated to Y for 1955 is $2.00, the aggregate of the cash distribution of $1.00, and the face amount, $1.00, of the revolving fund certificate.

Example (4). Cooperative D, a service association, sells the products of members on a fee basis. It receives the products of patron Z under an agreement not to pool his products with those of other members, to sell his products, and to deliver to him the proceeds of the sale. Patron Z makes payments to Cooperative D during 1954 aggregating $75 for service rendered him by Cooperative D during that year. On May 15, 1955, Cooperative D, having determined the excess of its receipts over its costs and expenses, allocates to Z a cash distribution of $2.00. Such amount is a patronage dividend, rebate, or refund allocated by Cooperative D during 1955.

(d) Returns of exempt cooperative associations. For requirements of annual returns by exempt cooperative associations, see sections 6012 and 6072(d) and paragraph (f) of § 1.6012–2.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.522–2 Manner of taxation of cooperative associations subject to section 522.

(a) In general. Farmers', fruit growers', or like associations, organized and operated in compliance with the requirements of section 521 and § 1.521–1 shall be subject to the taxes imposed by section 11 or section 1201, except that there shall be allowed as deductions from gross income, in addition to the other deductions allowable under chapter 1 of the Code, certain special deductions provided in section 522(b)(1)(A) and paragraph (c) of this section, and section 522(b)(1)(B) and paragraph (d) of this section. Amounts allocated as patronage dividends, refunds, or rebates, whether in cash, merchandise, capital stock, revolving fund certificates, retain certificates, certificates of indebtedness, letters of advice, or in some other manner that discloses to each patron the dollar amount allocated, with respect to patronage for the taxable year or for preceding taxable years, shall be taken into account in the manner provided in section 522 and in § 1.522–3.

(b) Cooperative association exempt from tax before January 1, 1952. (1) For the purpose of determining the method of accounting under section 446 in the case of a cooperative association which was exempt from tax for taxable years beginning prior to January 1, 1952, the method of accounting, recognized under sections 41, 42, and 43 of the Internal Revenue Code of 1939 and the regulations prescribed thereunder and utilized in the return of such association for its last taxable year to which the Internal Revenue Code of 1939 was applicable, shall be deemed to constitute the method of accounting regularly employed by the cooperative association. Any change from this method may be made only if permission is obtained from the Commissioner to change to another recognized method in accordance with section 446 and the regulations thereunder.

(2) In any case where inventories are an income-producing factor, see sections 471 and 472 and the regulations thereunder. The elective method of inventorying goods provided in section 472 may be adopted by the cooperative association for any taxable year beginning after December 31, 1953, in accordance with the requirements of section 472 and the regulations thereunder. However, in order to use such method for such a taxable year the cooperative association (unless it has used such method for a taxable year beginning after 1951 and before 1954) pursuant to an election exercised as provided in 26 CFR (1939) 39.-22(d)–3 (Regulations 118) must exercise the election provided in section 472 and the regulations thereunder, even if it may have utilized such method for accounting purposes for taxable years beginning before January 1, 1952.

(3) The following rules shall be applicable in computing the net operating loss deduction provided in section 172: No net operating loss carryover shall be allowed from a taxable year beginning prior to January 1, 1952, for which the cooperative association was exempt from tax under section 101(12) of the Internal Revenue Code of 1939. In the case of a taxable year beginning prior to January 1, 1952, for which the association was not exempt under section 101(12) of the Internal Revenue Code of 1939 and of any taxable year beginning after December 31, 1951, the amount of the net operating loss carryback or carryover from such year shall not be reduced by reference to the income of any taxable year beginning prior to January 1, 1952, for which the association was exempt from tax under section 101(12) of the Internal Revenue Code of 1939. However, any taxable year beginning prior to January 1, 1952, for which the cooperative association was exempt under section 101(12) of the Internal Revenue Code of 1939 shall be taken into account in determining the period for which a net operating loss may be carried back or carried over, as the case may be.

(4) The adjustments to the cost or other basis provided in sections 1011 and 1016 and the regulations thereunder, are applicable for the entire period since the acquisition of the property. Thus, proper adjustment to basis must be made under section 1016 for depreciation, obsolescence, amortization, and depletion for all taxable years beginning prior to January 1, 1952, although the cooperative association was exempt from tax under section 521 or corresponding provisions of prior law for such years. However, no adjustment for percentage or discovery depletion is to be made for any year during which the association was exempt from tax. If a cooperative association has made a proper election in accordance with section 1020 and the regulations prescribed thereunder with respect to a taxable year beginning before 1952 in which the association was not exempt from tax, the adjustment to basis for depreciation for such years shall be limited in accordance with the provisions of section 1016(a)(2).

(5) In the case of tax exempt and partially taxable bonds purchased at a premium and subject to amortization under section 171, proper adjustment to basis must be made to reflect amortization with respect to such premium from the date of acquisition of the bond. (For principles governing the method of computation, see the example in paragraph (b) of § 1.1016–9, relating to mutual savings banks, building and loan associations, and cooperative banks.) The basis of a fully taxable bond purchased at a premium shall be adjusted from the date of the election to amortize such premium in accordance with the provisions of section 171 except that no adjustment shall be allowable for such portion of the premium attributable to the period prior to the election.

(6) In the case of a mortgage acquired at a premium where the principal of such mortgage is payable in installments, adjustments to the basis for the premium must be made for all taxable years (whether or not the association was exempt from tax under section 521 during such years) in which installment payments are received. Such adjustments may be made on an individual mortgage basis or on a composite basis by reference to the average period of payments of the mortgage loans of such association. For the purpose of this adjustment, the term "premium" includes the excess of the acquisition value of the mortgage over its maturity value. The acquisition value of the mortgage is the cost including buying commissions, attorneys' fees or brokerage fees, but such value does not include amounts paid for accrued interest.

(c) **Deduction for dividends paid.** There is allowable as a deduction from the gross income of a cooperative association operated in compliance with the requirements of section 521 and § 1.521–1, amounts paid as dividends during the taxable year upon the capital stock of the cooperative association. For the purpose of the preceding sentence, the term "capital stock" includes common stock (whether voting or nonvoting), preferred stock, or any other form of capital represented by capital retain certificates, revolving fund certificates, letters of advice, or other evidence of a

proprietary interest in a cooperative association. Such deduction is applicable only to the taxable year in which the dividends are actually or constructively paid to the holder of capital stock or other proprietary interest of the cooperative association. If a dividend is paid by check and the check bearing a date within the taxable year is deposited in the mail, in a cover properly stamped and addressed to the shareholder at his last known address, at such time that in the ordinary handling of the mails the check would be received by such holder within the taxable year, a presumption arises that the dividend was paid to such holder in such year. The determination of whether a dividend has been paid to such holder by the corporation during its taxable year is in no way dependent upon the method of accounting regularly employed by the corporation in keeping its books. For further rules as to the determination of the right to a deduction for dividends paid, under certain specific circumstances, see section 561 and the regulations thereunder.

(d) **Deduction for amounts allocated from income not derived from patronage.** There is allowable as a deduction from the gross income of a cooperative association operated in compliance with the requirements of section 521 and § 1.521–1 amounts allocated during the taxable year to patrons with respect to its income not derived from patronage (whether or not such income was derived during such taxable year) whether such amounts are paid in cash, merchandise, capital stock, revolving fund certificates, retain certificates, certificates of indebtedness, letters of advice, or in some other manner that discloses to each patron the dollar amount allocated to him. For this purpose, allocations made after the close of the taxable year and on or before the 15th day of the ninth month following the close of the taxable year shall be considered as made on the last day of such taxable year to the extent that such allocations are attributable to income derived during the taxable year or during years prior to the taxable year. As used in this paragraph, the term "income not derived from patronage" means incidental income derived from sources not directly related to the marketing, purchasing, or service activities of the cooperative association. For example, income derived from the lease of premises, from investment in securities, from the sale or exchange of capital assets, constitutes income not derived from patronage. Business done with the United States shall constitute income not derived from patronage. In order that the deduction for income not derived from patronage may be applicable, it is necessary that the amount sought to be deducted be allocated on a patronage basis in proportion, insofar as is practicable, to the amount of business done by or for patrons during the period to which such income is attributable. Thus, if capital gains are realized from the sale or exchange of capital assets acquired and disposed of during the taxable year, income realized from such gains must be allocated to patrons of such year in proportion to the amount of business done by such patrons during the taxable year. Similarly, if capital gains are realized by the association from the sale or exchange of capital assets held for a period of more than one taxable year income realized from such gains must be allocated, in proportion insofar as is practicable, to the patrons of the taxable years during which the asset was owned by the association, and to the amount of business done by such patrons during such taxable years.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.522–3 Patronage dividends, rebates, or refunds; treatment as to cooperative associations entitled to tax treatment under section 522.

(a) **General rule.** Patronage dividends, refunds, or rebates, allocated by a cooperative association entitled to tax treatment under section 522 to a patron shall be taken into account in computing the gross income of such association for the taxable year, as an increase in its other cost of goods sold in the case of an association marketing products for patrons, or as a reduction in its gross receipts, in the case of an association purchasing supplies and equipment or performing services for patrons, as the case may be, if:

(1) The allocation is made in fulfillment and satisfaction of a valid obligation of such association to the patron, which obligation was in existence prior to the receipt by the cooperative association of the amount allocated, and

(2) The allocation is made on or before the 15th day of the ninth month following the close of the taxable year in which the amounts allocated were received by the cooperative association.

For the purpose of subparagraph (1) of this paragraph, amounts allocated by a cooperative association entitled to tax treatment under section 522 will be deemed allocated in fulfillment and satisfaction of a valid enforceable obligation, if made pursuant to provisions of the bylaws, articles of incorporation, or other contract, whereby the association is obligated to make such allocation after the retention of "reasonable reserves" and after

payment of dividends on capital stock or other proprietary capital interests. Notwithstanding the provisions of subparagraphs (1) and (2) of this paragraph, amounts allocated as patronage dividends, refunds, or rebates during the taxable year, on or before the 15th day of the ninth month following the close of such year, with respect to patronage for years preceding the taxable year, shall be taken into account as an increase in its other cost of goods sold, or as a reduction in gross receipts, for the taxable year, as the case may be, where retention as "reasonable reserves" of the amounts so allocated beyond the year in which earned was proper in accordance with the provisions of section 521 and where the allocation is made to the patron on a patronage basis is proportion insofar as is practicable, to the amount of business done by such patrons during the taxable year or years in which the retained amounts were received by the cooperative association.

(b) Examples. This section may be illustrated by the following examples:

Example (1). E, a cooperative association entitled to tax treatment under section 522, organized without capital stock, is engaged in the business of marketing products for its patrons on a non-pool basis. The by-laws of Cooperative E provide that there shall be allocated to patrons as patronage dividends within a reasonable time following the close of the year all of the gross returns from sales, less expenses of operation for the year and amounts retained as "reasonable reserves" necessary to the operation of Cooperative E. At the close of the taxable year, 1954, it is determined that from the gross returns from sales less operating expenses and all taxes for such year, $5,000 is to be retained as "reasonable reserves" for various necessary purposes of Cooperative E. It is assumed that the retention of such amount is proper in accordance with the provisions of section 521. Such $5,000 is apportioned on the books of Cooperative E to patrons of 1954 on a patronage basis, or permanent records are kept from which an apportionment to such patrons can be made. On March 1, 1955, pursuant to the terms of the by-laws, $200,000, the balance of the gross returns for the taxable year, is allocated to patrons of 1954 on the basis of patronage. $100,000 of such $200,000 is allocated in cash. The remaining $100,000 is allocated in "retain certificates", bearing no interest and redeemable in the discretion of the Board of Directors of Cooperative E. There may be added to the cost of goods sold by Cooperative E for 1954, $200,000 ($100,000 in cash, $100,000 in retain certificates), the total amount allocated as patronage dividends, rebates, or refunds in fulfillment and satisfaction of the obligation of the by-laws, on March 1, 1955, before the 15th day of the ninth month following the close of 1954. There may not be added to the cost of goods sold by Cooperative E for 1954, $5,000, the amount retained as reserves apportioned on the books, but not allocated as patronage dividends, rebates, or refunds.

Example (2). The facts are the same as example (1), it additionally appearing that at the close of 1955 it is determined by Cooperative E to allocate as cash patronage dividends, rebates, or refunds to patrons of 1954, $5,000, the amount retained as "reasonable reserves" for 1954 in accordance with the provisions of section 521. On March 1, 1956, such amount is allocated. There may be added to the cost of goods sold by Cooperative E for 1955, $5,000, the amount allocated with respect to patronage of a preceding year, 1954, properly maintained as a reserve under section 521.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.522–4 Taxable years affected.

Section 522 and §§ 1.522–1, 1.522–2, and 1.522–3, are applicable to taxable years beginning before January 1, 1963, and also to amounts paid during taxable years beginning after December 31, 1962, the tax treatment of which is not prescribed in section 1382 and the regulations thereunder. [T.D. 6643, 28 FR 3163, April 2, 1963]

§ 1.527–1 Political organizations; Generally.

Section 527 provides that a political organization is considered an organization exempt from income taxes for the purpose of any law which refers to organizations exempt from income taxes. A political organization is subject to tax only to the extent provided in section 527. In general, a political organization is an organization that is organized and operated primarily for an exempt function as defined in § 1.527–2(c). Section 527 provides that a political organization is taxed on its political organization taxable income (see § 1.527–4) which, in general, does not include the exempt function income (see § 1.527–3) of the political organization. Furthermore, section 527 provides that an exempt organization, other than a political organization, may be subject to tax under section 527 when it expends an amount for an exempt function, see § 1.527–6. The taxation of newsletter funds is provided under section 527(g) and § 1.527–7. A special rule for principal campaign committees is provided under section 527(h) and § 1.527–9.

[T.D. 7744, 45 FR 85731, Dec. 30, 1980; T.D. 8041, 50 FR 30817, July 30, 1985]

§ 1.527–2 Definitions.

For purposes of section 527 and these regulations—

(a) Political organization—(1) In general. A "political organization" is a party, committee, association, fund, or other organization (whether or not incorporated) organized and operated primarily for the purpose of directly or indirectly accepting contributions or making expenditures for an exempt function activity (as defined in paragraph (c) of this section). Accordingly, a political organization may include a committee or other group which accepts contributions or makes expenditures for the purpose of promoting the nomination of an individual for an elective public office in a primary

election, or in a meeting or caucus of a political party. A segregated fund (as defined in paragraph (b) of this section) established and maintained by an individual may qualify as a political organization.

(2) **Organizational test.** A political organization meets the organizational test if its articles of organization provide that the primary purpose of the organization is to carry on one or more exempt functions. A political organization is not required to be formally chartered or established as a corporation, trust, or association. If an organization has no formal articles of organization, consideration is given to statements of the members of the organization at the time the organization is formed that they intend to operate the organization primarily to carry on one or more exempt functions.

(3) **Operational test.** A political organization does not have to engage exclusively in activities that are an exempt function. For example, a political organization may—

(i) Sponsor nonpartisan educational workshops which are not intended to influence or attempt to influence the selection, nomination, election, or appointment of any individual for public office,

(ii) Pay an incumbent's office expenses, or

(iii) Carry on social activities which are unrelated to its exempt function,

provided these are not the organization's primary activities. However, expenditures for purposes described in the preceding sentence are not for an exempt function. See § 1.527–2(c) and (d). Furthermore, it is not necessary that a political organization operate in accordance with normal corporate formalities as ordinarily established in bylaws or under state law.

(b) **Segregated fund—(1) General rule.** A "segregated fund" is a fund which is established and maintained by a political organization or an individual separate from the assets of the organization or the personal assets of the individual. The purpose of such a fund must be to receive and segregate exempt function income (and earnings on such income) for use only for an exempt function or for an activity necessary to fulfill an exempt function. Accordingly, the amounts in the fund must be dedicated for use only for an exempt function. Thus, expenditures for the establishment or administration of a political organization or the solicitation of political contributions may be made from the segregated fund, if necessary to fulfill an exempt function. The fund must be clearly identified and established for the purposes intended. A savings or checking account into which only contributions to the political organization are placed and from which only expenditures for exempt functions are made may be a segregated fund. If an organization that had designated a fund to be a segregated fund for purposes of segregating amounts referred to in section 527(c)(3)(A) through (D), expends more than an insubstantial amount from the segregated fund for activities that are not for an exempt function during a taxable year, the fund will not be treated as a segregated fund for such year. In such a case amounts referred to in section 527(c)(3)(A)–(D), segregated in such fund will not be exempt function income. Further, if more than insubstantial amounts segregated for an exempt function in prior years are expended for other than an exempt function the facts and circumstances may indicate that the fund was never a segregated fund as defined in this paragraph.

(2) **Record keeping.** The organization or individual maintaining a segregated fund must keep records that are adequate to verify receipts and disbursements of the fund and identify the exempt function activity for which each expenditure is made.

(c) **Exempt function—(1) Directly related expenses.** An "exempt function", as defined in section 527(e)(2), includes all activities that are directly related to and support the process of influencing or attempting to influence the selection, nomination, election, or appointment of any individual to public office or office in a political organization (the selection process). Whether an expenditure is for an exempt function depends upon all the facts and circumstances. Generally, where an organization supports an individual's campaign for public office, the organization's activities and expenditures in furtherance of the individual's election or appointment to that office are for an exempt function of the organization. The individual does not have to be an announced candidate for the office. Furthermore, the fact that an individual never becomes a candidate is not crucial in determining whether an organization is engaging in an exempt function. An activity engaged in between elections which is directly related to, and supports, the process of selection, nomination, or election of an individual in the next applicable political campaign is an exempt function activity.

(2) **Indirect expenses.** Expenditures that are not directly related to influencing or attempting to influence the selection process may also be an expenditure for an exempt function by a political

organization. These are expenses which are necessary to support the directly related activities of the political organization. Activities which support the directly related activities are those which must be engaged in to allow the political organization to carry out the activity of influencing or attempting to influence the selection process. For example, expenses for overhead and record keeping are necessary to allow the political organization to be established and to engage in political activities. Similarly, expenses incurred in soliciting contributions to the political organization are necessary to support the activities of the political organization.

(3) **Terminating activities.** An exempt function includes an activity which is in furtherance of the process of terminating a political organization's existence. For example, where a political organization is established for a single campaign, payment of campaign debts after the conclusion of the campaign is an exempt function activity.

(4) **Illegal expenditures.** Expenditures which are illegal or are for a judicially determined illegal activity are not considered expenditures in furtherance of an exempt function, even though such expenditures are made in connection with the selection process.

(5) **Examples.** The following examples illustrate the principles of paragraph (c) of this section. The term "exempt function" when used in the following examples means exempt function within the meaning of section 527(e)(2).

(i) **Example (1).** A wants to run for election to public office in State X. A is not a candidate. A travels throughout X in order to rally support for A's intended candidacy. While in X, A attends a convention of an organization for the purpose of attempting to solicit its support. The amount expended for travel, lodging, food, and similar expenses are for an exempt function.

(ii) **Example (2).** B, a member of the United States House of Representatives, is a candidate for reelection. B travels with B's spouse to the district B represents. B feels it is important for B's reelection that B's spouse accompany B. While in the district, B makes speeches and appearances for the purpose of persuading voters to reelect B. The travel expenses of B and B's spouse are for an exempt function.

(iii) **Example (3).** C is a candidate for public office. In connection with C's campaign, C takes voice and speech lessons to improve C's skills. The expenses for these lessons are for an exempt function.

(iv) **Example (4).** D, an officeholder and candidate for reelection, purchases tickets to a testimonial dinner. D's attendance at the dinner is intended to aid D's reelection. Such expenditures are for an exempt function.

(v) **Example (5).** E, an officeholder, expends amounts for periodicals of general circulation in order to keep informed on national and local issues. Such expenditures are not for an exempt function.

(vi) **Example (6).** N is an organization described in section 501(c) and is exempt from taxation under section 501(a). F is employed as president of N. F, as a representative of N, testifies in response to a written request from a Congressional committee in support of the confirmation of an individual to a cabinet position. The expenditures by N that are directly related to F's testimony are not for an exempt function.

(vii) **Example (7).** P is a political organization described in section 527(e)(2). Between elections P does not support any particular individual for public office. However, P does train staff members for the next election, drafts party rules, implements party reform proposals, and sponsors a party convention. The expenditures for these activities are for an exempt function.

(viii) **Example (8).** Q is a political organization described in section 527(e)(2). Q finances seminars and conferences which are intended to influence persons who attend to support individuals to public office whose political philosophy is in harmony with the political philosophy of Q. The expenditures for these activities are for an exempt function.

(d) **Public office.** The facts and circumstances of each case will determine whether a particular Federal, State, or local office is a "public office." Principles consistent with those found under § 53.4946-1(g)(2) (relating to the definition of public office) will be applied.

(e) **Principal campaign committee.** A "principal campaign committee" is the political committee designated by a candidate for Congress as his or her principal campaign committee for purposes of section 302(e) of the Federal Election Campaign Act of 1971 (2 U.S.C. section 432(e)), as amended, and section 527(h) and § 1.527-9.

[T.D. 7744, 45 FR 85731, Dec. 30, 1980; as amended by T.D. 8041, 50 FR 30817, July 30, 1985]

§ 1.527-3 Exempt function income.

(a) **General rule**—(1) For purposes of section 527, exempt function income consists solely of amounts received as—

(i) Contributions of money or other property,

(ii) Membership dues, fees, or assessments from a member of a political organization, or

(iii) Proceeds from a political fund raising or entertainment event, or proceeds from the sale of political campaign materials, which are not received in the ordinary course of any trade or business,

but only to the extent such income is segregated for use only for exempt functions of the political organization.

(2) Income will be considered segregated for use only for an exempt function only if it is received into and disbursed from a segregated fund as defined in § 1.527-2(b).

(b) Contributions. The rules of section 271(b)(2) apply in determining whether the transfer of money or other property constitutes a contribution. Generally, money or other property, whether solicited personally, by mail, or through advertising, qualifies as a contribution. In addition, to the extent a political organization receives Federal, State, or local funds under the $1 "check-off" provision (sections 9001–9013), or any other provision for financing of campaigns, such amounts are to be treated as contributions.

(c) Dues, fees, and assessments. Amounts received as membership fees and assessments from members of a political organization may constitute exempt function income to the political organization. Membership fees and assessments received in consideration for services, goods, or other items of value do not constitute exempt function income. However, filing fees paid by an individual directly or indirectly to a political party in order that the individual may run as a candidate in a primary election of the party (or run in a general election as a candidate of that party) are to be treated as exempt function income. For example, some States provide that a certain percentage of the first year's salary of the office sought must be paid to the State as a filing (or "qualifying") fee and party assessment. The State then transfers part of this fee to the candidate's party. In such a case, the entire amount transferred to the party is to be treated as exempt function income. Furthermore, amounts paid by an individual directly to the party as a qualification fee are treated similarly.

(d) Fund raising events—(1) In general. Amounts received from fund raising and entertainment events are eligible for treatment as exempt function income if the events are political in nature and not carried on in the ordinary course of a trade or business. Whether an event is "political" in nature depends on all facts and circumstances. One factor that indicates an event is a political event is the extent to which the event is related to a political activity aside from the need of the organization for income or funds. For example, an event that is intended to rally and encourage support for an individual for public office would be a political fund raising event. Examples of political events can include dinners, breakfasts, receptions, picnics, dances, and athletic exhibitions.

(2) Ordinary course of any trade or business. Whether an activity is in the ordinary course of a trade or business depends on the facts and circumstances of each case. Generally, proceeds from casual, sporadic fund raising or entertainment events are not in the ordinary course of a trade or business. Factors to be taken into account in determining whether an activity is a trade or business include the frequency of the activity, the manner in which the activity is conducted, and the span of time over which the activity is carried on.

(e) Sale of campaign materials. Amounts received from the sale of campaign materials are eligible for treatment as exempt function income if the sale is not carried on in the ordinary course of a trade or business (as defined in paragraph (d)(2) of this section), and is related to a political activity of the organization aside from the need of such organization for income or funds. Proceeds from the sale of political memorabilia, bumper stickers, campaign buttons, hats, shirts, political posters, stationery, jewelry, or cookbooks are related to such a political activity where such items can be identified as relating to distributing political literature or organizing voters to vote for a candidate for public office.

[T.D. 7744, 45 FR 85732, Dec. 30, 1980]

§ 1.527–4 Special rules for computation of political organization taxable income.

(a) In general. Political organization taxable income is determined according to the provisions of section 527(b) and the rules set forth in this section.

(b) Limitation on capital losses. If for any taxable year a political organization has a net capital loss, the rules of sections 1211(a) and 1212(a) apply.

(c) Allowable deductions—(1) In general. To be deductible in computing political organization taxable income, expenses, depreciation, and similar items must not only qualify as deductions allowed by chapter 1 of the Code, but must also be directly connected with the production of political organization taxable income.

(2) "Directly connected with" defined. To be "directly connected with" the production of political organization taxable income, an item of deduction must have a proximate and primary relationship to the production of such income and have been incurred in the production of such income. Items of deduction attributable solely to items of political organization taxable income are proximately and primarily related to such income. Whether an item of deduction is incurred in the production of political organization taxable income is determined on the basis of all the facts and circumstances of each case.

(3) Dual use of facilities or personnel. Expenses, depreciation, and similar items that are attributable to the production of exempt function income and political organization taxable income shall be allocated between the two on a reasonable and consistent basis. For example, where facilities are used both for an exempt function of the organization and for the production of political organization taxable income, expenses, depreciation, and similar items attributable to such facilities (for example, items of overhead) shall be allocated between the two uses of a reasonable and consistent basis. Similarly, where personnel are employed both for an exempt function and for the production of political organization taxable income, expenses and similar items attributable to such personnel (for example, items of salary) shall be allocated between the activities on a reasonable and consistent basis. The portion of any such item so allocated to the production of political organization taxable income is directly connected with such income and is allowable as a deduction in computing political organization taxable income to the extent that it qualifies as an item of deduction allowed by chapter 1 of the Code. Thus, for example, assume that X, a political organization, pays its manager a salary of $10,000 a year and that it derives political organization taxable income. If 10 percent of the manager's time during the year is devoted to deriving X's gross income (other than exempt function income), a deduction of $1,000 (10 percent of $10,000) would generally be allowable for purposes of computing X's political organization taxable income.

[T.D. 7744, 45 FR 85733, Dec. 30, 1980]

§ 1.527–5 Activities resulting in gross income to an individual or political organization.

(a) In general—(1) General rule. Amounts expended by a political organization for an exempt function are not income to the individual or individuals on whose behalf such expenditures are made. However, where a political organization expends any other amount for the personal use of any individual, the individual on whose behalf the amount is expended will be in receipt of income. Amounts are expended for the personal use of an individual where a direct or indirect financial benefit accrues to such individual. For example, if a political organization pays a personal legal obligation of a candidate for public office, such as the candidate's federal income tax liability, the amount paid is includible in such candidate's gross income. Similarly, if a political organization expends any amount of its exempt function income for other than an exempt function, and the expenditure results in a direct or indirect financial benefit to the political organization, it must include the amount of such expenditure in its gross income. For example, if a political organization expends exempt function income for making an improvement or addition to its facilities, or for equipment, which is not necessary for or used in carrying out an exempt function, the amount of the expenditure will be included in the political organization's gross income. However, if a political organization expends exempt function income to make ordinary and necessary repairs on the facilities the political organization uses in conducting its exempt function, such amounts will not be included in the political organization's gross income.

(2) Expenditure for an illegal activity. Expenditures by a political organization that are illegal or for an activity that is judicially determined to be illegal are treated as amounts not segregated for use only for the exempt function and shall be included in the political organization's taxable income. However, expenses incurred in defense of civil or criminal suits against the organization are not treated as taxable to the organization. Similarly, voluntary reimbursement to the participants in the illegal activity for similar expenses incurred by them are not taxable to the organization if the organization can demonstrate that such payments do not constitute a part of the inducement to engage in the illegal activity or part of the agreed upon compensation therefor. However, if the organization entered into an agreement with the participants to defray such expenses as part of the inducement, such payments would be treated as an expenditure for an illegal activity. Except where necessary to prevent the period of limitation for assessment and collection of a tax from expiring, a notice of deficiency will not generally be issued until after there has been a final determination of illegality by an appropriate court in a criminal proceeding.

(b) Certain uses not treated as income to a candidate. Except as otherwise provided in paragraph (a) of this section, if a political organization—

(1) Contributes any amount to or for the use of any political organization described in section 527(e)(1) or newsletter fund described in section 527(g),

(2) Contributes any amount to or for the use of any organization described in paragraph (1) and

(2) of section 509(a) which is exempt from taxation under section 501(a), or

(3) Deposits any amount in the general fund of the U.S. Treasury or in the general fund of any State or local government,

such amount shall not be treated as an amount expended for the personal use of a candidate or other person. No deduction shall be allowed under the Internal Revenue Code of 1954 for the contribution or deposit described in the preceding sentence.

(c) Excess funds—(1) General rule. Generally, funds controlled by a political organization or other person after a campaign or election are excess funds and are treated as expended for the personal use of the person having control over the ultimate use of such funds. However, such funds will not be treated as excess funds to the extent they are—

(i) Transferred within a reasonable period of time by the person controlling the funds in accordance with paragraph (b) of this section, or

(ii) Held in reasonable anticipation of being used by the political organization for future exempt functions.

(2) Excess funds transferred at death. Where excess funds are held by an individual who dies, and these funds go to the individual's estate or any other person (other than an organization or fund described in paragraph (b) of this section), the funds are income of the decedent and will be included in the decedent's gross estate unless the estate or other person receiving such funds transfers the funds within a reasonable period of time in accordance with paragraph (b) of this section.

This paragraph (c)(2) will not apply where the individual who dies provides that the funds be transferred to an organization or fund described in paragraph (b) of this section.

[T.D. 7744, 45 FR 85733, Dec. 30, 1980]

§ 1.527–6 Inclusion of certain amounts in the gross income of an exempt organization which is not a political organization.

(a) Exempt organizations—General rule. If an organization described in section 501(c) which is exempt from tax under section 501(a) expends any amount for an exempt function, it may be subject to tax. There is included in the gross income of such organization for the taxable year an amount equal to the lesser of—

(1) The net investment income of such organization for the taxable year, or

(2) The aggregate amount expended during the taxable year for an exempt function.

The amount included will be treated as political organization taxable income.

(b) Exempt function expenditures—(1) Directly related expenses. (i) Except as provided in this section, the term "exempt function" will generally have the same meaning it has in § 1.527–2(c). Thus, expenditures which are directly related to the selection process as defined in § 1.527–2(c)(1) are expenditures for an exempt function. Expenditures for indirect expenses as defined in § 1.527–2(c)(2), when made by a section 501(c) organization are for an exempt function only to the extent provided in paragraph (b)(2) of this section. Expenditures of a section 501(c) organization which are otherwise allowable under the Federal Election Campaign Act or similar State statute are for an exempt function only to the extent provided in paragraph (b)(3) of this section.

(ii) An expenditure may be made for an exempt function directly or through another organization. A section 501(c) organization will not be absolutely liable under section 527(f)(1) for amounts transferred to an individual or organization. A section 501(c) organization is, however, required to take reasonable steps to ensure that the transferee does not use such amounts for an exempt function.

(2) Indirect expenses. [Reserved].

(3) Expenditures allowed by Federal Election Campaign Act. [Reserved].

(4) Appointments or confirmations. Where an organization described in paragraph (a) of this section appears before any legislative body in response to a written request by such body for the purpose of influencing the appointment or confirmation of an individual to a public office, any expenditure directly related to such appearance is not treated as an expenditure for an exempt function.

(5) Nonpartisan activity. Expenditures for nonpartisan activities by an organization to which paragraph (a) of this section applies are not expenditures for an exempt function. Nonpartisan activities include voter registration and "get-out-the-vote" campaigns. To be nonpartisan voter registration and "get-out-the-vote" campaigns must not be specifically identified by the organization with any candidate or political party.

(c) Character of items included in gross income—(1) General rule. The items of income included in the gross income of an organization under paragraph (a) of this section retain their character as ordinary income or capital gain.

(2) Special rule in determining character of item. If the amount included in gross income is determined under paragraph (a)(2)(ii) of this section, the character of the items of income is determined by multiplying the total amount included in gross income under such paragraph by a fraction, the numerator of which is the portion of the organization's net investment income that is gain from the sale or exchange of a capital asset, and the denominator of which is the organization's net investment income. For example, if $5,000 is included in the gross income of an organization under paragraph (a)(2) of this section, and the organization had $100,000 of net investment income of which $10,000 is long term capital gain, then $500 would be treated as long term capital gain:

$$\frac{\text{Capital gain}}{\text{net investment income}} \times \text{Amount expended on an exempt function} = \text{Portion of income subject to tax under section 1201}$$

$$\frac{\$10{,}000}{\$100{,}000} \times \$5{,}000 = \$500$$

(d) Modifications. The modifications described in section 527(c)(2) apply in computing the tax under paragraph (a)(2) of this section. Thus, no net operating loss is allowed under section 172 nor is any deduction allowed under part VIII of subchapter B. However, there is allowed a specific deduction of $100.

(e) Transfer not treated as exempt function expenditures. Provided the provisions of this paragraph (e) are met, a transfer of political contributions or dues collected by a section 501(c) organization to a separate segregated fund as defined in paragraph (f) of this section is not treated as an expenditure for an exempt function (within the meaning of § 1.527-2(c)). Such transfers must be made promptly after the receipt of such amounts by the section 501(c) organization, and must be made directly to the separate segregated fund. A transfer is considered promptly and directly made if:

(1) The procedures followed by the section 501(c) organization satisfy the requirements of applicable Federal or State campaign law and regulations;

(2) The section 501(c) organization maintains adequate records to demonstrate that amounts transferred in fact consist of political contributions or dues, rather than investment income; and

(3) The political contributions or dues transferred were not used to earn investment income for the section 501(c) organization.

(f) Separate segregated fund. An organization or fund described in section 527(f)(3) is a separate segregated fund. To avoid the application of paragraph (a) of this section, an organization described in section 501(c) that is exempt from taxation under section 501(a) may, if it is consistent with its exempt status, establish and maintain such a separate segregated fund to receive contributions and make expenditures in a political campaign. If such a fund meets the requirements of § 1.527-2(a) (relating to the definition of a political organization), it shall be treated as a political organization subject to the provisions of section 527. A segregated fund established under the Federal Election Campaign Act will continue to be treated as a segregated fund when it engages in exempt function activities as defined in § 1.527-2(c), relating to State campaigns.

(g) Effect of expenditures on exempt status. Section 527(f) and this section do not sanction the intervention in any political campaign by an organization described in section 501(c) if such activity is inconsistent with its exempt status under section 501(c). For example, an organization described in section 501(c)(3) is precluded from engaging in any political campaign activities. The fact that section 527 imposes a tax on the exempt function (as defined in § 1.527-2(c)) expenditures of section 501(c) organizations and permits such organizations to establish separate segregated funds to engage in campaign activities does not sanction the participation in these activities by section 501(c)(3) organizations.

[T.D. 7744, 45 FR 85734, Dec. 30, 1980]

§ 1.527-7 Newsletter funds.

(a) In general. For purposes of this section, a fund established and maintained by an individual who holds, has been elected to, or is a candidate (within the meaning of section 41(c)(2)) for nomination or election to, any Federal, State, or local elective public office for the use by such individual exclusively for an exempt function, as defined in paragraph (c) of this section, shall be a newsletter fund. If assets of a newsletter fund are used for any purpose other than the exempt function of the newsletter fund as defined in paragraph (c) of this section, such amount shall be treated as expended for the personal use of the individual who estab-

lished and maintained such fund. In addition, future contributions to such fund are treated as income to the individual who established and maintained the fund. In such a case, the facts and circumstances may indicate that the fund was never established and maintained exclusively for an exempt function as defined in paragraph (c) of this section.

(b) **Determination of taxable income.** A newsletter fund shall be treated as if it were a political organization for purposes of determining its taxable income. However, the specific $100 deduction provided by section 527(c)(2)(A) shall not be allowed.

(c) **Exempt function.** For purposes of this section, the exempt function of a newsletter fund consists solely of the preparation and circulation of the newsletter. Among the expenditures treated as preparation and circulation expenditures of the newsletter are—

(1) Secretarial services,

(2) Printing,

(3) Addressing, and

(4) Mailing.

(d) **Nonexempt function purposes.** Newsletter fund assets may not be used for campaign activities. Therefore, an exempt function of a newsletter fund does not include—

(1) Expenditures for an exempt function as defined in § 1.527–2(c) or

(2) Transfers of unexpended amounts to a political organization described in section 527(e)(1).

(e) **Excess funds.** Excess funds held by a newsletter fund which has ceased to engage in the preparation and circulation of the newsletter are treated as expended for the personal use of the individual who established and maintained such fund. However, to the extent such excess funds are within a reasonable period of time—

(1) Contributed to or for the use of any organization described in paragraph (1) or (2) of section 509(a) which is exempt from taxation under section 501(a),

(2) Deposited in the general fund of the U.S. Treasury or in the general fund of any State or local government (including the District of Columbia), or

(3) Contributed to any other newsletter fund as described in paragraph (a) of this section,

the excess funds are not treated as expended for the personal use of such individual. In such a case the individual is not allowed a deduction under the Internal Revenue Code of 1954 for such contribution or deposit.

[T.D. 7744, 45 FR 85735, Dec. 30, 1980]

§ 1.527–8 Effective date; filing requirements; and miscellaneous provisions.

(a) **Assessment and collections.** Since the taxes imposed by section 527 are taxes imposed by subtitle A of the Code, all provisions of law and of the regulations applicable to the taxes imposed by subtitle A are applicable to the assessment and collection of the taxes imposed by section 527. Organizations subject to the tax imposed by section 527 are subject to the same provisions, including penalties, as are provided for corporations, in general, except that the requirements of section 6154 concerning the payment of estimated tax do not apply. See, generally, sections 6151, et seq., and the regulations prescribed thereunder, for provisions relating to payment of tax.

(b) **Returns.** For requirements of filing annual returns with respect to political organization taxable income, see section 6012(a)(6) and the applicable regulations.

(c) **Taxable years, method of accounting, etc.** The taxable year (fiscal year or calendar year, as the case may be) of a political organization is determined without regard to the fact that such organization may have been exempt from tax during any prior period. See sections 441 and 446, and the regulations thereunder in this part, and section 7701 and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration). Similarly, in computing political organization taxable income, the determination of the taxable year for which an item of income or expense is taken into account is made under the provisions of sections 441, 446, 451, 461, and the regulations thereunder, whether or not the item arose during a taxable year beginning before, on, or after the effective date of the provisions imposing a tax upon political organization taxable income. If a method for treating bad debts was selected in a return of income (other than an information return) for a previous taxable year, the taxpayer must follow such method in its returns under section 527, unless such method is changed in accordance with the provisions of § 1.166–1. A taxpayer who has not previously selected a method for treating bad debts may, in its first return under section 6012(a)(6), exercise the option granted in § 1.166–1.

(d) Effective date. Except as provided in paragraph (b)(2) of § 1.527–6 and in paragraph (a) of § 1.527–9, the regulations under section 527 apply to taxable years beginning after December 31, 1974.

[T.D. 7744, 45 FR 85735, Dec. 30, 1980; T.D. 8041, 50 FR 30817, July 30, 1985]

§ 1.527–9 Special rule for principal campaign committees.

(a) In general. Effective with respect to taxable years beginning after December 31, 1981, the tax imposed by section 527(b) on the political organization taxable income of a principal campaign committee shall be computed by multiplying the political organization taxable income by the appropriate rates of tax specified in section 11(b). The political organization taxable income of a campaign committee not a principal campaign committee is taxed at the highest rate of tax specified in section 11(b). A candidate for Congress may designate one political committee to serve as his or her principal campaign committee for purposes of section 527(h)(1). If a designation is made, it shall be made in accordance with the requirements of paragraph (b) of this section. A candidate for Congress may have only one designation in effect at any time. Under 11 CFR 102.12, no political committee may be designated as the principal campaign committee of more than one candidate for Congress. Further, no political committee that supports or has supported more than one candidate for Congress may be designated as a principal campaign committee. No designation need be made where there is only one political campaign committee with respect to a candidate.

(b) Manner of designation. If a candidate for Congress elects to make a designation under section 527(h) and this section, he or she shall designate his or her principal campaign committee by appending a copy of his or her Statement of Candidacy (that is, the Federal Election Commission Form 2, or equivalent statement that the candidate filed with the Federal Election Commission under 11 CFR 101.1(a)), to the Form 1120–POL filed by the principal campaign committee for each taxable year for which the designation is effective. This designation may also be made by appending to the Form 1120–POL statement containing the following information: The name and address of the candidate for Congress; his or her taxpayer identification number; his or her party affiliation and the office sought; the district and State in which the office is sought; and the name and address of the principal campaign committee. This designation shall be made on or before the due date (as extended) for filing Form 1120–POL. Only a candidate for Congress may make a designation in accordance with this paragraph.

(c) Manner of revoking designation. A designation of a principal campaign committee that has been filed in accordance with this section may be revoked only with the consent of the Commissioner. In general, the Commissioner will grant such consent in every case where the candidate for Congress has revoked his or her designation in compliance with the requirements of the Federal Election Commission by filing an amended Statement of Organization or its equivalent pursuant to 11 CFR 102.2(a)(2). In the case of the revocation of the designation of a principal campaign committee by a candidate followed by the designation of another principal campaign committee by such candidate, for purposes of determining the appropriate rate of tax under section 11(b) for a taxable year, the political organization taxable income of the first principal campaign committee shall be treated as that of the subsequent principal campaign committee. In a case where consent to revoke a designation of a principal campaign committee is granted and a new designation is filed, the Commissioner may condition his consent upon the agreement of the candidate for Congress to insure compliance with the preceding sentence.

[T.D. 8041, 50 FR 30817, July 30, 1985]

Homeowners Associations

§ 1.528–1 Homeowners associations.

(a) In general. Section 528 only applies to taxable years of homeowners associations beginning after December 31, 1973. To qualify as a homeowners association an organization must either be a condominium management association or a residential real estate management association. For the purposes of Section 528 and the regulations under that section, the term "homeowners association" shall refer only to an organization described in section 528. Cooperative housing corporations and organizations based on a similar form of ownership are not eligible to be taxed as homeowners associations. As a general rule, membership in either a condominium management association or a residential real estate management

association is confined to the developers and the owners of the units, residences, or lots. Furthermore, membership in either type of association is normally required as a condition of such ownership. However, if the membership of an organization consists of other homeowners associations, the owners of units, residences, or lots who are members of such other homeowners associations will be treated as the members of the organization for the purposes of the regulations under section 528.

(b) Condominium. The term "condominium" means an interest in real property consisting of an undivided interest in common in a portion of a parcel of real property (which may be a fee simple estate or an estate for years, such as a leasehold or subleasehold) together with a separate interest in space in a building located on such property. An interest in property is not a condominium unless the undivided interest in the common elements are vested in the unit holders. In addition, a condominium must meet the requirements of applicable state or local law relating to condominiums or horizontal property regimes.

(c) Residential real estate management association. Residential real estate management associations are normally composed of owners of single-family residential units located in a subdivision, development, or similar area. However, they may also include as members, owners of multiple-family dwelling units located in such areas. They are commonly formed to administer and enforce covenants relating to the architecture and appearance of the real estate development as well as to perform certain maintenance duties relating to common areas.

(d) Tenants. Tenants will not be considered members for purposes of meeting the source of income test under section 528(c)(1)(B) and § 1.528-5. However, the fact that tenants of members of a homeowners association are permitted to be members of the association will not disqualify an association under section 528(c)(1) if it otherwise meets the requirements of section 528(c) and these regulations.

[T.D. 7692, 45 FR 26321, April 18, 1980]

§ 1.528-2 Organized and operated to provide for the acquisition, construction, management, maintenance and care of association property.

(a) Organized and operated—(1) Organized. To be treated as a homeowners association an organization must be organized and operated primarily for the purpose of carrying on one or more of the exempt functions of a homeowners association. For the purposes of section 528 and these regulations, the exempt functions of a homeowners association are the acquisition, construction, management, maintenance, and care of association property. In determining whether an organization is organized and operated primarily to carry on one or more exempt functions, all the facts and circumstances of each case shall be considered. For example, when an organization provides in its articles of organization that its sole purpose is to carry on one or more exempt functions, in the absence of other relevant factors it will be considered to have met the organizational test. (The term "articles of organization" means the organization's corporate charter, trust instruments, articles of association or other instrument by which it is created.)

(2) Operated. An organization will be treated as being operated for the purpose of carrying on one or more of the exempt functions of a homeowners association if it meets the provisions of §§ 1.528-5 and 1.528-6.

(b) Terms to be interpreted according to common meaning and usage. As used in section 528 and these regulations, the terms acquisition, construction, management, maintenance, and care are to be interpreted according to their common meaning and usage. For example, maintenance of association property includes the painting and repairing of such property as well as the gardening and janitorial services associated with its upkeep. Similarly, the term "construction" of association property includes covenants or other rules for preserving the architectural and general appearance of the area. The term also includes regulations relating to the location, color and allowable building materials to be used in all structures. (For the definition of association property see § 1.528-3.)

[T.D. 7692, 45 FR 26321, April 18, 1980]

§ 1.528-3 Association property.

(a) Property owned by the organization. "Association property" includes real and personal property owned by the organization or owned as tenants in common by the members of the organization. Such property must be available for the common benefit of all members of the organization and must be of a nature that tends to enhance the beneficial enjoyment of the private residences by their owners. If two or more facilities or items of property of a similar nature are owned by a homeowners association, and if the use of any particular facility or item is restricted to fewer than all

association members, such facilities or items nevertheless will be considered association property if all association members are treated equitably and have similar rights with respect to comparable items or facilities. Among the types of property that ordinarily will be considered association property are swimming pools and tennis courts. On the other hand, facilities or areas set aside for the use of nonmembers, or in fact used primarily by nonmembers, are not association property for the purposes of this section. For example, property owned by an organization for the purpose of leasing it to groups consisting primarily of nonmembers to be used as a meeting place or a retreat will not be considered association property.

(b) Property normally owned by a governmental unit. "Association property" also includes areas and facilities traditionally recognized and accepted as being of direct governmental concern in the exercise of the powers and duties entrusted to governments to regulate community health, safety and welfare. Such areas and facilities would normally include roadways, parklands, sidewalks, streetlights and firehouses. Property described in this paragraph will be considered association property regardless of whether it is owned by the organization itself, by its members as tenants in common or by a governmental unit and used for the benefit of the residents of such unit including the members of the organization.

(c) Privately owned property. "Association property" may also include property owned privately by members of the organization. However, to be so included the condition of such property must affect the overall appearance or structure of the residential units which make up the organization. Such property may include the exterior walls and roofs of privately owned residences as well as the lawn and shrubbery on privately owned land and any other privately owned property the appearance of which may directly affect the appearance of the entire organization. However, privately owned property will not be considered association property unless—

(1) There is a covenant or similar requirement relating to exterior appearance or maintenance that applies on the same basis to all such property (or to a reasonable classification of such property);

(2) There is a pro rata mandatory assessment (at least once a year) on all members of the association for maintaining such property; and

(3) Membership in the organization is a condition of ownership of such property.

[T.D. 7692, 45 FR 26321, April 18, 1980]

§ 1.528–4 Substantiality test.

(a) In general. In order for an organization to be considered a condominium management association or a residential real estate management association (and therefore in order for it to be considered a homeowners association), substantially all of its units, lots or buildings must be used by individuals for residences. For the purposes of applying paragraph (b) or (c) of this section, an organization which has attributes of both a condominium management association and a residential real estate management association shall be considered that association which, based on all the facts and circumstances, it more closely resembles. In addition, those paragraphs shall be applied based on conditions existing on the last day of the organization's taxable year.

(b) Condominium management associations. Substantially all of the units of a condominium management association will be considered as used by individuals for residences if at least 85% of the total square footage of all units within the project is used by individuals for residential purposes. If a completed unit has never been occupied, it will nonetheless be considered as used for residential purposes if, based on all the facts and circumstances, it appears to have been constructed for use as a residence. Similarly, a unit which is not occupied but which has been in the past will be considered as used for residential purposes if, based on all the facts and circumstances, it appears that it was constructed for use as a residence, and the last individual to occupy it did in fact use it as a residence. Units which are used for purposes auxiliary to residential use (such as laundry areas, swimming pools, tennis courts, storage rooms and areas used by maintenance personnel) shall be considered used for residential purposes.

(c) Residential real estate management associations. Substantially all of the lots or buildings of a residential real estate management association (including unimproved lots) will be considered as used by individuals as residences if at least 85% of the lots are zoned for residential purposes. Lots shall be treated as zoned for residential purposes even if under such zoning lots may be used for parking spaces, swimming pools, tennis courts, schools, fire stations, libraries, churches and other similar purposes which are auxiliary to residential use. However, commercial shopping areas (and their auxiliary parking areas) are not lots zoned for residential purposes.

(d) Exception. Notwithstanding any other provision of this section, a unit, or building will not be considered used for residential purposes, if for more than one-half the days in the association's taxable year, such unit, or building is occupied by a person or series of persons, each of whom so occupies such unit, or building for less than 30 days.

[T.D. 7692, 45 FR 26322, April 18, 1980; T.D. 7692, 45 FR 24879, May 23, 1980]

§ 1.528–5 Source of income test.

An organization cannot qualify as a homeowners association under section 528 for a taxable year unless 60 percent or more of its gross income for such taxable year is exempt function income as defined in § 1.528–9. The determination of whether an organization meets the provisions of this section shall be made after the close of the organization's taxable year.

[T.D. 7692, 45 FR 26322, April 18, 1980]

§ 1.528–6 Expenditure test.

(a) In general. An organization cannot qualify as a homeowners association under section 528 for a taxable year unless 90 percent or more of its expenditures for such taxable year are qualifying expenditures as defined in paragraphs (b) and (c) of this section. The determination of whether an organization meets the provisions of this section shall be made after the close of the organization's taxable year. Investments or transfers of funds to be held to meet future costs shall not be taken into account as expenditures. For example, transfers to a sinking fund account for the replacement of a roof would not be considered an expenditure for the purposes of this section even if the roof is association property. In addition, excess assessments which are either rebated to members or applied against the members' following year's assessments will not be considered an expenditure for the purposes of this section.

(b) Qualifying expenditures. Qualifying expenditures are expenditures by an organization for the acquisition, construction, management, maintenance, and care of the organization's association property. They include both current operating and capital expenditures on association property. Qualifying expenditures include expenditures on association property despite the fact that such property may produce income which is not exempt function income. Thus expenditures on a swimming pool are qualifying expenditures despite the fact that fees from guests of members using the pool are not exempt function income. Where expenditures by an organization are used both for association property as well as other property, an allocation shall be made between the two uses on a reasonable basis. Only that portion of the expenditures which is properly allocable to the acquisition, construction, management, maintenance or care of association property, shall constitute qualifying expenditures.

(c) Examples of qualifying expenditures. Qualifying expenditures may include (but are not limited to) expenditures for—

(1) Salaries of an association manager and secretary;

(2) Paving of streets;

(3) Street signs;

(4) Security personnel;

(5) Legal fees;

(6) Upkeep of tennis courts;

(7) Swimming pools;

(8) Recreation rooms and halls;

(9) Replacement of common buildings, facilities, air conditioning, etc.;

(10) Insurance premiums on association property;

(11) Accountant's fees;

(12) Improvement of private property to the extent it is association property; and

(13) Real estate and personal property taxes imposed on association property by a State or local government.

[T.D. 7692, 45 FR 26322, April 18, 1980]

§ 1.528–7 Inurement.

An organization is not a homeowners association if any part of its net earnings inures (other than as a direct result of its engaging in one or more exempt functions) to the benefit of any private person. Thus, to the extent that members receive a benefit from the general maintenance, etc., of association property, this benefit generally would not constitute inurement. If an organization pays rebates from amounts other than exempt function income, such rebates will constitute inurement. In general, in determining whether an organization is in violation of this section, the principles used in making similar determinations under Section 501(c) will be applied.

[T.D. 7692, 45 FR 26323, April 18, 1980]

§ 1.528–8 Election to be treated as a homeowners association.

(a) General rule. An organization wishing to be treated as a homeowners association under section 528 and this section for a taxable year must elect to be so treated. Except as otherwise provided in this section such election shall be made by the filing of a properly completed Form 1120–H (or such other form as the Secretary may prescribe). A separate election must be made for each taxable year.

(b) Taxable years ending after December 30, 1976. For taxable years ending after December 30, 1976, the election must be made not later than the time, including extensions, for filing an income tax return for the year in which the election is to apply.

(c) Taxable years ending before December 31, 1976, for which a return was filed before January 31, 1977. For taxable years ending before December 31, 1976, for which a return was filed before January 31, 1977, the election must be made not later than the time provided by law for filing a claim for credit or refund of overpayment of taxes for the year in which the election is to apply. Such an election shall be made by filing an amended return on Form 1120–H (or such other form as the Secretary may prescribe).

(d) Taxable years ending before December 31, 1976, for which a return was not filed before January 31, 1977. For taxable years ending before December 31, 1976, for which a return was not filed before January 31, 1977, the election must be made by October 20, 1980. Instead of making such an election in the manner described in paragraph (a) of this section, such an election may be made by a statement attached to the applicable income tax return or amended return for the year in which the election is made. The statement should identify the election being made, the period for which it applies and the taxpayer's basis for making the election.

(e) Revocation of exempt status. If an organization is notified after the close of a taxable year that its exemption for such taxable year under section 501(a) is being revoked retroactively, it may make a timely election under section 528 for such taxable year. Notwithstanding any other provisions of this section, such an election will be considered timely if it is made within 6 months after the date of revocation. The preceding sentence shall apply to revocations made after April 18, 1980. If the revocation was made on or before April 18, 1980, the election will be considered timely if it is made before the expiration of the period for filing a claim for credit or refund for the taxable year for which it is to apply.

(f) Effect of election—(1) Revocation. An election to be treated as an organization described in section 528 is binding on the organization for the taxable year and may not be revoked without the consent of the Commissioner.

(2) Exception. Notwithstanding paragraph (f)(1) of this section, an election under this section may be revoked prior to July 18, 1980. Such a revocation shall be made by filing a statement with the director of the Internal Revenue Service Center with whom the return of the organization for the year in which the revocation is to apply was filed. The statement shall include the following information:

(i) The name of the organization.

(ii) The fact that it is revoking an election made under section 528.

(iii) The taxable year for which the revocation is to apply.

[T.D. 7692, 45 FR 26323, April 18, 1980]

§ 1.528–9 Exempt function income.

(a) General rule. For the purposes of section 528 exempt function income consists solely of income which is attributable to membership dues, fees, or assessments of owners of residential units or residential lots. It is not necessary that the source of income be labeled as membership dues, fees, or assessments. What is important is that such income be derived from owners of residential units or residential lots in their capacity as owner-members rather than in some other capacity such as customers for services. Generally, for the membership dues, fees, or assessments with respect to a residential unit or lot to be exempt function income, the unit must be used for (or the unit or lot must be expected to be used) for residential purposes. However, dues, fees, or assessments paid to an organization by a developer with respect to unfinished or finished but unsold units or lots shall be exempt function income even though the developer does not use the units or lots. If an assessment is more in the nature of a fee for the provision of services in the course of a trade or business than a fee for a common activity undertaken by a collective group of owners for the purpose of enhancing or maintaining the value of their residences, the assessment will not be considered exempt function income to the organization. Furthermore, income attributable to dues,

fees, or assessments will not be considered exempt function income unless each member's liability for payment arises solely from membership in the association. Dues, fees, or assessments that are based on the extent, if any, to which a member avails him or herself of a facility or facilities are not exempt function income. For the purposes of section 528, dues, fees, or assessments which are based on the assessed value or size of property will be considered as arising solely as a result of membership in the organization. Regardless of the organization's method of accounting, excess assessments during a taxable year which are either rebated to the members or applied to their future assessments are not considered gross income and therefore will not be considered exempt function income for such taxable year. However, if such excess assessments are applied to a future year's assessments, they will be considered gross income and exempt function income for that future year. In addition, assessments in a taxable year, such as an assessment for a capital improvement, which are not treated as gross income do not enter into the determination of whether the organization meets the source of income test for that taxable year.

(b) Examples of exempt function income. Assessments which are considered more in the nature of a fee for common activity than for the providing of services and which will therefore generally be considered exempt function income include assessments made for the purpose of—

(1) Paying the principal and interest on debts incurred for the acquisition of association property;

(2) Paying real estate taxes on association property;

(3) Maintaining association property;

(4) Removing snow from public areas; and

(5) Removing trash.

(c) Examples of receipts which are not exempt function income. Exempt function income does not include—

(1) Amounts which are not includible in the organization's gross income other than by reason of section 528 (for example, tax-exempt interest);

(2) Amounts received from persons who are not members of the association;

(3) Amounts received from members for special use of the organization's facilities, the use of which is not available to all members as a result of having paid the dues, fees or assessments required to be paid by all members;

(4) Interest earned on amounts set aside in a sinking fund;

(5) Amounts received for work done on privately owned property which is not association property; or

(6) Amounts received from members in return for their transportation to or from shopping areas, work location, etc.

(d) Special rule. Notwithstanding paragraphs (a) and (c)(3) of this section, amounts received from members or tenants of residential units owned by members (notwithstanding § 1.528–1(d)) for special use of an association's facilities will be considered exempt function income if—

(1) The amounts paid by the members are not paid more than once in any 12 month period; and

(2) The privilege obtained from the payment of such amounts lasts for the entire 12 month period or portion thereof in which the facility is commonly in use.

Thus, amounts received as the result of payments by members of a yearly fee for use of tennis courts or a swimming pool shall be considered exempt function income. However, amounts received for the use of a building for an evening, weekend, week, etc., shall not be considered exempt function income.

[T.D. 7692, 45 FR 26323, April 18, 1980]

§ 1.528–10 Special rules for computation of homeowners association taxable income and tax.

(a) In general. Homeowners association taxable income shall be determined according to the provisions of section 528(d) and the rules set forth in this section.

(b) Limitation on capital losses. If for any taxable year a homeowners association has a net capital loss, the rules of sections 1211(a) and 1212(a) shall apply.

(c) Allowable deductions—(1) In general. To be deductible in computing the unrelated business taxable income of a homeowners association, expenses, depreciation and similar items must not only qualify as items of deduction allowed by chapter 1 of the Code but must also be directly connected with the production of gross income (excluding exempt function income). To be "di-

rectly connected with" the production of gross income (excluding exempt function income), an item of deduction must have both proximate and primary relationship to the production of such income and have been incurred in the production of such income. Items of deduction attributable solely to items of gross income (excluding exempt function income) are proximately and primarily related to such income. Whether an item of deduction is incurred in the production of gross income (excluding exempt function income) is determined on the basis of all the facts and circumstances involved in each case.

(2) Dual use of facilities or personnel. Where facilities are used both for exempt functions of the organization and for the production of gross income (excluding exempt function income), expenses, depreciation and similar items attributable to such facilities (for example, items of overhead) shall be allocated between the two uses on a reasonable basis. Similarly where personnel are employed both for exempt functions and for the production of gross income (excluding exempt function income), expenses and similar items attributable to such personnel (for example, items of salary) shall be allocated between the two activities on a reasonable basis. The portion of any such item so allocated to the production of gross income (excluding exempt function income) is directly connected with such income and shall be allowable as a deduction in computing homeowners association taxable income to the extent that it qualifies as an item of deduction allowed by chapter 1 of the Code. Thus, for example, assume that X, a homeowners association, pays its manager a salary of $10,000 a year and that it derives gross income other than exempt function income. If 10 percent of the manager's time during the year is devoted to deriving X's gross income (other than exempt function income), a deduction of $1,000 (10 percent of $10,000) would generally be allowable for purposes of computing X's homeowners association taxable income.

(d) Investment credit. A homeowners association is not entitled to an investment credit.

(e) Cross reference. For the definition of exempt function income, see § 1.528–9.

[T.D. 7692, 45 FR 26324, April 18, 1980]

CORPORATIONS USED TO AVOID INCOME TAX ON SHAREHOLDERS

Corporations Improperly Accumulating Surplus

§ 1.531–1 Imposition of tax.

Section 531 imposes (in addition to the other taxes imposed upon corporations by chapter 1 of the Code) a graduated tax on the accumulated taxable income of every corporation described in section 532 and § 1.532–1. In the case of an affiliated group which makes or is required to make a consolidated return see § 1.1502–43. All of the taxes on corporations under chapter 1 of the Code are treated as one tax for purposes of assessment, collection, payment, period of limitations, etc. See section 535 and §§ 1.535–1, 1.535–2, and 1.535–3 for the definition and determination of accumulated taxable income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7937, 49 FR 3462, Jan. 27, 1984]

§ 1.532–1 Corporations subject to accumulated earnings tax.

(a) General rule. (1) The tax imposed by section 531 applies to any domestic or foreign corporation (not specifically excepted under section 532(b) and paragraph (b) of this section) formed or availed of to avoid or prevent the imposition of the individual income tax on its shareholders, or on the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of dividing or distributing them. See section 533 and § 1.533–1, relating to evidence of purpose to avoid income tax with respect to shareholders.

(2) The tax imposed by section 531 may apply if the avoidance is accomplished through the formation or use of one corporation or a chain of corporations. For example, if the capital stock of the M Corporation is held by the N Corporation, the earnings and profits of the M Corporation would not be returned as income subject to the individual income tax until such earnings and profits of the M Corporation were distributed to the N Corporation and distributed in turn by the N Corporation to its shareholders. If either the M Corporation or the N Corporation was formed or is availed of for the purpose of avoiding or preventing the imposition of the individual income tax upon the shareholders of the N Corporation, the accumulated taxable income of the corporation so formed or availed of (M or N, as the case may be) is subject to the tax imposed by section 531.

(b) Exceptions. The accumulated earnings tax imposed by section 531 does not apply to a personal holding company (as defined in section 542), to a foreign personal holding company (as defined in section 552), or to a corporation exempt from tax under subchapter F, chapter 1 of the Code.

(c) Foreign corporations. Section 531 is applicable to any foreign corporation, whether resident or nonresident, with respect to any income derived from sources, within the United States, if any of its shareholders are subject to income tax on the distributions of the corporation by reason of being (1) citizens or residents of the United States, or (2) nonresident alien individuals to whom section 871 is applicable, or (3) foreign corporations if a beneficial interest therein is owned directly or indirectly by any shareholder specified in subparagraph (1) or (2) of this paragraph.

§ 1.533–1 Evidence of purpose to avoid income tax.

(a) In general. (1) The Commissioner's determination that a corporation was formed or availed of for the purpose of avoiding income tax with respect to shareholders is subject to disproof by competent evidence. Section 533(a) provides that the fact that earnings and profits of a corporation are permitted to accumulate beyond the reasonable needs of the business shall be determinative of the purpose to avoid the income tax with respect to shareholders unless the corporation, by the preponderance of the evidence, shall prove to the contrary. The burden of proving that earnings and profits have been permitted to accumulate beyond the reasonable needs of the business may be shifted to the Commissioner under section 534. See §§ 1.534–1 through 1.534–4. Section 533(b) provides that the fact that the taxpayer is a mere holding or investment company shall be prima facie evidence of the purpose to avoid income tax with respect to shareholders.

(2) The existence or nonexistence of the purpose to avoid income tax with respect to shareholders may be indicated by circumstances other than the conditions specified in section 533. Whether or not such purpose was present depends upon the particular circumstances of each case. All circumstances which might be construed as evidence of the purpose to avoid income tax with respect to shareholders cannot be outlined, but among other things, the following will be considered:

(i) Dealings between the corporation and its shareholders, such as withdrawals by the shareholders as personal loans or the expenditure of funds by the corporation for the personal benefit of the shareholders,

(ii) The investment by the corporation of undistributed earnings in assets having no reasonable connection with the business of the corporation (see § 1.537–3), and

(iii) The extent to which the corporation has distributed its earnings and profits.

The fact that a corporation is a mere holding or investment company or has an accumulation of earnings and profits in excess of the reasonable needs of the business is not absolutely conclusive against it if the taxpayer satisfies the Commissioner that the corporation was neither formed nor availed of for the purpose of avoiding income tax with respect to shareholders.

(b) General burden of proof and statutory presumptions. The Commissioner may determine that the taxpayer was formed or availed of to avoid income tax with respect to shareholders through the medium of permitting earnings and profits to accumulate. In the case of litigation involving any such determination (except where the burden of proof is on the Commissioner under section 534), the burden of proving such determination wrong by a preponderance of the evidence, together with the corresponding burden of first going forward with the evidence, is on the taxpayer under principles applicable to income tax cases generally. For the burden of proof in a proceeding before the Tax Court with respect to the allegation that earnings and profits have been permitted to accumulate beyond the reasonable needs of the business, see section 534 and §§ 1.534–2 through 1.534–4. For a definition of a holding or investment company, see paragraph (c) of this section. For determination of the reasonable needs of the business, see section 537 and §§ 1.537–1 through 1.537–3. If the taxpayer is a mere holding or investment company, and the Commissioner therefore determines that the corporation was formed or availed of for the purpose of avoiding income tax with respect to shareholders, then section 533(b) gives further weight to the presumption of correctness already arising from the Commissioner's determination by expressly providing an additional presumption of the existence of a purpose to avoid income tax with respect to shareholders. Further, if it is established (after complying with section 534 where applicable) that earnings and profits were permitted to accumulate beyond the reasonable needs of the business and the Commissioner has therefore determined that the corporation was formed or availed of for the purpose of avoiding income tax with respect to

shareholders, then section 533(a) adds still more weight to the Commissioner's determination. Under such circumstances, the existence of such an accumulation is made determinative of the purpose to avoid income tax with respect to shareholders unless the taxpayer proves to the contrary by the preponderance of the evidence.

(c) Holding or investment company. A corporation having practically no activities except holding property and collecting the income therefrom or investing therein shall be considered a holding company within the meaning of section 533(b). If the activities further include, or consist substantially of, buying and selling stocks, securities, real estate, or other investment property (whether upon an outright or marginal basis) so that the income is derived not only from the investment yield but also from profits upon market fluctuations, the corporation shall be considered an investment company within the meaning of section 533(b).

(d) Small business investment companies. A corporation which is licensed to operate as a small business investment company under the Small Business Investment Act of 1958 (15 U.S.C. ch. 14B) and the regulations thereunder (13 CFR Part 107) will generally be considered to be a "mere holding or investment company" within the meaning of section 533(b). However, the presumption of the existence of the purpose to avoid income tax with respect to shareholders which results from the fact that such a company is a "mere holding or investment company" will be considered overcome so long as such company—

(1) Complies with all the provisions of the Small Business Investment Act of 1958 and the regulations thereunder; and

(2) Actively engages in the business of providing funds to small business concerns through investment in the equity capital of, or through the disbursement of long-term loans to, such concerns in such manner and under such terms as the company may fix in accordance with regulations promulgated by the Small Business Administration (see secs. 304 and 305 of the Small Business Investment Act of 1958, as amended (15 U.S.C. 684, 685)).

On the other hand, if such a company violates or fails to comply with any of the provisions of the Small Business Investment Act of 1958, as amended, or the regulations thereunder, or ceases to be actively engaged in the business of providing funds to small business concerns in the manner provided in subparagraph (2) of this paragraph, it will not be considered to have overcome the presumption by reason of any rules provided in this paragraph.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6652, 28 FR 4786, May 14, 1963]

§ 1.533–2 Statement required.

The corporation may be required to furnish a statement of its accumulated earnings and profits, the payment of dividends, the name and address of, and number of shares held by, each of its shareholders, the amounts that would be payable to each of the shareholders if the income of the corporation were distributed and other information required under section 6042.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.534–1 Burden of proof as to unreasonable accumulations generally.

For purposes of applying the presumption provided for in section 533(a) and in determining the extent of the accumulated earnings credit under section 535(c)(1), the burden of proof with respect to an allegation by the Commissioner that all or any part of the earnings and profits of the corporation have been permitted to accumulate beyond the reasonable needs of the business may vary under section 534 as between litigation in the Tax Court and that in any other court. In case of a proceeding in a court other than the Tax Court, see paragraph (b) of § 1.533–1.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.534–2 Burden of proof as to unreasonable accumulations in cases before the Tax Court.

(a) Burden of proof on Commissioner. Under the general rule provided in section 534(a), in any proceeding before the Tax Court involving a notice of deficiency based in whole or in part on the allegation that all or any part of the earnings and profits have been permitted to accumulate beyond the reasonable needs of the business, the burden of proof with respect to such allegation is upon the Commissioner if—

(1) A notification, as provided for in section 534(b) and paragraph (c) of this section, has not been sent to the taxpayer; or

(2) A notification, as provided for in section 534(b) and paragraph (c) of this section, has been sent to the taxpayer and, in response to such notification, the taxpayer has submitted a statement, as provided in section 534(c) and paragraph (d) of this section, setting forth the ground or grounds (together with facts sufficient to show the

basis thereof) on which it relies to establish that all or any part of its earnings and profits have not been permitted to accumulate beyond the reasonable needs of the business. However, the burden of proof in the latter case is upon the Commissioner only with respect to the relevant ground or grounds set forth in the statement submitted by the taxpayer, and only if such ground or grounds are supported by facts (contained in the statement) sufficient to show the basis thereof.

(b) Burden of proof on the taxpayer. The burden of proof in a Tax Court proceeding with respect to an allegation that all or any part of the earnings and profits have been permitted to accumulate beyond the reasonable needs of the business is upon the taxpayer if—

(1) A notification, as provided for in section 534(b) and paragraph (c) of this section, has been sent to the taxpayer and the taxpayer has not submitted a statement, in response to such notification, as provided in section 534(c) and paragraph (d) of this section; or

(2) A statement has been submitted by the taxpayer in response to such notification, but the ground or grounds on which the taxpayer relies are not relevant to the allegation or, if relevant, the statement does not contain facts sufficient to show the basis thereof.

(c) Notification to the taxpayer. Under section 534(b) a notification informing the taxpayer that the proposed notice of deficiency includes an amount with respect to the accumulated earnings tax imposed by section 531 may be sent by registered mail (or by certified or registered mail, if the notification is mailed after September 2, 1958) to the taxpayer at any time before the mailing of the notice of deficiency in the case of a taxable year beginning after December 31, 1953, and ending after August 16, 1954. See § 1.534–4 for rules relating to taxable years subject to the Internal Revenue Code of 1939. See section 534(d) and § 1.534–3 with respect to a notification in the case of a jeopardy assessment.

(d) Statement by taxpayer. (1) A taxpayer who has received a notification, as provided in section 534(b) and paragraph (c) of this section, that the proposed notice of deficiency includes an amount with respect to the accumulated earnings tax imposed by section 531, may, under section 534(c), submit a statement that all or any part of the earnings and profits of the corporation have not been permitted to accumulate beyond the reasonable needs of the business. Such statement shall set forth the ground or grounds (together with facts sufficient to show the basis thereof) on which the taxpayer relies to establish that there has been no accumulation of earnings and profits beyond the reasonable needs of the business. See paragraphs (a) and (b) of this section for rules concerning the effect of the statement with respect to burden of proof. See §§ 1.537–1 to 1.537–3, inclusive, relating to reasonable needs of the business.

(2) The taxpayer's statement, under section 534(c) and this paragraph, must be submitted to the Internal Revenue office which issued the notification (referred to in section 534(b) and paragraph (c) of this section) within 60 days after the mailing of such notification. If the taxpayer is unable, for good cause, to submit the statement within such 60-day period, an additional period not exceeding 30 days may be granted upon receipt in the Internal Revenue office concerned (before the expiration of the 60-day period provided herein) of a request from the taxpayer, setting forth the reasons for such request. See section 534(d) and § 1.534–3 with respect to a statement in the case of a jeopardy assessment.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.534–3 Jeopardy assessments in Tax Court cases.

In the case of a jeopardy assessment, a notice of deficiency is required to be sent to the taxpayer by registered mail (or by certified or registered mail, if the notice is mailed after September 2, 1958) within 60 days after the making of the assessment. See section 6861. If a jeopardy assessment is made before the mailing of the deficiency notice, then in the case of a proceeding in the Tax Court, if the deficiency notice informs the taxpayer that an amount of accumulated earnings tax is included in the deficiency, such notice shall constitute the notification provided for in section 534(b) and paragraph (c) of § 1.534–2. Under such circumstances the statement described in section 534(c) and paragraph (d) of § 1.534–2 shall instead be included in the taxpayer's petition to the Tax Court, if the taxpayer desires to submit such statement. See paragraph (b) of § 1.534–2, relating to burden of proof on the taxpayer.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.534–4 Taxable years subject to the Internal Revenue Code of 1939.

The rules prescribed in §§ 1.534–1 to 1.534–3, inclusive, apply in any proceeding tried on the merits after August 11, 1955, before the Tax Court

and involving a notice of deficiency in surtax imposed by section 102 of the Internal Revenue Code of 1939, for a taxable year subject to such code, based in whole or in part on the allegation that all or any part of the earnings and profits of the taxpayer have been permitted to accumulate beyond the reasonable needs of the business. If a notice of deficiency for a taxable year described in the preceding sentence was mailed before September 11, 1955, a notification mailed before that date shall be effective as fully as though such notification had been mailed before the notice of deficiency was mailed.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.535–1 Definition.

(a) The accumulated earnings tax is imposed by section 531 on the accumulated taxable income. Accumulated taxable income is the taxable income of the corporation with the adjustments prescribed by section 535(b) and § 1.535–2, minus the sum of the dividends paid deduction and the accumulated earnings credit. See section 561 and the regulations thereunder, relating to the definition of the deduction for dividends paid, and section 535(c) and § 1.535–3, relating to the accumulated earnings credit.

(b) In the case of a foreign corporation, whether resident or nonresident, which files or causes to be filed a return, the accumulated taxable income shall be the taxable income from sources within the United States with the adjustments prescribed by section 535(b) and § 1.535–2 minus the sum of the dividends paid deduction and the accumulated earnings credit. In the case of a foreign corporation which files no return, the accumulated taxable income shall be the gross income from sources within the United States without allowance of any deductions (including the accumulated earnings credit).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972]

§ 1.535–2 Adjustments to taxable income.

(a) Taxes—(1) United States taxes. In computing accumulated taxable income for any taxable year, there shall be allowed as a deduction the amount by which Federal income and excess profits taxes accrued during the taxable year exceed the credit provided by section 33 (relating to taxes of foreign countries and possessions of the United States), except that no deduction shall be allowed for (i) the accumulated earnings tax imposed by section 531 (or a corresponding section of a prior law), (ii) the personal holding company tax imposed by section 541 (or a corresponding section of a prior law), and (iii) the excess profits tax imposed by subchapter E, chapter 2 of the Internal Revenue Code of 1939, for taxable years beginning after December 31, 1940. The deduction is for taxes accrued during the taxable year, regardless of whether the corporation uses an accrual method of accounting, the cash receipts and disbursements method, or any other allowable method of accounting. In computing the amount of taxes accrued, an unpaid tax which is being contested is not considered accrued until the contest is resolved.

(2) Taxes of foreign countries and United States possessions. In determining accumulated taxable income for any taxable year, if the taxpayer chooses the benefits of section 901 for such taxable year, a deduction shall be allowed for—

(i) The income, war profits, and excess profits taxes imposed by foreign countries or possessions of the United States and accrued during such taxable year, and

(ii) In the case of a domestic corporation, the foreign income taxes deemed to be paid for such taxable year under section 902(a) in accordance with §§ 1.902–1 and 1.902–2 or section 960(a)(1) in accordance with § 1.960–7.

In no event shall the amount under subdivision (ii) of this subparagraph exceed the amount includible in gross income with respect to such taxes under section 78 and § 1.78–1. The credit for such taxes provided by section 901 shall not be allowed against the accumulated earnings tax imposed by section 531. See section 901(a).

(b) Charitable contributions. Section 535(b)(2) provides that, in computing the accumulated taxable income of a corporation, the deduction for charitable contributions shall be computed without regard to section 170(b)(2). Thus, the amount of charitable contributions made during the taxable year not allowable as a deduction under section 170 by reason of the limitations imposed by section 170(b)(2) shall be allowed as a deduction in computing accumulated taxable income for the taxable year. However, any excess of the amount of the charitable contributions made in a prior taxable year over the amount allowed as a deduction under section 170 for such year shall not be allowed as a deduction from taxable income in computing accumulated taxable income for the taxable year.

(c) **Special deductions disallowed.** Sections 241 through 248 provide for the allowance of special deductions for such items as partially tax-exempt interest, certain dividends received, dividends paid on certain preferred stock of public utilities, and organizational expenses. Such special deductions, except the deduction provided by section 248 (relating to organizational expenses) shall be disallowed in computing accumulated taxable income.

(d) **Net operating loss.** The net operating loss deduction provided in section 172 is not allowed for purposes of computing accumulated taxable income.

(e) **Capital losses.** (1) Losses from sales or exchanges of capital assets during the taxable year, which are disallowed as deductions under section 1211(a) in computing taxable income, shall be allowed as deductions in computing accumulated taxable income.

(2) The computation of the capital losses allowable as a deduction in computing accumulated taxable income may be illustrated by the following example:

Example. X Corporation has capital losses of $30,000 which are disallowed under section 1211(a) for the taxable year ended December 31, 1956. This amount represents a loss of $25,000 from the sale or exchange of capital assets during the taxable year ended December 31, 1956, plus a $5,000 capital loss carryover resulting from the sale or exchange of capital assets during the taxable year ended December 31, 1955. In computing accumulated taxable income for the taxable year ended December 31, 1956, only the loss of $25,000 arising from the sale or exchange of capital assets during that taxable year will be allowed as a deduction.

(f) **Long-term capital gains.** (1) There is allowed as a deduction in computing accumulated taxable income, the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for such year (determined without regard to the capital loss carryover provided in section 1212) minus the taxes attributable to such excess as provided by section 535(b)(6). The tax attributable to such excess is the difference between—

(i) The taxes (except the accumulated earnings tax) imposed by subtitle A of the Code for such year, and

(ii) The taxes (except the accumulated earnings tax) imposed by subtitle A computed for such year as if taxable income were reduced by the excess of the net long-term capital gain over net short-term capital loss (including the capital loss carryover to such year).

Where the tax (except the accumulated earnings tax) imposed by subtitle A includes an amount computed under section 1201(a)(2), the tax attributable to such excess is such amount computed under section 1201(a)(2).

(2) The application of the rule in subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Assume that D Corporation, for the taxable year ended December 31, 1956, has taxable income of $103,000 of which $8,000 is the excess of net long-term capital gain of $12,000 over a net short-term capital loss of $9,000. The $9,000 net short-term capital loss includes a capital loss carryover of $5,000. The amount allowable as a deduction under section 535(b)(6) and subparagraph (1) of this paragraph is $7,250, computed as follows: Net long-term capital gain less net short-term capital loss (computed without regard to the capital loss carryover) is $8,000 (that is, $12,000 net long-term capital gain less $4,000 net short-term capital loss computed without regard to the capital loss carryover of $5,000). The tax attributable to the excess of net long-term capital gain over net short-term capital loss (computed by taking the capital loss carryover into account) is $750, that is, 25 percent of such excess of $3,000, computed under section 1201(a)(2). The difference of $7,250 ($8,000 less $750) is the amount allowable as a deduction in computing accumulated taxable income.

(3) Section 631(c) (relating to gain or loss in the case of disposal of coal or domestic iron ore) shall have no application in determining the amount of the deduction allowable under section 535(b)(6).

(g) **Capital loss carrybacks and carryovers.** Capital losses carried to a taxable year under section 1212(a) shall have no application for purposes of computing accumulated taxable income for such year.

(h) **Bank affiliates.** There is allowed the deduction provided by section 601 in the case of bank affiliates (as defined in section 2 of the Banking Act of 1933; 12 U.S.C. 221a(c)).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6805, 30 FR 3209, March 9, 1965; T.D. 6841, 30 FR 9305, July 27, 1965; T.D. 7301, 39 FR 964, Jan. 4, 1974; T.D. 7649, 44 FR 60086, Oct. 18, 1979]

§ 1.535–3 Accumulated earnings credit.

(a) **In general.** As provided in section 535(a) and § 1.535–1, the accumulated earnings credit, provided by section 535(c), reduces taxable income in computing accumulated taxable income. In the case of a corporation, not a mere holding or investment company, the accumulated earnings credit is determined as provided in paragraph (b) of this section and, in the case of a holding or investment company, as provided in paragraph (c) of this section.

(b) **Corporation which is not a mere holding or investment company—(1) General rule.** (i) In the case of a corporation, not a mere holding or

investment company, the accumulated earnings credit is the amount equal to such part of the earnings and profits of the taxable year which is retained for the reasonable needs of the business, minus the deduction allowed by section 535(b)(6) (see paragraph (f) of § 1.535–2, relating to the deduction for long-term capital gains). In no event shall the accumulated earnings credit be less than the minimum credit provided for in section 535(c)(2) and subparagraph (2) of this paragraph. The amount of the earnings and profits for the taxable year retained is the amount by which the earnings and profits for the taxable year exceed the dividends paid deduction for such taxable year. See section 561 and §§ 1.561–1 and 1.561–2, relating to the deduction for dividends paid.

(ii) In determining whether any amount of the earnings and profits of the taxable year has been retained for the reasonable needs of the business, the accumulated earnings and profits of prior years will be taken into consideration. Thus, for example, if such accumulated earnings and profits of prior years are sufficient for the reasonable needs of the business, then any earnings and profits of the current taxable year which are retained will not be considered to be retained for the reasonable needs of the business. See section 537 and §§ 1.537–1 and 1.537–2.

(2) Minimum credit. Section 535(c)(2) provides for the allowance of a minimum accumulated earnings credit in the case of a corporation which is not a mere holding or investment company. Except as otherwise provided in section 243(b)(3) and § 1.243–5 (relating to effect of 100-percent dividends received deduction under section 243(b)) and sections 1561, 1562, and 1564 (relating to limitations on certain tax benefits in the case of certain controlled corporations), in the case of such a corporation, this minimum credit shall in no case be less than the amount by which $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975) exceeds the accumulated earnings and profits of the corporation at the close of the preceding taxable year. See paragraph (d) of this section for the effect of dividends paid after the close of the taxable year in determining accumulated earnings and profits at the close of the preceding taxable year. In determining the amount of the minimum credit allowable under section 535(c)(2), the needs of the business are not taken into consideration. If the taxpayer has accumulated earnings and profits at the close of the preceding taxable year equal to or in excess of $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975), the credit, if any, is determined without regard to section 535(c)(2). It is not intended that the provision for the minimum credit shall in any way create an inference that an accumulation in excess of $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975) is unreasonable. The reasonable needs of the business may require the accumulation of more or less than $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975), depending upon the circumstances in the case, but such needs shall not be taken into consideration to any extent in cases where the minimum accumulated earnings credit is applicable. For a discussion of the reasonable needs of the business, see section 537 and §§ 1.537–1, 1.537–2, and 1.537–3.

(3) Illustrations of accumulated earnings credit. The computation of the accumulated earnings credit provided by section 535(c) may be illustrated by the following examples:

Example (1). The X Corporation, which is not a mere holding or investment company, has accumulated earnings and profits in the amount of $125,000 as of December 31, 1974. Thus, the minimum credit provided by section 535(c)(2) exceeds the accumulated earnings and profits of X by $25,000. It has earnings and profits for the taxable year ended December 31, 1975, in the amount of $100,000 and has a dividends paid deduction under section 561 in the amount of $30,000 so that the earnings and profits for the taxable year which are retained in the business amount to $70,000. Assume that it has been determined that the earnings and profits for the taxable year which may be retained for the reasonable needs of the business amount to $55,000 and that a deduction has been allowed under section 535(b)(6) in the amount of $5,000. Since the amount by which $150,000 exceeds the accumulated earnings and profits at the close of the preceding taxable year is less than $50,000 ($55,000–$5,000), the minimum credit provided by section 535(c)(2) will not apply and the accumulated earnings credit must be computed under section 535(c)(1) on the basis of the reasonable needs of the business. In this case, the accumulated earnings credit for the taxable year ended December 31, 1975, will be $50,000 computed as follows:

Earnings and profits of the taxable year determined to be retained for the reasonable needs of the business	$55,000
Less: The deduction for long-term capital gains (less applicable tax) allowed under sec. 535(b)(6)	5,000
Accumulated earnings credit allowable under sec. 535(c)(1)	50,000

Example (2). The Z Corporation which is not a mere holding or investment company, has accumulated earnings and profits in the amount of $45,000 as of December 31, 1974; it has earnings and profits for the taxable year ended December 31, 1975, in the amount of $115,000 and has a dividends paid deduction under section 561 in the amount of $10,000, so that the earnings and profits for the taxable year which are retained amount to $105,000. Assume that it has been determined that the accumulated earnings and profits of the taxable year which may be retained for the reasonable needs of the business amount to $20,000 and that no deduction is allowable for long-term capital gains under section 535(b)(6). The accumu-

lated earnings credit allowable under section 535(c)(1) on the basis of the reasonable needs of the business is determined to be only $20,000. However, since the amount by which $150,000 exceeds the accumulated earnings and profits at the close of the preceding taxable year is more than $20,000, the minimum accumulated earnings credit provided by section 535(c)(2) is applicable. The allowable credit will be the amount by which $150,000 exceeds the accumulated earnings and profits at the close of the preceding taxable year (*i.e.*, $105,000, $150,000 less $45,000 of accumulated earnings and profits at the close of the preceding taxable year).

(c) **Holding and investment companies.** Section 535(c)(3) provides that, in the case of a mere holding or investment company, the accumulated earnings credit shall be the amount, if any, by which $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975) exceeds the accumulated earnings and profits of the corporation at the close of the preceding taxable year. Thus, if such a corporation has accumulated earnings equal to or in excess of $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975) at the close of its preceding taxable year, no accumulated earnings credit is allowable in computing the accumulated taxable income. See paragraph (c) of § 1.533–1 for a definition of a holding or investment company. For the accumulated earnings credit of a mere holding or investment company which is a member of an affiliated group which has elected the 100 percent dividends received deduction under section 243(b), see section 243(b)(3) and § 1.243–5. For the accumulated earnings credit of a mere holding or investment company which is a component member of a controlled group of corporations (as defined in section 1563), see sections 1561, 1562, and 1564.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6992, 34 FR 826, Jan. 18, 1969; T.D. 7181, 37 FR 8066, April 25, 1972; T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7376, 40 FR 42744, Sept. 16, 1975; T.D. 7528, 42 FR 64694, Dec. 28, 1977]

§ 1.536–1 Short taxable years.

Accumulated taxable income for a taxable year consisting of a period of less than 12 months shall not be placed on an annual basis for the purpose of the accumulated earnings tax imposed by section 531. In such cases accumulated taxable income shall be computed on the basis of the taxable income for such period of less than 12 months, adjusted in the manner provided by section 535(b) and § 1.535–2.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.537–1 Reasonable needs of the business.

(a) **In general.** The term "reasonable needs of the business" includes (1) the reasonable anticipated needs of the business (including product liability loss reserves, as defined in paragraph (f) of this section), (2) the section 303 redemption needs of the business, as defined in paragraph (c) of this section, and (3) the excess business holdings redemption needs of the business as described in paragraph (d) of this section. See paragraph (E) of this section for additional rules relating to the section 303 redemption needs and the excess business holdings redemption needs of the business. An accumulation of the earnings and profits (including the undistributed earnings and profits of prior years) is in excess of the reasonable needs of the business if it exceeds the amount that a prudent businessman would consider appropriate for the present business purposes and for the reasonably anticipated future needs of the business. The need to retain earnings and profits must be directly connected with the needs of the corporation itself and must be for bona fide business purposes. For purposes of this paragraph the section 303 redemption needs of the business and the excess business holdings redemption needs of the business are deemed to be directly connected with the needs of the business and for a bona fide business purpose. See § 1.537–3 for a discussion of what constitutes the business of the corporation. The extent to which earnings and profits have been distributed by the corporation may be taken into account in determining whether or not retained earnings and profits exceed the reasonable needs of the business. See § 1.537–2, relating to grounds for accumulation of earnings and profits.

(b) **Reasonable anticipated needs.** (1) In order for a corporation to justify an accumulation of earnings and profits for reasonably anticipated future needs, there must be an indication that the future needs of the business require such accumulation, and the corporation must have specific, definite, and feasible plans for the use of such accumulation. Such an accumulation need not be used immediately, nor must the plans for its use be consummated within a short period after the close of the taxable year, provided that such accumulation will be used within a reasonable time depending upon all the facts and circumstances relating to the future needs of the business. Where the future needs of the business are uncertain or vague, where the plans for the future use of an accumulation are not specific, definite, and feasible, or where the execution of such a plan is postponed indefinitely, an accumulation cannot be justified on the grounds of reasonably anticipated needs of the business.

(2) Consideration shall be given to reasonably anticipated needs as they exist on the basis of the facts at the close of the taxable year. Thus, subsequent events shall not be used for the purpose of showing that the retention of earnings or profits was unreasonable at the close of the taxable year if all the elements of reasonable anticipation are present at the close of such taxable year. However, subsequent events may be considered to determine whether the taxpayer actually intended to consummate or has actually consummated the plans for which the earnings and profits were accumulated. In this connection, projected expansion or investment plans shall be reviewed in the light of the facts during each year and as they exist as of the close of the taxable year. If a corporation has justified an accumulation for future needs by plans never consummated, the amount of such an accumulation shall be taken into account in determining the reasonableness of subsequent accumulations.

(c) Section 303 redemption needs of the business. **(1)** The term "section 303 redemption needs" means, with respect to the taxable year of the corporation in which a shareholder of the corporation died or any taxable year thereafter, the amount needed (or reasonably anticipated to be needed) to redeem stock included in the gross estate of such shareholder but not in excess of the amount necessary to effect a distribution to which section 303 applies. For purposes of this paragraph, the term "shareholder" includes an individual in whose gross estate stock of the corporation is includable upon his death for Federal estate tax purposes.

(2) This paragraph applies to a corporation to which section 303(c) would apply if a distribution described therein were made.

(3) If stock included in the gross estate of a decedent is stock of two or more corporations described in section 303(b)(2)(B), the amount needed by each such corporation for section 303 redemption purposes under this section shall, unless the particular facts and circumstances indicate otherwise, be that amount which bears the same ratio to the amount described in section 303(a) as the fair market value of such corporation's stock included in the gross estate of such decedent bears to the fair market value of all of the stock of such corporations included in the gross estate. For example, facts and circumstances indicating that the allocation prescribed by this subparagraph is not required would include notice given to the corporations by the executor or administrator of the decedent's estate that he intends to request the redemption of stock of only one of such corporations or the redemption of stock of such corporations in a ratio which is unrelated to the respective fair market values of the stock of the corporations included in the decedent's gross estate.

(4) The provisions of this paragraph apply only to taxable years ending after May 26, 1969.

(d) Excess business holdings redemption needs. **(1)** The term "excess business holdings redemption needs" means, with respect to taxable years of the corporation ending after May 26, 1969, the amount needed (or reasonably anticipated to be needed) to redeem from a private foundation stock which—

(i) Such foundation held on May 26, 1969 (or which was received by such foundation pursuant to a will or irrevocable trust to which section 4943(c)(5) applies), and either

(ii) Constituted excess business holdings on such date or would have constituted excess business holdings as of that date if there were taken into account (a) stock received pursuant to a will or trust described in subdivision (i) of this subparagraph and (b) the reduction in the total outstanding stock of the corporation which would have resulted solely from the redemption of stock held by the private foundation, or

(iii) Constituted stock redemption of which before January 1, 1975, or after October 4, 1976, and before January 1, 1977, is, by reason of section 101(*l*)(2)(B) of the Tax Reform Act of 1969, as amended by section 1309 of the Tax Reform Act of 1976, and § 53.4941(d)–4(b), permitted without imposition of tax under section 4941, but only to the extent such stock is to be redeemed before January 1, 1975, or after October 4, 1976, and before January 1, 1977, or is to be redeemed thereafter pursuant to the terms of a binding contract entered into on or before such date to redeem all of the stock of the corporation held by the private foundation on such date.

(2) The purpose of subparagraph (1) of this paragraph is to facilitate a private-foundation's disposition of certain excess business holdings, in order for the private foundation not to be liable for tax under section 4943. See section 4943(c) and the regulations thereunder for the definition of excess business holdings. For purposes of section 537(b)(2) and this paragraph, however, any determination of the existence of excess business holdings shall be made without taking into account the provisions of section 4943(c)(4) which treat certain excess business holdings as held by a disqualified

person (rather than by the private foundation), except that the periods described in section 4943(c)(4)(B), (C), and (D), if applicable, shall be taken into account in determining the period during which an excess business holdings redemption need may be deemed to exist. Thus, an excess business holdings redemption need may, depending upon the facts and circumstances, be deemed to exist for a part or all of the 20-year, 15-year, or 10-year period specified in section 4943(c)(4)(B) during which the interest in the corporation held by the private foundation is treated as held by a disqualified person rather than by the private foundation, and, if applicable, (i) any suspension of such 20-year, 15-year, or 10-year period as provided by section 4943(c)(4)(C) and (ii) the 15-year "second phase" specified in section 4943(c)(4)(D). The foregoing sentence is not to be construed to prevent an accumulation of earnings and profits for the purpose of effecting a redemption of excess business holdings at a time or times prior to expiration of the periods described in such sentence. This subparagraph is not to be construed to prevent an accumulation of earnings and profits for the purpose of effecting a redemption described in subdivision (iii) of subparagraph (1) of this paragraph.

(3) The extent of an excess business holdings redemption need cannot exceed the total number of shares of stock so held or received by the private foundation (i) redemption of which alone would sufficiently reduce such private foundation's proportionate share of the corporation's total outstanding stock in order for the private foundation not to be liable for tax under section 4943, or (ii) redemption of which is, by reason of § 53.4941(d)–4(b), permitted without imposition of tax under section 4941 provided that such redemption is accomplished within the period and in the manner prescribed in subdivision (iii) of subparagraph (1) of this paragraph. Thus, excess business holdings of a private foundation attributable to an increase in the private foundation's proportionate share of the corporation's total outstanding stock by reason of a redemption of stock after May 26, 1969, from any person other than the private foundation do not give rise to an excess business holdings redemption need.

(4) For purposes of subdivision (ii) of subparagraph (1) of this paragraph, an excess business holdings redemption need can arise with respect to shares of the corporation's stock under section 537(a)(3) only following actual acquisition by the private foundation of such shares and their characterization as an excess business holding. Thus, this paragraph does not apply to an accumulation of earnings and profits in one taxable year in anticipation of redemption of excess business holdings to be acquired by a private foundation in a subsequent year pursuant to a will or irrevocable trust to which section 4943(c)(5) applies or in anticipation of shares held becoming excess business holdings of the private foundation in a subsequent year by reason of additional shares to be received by the private foundation in such subsequent year pursuant to a will or irrevocable trust to which section 4943(c)(5) applies. Once having arisen, however, an excess business holdings redemption need may continue until redemption of the private foundation's excess business holdings described in this paragraph or other disposition of such excess business holdings by the private foundation.

(5) Notwithstanding any other provision of this paragraph, an excess business holdings redemption need will not be deemed to exist with respect to stock held by a private foundation the redemption of which would subject any person to tax under section 4941.

(6) For purposes of subdivision (ii) of subparagraph (1) of this paragraph, the number of shares of stock held by a private foundation on May 26, 1969 (or received pursuant to a will or irrevocable trust to which section 4943(c)(5) applies), redemption of which alone would sufficiently reduce such foundation's proportionate share of a corporation's total outstanding stock in order for the foundation not to be liable for tax under section 4943 may be determined by application of the following formula:

$$X = PH - (Y \times SO) \div 1 - Y$$

X = Number of shares to be redeemed.

Y = Maximum percentage of outstanding stock which private foundation can hold without being liable for tax under section 4943.

PH = Number of shares of stock held by private foundation on May 26, 1969, or received pursuant to a will or irrevocable trust to which section 4943(c)(5) applies.

SO = Total number of shares of stock outstanding unreduced by any redemption from a person other than the private foundation.

(7) The provisions of this paragraph may be illustrated by the following example:

Example. (i) On May 26, 1969, Private Foundation A holds 60 of the 100 outstanding shares of the capital stock of corporation X, which is not a disqualified person with respect to A. None of the remaining 40 shares is owned by a disqualified person within the meaning of section 4946(a). On June 1, 1975, X redeems 10 shares of its stock from individual B, thus reducing its outstanding stock to 90 shares. On June 1, 1976, A receives 20 additional shares of X stock by bequest under a will to which section 4943(c)(5) applies. As of June 1,

1976, then, A holds 80 of the 90 outstanding shares of X. Solely for purposes of this example and to illustrate the application of this paragraph, it will be assumed that in order not to be liable for the initial tax under section 4943, A must, before the close of the "second phase" described in section 4943(c)(4)(D), reduce its proportionate stock interest in X to 35 percent. A requests X to redeem from it a sufficient number of its shares to so reduce its proportionate stock interest in X to 35 percent, and X agrees to effect such a redemption.

(ii) As of May 26, 1969, A's excess business holdings are 25 shares of X, the number of shares which A would be required to dispose of to a person other than X in order to reduce its proportionate holdings in X to no more than 35 percent. If the disposition is to be by means of a redemption, however, A's excess business holdings on May 26, 1969, for purposes of determining X's excess business holdings redemption needs, are 39 shares, *i.e.*, the number of shares X would be required to redeem in order to reduce A's proportionate stock interest to 35 percent. Although the redemption of 10 shares from B on June 1, 1975, creates additional excess business holdings of A because it effectively increases A's proportionate stock interest in X, this increase does not create an additional excess business holdings redemption need because it resulted from a redemption from a person other than A. The bequest of 20 shares of X received by A on June 1, 1976, creates a further excess business holdings redemption need as of that date in the amount needed (or reasonably anticipated to be needed) to redeem an additional 31 shares from A, *i.e.*, the number of shares which, when added to the excess business holdings of A on May 26, 1969, would have to be redeemed to reduce A's proportionate stock interest in X to 35 percent without taking the earlier redemption from B into account.

(e)(1) A determination whether and to what extent an amount is needed (or reasonably anticipated to be needed) for the purpose described in subparagraph (1) of paragraph (c) or (d) of this section is dependent upon the particular circumstances of the case, including the total amount of earnings and profits accumulated in prior years which may be available for such purpose and the existence of a reasonable expectation that a redemption described in paragraph (c) or (d) of this section will in fact be effected. Although paragraph (c) or (d) of this section may apply even though no redemption of stock is in fact effected, the failure to effect such redemption may be taken into account in determining whether the accumulation was needed (or reasonably anticipated to be needed) for a purpose described in paragraph (c) or (d).

(2) In applying subparagraph (1) of paragraph (c) or (d) of this section, the discharge of an obligation incurred to make a redemption shall be treated as the making of the redemption.

(3) In determining whether an accumulation is in excess of the reasonable needs of the business for a particular year, the fact that one of the exceptions specified in paragraph (c) or (d) of this section applies in a subsequent year is not to give rise to an inference that the accumulation would not have been for the reasonable needs of the business in the prior year. Also, no inference is to be drawn from the enactment of section 537(a)(2) and (3) that accumulations in any prior year would not have been for the reasonable needs of the business in the absence of such provisions. Thus, the reasonableness of accumulations in years prior to a year in which one of the exceptions specified in paragraph (c) or (d) of this section applies is to be determined solely upon the facts and circumstances existing at the times the accumulations occur.

(f) Product liability loss reserves. (1) The term "product liability loss reserve" means, with respect to taxable years beginning after September 30, 1979, reasonable amounts accumulated for the payment of reasonably anticipated product liability losses, as defined in section 172(j) and § 1.172-13(b)(1).

(2) For purposes of this paragraph, whether an accumulation for anticipated product liability losses is reasonable in amount and whether such anticipated product liability losses are likely to occur shall be determined in light of all facts and circumstances of the taxpayer making such accumulation. Some of the factors to be considered in determining the reasonableness of the accumulation include the taxpayer's previous product liability experience, the extent of the taxpayer's coverage by commercial product liability insurance, the income tax consequences of the taxpayer's ability to deduct product liability losses and related expenses, and the taxpayer's potential future liability due to defective products in light of the taxpayer's plans to expand the production of products currently being manufactured, provided such plans are specific, definite and feasible. Additionally, a factor to be considered in determining whether the accumulation is reasonable in amount is whether the taxpayer, in accounting for its potential future liability, took into account the reasonably estimated present value of the potential future liability.

(3) Only those accumulations made with respect to products that have been manufactured, leased, or sold shall be considered as accumulations made under this paragraph. Thus, for example, accumulations with respect to a product which has not progressed beyond the development stage are not reasonable accumulations under this paragraph.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7165, 37 FR 5022, March 9, 1972, 37 FR 5703, March 18, 1972; T.D. 7678, 44 FR 12416, Feb. 26, 1980; T.D. 8096, 51 FR 30483, Aug. 27, 1986]

§ 1.537–2 Grounds for accumulation of earnings and profits.

(a) *In general.* Whether a particular ground or grounds for the accumulation of earnings and profits indicate that the earnings and profits have been accumulated for the reasonable needs of the business or beyond such needs is dependent upon the particular circumstances of the case. Listed below in paragraphs (b) and (c) of this section are some of the grounds which may be used as guides under ordinary circumstances.

(b) *Reasonable accumulation of earnings and profits.* Although the following grounds are not exclusive, one or more of such grounds, if supported by sufficient facts, may indicate that the earnings and profits of a corporation are being accumulated for the reasonable needs of the business provided the general requirements under §§ 1.537–1 and 1.537–3 are satisfied:

(1) To provide for bona fide expansion of business or replacement of plant;

(2) To acquire a business enterprise through purchasing stock or assets;

(3) To provide for the retirement of bona fide indebtedness created in connection with the trade or business, such as the establishment of a sinking fund for the purpose of retiring bonds issued by the corporation in accordance with contract obligations incurred on issue;

(4) To provide necessary working capital for the business, such as, for the procurement of inventories;

(5) To provide for investments or loans to suppliers or customers if necessary in order to maintain the business of the corporation; or

(6) To provide for the payment of reasonably anticipated product liability losses, as defined in section 172(j), § 1.172-13(b)(1), and § 1.537-1(f).

(c) *Unreasonable accumulations of earnings and profits.* Although the following purposes are not exclusive, accumulations of earnings and profits to meet any one of such objectives may indicate that the earnings and profits of a corporation are being accumulated beyond the reasonable needs of the business:

(1) Loans to shareholders, or the expenditure of funds of the corporation for the personal benefit of the shareholders;

(2) Loans having no reasonable relation to the conduct of the business made to relatives or friends of shareholders, or to other persons;

(3) Loans to another corporation, the business of which is not that of the taxpayer corporation, if the capital stock of such other corporation is owned, directly or indirectly, by the shareholder or shareholders of the taxpayer corporation and such shareholder or shareholders are in control of both corporations;

(4) Investments in properties, or securities which are unrelated to the activities of the business of the taxpayer corporation; or

(5) Retention of earnings and profits to provide against unrealistic hazards.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960; T.D. 8096, 51 FR 30484, Aug. 27, 1986]

§ 1.537–3 Business of the corporation.

(a) The business of a corporation is not merely that which it has previously carried on but includes, in general, any line of business which it may undertake.

(b) If one corporation owns the stock of another corporation and, in effect, operates the other corporation, the business of the latter corporation may be considered in substance, although not in legal form, the business of the first corporation. However, investment by a corporation of its earnings and profits in stock and securities of another corporation is not, of itself, to be regarded as employment of the earnings and profits in its business. Earnings and profits of the first corporation put into the second corporation through the purchase of stock or securities or otherwise, may, if a subsidiary relationship is established, constitute employment of the earnings and profits in its own business. Thus, the business of one corporation may be regarded as including the business of another corporation if such other corporation is a mere instrumentality of the first corporation; that may be established by showing that the first corporation owns at least 80 percent of the voting stock of the second corporation. If the taxpayer's ownership of stock is less than 80 percent in the other corporation, the determination of whether the funds are employed in a business operated by the taxpayer will depend upon the particular circumstances of the case. Moreover, the business of one corporation does not include the business of another corporation if such other corporation is a personal holding company, an investment company, or a corporation not engaged in the active conduct of a trade or business.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

Personal Holding Companies

§ 1.541–1 Imposition of tax.

(a) Section 541 imposes a graduated tax upon corporations classified as personal holding companies under section 542. This tax, if applicable, is in addition to the tax imposed upon corporations generally under section 11. Unless specifically excepted under section 542(c) the tax applies to domestic and foreign corporations and, to the extent provided by section 542(b), to an affiliated group of corporations filing a consolidated return. Corporations classified as personal holding companies are exempt from the accumulated earnings tax imposed under section 531 but are not exempt from other income taxes imposed upon corporations, generally, under any other provisions of the Code. Unlike the accumulated earnings tax imposed under section 531, the personal holding company tax imposed by section 541 applies to all personal holding companies as defined in section 542, whether or not they were formed or availed of to avoid income tax upon shareholders. See section 6501(f) and § 301.6501(f)–1 of this chapter (Regulations on Procedure and Administration) with respect to the period of limitation on assessment of personal holding company tax upon failure to file a schedule of personal holding company income.

(b) A foreign corporation, whether resident or nonresident, which is classified as a personal holding company is subject to the tax imposed under section 541 with respect to its income from sources within the United States, even though such income is not fixed or determinable annual or periodical income specified in section 881. A foreign corporation is not classified as a personal holding company subject to tax under section 541 if it is a foreign personal holding company as defined in section 552 or if it meets the requirements of the exception provided in section 542(c)(10).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.542–1 General rule.

A personal holding company is any corporation (other than one specifically excepted under section 542(c)) which, for the taxable year, meets—

(a) The gross income requirement specified in section 542(a)(1) and § 1.542–2, and

(b) The stock ownership requirement specified in section 542(a)(2) and § 1.542–3.

Both requirements must be satisfied with respect to each taxable year.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.542–2 Gross income requirement.

To meet the gross income requirement it is necessary that at least 80 percent of the total gross income of the corporation for the taxable year be personal holding company income as defined in section 543 and §§ 1.543–1 and 1.543–2. For the definition of "gross income" see section 61 and §§ 1.61–1 through 1.61–14. Under such provisions gross income is not necessarily synonymous with gross receipts. Further, in the case of transactions in stocks and securities and in commodities transactions, gross income for personal holding company tax purposes shall include only the excess of gains over losses from such transactions. See section 543(b), paragraph (b)(5) and (6) of § 1.543–1 and § 1.543–2. For determining the character of the amount includible in gross income under section 951(a), see paragraph (a) of § 1.951–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6795, 30 FR 934, Jan. 29, 1965]

§ 1.542–3 Stock ownership requirement.

(a) *General rule.* To meet the stock ownership requirement, it is necessary that at some time during the last half of the taxable year more than 50 percent in value of the outstanding stock of the corporation be owned, directly or indirectly, by or for not more than 5 individuals. Any organization or trust to which subparagraph (1) of this paragraph applies shall be considered as one individual for purposes of this stock ownership requirement subject, however, to the exception in subparagraph (2) of this paragraph which is applicable only to taxable years beginning after December 31, 1954. Thus, if an organization or trust which is considered as an individual owns 51 percent in value of the outstanding stock of the corporation at any time during the last half of the taxable year, the stock ownership requirement will be met by ownership of the required percentage by one individual. See section 544 and §§ 1.544–1 through 1.544–7 for the determination of stock ownership.

(1) *An organization or trust considered as an individual.* Any of the following organizations or trusts shall be considered as an individual:

(i) An organization to which section 503 applies, namely, any organization described in sec-

tion 501(c)(3) (relating to charitable, etc., organizations) or section 401(a) (relating to employees' pension trust, etc.) other than an organization excepted from the application of section 503 by paragraphs (1) to (5) of section 503(b). Therefore, a religious organization (other than a trust) excepted under section 503(b)(1) is not considered an individual for purposes of the stock ownership requirement of section 542(a)(2).

(ii) A portion of a trust permanently set aside or to be used exclusively for the purposes described in section 642(c), relating to amounts set aside for charitable purposes, or described in a corresponding provision of the prior income tax law (such as section 162(a), Internal Revenue Code of 1939).

(2) **Exception.** For taxable years beginning after December 31, 1954, an organization or trust to which subparagraph (1) of this paragraph applies shall not be considered an individual if all of the following conditions are met:

(i) It was organized or created before July 1, 1950.

(ii) At all times on or after July 1, 1950, and before the close of the taxable year, it owned all of the common stock and at least 80 percent of the total number of shares of all other classes of stock of the corporation.

(iii) For the taxable year it is not denied exemption under section 504(a) or the unlimited charitable deduction under section 681(c). In determining whether, for the purpose of section 542(a)(2), exemption is not denied under section 504(a) or the unlimited charitable deduction is not denied under section 681(c) all the income of the corporation which is available for distribution as dividends to its shareholders shall be deemed to have been distributed at the close of the taxable year whether or not any portion of such income was in fact distributed. If the amounts described in section 504(a) or section 681(c), increased by the income of the corporation deemed distributed pursuant to the preceding sentence, would be sufficient to deny exemption or the unlimited charitable deduction, the organization or trust will be considered to be an individual for the purpose of section 542(a)(2). For the purpose of this subdivision the restrictions in sections 504(a)(1) and 681(c)(1) against unreasonable accumulations will not apply to income attributable to property of a decedent dying before January 1, 1951, which was transferred during his lifetime to a trust or property that was transferred under his will to such trust, and

(iv) This subparagraph is illustrated by the following example:

Example. The X Charitable Foundation (an organization described in section 501(c)(3) to which section 503 is applicable) has owned all of the stock of the Y Corporation since Y's organization in 1949. Both X and Y are calendar-year corporations. At the end of the year 1955, X has accumulated $100,000 out of income and has actually paid out only $75,000 of this amount, leaving a balance of $25,000 on December 31, 1955. X was not denied an exemption under section 504(a) for the year 1955. Y, during the calendar year 1955, has $400,000 taxable income of which $200,000 is available for distribution as dividends at the end of the year. X will be considered to have accumulated out of income during the calendar year 1955 the amount of $225,000 for the purpose of determining whether it would have been denied an exemption under section 504(a)(1). If X would have been denied an exemption under section 504(a)(1) by reason of having been deemed to have accumulated $225,000, the stock ownership requirement of section 542(a)(2) and this section will have been satisfied. If Y Corporation also satisfies the gross income requirement of section 542(a)(1) and § 1.542–2 it will be a personal holding company.

(b) **Changes in stock outstanding.** It is necessary to consider any change in the stock outstanding during the last half of the taxable year, whether in the number of shares or classes of stock, or in the ownership thereof. Stock subscribed and paid for will be considered as stock outstanding, whether or not such stock is evidenced by issued certificates. Treasury stock shall not be considered as stock outstanding.

(c) **Value of stock outstanding.** The value of the stock outstanding shall be determined in the light of all the circumstances. The value may be determined upon the basis of the company's net worth, earning and dividend paying capacity, appreciation of assets, together with such other factors as have a bearing upon the value of the stock. If the value of the stock is greatly at variance with that reflected by the corporate books, the evidence of such value should be filed with the return. In any case where there are two or more classes of stock outstanding, the total value of all the stock should be allocated among the different classes according to the relative value of each class.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6739, 29 FR 7713, June 17, 1964]

§ 1.542–4 Corporations filing consolidated returns.

(a) **General rule.** A consolidated return under section 1501 shall determine the application of the personal holding company tax to the group and to any member thereof on the basis of the consolidated gross income and consolidated personal holding company income of the group, as determined under the regulations prescribed pursuant to section

1502 (relating to consolidated returns); however, this rule shall not apply to either (1) an ineligible affiliated group as defined in section 542(b)(2) and paragraph (b) of this section, or (2) an affiliated group of corporations a member of which is excluded from the definition of a personal holding company under section 542(c) and paragraph (c) of this section. Thus, in the latter two instances the gross income requirement provided in section 542(a)(1) and § 1.542–2 shall apply to each individual member of the affiliated group of corporations.

(b) Ineligible affiliated group. (1) Except for certain affiliated railroad corporations, as provided in subparagraph (2) of this paragraph, an affiliated group of corporations is an ineligible affiliated group and therefore may not use its consolidated gross income and consolidated personal holding company income to determine the liability of the group or any member thereof for personal holding company tax (as provided in paragraph (a) of this section), if (i) any member of such group, including the common parent, derived gross income from sources outside the affiliated group for the taxable year in an amount equal to 10 percent or more of its gross income from all sources for that year and (ii) 80 percent or more of the gross income from sources outside the affiliated group consists of personal holding company income as defined in section 543 and §§ 1.543–1 and 1.543–2. For purposes of subdivision (i) of this subparagraph gross income shall not include certain dividend income received by a common parent from a corporation not a member of the affiliated group which qualifies under section 542(b)(4) and paragraph (d) of this section. See particularly the examples contained in paragraph (d)(2) of this section. Intercorporate dividends received by members of the affiliated group (including the common parent) are to be included in the gross income from all sources for purposes of the test in subdivision (i) of this subparagraph. For purposes of subdivision (ii) of this subparagraph, section 543 and paragraph (a) of § 1.543–1 shall be applied as if the amount of gross income derived from sources outside the affiliated group by a corporation which is a member of such group is the gross income of such corporation.

(2) An affiliated group of railroad corporations shall not be considered to be an ineligible affiliated group, notwithstanding any other provisions of section 542(b)(2) and this paragraph, if the common parent of such group would be eligible to file a consolidated return under section 141 of the Internal Revenue Code of 1939 prior to its amendment by the Revenue Act of 1942 (56 Stat. 798).

(3) See section 562(d) and § 1.562–3 for dividends paid deduction in the case of a distribution by a member of an ineligible affiliated group.

(4) The determination of whether an affiliated group of corporations is an ineligible group under section 542(b)(2) and this paragraph, may be illustrated by the following examples:

Example (1). Corporations X, Y, and Z constitute an affiliated group of corporations which files a consolidated return for the calendar year 1954; Corporations Y and Z are wholly-owned subsidiaries of Corporation X and derive no gross income from sources outside the affiliated group; Corporation X, the common parent, has gross income in the amount of $250,000 for the taxable year 1954. $200,000 of such gross income consists of dividends received from Corporations Y and Z. The remaining $50,000 was derived from sources outside the affiliated group, $40,000 of which represents personal holding company income as defined in section 543. The $50,000 included in the gross income of Corporation X and derived from sources outside the affiliated group is more than 10 percent of X's gross income ($50,000/$250,000) and the $40,000 which represents personal holding company income is 80 percent of $50,000 (the amount considered to be the gross income of Corporation X). Accordingly, Corporations X, Y, and Z would be an ineligible affiliated group and the gross income requirement under section 542(a)(1) and § 1.542–2 would be applied to each corporation individually.

Example (2). If, in the above example, only $30,000 of the $50,000 derived from sources outside the affiliated group by Corporation X represented personal holding company income, this group of affiliated corporations would not be an ineligible affiliated group. Although the $50,000 representing the gross income of Corporation X from sources outside the affiliated group is more than 10 percent of its total gross income, the amount of $30,000 representing personal holding company income is not 80 percent or more of the amount considered to be gross income for the purpose of this test. Under section 542(b)(2) and subparagraph (1) of this paragraph both the gross income and the personal holding company income requirements must be satisfied in determining that an affiliated group constitutes an ineligible group. Since both of these requirements have not been satisfied in this example this group of affiliated corporations would not be an ineligible group.

(c) Excluded corporations. The general rule for determining liability of an affiliated group under paragraph (a) of this section shall not apply if any member thereof is a corporation which is excluded, under section 542(c), from the definition of a personal holding company.

(d) Certain dividend income received by a common parent. (1) Dividends received by the common parent of an affiliated group from a corporation which is not a member of the affiliated group shall not be included in gross income or personal holding company income, for the purpose of the test under section 542(b)(2)—

(i) If such common parent owned, directly or indirectly, more than 50 percent of the outstanding voting stock of the dividend paying corporation at

the time such common parent became entitled to the dividend, and

(ii) If the dividend paying corporation is not a personal holding company for the taxable year in which the dividends are paid.

Thus, if the tests in subdivisions (i) and (ii) of this subparagraph are met, the dividend income received by the common parent from such other corporation will not be considered gross income for purposes of the test in section 542(b)(2)(A) (paragraph (b) of this section), that is, either to determine gross income from sources outside the affiliated group or to determine gross income from all sources.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). Corporation X is the common parent of Corporation Y and Corporation Z and together they constitute an affiliated group which files a consolidated return under section 1501. Corporation Y and Corporation Z derived no income from sources outside the affiliated group. Corporation X, the common parent, had gross income of $100,000 for the calendar year 1954 of which amount $20,000 represented a dividend received from Corporation W, and $4,000 represented interest from Corporation T. The remaining gross income of X, $76,000, was received from Corporations Y and Z. Corporation X, for its entire taxable year, owned 60 percent of the voting stock of Corporation W which was not a personal holding company for the calendar year 1954. For the purpose of the gross income and personal holding company income test under section 542(b)(2) and paragraph (b) of this section, the $20,000 dividend received from Corporation W would not be included in the gross income or personal holding company income of Corporation X. The affiliated group would not be an ineligible group under section 542(b)(2) because 10 percent or more of its gross income was not from sources outside the affiliated group as required by section 542(b)(2)(A). Inasmuch as the $20,000 dividend from Corporation W is not included in the gross income of Corporation X for purposes of section 542(b)(2) Corporation X only has $4,000 gross income from sources outside the affiliated group which is only 5 percent of its gross income from all sources, $80,000.

Example (2). If, in example (1), Corporation X owned 50 percent or less of the voting stock of Corporation W at the time X became entitled to the dividend, or if Corporation W had been a personal holding company for the taxable year in which the dividends were paid, the $20,000 dividends received by Corporation X would be included in gross income and personal holding company income of Corporation X for the purpose of the test under section 542(b)(2) and paragraph (b) of this section. Thus, the affiliated group would be an ineligible affiliated group under section 542(b)(2) because 24 percent of its gross income was from sources outside the affiliated group ($24,000/$100,000) and 100 percent of this $24,000 was personal holding company income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.543–1 Personal holding company income.

(a) General rule. The term "personal holding company income" means the portion of the gross income which consists of the classes of gross income described in paragraph (b) of this section. See section 543(b) and § 1.543–2 for special limitations on gross income and personal holding company income in cases of gains from stocks', securities', and commodities' transactions.

(b) Definitions—(1) Dividends. The term "dividends" includes dividends as defined in section 316 and amounts required to be included in gross income under section 551 and §§ 1.551–1—1.551–2 (relating to foreign personal holding company income taxed to United States shareholders).

(2) Interest. The term "interest" means any amounts, includible in gross income, received for the use of money loaned. However, (i) interest which constitutes "rent" shall not be classified as interest but shall be classified as "rents" (see subparagraph (10) of this paragraph) and (ii) interest on amounts set aside in a reserve fund under section 511 or 607 of the Merchant Marine Act, 1936 (46 U.S.C. 1161 or 1177), shall not be included in personal holding company income.

(3) Royalties (other than mineral, oil, or gas royalties or certain copyright royalties). The term "royalties" (other than mineral, oil, or gas royalties or certain copyright royalties) includes amounts received for the privilege of using patents, copyrights, secret processes and formulas, good will, trade marks, trade brands, franchises, and other like property. It does not, however, include rents. For rules relating to rents see section 543(a)(7) and subparagraph (10) of this paragraph. For rules relating to mineral, oil, or gas royalties, see section 543(a)(8) and subparagraph (11) of this paragraph. For rules relating to certain copyright royalties for taxable years beginning after December 31, 1959, see section 543(a)(9) and subparagraph (12) of this paragraph.

(4) Annuities. The term "annuities" includes annuities only to the extent includible in the computation of gross income. See section 72 and §§ 1.72–1—1.72–14 for rules relating to the inclusion of annuities in gross income.

(5) Gains from the sale or exchange of stock or securities. (i) Except in the case of regular dealers in stock or securities as provided in subdivision (ii) of this subparagraph, gross income and personal holding company income include the amount by which the gains exceed the losses from the sale or exchange of stock or securities. See section 543(b)(1) and § 1.543–2 for provisions relating to this limitation. For this purpose, there shall be taken into account all those gains includible in

gross income (including gains from liquidating dividends and other distributions from capital) and all those losses deductible from gross income which are considered under chapter 1 of the Code to be gains or losses from the sale or exchange of stock or securities. The term "stock or securities" as used in section 543(a)(2) and this subparagraph includes shares or certificates of stock, stock rights or warrants, or interest in any corporation (including any joint stock company, insurance company, association, or other organization classified as a corporation by the Code), certificates of interest or participation in any profit-sharing agreement, or in any oil, gas, or other mineral property, or lease, collateral trust certificates, voting trust certificates, bonds, debentures, certificates of indebtedness, notes, car trust certificates, bills of exchange, obligations issued by or on behalf of a State, Territory, or political subdivision thereof.

(ii) In the case of "regular dealers in stock or securities" there shall not be included gains or losses derived from the sale or exchange of stock or securities made in the normal course of business. The term "regular dealer in stock or securities" means a corporation with an established place of business regularly engaged in the purchase of stock or securities and their resale to customers. However, such corporations shall not be considered as regular dealers with respect to stock or securities which are held for investment. See section 1236 and § 1.1236–1.

(6) Gains from futures transactions in commodities. Gross income and personal holding company income include the amount by which the gains exceed the losses from futures transactions in any commodity on or subject to the rules of a board of trade or commodity exchange. See § 1.543–2 for provisions relating to this limitation. In general, for the purpose of determining such excess, there are included all gains and losses on futures contracts which are speculative. However, for the purpose of determining such excess, there shall not be included gains or losses from cash transactions, or gains or losses by a producer, processor, merchant, or handler of the commodity, which arise out of bona fide hedging transactions reasonably necessary to the conduct of its business in the manner in which such business is customarily and usually conducted by others. See section 1233 and § 1.1233–1.

(7) Estates and trusts. Under section 543(a)(4) personal holding company income includes amounts includible in computing the taxable income of the corporation under part I, subchapter J, chapter 1 of the Code (relating to estates, trusts, and beneficiaries); and any gain derived by the corporation from the sale or other disposition of any interest in an estate or trust.

(8) Personal service contracts. (i) Under section 543(a)(5) amounts received under a contract under which the corporation is to furnish personal services, as well as amounts received from the sale or other disposition of such contract, shall be included as personal holding company income if—

(a) Some person other than the corporation has the right to designate (by name or by description) the individual who is to perform the services, or if the individual who is to perform the services is designated (by name or by description) in the contract; and

(b) At any time during the taxable year 25 percent or more in value of the outstanding stock of the corporation is owned, directly or indirectly, by or for the individual who has performed, is to perform, or may be designated (by name or by description) as the one to perform, such services. For this purpose, the amount of stock outstanding and its value shall be determined in accordance with the rules set forth in the last two sentences of paragraph (b) and in paragraph (c) of § 1.542–3. It should be noted that the stock ownership requirement of section 543(a)(5) and this subparagraph relates to the stock ownership at any time during the taxable year. For rules relating to the determination of stock ownership, see section 544 and §§ 1.544–1 through 1.544–7.

(ii) If the contract, in addition to requiring the performance of services by a 25-percent stockholder who is designated or who could be designated (as specified in section 543(a)(5) and subdivision (i) of this subparagraph), requires the performance of services by other persons which are important and essential, then only that portion of the amount received under such contract which is attributable to the personal services of the 25-percent stockholder shall constitute personal holding company income. Incidental personal services of other persons employed by the corporation to facilitate the performance of the services by the 25-percent stockholder, however, shall not constitute important or essential services. Under section 482 gross income, deductions, credits, or allowances between or among organizations, trades, or businesses may be allocated if it is determined that allocation is necessary in order to prevent evasion of taxes or clearly to reflect the income of any such organizations, trades, or businesses.

(iii) The application of section 543(a)(5) and this subparagraph may be illustrated by the following examples:

Example (1). A, whose profession is that of an actor, owns all of the outstanding capital stock of the M Corporation. The M Corporation entered into a contract with A under which A was to perform personal services for the person or persons whom the M Corporation might designate, in consideration of which A was to receive $10,000 a year from the M Corporation. The M Corporation entered into a contract with the O Corporation in which A was designated to perform personal services for the O Corporation in consideration of which the O Corporation was to pay the M Corporation $500,000 a year. The $500,000 received by the M Corporation from the O Corporation constitutes personal holding company income.

Example (2). Assume the same facts as in example (1), except that, in addition to A's contract with the M Corporation, B, whose profession is that of a dancer and C, whose profession is that of a singer, were also under contract to the M Corporation to perform personal services for the person or persons whom the M Corporation might designate, in consideration of which they were each to receive $25,000 a year from the M Corporation. Neither B nor C were stockholders of the M Corporation. The contract entered into by the M Corporation with the O Corporation, in addition to designating that A was to perform personal services for the O Corporation, designated that B and C were also to perform personal services for the O Corporation. Although the O Corporation particularly desired the services of A for an entertainment program it planned, it also desired the services of B and C, who were prominent in their fields, to provide a good supporting cast for the program. The services of B and C required under the contract are determined to be important and essential; therefore, only that portion of the $500,000 received by the M Corporation which is attributable to the personal services of A constitutes personal holding company income. The same result would obtain although the dancer and the singer required by the contract were not designated by name but the contract gave the M Corporation discretion to select and provide the services of a singer and a dancer for the program and such services were provided.

Example (3). The N Corporation is engaged in engineering. Its entire outstanding capital stock is owned by four individuals. The N Corporation entered into a contract with the R Corporation to perform engineering services in consideration of which the R Corporation was to pay the N Corporation $50,000. The individual who was to perform the services was not designated (by name or by description) in the contract and no one but the N Corporation had the right to designate (by name or by description) such individual. The $50,000 received by the N Corporation from the R Corporation does not constitute personal holding company income.

(9) Compensation for use of property. Under section 543(a)(6) amounts received as compensation for the use of, or right to use, property of the corporation shall be included as personal holding company income if, at any time during the taxable year, 25 percent or more in value of the outstanding stock of the corporation is owned, directly or indirectly, by or for an individual entitled to the use of the property. Thus, if a shareholder who meets the stock ownership requirement of section 543(a)(6) and this subparagraph uses, or has the right to use, a yacht, residence, or other property owned by the corporation, the compensation to the corporation for such use, or right to use, the property constitutes personal holding company income. This is true even though the shareholder may acquire the use of, or the right to use, the property by means of a sublease or under any other arrangement involving parties other than the corporation and the shareholder. However, if the personal holding company income of the corporation (after excluding any such income described in section 543(a)(6) and this subparagraph, relating to compensation for use of property, and after excluding any such income described in section 543(a)(7) and subparagraph (10) of this paragraph, relating to rents) is not more than 10 percent of its gross income, compensation for the use of property shall not constitute personal holding company income. For purposes of the preceding sentence, in determining whether personal holding company income is more than 10 percent of gross income, copyright royalties constitute personal holding company income, regardless of whether such copyright royalties are excluded from personal holding company income under section 543(a)(9) and subparagraph (12)(ii) of this paragraph. For purposes of applying section 543(a)(6) and this subparagraph, the amount of stock outstanding and its value shall be determined in accordance with the rules set forth in the last two sentences of paragraph (b) and in paragraph (c) of § 1.542–3. It should be noted that the stock ownership requirement of section 543(a)(6) and this subparagraph relates to the stock outstanding at any time during the entire taxable year. For rules relating to the determination of stock ownership, see section 544 and §§ 1.544–1 through 1.544–7.

(10) Rents (including interest constituting rents). Rents which are to be included as personal holding company income consist of compensation (however designated) for the use, or right to use, property of the corporation. The term "rents" does not include amounts includible in personal holding company income under section 543(a)(6) and subparagraph (9) of this paragraph. The amounts considered as rents include charter fees, etc., for the use of, or the right to use, property, as well as interest on debts owed to the corporation (to the extent such debts represent the price for which real property held primarily for sale to customers in the ordinary course of the corporation's trade or business was sold or exchanged by the corporation). However, if the amount of the rents includible under section 543(a)(7) and this subparagraph constitutes 50 percent or more of the gross income of the corporation, such rents shall

not be considered to be personal holding company income.

(11) Mineral, oil, or gas royalties. (i) The income from mineral, oil, or gas royalties is to be included as personal holding company income, unless (a) the aggregate amount of such royalties constitutes 50 percent or more of the gross income of the corporation for the taxable year and (b) the aggregate amount of deductions allowable under section 162 (other than compensation for personal services rendered by the shareholders of the corporation) equals 15 percent or more of the gross income of the corporation for the taxable year.

(ii) The term "mineral, oil, or gas royalties" means all royalties, including overriding royalties and, to the extent not treated as loans under section 636, mineral production payments, received from any interest in mineral, oil, or gas properties. The term "mineral" includes those minerals which are included within the meaning of the term "minerals" in the regulations under section 611.

(iii) The first sentence of subdivision (ii) of this subparagraph shall apply to overriding royalties received from the sublessee by the operating company which originally leased and developed the natural resource property in respect of which such overriding royalties are paid, and to mineral, oil, or gas production payments, only with respect to amounts received after September 30, 1958.

(12) Copyright royalties—(i) In general. The income from copyright royalties constitutes, generally, personal holding company income. However, for taxable years beginning after December 31, 1959, those copyright royalties which come within the definition of "copyright royalties" in section 543(a)(9) and subdivision (iv) of this subparagraph shall be excluded from personal holding company income only if the conditions set forth in subdivision (ii) of this subparagraph are satisfied.

(ii) Exclusion from personal holding company income. For taxable years beginning after December 31, 1959, copyright royalties (as defined in section 543(a)(9) and subdivision (iv) of this subparagraph) shall be excluded from personal holding company income only if the conditions set forth in (a), (b), and (c) of this subdivision are met.

(a) Such copyright royalties for the taxable year must constitute 50 percent or more of the corporation's gross income. For this purpose, copyright royalties shall be computed by excluding royalties received for the use of, or the right to use, copyrights or interests in copyrights in works created, in whole or in part, by any person who, at any time during the corporation's taxable year, is a shareholder.

(b) Personal holding company income for the taxable year must be 10 percent or less of the corporation's gross income. For this purpose, personal holding company income shall be computed by excluding (1) copyright royalties (except that there shall be included royalties received for the use of, or the right to use, copyrights or interests in copyrights in works created, in whole or in part, by any shareholder owning, at any time during the corporation's taxable year, more than 10 percent in value of the outstanding stock of the corporation), and (2) dividends from any corporation in which the taxpayer owns, on the date the taxpayer becomes entitled to the dividends, at least 50 percent of all classes of stock entitled to vote and at least 50 percent of the total value of all classes of stock, provided the corporation which pays the dividends meets the requirements of subparagraphs (A), (B), and (C) of section 543(a)(9).

(c) The aggregate amount of the deductions allowable under section 162 must constitute 50 percent or more of the corporation's gross income for the taxable year. For this purpose, the deductions allowable under section 162 shall be computed by excluding deductions for compensation for personal services rendered by, and deductions for copyright and other royalties to, shareholders of the corporation.

(iii) Determination of stock value and stock ownership. For purposes of section 543(a)(9) and this subparagraph, the following rules shall apply:

(a) The amount and value of the outstanding stock of a corporation shall be determined in accordance with the rules set forth in the last two sentences of paragraph (b) and in paragraph (c) of § 1.542–3.

(b) The ownership of stock shall be determined in accordance with the rules set forth in section 544 and §§ 1.544–1 through 1.544–7.

(c) Any person who is considered to own stock within the meaning of section 544 and §§ 1.544–1 through 1.544–7 shall be a shareholder.

(iv) Copyright royalties defined. For purposes of section 543(a)(9) and this subparagraph, the term "copyright royalties" means compensation, however designated, for the use of, or the right to use, copyrights in works protected by copyright issued under Title 17 of the United States Code (other than by reason of section 2 or 6 thereof),

and to which copyright protection is also extended by the laws of any foreign country as a result of any international treaty, convention, or agreement to which the United States is a signatory. Thus, "copyright royalties" includes not only royalties from sources within the United States under protection of United States laws relating to statutory copyrights but also royalties from sources within a foreign country with respect to United States statutory copyrights protected in such foreign country by any international treaty, convention, or agreement to which the United States is a signatory. The term "copyright royalties" includes compensation for the use of, or right to use, an interest in any such copyrighted works as well as payments from any person for performing rights in any such copyrighted works.

(v) **Compensation which is rent.** Section 543(a)(9) and subdivisions (i) through (iv) of this subparagraph shall not apply to compensation which is "rent" within the meaning of the second sentence of section 543(a)(7).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6739, 29 FR 7713, June 17, 1964; T.D. 7261, 38 FR 5467, March 1, 1973]

§ 1.543–2 Limitation on gross income and personal holding company income in transactions involving stocks, securities and commodities.

(a) Under section 543(b)(1) the gains which are to be included in gross income, and in personal holding company income with respect to transactions described in section 543(a)(2) and paragraph (b)(5) of § 1.543–1, shall be the net gains from the sale or exchange of stock or securities. If there is an excess of losses over gains from such transactions, such excess (or net loss) shall not be used to reduce gross income or personal holding company income for purposes of the personal holding company tax. Similarly, under section 543(b)(2) the gains which are to be included in gross income, and in personal holding company income with respect to transactions described in section 543(a)(3) and paragraph (b)(6) of § 1.543–1, shall be the net gains from commodity transactions which reflect personal holding company income. Any excess of losses over gains from such transactions (resulting in a net loss) shall not be used to reduce gross income or personal holding company income. The capital loss carryover under section 1212 shall not be taken into account.

(b) The application of section 543(b) may be illustrated by the following examples:

Example (1). The P Corporation, not a regular dealer in stocks and securities, received rentals of $250,000 for its property from a 25-percent shareholder, and also had gains of $50,000 during the taxable year from the sale of stocks and securities. It also had losses on the sale of stocks and securities in the amount of $30,000. Accordingly, P Corporation had gross income during the taxable year of $270,000 ($250,000 plus $20,000 net gain from the sales of stocks and securities). It had personal holding company income of $20,000. (The rentals of $250,000 would not be personal holding company income under section 543(a)(6) since the personal holding company income of the corporation, $20,000 (after excluding any such income described in section 543(a)(6)), is not more than 10 percent of its gross income.)

Example (2). The R Corporation, not a regular dealer in stocks or securities, realized total gains during the taxable year of $900,000 from commodity futures transactions and $200,000 from the sales of stocks and securities. It also sustained total losses of $1,000,000 on such commodity futures transactions, resulting in a net gain for the taxable year of $100,000. None of the commodity futures transactions are hedging or other types of futures transactions excluded from the application of section 543(a)(3). No part of the loss on commodity futures transactions is to be taken into account in determining personal holding company income and gross income for personal holding company tax purposes for the taxable year. The full amount of the $200,000 in gains from the sales of stocks and securities is to be included in personal holding company income and in gross income for personal holding company tax purposes for the taxable year.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.544–1 Constructive ownership.

(a) Rules relating to the constructive ownership of stock are provided by section 544 for the purpose of determining whether the stock ownership requirements of the following sections are satisfied:

(1) Section 542(a)(2), relating to ownership of stock by five or fewer individuals.

(2) Section 543(a)(5), relating to personal holding company income derived from personal service contracts.

(3) Section 543(a)(6), relating to personal holding company income derived from property used by shareholders.

(4) Section 543(a)(9), relating to personal holding company income derived from copyright royalties.

(b) Section 544 provides four general rules with respect to constructive ownership. These rules are:

(1) Constructive ownership by reason of indirect ownership. See section 544(a)(1) and § 1.544–2.

(2) Constructive ownership by reason of family and partnership ownership. See section 544(a)(2), (4), (5), and (6), and §§ 1.544–3, 1.544–6, and 1.544–7.

(3) Constructive ownership by reason of ownership of options. See section 544(a)(3), (4), (5), and (6), and §§ 1.544–4, 1.544–6, and 1.544–7.

(4) Constructive ownership by reason of ownership of convertible securities. See section 544(b) and § 1.544–5.

Each of the rules referred to in subparagraphs (2), (3), and (4) of this paragraph is applicable only if it has the effect of satisfying the stock ownership requirement of the section to which applicable; that is, when applied to section 542(a)(2), its effect is to make the corporation a personal holding company, or when applied to section 543(a)(5), section 543(a)(6), or section 543(a)(9), its effect is to make the amounts described in such provisions includible as personal holding company income.

(c) All forms and classes of stock, however denominated, which represent the interests of shareholders, members, or beneficiaries in the corporation shall be taken into consideration in applying the constructive ownership rules of section 544.

(d) For rules applicable in treating constructive ownership, determined by one application of section 544, as actual ownership for purposes of a second application of section 544, see section 544(a)(5) and § 1.544–6.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6739, 29 FR 7715, June 17, 1964]

§ 1.544–2 Constructive ownership by reason of indirect ownership.

The following example illustrates the application of section 544(a)(1), relating to constructive ownership by reason of indirect ownership:

Example. A and B, two individuals are the exclusive and equal beneficiaries of a trust or estate which owns the entire capital stock of the M Corporation. The M Corporation in turn owns the entire capital stock of the N Corporation. Under such circumstances the entire capital stock of both the M Corporation and the N Corporation shall be considered as being owned equally by A and B as the individuals owning the beneficial interest therein.

§ 1.544–3 Constructive ownership by reason of family and partnership ownership.

(a) The following example illustrates the application of section 544(a)(2), relating to constructive ownership by reason of family and partnership ownership.

Example. The M Corporation at some time during the last half of the taxable year, had 1,800 shares of outstanding stock, 450 of which were held by various individuals having no relationship to one another and none of whom were partners, and the remaining 1,350 were held by 51 shareholders as follows:

Relationships	Shares	Shares	Shares	Shares	Shares
An individual	(A)100	(B)20	(C)20	(D)20	(E)20
His father	(AF)10	(BF)10	(CF)10	(DF)10	(EF)10
His wife	(AW)10	(BW)40	(CW)40	(DW)40	(EW)40
His brother	(AB)10	(BB)10	(CB)10	(DB)10	(EB)10
His son	(AS)10	(BS)40	(CS)40	(DS)40	(ES)40
His daughter by former marriage (son's half-sister)	(ASHS)10	(BSHS)40	(CSHS)40	(DSHS)40	(ESHS)40
His brother's wife	(ABW)10	(BBW)10	(CBW)10	(DBW)160	(EBW)10
His wife's father	(AWF)10	(BWF)10	(CWF)110	(DWF)10	(EWF)10
His wife's brother	(AWB)10	(BWB)10	(CWB)10	(DWB)10	(EWB)10
His wife's brother's wife	(AWBW)10	(BWBW)10	(CWBW)10	(DWBW)10	(EWBW)110
Individual's partner	(AP)10	....	....	....	....

By applying the statutory rule provided in section 544(a)(2) five individuals own more than 50 percent of the outstanding stock as follows:

A (including AF, AW, AB, AS, ASHS, AP)	160
B (including BF, BW, BB, BS, BSHS)	160
CW (including C, CS, CWF, CWB)	220
DB (including D, DF, DBW)	200
EWB (including EW, EWF, EWBW)	170
Total, or more than 50 percent	910

Individual A represents the obvious case where the head of the family owns the bulk of the family stock and naturally is the head of the group. A's partner owns 10 shares of the stock. Individual B represents the case where he is still head of the group because of the ownership of stock by his immediate family. Individuals C and D represent cases where the individuals fall in groups headed in C's case by his wife and in D's case by his brother because of the preponderance of holdings on the part of relatives by marriage. Individual E represents the case where the preponderant holdings of others eliminate that individual from the group.

(b) For the restriction on the applicability of the family and partnership ownership rules of this section, see paragraph (b) of § 1.544–1. For rules relating to constructive ownership as actual ownership, see § 1.544–6.

§ 1.544–4 Options.

The shares of stock which may be acquired by reason of an option shall be considered to be constructively owned by the individual having the

option to acquire such stock. For example: If C, an individual, on March 1, 1955, purchases an option, or otherwise comes into possession of an option, to acquire 100 shares of the capital stock of M Corporation, such 100 shares of stock shall be considered to be constructively owned by C as if C had actually acquired the stock on that date. If C has an option on an option (or one of a series of options) to acquire such stock, he shall also be considered to have constructive ownership of the stock which may be acquired by reason of the option (or the series of options). Under such circumstances, C shall be considered to have acquired constructive ownership of the stock on the date he acquired his option. For the restriction on the applicability of the rule of this section, see paragraph (b) of § 1.544–1.

§ 1.544–5 Convertible securities.

Under section 544(b) outstanding securities of a corporation such as bonds, debentures, or other corporate obligations, convertible into stock of the corporation (whether or not convertible during the taxable year) shall be considered as outstanding stock of the corporation. The consideration of convertible securities as outstanding stock is subject to the exception that, if some of the outstanding securities are convertible only after a later date than in the case of others, the class having the earlier conversion date may be considered as outstanding stock although the others are not so considered, but no convertible securities shall be considered as outstanding stock unless all outstanding securities having a prior conversion date are also so considered. For example, if outstanding securities are convertible in 1954, 1955 and 1956, those convertible in 1954 can be properly considered as outstanding stock without so considering those convertible in 1955 or 1956, and those convertible in 1954 and 1955 can be properly considered as outstanding stock without so considering those convertible in 1956. However, the securities convertible in 1955 could not be properly considered as outstanding stock without so considering those convertible in 1954 and the securities convertible in 1956 could not be properly considered as outstanding stock without so considering those convertible in 1954 and 1955. For the restriction on the applicability of the rule of this section, see paragraph (b) of § 1.544–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.544–6 Constructive ownership as actual ownership.

(a) General rules. (1) Stock constructively owned by a person by reason of the application of the rule provided in section 544(a)(1), relating to stock not owned by an individual, shall be considered as actually owned by such person for the purpose of again applying such rule or of applying the family and partnership rule provided in section 544(a)(2), in order to make another person the constructive owner of such stock, and

(2) Stock constructively owned by a person by reason of the application of the option rule provided in section 544(a)(3) shall be considered as actually owned by such person for the purpose of applying either the rule provided in section 544(a)(1), relating to stock not owned by an individual, or the family and partnership rule provided in section 544(a)(2) in order to make another person the constructive owner of such stock, but

(3) Stock constructively owned by an individual by reason of the application of the family and partnership rule provided in section 544(a)(2) shall not be considered as actually owned by such individual for the purpose of again applying such rule in order to make another individual the constructive owner of such stock.

(b) Examples. The application of this section may be illustrated by the following examples:

Example (1). A's wife, AW, owns all the stock of the M Corporation, which in turn owns all the stock of the O Corporation. The O Corporation in turn owns all the stock of the P Corporation. Under the rule provided in section 544(a)(1), relating to stock not owned by an individual, the stock in the P Corporation owned by the O Corporation is considered to be owned constructively by the M Corporation, the sole shareholder of the O Corporation. Such constructive ownership of the stock of the M Corporation is considered as actual ownership for the purpose of again applying such rule in order to make AW, the sole shareholder of the M Corporation, the constructive owner of the stock of the P Corporation. Similarly, the constructive ownership of the stock by AW is considered as actual ownership for the purpose of applying the family and partnership rule provided in section 544(a)(2) in order to make A the constructive owner of the stock of the P Corporation, if such application is necessary for any of the purposes set forth in paragraph (b) of § 1.544–1. But the stock thus constructively owned by A may not be considered as actual ownership for the purpose of again applying the family and partnership rule in order to make another member of A's family, for example, A's father, the constructive owner of the stock of the P Corporation.

Example (2). B, an individual, owns all the stock of the R Corporation which has an option to acquire all the stock of the S Corporation, owned by C, an individual, who is not related to B. Under the option rule provided in section 544(a)(3) the R Corporation may be considered as owning constructively the stock of the S Corporation owned by C. Such constructive ownership of the stock by the R Corporation is considered as actual ownership for the purpose of applying the rule provided in section 544(a)(1), relating to stock not owned by an individual, in order to make B, the sole shareholder of the R Corporation, the constructive owner of the stock of the S Corporation. The stock thus constructively owned by B by reason of the

application of the rule provided in section 544(a)(1) likewise is considered as actual ownership for the purpose, if necessary, of applying the family and partnership rule provided in section 544(a)(2), in order to make another member of B's family, for example, B's wife, BW, the constructive owner of the stock of the S Corporation. However, the family and partnership rule could not again be applied so as to make still another individual the constructive owner of the stock of the S Corporation, that is, the stock constructively owned by BW could not be considered as actually owned by her in order to make BW's father the constructive owner of such stock by a second application of the family and partnership rule.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.544–7 Option rule in lieu of family and partnership rule.

(a) If, in determining the ownership of stock, such stock may be considered as constructively owned by an individual by an application of either the family and partnership rule (section 544(a)(2)) or the option rule (section 544(a)(3)), such stock shall be considered as owned constructively by the individual by reason of the application of the option rule.

(b) The application of this section may be illustrated by the following example:

Example. Two brothers, A and B, each own 10 percent of the stock of the M Corporation, and A's wife, AW, also owns 10 percent of the stock of such corporation. AW's husband, A, has an option to acquire the stock owned by her at any time. It becomes necessary, for one of the purposes stated in section 544(a)(4), to determine the stock ownership of B in the M Corporation. If the family and partnership rule were the only rule that applied in the case, B would be considered, under that rule, as owning 20 percent of the stock of the M Corporation, namely, his own stock plus the stock owned by his brother. In that event, B could not be considered as owning the stock held by AW since (1) AW is not a member of B's family and (2) the constructive ownership of such stock by A through the application of the family and partnership rule in his case is not considered as actual ownership so as to make B the constructive owner by a second application of the same rule with respect to the ownership of the stock. However, there is more than the family and partnership rule involved in this example. As the holder of an option upon the stock, A may be considered the constructive owner of his wife's stock by the application of the option rule and without reference to the family relationship between A and AW. If A is considered as owning the stock of his wife by application of the option rule, then such constructive ownership by A is regarded as actual ownership for the purpose of applying the family and partnership rule so as to make another member of A's family, for example, B, the constructive owner of the stock. Hence, since A may be considered as owning his wife's stock by applying either the family-partnership rule or the option rule, the provisions of section 544(a)(6) apply and accordingly A must be considered the constructive owner of his wife's stock under the option rule rather than the family-partnership rule. B thus becomes the constructive owner of 30 percent of the stock of the M corporation, namely, his own 10 percent, A's 10 percent, and AW's 10 percent constructively owned by A as the holder of an option on the stock.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.545–1 Definition.

(a) Undistributed personal holding company income is the amount which is subject to the personal holding company tax imposed under section 541. Undistributed personal holding company income is the taxable income of the corporation adjusted in the manner described in section 545(b) and § 1.545–2, and section 545(c) and § 1.545–3, less the deduction for dividends paid. See part IV (section 561 and following), subchapter G, chapter 1 of the Code, and the regulations thereunder, relating to the dividends paid deduction.

(b) For purposes of the imposition of the personal holding company tax on a foreign corporation, resident or nonresident, which files or causes to be filed a return, the undistributed personal holding company income shall be computed on the basis of the taxable income from sources within the United States, and such income shall be adjusted in accordance with the principles of section 545(b) and § 1.545–2, and section 545(c) and § 1.545–3. For purposes of the imposition of such tax on a foreign corporation, resident or nonresident, which files no return, the undistributed personal holding company income shall be computed on the basis of the gross income from sources within the United States without allowance of any deductions. For purposes of this paragraph, a nonresident foreign corporation will be considered to have filed a return for any taxable year ending before September 9, 1958, if the return for any such taxable year is filed on or before February 5, 1960.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6949, 33 FR 5525, Apr. 9, 1968]

§ 1.545–2 Adjustments to taxable income.

(a) Taxes—(1) General rule. (i) In computing undistributed personal holding company income for any taxable year, there shall be allowed as a deduction the amount by which Federal income and excess profits taxes accrued during the taxable year exceed the credit provided by section 33 (relating to taxes of foreign countries and possessions of the United States), and the income, war profits, and excess profits taxes of foreign countries and possessions of the United States accrued during the taxable year (to the extent provided by subparagraph (3) of this paragraph), except that no deduction shall be allowed for (a) the accumulated earnings tax imposed by section 531 (or a corresponding section of a prior law), (b) the personal holding company tax imposed by section

541 (or a corresponding section of a prior law), and (c) the excess profits tax imposed by subchapter E, chapter 2 of the Internal Revenue Code of 1939, for taxable years beginning after December 31, 1940. The deduction is for taxes for the taxable year, determined under the accrual method of accounting, regardless of whether the corporation uses an accrual method of accounting, the cash receipts and disbursement method, or any other allowable method of accounting. In computing the amount of taxes accrued, an unpaid tax which is being contested is not considered accrued until the contest is resolved.

(ii) However, the taxpayer shall deduct taxes paid, rather than taxes accrued, if it used that method with respect to Federal taxes for each taxable year for which it was subject to the tax imposed by section 500 of the Internal Revenue Code of 1939, unless an election is made under subparagraph (2) of this paragraph to deduct taxes accrued.

(2) Election by taxpayer which deducted taxes paid. (i) If the corporation was subject to the personal holding company tax imposed by section 500 of the Internal Revenue Code of 1939 and, for the purpose of that tax, deducted Federal taxes paid rather than such taxes accrued for each taxable year for which it was subject to such taxes, the corporation may elect for any taxable year ending after June 30, 1954, to deduct taxes accrued, including taxes of foreign countries and possessions of the United States, rather than taxes paid, for the purposes of the tax imposed by section 541 of the Internal Revenue Code of 1954. The election shall be made by deducting such taxes accrued on Schedule PH, Form 1120, to be filed with the return. The schedule shall, in addition, contain a statement that the corporation has made such election and shall set forth the year to which such election was first applicable. The deduction of taxes accrued in the year of election precludes the deduction of taxes paid during such year. The election, if made, shall be irrevocable and the deduction for taxes accrued shall be allowed for the year of election and for all subsequent taxable years.

(ii) Pursuant to section 7851(a)(1)(C), the election provided for in subdivision (i) of this subparagraph may be made with respect to a taxable year ending after June 30, 1954, even though such taxable year is subject to the Internal Revenue Code of 1939.

(3) Taxes of foreign countries and United States possessions. In determining undistributed personal holding company income for any taxable year, if the taxpayer chooses the benefits of section 901 for such taxable year, a deduction shall be allowed for—

(i) The income, war profits, and excess profits taxes imposed by foreign countries or possessions of the United States and accrued (or paid, if required under subparagraph (1)(ii) of this paragraph) during such taxable year, and

(ii) In the case of a domestic corporation, the foreign income taxes deemed to be paid for such taxable year under section 902(a) in accordance with §§ 1.902–1 and 1.902–2 or section 960(a)(1) in accordance with § 1.960–7.

In no event shall the amount under subdivision (ii) of this subparagraph exceed the amount includible in gross income with respect to such taxes under section 78 and § 1.78–1. The credit for such taxes provided by section 901 shall not be allowed against the personal holding company tax imposed by section 541. See section 901(a).

(b) Charitable contributions—(1) Taxable years beginning before January 1, 1970. (i) Section 545(b)(2) provides that, in computing the deduction for charitable contributions for purposes of determining undistributed personal holding company income of a corporation for taxable years beginning before January 1, 1970, the limitations in section 170(b)(1)(A) and (B), relating to charitable contributions by individuals, shall apply and section 170(b)(2) and (5), relating to charitable contributions by corporations and carryover of certain excess charitable contributions made by individuals, respectively, shall not apply.

(ii) Although the limitations of section 170(b)(1)(A) and (B) are 10 and 20 percent, respectively, of the individual's adjusted gross income, the limitations are applied for purposes of section 545(b)(2) by using 10 and 20 percent, respectively, of the corporation's taxable income as adjusted for purposes of section 170(b)(2), that is, the same amount of taxable income to which the 5-percent limitation applied. Thus, the term "adjusted gross income" when used in section 170(b)(1) means the corporation's taxable income computed with the adjustments, other than the 5-percent limitation, provided in the first sentence of section 170(b)(2). However, a further adjustment for this purpose is that the taxable income shall also be computed without the deduction of the amount disallowed under section 545(b)(8), relating to expenses and depreciation applicable to property of the taxpayer. The carryover of charitable contributions made in a prior year, otherwise

allowable as a deduction in computing taxable income to the extent provided in section 170(b)(2) and, with respect to contributions paid in taxable years beginning after December 31, 1963, in section 170(b)(5), shall not be allowed as a deduction in computing undistributed personal holding company income for any taxable year.

(iii) See § 1.170-2 with respect to the charitable contributions to which the 10-percent limitation is applicable and the charitable contributions to which the 20-percent limitation is applicable.

(2) Taxable years beginning after December 31, 1969. (i) Section 545(b)(2) provides that, in computing the deduction allowable for charitable contributions for purposes of determining undistributed personal holding company income of a corporation for taxable years beginning after December 31, 1969, the limitations in section 170(b)(1)(A), (B), and (D)(i) (relating to charitable contributions by individuals) shall apply, and section 170(b)(1)(D)(ii) (relating to excess charitable contributions by individuals of certain capital gain property, section 170(b)(2) (relating to the 5-percent limitation on charitable contributions by corporations), and section 170(d)(relating to carryovers of excess contributions of individuals and corporations) shall not apply.

(ii) Although the limitations of section 170(b)(1)(A), (B), and (D)(i) are 50, 20, and 30 percent, respectively, of an individual's contribution base, these limitations are applied for purposes of section 545(b)(2) by using 50, 20, and 30 percent, respectively, of the corporation's taxable income as adjusted for purposes of section 170(b)(2), that is, the same amount of taxable income to which the 5-percent limitation applies. Thus, the term "contribution base" when used in section 170(b)(1) means the corporation's taxable income computed with the adjustments, other than the 5-percent limitation, provided in section 170(b)(2). However, a further adjustment for this purpose is that the taxable income shall also be computed without the deduction of the amount disallowed under section 545(b)(8), relating to expenses and depreciation applicable to property of the taxpayer. The carryover of charitable contributions made in a prior year, otherwise allowable as a deduction in computing taxable income to the extent provided in section 170(b)(1)(D)(ii) and (d), shall not be allowed as a deduction in computing undistributed personal holding company income for any taxable year.

(iii) See § 1.170A-8 for the rules with respect to the charitable contributions to which the 50-, 20-, and 30-percent limitations apply.

(c) Special deductions disallowed. Part VIII, subchapter B, chapter 1 of the Code, allows corporations, in computing taxable income, special deductions for such matters as partially tax-exempt interest, certain dividends received, dividends paid on certain preferred stock of public utilities, organizational expenses, etc. See section 241. Such special deductions, except the deduction provided by section 248 (relating to organizational expenses) shall be disallowed in computing undistributed personal holding company income.

(d) Net operating loss. The net operating loss deduction provided in section 172 is not allowed for purposes of the computation of undistributed personal holding company income. For purposes of such a computation, however, there is allowed as a deduction the amount of the net operating loss (as defined in section 172(c)) for the preceding taxable year, except that, in computing undistributed personal holding company income for a taxable year beginning after December 31, 1957, the amount of such net operating loss shall be computed without the deductions provided in part VIII (section 241 and following, except section 248), subchapter B, chapter 1 of the Code.

(e) Long-term capital gains. (1) There is allowed as a deduction the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for such year, minus the taxes attributable to such excess, as provided in section 545(b)(5).

(2) Section 631(c) (relating to gain or loss in the case of disposal of coal or domestic iron ore) shall have no application.

(f) Bank affiliates. There is allowed the deduction provided by section 601 in the case of bank affiliates (as defined in section 2 of the Banking Act of 1933; 12 U.S.C. 221a(c)).

(g) Payment of indebtedness incurred prior to January 1, 1934—(1) General rule. In computing undistributed personal holding company income, section 545(b)(7) provides that there shall be allowed as a deduction amounts used or irrevocably set aside to pay or to retire indebtedness of any kind incurred before January 1, 1934, if such amounts are reasonable with reference to the size and terms of such indebtedness. See § 1.545-3 for the deduction in computing undistributed personal holding company income of amounts used or irrevocably set aside to pay or retire qualified

indebtedness (as defined in paragraph (d) of § 1.545–3).

(2) Indebtedness. The term "indebtedness" means an obligation absolute and not contingent, to pay on demand or within a given time, in cash or other medium, a fixed amount. The term "indebtedness" does not include the obligation of a corporation on its capital stock. The indebtedness must have been incurred (or, if incurred by assumption, assumed) by the taxpayer before January 1, 1934. An indebtedness evidenced by bonds, notes, or other obligations issued by a corporation is ordinarily incurred as of the date such obligations are issued and the amount of such indebtedness is the amount represented by the face value of the obligations. In the case of refunding, renewal, or other change in the form of an indebtedness, the giving of a new promise to pay by the taxpayer will not have the effect of changing the date the indebtedness was incurred.

(3) **Amounts used or irrevocably set aside.** The deduction is allowable, in any taxable year, only for amounts used or irrevocably set aside in that year. The use or irrevocable setting aside must be to effect the extinguishment or discharge of indebtedness. In the case of refunding, renewal, or other change in the form of an indebtedness, the mere giving of a new promise to pay by the taxpayer will not result in an allowable deduction. If amounts are set aside in one year, no deduction is allowable for such amounts for a later year in which actually paid. As long as all other conditions are satisfied, the aggregate amount allowable as a deduction for any taxable year includes all amounts (from whatever source) used and all amounts (from whatever source) irrevocably set aside, irrespective of whether in cash or other medium. Double deductions shall not be allowed.

(4) **Reasonableness of the amounts with reference to the size and terms of the indebtedness.** (i) The reasonableness of the amounts used or irrevocably set aside must be determined by reference to the size and terms of the particular indebtedness. Hence, all the facts and circumstances with respect to the nature, scope, conditions, amount, maturity, and other terms of the particular indebtedness must be shown in each case.

(ii) Ordinarily an amount used to pay or retire an indebtedness, in whole or in part, at or prior to the maturity and in accordance with the terms thereof will be considered reasonable, and may be allowable as a deduction for the year in which so used. However, if an amount has been set aside in a prior year for payment or retirement of the same indebtedness, the amount so set aside shall not be allowed as a deduction in the year of the payment.

(iii) All amounts irrevocably set aside for the payment or retirement of an indebtedness in accordance with and pursuant to the terms of the obligation, for example, the annual contribution to trustees required by the provisions of a mandatory sinking fund agreement, will be considered as complying with the requirement of reasonableness. To be considered reasonable, it is not necessary that the plan of retirement provide for a retroactive setting aside of amounts for years prior to that in which the plan is adopted. However, if a voluntary plan was adopted before 1934, no adjustment is allowable in respect of the amounts set aside in the years prior to 1934.

(5) **Burden of proof.** The burden of proof will rest upon the taxpayer to sustain the deduction claimed. Therefore, the taxpayer must furnish the information required by the return, and such other information as the district director may require in substantiation of the deduction claimed.

(6) **Allowance to a successor corporation.** For allowance of deduction for pre-1934 indebtedness to a successor corporation, see section 381(c)(15).

(h) **Expenses and depreciation applicable to property of the taxpayer.** (1) In computing undistributed personal holding company income in the case of a personal holding company which owns or operates property, section 545(b)(8) provides a specific limitation with respect to the allowance of deductions for trade or business expenses and depreciation allocable to the operation or maintenance of such property. Under this limitation, these deductions shall not be allowed in an amount in excess of the aggregate amount of the rent or other compensation received for the use of, or the right to use, the property, unless it is established to the satisfaction of the Commissioner—

(i) That the rent or other compensation received was the highest obtainable, or if none was received, that none was obtainable;

(ii) That the property was held in the course of a business carried on bona fide for profit; and

(iii) Either that there was reasonable expectation that the operation of the property would result in a profit, or that the property was necessary to the conduct of the business.

(2) The burden of proof will rest upon the taxpayer to sustain the deduction claimed. If, in computing undistributed personal holding company income, a personal holding company claims

deductions for expenses and depreciation allocable to the operation and maintenance of property owned or operated by the company, in an aggregate amount in excess of the rent or other compensation received for the use of, or the right to use, the property, it shall attach to its income tax return a statement setting forth its claim for allowance of the additional deductions, together with a complete statement of the facts and circumstances pertinent to its claim and the arguments on which it relies. Such statement shall set forth:

(i) A description of the property;

(ii) The cost or other basis to the corporation and the nature and value of the consideration paid for the property;

(iii) The name and address of the person from whom the property was acquired and the date the property was acquired;

(iv) The name and address of the person to whom the property is leased or rented, or the person permitted to use the property, and the number of shares of stock, if any, held by such person and the members of his family;

(v) The nature and gross amount of the rent or other compensation received for the use of, or the right to use, the property during the taxable year and for each of the five preceding years and the amount of the expenses incurred with respect to, and the depreciation sustained on, the property for such years;

(vi) Evidence that the rent or other compensation was the highest obtainable or, if none was received, a statement of the reasons therefore;

(vii) A copy of the contract, lease or rental agreement;

(viii) The purpose for which the property was used;

(ix) The business, carried on by the corporation, with respect to which the property was held and the gross income, expenses, and taxable income derived from the conduct of such business for the taxable year and for each of the five preceding years;

(x) A statement of any reasons which existed for expectation that the operation of the property would be profitable, or a statement of the necessity for the use of the property in the business of the corporation, and the reasons why the property was acquired; and

(xi) Any other information pertinent to the taxpayer's claim.

(i) Amount of a lien in favor of the United States. (1) If notices of lien are filed in the manner provided in section 6323(f), the amount of the liability to the United States outstanding at the close of the taxable year, and secured by such liens which are in effect at that time, shall be allowed as a deduction in computing undistributed personal holding company income. However, the amount of such deduction which may be allowed for any taxable year shall not exceed the taxable income (as adjusted for purposes of determining the undistributed personal holding company income, but without regard to the deduction under section 545(b)(9)) for such year. The fact that the amount of, or any part of, the outstanding obligation to the United States was deducted for one taxable year does not prevent its deduction for a subsequent taxable year to the extent the obligation is still outstanding at the close of the subsequent taxable year and is secured by a lien, notice of which has been filed.

(2) Subparagraph (1) of this paragraph may be illustrated by the following example:

Example. If the taxpayer (on the calendar year basis) is subject to a lien (notice of which has been properly filed) in the amount of $500,000 at the close of the calendar year 1954 and has taxable income of $400,000 for such taxable year, the deduction allowable by reason of the lien for the calendar year 1954 is $400,000. If, at the close of the taxable year ended December 31, 1955, the taxpayer is still subject to the same lien of $500,000 and it has taxable income of $450,000, a deduction is allowed by reason of such lien in the amount of $450,000.

(3) When the obligation secured by the lien in favor of the United States has been satisfied or released, the sum of the amounts which have been allowed as deductions under section 545(b)(9) in respect of such obligation shall be restored to taxable income for the year in which such lien is satisfied or released. If only a part of the obligation secured by the lien has been satisfied, the sum of the amounts which have been allowed as deductions under section 545(b)(9) in respect of such part shall be included in taxable income for the year of the satisfaction for the purpose of determining undistributed personal holding company income. It should be noted, however, that only the sum of the amounts which have been allowed as deductions under section 545(b)(9) and subparagraph (1) of this paragraph shall be included in taxable income. Thus, any amounts which were allowed as deductions under section 504(e) of the Internal Revenue Code of 1939 shall not be included as taxable income for any taxable year under section 545(b)(9) and subparagraph (1) of this paragraph.

(4) The application of subparagraph (3) of this paragraph may be illustrated by the following example:

Example. Assume the same facts as in the example in subparagraph (2) of this paragraph, and assume further that the corporation has $100,000 taxable income both for 1956 (before including the $400,000 described below) and for 1957. In 1956, the corporation pays $200,000 of the obligation, thereby reducing its liability from $500,000 to $300,000. In such case, $400,000 is included in taxable income in computing its undistributed personal holding company income for 1956, that is, the sum of the $200,000 deduction for 1954 and the $200,000 deduction for 1955 in respect of the liability which is paid in 1956. In 1957, property of the corporation is discharged from the lien by reason of the fact that the value of the remaining property of the corporation exceeds double the outstanding liability. (See section 6325(b)(1).) Since this was not a release or satisfaction of the lien, no amount is added to taxable income for 1957 with respect to the property discharged from the lien. In 1958, the remaining property is released from the lien by reason of a bond being accepted under section 6325(a)(2). There is added to taxable income in computing undistributed personal holding company income for 1958, $850,000, that is, the sum of the deductions allowed for 1954, 1955, 1956, and 1957 in respect of the $300,000 liability, the lien for which was released in 1958. This amount of $850,000, is computed as follows:

Year	Outstanding liability	Taxable income	Deduction as limited by taxable income	Amount attributable to part payment of $200,000 in 1956	Amount attributable to release of lien in 1958
1954	$500,000	$400,000	$400,000	$200,000	$200,000
1955	500,000	450,000	450,000	200,000	250,000
1956	300,000	500,000	300,000		300,000
1957	300,000	100,000	100,000		100,000
Total					850,000

(5)(i) If an amount has been included in undistributed personal holding company income of the personal holding company by reason of section 545(b)(9), any shareholder of the company may elect to compute his income tax with respect to such of his dividends as are attributable to such amount as though such dividends were received ratably over the period the lien was in effect.

(ii) For purposes of section 545(b)(9), the dividends paid during the taxable year of the personal holding company (computed as of the close of such year) shall be deemed attributable first to undistributed personal holding company income by reason of section 545(b)(9) (computed as of the close of the taxable year of the personal holding company). If the period over which the lien was in effect consists of several taxable years of the personal holding company, the dividend deemed received for any taxable year shall be deemed received on the last day of such taxable year of the personal holding company.

(iii) Such election shall be made in a statement showing the amount of the deduction under section 545(b)(9) for each taxable year of the period in which the lien was in effect, the amount of such deduction, if any, which was added to undistributed personal holding company income in a later year or years as a result of partial satisfaction or release of such lien, and the details thereof, the taxable year or years to which such dividends are allocable, and a computation of tax, on the basis of the election, for all taxable years affected by such ratable allocation of the dividends. Further, the statement shall show the district director's office in which the returns, for the years to which the dividends are allocable, were filed, the kind of returns which were filed (separate returns or joint returns), and the name and address under which the returns were filed. The statement shall be attached to the shareholder's return for the taxable year for which the dividend would be reported but for such election.

(iv) The operation of this subparagraph may be illustrated as follows: If, in the example under subparagraph (4) of this paragraph, shareholder A owns 75 percent in value of the outstanding stock of the personal holding company, and receives a dividend of $540,000 from such company during 1958 (the total dividend distribution being $720,-000) he may elect to compute his income tax with respect to the $540,000 in dividends for 1958 as if he had received $127,058.82 of such dividends for 1954 ($200,000/850,000 of $540,000), $158,823.53 of such dividends for 1955 ($250,000/850,000 of $540,000), $190,588.23 of such dividends for 1956 ($300,000/850,000 of $540,000), and $63,529.41 of such dividends for 1957 ($100,000/850,000 of $540,000). Accordingly, the tax computed for 1958 with respect to such dividends shall be the aggregate of the taxes attributable to such amounts had they been distributed in the respective years.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6805, 30 FR 3209, March 9, 1965; T.D. 6841, 30 FR 9305, July 27, 1965; T.D. 6900, 31 FR 14643, Nov. 17, 1966; T.D. 6949, 33 FR 5526, April 9, 1968; T.D. 7207, 37 FR 20796, Oct. 5, 1972; T.D. 7429, 41 FR 35492, Aug. 23, 1976; T.D. 7649, 44 FR 60086, Oct. 18, 1979]

§ 1.545–3 Special adjustment to taxable income.

(a) In general. In computing undistributed personal holding company income for any taxable year beginning after December 31, 1963, section 545(c)(1) provides that, except as otherwise provided in section 545(c), there shall be allowed as a deduction amounts used or amounts irrevocably set aside (to the extent reasonable with reference to the size and terms of the indebtedness) during such year to pay or retire qualified indebtedness (as defined in section 545(c)(3) and paragraph (d) of this section). The reasonableness of amounts irrevocably set aside shall be determined under the rules of paragraph (g)(4) of § 1.545–2.

(b) Amounts used or irrevocably set aside—(1) In general. The deduction is allowable, in any taxable year, only for amounts used or irrevocably set aside in that year to extinguish or discharge qualified indebtedness. If amounts are set aside in 1 year, no deduction is allowable for a later year in which such amounts are actually paid. As long as all other conditions are satisfied, the aggregate amount allowable as a deduction for any taxable year includes all amounts (from whatever source) used and all amounts (from whatever source) irrevocably set aside, irrespective of whether in cash or other medium. The same item shall not be deducted more than once.

(2) Refunding, etc., of qualified indebtedness. (i) A refunding, renewal or mere change in the form of a qualified indebtedness which does not involve a substantial change in the economic terms of the indebtedness will not result in an allowable deduction whether or not funds are obtained from such refunding, renewal, or change in form, and whether or not such funds are applied on the prior obligation, and will not constitute a reduction in the amount of such qualified indebtedness. For purposes of this section, if, in connection with a refunding, renewal, or other change in the form of an indebtedness, the rate of interest or principal amount of such debt, or the date when payment is due with respect to such debt or significantly changed, or if, after the refunding, renewal, or other change in the form of such debt, the creditor to whom such debt is owed is neither the creditor to whom such debt was owed before such refunding, renewal, or other change, nor a person standing in a relationship to such creditor described in section 267(b), then a substantial change in the economic terms of such indebtedness will normally have occurred.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). On December 31, 1963, M owes $10,000 to X represented by a 6-percent, 90-day note payable on January 31, 1964. On January 31, 1964, M renews the debt, giving X a new 6-percent, 90-day note (payable on Apr. 30, 1964) and paying the accrued interest on the old note. Since the date when payment is due has been significantly changed, a substantial change in the economic terms of the indebtedness has occurred.

Example (2). On December 31, 1963, S owes $5,000 to T represented by a 6-percent note payable on January 1, 1965. On December 23, 1964, S liquidates the note, giving T a new note for $5,000 due on January 2, 1965, and bearing interest at 6 percent. Since the transaction does not involve a substantial change in the economic terms of the indebtedness, the transaction will not result in an allowable deduction, and the amount of the qualified indebtedness will not be reduced.

Example (3). (i) On December 31, 1963, Q owes $45,000 to R represented by a demand note. On July 1, 1964, Q renews $30,000 of the indebtedness by issuing a new demand note to R and liquidates $15,000 of the debt. Since the principal amount of the debt has been significantly changed, there has been a substantial change in the economic terms of the indebtedness.

(ii) If Q had issued renewal notes for $44,000 and had paid only $1,000 of the total indebtedness, then a significant change in the principal amount of the debt would not have occurred and Q would have been entitled to only a $1,000 deduction (the amount actually paid during the taxable year). In addition, the amount of qualified indebtedness would have been reduced to $44,000.

(c) Corporations to which applicable. Section 545(c)(2) describes the corporations to which section 545(c) applies. In order to qualify under section 545(c)(2), the corporation must be one:

(1) Which for at least one of its two most recent taxable years ending before February 26, 1964, was not a personal holding company under section 542, but which would have been a personal holding company under section 542 for such taxable year if the law applicable for the first taxable year beginning after December 31, 1963, had been applicable to such taxable year; or

(2) Which is an acquiring corporation treated as a corporation described in subparagraph (1) of this paragraph by reason of section 381(c)(15)(relating to the carryover of certain indebtedness in corporate acquisitions), but only to the extent of the qualified indebtedness to which it has succeeded under section 381(c)(15) and the indebtedness referred to in paragraph (d)(1)(ii) of this section incurred to replace qualified indebtedness to which it has succeeded under section 381(c)(15).

The law applicable for the first taxable year beginning after December 31, 1963, for purposes of this paragraph means part II (section 541 and following), subchapter G, chapter 1 of the Code as applicable to such year but does not include amendments to other parts of the Code first appli-

cable with respect to such year. For an example of a corporation described in subparagraph (1) of this paragraph see paragraph (f)(1) of § 1.333–5.

(d) **Qualified indebtedness—(1) General definition.** Except as provided in subparagraphs (2), (3), and (4) of this paragraph the term "qualified indebtedness" means:

(i) The outstanding indebtedness (as defined in subparagraph (6) of this paragraph) incurred after December 31, 1933, and before January 1, 1964, by the taxpayer (or to which the taxpayer succeeded in a transaction to which section 381(c)(15) applies), and

(ii) The outstanding indebtedness (as defined in subparagraph (6) of this paragraph) incurred after December 31, 1963, by the taxpayer (or to which the taxpayer succeeded in a transaction to which section 381(c)(15) applies) for the purpose of making a payment or set-aside referred to in paragraph (a) of this section in the same taxable year of the debtor in which such indebtedness was incurred. An indebtedness shall be deemed not to have been incurred for the purpose of making a payment or set-aside referred to in paragraph (a) of this section when such indebtedness is a consequence of a refunding, renewal or mere change in the form of a qualified indebtedness which does not involve a substantial change in the economic terms of the qualified indebtedness. (See paragraph (b)(2) of this section for the meaning of "substantial change in the economic terms of the indebtedness".) In the case of such a payment or set-aside which is made on or after the first day of the first taxable year beginning after December 31, 1963, such indebtedness incurred after December 31, 1963, is treated as qualified indebtedness only to the extent that the deduction from taxable income otherwise allowed by section 545(c)(1) with respect to such payment or set-aside is treated as nondeductible by reason of the election referred to in paragraph (e) of this section.

(2) Exception for indebtedness owed to certain shareholders. For purposes of subparagraph (1) of this paragraph, qualified indebtedness does not include any amounts which were, at any time after December 31, 1963, and before the payment or set-aside to which this section applies, owed directly or indirectly to a person who at such time owned more than 10 percent in value of the taxpayer's outstanding stock. The rules of section 318(a) and the regulations thereunder apply for the purpose of determining ownership under this subparagraph. Amounts which cease to be qualified indebtedness by reason of this subparagraph may not subsequently become qualified indebtedness as a result of any change in the facts (for example, a subsequent sale of stock by the person to whom the amounts are directly or indirectly owed).

(3) Reduction for amounts irrevocably set aside. For purposes of subparagraph (1) of this paragraph, qualified indebtedness with respect to a particular contract is reduced when and to the extent that amounts are irrevocably set aside to pay or retire such indebtedness. An amount is not considered to be irrevocably set aside if any person could use such amount for any purpose other than the retirement of the qualified indebtedness with respect to which it was set aside. No deduction is allowed under section 545(c)(1) and this section for payments out of amounts previously set aside. Thus, for example, if a corporation, which is a June 30 fiscal year taxpayer, incurs indebtedness of $1 million on February 1, 1962, and, in accordance with its contract of indebtedness, irrevocably sets aside $50,000 in a sinking fund on February 1, of each of the years 1963, 1964, and 1965, then its qualified indebtedness on January 1, 1964, is $950,000 ($1 million less one set-aside of $50,000 in 1963). The corporation is not allowed a deduction under section 545(c)(1) for the set-aside of $50,000 made during its taxable year ending on June 30, 1964, since section 545(c) is applicable only to taxable years beginning after December 31, 1963, but the qualified indebtedness is nevertheless reduced by such amount. The corporation is allowed a deduction of $50,000 for its taxable year ending June 30, 1965, as a result of the set-aside made during such taxable year, and qualified indebtedness on July 1, 1965, is $850,000. No deduction is allowed to the corporation for a payment in any subsequent taxable year from the amounts so set aside.

(4) Reduction on disposition of certain property. (i) Section 545(c)(6) provides that the total amount of the taxpayer's qualified indebtedness (as determined under subdivision (ii) of this subparagraph) shall be reduced if property of a character subject to the allowance for exhaustion, wear and tear, obsolescence, amortization, or depletion is disposed of after December 31, 1963. The reduction is made pro rata (in accordance with subdivision (iii) of this subparagraph) for the taxable year of such disposition and is equal in total amount to the excess, if any, of:

(a) The adjusted basis of the property disposed of (determined under section 1011 and the regulations thereunder) immediately before such disposition; over

(b) The amount of qualified indebtedness which ceased to be qualified indebtedness with respect to the taxpayer by reason of the assumption of indebtedness by the transferee of the property disposed of (whether or not such indebtedness was incurred by the taxpayer in connection with the property disposed of).

For purposes of (b) of this subdivision, the transferee will be treated as having assumed qualified indebtedness if such transferee acquires real estate of which the taxpayer is the legal or equitable owner immediately before the transfer and which is subject to indebtedness that, with respect to the taxpayer, is qualified indebtedness immediately before the transfer, provided the taxpayer shows to the satisfaction of the Commissioner that under all the facts and circumstances it no longer bears the burden of discharging such indebtedness.

(ii) The indebtedness reduced under the rule of this subparagraph is the qualified indebtedness which is outstanding with respect to the taxpayer immediately after the disposition referred to in subdivision (i) of this subparagraph.

(iii) The reduction with respect to any particular contract of indebtedness under the rules of this subparagraph shall be determined by multiplying the total reduction (determined under subdivision (i) of this subparagraph) by the ratio which the amount of the qualified indebtedness owed with respect to such contract by the taxpayer on the date referred to in subdivision (ii) of this subparagraph bears to the aggregate qualified indebtedness owed by the taxpayer with respect to all contracts on such date.

(5) **Total debt consisting of both qualified and nonqualified indebtedness.** In any case where, with respect to a particular contract of indebtedness, a part of the total indebtedness owed with respect to such contract is qualified indebtedness and the other part is indebtedness which is not qualified indebtedness, then, any amount paid or irrevocably set aside with respect to such contract shall be allocated between both such parts pro rata unless the taxpayer clearly indicates in its return the part of the payment or set-aside which shall be allocated to the qualified indebtedness.

(6) **Outstanding indebtedness.** For purposes of determining qualified indebtedness, the term "indebtedness" has the same meaning that it has under section 545(b)(7) and paragraph (g)(2) of § 1.545–2. Indebtedness ceases to be outstanding when the taxpayer no longer has an obligation absolute and not contingent with respect to the payment of such debt. An indebtedness evidenced by bonds, notes, or other obligations issued by a corporation is ordinarily incurred as of the date such obligations are issued, and the amount of such indebtedness is the amount represented by the face value of the obligations. However, a refunding, renewal, or mere change in the form of an indebtedness which does not involve a substantial change in the economic terms of the indebtedness will not have the effect of changing the date the indebtedness was incurred. (See paragraph (b)(2) of this section for the meaning of "substantial change in the economic terms of the indebtedness".) For purposes of this section, the outstanding indebtedness of a taxpayer includes a mortgage or other security interest on real estate of which such taxpayer is the legal or equitable owner (even though the taxpayer is not directly liable on the underlying evidence of indebtedness secured by such mortgage or security interest) provided such taxpayer shows to the satisfaction of the Commissioner that under all of the facts and circumstances it bears the burden of discharging such indebtedness. Thus, for example, if X acquires from Y property which is subject to a mortgage (X not assuming the indebtedness underlying such mortgage) and if X actually bears the burden of discharging the indebtedness, then, after the date of acquisition, such underlying indebtedness is outstanding indebtedness with respect to X, and, since Y's obligation to pay is in fact contingent upon X failing to discharge the indebtedness, such indebtedness is not outstanding indebtedness with respect to Y.

(7) **Examples.** The application of this paragraph may be illustrated by the following examples:

Example (1). M Corporation, a calendar year taxpayer has $600,000 of indebtedness outstanding on December 31, 1963 (which was incurred after 1933), represented by three demand notes. Individuals A and B (who are not shareholders) each hold one of M Corporation's notes in the amount of $150,000 and N Corporation (which is not a shareholder) holds M Corporation's note in the amount of $300,000. The note held by N Corporation is secured by a mortgage on certain depreciable real estate owned by M Corporation which has an adjusted basis to it on July 1, 1964, of $500,000. On July 1, 1964, M Corporation sells the depreciable real estate to O Corporation in consideration for $200,000 in cash and the assumption by O Corporation of the indebtedness on the note held by N Corporation. M Corporation borrows $200,000 on September 30, 1964, of which amount $150,000 is simultaneously applied to liquidate the note held by B. M Corporation's qualified indebtedness is reduced on July 1, 1964, by $300,000, the qualified indebtedness which ceased to be outstanding by reason of the transfer. In addition, the reduction (computed under section 545(c)(6) and subparagraph (4) of this paragraph) of M Corporation's qualified indebtedness by reason of the disposition of depreciable property on July 1, 1964, is as follows:

Outstanding qualified indebtedness after reduction of qualified indebtedness which ceased to be outstanding by reason of the transfer but before the sec. 545(c)(6) reduction	$300,000
Reduced by:	
The excess of the adjusted basis of depreciable real estate disposed of on July 1, 1964 ($500,000), over the amount of qualified indebtedness assumed by O Corporation ($300,000)...........................	200,000
Qualified indebtedness after reductions from transfer and assumption of indebtedness	100,000

The pro-rata share of the reduction with respect to each debt is computed as follows:

Note held by A:	
Qualified indebtedness owed by taxpayer on the note held by A before the disposition of depreciable property	$150,000
Less the pro-rata share of the total reduction computed under subparagraph (4) of this paragraph allocable to such note $200,000 × ($150,000 ÷ $300,000)	100,000
Qualified indebtedness owed on the note held by A after the transfer	50,000
Note held by B:	
Qualified indebtedness owed by taxpayer on the note held by B before the transfer of depreciable property	$150,000
Less the pro-rata share of the total reduction computed under subparagraph (4) of this paragraph allocable to such note $200,000 × ($150,000 ÷ $300,000)	100,000
Qualified indebtedness owed on the note held by B after the transfer	50,000

Of the $150,000 paid by M Corporation on September 30, 1964, to retire the note held by B only $50,000 qualified as a use of an amount to pay or retire qualified indebtedness and, thus, only $50,000 is allowable as a deduction for purposes of computing undistributed personal holding company income for 1964.

Example (2). The facts are the same as in example (1) except that M Corporation elects in accordance with paragraph (e) of this section not to deduct $25,000 of the $50,000 amount otherwise deductible. Then $25,000 of the $200,000 of new indebtedness incurred by M Corporation is qualified indebtedness. If the payment on the note held by B had not been made until January 1, 1965, then the new indebtedness would not be qualified indebtedness since the payment was not made in the taxable year in which the new indebtedness was incurred. If M Corporation pays $40,000 on April 1 and July 1, 1965, on the indebtedness incurred September 30, 1964, then (unless M indicates otherwise in its return for 1965 in accordance with subparagraph (5) of this paragraph) the payments made on such dates must be allocated between qualified and nonqualified indebtedness in the following manner:

	Qualified	Nonqualified
April 1 payment:		
$40,000 × $25,000 (qualified) ÷ $200,000 (total indebtedness)	$5,000	
$40,000 × $175,000 (nonqualified) ÷ $200,000 (total indebtedness)...............	....	$35,000
July 1 payment:		
$40,000 × $20,000 (qualified) ÷ $160,000 (total indebtedness)	$5,000	
$40,000 × $140,000 (nonqualified) ÷ $160,000 (total indebtedness)...............	....	35,000
Total	10,000	70,000

Thus, a total of $10,000 of the two payments would be considered used to pay or retire qualified indebtedness. The results in examples (1) and (2) would be the same if O Corporation purchased the real estate subject to the indebtedness (not assuming the indebtedness) on the note held by N Corporation, provided M Corporation does not bear the burden of discharging such indebtedness after July 1, 1964.

Example (3). C owns all of the 1000 shares of outstanding capital stock of P Corporation. On December 31, 1963, P Corporation, a calendar year taxpayer, owes $200,000 of outstanding indebtedness to D and $500,000 of outstanding indebtedness to E. These debts were incurred after 1933. On January 15, 1964, P Corporation pays $100,000 in partial liquidation of the $500,000 indebtedness. On March 15, 1964, P Corporation pays $50,000 into a sinking fund with respect to the $200,000 indebtedness owed to D. On April 15, 1964, D purchases one-half of the shares owned by C, constituting 50 percent in value of P Corporation's outstanding stock. P Corporation, on June 15, 1964, pays $50,000 into a sinking fund with respect to the indebtedness owed to D. For purposes of the March 15, 1964, set-aside, the indebtedness owed to D ($200,000) is qualified indebtedness. However, the indebtedness owed to D is not qualified indebtedness for purposes of the June set-aside with respect to such indebtedness since D is a person who after December 31, 1963, and before the June set-aside, owned more than 10 percent in value of P Corporation's outstanding stock. Moreover, any subsequent set-asides made with respect to the indebtedness owed to D will not be made with respect to qualified indebtedness even if the shares owned by D are subsequently sold. Assuming no payments or set-asides are made by P Corporation after June 15, 1964, the P Corporation is entitled to a deduction of $150,000 under section 545(c)(1) for the calendar year 1964 for amounts paid and for amounts irrevocably set aside to pay or retire qualified indebtedness, and the total qualified indebtedness at the end of 1964 is $400,000. No additional deduction is allowed in subsequent taxable years for amounts paid out of the amounts set aside in 1964.

(e) **Election not to deduct—(1) In general.** Section 545(c)(4) provides that a taxpayer may elect to treat as nondeductible amounts otherwise deductible under section 545(c)(1) for the taxable year. The election shall be in the form of a statement of election filed on or before the 15th day of the third month following the close of the taxable year with respect to which the election applies. The election shall be irrevocable after such date.

(2) Statement of election. The statement of election referred to in subparagraph (1) of this paragraph shall be attached to the taxpayer's Schedule PH (Form 1120) for the year with respect to which such election applies, if such schedule is filed on or before the date referred to in subparagraph (1) of this paragraph. If the taxpayer's Schedule PH (Form 1120) is not filed on or

before such date, then the statement of election shall clearly set forth the taxpayer's name, address, and employer identification number, shall be signed by an officer of the taxpayer who is authorized to sign a return of the taxpayer with respect to income, and shall be filed with the district director for the internal revenue district in which the taxpayer's income tax return (for the year with respect to which the election is applicable) would be filed. The following information shall be included in the statement of election:

(i) A statement that the taxpayer wishes to elect in accordance with section 545(c)(4);

(ii) The amounts paid or set aside which are to be treated as nondeductible under section 545(c)(4) and this section;

(iii) All information necessary to identify the qualified indebtedness with respect to which such amounts were paid or set aside;

(iv) The date on which such payments or set-asides were made; and

(v) All information necessary to identify the indebtedness (referred to in section 545(c)(3)(A)(ii) and paragraph (d)(1)(ii) of this section) incurred for the purpose of making the payments or set-asides which the taxpayer elects to treat as nondeductible, including:

(a) The date on which such indebtedness was incurred;

(b) The amount of such indebtedness;

(c) The person or persons to whom such indebtedness is owed; and

(d) A statement that such person or persons do not own more than 10 percent in value of the taxpayer's outstanding stock.

(f) Limitation on deduction—(1) In general. Section 545(c)(5) provides certain limitations on the deduction otherwise allowed by section 545(c)(1). Such deduction is reduced by the sum of the following amounts:

(i) The amount, if any, by which—

(a) The deductions allowed for the taxable year and all preceding taxable years beginning after December 31, 1963, for exhaustion, wear and tear, obsolescence, amortization, or depletion (other than such deductions which are disallowed in computing undistributed personal holding company income under the rule of paragraph (h) of § 1.545–2), exceed

(b) Any reduction, by reason of section 545(c)(5)(A) and this subdivision (i), of the deductions otherwise allowed by section 545(c)(1) for such preceding years; and

(ii) The amount, if any, by which—

(a) The deductions allowed under section 545(b)(5)(relating to long-term capital gain deduction) in computing undistributed personal holding company income for the taxable year and all preceding taxable years beginning after December 31, 1963, exceed

(b) Any reduction, by reason of section 545(c)(5)(B) and this subdivision (ii), of the deductions otherwise allowed by section 545(c)(1) for such preceding years.

(2) Allocation of reduction. If the total reduction required by subparagraph (1) of this paragraph is greater than the amount of the payment or set-aside made in respect of qualified indebtedness in a taxable year, then the portion of the reduction which is attributable to either section 545(c)(5)(A) or section 545(c)(5)(B), as the case may be, is that portion which bears the same ratio to the total reduction as the total reduction available under either section 545(c)(5)(A) or section 545(c)(5)(B), respectively, bears to the total reduction available under both such sections.

(3) Example. The provisions of this paragraph may be illustrated by the following example:

Example. (i) Q Corporation, a calendar year taxpayer, has qualified indebtedness of $400,000 on January 1, 1964, with respect to which payments of $50,000 are made on April 15, 1964, and 1965, and $300,000 on April 15, 1966. In the years 1964 and 1966, Q Corporation is allowed a deduction under section 545(b)(5) of $50,000 for the excess of its net long-term capital gain over its net short-term capital loss, minus the taxes attributable to such excess. Q Corporation is allowed a depreciation deduction of $50,000 for each of its taxable years 1964 through 1966. Q Corporation is a personal holding company with taxable income of $200,000 in each of the years 1964 and 1966.

(ii) For 1964, in computing undistributed personal holding company income, Q Corporation's taxable income is reduced by $50,000 by reason of the deduction under section 545(b)(5). No part of the depreciation deduction is disallowed under the rule of paragraph (h) of § 1.545–2. Q Corporation's deduction for payment of qualified indebtedness otherwise allowable under section 545(c)(1) and this section is reduced to zero by reason of the depreciation deduction and the capital gains deduction. The reduction by reason of section 545(c)(5)(A) and subparagraph (1)(i) of this paragraph (depreciation) is $25,000 [($50,000 ÷ $100,000) × $50,000], and the reduction by reason of section 545(c)(5)(B) and subparagraph (1)(ii) of this paragraph (capital gain) is $25,000 [($50,000 ÷ $100,000) × $50,000].

(iii) For 1966, Q Corporation is allowed a deduction for payment of qualified indebtedness of $100,000 computed as follows:

Amount paid in 1966 to retire qualified indebtedness			$300,000
Less the sum of:			
(a) Depreciation deductions allowed for 1964 through 1966 (3 × $50,000)	$150,000		
Reduction of deductions in preceding taxable years (1964)	25,000	$125,000	
(b) Deduction allowed under section 545(b)(5) (relating to long-term capital gains) for 1964 through 1966	100,000		
Reduction of deductions in preceding taxable years (1964)	25,000	75,000	200,000
Deduction after reduction			100,000

(iv) If, in the year 1966, Q Corporation's depreciation deduction had been limited for purposes of computing undistributed personal holding company income to $25,000 by reason of section 545(b)(8), then Q Corporation's deduction for payment of qualified indebtedness would be $125,000, computed as follows:

Amounts paid in 1966 to retire qualified indebtedness			$300,000
Less the sum of:			
(a) Depreciation deductions allowed for 1964 through 1966	$125,000		
Reduction of deductions in preceding taxable year (1964)	25,000		
	$100,000		
(b) Deduction allowed under section 545(b)(5) (relating to long-term capital gains) for 1964 through 1966	100,000		
Reduction of deductions in preceding taxable years (1964)	25,000	75,000	175,000
Deduction after reduction			125,000

(g) **Burden of proof.** The burden of proof rests upon the taxpayer to sustain the deduction claimed under this section. In addition to any information required by this section, the taxpayer must furnish the information required by the return, and such other information as the district director may require in substantiation of the deduction claimed.

(h) **Application of section 381(c)(15).** Under section 381(c)(15), if an acquiring corporation assumes liability for qualified indebtedness in a transaction to which section 381(a) applies, then the acquiring corporation is considered to be the distributor or transferor corporation for purposes of section 545(c). Paragraph (c)(2) of this section reflects the application of section 381(c)(15) by including an acquiring corporation within the definition of corporation to which this section applies. Thus, the acquiring corporation is not required to meet the requirements of paragraph (c)(1) or paragraph (d)(1) of this section with respect to such acquired qualified indebtedness to which section 381(c)(15) is applicable. All the other provisions of this section apply in full to the acquiring corporation with respect to such acquired indebtedness.

[T.D. 6949, 33 FR 5526, April 9, 1968; 33 FR 6091, April 20, 1968]

§ 1.547–1 General rule.

Section 547 provides a method under which, by virtue of dividend distributions, a corporation may be relieved from the payment of a deficiency in the personal holding company tax imposed by section 541 (or by a corresponding provision of a prior income tax law), or may be entitled to a credit or refund of a part or all of any such deficiency which has been paid. The method provided by section 547 is to allow an additional deduction for a dividend distribution (which meets the requirements of this section) in computing undistributed personal holding company income for the taxable year for which a deficiency in personal holding company tax is determined. The additional deduction for deficiency dividends will not, however, be allowed for the purpose of determining interest, additional amounts, or assessable penalties, computed with respect to the personal holding company tax prior to the allowance of the additional deduction for deficiency dividends. Such amounts remain payable as if section 547 had not been enacted.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.547–2 Requirements for deficiency dividends.

(a) **In general.** There are certain requirements which must be fulfilled before a deduction is allowed for a deficiency dividend under section 547 and this section. These are—

(1) The taxpayer's liability for personal holding company tax shall be determined only in the manner provided in section 547(c) and paragraph (b)(1) of this section.

(2) The deficiency dividend shall be paid by the corporation on, or within 90 days after, the date of such determination and prior to the filing of a claim under section 547(e) and paragraph (b)(2) of

this section for deduction for deficiency dividends. This claim must be filed within 120 days after such determination.

(3) The deficiency dividend must be of such a nature as would have permitted its inclusion in the computation of a deduction for dividends paid under section 561 for the taxable year with respect to which the liability for personal holding company tax exists, if it had been distributed during such year. See section 562 and §§ 1.562–1 through 1.562–3. In this connection, it should be noted that under section 316(b)(2), the term "dividend" means (in addition to the usual meaning under section 316(a)) any distribution of property (whether or not a dividend as defined in section 316(a)) made by a corporation to its shareholders, to the extent of its undistributed personal holding company income (determined under section 545 and §§ 1.545–1 and 1.545–2 without regard to section 316(b)(2)) for the taxable year in respect of which the distribution is made.

(b) Special rules—(1) Nature and details of determination. (i) A determination of a taxpayer's liability for personal holding company tax shall, for the purposes of section 547, be established in the manner specified in section 547(c) and this subparagraph.

(ii) The date of determination by a decision of the Tax Court of the United States is the date upon which such decision becomes final, as prescribed in section 7481.

(iii) The slate upon which a judgment of a court becomes final, which is the date of the determination in such cases, must be determined upon the basis of the facts in the particular case. Ordinarily, a judgment of a United States district court becomes final upon the expiration of the time allowed for taking an appeal, if no such appeal is duly taken within such time; and a judgment of the United States Court of Claims becomes final upon the expiration of the time allowed for filing a petition for certiorari if no such petition is duly filed within such time.

(iv) The date of determination by a closing agreement, made under section 7121, is the date such agreement is approved by the Commissioner.

(v) A determination under section 547(c)(3) may be made by an agreement signed by the district director or such other official to whom authority to sign the agreement is delegated, and by or on behalf of the taxpayer. The agreement shall set forth the total amount of the liability for personal holding company tax for the taxable year or years. An agreement under this subdivision which is signed by the district director (or such other official to whom authority to sign the agreement is delegated) on or after July 15, 1963, shall be sent to the taxpayer at his last known address by either registered or certified mail. If registered mail is used for such purpose, the date of registration shall be treated as the date of determination; if certified mail is used for such purpose, the date of the postmark on the sender's receipt for such mail shall be treated as the date of determination. However, if a dividend is paid by the corporation before such registration or postmark date but on or after the date such agreement is signed by the district director or such other official to whom authority to sign the agreement is delegated, the date of determination shall be such date of signing. The date of determination with respect to an agreement which is signed by the district director (or such other official to whom authority to sign the agreement is delegated) before July 15, 1963, shall be the date of the postmark on the cover envelope in which such agreement is sent by ordinary mail, except that if a dividend is paid by the corporation before such postmark date but on or after the date such agreement is signed by the district director or such other official to whom authority to sign the agreement is delegated, the date of determination shall be such date of signing.

(2) Claim for deduction—(i) Contents of claim. A claim for deduction for a deficiency dividend shall be made with the requisite declaration, on Form 976 and shall contain the following information:

(a) The name and address of the corporation;

(b) The place and date of incorporation;

(c) The amount of the deficiency determined with respect to the tax imposed by section 541 (or a corresponding provision of a prior income tax law) and the taxable year or years involved; the amount of the unpaid deficiency or, if the deficiency has been paid in whole or in part, the date of payment and the amount thereof; a statement as to how the deficiency was established, if unpaid; or if paid in whole or in part, how it was established that any portion of the amount paid was a deficiency at the time when paid and, in either case whether it was by an agreement under section 547(c)(3), by a closing agreement under section 7121, or by a decision of the Tax Court or court judgment and the date thereof; if established by a final judgment in a suit against the United States for refund, the date of payment of the deficiency, the date the claim for refund was filed, and the

date the suit was brought; if established by a Tax Court decision or court judgment, a copy thereof shall be attached, together with an explanation of how the decision became final; if established by an agreement under section 547(c)(3), a copy of such agreement shall be attached;

(d) The amount and date of payment of the dividend with respect to which the claim for the deduction for deficiency dividends is filed;

(e) A statement setting forth the various classes of stock outstanding, the name and address of each shareholder, the class and number of shares held by each on the date of payment of the dividend with respect to which the claim is filed, and the amount of such dividend paid to each shareholder;

(f) The amount claimed as a deduction for deficiency dividends; and

(g) Such other information as may be required by the claim form.

(ii) Filing of claim and corporate resolution. The claim together with a certified copy of the resolution of the board of directors or other authority, authorizing the payment of the dividend with respect to which the claim is filed, shall be filed with the district director for the internal revenue district in which the return is filed.

(iii) Carryover of deficiency dividends paid by acquiring corporation. In the case of the acquisition of assets of a corporation by another corporation in a distribution or transfer described in section 381(a), the distributor or transferor corporation shall be entitled to a deduction for any deficiency dividends (as defined in section 547(d)) paid by the acquiring corporation with respect to such distributor or transferor corporation. See section 381(c)(17).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6657, 28 FR 5720, June 12, 1963; T.D. 7604, 44 FR 18661, March 29, 1979]

§ 1.547–3 Claim for credit or refund.

(a) If a deficiency in personal holding company tax is asserted for any taxable year, and the corporation has paid any portion of such asserted deficiency, it is entitled to a credit or refund of such payment to the extent that such payment constitutes an overpayment as the result of a deduction for a deficiency dividend as provided in section 547 and §§ 1.547–1 through 1.547–7. It should be noted that a "determination" under section 547(c) and paragraph (b)(1) of § 1.547–2, of taxpayer's liability for personal holding company tax may take place subsequent to the time the deficiency was paid. To secure credit or refund of such overpayment, the taxpayer must file a claim on Form 843 in addition to the claim for the deduction for deficiency dividends required under section 547(e) and paragraph (b)(2) of § 1.547–2.

(b) No interest shall be allowed on such credit or refund.

(c) Such credit or refund will be allowed as if, on the date of the determination under section 547(c) and paragraph (b)(1) of § 1.547–2, two years remained before the expiration of the period of limitation on the filing of claim for refund for the taxable year to which the overpayment relates.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.547–4 Effect on dividends paid deduction.

The deficiency dividends deduction shall be allowed as of the date the claim is filed. No duplication of deductions with respect to any deficiency dividends is permitted. If a corporation claims and receives the benefit of the provisions of section 547 (or the corresponding section 506 of the Internal Revenue Code of 1939, or section 407 of the Revenue Act of 1938 (52 Stat. 447)), based upon a distribution of deficiency dividends, that distribution does not become a part of the dividends paid deduction under section 561. Likewise, it will not be made the basis of a dividends paid deduction under section 561 by reason of the application of section 563(b), relating to dividends paid after the close of the taxable year and on or before the 15th day of the third month following the close of such taxable year.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.547–5 Deduction denied in case of fraud or wilful failure to file timely return.

No deduction for deficiency dividends shall be allowed under section 547(a) if the determination contains a finding that any part of the deficiency is due to fraud with intent to evade tax, or to wilful failure to file an income tax return within the time prescribed by law or prescribed by the Secretary or his delegate in pursuance of law. See § 1.547–7 for effective date.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.547–6 Suspension of statute of limitations and stay of collection.

(a) Statute of limitations. If the corporation files a claim for a deduction for deficiency divi-

dends under section 547(e) and paragraph (b)(2) of § 1.547–2, the running of the statute of limitations upon assessment, distraint, and collection in court in respect of the deficiency, and all interest, additional amounts, or assessable penalties, shall be suspended for a period of two years after the date of the determination under section 547(c) and paragraph (b)(1) of § 1.547–2.

(b) Stay of collection. If a deficiency in personal holding company tax is established by a determination under section 547(c) and paragraph (b)(1) of § 1.547–2, collection by distraint or court proceeding (except in case of jeopardy), of the deficiency and all interest, additional amounts, and assessable penalties, shall be stayed for a period of 120 days after the date of such determination, and, to the extent any part of such deficiency remains after deduction for deficiency dividends, for an additional period until the date the claim is disallowed. After such claim is allowed or rejected, either in whole or in part, the amount of the deficiency which was not eliminated by the application of section 547, together with interest, additional amounts and assessable penalties, will be assessed and collected in the usual manner.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.547–7 Effective date.

The deduction for deficiency dividends, in computing personal holding company tax for any taxable year, is allowable only with respect to determinations under section 547(c) made after November 14, 1954 (the date falling 90 days after the date of enactment of the Internal Revenue Code of 1954). If the taxable year with respect to which the deficiency is asserted began before January 1, 1954, the deficiency dividends deduction shall include only the amounts which would have been includible in the computation of the basic surtax credit for such taxable year under the Internal Revenue Code of 1939. Section 547(g), relating to the denial of a deficiency dividends deduction if the determination contains a finding that any part of the deficiency is due to fraud, etc., shall apply only if the taxable year with respect to which the deficiency is asserted begins after December 31, 1953.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

Foreign Personal Holding Companies

§ 1.551–1 General rule.

Part III (section 551 and following), subchapter G, chapter 1 of the Code, does not impose a tax on foreign personal holding companies. The undistributed foreign personal holding company income of such companies, however, must be included in the manner and to the extent set forth in section 551, in the gross income of their "United States shareholders," that is, the shareholders who are individual citizens or residents of the United States, domestic corporations, domestic partnerships, and estates or trusts other than estates or trusts the gross income of which under subtitle A of the Code includes only income from sources within the United States.

§ 1.551–2 Amount included in gross income.

(a) The undistributed foreign personal holding company income is included only in the gross income of the United States shareholders who were shareholders in the company on the last day of its taxable year on which a United States group (as defined in section 552(a)(2)) existed with respect to the company. Such United States shareholders, accordingly, are determined by the stock holdings as of such specified time. This rule applies to every United States shareholder who was a shareholder in the company at the specified time regardless of whether the United States shareholder is included within the United States group. For example, a domestic corporation which is a United States shareholder at the specified time must return its distributive share in the undistributed foreign personal holding company income even though the domestic corporation cannot be included within the United States group since, under section 554, the stock it owns in the foreign corporation is considered as being owned proportionately by its shareholders for the purpose of determining whether the foreign corporation is a foreign personal holding company.

(b) The United States shareholders must include in their gross income their distributive shares of that proportion of the undistributed foreign personal holding company income for the taxable year of the company which is equal in ratio to that which the portion of the taxable year up to and including the last day on which the United States group with respect to the company existed bears to the entire taxable year. Thus, if the last day in the taxable year on which the required United States group existed was also the end of the taxable year, the portion of the taxable year up to and

including such last day would be equal to 100 percent and, in such case, the United States shareholders would be required to return their distributive shares in the entire undistributed foreign personal holding company income. But if the last day on which the required United States group existed was September 30, and the taxable year was a calendar year, the portion of the taxable year up to and including such last day would be equal to nine-twelfths and, in that case, the United States shareholders would be required to return their distributive shares in only nine-twelfths of the undistributed foreign personal holding company income.

(c) The amount which each United States shareholder must return is that amount which he would have received as a dividend if the above-specified portion of the undistributed foreign personal holding company income had in fact been distributed by the foreign personal holding company as a dividend on the last day of its taxable year on which the required United States group existed. Such amount is determined, therefore, by the interest of the United States shareholder in the foreign personal holding company, that is, by the number of shares of stock owned by the United States shareholder and the relative rights of his class of stock, if there are several classes of stock outstanding. Thus, if a foreign personal holding company has both common and preferred stock outstanding and the preferred shareholders are entitled to a specified dividend before any distribution may be made to the common shareholders, then the assumed distribution of the stated portion of the undistributed foreign personal holding company income must first be treated as a payment of the specified dividend on the preferred stock before any part may be allocated as a dividend on the common stock.

(d) The assumed distribution of the required portion of the undistributed foreign personal holding company income must be returned as dividend income by the United States shareholders for their respective taxable years in which or with which the taxable year of the foreign personal holding company ends. For example, if the M Corporation, whose taxable year is the calendar year, is a foreign personal holding company for 1954 and if A, one of its United States shareholders, makes returns on a calendar year basis, while B, another United States shareholder, makes returns on the basis of a fiscal year ending November 30, A must return his assumed dividend as income for the taxable year 1954 and B must return his distributive share as income for the fiscal year ending November 30, 1955. In applying this rule, the date as of which the United States group last existed with respect to the company is immaterial. Thus, in the foregoing example, if September 30, 1954, was the last day on which the United States group with respect to the M Corporation existed, B would still be required to return his assumed dividend as income for the fiscal year ending November 30, 1955, even though September 30, 1954, the date as of which the distribution is assumed to have been made, does not fall within such fiscal year.

(e) For the treatment of gain on the sale of certain stock, see section 306(f) and paragraph (h) of § 1.306–3.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.551–3 Deduction for obligations of the United States and its instrumentalities.

(a) Each United States shareholder required to return his distributive share of undistributed foreign personal holding company income for any taxable year shall take into account in computing the credit against tax under section 35, or the deduction under section 242, whichever is allowable to such shareholder, his proportionate share of whatever interest on obligations of the United States or its instrumentalities (as specified in sections 35 or 242, as the case may be) may be included in the gross income of the company for such taxable year, with the exception of any such interest as may be so included by reason of the application of the provisions of section 555. For reduction of credit for such interest on account of amortizable bond premium, see section 171 and the regulations thereunder.

(b) The rule set forth in paragraph (a) of this section may be illustrated by the following example:

Example. The M Corporation is a foreign personal holding company which owns all the stock of the N Corporation, another foreign personal holding company. Both companies receive interest on obligations of the United States or its instrumentalities as specified in section 35. In determining the amount of the credit allowable under section 35 (if the shareholder is an individual) or the deduction allowable under section 242 (if the shareholder is a corporation), the United States shareholder of the M Corporation would be entitled to a credit or a deduction, as the case may be, only for his proportionate share of the interest received by that Company and not for any part of the interest received by the N Corporation, regardless of whether the interest received by the N Corporation is included in the gross income of the M Corporation as an actual dividend or as a constructive dividend under section 555.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.551–4 Information in return.

The information required by section 551(d) in the returns of certain United States shareholders relates only to the taxable year of a foreign personal holding company for which any part of such corporation's undistributed foreign personal holding company income must be included in gross income by the United States shareholder of whom the information is required. The information shall be submitted as a part of the income tax return in the form of a statement attached to the return. [T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.551–5 Effect on capital account of foreign personal holding company and basis of stock in hands of shareholders.

(a) Sections 551(e) and 551(f) are designed to prevent double taxation with respect to the undistributed foreign personal holding company income.

(b) The application of sections 551(e) and 551(f) may be illustrated by the following examples:

Example (1). The M Corporation is a foreign personal holding company. Seventy-five percent in value of its capital stock is owned by A, a citizen of the United States, and the remainder, or 25 percent, of its stock is owned by B, a nonresident alien individual. For the calendar year 1954 the M Corporation has an undistributed foreign personal holding company income of $100,000. A is required to include $75,000 of such income in gross income as a dividend in his return for the calendar year 1954. The $100,000 is treated as paid-in surplus or as a contribution to the capital of the M Corporation and its accumulated earnings and profits as of the close of the calendar year 1954 are correspondingly reduced. If after treating such $100,000 as paid-in surplus or as a contribution to capital, the M Corporation has no accumulated earnings and profits at the close of 1954, and if for the calendar year 1955, the M Corporation had no earnings and profits, but distributed $40,000, the amount so distributed would be a nontaxable distribution and would not be included in the gross income of either A or B for the calendar year 1955. If, however, after treating the $100,000 as paid-in surplus or as a contribution to capital, the M Corporation had accumulated earnings and profits of $100,000 at the close of 1954, the facts otherwise being the same, the distributions in 1955 would be taxable to A as a dividend, and the taxability of such distributions to B would depend upon the application of section 861(a)(2), relating to the treatment of dividends from a foreign corporation as income from sources within or without the United States.

Example (2). In example (1) assume the basis of A's stock to be $300,000. If A includes in gross income in his return for the calendar year 1954, $75,000 as a dividend from the M Corporation, the basis of his stock would be $375,000. After the nontaxable distribution of $30,000 to A by the M Corporation in 1955 (75 percent of the $40,000 distribution) the basis of A's stock, assuming no other changes, would be $345,000. If A failed to include the $75,000 as a dividend in gross income in his return for 1954 and his failure was not discovered until after the 6-year period of limitations had expired, the application of the rule would not increase the basis of A's stock. The subsequent nontaxable distribution of $30,000 to A in 1955 would reduce his basis of $300,000 to $270,000, thus tending to compensate for his failure to include the amount of $75,000 as a dividend in his gross income for 1954. If the undistributed foreign personal holding company income of the M Corporation is readjusted within the statutory period of limitations, thus increasing or decreasing the amount A would have to include in his gross income, proper adjustment is required to be made to the basis of A's stock on account of such readjustment.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.552–1 Definition of foreign personal holding company.

(a) A foreign personal holding company is any foreign corporation, other than a corporation exempt from taxation under subchapter F (section 501 and following), chapter 1 of the Code, and other than certain banking institutions which satisfy the requirements of section 552(b)(2) and paragraph (b) of § 1.552–4 which for the taxable year meets (1) the gross income requirement specified in section 552(a)(1); and (2) the stock ownership requirement specified in section 552(a)(2). Both requirements must be satisfied with respect to each taxable year.

(b) A foreign corporation which comes within the classification of a foreign personal holding company is not subject to taxation either under section 531 or section 541. See sections 532(b)(2) and 542(c)(5). The fact that a foreign corporation is a foreign personal holding company does not relieve the corporation from liability for the taxes imposed generally upon foreign corporations, such as the taxes imposed by sections 881 and 882, since such taxes apply regardless of the classification of the foreign corporation as a foreign personal holding company.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.552–2 Gross income requirement.

(a) To meet the gross income requirement, it is necessary that either of the following percentages of gross income of the corporation for the taxable year (including the additions to gross income provided in section 555(b) as required by section 555(c)(2)) be foreign personal holding company income as defined in section 553:

(1) 60 percent or more; or

(2) 50 percent or more if the foreign corporation has been classified as a foreign personal holding company for any taxable year ending after August 26, 1937, unless—

(i) A taxable year has intervened since the last taxable year for which it was so classified, during no part of which the stock ownership requirement specified in section 552(a)(2) exists; or

(ii) Three consecutive years have intervened since the last taxable year for which it was so classified, during each of which its foreign personal holding company income was less than 50 percent of its gross income.

(b) In determining whether the foreign personal holding company income is equal to the required percentage of the total gross income, the determination must not be made upon the basis of gross receipts, since gross income is not synonymous with gross receipts. For meaning of gross income in this part, see section 555 and § 1.555–1.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.552–3 Stock ownership requirement.

(a) To meet the stock ownership requirement, it is necessary that at some time in the taxable year more than 50 percent in value of the outstanding stock of the foreign corporation be owned, directly or indirectly, by or for not more than five individuals who are citizens or residents of the United States, herein referred to as "United States group." For the purpose of the requirement under section 552(a)(2), section 554 provides that the ownership of the stock must be determined under the rules prescribed by section 544 (relating to rules for determining stock ownership in the case of personal holding companies generally). Accordingly, section 544 and §§ 1.544–1 through 1.544–7 are applicable for purposes of section 552(a)(2) and this section as if each reference in section 544 and §§ 1.544–1 through 1.544–7 to a personal holding company or to part II (section 541 and following), subchapter G, chapter 1 of the Code, was a reference to a foreign personal holding company or to part III (section 551 and following), subchapter G, chapter 1 of the Code, as the case may be.

(b) It is necessary to consider any change in the stock outstanding during the taxable year, whether in the number of shares or classes of stock, or in the ownership thereof, since a corporation comes within the classification if the statutory conditions with respect to stock ownership are present at any time during the taxable year.

(c) In determining whether the statutory conditions with respect to stock ownership are present at any time during the taxable year, the phrase "in value" shall, in the light of all the circumstances, be deemed the value of the corporate stock outstanding at such time (not including treasury stock). This value may be determined upon the basis of the company's net worth, earning and dividend paying capacity, appreciation of assets, together with such other factors as have a bearing upon the value of the stock. If the value of the stock which is used is greatly at variance with that reflected by the corporate books, the evidence of such value should be filed with the return. In any case where there are two or more classes of stock outstanding, the total value of all the stock should be allocated among the different classes according to the relative value of each class therein.
[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.552–4 Certain excluded banks.

(a) A corporation is excluded from the definition of "foreign personal holding company" if it is organized and doing business under the banking and credit laws of a foreign country and if it establishes to the satisfaction of the Commissioner that it was not formed or availed of for the purpose of evading or avoiding United States income taxes which would otherwise be imposed on its shareholders. If this is established, the Commissioner, or such other official to whom authority may be delegated, will certify, by letter to the corporation, that it is not a foreign personal holding company.

(b) An application for certification under section 552(b)(2) shall be made in writing to the Commissioner of Internal Revenue, Washington D.C. 20225, Attention: Director of International Operations. A separate application shall be filed for each taxable year for which certification is requested, and the application shall be accompanied by a completed Form 958 for the taxable year. See section 6035. The following information shall be set forth in, or submitted with, the application:

(1) A complete reference to the banking or credit laws of the foreign country under which the corporation operates;

(2) A statement as to the extent of the corporation's business in receiving deposits and making loans and discounts and similar banking and credit operations;

(3) A statement as to the extent of the operations of the corporation other than such banking and credit operations;

(4) A statement as to whether the banking and credit operations of the corporation are customary for it;

(5) A statement setting forth the degree and manner of supervision exercised over it by the foreign government under its banking and credit laws; a copy (in English) of the corporation's last annual financial statement, as submitted to the

Government authority having jurisdiction over it, shall be submitted with the application;

(6) A statement setting forth the business reasons of the corporation for not distributing the amount which would be its undistributed foreign personal holding company income if the corporation were not excluded under section 552(b);

(7) A statement setting forth the extent of the corporation's profits which must be retained as reserves under the foreign law;

(8) A statement setting forth the date or dates when the corporation reasonably expects to distribute is undistributed foreign personal holding company income for the taxable year;

(9) A statement setting forth the name and address of each of the individuals described in section 552(a)(2), the extent of their stock ownership in the corporation, and the amount of distributions or other payments to such stockholders, including, but not limited to, dividends, compensation, interest, and rents; and

(10) Any other facts or information the corporation may wish to submit to show that it was not formed or availed of for the purpose of evading or avoiding United States income taxes which would otherwise be imposed on its shareholders.

The corporation shall also furnish such other information requested as necessary by the Director of International Operations. The application for certification, together with the information required by this paragraph, should be filed within 60 days after the close of the taxable year of the corporation or before November 9, 1958, whichever is later. However, if the corporation is unable, for good cause, to submit the application for certification within such 60-day period, additional time may be granted by the Director of International Operations upon receipt of a request from the corporation setting forth the reasons for such request.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.552-5 United States shareholder of excluded bank.

A copy of the certification issued to an excluded bank under section 552(b)(2) and § 1.552-4 shall be filed with, and made a part of, the income tax return for the taxable year of each United States shareholder of such foreign corporation, if he has been a shareholder of such corporation for any part of such year. If the certificate has not been issued at the time the return of the United States shareholder is filed, the shareholder shall compute the tax on his return by treating the bank as a foreign personal holding company. If a certificate is issued after the return is filed, the United States shareholder may file a claim for refund or an amended return, and shall attach thereto a copy of the certification.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.553-1 Foreign personal holding company income.

Foreign personal holding company income shall consist of the items defined under section 543 and §§ 1.543-1 and 1.543-2, relating to personal holding company income, with the following exceptions:

(a) The entire amount received as "interest", whether or not treated as rent, shall be considered to be foreign personal holding company income. Thus, the exception in the second sentence of section 543(a)(1) and paragraph (b)(2) of § 1.543-1 (relating to interest treated as rent under section 543(a)(7) and paragraph (b)(10) of § 1.543-1), is inapplicable for the purpose of determining foreign personal holding company income. Similarly, section 543(a)(7) and paragraph (b)(10) of § 1.543-1 are applied for this purpose without regard to the interest described in that section.

(b)(1) The entire amount received as "royalties", whether or not mineral, oil, or gas royalties, or copyright royalties, shall be considered to be foreign personal holding company income. Thus, subparagraphs (A) and (B) of section 543(a)(8) and paragraph (b)(11)(i)(a) and (b) of § 1.543-1 (relating to mineral, oil, or gas royalties), and subparagraphs (A), (B), and (C) of section 543(a)(9) and paragraph (b)(12)(ii) of § 1.543-1 (relating to copyright royalties), are inapplicable for the purpose of determining foreign personal holding company income.

(2) In computing foreign personal holding company income, the first sentence of paragraph (b)(11)(ii) of § 1.543-1 shall apply to overriding royalties received from the sublessee by the operating company which originally leased and developed the natural resource property in respect of which such overriding royalties are paid, and to mineral, oil, or gas production payments, only with respect to amounts received after September 30, 1958.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6739, 29 FR 7715, June 17, 1964]

§ 1.554–1 Stock ownership.

For regulations under section 554, see § 1.552–3.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.555–1 General rule.

The gross income of a foreign corporation which is a foreign personal holding company is computed the same as if the foreign corporation were a domestic corporation which is a personal holding company. See section 542(a)(1) and § 1.542–2. The gross income of a foreign personal holding company thus includes income from all sources, whether within or without the United States, which is not specifically excluded from gross income under any other provisions of the Code. For example, the gross income of a foreign personal holding company includes all income from sources outside the United States even though the foreign personal holding company is a foreign corporation not engaged in trade or business within the United States. However, the gross income of a foreign corporation which is a foreign personal holding company shall not include, with respect to a United States shareholder described in section 951(b), dividends received by such corporation which are excluded under section 959(b) from the income of such corporation with respect to such shareholder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6795, 30 FR 934, Jan. 29, 1965]

§ 1.555–2 Additions to gross income.

(a) If, for any taxable year—

(1) A foreign corporation meets the stock ownership requirement specified in section 552(a)(2) and § 1.552–3, regardless of whatever day in its taxable year is the last day on which the required United States group exists, and

(2) Such foreign corporation is a shareholder in a foreign personal holding company on any day of a taxable year of the second company which ends with or within the taxable year of the first company and such day is the last day in the taxable year of the second company in which the United States group exists with respect to the second company, then for the purpose of—

(i) Determining whether the first company meets the specified gross income requirement so as to come within the classification of a foreign personal holding company, and

(ii) Determining the undistributed foreign personal holding company income of the first company which (in the event the first company is a foreign personal holding company) is to be included, in whole or in part, in the gross income of its shareholders, whether United States shareholders or other foreign personal holding companies,

there shall be included as a dividend in the gross income of the first company for the taxable year in which or with which the taxable year of the second company ends, the amount the first company would have received as a dividend, if on the last day referred to in this subparagraph there had been distributed by the second company, and received by the shareholders, an amount which bears the same ratio to the undistributed foreign personal holding company income of the second company for its taxable year as the portion of such taxable year up to and including such last day bears to the entire taxable year. The foregoing rules apply to any chain of foreign corporations regardless of the number of corporations included in the chain.

(b) The application of section 555(b) may be illustrated by the following examples:

Example (1). The X Corporation is a foreign corporation whose stock is owned by A, a United States citizen. The X Corporation owns the entire stock of the Y Corporation, another foreign corporation. The taxable year of the X Corporation is the calendar year and the taxable year of the Y Corporation is the fiscal year ending June 30. For the fiscal year ending June 30, 1955, more than the required percentage of the Y Corporation's gross income consists of foreign personal holding company income and no part of the earnings for such year is distributed as dividends. On the basis of these facts the Y Corporation is a foreign personal holding company for the fiscal year ending June 30, 1955. The X Corporation meets the stock ownership requirement and constitutes a foreign personal holding company for 1955, if it also meets the gross income requirement. For the purpose of determining whether the X Corporation meets the gross income requirements, the entire undistributed foreign personal holding company income of the Y Corporation for the fiscal year ending June 30, 1955, must be included as a dividend in the gross income of the X Corporation for 1955, since—

(1) The X Corporation was a shareholder in the Y Corporation on a day (June 30, 1955) in the taxable year of the Y Corporation ending with or within the taxable year of the X Corporation, which day was the last day in the taxable year of the Y Corporation on which the United States group required with respect to the Y Corporation existed,

(2) Such last day was also the end of the Y Corporation's taxable year so that the portion of the taxable year of the Y Corporation up to and including such last day is equal to 100 percent of the taxable year of the Y Corporation, and, therefore, the portion of the undistributed foreign personal holding company income of the Y Corporation includible in the gross income of its shareholders is likewise equal to 100 percent, and

(3) The X Corporation being the sole shareholder of the Y Corporation must include such portion in its gross income for 1955, the taxable year in which or with which the taxable year of the Y Corporation ends. If, after the inclusion of the presumptive dividend in its gross income, the X Corporation is a foreign personal holding company for 1955, then the undis-

tributed foreign personal holding company income of the Y Corporation must also be included as a dividend in the gross income of the X Corporation in determining its undistributed foreign personal holding company income which is to be included in the gross income of A, the sole shareholder in the X Corporation. On the other hand, if, after including such presumptive dividend, the X Corporation does not constitute a foreign personal holding company, the undistributed foreign personal holding company income of the Y Corporation is not includible in the gross income of the X Corporation.

Example (2). The X Corporation referred to in example (1) sold the stock in the Y Corporation to other interests on September 30, 1955, so that after that date no United States group existed with respect to the Y Corporation. For the fiscal year ending June 30, 1956, more than the required percentage of the gross income of the Y Corporation consists of foreign personal holding company income. The taxable income of the Y Corporation for such fiscal year amounts to $1,000,000, of which $900,000 is distributed in dividends after September 30, 1955. The undistributed foreign personal holding company income of the Y Corporation for such fiscal year amounts to $100,000. Upon the basis of these facts the Y Corporation is a foreign personal holding company for the fiscal year ending June 30, 1956, since at one time in such fiscal year, or from July 1 to and including September 30, 1955, it meets the stock ownership requirement, and the gross income requirement is also satisfied. In determining whether the X Corporation constitutes a foreign personal holding company for 1956, a portion of the undistributed foreign personal holding company income of the Y Corporation for the fiscal year ending June 30, 1956 (three-twelfths of $100,000, or $25,000), must be included as a dividend in the gross income of the X Corporation, since—

(1) The X Corporation was a shareholder in the Y Corporation on September 30, 1955, or on a day in the taxable year of the Y Corporation ending with or within the taxable year of the X Corporation which day was the last day in the Y Corporation's taxable year on which the United States group required with respect to the Y Corporation existed.

(2) The portion of the taxable year of the Y Corporation up to and including such day is three-twelfths of the entire taxable year of the Y Corporation and, therefore, the portion of the undistributed foreign personal holding company income of the Y Corporation includible in the gross income of its shareholders also is equal to three-twelfths, and

(3) The X Corporation, being the sole shareholder of the Y Corporation at the time the United States group with respect to the Y Corporation last existed, must include all of such portion in its gross income for 1956, the taxable year of the X Corporation in which or with which the taxable year of the Y Corporation ends.

It is to be observed that three-twelfths of the undistributed foreign personal holding company income of the Y Corporation for the entire taxable year and not the earnings realized by the Y Corporation up to and including September 30, 1955, the last day on which the United States group with respect to the Y Corporation existed, must be included in the gross income of the X Corporation.

Example (3). The X Corporation referred to in example (1) sold the stock in the Y Corporation to other interests on September 30, 1955, so that after that date a different United States group existed with respect to the Y Corporation. Assuming that the Y Corporation is a foreign personal holding company for the fiscal year ending June 30, 1956, no part of the undistributed foreign personal holding company income of the Y Corporation for such fiscal year would, in this instance, be includible in the gross income of the X Corporation for the year 1956, in determining whether the X Corporation is a foreign personal holding company for that year. In such case, the undistributed foreign personal holding company income of the Y Corporation is includible in the gross income of the other foreign personal holding companies, if any, and of the United States shareholders who are shareholders in the Y Corporation the day after September 30, 1955, which was the last day in the taxable year of the Y Corporation on which the United States group with respect to the Y Corporation existed. If, however, the X Corporation sells 90 percent of its stock in the Y Corporation and thus is a minority shareholder in the Y Corporation on the last day of the taxable year of the Y Corporation on which the United States group with respect to the Y Corporation exists, the portion of the undistributed foreign personal holding company income allocable to the minority interests of the X Corporation would be includible in the gross income of the X Corporation, even though on such last day the United States group is not the same with respect to both corporations.

Example (4). If the Y Corporation in example (1) owns all of the stock of the Z Corporation, another foreign corporation, there would be a chain of three foreign corporations. In such case, assuming that the Z Corporation is a foreign personal holding company for a taxable year ending with or within the taxable year of the Y Corporation, the undistributed foreign personal holding company income of the Z Corporation would be included in the gross income of the Y Corporation for the purpose of determining whether the Y Corporation comes within the classification of a foreign personal holding company. If, after the inclusion of such presumptive dividend, the Y Corporation is a foreign personal holding company, the undistributed foreign personal holding company income of the Z Corporation would be included in the gross income of the Y Corporation in determining the undistributed foreign personal holding company income of the Y Corporation which is includible in the gross income of its shareholder, the X Corporation. The same process would be repeated with respect to determining whether the X Corporation is a foreign personal holding company and in determining its undistributed foreign personal holding company income. If all three corporations are foreign personal holding companies, the undistributed foreign personal holding company income of each would, in this manner, be reflected as a dividend in the gross income of A, the ultimate beneficial shareholder of the chain. In the event that after the inclusion of the undistributed foreign personal holding company income of the Z Corporation in the gross income of the Y Corporation, the Y Corporation is not a foreign personal holding company, then no part of the income of either the Z Corporation or the Y Corporation would be includible in the gross income of the X Corporation. In that event, whether the X Corporation is a foreign personal holding company, and its undistributed foreign personal holding company income, would be determined independently of the income of the Y Corporation and the Z Corporation.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.556–1 Definition.

Undistributed foreign personal holding company income is the amount which is to be included in the gross income of the United States shareholders under section 551(b) and § 1.551–2. Undistributed foreign personal holding company income is the taxable income of the foreign personal holding company, as defined in section 63(a)(computed without regard to subchapter N, chapter 1 of the Code), and adjusted in the manner described in

section 556(b) and § 1.556–2, less the deduction for dividends paid (§§ 1.561–1 through 1.565–6). See § 1.556–3 for an illustration of the computation of undistributed foreign personal holding company income.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.556–2 Adjustments to taxable income.

(a) **Taxes—(1) General rule.** (i) In computing undistributed foreign personal holding company income for any taxable year, there shall be allowed as a deduction the Federal income and excess profits taxes accrued during the taxable year except that no deduction shall be allowed for (a) the accumulated earnings tax imposed by section 531 (or a corresponding section of a prior law), (b) the personal holding company tax imposed by section 541 (or a corresponding section of a prior law), and (c) the excess profits tax imposed by subchapter E, chapter 2 of the Internal Revenue Code of 1939 for taxable years beginning after December 31, 1940. The deduction is for taxes for the taxable year determined under the accrual method of accounting, regardless of whether the corporation uses an accrual method of accounting, the cash receipts and disbursements method, or any other allowable method of accounting. In computing the amount of taxes accrued, an unpaid tax which is being contested is not considered accrued until the contest is resolved.

(ii) However, the corporation shall deduct taxes paid, rather than taxes accrued, if it used that method with respect to Federal taxes for each taxable year for which it was subject to the provisions of supplement P, subchapter C, chapter 1 of the Internal Revenue Code of 1939, unless an election is made under subparagraph (2) of this paragraph to deduct taxes accrued.

(2) Election by corporation which deducted taxes paid. (i) If the corporation was subject to supplement P, subchapter C, chapter 1 of the Internal Revenue Code of 1939, and, for the purpose of computing undistributed supplement P net income under such Code, deducted Federal taxes paid, rather than such taxes accrued, for each taxable year for which it was subject to supplement P of the 1939 Code, the corporation may elect for any taxable year ending after August 16, 1954, to deduct taxes accrued, rather than taxes paid, for the purpose of computing its undistributed foreign personal holding company income. The election shall be made by deducting such taxes accrued in the return (Form 958) required to be filed for such taxable year. The return shall, in addition, contain a statement that the corporation has made such election and shall set forth the year to which such election was first applicable. The deduction of taxes accrued in the year of election precludes the deduction of taxes paid during such year. The election, if made, shall be irrevocable and the deduction for taxes accrued shall be allowed for the year of election and for all subsequent taxable years. See section 6035 and the regulations thereunder for rules relative to the filing of returns of officers, directors, and shareholders of foreign personal holding companies.

(ii) Pursuant to section 7851(a)(1)(C), the election provided for in subdivision (i) of this subparagraph may be made with respect to a taxable year ending after August 16, 1954, even though such taxable year is subject to the Internal Revenue Code of 1939.

(3) Taxes of foreign countries and United States possessions. In computing taxable income, a foreign personal holding company is allowed a deduction under section 164 for income, war profits, and excess-profits taxes paid or accrued during the taxable year to foreign countries or possessions of the United States, but is not allowed the foreign tax credit under section 901. Therefore, in computing undistributed foreign personal holding company income for any taxable year, no adjustment under section 556(b)(1) is allowed for such taxes.

(b) Charitable contributions—(1) Taxable years beginning before January 1, 1970. (i) Section 556(b)(2) provides that, in computing the deduction for charitable contributions for purposes of determining the undistributed foreign personal holding company income of a corporation for taxable years beginning before January 1, 1970, the limitations in section 170(b)(1)(A) and (B), relating to charitable contributions by individuals, shall apply and section 170(b)(2) and (5), relating to charitable contributions by corporations and carryover of certain excess charitable contributions made by individuals, respectively, shall not apply.

(ii) Although the limitations of section 170(b)(1)(A) and (B) are 10 and 20 percent, respectively, of the individual's adjusted gross income, the limitations are applied for purposes of section 556(b)(2) by using 10 and 20 percent, respectively, of the corporation's taxable income as adjusted for purposes of section 170(b)(2), that is, the same amount of taxable income to which the 5-percent limitation applied. Thus, the term "adjusted gross income" when used in section 170(b)(1) means the corporation's taxable income computed with the adjustments, other than the

5-percent limitation, provided in the first sentence of section 170(b)(2). However, a further adjustment for this purpose is that the taxable income shall also be computed without the deduction of the amount disallowed under section 556(b)(5), relating to expenses and depreciation applicable to property of the taxpayer, and section 556(b)(6), relating to taxes and contributions to pension trusts, and without the inclusion of the amounts includible as dividends under section 555(b), relating to the inclusion in gross income of a foreign personal holding company of its distributive share of the undistributed foreign personal holding company income of another company in which it is a shareholder. The carryover of charitable contributions made in a prior year, otherwise allowable as a deduction in computing taxable income to the extent provided in section 170(b)(2) and, with respect to contributions paid in taxable years beginning after December 31, 1963, in section 170(b)(5), shall not be allowed as a deduction in computing undistributed foreign personal holding company income for any taxable year.

(iii) See § 1.170–2 with respect to the charitable contributions to which the 10-percent limitation is applicable and the charitable contributions to which the 20-percent limitation is applicable.

(2) Taxable years beginning after December 31, 1969. (i) Section 556(b)(2) provides that, in computing the deduction allowable for charitable contributions for purposes of determining the undistributed foreign personal holding company income of a corporation for taxable years beginning after December 31, 1969, the limitations in section 170(b)(1)(A), (B), and (D)(i)(relating to charitable contributions by individuals) shall apply, and section 170(b)(1)(D)(ii)(relating to excess charitable contributions by individuals of certain capital gain property), section 170(b)(2)(relating to the 5-percent limitation on charitable contributions by corporations), and section 170(d)(relating to carryovers of excess contributions of individuals and corporations) shall not apply.

(ii) Although the limitations of section 170(b)(1)(A), (B), and (D)(i) are 50, 20, and 30 percent, respectively, of an individual's contribution base, these limitations are applied for purposes of section 556(b)(2) by using 50, 20, and 30 percent, respectively, of the corporation's taxable income as adjusted for purposes of section 170(b)(2), that is, the same amount of taxable income to which the 5-percent limitation applies. Thus, the term "contribution base" when used in section 170(b)(1) means the corporation's taxable income computed with the adjustments, other than the 5-percent limitation, provided in section 170(b)(2). However, a further adjustment for this purpose is that the taxable income shall also be computed without the deduction of the amount disallowed under section 556(b)(5), relating to expenses and depreciation applicable to property of the taxpayer, and section 556(b)(6), relating to taxes and contributions to pension trusts, and without the inclusion of the amounts includible as dividends under section 555(b), relating to the inclusion in gross income of a foreign personal holding company of its distributive share of the undistributed foreign personal holding company income of another company in which it is a shareholder. The carryover of charitable contributions made in a prior year, otherwise allowable as a deduction in computing taxable income to the extent provided in section 170(b)(1)(D)(ii) and (d), shall not be allowed as a deduction in computing undistributed foreign personal holding company income for any taxable year.

(iii) See § 1.170A–8 for the rules with respect to the charitable contributions to which the 50-, 20-, and 30-percent limitations apply.

(c) Special deductions disallowed. Part VIII, subchapter B, chapter 1 of the Code allows corporations special deductions in computing taxable income for such matters as partially tax-exempt interest, certain dividends received, dividends paid on certain preferred stock of public utilities, organizational expenses, etc. See section 241. For purposes of computing undistributed foreign personal holding company income, such special deductions, except the deduction provided by section 248 (relating to organizational expenditures) and, with respect to such a computation for a taxable year ending before January 1, 1958, the deduction provided by section 242 (relating to partially tax-exempt interest), shall be disallowed.

(d) Net operating loss. The net operating loss deduction provided in section 172 is not allowed for purposes of the computation of undistributed foreign personal holding company income. For purposes of such a computation, however, there is allowed as a deduction the amount of the net operating loss (as defined in section 172(c)) for the preceding taxable year, except that, in computing undistributed foreign personal holding company income for a taxable year ending after December 31, 1957, the amount of such net operating loss shall be computed without the deductions provided in part VIII (section 241 and following) except section 248, relating to organizational expenditures, subchapter B, chapter 1 of the Code.

(e) **Expenses and depreciation applicable to property of the corporation.** (1) Section 556(b)(5) provides a specific limitation in computing undistributed foreign personal holding company income, with respect to the allowance of deductions for trade or business expenses and depreciation which are allocable to the operation and maintenance of property owned or operated by a foreign personal holding company. Under this limitation these deductions shall not be allowed in excess of the aggregate amount of the rent or other compensation received for the use of, or the right to use, the property, unless it is established to the satisfaction of the Commissioner—

(i) That the rent or other compensation received was the highest obtainable, or if none was received, that none was obtainable;

(ii) That the property was held in the course of a business carried on bona fide for profit; and

(iii) Either that there was reasonable expectation that the operation of the property would result in a profit, or that the property was necessary to the conduct of the business.

(2) The burden of proof will rest upon the taxpayer to sustain the deduction claimed. If a United States shareholder, in computing his distributive share of undistributed foreign personal holding company income to be included in gross income in his individual return (see section 551, and §§ 1.551–1 and 1.551–2), claims deductions for expenses and depreciation allocable to the operation and maintenance of property owned or operated by the company, in an aggregate amount in excess of the rent or other compensation received for the use of, or the right to use, the property, he shall attach to his income tax return a statement setting forth his claim for allowance of the additional deductions, together with a complete statement of the facts and circumstances pertinent to his claim and the arguments on which he relies. Such statement shall set forth—

(i) A description of the property;

(ii) The cost or other basis to the corporation and the nature and value of the consideration paid for the property;

(iii) The name and address of the person from whom the property was acquired and the date the property was acquired;

(iv) The name and address of the person to whom the property is leased or rented, or the person permitted to use the property, and the number of shares of stock, if any, held by such person and the members of his family;

(v) The nature and gross amount of the rent or other compensation received for the use of, or the right to use, the property during the taxable year and for each of the five preceding years and the amount of the expenses incurred with respect to, and the depreciation sustained on, the property for such years;

(vi) Evidence that the rent or other compensation was the highest obtainable, or, if none was received, a statement of the reasons therefor;

(vii) A copy of the contract, lease or rental agreement;

(viii) The purpose for which the property was used;

(ix) The business carried on by the corporation with respect to which the property was held and the gross income, expenses, and taxable income derived from the conduct of such business for the taxable year and for each of the five preceding years;

(x) A statement of any reasons which existed for expectation that the operation of the property would be profitable, or a statement of the necessity for the use of the property in the business of the corporation, and the reasons why the property was acquired; and

(xi) Any other information pertinent to the taxpayer's claim.

(f) **Taxes and contributions to pension trusts.** Section 164(e) provides for deduction by a corporation for taxes of a shareholder paid by it; section 404 provides for deduction by an employer for its contributions to an employees' trust, etc. For the purpose of computing undistributed foreign personal holding company income, neither of these deductions is allowable.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6900, 31 FR 14644, Nov. 17, 1966; T.D. 7207, 37 FR 20796, Oct. 5, 1972]

§ 1.556–3 Illustration of computation of undistributed foreign personal holding company income.

The method of computation of the undistributed foreign personal holding company income may be illustrated by the following example:

Example. (a) The following facts exist with respect to the M Corporation, a foreign personal holding company, for the calendar year 1954:

(1) The gross income of the corporation as defined in section 555 amounts to $300,000, of which $85,000 represents its distributive share of the undistributed foreign personal holding company income of another foreign personal holding company in which it is a shareholder, $200,000 consists of dividends, $10,000 consists of fully taxable interest, and the remainder ($5,000) consists of rent received from the principal shareholder of the corporation for the use of property owned by the corporation.

(2) The expenses of the corporation amount to $85,000, of which $75,000 is allocable to the maintenance and operation of the property used by the principal shareholder and $10,000 consists of ordinary and necessary office expenses allowable as a deduction. The claim for deduction for the expenses of, and depreciation on, the rented property in excess of the rent received for its use is not established as provided in section 556(b)(5). The yearly depreciation on the rented property amounts to $30,000.

(3) Federal income tax withheld at the source on the income of the corporation from sources within the United States amounts to $59,125.

(4) No gain from the sale or exchange of stock or securities is realized during the taxable year, but losses in the amount of $10,000 are sustained from the sale of stock or securities which constitute capital assets. Such losses are not allowed as a deduction in any amount. See section 1211(a).

(5) Contributions, payment of which is made to or for the use of donees described in section 170(b)(1)(A) for the purposes therein specified, amount to $15,000, of which $5,000 is deductible in computing taxable income under section 63.

(6) Dividends paid by the corporation to its shareholders during the taxable year amount to $50,000.

(b) The taxable income of the corporation (including the distributive share of the undistributed foreign personal holding company income of the other foreign personal holding company) is $180,000, computed as follows (assuming for the purposes of this example only that the expenses of, and depreciation on, the rental property are deductible under sections 162 and 167):

Income (Section 61)	
Dividends	$200,000
Interest	10,000
Rent	5,000
Gross income as defined in section 61	215,000
Add:	
Distributive share of undistributed income of the other foreign personal holding company (considered as a dividend)	$85,000
Gross income as defined in section 555	300,000
Deductions (Section 161)	
Expenses allocable to operation of the rented property	$75,000
Depreciation of the rented property	30,000
Ordinary and necessary expenses (office)	10,000
Contributions (within the 5-percent limitation specified in section 170(b)(2)	5,000
	120,000
Taxable income for purposes of computing undistributed foreign personal holding company income	180,000

(c) The undistributed foreign personal holding company income of the corporation is $160,875, computed as follows:

Taxable income for purposes of computing undistributed foreign personal holding company income	$180,000
Add (see section 556(b)):	
Contributions deductible in computing taxable income under section 63	5,000
Excess property expenses and depreciation over amount of rent received for use of property ($105,000 – $5,000)	100,000
Total	105,000
Deduct (see section 556(b)):	
Federal income taxes	59,125
Contributions (within the percentage limitations specified in section 170(b)(1)(A) and (B), determined under the rules provided in section 556(b)(2))	15,000
Total	74,125
Net additions under section 556(b)	30,875
Taxable income, as adjusted under section 556(b)	210,875
Less: Deduction for dividends paid (see section 561)	50,000
Undistributed foreign personal holding company income	160,875

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

Deduction For Dividends Paid

§ 1.561–1 Deduction for dividends paid.

(a) The deduction for dividends paid is applicable in determining accumulated taxable income under section 535, undistributed personal holding company income under section 545, undistributed foreign personal holding company income under section 556, investment company taxable income under section 852, and real estate investment trust taxable income under section 857. The deduction for dividends paid includes—

(1) The dividends paid during the taxable year;

(2) The consent dividends for the taxable year, determined as provided in section 565; and

(3) In the case of a personal holding company, the dividend carryover computed as provided in section 564.

(b) For dividends for which the dividends paid deduction is allowable, see section 562 and § 1.562–1. As to when dividends are considered paid, see § 1.561–2.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4093, April 28, 1962]

§ 1.561–2 When dividends are considered paid.

(a) *In general.* (1) A dividend will be considered as paid when it is received by the shareholder. A deduction for dividends paid during the taxable year will not be permitted unless the shareholder receives the dividend during the taxable year for which the deduction is claimed. See section 563 for special rule with respect to dividends paid after the close of the taxable year.

(2) If a dividend is paid by check and the check bearing a date within the taxable year is deposited in the mails, in a cover properly stamped and addressed to the shareholder at his last known address, at such time that in the ordinary handling of the mails the check would be received by the shareholder within the taxable year, a presumption arises that the dividend was paid to the shareholder in such year.

(3) The payment of a dividend during the taxable year to the authorized agent of the shareholder will be deemed payment of the dividend to the shareholder during such year.

(4) If a corporation, instead of paying the dividend directly to the shareholder, credits the account of the shareholder on the books of the corporation with the amount of the dividend, the deduction for a dividend paid will not be permitted unless it be shown to the satisfaction of the Commissioner that such crediting constituted payment of the dividend to the shareholder within the taxable year.

(5) A deduction will not be permitted for the amount of a dividend credited during the taxable year upon an obligation of the shareholder to the corporation unless it is shown to the satisfaction of the Commissioner that such crediting constituted payment of the dividend to the shareholder within the taxable year.

(6) If the dividend is payable in obligations of the corporation, they should be entered or registered in the taxable year on the books of the corporation, in the name of the shareholder (or his nominee or transferee), and, in the case of obligations payable to bearer, should be received in the taxable year by the shareholder (or his nominee or transferee) to constitute payment of the dividend within the taxable year.

(7) In the case of a dividend from which the tax has been deducted and withheld as required by chapter 3 (section 1441 and following), of the Code the dividend is considered as paid when such deducting and withholding occur.

(b) Methods of accounting. The determination of whether a dividend has been paid to the shareholder by the corporation during its taxable year is in no way dependent upon the method of accounting regularly employed by the corporation in keeping its books or upon the method of accounting upon the basis of which the taxable income of the corporation is computed.

(c) Records. Every corporation claiming a deduction for dividends paid shall keep such permanent records as are necessary (1) to establish that the dividends with respect to which such deduction is claimed were actually paid during the taxable year and (2) to supply the information required to be filed with the income tax return of the corporation. Such corporation shall file with its return (i) a copy of the dividend resolution; and (ii) a concise statement of the pertinent facts relating to the payment of the dividend, clearly specifying (a) the medium of payment and (b) if not paid in money, the fair market value and adjusted basis (or face value, if paid in its own obligations) on the date of distribution of the property distributed and the manner in which such fair market value and adjusted basis were determined. Canceled dividend checks and receipts obtained from shareholders acknowledging payment of dividends paid otherwise than by check need not be filed with the return but shall be kept by the corporation as a part of its records.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.562–1 Dividends for which the dividends paid deduction is allowable.

(a) General rule. Except as otherwise provided in section 562(b) and (d), the term "dividend", for purposes of determining dividends eligible for the dividends paid deduction, refers only to a dividend described in section 316 (relating to definition of dividends for purposes of corporate distributions). No distribution, however, which is preferential within the meaning of section 562(c) and § 1.562–2 shall be eligible for the dividends paid deduction. Moreover, when computing the dividends paid deduction with respect to a U.S. person (as defined in section 957(d)), no distribution which is excluded from the gross income of a foreign corporation under section 959(b) with respect to such person or from gross income of such person under section 959(a) shall be eligible for such deduction. Further, for purposes of the dividends paid deduction, the term "dividend" does not include a distribution in liquidation unless the distribution is treated as a dividend under section

316(b)(2) and paragraph (b)(2) of § 1.316–1, or under section 333(e)(1) and paragraph (c) of § 1.333–4 or paragraph (c)(2), (d)(1)(ii), or (d)(2) of § 1.333–5, or qualifies under section 562(b) and paragraph (b) of this section. If a dividend is paid in property (other than money) the amount of the dividends paid deduction with respect to such property shall be the adjusted basis of the property in the hands of the distributing corporation at the time of the distribution. See paragraph (b)(2) of this section for special rules with respect to liquidating distributions by personal holding companies occurring during a taxable year of the distributing corporation beginning after December 31, 1963. Also see section 563 for special rules with respect to dividends paid after the close of the taxable year.

(b) Distributions in liquidation—(1) General rule—(i) In general. In the case of amounts distributed in liquidation by any corporation during a taxable year of such corporation beginning before January 1, 1964, or by a corporation other than a personal holding company (as defined in section 542) or a foreign personal holding company (as defined in section 552) during a taxable year of such a corporation beginning after December 31, 1963, section 562(b) makes an exception to the general rule that a deduction for dividends paid is permitted only with respect to dividends described in section 316. In order to qualify under that exception, the distribution must be one either in complete or partial liquidation of a corporation pursuant to sections 331, 332, or 333. See subparagraph (2) of this paragraph for rules relating to the treatment of distributions in complete liquidation made by a corporation which is a personal holding company to corporate shareholders during a taxable year of such distributing corporation beginning after December 31, 1963. As provided by section 346(a), for the purpose of section 562(b), a partial liquidation includes a redemption of stock to which section 302 applies. Amounts distributed in liquidation in a transaction which is preceded, or followed, by a transfer to another corporation of all or part of the assets of the liquidating corporation, may not be eligible for the dividends paid deduction.

(ii) Amount of dividends paid deduction allowable—(a) General rule. In the case of distributions in liquidation with respect to which a deduction for dividends paid is permissible under subdivision (i) of this subparagraph, the amount of the deduction is equal to the part of such distribution which is properly chargeable to the earnings and profits accumulated after February 28, 1913. To determine the amount properly chargeable to the earnings and profits accumulated after February 28, 1913, there must be deducted from the amount of the distribution that part allocable to capital account. The capital account, for the purposes of this subdivision, includes not only amounts representing the par or stated value of the stock with respect to which the liquidation distribution is made, but also that stock's proper share of the paid-in surplus, and such other corporate items, if any, which, for purposes of income taxation, are treated like capital in that they are not taxable dividends when distributed but are applied against and reduce the basis of the stock. The remainder of the distribution in liquidation is, ordinarily, properly chargeable to the earnings and profits accumulated after February 28, 1913. Thus, if there is a deficit in earnings and profits on the first day of a taxable year, and the earnings and profits for such taxable year do not exceed such deficit, no dividends paid deduction would be allowed for such taxable year with respect to a distribution in liquidation; if the earnings and profits for such taxable year exceed the deficit in earnings and profits which existed on the first day of such taxable year, then a dividends paid deduction would be allowed to the extent of such excess.

(b) Special rule. Section 562(b)(1)(B) provides that in the case of a complete liquidation occurring within 24 months after the adoption of a plan of liquidation the amount of the deduction is equal to the earnings and profits for each taxable year in which distributions are made. Thus, if there is a distribution in liquidation pursuant to section 333, or a distribution in complete liquidation pursuant to section 331(a)(1) or 332 which occurs within a 24-month period after the adoption of a plan of liquidation, a dividends paid deduction will be allowable to the extent of the current earnings and profits for the taxable year or years even though there was a deficit in earnings and profits on the first day of such taxable year or years. In computing the earnings and profits for the taxable year in which the distributions are made, computation shall be made with the inclusion of capital gains and without any deduction for capital losses.

(c) Examples. The application of this subparagraph may be illustrated by the following examples:

Example (1). The Y Corporation, which makes its income tax returns on the calendar year basis, was organized on January 1, 1910, with an authorized and outstanding capital stock of 2,000 shares of common stock of a par value of $100 each and 1,000 shares of participating preferred stock of a par value of $100 each. The preferred stock was to receive annual dividends of $7 per share and $100 per share on complete liquidation of the corporation in priority to any payments on

common stock, and was to participate equally with the common stock in either instance after the common stock had received a similar amount. However, the preferred stock was redeemable in whole or in part at the option of the board of directors at any time at $106 per share plus its proportion of the earnings of the company at the time of such redemption. In 1910 the preferred stock was issued at $106 per share, for a total of $106,000 and the common stock was issued, at $100 per share, for a total of $200,000. On July 15, 1954, the company had a paid-in surplus of $6,000, consisting of the premium received on the preferred stock; earnings and profits of $30,000 accumulated prior to March 1, 1913; and earnings and profits accumulated since February 28, 1913, of $75,000. On July 15, 1954, the option with respect to the preferred stock was exercised and the entire amount of such stock was redeemed at $141 per share or a total of $141,000 in a transaction upon which gain or loss to the distributees resulting from the exchange was determined and recognized under section 302(a). The amount of the distribution allocable to capital account was $116,000 ($100,000 attributable to par value, $6,000 attributable to paid-in surplus, and $10,000 attributable to earnings and profits accumulated prior to March 1, 1913). The remainder, $25,000 ($141,000, the amount of the distribution, less $116,000, the amount allocable to capital account) is properly chargeable to the earnings and profits accumulated since February 28, 1913, and is deductible as dividends paid.

Example (2). The M Corporation, a calendar year taxpayer, is completely liquidated on November 1, 1955, pursuant to a plan of liquidation adopted April 1, 1955. On January 1, 1955, the M Corporation has a deficit in earnings and profits of $100,000. During the period January 1, 1955, to the date of liquidation, November 1, 1955, it has earnings and profits of $10,000. The M Corporation is entitled to a dividends paid deduction in the amount of $10,000 as a result of its distribution in complete liquidation on November 1, 1955.

Example (3). The N Corporation, a calendar year taxpayer, is completely liquidated on July 1, 1958, pursuant to a plan of liquidation adopted February 1, 1955. No distributions in liquidation were made pursuant to the plan of liquidation adopted February 1, 1955, until the distribution in complete liquidation on July 1, 1958. On January 1, 1958, N Corporation had a deficit in earnings and profits of $30,000. During the period January 1, 1958, to the date of liquidation, July 1, 1958, the N Corporation has earnings and profits of $5,000. The N Corporation is not entitled to any deduction for dividends paid as a result of the distribution in complete liquidation on July 1, 1958. If the earnings and profits for the period January 1, 1958, to July 1, 1958, had been $32,000, the N Corporation would have been entitled to a deduction for dividends paid in the amount of $2,000.

(2) Special rule—(i) Distributions to corporate shareholders. In the case of amounts distributed in complete liquidation of a personal holding company (as defined in section 542) within 24 months after the adoption of a plan of liquidation, section 562(b)(2) makes a further exception to the general rule that a deduction for dividends paid is permitted only with respect to dividends described in section 316. The exception referred to in the preceding sentence applies only to distributions made in any taxable year of the distributing corporation beginning after December 31, 1963. Under the exception, the amount of any distribution within the 24-month period pursuant to the plan shall be treated as a dividend for purposes of computing the dividends paid deduction, but:

(a) Only to the extent that such amount is distributed to corporate distributees, and

(b) Only to the extent that such amount represents such corporate distributees' allocable share of undistributed personal holding company income for the taxable year of such distribution (computed without regard to section 316(b)(2)(B) and section 562(b)(2)).

Amounts distributed in liquidation in a transaction which is preceded, or followed, by a transfer to another corporation of all or part of the assets of the liquidating corporation, may not be eligible for the dividends paid deduction.

(ii) Corporate distributees' allocable share. For purposes of subdivision (i)(b) of this subparagraph—

(a) Except as provided in (b) of this subdivision, the corporate distributees' allocable share of undistributed personal holding company income for the taxable year of the distribution (computed without regard to sections 316(b)(2)(B) and 562(b)(2)) shall be determined by multiplying such undistributed personal holding company income by the ratio which the aggregate value of the stock held by all corporate shareholders immediately before the record date of the last liquidating distribution in such year bears to the total value of all stock outstanding on such date. For rules applicable in a case where the distributing corporation has more than one class of stock, see (c) of this subdivision (ii).

(b) If more than one liquidating distribution was made during the year, and if, after the record date of the first distribution but before the record date of the last distribution, there was a change in the relative shareholdings as between corporate shareholders and noncorporate shareholders, then the corporate distributees' allocable share of undistributed personal holding company income for the taxable year of the distributions (computed without regard to sections 316(b)(2)(B) and 562(b)(2)) shall be determined as follows:

(1) First, allocate the corporation's undistributed personal holding company income for the taxable year among the distributions made during such year by reference to the ratio which the aggregate amount of each distribution bears to the total amount of all distributions during such year;

(2) Second, determine the corporate distributees' allocable share of the corporation's undistributed personal holding company income for each

distribution by multiplying the amount determined under (1) of this subdivision (b) for each distribution by the ratio which the aggregate value of the stock held by all corporate shareholders immediately before the record date of such distribution bears to the total value of all stock outstanding on such date; and

(3) Last, determine the sum of the corporate distributees' allocable share of the corporation's undistributed personal holding company income for all such distributions.

For rules applicable in a case where the distributing corporation has more than one class of stock, see (c) of this subdivision (ii).

(c) Where the distributing corporation has more than one class of stock—

(1) The undistributed personal holding company income for the taxable year in which, or in respect of which, the distribution was made shall be treated as a fund from which dividends may properly be paid and shall be allocated between or among the classes of stock in a manner consistent with the dividend rights of such classes under local law and the pertinent governing instruments, such as, for example, the distributing corporation's articles or certificate of incorporation and bylaws;

(2) The corporate distributees' allocable share of the undistributed personal holding company income for each class of stock shall be determined separately in accordance with the rules set forth in (a) and (b) of this subdivision (ii) as if each class of stock were the only class of stock outstanding; and

(3) The sum of the corporate distributees' allocable share of the undistributed personal holding company income for the taxable year in which, or in respect of which, the distribution was made shall be the sum of the corporate distributees' allocable share of the undistributed personal holding company income for all classes of stock.

(d) For purposes of this subdivision (ii), in any case where the record date of a liquidating distribution cannot be ascertained, the record date of the distribution shall be the date on which the liquidating distribution was actually made.

(iii) Example. The application of this subparagraph may be illustrated by the following example:

Example. O Corporation, a calendar year taxpayer is completely liquidated on December 31, 1964, pursuant to a plan of liquidation adopted July 1, 1964. No distributions in liquidation were made pursuant to the plan of liquidation adopted July 1, 1964, until the distribution in complete liquidation on December 31, 1964. O Corporation has undistributed personal holding company income of $300,000 for the year 1964 (computed without regard to section 316(b)(2)(B) and section 562(b)(2)). On December 31, 1964, immediately before the record date of the distribution in complete liquidation, P Corporation owns 100 shares of O Corporation's outstanding stock and individual A owns the remaining 200 shares. All shares are equal in value. The amount which represents P Corporation's allocable share of undistributed personal holding company income is $100,000(100 shares ÷ 300 shares × $300,-000), and for purposes of computing the dividends paid deduction, such amount is treated as a dividend under section 562(b)(2) provided that the liquidating distribution to P Corporation equals or exceeds $100,000. P Corporation does not treat the $100,000 distributed to it as a dividend to which section 301 applies. For an example of the treatment of the distribution to individual A see example (5) of paragraph (e) of § 1.316–1.

(iv) Distributions to noncorporate shareholders. For the rules for determining the extent to which distributions in complete liquidation made to noncorporate shareholders by a personal holding company are dividends within the meaning of section 562(a), see section 316(b)(2)(B) and paragraph (b)(2) of § 1.316–1.

(c) **Special definition of dividend for nonliquidating distributions by personal holding companies.** Section 316(b)(2)(A) provides that in the case of a corporation which, under the law applicable to the taxable year in which or in respect of which a distribution is made, is a personal holding company, the term "dividend" (in addition to the general meaning set forth in section 316(a)) also means a nonliquidating distribution to its shareholders to the extent of the corporation's undistributed personal holding company income (determined under section 545 without regard to such distributions) for the taxable year in which or in respect of which the distribution is made. See paragraph (b)(1) of § 1.316–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6949, 33 FR 5529, April 9, 1968; T.D. 7767, 46 FR 11265, Feb. 6, 1981]

§ 1.562–2 Preferential dividends.

(a) Section 562(c) imposes a limitation upon the general rule that a corporation is entitled to a deduction for dividends paid with respect to all dividends which it actually pays during the taxable year. Before a corporation may be entitled to any such deduction with respect to a distribution regardless of the medium in which the distribution is made, every shareholder of the class of stock with respect to which the distribution is made must be treated the same as every other shareholder of that class, and no class of stock may be treated otherwise than in accordance with its dividend rights as a class. The limitation imposed by section 562(c) is unqualified, except in the case of an actual

distribution made in connection with a consent distribution (see section 565), if the entire distribution composed of such actual distribution and consent distribution is not preferential. The existence of a preference is sufficient to prohibit the deduction regardless of the fact (1) that such preference is authorized by all the shareholders of the corporation or (2) that the part of the distribution received by the shareholder benefited by the preference is taxable to him as a dividend. A corporation will not be entitled to a deduction for dividends paid with respect to any distribution upon a class of stock if there is distributed to any shareholder of such class (in proportion to the number of shares held by him) more or less than his pro rata part of the distribution as compared with the distribution made to any other shareholder of the same class. Nor will a corporation be entitled to a deduction for dividends paid in the case of any distribution upon a class of stock if there is distributed upon such class of stock more or less than the amount to which it is entitled as compared with any other class of stock. A preference exists if any rights to preference inherent in any class of stock are violated. The disallowance, where any preference in fact exists, extends to the entire amount of the distribution and not merely to a part of such distribution. As used in this section, the term "distribution" includes a dividend as defined in subchapter C, chapter 1 of the Code, and a distribution in liquidation referred to in section 562(b).

(b) The application of the provisions of section 562(c) may be illustrated by the following examples:

Example (1). A, B, C, and D are the owners of all the shares of class A common stock in the M Corporation, which makes its income tax returns on a calendar year basis. With the consent of all the shareholders, the M Corporation on July 15, 1954, declared a dividend of $5 a share payable in cash on August 1, 1954, to A. On September 15, 1954, it declared a dividend of $5 a share payable in cash on October 1, 1954, to B, C, and D. No allowance for dividends paid for the taxable year 1954 is permitted to the M Corporation with respect to any part of the dividends paid on August 1, 1954, and October 1, 1954.

Example (2). The N Corporation, which makes its income tax returns on the calendar year basis, has a capital of $100,000 (consisting of 1,000 shares of common stock of a par value of $100) and earnings or profits accumulated after February 28, 1913, in the amount of $50,000. In the year 1954, the N Corporation distributes $7,500 in cancellation of 50 shares of the stock owned by three of the four shareholders of the corporation. No deduction for dividends paid is permissible under section 562(c) and paragraph (a) of this section with respect to such distribution.

Example (3). The P Corporation has two classes of stock outstanding, 10 shares of cumulative preferred, owned by E, entitled to $5 per share and on which no dividends have been paid for two years, and 10 shares of common, owned by F. On December 31, 1954, the corporation distributes a dividend of $125, $50 to E, and $75 to F. The corporation is entitled to no deduction for any part of such dividend paid, since there has been a preference to F. If, however, the corporation had distributed $100 to E and $25 to F, it would have been entitled to include $125 as a dividend paid deduction.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.562–3 Distributions by a member of an affiliated group.

A personal holding company which files or is required to file a consolidated return with other members of an affiliated group may be required to file a separate personal holding company schedule by reason of the limitations and exceptions provided in section 542(b) and § 1.542–4. Section 562(d) provides that in such case the dividends paid deduction shall be allowed to the personal holding company, with respect to a distribution made to any member of the affiliated group, if such distribution would constitute a dividend if it were made to a shareholder which is not a member of the affiliated group.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.563–1 Accumulated earnings tax.

In the determination of the dividends paid deduction for purposes of the accumulated earnings tax imposed by section 531, a dividend paid after the close of any taxable year and on or before the 15th day of the third month following the close of such taxable year shall be considered as paid during such taxable year, and shall not be included in the computation of the dividends paid deduction for the year of payment. However, the rule provided in section 563(a) is not applicable to dividends paid during the first two and one-half months of the first taxable year of the corporation subject to tax under chapter 1 of the Internal Revenue Code of 1954.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.563–2 Personal holding company tax.

In the case of a personal holding company subject to the provisions of section 541, dividends paid after the close of the taxable year and before the 15th day of the third month thereafter shall be included in the computation of the dividends paid deduction for the taxable year only if the taxpayer so elects in its return for such taxable year. The election shall be made by including such dividends in computing its dividends paid deduction. The amount of such dividends which may be included in computing the dividends paid deduction for the taxable year shall not exceed either—

(a) The undistributed personal holding company income of the corporation for the taxable year, computed without regard to this section, or

(b) In the case of a taxable year beginning after December 31, 1969, 20 percent (10 percent, in the case of a taxable year beginning before Jan. 1, 1970) of the sum of the dividends paid during the taxable year (not including consent dividends), computed without regard to this section.

In computing the amount of the dividends paid deduction allowable for any taxable year, the amount allowed by reason of section 563(b) for any preceding taxable year is considered a dividend paid in such preceding taxable year and not in the year of actual distribution. Thus, a double deduction is not allowable.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7079, 35 FR 18587, Dec. 8, 1970]

§ 1.563-3 Dividends considered as paid on last day of taxable year.

(a) **General rule.** Where a distribution made after the close of the taxable year is considered as paid during such taxable year, for purposes of applying section 562(a) the distribution shall be considered as made on the last day of such taxable year.

(b) **Personal holding company tax.** In the case of a corporation which under the law applicable to the taxable year in respect of which a distribution is made under section 563(b) and § 1.563-2 is a personal holding company under the law applicable to such taxable year, section 316(b)(2) provides that the term dividend means (in addition to the general rule under section 316(a)) any distribution to the extent of the corporation's undistributed personal holding company income (determined under section 545 without regard to distributions under section 316(b)(2)) for such year. See paragraph (b) of § 1.316-1.

(c) **Dividends paid on or before December 15, 1955.** The Act of June 15, 1955 (Public Law 74, 84th Cong., 69 Stat. 136), repealed sections 452 and 462 of the Code, relating to prepaid income and reserve for estimated expenses. Under section 4(c)(4) of that Act, dividends paid after the 15th day of the third month following the close of the taxable year and on or before December 15, 1955, may be treated as having been paid on the last day of the taxable year for purposes of the accumulated earnings tax or the personal holding company tax and in the case of regulated investment companies, but only to the extent that such dividends are attributable to an increase in taxable income for the taxable year by reason of the repeal of sections 452 and 462. See paragraph (b) of § 1.9000-8, relating to treatment of certain dividends, prescribed pursuant to section 4(c)(4) of the Act of June 15, 1955.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.564-1 Dividend carryover.

(a) **General rule.** The dividend carryover from the two preceding years, allowable only to personal holding companies, is includible in the dividends paid deduction under section 561. It is computed as follows:

(1) If, for each of the preceding two years, the deduction for dividends paid under section 561 (determined without regard to the dividend carryover to each such year) exceeds the taxable income (adjusted as provided in section 545 for purposes of determining undistributed personal holding company income) then the dividend carryover to the taxable year is the sum of both such excess amounts.

(2) If the deduction for dividends paid under section 561 for the second preceding year (determined without regard to the dividend carryover to such year) exceeds the taxable income for such year (adjusted as provided in section 545), and if the taxable income for the first preceding year (as so adjusted) exceeds the dividends paid deduction for such first preceding year (as so determined), then the dividend carryover to the taxable year shall be such excess amount for the second preceding year, less such excess amount for the first preceding year.

(3) If for the first preceding year the deduction for dividends paid under section 561 (determined without regard to the dividend carryover to such year) exceeds the taxable income (adjusted as provided in section 545) for such year, and such excess is not present in the second preceding year, then the dividend carryover to the taxable year shall be such excess amount for the first preceding year.

(b) **Dividend carryover from year in which taxpayer was not a personal holding company.** In computing the dividend carryover, the taxable income as adjusted under section 545 of any preceding taxable year shall be determined as if the corporation was, under the law applicable to such taxable year, a personal holding company.

(c) **Dividend carryover from year in which taxpayer was subject to 1939 Code.** In a case where the first or the second preceding taxable year

began before the taxpayer's first taxable year under the Internal Revenue Code of 1954, the amount of the dividend carryover shall be determined under the Internal Revenue Code of 1939.

(d) **Statement to be filed with return.** Every corporation claiming a dividend carryover for any taxable year shall file with its return for such year a concise statement setting forth the amount of the dividend carryover claimed and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the dividend carryover claimed.

(e) **Computation of dividend carryover.** The computation of the dividend carryover may be illustrated by the following examples:

Example (1). The X Corporation, which files its income tax returns on the calendar year basis, has taxable income, adjusted as required by section 545, in the amount of $110,000 and has a dividends paid deduction of $150,000 for the year 1954. For 1955, its taxable income, adjusted as required by section 545, is $200,000 and its dividends paid deduction is $300,000. The dividend carryover to the year 1956 is $140,000, computed as follows:

Dividends paid deduction for 1954	$150,000
Taxable income for 1954	110,000
Dividend carryover from 1954	40,000
Dividends paid deduction for 1955	300,000
Taxable income for 1955	200,000
Dividend carryover from 1955	100,000
Dividend carryover for 2 preceding taxable years, allowable as a deduction for the year 1956	140,000

Example (2). The Y Corporation, which files its income tax returns on the calendar year basis, has taxable income, adjusted as required by section 545, in the amount of $100,000 and has a dividends paid deduction of $150,000 for the year 1954. For 1955, its taxable income, adjusted as required by section 545, is $200,000 and its dividends paid deduction is $170,000. The dividend carryover to the year 1956 is $20,000 computed as follows:

Dividends paid deduction for 1954	$150,000
Taxable income for 1954	100,000
Dividend carryover from 1954	50,000
Taxable income for 1955	200,000
Dividends paid deduction for 1955	170,000
Excess of taxable income over dividends paid deduction	30,000
Dividend carryover for second preceding taxable year, allowable as a deduction for the year 1956	20,000

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.565–1T General rule (temporary).

(a) **Consent dividends.** The dividends paid deduction, as defined in section 561, includes the consent dividends for the taxable year. A consent dividend is a hypothetical distribution (as distinguished from an actual distribution) made by:

(1) A corporation that has a reasonable basis to believe that it is subject to the accumulated earnings tax imposed in Part I of Subchapter G, Chapter 1 of the Code, or

(2) A corporation described in Part II (personal holding companies) or Part III (foreign personal holding companies) of Subchapter G or in Part I (regulated investment companies) or Part II (real estate investment trusts) of Subchapter M, Chapter 1 of the Code.

A consent dividend may be made by a corporation described in this paragraph to any person who owns consent stock on the last day of the taxable year of such corporation and who agrees to treat the hypothetical distribution as an actual dividend, subject to the limitations in section 565, § 1.565–2T, and paragraph (c)(2) of this section, by filing a consent at the time and in the manner specified in paragraph (b) of this section.

(b) **Making and filing of consents.** (1) A consent shall be made on Form 972 in accordance with this section and the instructions on the form issued therewith. It may be made only by or on behalf of a person who was the actual owner on the last day of the corporation's taxable year of any class of consent stock, that is, the person who would have been required to include in gross income any dividends on such stock actually distributed on the last day of such year. Form 972 shall contain or be verified by a written declaration that it is made under the penalties of perjury. In the consent such person must agree to include in gross income for his taxable year in which or with which the taxable year of the corporation ends a specific amount as a taxable dividend.

(2) See paragraph (c) of this section and § 1.565–2T for the rules as to when all or a portion of the amount so specified will be disregarded for tax purposes.

(3) A consent may be filed at any time not later than the due date of the corporation's income tax return for the taxable year for which the dividends paid deduction is claimed. With such return, and not later than the due date thereof, the corporation must file Forms 972 duly executed by each consenting shareholder, and a return on Form 973 showing by classes the stock outstanding on the first and last days of the taxable year, the dividend rights of such stock, distributions made during the taxable year to shareholders, and giving all the other information required by the form. Form 973 shall contain or be verified by a written

declaration that is made under the penalties of perjury.

(c) Taxability of amounts specified in consents. **(1)** The filing of a consent is irrevocable, and except as otherwise provided in section 565(b), § 1.565–2T, and paragraph (c)(2) of this section, the full amount specified in a consent filed by a shareholder of a corporation described in paragraph (a) of this section shall be included in the gross income of the shareholder as a taxable dividend. Where the shareholder is taxable on a dividend only if received from sources within the United States, the amount specified in the consent of the shareholder shall be treated as a dividend from sources within the United States in the same manner as if the dividend had been paid in money to the shareholder on the last day of the corporation's taxable year. See paragraph (b) of this section relating to the making and filing of consents, and section 565(e) and § 1.565–5T, with respect to the payment requirement in the case of nonresident aliens and foreign corporations.

(2) To the extent that the Commissioner determines that the corporation making a consent dividend is not a corporation described in paragraph (a) of this section, the amount specified in the consent is not a consent dividend and the amount specified in the consent will not be included in the gross income of the shareholder. In addition, where a corporation is described in paragraph (a)(1) of this section, but not paragraph (a)(2) of this section, to the extent that the Commissioner determines that the amount specified in a consent is larger than the amount of earnings subject to the accumulated earnings tax imposed by Part I of Subchapter G, such excess is not a consent dividend under paragraph (a) of this section and will not be included in the gross income of the shareholder.

(3) Except as provided in section 565(b), § 1.565–2T and paragraph (c)(2) of this section, once a shareholder's consent is filed, the full amount specified in such consent must be included in the shareholder's gross income as a taxable dividend, and the ground upon which a deduction for consent dividends is denied the corporation does not affect the taxability of a shareholder whose consent has been filed for the amount specified in the consent. For example, although described in Part I, II, or III, of Subchapter G, or Part I or II of subchapter M, Chapter I of the Code, the corporation's taxable income (as adjusted under section 535(b), 545(b), 556(b), 852(b)(2), or 857(b)(2), as appropriate) may be less than the total of the consent dividends.

(4) A shareholder who is a nonresident alien or a foreign corporation is taxable on the full amount of the consent dividend that otherwise qualifies under this section even though that payment has not been made as required by section 565(e) and § 1.565–5T.

(5) Income of a foreign corporation is not subject to the tax on accumulated earnings under Part I, of Subchapter G, Chapter 1 of the Code except to the extent of U.S. source income, adjusted as permitted under section 535. See section 535(b) and (d) and § 1.535–1(b). Therefore, foreign source earnings (other than those distributions subject to resourcing under section 535(d)) of a foreign corporation that is not described in paragraph (a)(2) of this section cannot qualify for consent dividend treatment. Accordingly, a consent dividend made by a foreign corporation described in paragraph (a)(1) of this section shall not be effective with respect to all of the corporation's earnings, but shall relate solely to earnings which would have been, in the absence of the consent dividend, subject to the accumulated earnings tax.

[T.D. 8166, 52 FR 47555, Dec. 15, 1987; T.D. 8166, 53 FR 1103, Jan. 15, 1988]

§ 1.565–2T Limitations (temporary).

(a) Amounts specified in consents filed by shareholders or other beneficial owners of a corporation described in § 1.565–1T(a) are not treated as consent dividends to the extent that—

(1) They would constitute a preferential dividend; or

(2) They would not constitute a dividend (as defined in section 316), if distributed in money to shareholders on the last day of the taxable year of the corporation. If any portion of any amount specified in a consent filed by a shareholder of a corporation described in the preceding sentence is not treated as a consent dividend under section 565(b) and this section, it is disregarded for all tax purposes. For example, it is not taxable to the consenting shareholder, and paragraph (c) of § 1.565–1T is not applicable to this portion of the amount specified in the consent.

(b)(1) A preferential distribution is an actual distribution, or a consent distribution, or a combination of the two, which involves a preference to one or more shares of stock as compared with other shares of the same class or to one class of stock as compared with any other class of stock. See section 562(c) and § 1.562–2.

(2) The application of section 565(b)(1) may be illustrated by the following examples:

Example (1). The X Corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has 200 shares of stock outstanding, owned by A and B in equal amounts. On December 15, 1987, the corporation distributes $600 to B and $100 to A. As a part of the same distribution, A executes a consent to include $500 in his gross income as a taxable dividend although such amount is not distributed to him. The X Corporation, assuming the other requirements of section 565 have been complied with, is entitled to a consent dividends deduction of $500. Although the consent dividend is deemed to have been paid on December 31, 1987, the last day of the taxable year of the corporation, they constitute a single nonpreferential distribution of $1200.

Example (2). The Y corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has one class of consent stock outstanding, owned in equal amounts by A, B, and C. On December 15, 1987, the corporation makes a distribution in cash of $5,000 each to A and B, and $3,000 to C. The distribution is preferential. If A and B, each receive a distribution in cash of $5,000 and C consents to include $3,000 in gross income as a taxable dividend, the combined actual and consent distribution is preferential. Similarly, if no one receives a distribution in cash, but A and B each consents to include $5,000 as a taxable dividend in gross income and C agrees to include only $3,000, the consent distribution is preferential.

Example (3). The Z Corporation, which makes its income tax returns on the calendar year basis and is subject, for the taxable year in question, to the accumulated earnings tax, has only two classes of stock outstanding, each class being consent stock and consisting of 500 shares. Class A, with a par value of $40 per share, is entitled to two-thirds of any distribution of earnings and profits. Class B, with a par value of $20 per share, is entitled to one-third of any distribution of earnings and profits. On December 15, 1987, there is distributed on the class B stock $2 per share, or $1,000, and shareholders of the class A stock consent to include in gross income amounts equal to $2 per share, or $1,000. The distribution is preferential, inasmuch as the class B stock has received more than its pro rata share of the combined amounts of the actual distributions and the consent distributions.

(c)(1) An additional limitation under section 565(b) is that the amounts specified in consents which may be treated as consent dividends cannot exceed the amounts which would constitute a dividend (as defined in section 316) if the corporation had distributed the total specified amounts in money to shareholders on the last day of the taxable year of the corporation. If only a portion of such total would constitute a dividend, then only a corresponding portion of each specified amount is treated as a consent dividend.

(2) The application of section 565(b)(2) may be illustrated by the following example:

Example. The X Corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has only one class of stock outstanding, owned in equal amounts by A and B. It makes no distributions during the taxable year 1987. Its earnings and profits for the calendar year 1987 amount to $8,000, there being at the beginning of such year no accumulated earnings or profits. A and B execute proper consents to include $5,000 each in their gross income as a dividend received by them on December 31, 1987. The sum of the amounts specified in the consents executed by A and B is $10,000, but if $10,000 had actually been distributed by the X corporation on December 31, 1987, only $8,000 would have constituted a dividend under section 316(a). The amount which could be considered as consent dividends in computing the dividends paid deduction for purposes of the accumulated earnings tax is limited to $8,000, or $4,000 of the $5,000 specified in each consent. The remaining $1,000 in each consent is disregarded for all tax purposes. The amount which could be considered as consent dividends in computing the dividends paid deduction for purposes of the personal holding company tax is $10,000 (assuming that the undistributed personal holding company income, determined without regard to distributions under section 316(b)(2), is equal to at least that amount). In that event, A and B would each include $5,000 in gross income as a dividend received on December 31, 1987.

[T.D. 8166, 52 FR 47556, Dec. 15, 1987; T.D. 8166, 52 FR 1103, Jan. 15, 1988]

§ 1.565–3T Effect of consent (temporary).

(a) The amount of the consent dividend that is described in paragraph (a) of § 1.565–1T shall be considered, for all purposes of the Code, as if it were distributed in money by the corporation to the shareholder on the last day of the taxable year of the corporation, received by the shareholder on such day, and immediately contributed by the shareholder as paid-in capital to the corporation on such day. Thus, the amount of the consent dividend will be treated by the shareholder as a dividend. The shareholder will be entitled to the dividends received deduction under section 243 or 245 with respect to such consent dividend. The basis of the shareholder's consent stock in a corporation will be increased by the amount thus treated in his hands as dividend which he is considered as having contributed to the corporation as paid-in capital. The amount of the current dividend will also be treated as a dividend received from sources within the United States in the same manner as if the dividend has been paid in money to the shareholders. Among other effects of the consent dividend, the earnings and profits of the corporation will be decreased by the amount of the consent dividends. Moreover, if the shareholder is a corporation, its accumulated earnings and profits will be increased by the amount of the consent dividend with respect to which it makes a consent.

(b) The application of section 565(c) to a corporate shareholder may be illustrated by the following example:

Example. Corporation A, a personal holding company and a calendar year taxpayer, has one shareholder, individual B, whose consent to include $10,000 in his gross income for the calendar year 1987 has been timely filed. A has $8,000 of

earnings and profits in 1987 and had no accumulated earnings and profits at the beginning of 1987. A has $10,000 of undistributed personal holding company income (determined without regard to distributions under section 316(b)(2)) for 1987. B must include $10,000 in his gross income as a taxable income and is treated as having immediately contributed $10,000 to A as paid-in capital. See section 316(b)(2).

[T.D. 8166, 52 FR 47556, Dec. 15, 1987]

§ 1.565–4 Consent dividends and other distributions.

Section 565(d) provides a rule applicable where a distribution is made in part in consent dividends and in part in money or other property. With respect to such a distribution the entire amount specified in the consents and the amount of such money or other property shall be considered together. Thus, if as a part of the same distribution consents are filed by some of the shareholders and cash is distributed to other shareholders, for example, those who may be unwilling to sign consents, the total amount of the cash and the amounts specified in the consents will be viewed as a single distribution to determine the tax effects of such distribution. For example, the total of such amounts must be considered to determine whether the distribution (including the amounts specified in the consents) is preferential and whether any part of such distribution would not be dividends if the total amounts specified in the consents were distributed in cash. See paragraph (b)(2) of § 1.565–2 for examples illustrating the treatment of distributions which consist in part of consent dividends and in part of other property.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.565–5T Nonresident aliens and foreign corporations (temporary).

In the event that any consent filed by a corporation that is described in paragraph (a) of § 1.565–1T is made by a shareholder to whom the payment of a dividend in cash on the last day of the taxable year of the corporation would have made it necessary for the corporation to deduct and withhold any amount as a tax under section 1441 or section 1442, such consent, when filed by the corporation, must be accompanied by payment of the amount which would have been required to be deducted and withheld if the amount specified in such consent had, on the last day of the corporation's taxable year, been paid to the shareholder in cash as a dividend. Such payment must be in one of the following forms:

(a) Cash;

(b) United States postal money order;

(c) Certified check drawn on a domestic bank, provided that the law of the place where the bank is located does not permit the certification to be rescinded prior to presentation;

(d) A cashier's check of a domestic bank, or

(e) A draft on a domestic bank or a foreign bank maintaining a United States agency or branch and payable in United States funds.

The amount of such payment shall be credited against the tax imposed on the shareholder.

[T.D. 8166, 52 FR 47557, Dec. 15, 1987]

§ 1.565–6T Definitions (temporary).

(a) *Consent stock.* (1) The term "consent stock" includes what is generally known as common stock. It also includes participating preferred stock, the participation rights of which are unlimited.

(2) The definition of consent stock may be illustrated by the following example:

Example. If in the case of the X Corporation, a personal holding company, there is only one class of stock outstanding, it would all be consent stock. If, on the other hand, there were two classes of stock, class A and class B, and class A was entitled to 6 percent before any distribution could be made on class B, but class B was entitled to everything distributed after class A had received its 6 percent, only class B stock would be consent stock. Similarly, if class A, after receiving its 6 percent, was to participate equally or in some fixed proportion with class B until it had received a second 6 percent, after which class B alone was entitled to any further distributions, only class B stock would be consent stock. The same result would follow if the order of preferences were class A 6 percent, then class B 6 percent, then class A a second 6 percent, either alone or in conjunction with class B, then class B the remainder. If, however, class A stock is entitled to ultimate participation without limit as to amount, then it, too, may be consent stock. For example, if class A is to receive 3 percent and then share equally or in some fixed proportion with class B in the remainder of the earnings or profits distributed, both class A stock and class B stock are consent stock.

(b) *Preferred dividends.* (1) The term "preferred dividends" includes all fixed amounts (whether determined by percentage of par value, a stated return expressed in a certain number of dollars per share, or otherwise) the distribution of which on any class of stock is a condition precedent to a further distribution of earnings or profits (not including a distribution in partial or complete liquidation). A distribution, though expressed in terms of a fixed amount, is not a preferred dividend, however, unless it is preferred over a subsequent distribution within the taxable year upon some class or classes of stock other than one on which it is payable.

(2) The definition of preferred dividends may be illustrated by the following example:

Example. If, in the case of the X Corporation, there are only two classes of stock outstanding, class A and class B, and class A is entitled to a distribution of 6 percent of par, after which the balance of the earnings and profits are distributable on class B exclusively, class A's 6 percent is a preferred dividend. If the order of preferences is class A $6 per share, class B $6 per share, then class A and class B in fixed proportions until class A receives $3 more per share, then class B the remainder, all of class A's $9 per share and $6 per share of the amount distributable on class B are preferred dividends. The amount which class B is entitled to receive in conjunction with the payment to class A of its last $3 per share is not a preferred dividend, because the payment of such amount is preferred over no subsequent distribution except one made on class B itself. Finally, if a distribution must be $6 on class A, $6 on class B, then on class A and class B share and share alike, the distribution on class A of $6 and the distribution on class B of $6 are both preferred dividends.

[T.D. 8166, 52 FR 47557, Dec. 15, 1987]

BANKING INSTITUTIONS

Rules Of General Application To Banking Institutions

§ 1.581–1 Tax on banks.

A bank, as defined in section 581, is subject to the tax on corporations imposed by section 11. [T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.581–2 Mutual savings banks, building and loan associations, and cooperative banks.

(a) Mutual savings banks, building and loan associations, and cooperative banks not having capital stock represented by shares are subject to tax as in the case of other corporations. For special rules governing the taxation of a mutual savings bank conducting a life insurance business, see section 594 and § 1.594–1.

(b) While the general principles for determining the taxable income of a corporation are applicable to a mutual savings bank, a building and loan association, and a cooperative bank not having capital stock represented by shares, there are certain exceptions and special rules governing the computation in the case of such institutions. See section 593 and § 1.593–1 for special rules concerning additions to reserves for bad debts. See section 591 and § 1.591–1, relating to dividends paid by banking corporations, for special rules concerning deductions for amounts paid to, or credited to the accounts of, depositors or holders of withdrawable accounts as dividends. See also section 592 and § 1.592–1, relating to deductions for repayment of certain loans.

(c) For the purpose of computing the net operating loss deduction provided in section 172, any taxable year for which a mutual savings bank, building and loan association, or a cooperative bank not having capital stock represented by shares was exempt from tax shall be disregarded. Thus, no net operating loss carryover shall be allowed from a taxable year beginning before January 1, 1952, and, in the case of any taxable year beginning after December 31, 1951, the amount of the net operating loss carryback or carryover from such year shall not be reduced by reference to the income of any taxable year beginning before January 1, 1952.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.581–3 Definition of bank prior to September 28, 1962.

Prior to September 28, 1962, for purposes of sections 582 and 584, the term "bank" means a bank or trust company incorporated and doing business under the laws of the United States (including laws relating to the District of Columbia), of any State, or of any Territory, a substantial part of the business of which consists of receiving deposits and making loans and discounts, or of exercising fiduciary powers similar to those permitted to national banks under section 11(k) of the Federal Reserve Act (38 Stat. 262; 12 U.S.C. 248(k)), and which is subject by law to supervision and examination by State, Territorial, or Federal authority having supervision over banking institutions. Such term also means a domestic building and loan association.

[T.D. 6651, 28 FR 4950, May 17, 1963]

§ 1.582–1 Bad debts, losses, and gains with respect to securities held by financial institutions.

(a) **Bad debt deduction for banks.** A bank, as defined in section 581, is allowed a deduction for bad debts to the extent and in the manner provided by subsections (a), (b), and (c) of section 166 with respect to a debt which has become worthless in whole or in part and which is evidenced by a security (a bond, debenture, note, certificate, or other evidence of indebtedness to pay a fixed or determinable sum of money) issued by any corpo-

ration (including governments and their political subdivisions), with interest coupons or in registered form.

(b) Worthless stock in affiliated bank. For purposes of section 165(g)(1), relating to the deduction for losses involving worthless securities, if the taxpayer is a bank (as defined in section 581) and owns directly at least 80 percent of each class of stock of another bank, stock in such other bank shall not be treated as a capital asset.

(c) Pre-1970 sales and exchanges of bonds, etc., by banks. For taxable years beginning before July 12, 1969, with respect to the taxation under subtitle A of the Code of a bank (as defined in section 581), if the losses of the taxable year from sales or exchanges of bonds, debentures, notes, or certificates, or other evidences of indebtedness, issued by any corporation (including one issued by a government or political subdivision thereof), exceed the gains of the taxable year from such sales or exchanges, no such sale or exchange shall be considered a sale or exchange of a capital asset.

(d) Post-1969 sales and exchanges of securities by financial institutions. For taxable years beginning after July 11, 1969, the sale or exchange of a security is not considered the sale or exchange of a capital asset if such sale or exchange is made by a financial institution to which any of the following sections applies: Section 585 (relating to banks), 586 (relating to small business investment companies and business development corporations), or 593 (relating to mutual savings banks, domestic building and loan associations, and cooperative banks). This paragraph shall apply to determine the character of gain or loss from the sale or exchange of a security notwithstanding any other provision of subtitle A of the Code, such as section 1233 (relating to short sales). However, this paragraph shall have no effect in the determination of whether a security is a capital asset under section 1221 for purposes of applying any other provision of the Code, such as section 1232 (relating to original issue discount). For purposes of this paragraph, a security is a bond, debenture, note, or certificate or other evidence of indebtedness, issued by any person. See paragraphs (e) and (f) of this section for special transitional rules applicable, respectively, to banks and to small business investment companies and business development corporations.

(e) Transition rule for qualifying securities held by banks—(1) In general. Notwithstanding the provisions of paragraph (d) of this section, if the net long-term capital gain from sales and exchanges of qualifying securities exceeds the net short-term capital loss from such sales and exchanges in any taxable year beginning after July 11, 1969, such excess shall be treated as long-term capital gain, but in an amount not to exceed the net gain from sales and exchanges of securities in such year. For purposes of computing such net gain, a capital loss carried to the taxable year under section 1212 shall not be taken into account. See section 1222 and the regulations thereunder for definitions of the terms "net long-term capital gain" and "net short-term capital loss". For purposes of this paragraph:

(i) The term "security" means a security within the meaning of paragraph (d) of this section.

(ii) The term "qualifying security" means a security which is held by the bank on July 11, 1969, and continuously thereafter until it is first sold or exchanged by the bank.

See also subparagraph (4) of this paragraph for rules under which the time certain securities are held is deemed to include a period of time determined under section 1223(1) and (2) with respect to such security.

(2) Computation of capital gain or loss. For purposes of this paragraph, the amount of gain or loss from the sale or exchange of a qualifying security treated as capital gain or loss is determined by multiplying the amount of gain or loss recognized from such sale or exchange by a fraction the numerator of which is the number of days before July 12, 1969, that such security was held by the bank and the denominator of which is the sum of the number of days included in the numerator and the number of days the security was held by the bank after July 11, 1969.

(3) Special rules. For purposes of subparagraphs (1) and (2) of this paragraph, the following items are not taken into account:

(i) Any amount treated as original issue discount under section 1232, and

(ii) Any amount which, without regard to section 582(c) and this section, would be treated as gain or loss from the sale or exchange of property which is not a capital asset, such as an amount which is realized from the sale or exchange of a security which is held by a bank as a dealer in securities.

(4) Holding period in certain cases. For purposes of this paragraph—

(i) The time a security received in an exchange is deemed to have been held by a bank includes a

period of time determined under section 1223(1) with respect to such security.

(ii) The time a security transferred to a bank from another bank is deemed to have been held by the transferee bank includes a period of time determined under section 1223(2) with respect to such security.

For example, if a bank on December 3, 1972, surrendered an obligation of the United States which it held as a capital asset on July 11, 1969, in a transaction to which section 1037 applied, the time during which the newly received obligation is deemed to have been held includes the time during which the surrendered obligation was deemed to have been held by the bank. Because the surrendered obligation was held on July 11, 1969, the newly acquired obligation is deemed to have been held on that date and is a qualifying security. The period during which the surrendered obligation is deemed to have been held is taken into account in computing the fraction determined under subparagraph (2) of this paragraph with respect to the newly received obligation.

(5) **Examples.** The provisions of this paragraph may be illustrated by the following examples:

Example (1). Bank A, a calendar year taxpayer, purchased a qualifying security on July 14, 1968, and held it to maturity on August 20, 1970, when it was redeemed. The redemption resulted in a taxable gain of $10,000. The security was held by the bank for 363 days before July 12, 1969, and for a total of 768 days. During the taxable year, the bank had no other gains and no losses from sales or exchanges of qualifying securities, but had a net loss of $4,000 from sales of securities other than qualifying securities. The portion of the gain from the redemption of the qualifying security treated as capital gain under subparagraph (2) of this paragraph is $4,726.56 (363/768 × $10,000). Because the net gain of the taxable year from sales and exchanges of securities, $6,000 ($10,000–$4,000), exceeds the portion of the gain on the sale of the qualifying security treated as capital gain under this paragraph, $4,726.56 is treated as long-term capital gain on the sale of the qualifying security for the taxable year.

Example (2). Assume the same facts as in example (1), except that the bank's net loss of the taxable year from the sale of securities other than qualifying securities was $7,000. The amount considered as long-term capital gain under this paragraph is limited by the amount of gain on the sale of securities to $3,000 ($10,000–$7,000).

(f) **Small business investment companies and business development corporations—(1) Election.** In the case of a small business investment company or a business development corporation, described in section 586(a), section 582(c) does not apply for taxable years beginning after July 11, 1969, and before July 11, 1974, unless the taxpayer elects that such section shall apply. In the case of a small business investment company, see paragraph (a)(1) of § 1.1243-1 if such an election is made, but see paragraph (a)(2) of § 1.1243-1 if such an election is not made. Such election applies to all such taxable years and, except as provided in subparagraph (3) of this paragraph, is irrevocable. Such election must be made not later than (i) the time, including extensions thereof, prescribed by law for filing the taxpayer's income tax return for its first taxable year beginning after July 11, 1969, or (ii) June 8, 1970, whichever is later.

(2) **Manner of making election.** An election pursuant to the provisions of this paragraph is made by the taxpayer by a written statement attached to the taxpayer's income tax return (or an amended return) for its first taxable year beginning after July 11, 1969. Such statement shall indicate that the election is made pursuant to section 433(d) of the Tax Reform Act of 1969 (83 Stat. 624). The taxpayer shall attach to its income tax return for each subsequent taxable year to which such election is applicable a statement indicating that the election has been made and the amount to which it applies for such year.

(3) **Revocation of election.** An election made pursuant to subparagraph (2) of this paragraph shall be irrevocable unless—

(i) A written application for consent to revoke the election, setting forth the reasons therefor, is filed with the Commissioner within 90 days after the permanent regulations relating to section 433(d)(2) of the Tax Reform Act of 1969 (83 Stat. 624) are filed with the Office of the Federal Register, and

(ii) The Commissioner consents to the revocation.

The revocation is effective for all taxable years to which the election applied.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7171, 37 FR 5620, March 17, 1972; 37 FR 6400, March 29, 1972]

§ 1.584-1 Common trust funds.

(a) **Method of taxation.** A common trust fund maintained by a bank is not subject to taxation under this chapter and is not considered a corporation. Its participants are taxed on their proportionate share of income from the common trust fund.

(b) **Conditions for qualification.** (1) For a fund to be qualified as a common trust fund it must be maintained by a bank (as defined in section 581) in conformity with the rules and regulations of the Comptroller of the Currency, exclusively for the

collective investment and reinvestment of contributions to the fund by the bank. The bank may either act alone or with one or more other fiduciaries, but it must act solely in its capacity as one or a combination of the following: (i) As a trustee of a trust created by will, deed, agreement, declaration of trust, or order of court; (ii) as an executor of a will or as an administrator of an estate; (iii) as a guardian (by whatever name known under local law) of the estate of an infant, of an incompetent individual, or of an absent individual; or (iv) on or after October 3, 1976, as a custodian of a Uniform Gifts to Minors account. A Uniform Gifts to Minors account is an account established pursuant to a State law substantially similar to the Uniform Gifts to Minors Act. (See the Uniform Gifts to Minors Act of 1956 or the Uniform Gifts to Minors Act of 1966, as published by the National Conference of Commissioners on Uniform State Laws.) The Commissioner will publish a list of the States whose laws he determines to be substantially similar to such uniform acts. A bank that maintains a Uniform Gifts to Minors Act account must establish, to the satisfaction of the Commissioner or his delegate, that with respect to the account the bank has duties and responsibilities similar to the duties and responsibilities of a trustee or guardian.

(2) A common trust fund may be a participant in another common trust fund.

(c) Affiliated groups. For taxable years beginning after December 31, 1975, two or more banks that are members of the same affiliated group (within the meaning of section 1504) are treated, for purposes of section 584, as one bank for the period of their affiliation. A common trust fund may be maintained by one or by more than one member of an affiliated group. Any member of the group may, but need not, contribute to the fund. Further, for purposes of this paragraph, members of an affiliated group may be, but need not be, co-trustees of the common trust fund.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6651, 28 FR 4950, May 17, 1963; T.D. 7935, 49 FR 1694, Jan. 13, 1984]

§ 1.584–2 Income of participants in common trust fund.

(a) Each participant in a common trust fund is required to include in computing its taxable income for its taxable year within which or with which the taxable year of the fund ends, whether or not distributed and whether or not distributable:

(1) Its proportionate share of short-term capital gains and losses, computed as provided in § 1.584–3;

(2) Its proportionate share of long-term capital gains and losses, computed as provided in § 1.584–3; and

(3) Its proportionate share of the ordinary taxable income or the ordinary net loss of the common trust fund, computed as provided in § 1.584–3.

(b)(1) Each participant's proportionate share of dividends and interest to which section 116 or 128 applies received by the common trust fund shall be deemed to have been received by such participant as such dividends and as such interest.

(2) Any tax withheld at the source from income of the fund (e.g., under section 1441) is deemed to have been withheld proportionately from the participants to whom such income is allocated.

(c)(1) The proportionate share of each participant's short-term capital gains and losses, long-term capital gains and losses, ordinary taxable income or ordinary net loss, dividends and interest received, and tax withheld at the source shall be determined under the method of accounting adopted by the bank in accordance with the written plan by which the common trust fund is established and administered, provided such method clearly reflects the income of each participant.

(2) Items of income and deductions shall be allocated to the periods between valuation dates established by the plan within the taxable year in which they were realized. Ordinary taxable income or ordinary net loss, short-term capital gains and losses, long-term capital gains and losses, and tax withheld at the source shall be computed for each period. The participants' proportionate shares of income and losses for each period shall then be determined.

(3) For taxable years beginning on or after September 22, 1980, any amount of income or loss of the common trust fund which is included in the computation of a participant's taxable income for the taxable year shall be treated as income or loss from an unrelated trade or business to the extent that such amount would have been income or loss from an unrelated trade or business if such participant had made directly the investments of the common trust fund.

(4) The provisions of this paragraph may be illustrated by the following example:

Example. (i) The plan of a common trust fund provides for quarterly valuation dates and for the computation and the distribution of the income upon a quarterly basis, except that there shall be no distribution of capital gains. The participants are as follows: Trusts A, B, C, and D for the first quarter; Trusts A, B, C, and E for the second quarter; and Trusts A, B, F, and G for the third and fourth quarters, the participants having equal participating interests. As computed upon the quarterly basis, the ordinary taxable income, the short-term capital gain, and the long-term capital loss for the taxable year were as follows:

	First quarter	Second quarter	Third quarter	Fourth quarter	Total
Ordinary taxable income	$200	$300	$200	$400	$1,100
Short-term capital gain	200	100	200	100	600
Long-term capital loss	100	200	100	200	600

(ii) The participants' shares of ordinary taxable income are as follows:

PARTICIPANTS' SHARES OF ORDINARY TAXABLE INCOME

Participant	First quarter	Second quarter	Third quarter	Fourth quarter	Total
A	$50	$75	$50	$100	$275
B	50	75	50	100	275
C	50	75	......	......	125
D	50	......	......	......	50
E	......	75	......	......	75
F	......	......	50	100	150
G	......	......	50	100	150
Total	200	300	200	400	1,100

(iii) The participants' shares of the short-term capital gain are as follows:

PARTICIPANTS' SHARES OF SHORT-TERM CAPITAL GAIN

Participant	First quarter	Second quarter	Third quarter	Fourth quarter	Total
A	$50	$25	$50	$25	$150
B	50	25	50	25	150
C	50	25	......	......	75
D	50	......	......	......	50
E	......	25	......	......	25
F	......	......	50	25	75
G	......	......	50	25	75
Total	200	100	200	100	600

(iv) The participants' shares of the long-term capital loss are as follows:

PARTICIPANTS' SHARES OF LONG-TERM CAPITAL LOSS

Participant	First quarter	Second quarter	Third quarter	Fourth quarter	Total
A	$25	$50	$25	$50	$150
B	25	50	25	50	150
C	25	50	......	......	75
D	25	......	......	......	25
E	......	50	......	......	50
F	......	......	25	50	75
G	......	......	25	50	75
Total	100	200	100	200	600

(v) If in the above example the common trust fund also had short-term capital losses and long-term capital gains, the treatment of such gains or losses would be similar to that accorded to the short-term capital gains and long-term capital losses in the above example.

(vi) Assume in the above example that participant Trust A qualified as a trust forming part of a pension, profit sharing, or stock bonus plan under section 401(a). Assume further that 20 percent of the ordinary taxable income of the common trust fund would be unrelated business taxable income (as defined under section 512(a)(1)) if received directly by Trust A. Under paragraph (c)(3), participant Trust A, for purposes of computing its taxable income, must treat its proportionate share of the common trust fund's ordinary taxable income as income from an unrelated trade or business to the extent such amount would have been income from an unrelated trade or business if Trust A had directly made the investments of the common trust fund. Therefore, participant Trust A must take into account 20 percent of its proportionate share of the common trust fund's ordinary taxable income as income from an unrelated trade or business.

(d) The provisions of part I, subchapter J, chapter 1 of the Code, or, as the case may be, the provisions of subchapters D, F, or H of chapter 1 of the Code, are applicable in determining the extent to which each participant's proportionate share of any income or loss of the common trust fund is taxable to the participant, or to a person other than the participant.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6777, 29 FR 17808, Dec. 16, 1964; T.D. 7935, 49 FR 1692, Jan. 13, 1984]

§ 1.584–3 Computation of common trust fund income.

The taxable income of the common trust fund shall be computed in the same manner and on the same basis as in the case of an individual, except that:

(a) No deduction shall be allowed under section 170 (relating to charitable, etc., contributions and gifts);

(b) The gains and losses from sales or exchanges of capital assets of the common trust fund are required to be segregated. A common trust fund is not allowed the benefit of the capital loss carryover provided by section 1212; and

(c) The ordinary taxable income (the excess of the gross income over deductions) or the ordinary net loss (the excess of the deductions over the

gross income) shall be computed after excluding all items of gain and loss from sales or exchanges of capital assets.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 7935, 49 FR 1692, Jan. 13, 1984]

§ 1.584–4 Admission and withdrawal of participants in the common trust fund.

(a) Gain or loss. The common trust fund realizes no gain or loss by the admission or withdrawal of a participant, and the basis of the assets and the period for which they are deemed to have been held by the common trust fund for the purposes of section 1202 are unaffected by such an admission or withdrawal. For taxable years of participants ending after April 7, 1976, and for transfers occurring after that date, the transfer of property by a participant to a common trust fund is treated as a sale or exchange of the property transferred. If a participant withdraws the whole or any part of its participating interest from the common trust fund, such withdrawal shall be treated as a sale or exchange by the participant of the participating interest or portion thereof which is so withdrawn. A participant is not deemed to have withdrawn any part of its participating interest in the common trust fund so as to have completed a closed transaction by reason of the segregation and administration of an investment of the fund, pursuant to the provisions of 12 CFR 9.18(b)(7) (or, for periods before September 28, 1962, 12 CFR 206.17(c)(7)), for the benefit of all the then participants in the common trust fund. Such segregated investment shall be considered as held by, or on behalf of, the common trust fund for the benefit ratably of all participants in the common trust fund at the time of segregation, and any income or loss arising from its administration and liquidation shall constitute income or loss to the common trust fund apportionable among the participants for whose benefit the investment was segregated. When a participating interest is transferred by a bank or by two or more banks that are members of the same affiliated group (within the meaning of section 1504), as a result of the combination of two or more common trust funds or the division of a single common trust fund, the transfer to the surviving or divided common trust fund is not considered to be an admission or a withdrawal if—

(1) The combining, dividing, and resulting common trust funds have diversified portfolios within the meaning of section 368(a)(2)(F)(ii) and the regulations thereunder, and

(2) In the case of a division, each participant's pro rata interest in each of the resulting common trust funds is substantially the same as was the participant's pro rata interest in the dividing fund. However, in the case of the division of a common trust fund maintained by two or more banks that are members of the same affiliated group resulting from the termination of such affiliation, the division will be treated as meeting the requirements of this subparagraph if the written plans of operation of the resulting common trust funds are substantially identical to the plan of operation of the dividing common trust fund, each of the assets of the dividing common trust fund are distributed substantially pro rata to each of the resulting common trust funds, and each participant's aggregate interest in the assets of the resulting common trust funds of which he or she is a participant is substantially the same as was the participant's pro rata interest in the assets of the dividing common trust fund. The plan of operation of a resulting common trust fund will not be considered to be substantially identical to that of the dividing common trust fund where, for example, the plan of operation of the resulting common trust fund contains restrictions as to the types of participants that may invest in the common trust fund where such restrictions were not present in the plan of operation of the dividing common trust fund.

(b) Basis for gain or loss upon withdrawal. The participant's gain or loss upon withdrawal of its participating interest or portion thereof shall be measured by the difference between the amount received upon such withdrawal and the adjusted basis of the participating interest or portion thereof withdrawn plus the additions prescribed in paragraph (c) of this section and minus the reductions prescribed in paragraph (d) of this section. The amount received by the participant shall be the sum of any money plus the fair market value of property (other than money) received upon such withdrawal. The basis of the participating interest or portion thereof withdrawn shall be the sum of any money plus the fair market value of any property (other than money) contributed by the participant to the common trust fund to acquire the participating interest or portion thereof withdrawn. Such basis shall not be reduced on account of the segregation of any investment in the common trust fund pursuant to the provisions of 12 CFR 9.18(b)(7) (or, for periods before September 28, 1962, 12 CFR 206.17(c)(7)). For the purpose of making the adjustments, additions, and reductions with respect to basis as prescribed in this paragraph, the ward, rather than the guardian, shall be deemed to be the participant; and the grantor, rather than the trust, shall be deemed to be the participant, to the extent that the income of

the trust is taxable to the grantor under subpart E (section 671 and following), part I, subchapter J, chapter 1 of the Code.

(c) **Additions to basis.** As prescribed in paragraph (b) of this section, in computing the gain or loss upon the withdrawal of a participating interest or portion thereof, there shall be added to the basis of the participating interest or portion thereof withdrawn an amount equal to the aggregate of the following items (to the extent that they were properly allocated to the participant for a taxable year of the common trust fund and were not distributed to the participant prior to withdrawal):

(1) Wholly exempt income of the common trust fund for any taxable year,

(2) Net income of the common trust fund for the taxable years beginning after December 31, 1935, and prior to January 1, 1938,

(3) Net short-term capital gain of the common trust fund for each taxable year beginning after December 31, 1937,

(4) The excess of the gains over the losses recognized to the common trust fund upon sales or exchanges of capital assets held (i) for more than 18 months for taxable years beginning after December 31, 1937, and before January 1, 1942, (ii) for more than 6 months for taxable years beginning after December 31, 1941, and before January 1, 1977, (iii) for more than 9 months for taxable years beginning in 1977, and (iv) for more than 1 year for taxable years beginning after December 31, 1977, and

(5) Ordinary net or taxable income of the common trust fund for each taxable year beginning after December 31, 1937.

(d) **Reductions in basis.** As prescribed in paragraph (b) of this section, in computing the gain or loss upon the withdrawal of a participating interest or portion thereof, the basis of the participating interest or portion thereof withdrawn shall be reduced by such portions of the following items as were allocable to the participant with respect to the participating interest or portion thereof withdrawn:

(1) The amount of the excess of the allowable deductions of the common trust fund over its gross income for the taxable years beginning after December 31, 1935, and before January 1, 1938, and

(2) The amount of the net short-term capital loss, net long-term capital loss, and ordinary net loss of the common trust fund for each taxable year beginning after December 31, 1937.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6651, 28 FR 4950, May 17, 1963; T.D. 7935, 49 FR 1695, Jan. 13, 1984]

§ 1.584–5 Returns of banks with respect to common trust funds.

For rules applicable to filing returns of common trust funds, see section 6032 and the regulations thereunder.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.584–6 Net operating loss deduction.

The net operating loss deduction is not allowed to a common trust fund. Each participant in a common trust fund, however, will be allowed the benefits of such deduction. In the computation of such deduction, a participant in a common trust fund shall take into account its pro rata share of items of income, gain, loss, deduction, or credit of the common trust fund. The character of any such item shall be determined as if the participant had realized such item directly from the source from which realized by the common trust fund, or incurred such item in the same manner as incurred by the common trust fund.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.585–1 Reserve for losses on loans of banks.

(a) **General rule.** As an alternative to a deduction from gross income under section 166(a) for specific debts which become worthless in whole or in part, a financial institution to which section 585 and this section apply shall be allowed a deduction under section 166(c) for a reasonable addition to a reserve for bad debts provided such financial institution has adopted or adopts the reserve method of treating bad debts in accordance with paragraph (b) of § 1.166–1. In the case of such a taxpayer the amount of the reasonable addition to such reserve for a taxable year beginning after July 11, 1969, shall be an amount determined by the taxpayer which does not exceed the amount computed under § 1.585–2. Such reasonable addition for the taxable year shall be an amount at least equal to the amount provided by § 1.585–2(a)(2). For each taxable year the taxpayer must include in its income tax return (or amended return) for that year a computation of the amount of the addition determined under this section showing the method used to determine that amount. The use of a particular method in the return for a taxable year is not a binding election by the taxpayer to apply

such method either for such taxable year or for subsequent taxable years. A financial institution to which section 585 and this section apply which adopts the reserve method is not entitled to charge off any bad debts pursuant to section 166(a) with respect to a loan (as defined in § 1.585–2(e)(2)). Except as provided by § 1.585–3, the reserve for bad debts of a financial institution to which section 585 and this section apply shall be established and maintained in the same manner as is provided by section 166(c) and the regulations thereunder with respect to reserves for bad debts. Except as provided by this section, no deduction is allowable for an addition to a reserve for losses on loans as defined in § 1.585–2(e)(2) of a financial institution to which section 585 and this section apply. For rules relating to deduction with respect to debts which are not loans (as defined in § 1.585–2(e)(2)), see section 166(a) and the regulations thereunder. For rules relating to a debt evidenced by a security (as defined in section 165(g)(2)(C)), see sections 166(a), (b), and (c) and 582(a) and the regulations thereunder. For the definition of certain terms, see paragraph (e) of § 1.585–2. For rules relating to a transaction to which section 381(a) applies, see § 1.585–4.

(b) Application of section. Section 585 and this section apply only to the following financial institutions—

(1) Any bank (as defined in section 581 and the regulations thereunder) other than a mutual savings bank, domestic building and loan association, or cooperative bank, to which section 593 applies, and

(2) Any corporation to which subparagraph (1) of this paragraph would apply except for the fact that it is a foreign corporation and in the case of any such foreign corporation, the rules provided by section 585, this section. §§ 1.585–2, 1.585–3, and 1.585–4 apply only with respect to loans outstanding the interest on which is effectively connected with the conduct of a banking business within the United States.

[T.D. 7532, 43 FR 3109, Jan. 23, 1978]

§ 1.585–2 Addition to reserve.

(a) In general—(1) Maximum addition. For taxable years beginning before January 1, 1988, the maximum reasonable addition to the reserve for losses on loans as defined in paragraph (e)(2) of this section is the amount allowable under the percentage method provided by paragraph (b) of this section or the experience method provided by paragraph (c) of this section, whichever is greater. For taxable years beginning after December 31, 1987, the maximum reasonable addition to the reserve for losses on loans is the amount determined under the experience method provided by paragraph (c) of this section.

(2) Minimum addition. For taxable years beginning after December 31, 1976, and before January 1, 1988, a taxpayer to which this section applies shall make a minimum addition to the reserve for losses on loans as defined in paragraph (e)(2) of this section. For purposes of this subparagraph, the term "minimum addition" means an addition to the reserve for losses on loans in an amount equal to the lesser of (i) the amount allowable under section 585 (b)(3)(A) and paragraph (c)(1)(ii) of this section, or (ii) the maximum amount allowable under section 585(b)(2) and paragraph (b) of this section. For taxable years beginning after December 31, 1987, a taxpayer to which this section applies shall make a minimum addition to the reserve for losses on loans for each taxable year in an amount equal to the amount allowable under section 585(b)(3)(A) and paragraph (c)(1)(ii) of this section.

(b) Percentage method—(1) In general—(i) Maximum addition. Except as limited under subparagraph (2) of this paragraph, the maximum reasonable addition to the reserve for losses on loans under the percentage method for a taxable year is the amount determined under paragraph (b)(1)(ii), (iii), or (iv) of this section, whichever is applicable. For purposes of this paragraph, the term "allowable percentage" means 1.8 percent for taxable years beginning before 1976; 1.2 percent for taxable years beginning after 1975 but before 1982; 1.0 percent for taxable years beginning in 1982; and 0.6 percent for taxable years beginning after 1982 and before 1988. This paragraph does not apply for taxable years beginning after 1987.

(ii) Reserve less than allowable percentage of eligible loans. (A) If the reserve for losses on loans as of the close of the base year is less than the allowable percentage for the taxable year multiplied by the eligible loans outstanding at the close of the base year, the amount determined under this subdivision for the taxable year is the amount necessary to increase the balance of the reserve for losses on loans as of the close of the taxable year to an amount equal to the allowable percentage for the taxable year multiplied by the eligible loans outstanding at the close of that year, except that the amount determined with respect to the reserve deficiency shall not exceed one-fifth of the reserve deficiency. For purposes of this section, the term "reserve deficiency" means the ex-

cess of the allowable percentage for the taxable year multiplied by the eligible loans outstanding at the close of the base year over the reserve for losses on loans as of the close of the base year. Where a taxpayer has recoveries of bad debts for a taxable year which exceed the bad debts sustained for such year, the taxpayer is not required to reduce its otherwise permissible current addition by the amount of the net recovery. A reasonable addition attributable to an increase in eligible loans outstanding at the close of the taxable year over eligible loans outstanding at the close of the base year may be made only for the portion of such increase which does not exceed the excess of eligible loans outstanding at the close of the taxable year over the sum of the amount of eligible loans outstanding at the close of the base year and the amount of previous increases in such loans for which an addition was made in taxable years ending after the close of the base year. For purposes of this subdivision, the order in which the factors which make up the annual reserve addition shall be claimed is:

(1) An amount equal to one-fifth of the reserve deficiency;

(2) Net bad debts charged to the reserve; and

(3) An amount attributable to an increase in the amount of eligible loans outstanding.

(B) For its first taxable year, a newly organized financial institution to which § 1.585–1 and this section apply shall be considered to have no reserve deficiency. For example, a new financial institution would compute its annual reserve addition by including in such addition an amount not in excess of the sum of (1) the amount of its net bad debts charged to the reserve for the taxable year, and (2) the allowable percentage of the increase in its eligible loans outstanding at the close of the taxable year over the amount of its loans outstanding (zero) at the end of the year preceding its first taxable year. Such amount would be subject to the 0.6 percent limitations provided in subparagraph (2) of the paragraph.

(C) The application of the rules provided by this subdivision may be illustrated by the following example:

Example. The X Bank is a commercial bank which has a calendar year as its taxable year. X adopted the reserve method of accounting for bad debts in 1950. On December 31, 1969, X has $1,000,000 of outstanding eligible loans and a balance of $13,000 in its reserve for losses on loans. The base year is 1969 and, consequently, X has a reserve deficiency of $5,000 ((1.8% × $1,000,000) – $13,000).

(a) During 1970, X has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1970, X has $1,050,000 of outstanding eligible loans. The maximum reasonable addition under the percentage method is $2,900 which consists of $1,000 of reserve deficiency (⅕ × $5,000), the $1,000 in net bad debts charged to the reserve for losses on loans, and $900 attributable to the increase in the balance of eligible loans (1.8% × ($1,050,000 – $1,000,000)). Assuming that X makes an addition to the reserve for losses on loans of $2,900 for the year, the balance of the reserve as of December 31, 1970 is $14,900 ($13,000 – $1,000 + $2,900).

(b) During 1971, X has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1971, X has $800,000 of outstanding eligible loans. The allowable percentage of eligible loans is $14,400 (1.8% × $800,000). The maximum reasonable addition under the percentage method is $500 which is a portion of one-fifth of the reserve deficiency. Assuming that X makes an addition to the reserve for losses on loans of $500 for the year, the balance of the reserve as of December 31, 1971, is $14,400 ($14,900 – $1,000 + $500).

(c) During 1972, X has net bad debts of $600 charged to the reserve for losses on loans. On December 31, 1972, X has $850,000 of outstanding eligible loans. The allowable percentage of eligible loans is $15,300 (1.8% × $850,000). The maximum reasonable addition under the percentage method is $1,500 which consists of $1,000 of reserve deficiency (⅕ × $5,000) and $500 of the net bad debts charged to the reserve for losses on loans in 1971. Even though the full addition with respect to the reserve deficiency in 1971 was not made, the amount of the addition that can be made in 1972 with respect to the reserve deficiency is limited to one-fifth of such deficiency. Assuming that X makes an addition to the reserve for losses on loans of $1,500 for the year, the balance of the reserve as of December 31, 1972, is $15,300 ($14,400 – $600 + $1,500).

(d) During 1973, X did not have any net bad debts charged to the reserve for losses on loans. On December 31, 1973, X has $1,000,000 of outstanding eligible loans. The allowable percentage of eligible loans is $18,000 (1.8% × $1,000,000). The maximum reasonable addition under the percentage method is $2,100 which consists of $1,000 of reserve deficiency (⅕ × $5,000), $500 of net bad debts charged to the reserve for losses in 1971, and $600 of net bad debts charged to the reserve in 1972. Although outstanding eligible loans increased from $850,000 in 1972 to $1,000,000 in 1973, no addition is permitted with respect to the increase because the amount of eligible loans outstanding at the close of 1973 ($1,000,000) does not exceed the sum of the amount of such loans at the close of the base year ($1,000,000) and the amount of previous increases in such loans for which an addition was made in taxable years ending after the close of the base year ($50,000 loan increase in 1970). Assuming that X makes an addition to the reserve for losses on loans of $2,100, the balance of the reserve as of December 31, 1973, is $17,400 ($15,300+$2,100).

(iii) Reserve equal to or greater than allowable percentage and eligible loans have not declined. If the reserve for losses on loans as of the close of the base year is equal to or greater than the allowable percentage for the taxable year multiplied by the eligible loans outstanding at the close of the base year and if the amount of eligible loans outstanding at the close of the taxable year is equal to or greater than the amount of eligible loans outstanding at the close of the base year, the amount determined under this subdivision is the amount necessary to increase the reserve to the greater of (A) the allowable percentage for the taxable year

multiplied by the eligible loans outstanding at the close of the year, or (B) the balance of the reserve as of the close of the base year. The application of the rule provided by this subdivision may be illustrated by the following example:

Example. The M Bank is a commercial bank which has a calendar year as its taxable year. M adopted the reserve method of accounting for bad debts in 1950. On December 31, 1969, M has $1,000,000 of outstanding eligible loans and a balance of $20,000 in its reserve for losses on loans.

(a) During 1970, M has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1970, M has $1,100,000 of outstanding eligible loans. The allowable percentage of eligible loans is $19,800 (1.8% × $1,100,000). The maximum reasonable addition under the percentage method is $1,000 which is the amount sufficient to increase the balance of the reserve as of the close of the taxable year to the balance of the reserve as of the close of the 1969 base year ($20,000). Assuming that M makes an addition to the reserve for losses on loans of $1,000 for the year, the balance of the reserve as of December 31, 1970, is $20,000 ($20,000 – $1,000 + $1,000).

(b) During 1971, M has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1971, M has $1,300,000 of outstanding eligible loans. The allowable percentage of eligible loans is $23,400 (1.8% × $1,300,000). The maximum reasonable addition under the percentage method is $4,400 which is the amount sufficient to increase the balance of the reserve to the allowable percentage of eligible loans outstanding at the close of the taxable year. Assuming that M makes an addition to the reserve for losses on loans of $4,400 for the year, the balance of the reserve as of December 31, 1971, is $23,400 ($20,000 – $1,000 + $4,400).

(c) During 1972, M has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1972, M has $1,200,000 of outstanding eligible loans. The allowable percentage of eligible loans is $21,600 (1.8% × $1,200,000). No reasonable addition may be made under the percentage method because the reserve for losses on loans ($22,400, i.e., $23,400 – $1,000) is greater than the allowable percentage of eligible loans outstanding at the close of the taxable year ($21,600) and the balance of the reserve as of the close of the base year ($20,000). Assuming that no amount is added under the experience method provided by paragraph (c) of this section, the balance of the reserve for losses on loans as of December 31, 1972, is $22,400 ($23,400 – $1,000).

(d) During 1973, M has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1973, M has $1,200,000 of outstanding eligible loans. The allowable percentage of eligible loans is $21,600 (1.8% × $1,200,000). The maximum reasonable addition under the percentage method is $200 which is the amount sufficient to increase the reserve for losses on loans to the allowable percentage of eligible loans outstanding at the close of the taxable year. Assuming that M makes an addition to the reserve for losses on loans of $200 for the year, the balance of the reserve as of December 31, 1973, is $21,600 ($22,400 – $1,000 + $200).

(iv) Reserve greater than allowable percentage and eligible loans have declined. If the reserve for losses on loans as of the close of the base year is equal to or greater than the allowable percentage of eligible loans outstanding at such time and if the amount of eligible loans at the close of the taxable year is less than the amount of eligible loans outstanding at the close of the base year, the amount determined under this subdivision is the amount necessary to increase the balance of the reserve to the amount which bears the same ratio to eligible loans outstanding at the close of the taxable year as the balance of the reserve as of the close of the base year bears to the amount of eligible loans outstanding at the close of the base year. The application of the rule provided by this subdivision may be illustrated by the following example:

Example. The N Bank is a commercial bank which has a calendar year as its taxable year. N adopted the reserve method of accounting for bad debts in 1950. On December 31, 1969, N has $1,000,000 of outstanding eligible loans and a balance of $20,000 in its reserve for losses on loans.

(a) During 1970, N has net bad debts of $3,000 charged to the reserve for losses on loans. On December 31, 1970, N has $900,000 of outstanding eligible loans. The maximum reasonable addition under the percentage method is $1,000, which is the amount necessary to increase the balance of the reserve to the amount ($18,000) which bears the same ratio to eligible loans outstanding at the close of the taxable year ($900,000) as the balance of the reserve as of the close of the base year ($20,000) bears to the amount of the eligible loans outstanding at the close of the base year ($1,000,000). Assuming that N makes an addition to the reserve for losses on loans of $1,000 for the year, the balance of the reserve as of December 31, 1970, is $18,000 ($20,000 – $3,000 + $1,000).

(b) During 1971, N has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1971, N has $1,100,000 of outstanding eligible loans. The maximum reasonable addition under the percentage method, determined under subdivision (iii) of this subparagraph, is $3,000 which is the amount necessary to increase the balance of the reserve to the greater of the allowable percentage of eligible loans outstanding at the close of the taxable year ($19,800) or the balance of the reserve at the close of the base year ($20,000). Assuming that N makes an addition to the reserve for losses on loans of $3,000 for the year, the balance of the reserve as of December 31, 1971 is $20,000 ($18,000 – $1,000 + $3,000).

(2) Limitations. Notwithstanding any other provision of this paragraph, the maximum reasonable addition to the reserve for losses on loans under the percentage method shall not exceed the greater of:

(i) Six-tenths of 1 percent of the eligible loans outstanding at the close of the taxable year, or

(ii) An amount sufficient to increase the reserve for losses on loans at the close of the taxable year to six-tenths of 1 percent of the eligible loans outstanding at the close of the taxable year.

The application of the rules provided by this subparagraph may be illustrated by the following example:

Example. The Y Bank begins business as a commercial bank on July 1, 1974. Y adopts the calendar year as its taxable year and the reserve method of accounting for bad debts.

(a) During 1974, Y has net bad debts of $1,000. On December 31, 1974, Y has $1,000,000 of outstanding eligible loans. Under subparagraph (1)(ii)(B) of this paragraph, be-

cause Y is a newly-organized financial institution, there is no reserve deficiency. Except for the limitations of this subparagraph, the maximum reasonable addition under subparagraph (1)(ii)(A) of this paragraph would be the amount of net bad debts charged to the reserve for losses ($1,000) plus the allowable percentage of outstanding eligible loans at the close of the taxable year $18,000 (1.8% × $1,000,000). However, because of the limitations of this subparagraph, the maximum reasonable addition to the reserve for losses on loans under the percentage method is an amount sufficient to increase the balance of the reserve for losses on loans to $6,000 which is 0.6 percent of the eligible loans outstanding at the close of the taxable year. Assuming that Y makes an addition to the reserve for losses on loans of $7,000 for the year, the balance of the reserve as of December 31, 1974, is $6,000 ($7,000 – $1,000). The $7,000 consists of the $1,000 in net bad debts and $6,000 attributable to the increase in eligible loans outstanding.

(b) During 1975, Y has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1975, Y has $1,000,000 of outstanding eligible loans. Except for the limitations of this subparagraph, the maximum reasonable addition under subparagraph (1)(ii)(A) of this paragraph would be the amount of net bad debts charged to the reserve for losses ($1,000) plus an amount attributable to the increase in the amount of eligible loans outstanding with respect to which no reasonable addition was allowed in 1974 ($12,000, *i.e.*, $18,000 – $6,000). However, because of the limitations of this paragraph, the maximum reasonable addition to the reserve for losses on loans under the percentage method is $6,000 which is an amount equal to 0.6 percent of the eligible loans outstanding at the close of the taxable year. This amount consists of net bad debts of $1,000 and $5,000 attributable to a portion of the increase in eligible loans in 1974 with respect to which no reasonable addition was allowable for 1974. Assuming that Y makes an addition to the reserve for losses on loans of $6,000 for the year, the balance of the reserve as of December 31, 1975, is $11,000 ($6,000 – $1,000 + $6,000).

(c) During 1976, Y has net bad debts charged to the reserve for losses on loans of $1,000. On December 31, 1976, Y has $1,000,000 in outstanding eligible loans. At the close of 1975 (Y's base year for 1976), the amount of outstanding eligible loans was also $1,000,000. Consequently, there is a reserve deficiency of $1,000 ((1.2% × $1,000,000) – $11,000). The maximum reasonable addition to the reserve for losses under subparagraph (1)(ii)(A) of this paragraph is $1,200 which consists of one-fifth of the reserve deficiency ($1,000 × ⅕ = $200) and the net bad debts charged to the reserve for losses on loans for the year ($1,000). Because that amount is less than 0.6 percent of the eligible loans outstanding at the close of the taxable year (0.6% × $1,000,000 = $6,000), the limitations of this subparagraph do not apply. Assuming that Y makes an addition to the reserve for losses on loans of $1,200 for the year, the balance of the reserve as of December 31, 1976, is $11,200 ($11,000 – $1,000 + $1,200).

(c) Experience method—(1) In general—(i) Maximum addition. The amount determined under this paragraph for a taxable year is the amount necessary to increase the balance of the reserve for losses on loans (as of the close of the taxable year) to the greater of the amount determined under subdivision (ii) or (iii) of this subparagraph. For special rules for a new financial institution, see subparagraph (2) of this paragraph.

(ii) Six-year moving average amount. The amount determined under this subdivision is the amount which bears the same ratio to loans outstanding at the close of the taxable year as (A) the total bad debts sustained during the taxable year and the 5 preceding taxable years (or, with the approval of the Commissioner, a shorter period), adjusted for recoveries of bad debts during such period, bears to (B) the sum of the loans outstanding at the close of such 6 (or fewer) taxable years. For purposes of applying this subdivision, a period shorter than 6 years generally would be appropriate only where there is a change in the type of a substantial portion of the loans outstanding such that the risk of loss is substantially increased. For example, if the major portion of a bank's portfolio of loans changes from agricultural loans to industrial loans which results in a substantial increase in the risk of loss, a period shorter than 6 years may be appropriate. Similarly, a bank which has recently altered its lending practices to include in its portfolio of loans consumer-installment loans, when it had previously made only commercial loans, may also qualify to use a period shorter than six years. A decline in the general economic conditions in the area, which substantially increase the risk of loss, is a relevant factor which may be considered. In any case, however, approval to use a shorter period will not be granted unless the taxpayer supplies specific evidence that the loans outstanding at the close of the taxable years for the shorter period requested are not comparable in nature and risk to loans outstanding at the close of the six taxable years. The fact that a bank's bad debt experience has shown a substantial increase is not, by itself, sufficient to justify use of a shorter period. If approval is granted to use a shorter period, the experience for those taxable years which are excluded shall not be used for any subsequent year. A request for approval to exclude the experience of a prior taxable year shall not be considered unless it is sent to the Commissioner at least 30 days before the close of the first taxable year for which such approval is requested.

(iii) Base year amount. The amount determined under this subdivision is the lower of (A) the balance of the reserve as of the close of the base year, or (B) if the amount of loans outstanding at the close of the taxable year is less than the amount of loans outstanding at the close of the base year, the amount which bears the same ratio to loans outstanding at the close of the taxable year as the balance of the reserve as of the close of the base year bears to the amount of loans outstanding at the close of the base year.

(2) Special rules for new financial institutions—(i) In general. In the case of any taxable year preceded by less than 5 authorization years (as defined in paragraph (e)(5) of this section), subparagraph (1) of this paragraph shall be applied with the adjustments provided by subdivision (ii) of this subparagraph.

(ii) Adjustments. (A) The total bad debts for the 6-year period computed under subparagraph (1)(ii)(A) of this paragraph shall be the sum of:

(1) The bad debts sustained by the taxpayer during its authorization years, adjusted for recoveries of bad debts for such years, and

(2) That fraction of the total bad debts sustained by a comparable bank (as defined in paragraph (e)(7) of this section) during the comparison years (as defined in paragraph (e)(6) of this section), adjusted for recoveries of bad debts for such years, which bears the same ratio to such total as the average loans outstanding of the taxpayer during the authorization years bears to the average loans outstanding of the comparable bank during the comparison years.

(B) The total amount of loans outstanding during the 6-year period computed under subparagraph (1)(ii)(B) of this paragraph shall be six times the average loans outstanding of the taxpayer during the authorization years.

(d) Change in accounting method from specific charge-off method to reserve method of treating bad debts—(1) In general. If a bank is granted permission in accordance with § 1.446–1(e)(3) to change its method of accounting for bad debts from a method under which specific bad debt items are deducted to the reserve method of treating bad debts, the taxpayer shall effect the change as provided in subparagraphs (2) and (3) of this paragraph.

(2) Initial balance of the reserve. The initial balance of the reserve at the close of the year of change shall be no less than the minimum addition as described in paragraph (a)(2) of this section and shall be no larger than the greater of—

(i) The allowable percentage of eligible loans outstanding at the close of the taxable year of change, or

(ii) The amount which bears the same ratio to loans outstanding at the close of the taxable year as the total bad debts sustained during the taxable year and the 5 preceding taxable years (or, with the approval of the Commissioner, a shorter period), adjusted for recoveries of bad debts during such period, bears to the sum of the loans outstanding at the close of such 6 or fewer taxable years.

In the case of taxable years beginning after 1987, the initial balance of the reserve at the end of the year of change shall be the amount specified in subdivision (ii) of this subparagraph.

(3) Deduction with respect to initial balance. The deduction with respect to the initial balance of the reserve at the close of the taxable year of change, determined under subparagraph (2) of this paragraph, is allowable ratably over a period of 10 years commencing with the taxable year of change (or a shorter period as may be approved by the Commissioner). Thus, the bad debt deduction under section 166 for the taxable year of change will consist of the amount of debts determined to be wholly or partially worthless and charged-off during such taxable year plus one-tenth (if a 10-year period is used) of the amount of the reserve determined under subparagraph (2) of this paragraph. For each of the 9 taxable years following the taxable year of change, the bad debt deduction will consist of the reasonable addition to the reserve for bad debts for each such year as provided by section 585, as otherwise determined, plus one-tenth of the amount determined to be the initial balance of the reserve under subparagraph (2) of this paragraph. The amount established as a bad debt reserve for the taxable year of change under subparagraph (2) of this paragraph shall be considered as the balance of the reserve for purposes of determining the amount of subsequent additions to such reserve, even though the entire amount of the reserve may not have been deducted under section 166(c) because of the requirement that it be deducted over a number of years.

(e) Definitions—(1) Base year—(i) Percentage method. For purposes of paragraph (b) of this section (relating to the percentage method), the term "base year" means: For years beginning before 1976, the last taxable year beginning on or before July 11, 1969; for taxable years beginning after 1975 but before 1983, the last taxable year beginning before 1976; and, for taxable years beginning after 1982, the last taxable year beginning before 1983. However, for purposes of section 585(b)(2)(A) the term "base year" means the last taxable year before the most recent adoption of the percentage method, if later than the base year as determined under the preceding sentence.

(ii) Experience method. For purposes of paragraph (c) of this section (relating to the experience method), the term "base year" means (A) the last taxable year before the most recent adoption of the

experience method, or (B) the last taxable year beginning on or before July 11, 1969, which ever is later; and for taxable years beginning after 1987, the last taxable year beginning before 1988.

(iii) **Example.** The application of the rules provided by this subparagraph may be illustrated by the following example:

Example. The T Bank is a commercial bank which has a calendar year as its taxable year. T adopted the reserve method of accounting for bad debts in 1950. On December 31, 1969, T has $1,000,000 of outstanding eligible loans and a balance of $19,300 in its reserve for losses on loans.

(a) During 1970, T has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1970, T has $1,050,000 of outstanding eligible loans. T elects the percentage method. The base year is 1969. The maximum reasonable addition under the percentage method of $1,000 which is the amount sufficient to increase the balance of the reserve as of the close of the taxable year to the balance of the reserve as of the close of the base year 1969 ($19,300). Assuming that T makes an addition to the reserve for losses on loans of $1,000 for the year, the balance of the reserve for losses on loans as of December 31, 1970, is $19,300 ($19,300 – $1,000 + $1,000).

(b) During 1971, T has net bad debts of $8,000 charged to the reserve for losses on loans. On December 31, 1971, T has $1,100,000 of outstanding eligible loans. T elects the experience method. The base year is 1970. The maximum reasonable addition under the experience method is $8,000 which is the amount sufficient to increase the balance of the reserve as of the close of the taxable year to the balance of the reserve as of the close of the 1970 base year ($19,300). Assuming that T makes an addition to the reserve for losses on loans of $8,000 for the year, the balance of the reserve for losses on loans as of December 31, 1971, is $19,300 ($19,300 – $8,000 + $8,000).

(c) During 1972, T has net bad debts of $1,000 charged to the reserve for losses on loans. On December 31, 1972, T has $1,200,000 of outstanding eligible loans. T elects the percentage method. The base year is 1971 and there is a reserve deficiency of $500 ((1.8% × $1,100,000) – $19,300). The maximum reasonable addition under the percentage method is $2,900 which consists of $100 of reserve deficiency (1/5 × $500), the $1,000 in net bad debts charged to the reserve for losses on loans, and $1,800 attributable to the increase in the balance of eligible loans (1.8% × ($1,200,000 – $1,100,000)). Assuming that T makes an addition to the reserve for losses on loans of $2,900 for the year, the balance of the reserve for losses on loans as of December 31, 1972, is $21,200 ($19,300 – $1,000 + $2,900).

(2) **Loan**—(i) **General rule.** For purposes of this section and §§ 1.585–1, 1.585–3, and 1.585–4, the term "loan" means debt as the term "debt" is used in section 166 and the regulations thereunder. The term "loan" includes (but is not limited to) the following items:

(A) An overdraft in one or more deposit accounts by a customer in good faith whether or not other deposit accounts of the same customer have balances in excess of the overdraft;

(B) A bankers acceptance purchased or discounted by a bank; and

(C) A loan participation to the extent that the taxpayer bears a risk of loss.

For purposes of (B) of this subdivision (i), a bankers acceptance shall be considered as a loan made by the bank which purchased or discounted the bankers acceptance and not a loan made by the originating bank.

(ii) **Exceptions.** Notwithstanding the provisions of subdivision (i) of this subparagraph, the term "loan" does not include the following items:

(A) Discount or interest receivable reflected in the face amount of an outstanding loan, which discount or interest has not been included in gross income;

(B) For taxable years beginning after December 31, 1976, commercial paper, however acquired by the bank, including, for example, short-term promissory notes which may be purchased on the open market;

(C) For taxable years beginning after December 31, 1976, a debt evidenced by a security (as defined in section 165(g)(2)(C) and the regulations thereunder);

(D) Any loan which is entered into or acquired for the primary purpose of enlarging the otherwise available bad debt deduction;

(E) Loans which have been contractually committed to the extent that funds have not been disbursed to the borrower or disbursed on behalf of the borrower; and

(F) Any transaction which is in violation of a Federal or State statute that governs the activities of the financial institution.

(3) **Eligible loan**—(i) **General rule.** For purposes of this section and §§ 1.585–3 and 1.585–4, the term "eligible loan" means a loan (as defined in subparagraph (2) of this paragraph) which is incurred in the course of the normal customer loan activities of a financial institution and which is not a loan described in subdivision (ii) of this subparagraph. Nothing within the preceding sentence will be construed to exclude from the term "eligible loan" a bona fide loan in a new market or under a novel repayment arrangement if the likelihood of nonrepayment is at least as great as that of other customer loans of the financial institution.

(ii) **Exceptions.** Loans which do not constitute eligible loans include:

(A) A loan to a bank (as defined in section 581 and the regulations thereunder) or to a domestic branch of a foreign corporation to which

§ 1.585–1 applies, including a repurchase transaction or other similar transaction;

(B) Bank funds on deposit in any bank (foreign or domestic) such as a deposit represented by a certificate of deposit or any other form of instrument evidencing the deposit of a sum of money with the issuing bank that will be available on or after a stated date or period of time;

(C) A sale or loan of Federal funds irrespective of the purchaser or borrower;

(D) A loan, to the extent that it is directly or indirectly made to, guaranteed by, or insured by the United States, a possession or instrumentality thereof, or a State or political subdivision thereof; and

(E) A loan which is secured by a deposit in the lending financial institution or in a bank as defined in section 581 or a domestic branch of a foreign corporation to which this section applies to the extent that the financial institution has control over withdrawal of such deposit.

(iii) Definition of loan which is secured by a deposit. For purposes of subdivision (ii)(E) of this subparagraph:

(A) A loan is considered secured if the loan is on the security of any instrument which makes the deposit specific security for the payment of the loan, provided that such instrument is of such a nature that in the event of default the deposit could be subjected to the satisfaction of the loan;

(B) A deposit includes a guarantee deposit in the form of a "holdback", pledged collateral that has been reduced to cash, and loan payments that are maintained in a separate account; and

(C) Control over the withdrawal of a deposit is evidenced by possession of a passbook, certificate of deposit, note, or other similar instrument the possession of which is normally required to permit withdrawal. The lending financial institution does not have control over withdrawal of the deposit if the deposit can be withdrawn without consent of the lending financial institution. Thus, the lending financial institution normally does not have control over the withdrawal of a deposit in an account merely because the borrower agrees to maintain a minimum, average, or compensating balance.

(4) Predecessor. For purposes of this section, the term "predecessor" means (i) any taxpayer which transferred more than 50 percent of the total amount of its assets to the taxpayer and is described in § 1.585–1, or (ii) any predecessor of such predecessor.

(5) Authorization years. For purposes of this section, the term "authorization years" means the number of years, containing 12 complete months, between (i) the first day of the first full taxable year of the taxpayer for which it (or any predecessor) was authorized to do business as a financial institution described in § 1.585–1, and (ii) the taxable year.

(6) Comparison years. For purposes of this section, the term "comparison years" means those consecutive taxable years containing 12 complete months of a comparable bank, the last of which ends within 12 months immediately preceding the beginning of the first taxable year of the taxpayer, which are equal in number to six minus the number of authorization years of the taxpayer.

(7) Comparable bank. For purposes of this section, the term "comparable bank" means all the financial institutions described in § 1.585–1 located within the same Federal Reserve district.

(8) Average loans outstanding. For purposes of this section, the term "average loans outstanding" means the sum of the loans outstanding at the close of each taxable year of a period divided by the number of taxable years in such period.

(9) Adjusted for recoveries of bad debts. For purposes of this section, the term "adjusted for recoveries of bad debts" means an adjustment for the full amount recovered with respect to bad debts previously charged to the reserve during any of the applicable taxable years.

[T.D. 7532, 43 FR 3109, Jan. 23, 1978; T.D. 7835, 47 FR 42342, Sept. 27, 1982]

§ 1.585–3 Special rules.

(a) Treatment of reserve. For taxable years beginning after July 11, 1969, if a financial institution to which section 585 and § 1.585–1 apply establishes a reserve pursuant to section 166(c), any bad debt in respect of a loan (whether or not such loan is an eligible loan) must be charged to the reserve for losses on loans provided for by § 1.585–1 for the taxable year in which the bad debt occurs. For such a year, any recovery of a bad debt previously charged to the reserve account in respect of a loan (whether or not such loan is an eligible loan) must be credited to such reserve in the taxable year of recovery regardless of whether such credit causes the reserve to exceed the permissible amount. If, as a result of net recoveries during the taxable year, the reserve balance ex-

ceeds the permissible amount, a taxpayer is not required to report the excess as taxable income. In such a case, the excess over the otherwise permissible amount in the reserve account precludes current reasonable additions to the reserve and may affect future reasonable additions. Recoveries of bad debts which were not charged to the reserve shall not be credited to such reserve, but shall be treated as taxable income subject to the provisions of section 111. No item other than a loan as defined in § 1.585–2(e)(2) shall be charged to the reserve for losses on loans.

(b) **Accounting for reserve.** A financial institution to which section 585 and § 1.585–1 apply which establishes a reserve pursuant to section 166(c) shall establish and maintain a permanent record of such reserve. Copies of Federal income tax returns and amended returns with attached schedules satisfy the requirements of this paragraph provided that such returns are permanently maintained by the financial institution and the balance of the reserve for losses on loans established pursuant to section 166(c) can be readily reconciled with the reserve for losses on loans maintained by the financial institution for financial statement purposes. The requirements of this paragraph would also be satisfied if a financial institution establishes and maintains a permanent subsidiary ledger reflecting an account for the reserve for losses on loans established pursuant to section 166(c) provided the balance in such account can be readily reconciled with the balance of the reserve for losses on loans for financial statement purposes maintained in any other ledger. The permanent records maintained pursuant to this section must reflect any changes in the amount initially added to the reserve for losses on loans and the amount finally determined by the taxpayer to be a reasonable addition to the reserve for losses on loans.

[T.D. 7532, 43 FR 3114, Jan. 23, 1978]

§ 1.585–4 Reorganizations and asset acquisitions.

(a) **In general.** In computing a reasonable addition to the reserve for losses on loans for the first taxable year ending after a transaction to which section 381(a) applies and for subsequent taxable years, the separate reserves for losses on loans, the amount of loans outstanding, the total bad debts sustained (adjusted for recoveries), and the amount of eligible loans outstanding of the distributor or transferor corporation and the acquiring corporation (or, in the case of a consolidation, the transferor corporations) shall be combined for all applicable years. Thus, for example, in applying § 1.585–2(c)(1)(i) for the first taxable year ending after the distribution or transfer, the total bad debts sustained during the 5 preceding taxable years are the sum of the bad debts sustained by the acquiring corporation for the 5 preceding taxable years and bad debts sustained by the distributor or transferor corporation for the taxable year ending on the date of distribution or transfer and the 4 preceding taxable years.

(b) **Base year and base year amounts of acquiring corporation—(1) Base year.** For transactions to which section 381(a) applies, the base year of the acquiring corporation for the first taxable year ending after the date of distribution or transfer shall be the last taxable year ending on or before the date of distribution or transfer. The balance of the reserve, the amount of loans outstanding, and the amount of eligible loans outstanding at the close of such base year shall be determined in accordance with the provisions of subparagraph (2)(i) of this paragraph. For taxable years subsequent to the first taxable year ending after the date of distribution or transfer, the base year of the acquiring corporation shall be the more recent of the base year provided by the first sentence of this subparagraph or the base year provided by § 1.585–2(e)(1). If § 1.585–2(e)(1) provides the more recent base year, the balance of the reserve for losses on loans, the amount of loans outstanding, and the amount of eligible loans outstanding shall be determined at the close of such base year without regard to this paragraph.

(2) **Base year amounts—(i) Method of determination.** The balance of the reserve for losses on loans, the amount of loans outstanding, and the amount of eligible loans outstanding at the close of the base year provided by the first sentence of subparagraph (1) of this paragraph shall be the total of such amounts of the distributor or transferor corporation and the acquiring corporation (or, in the case of a consolidation, the transferor corporations) at the close of what would have been their respective base years determined under § 1.585–2(e)(1) if the distribution or transfer to which section 381(a) applies had not occurred, except that the method (experience or percentage) used or adopted by the acquiring corporation to determine its reasonable addition to a reserve for losses on loans for the first taxable year ending after the date of the distribution or transfer shall be considered to be the method that the distributor or transferor corporation (or, in the case of a consolidation, that the transferor corporation) would have used or adopted for its first taxable

year ending after the date of distribution or transfer if the distribution or transfer had not occurred.

(ii) Examples. The application of the rule provided by this subparagraph may be illustrated by the following examples:

Example (1). The X Corporation and the Y Corporation are commercial banks both of which have a calendar year as a taxable year. Both X and Y adopted the reserve method of accounting for bad debts prior to July 11, 1969. For the taxable years 1970 through 1973, X and Y determined their reasonable additions to a reserve for losses on loans as defined in § 1.585–2(e)(2) under the percentage method. On June 30, 1974, the X Bank is merged into the Y Bank; for its short taxable year ending on June 30, 1974, X determines its reasonable addition under the percentage method. If, for the taxable year ending on December 31, 1974 (the first taxable year ending after the date of distribution or transfer), Y determines its reasonable addition to a reserve for losses on loans under the percentage method, then at the close of the base year the reserve balance, the amount of outstanding loans, and the amount of eligible loans outstanding are the sum of X's and Y's respective amounts at the close of the taxable year ending December 31, 1969 (the base year of both X and Y determined under § 1.585–2(e)(1) as if the distribution or transfer had not taken place). If, instead of the above, Y adopts the experience method of determining its reasonable addition to a reserve for losses for the taxable year 1974, then at the close of the base year (1973) the reserve balances, the amount of loans outstanding, and the amount of eligible loans outstanding are the sum of X's respective amounts at the close of its short taxable year ending on June 30, 1974 (X's last taxable year before its (Y's) most recent adoption of the experience method) and of Y's respective amounts at the close of its taxable year 1973 (Y's last taxable year before its most recent adoption of the experience method).

Example (2). The M Corporation and the N Corporation are commercial banks. M has a fiscal year ending September 30, as its taxable year and N has a calendar year as its taxable year. Both M and N adopted the reserve method of accounting for bad debts prior to July 11, 1969. For the taxable years ending in 1970, 1971, and 1972, M determined its reasonable addition to a reserve for losses under the percentage method; for the taxable year ending in 1973 M adopted the experience method. For the taxable years 1970 through 1973 N determined its reasonable addition under the percentage method. M is merged into N on June 30, 1974, and for its short taxable year ending on June 30, 1974, M determines its reasonable addition under the experience method. If, for the taxable year ending on December 31, 1974 (the first taxable year ending after the date of distribution or transfer), N determines its reasonable addition to a reserve for losses under the percentage method, then at the close of the base year (1973) the reserve balance, the amount of loans outstanding, and the amount of eligible loans outstanding are the sum of M's respective amounts at the close of (a) if M had a reserve deficiency as of June 30, 1974, its short taxable year ending on June 30, 1974 (M's last taxable year before its (N's) most recent adoption of the percentage method), or (b) if M did not have a reserve deficiency, the taxable year ending on September 30, 1969, and N's respective amounts at the close of its taxable year 1979. If, instead of the above, N adopts the experience method for the taxable year 1974, then at the close of the base year the reserve balance, the amount of outstanding loans, and the amount of eligible loans outstanding are the sum of M's respective amounts at the close of its taxable year ending on September 30, 1972 (the last taxable year before M's most recent adoption of the experience method), and N's respective amounts at the close of the taxable year 1973 (the last taxable year ending before N's most recent adoption of the experience method).

[T.D. 7532, 43 FR 3114, Jan. 23, 1978]

§ 1.586–1 Reserve for losses on loans of small business investment companies, etc.

(a) General rule. As an alternative to a deduction from gross income under section 166(a) for specific debts which become worthless in whole or in part, a taxpayer which is a financial institution to which section 586 and this section apply is allowed a deduction under section 166(c) for a reasonable addition to a reserve for bad debts provided such financial institution has adopted or adopts the reserve method of treating bad debts in accordance with paragraph (b) of § 1.166–1. In the case of such a taxpayer, the amount of the reasonable addition to such reserve for a taxable year beginning after July 11, 1969, shall be an amount determined by the taxpayer which does not exceed the amount computed under § 1.586–2. A financial institution to which section 586 and this section apply which adopts the reserve method is not entitled to charge-off any bad debts pursuant to section 166(a) with respect to a loan (as defined in § 1.586–2(c)(2)). Except as provided by § 1.586–2, regarding the manner of computation of the addition to the reserve for bad debts, the reserve for bad debts of a financial institution to which this section applies shall be maintained in the same manner as is provided by section 166(c) and the regulations thereunder with respect to reserves for bad debts. Except as provided by this section, no deduction is allowable for an addition to a reserve for bad debts of a financial institution to which section 586 and this section apply. For rules relating to deduction with respect to debts which are not loans (as defined in § 1.586–2(c)(2)), see section 166(a) and the regulations thereunder.

(b) Application of section. Section 586 and this section shall apply only to the following financial institutions—

(1) Any small business investment company operating under the Small Business Investment Act of 1958 as amended and supplemented (72 Stat. 689), and

(2) Any business development corporation, which for purposes of this section, means a corporation which was created by or pursuant to an act of a State legislature for purposes of promoting, maintaining, and assisting the economy and industry within such State on a regional or statewide basis by making loans which would generally not

be made by banks (as defined in section 581 and the regulations thereunder) within such region or State in the ordinary course of their businesses (except on the basis of a partial participation), and which is operated primarily for such purposes. [T.D. 7444, 41 FR 53482, Dec. 7, 1976]

§ 1.586–2 Addition to reserve.

(a) **General rule.** Except as provided by paragraph (b) of this section, the amount computed under this section is the amount necessary to increase the balance of the reserve for bad debts (as of the close of the taxable year) to the greater of—

(1) The amount which bears the same ratio to loans outstanding at the close of the taxable year as (i) the total bad debts sustained during the taxable year and the 5 preceding taxable years (or, with the approval of the Commissioner, a shorter period), adjusted for recoveries of bad debts during such period, bears to (ii) the sum of the loans outstanding at the close of such 6 or fewer taxable years, or

(2) The lower of—

(i) The balance of the reserve as of the close of the base year, or

(ii) If the amount of loans outstanding at the close of the taxable year is less than the amount of loans outstanding at the close of the base year, the amount which bears the same ratio to loans outstanding at the close of the taxable year as the balance of the reserve as of the close of the base year bears to the amount of loans outstanding at the close of the base year. For purposes of subparagraph (2) of this paragraph, the term "base year" means the last taxable year beginning on or before July 11, 1969. For purposes of applying this paragraph, a period shorter than the 6 years generally would be appropriate only where there is a change in the type of a substantial portion of the loans outstanding such that the risk of loss is substantially increased. For example, if the major portion of a business development corporation's portfolio of loans changes from agricultural loans to industrial loans which results in a substantial increase in the risk of loss, a period shorter than the 6 years may be appropriate. If approval is granted to use a shorter period, the experience for those taxable years which are excluded shall not be used for any subsequent year. A request for approval to exclude the experience of a prior taxable year shall not be considered unless it is sent to the Commissioner at least 30 days before the close of the current taxable year. The request shall include a statement of the reasons such experience should be excluded.

(b) **New financial institutions—(1) Small business investment companies.** In the case of a new financial institution which is a small business investment company to which section 586 applies, the amount computed under this section is the greater of the amount computed under paragraph (a) of this section or the amount necessary to increase the balance of the reserve for bad debts as of the close of the taxable year to the amount which bears the same ratio to loans outstanding at the close of the taxable year as—

(i) The total bad debts (as determined by the Commissioner) sustained by all such small business investment companies during the 12-month period ending on March 31 that ends with or within the taxpayer's previous taxable year, and during the five 12-month periods ending on March 31 that precede such 12-month period, adjusted for recoveries of bad debts during such periods (as determined by the Commissioner), bears to

(ii) The sum of the loans outstanding (as determined by the Commissioner) by all such small business investment companies at the close of each of such six 12-month periods ending on March 31.

(2) **Business development corporations.** In the case of a new financial institution which is a business development corporation to which section 586 applies, the amount computed under this section is the greater of the amount computed under paragraph (a) of this section or the amount necessary to increase the balance of the reserve for bad debts as of the close of the taxable year to the amount which bears the same ratio to loans outstanding at the close of the taxable year as—

(i) The total bad debts (as determined by the Commissioner) sustained by all such business development corporations during the calendar year ending with or within the taxpayer's previous taxable year and during the 5 calendar years preceding such calendar year, adjusted for recoveries of bad debts during such period (as determined by the Commissioner), bears to

(ii) The sum of the loans outstanding (as determined by the Commissioner) by all such business development corporations at the close of each of such 6 calendar years.

(c) **Definitions.** For purposes of this section—

(1) **New financial institution.** A financial institution is a new financial institution for any taxable

year beginning less than 10 years after the day on which it (or any predecessor) was authorized to do business as a financial institution described in the applicable subparagraph of § 1.586–1(b). For this purpose, the term "predecessor" means (i) any taxpayer which transferred more than 50 percent of the total amount of its assets to the taxpayer and is described in the same subparagraph of § 1.586–1(b) which describes the taxpayer, or (ii) any predecessor of such predecessor.

(2) Loan. (i) The term "loan" means debt, as the term "debt" is used in section 166 and the regulations thereunder.

(ii) The term "loan" does not include the following items:

(A) Discount or interest receivable reflected in the face amount of an outstanding loan, which discount or interest has not been included in gross income;

(B) A debt evidenced by a security (as defined in section 165(g)(2)(C) and the regulations thereunder); and

(C) Any loan which is entered into or acquired for the primary purpose of enlarging the otherwise available bad debt deduction.

[T.D. 7444, 41 FR 53482, Dec. 7, 1976]

Mutual Savings Banks, Etc.

§ 1.591–1 Deduction for dividends paid on deposits.

(a) In general. (1) In the case of a taxpayer described in paragraph (c)(1) or (2) of this section, whichever is applicable, there are allowed as deductions from gross income amounts which during the taxable year are paid to, or credited to the accounts of, depositors or holders of accounts as dividends or interest on their deposits or withdrawable accounts, if such amounts paid or credited are withdrawable on demand subject only to customary notice of intention to withdraw.

(2) The deduction provided in section 591 is applicable to the taxable year in which amounts credited as dividends or interest become withdrawable by the depositor or holder of an account subject only to customary notice of intention to withdraw. Thus, amounts which, as of the last day of the taxable year, are credited as dividends or interest, but which are not withdrawable by depositors or holders of accounts until the following business day, are deductible under section 591 in the year subsequent to the taxable year in which they were so credited. A deduction under this section will not be denied by reason of the fact that the amounts credited as dividends or interest, otherwise deductible under section 591, are subject to the terms of a pledge agreement between the taxpayer and the depositor or holder of an account. In the case of a domestic building and loan association having nonwithdrawable capital stock represented by shares, no deduction is allowable under this section for amounts paid or credited as dividends on such shares. In the case of a taxable year ending after December 31, 1962, for special rules governing the treatment of dividends or interest paid or credited for periods representing more than 12 months, see section 461(e).

(b) Serial associations, bonus plans, etc. If a taxpayer described in paragraph (c)(1) or (2) of this section, whichever is applicable, operates in whole or in part as a serial association, maintains a bonus plan, or issues shares, or accepts deposits, subject to fines, penalties, forfeitures, or other withdrawal fees, it may deduct under section 591 the total amount credited as dividends or interest upon such shares or deposits, credited to a bonus account for such shares or deposits, or allocated to a series of shares for the taxable year, notwithstanding that as a customary condition of withdrawal:

(1) Amounts invested in, and earnings credited to, series shares must be withdrawn in multiples of even shares, or

(2) Such taxpayer has the right, pursuant to bylaw, contract, or otherwise, to retain or recover a portion of the total amount invested in, or credited as earnings upon, such shares or deposits, such bonus account, or series of shares, as a fine, penalty, forfeiture, or other withdrawal fee.

In any taxable year in which the right referred to in subparagraph (2) of this paragraph is exercised, there is includible in the gross income of such taxpayer for such taxable year amounts retained or recovered by the taxpayer pursuant to the exercise of such right. If the provisions of paragraph (a) of § 1.163–4 (relating to deductions for original issue discount) apply to deposits made with respect to a certificate of deposit, time deposit, bonus plan or other deposit arrangement, the provisions of this paragraph shall not apply.

(c) Effective date. The provisions of paragraphs (a) and (b) of this section shall apply to—

(1) Dividends or interest paid or credited after October 16, 1962, by any taxpayer which (at the time of such payment or credit) qualifies as (i) a mutual savings bank not having capital stock represented by shares, (ii) a domestic building and loan association (as defined in section 7701(a)(19)), (iii) a cooperative bank (as defined in section 7701(a)(32)), or (iv) any other savings institution chartered and supervised as a savings and loan or similar association under Federal or State law; and

(2) Dividends paid or credited before October 17, 1962, by any taxpayer which (at the time of such payment or credit) qualifies as (i) a mutual savings bank not having capital stock represented by shares, (ii) a cooperative bank without capital stock organized and operated for mutual purposes and without profit, or (iii) a domestic building and loan association (as defined in section 7701(a)(19) before amendment by section 6(c) of the Revenue Act of 1962 (76 Stat. 982)).

[T.D. 6500, 25 FR 11737, Nov. 26, 1960, as amended by T.D. 6728, 29 FR 5855, May 5, 1964; T.D. 7154, 36 FR 24997, Dec. 28, 1971]

§ 1.592-1 Repayment of certain loans by mutual savings banks, building and loan associations, and cooperative banks.

There is deductible, under section 592, from the gross income of a mutual savings bank not having capital stock represented by shares, a domestic building and loan association, or a cooperative bank without capital stock organized and operated for mutual purposes and without profit, amounts paid by such institutions during the taxable year in repayment of loans made before September 1, 1951, by the United States or any agency or instrumentality thereof which is wholly owned by the United States, or by any mutual fund established under the authority of the laws of any State. For example, amounts paid by such institution in repayment of loans made by the Reconstruction Finance Corporation before September 1, 1951, are deductible under this section. Section 592 is not applicable, however, in the case of amounts paid in repayment of loans made by an agency or instrumentality not wholly owned by the United States.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.593-1 Additions to reserve for bad debts.

(a) In general. A mutual savings bank not having capital stock represented by shares, a domestic building and loan association, and a cooperative bank without capital stock organized and operated for mutual purposes and without profit may, as an alternative to a deduction from gross income under section 166(a) for specific debts which become worthless in whole or in part, deduct amounts credited to a reserve for bad debts in the manner and under the circumstances prescribed in this section and § 1.593-2. In the case of such an institution, the selection of either of the alternative methods for treating bad debts may be made by the taxpayer in the return for its first taxable year beginning after December 31, 1951. The method selected shall be subject to the approval of the Commissioner upon examination of the return. If the method selected is approved, it must be followed in returns for subsequent years, unless permission is granted by the Commissioner to change to another method. Application for permission to change the method of treating bad debts shall be made at least 30 days prior to the close of the taxable year for which the change is to be effective.

(b) Addition to reserve. Except as otherwise provided in § 1.593-2, the reasonable addition to a reserve for bad debts shall be any amount determined by the taxpayer which does not exceed the lesser of:

(1) The amount of its taxable income for the taxable year, computed without regard to section 593 and without regard to any section providing for a deduction the amount of which is dependent upon the amount of taxable income (such as section 170, relating to charitable, etc., contributions and gifts), or

(2) The amount by which 12 percent of the total deposits or withdrawable accounts of its depositors at the close of such year exceeds the sum of its surplus, undivided profits, and reserves at the beginning of the taxable year.

(c) Adjustments to reserve. Bad debt losses sustained during the taxable year shall be charged against the bad debt reserve. Recoveries of debts charged against the bad debt reserve during a prior taxable year in which the institution was subject to tax under chapter 1 of the Internal Revenue Code of 1954 or under chapter 1 of the Internal Revenue Code of 1939 shall be credited to the bad debt reserve. The establishment of such reserve and all adjustments made thereto must be reflected on the regular books of account of the institution at the close of the taxable year, or as soon as practicable thereafter. Minimum amounts credited in compliance with Federal or State statutes, regulations, or supervisory orders to reserve or similar accounts, or additional amounts credited to such reserve or

similar accounts and permissive under such statutes, regulations, or orders, against which charges may be made for the purpose of absorbing losses sustained by an institution, will be deemed to have been credited to the bad debt reserve.

(d) Definitions. When used in this section and in § 1.593–2:

(1) Institution. The term "institution" means either a mutual savings bank not having capital stock represented by shares, a domestic building and loan association as defined in section 7701(a)(19), or a cooperative bank without capital stock organized and operated for mutual purposes and without profit.

(2) Surplus, undivided profits, and reserves. (i) The phrase "surplus, undivided profits, and reserves" means the amount by which the total assets of an institution exceed the amount of the total liabilities of such an institution.

(ii) For this purpose the term "total assets" means the sum of money, plus the aggregate of the adjusted basis of the property other than money, held by an institution. Such adjusted basis for any asset is its adjusted basis for determining gain upon sale or exchange for Federal income tax purposes. (See sections 1011 through 1022, and the regulations thereunder. For special rules with respect to adjustments to basis for prior taxable years during which the institution was exempt from tax, see section 1016(a)(3) and the regulations thereunder.) The determination of the total assets of any taxpayer shall conform to the method of accounting employed by such taxpayer in determining taxable income and to the rules applicable in determining its earnings and profits.

(iii) The term "total liabilities" means all liabilities of the taxpayer, which are fixed and determined, absolute and not contingent, and includes those items which constitute liabilities in the sense of debts or obligations. The total deposits or withdrawable accounts, as defined in subparagraph (3) of this paragraph, shall be considered a liability. In the case of a building and loan association having permanent nonwithdrawable capital stock represented by shares, the paid-in amount of such stock shall also be considered a liability. Reserves for contingencies and other reserves, however, which are mere appropriations of surplus, are not liabilities.

(3) Total deposits or withdrawable accounts. The phrase "total deposits or withdrawable accounts" means the aggregate of (i) amounts placed with an institution for deposit or investment and (ii) earnings outstanding on the books of account of the institution at the close of the taxable year which have been credited as dividends upon such accounts prior to the close of the taxable year, except that such term, in the case of a building and loan association, does not include permanent nonwithdrawable capital stock represented by shares, or earnings credited thereon.

(e) **Examples.** The provisions of this section may be illustrated by the following examples:

Example (1). (i) Institution X, which keeps its books on the basis of the calendar year, has surplus, reserves, and undivided profits of $800,000 as of January 1, 1955, and total deposits or withdrawable accounts of $10,000,000 as of December 31, 1955. During 1955 the institution credits $30,000, as required by a Federal agency, to a Federal insurance reserve for the sole purpose of absorbing losses. Likewise, it credits $25,000, as permitted by State statute, to another reserve fund for the purpose of absorbing losses. In 1955 Institution X charges $5,000 against its bad debt reserve for losses sustained during the taxable year.

(ii) The taxable income of Institution X for the taxable year 1955, computed without regard to section 593 and without regard to any section providing for a deduction the amount of which is dependent upon the amount of taxable income, is $200,000.

(iii) Upon the basis of the facts as stated in subdivision (i) of this example, the amount by which 12 percent of the total deposits or withdrawable accounts of Institution X at the close of taxable year 1955 exceeds the sum of such institution's surplus, undivided profits, and reserves at the beginning of the taxable year is $400,000 (12 percent of $10,000,000, minus $800,000).

(iv) Institution X, therefore, may deduct, for the taxable year 1955, as an addition to a reserve for bad debts, any amount it may determine that does not exceed the lesser of the amounts determined in subdivision (ii) or (iii) of this example. That amount is $200,000 (as determined in subdivision (ii) of this example). Since under paragraph (c) of this section, the $30,000 credited to the reserve as required by the Federal agency and the $25,000 credited to the reserve as permitted by the State statute are regarded as amounts credited to a reserve for bad debts account Institution X can credit an additional $145,000 ($200,000 minus $55,000) to a general reserve for bad debts account at any time during the taxable year.

(v) The loss of $5,000 charged to the bad debt reserve during the taxable year does not affect the amount of the addition to the bad debt reserve provided for in paragraph (b) of this section. It is of significance only in determining the surplus, undivided profits, and reserves of Institution X as of January 1, 1956.

Example (2). The taxable income of Institution Y for the taxable year 1955, computed without regard to the deduction under section 593 and without regard to any section providing for a deduction the amount of which is dependent upon the amount of taxable income, is determined to be $250,000. The amount by which 12 percent of the total deposits or withdrawable accounts of Institution Y at the close of the taxable year exceeds the sum of such institution's surplus, undivided profits, and reserves at the beginning of the taxable year is $500,000. Institution Y credits $250,000 to its bad debt reserve in 1955. In 1957, it is determined that the correct taxable income of Institution Y for 1955, computed without regard to any deduction under section 593 and without regard to any section

providing for a deduction the amount of which is dependent upon the amount of taxable income, is $275,000 and not $250,000. Assuming that Institution Y credits the additional $25,000 to its bad debt reserve, $275,000 is allowable as a deduction from gross income for such institution for the taxable year 1955.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.593–2 Additions to reserve for bad debts where surplus, reserves, and undivided profits equal or exceed 12 percent of deposits or withdrawable accounts.

Where 12 percent of the total deposits or withdrawable accounts of an institution at the close of the taxable year is equal to or less than the sum of such institution's surplus, undivided profits, and reserves at the beginning of the taxable year, a reasonable addition to the reserve for bad debts as determined under the general provisions of section 166(c) may be allowable as a deduction from gross income. In making such determination, there shall be taken into account (a) surplus or bad debt reserves existing at the close of December 31, 1951 (*i.e.,* the amount of surplus, undivided profits, and reserves accumulated prior to January 1, 1952, and in existence at the close of December 31, 1951), and (b) changes in the surplus, undivided profits, and reserves of the institution from December 31, 1951, until the beginning of the taxable year. A deduction for an addition to the reserve for bad debts pursuant to this section will be authorized only in those cases where the institution proves to the satisfaction of the Commissioner that the bad debt experience of the institution warrants an addition to the reserve for bad debts in excess of that provided in paragraph (b) of § 1.593–1. For definitions, see paragraph (d) of § 1.593–1.

[T.D. 6500, 25 FR 11737, Nov. 26, 1960]

§ 1.593–3 Taxable years affected.

Sections 1.593–1 and 1.593–2 apply only to taxable years beginning after December 31, 1953, and ending after August 16, 1954, but before January 1, 1963, and all references to sections of the Code are to the Internal Revenue Code of 1954 before amendment by the Revenue Act of 1962. Sections 1.593–4 through 1.593–11 apply only to taxable years ending after December 31, 1962, and all references to sections of the Code are to the Internal Revenue Code of 1954 after amendment by the Revenue Act of 1962.

[T.D. 6728, 29 FR 5857, May 5, 1964]

§ 1.593–4 Organizations to which section 593 applies.

The provisions of section 593 and §§ 1.593–5 through 1.593–11 (except subsection (f) of section 593 and § 1.593–10) apply to any mutual savings bank not having capital stock represented by shares, any domestic building and loan association, and any cooperative bank without capital stock organized and operated for mutual purposes and without profit. The term "thrift institution", as used in this section and §§ 1.593–5 through 1.593–11, refers to any such financial institution. For definition of the terms "domestic building and loan association" and "cooperative bank", see paragraphs (19) and (32), respectively, of section 7701(a).

[T.D. 6728, 29 FR 5857, May 5, 1964 as amended by T.D. 7549, 43 FR 21454, May 18, 1978]

§ 1.593–5 Addition to reserves for bad debts.

(a) Amount of addition. As an alternative to a deduction from gross income under section 166(a) for specific debts which become worthless in whole or in part, a thrift institution is allowed a deduction under section 166(c) for a reasonable addition to a reserve for bad debts. In the case of a thrift institution, the amount of the reasonable addition to such reserve for a taxable year may not exceed:

(1) For taxable years beginning after July 11, 1969, the sum of (i) the amount determined to be the reasonable addition to the reserve for losses on nonqualifying loans, determined in the same manner as is provided with respect to additions to the reserve for losses on qualifying real property loans under paragraph (d) of § 1.593–6A (relating to the experience method), and (ii) the amount determined under § 1.593–6A to be the reasonable addition to the reserve for losses on qualifying real property loans, or

(2) For taxable years beginning before July 12, 1969, the sum of (i) the amount determined under § 1.166–4 to be the reasonable addition to the reserve for losses on nonqualifying loans, and (ii) the amount determined under § 1.593–6 to be the reasonable addition to the reserve for losses on qualifying real property loans.

(b) Crediting to reserves required—(1) In general. The amounts referred to in paragraph (a)(1) and (2) of this section must be credited, respectively, to the reserve for losses on nonqualifying loans and to the reserve for losses on qualifying real property loans by the close of the taxable year, or as soon as practicable thereafter. For rules with respect to accounting for such reserves see paragraph (a)(2) of § 1.593–7.

(2) Subsequent adjustments. If an adjustment with respect to the income tax return for a taxable year is made, and if such adjustment (whether initiated by the taxpayer or the Commissioner) has the effect of permitting an increase, or requiring a reduction, in the amount claimed on such return as an addition to the reserve for losses on nonqualifying loans or to the reserve for losses on qualifying real property loans, then the amount initially credited to such reserve for such year pursuant to subparagraph (1) of this paragraph may have to be increased or decreased, as the case may be, to the extent necessary to reflect such adjustment.

(c) Transition year. For rules governing the computation of taxable income in the case of a taxable year beginning in 1962 and ending in 1963, see § 1.593–9.

[T.D. 6728, 29 FR 5857, May 5, 1964, as amended by T.D. 549, 43 FR 21455, May 18, 1978]

§ 1.593–6 Pre-1970 addition to reserve for losses on qualifying real property loans.

(a) In general. For purposes of paragraph (a)(2)(ii) of § 1.593–5, the amount of the addition to the reserve for losses on qualifying real property loans for any taxable year beginning before July 12, 1969, is the amount which the taxpayer determines to constitute a reasonable addition to such reserve for such year. However, the amount so determined for such year—

(1) Cannot exceed the largest of the amounts computed under one of the three methods described in paragraph (b), (c), or (d) of this section (relating, respectively, to the percentage of taxable income method, the percentage of real property loans method, and the experience method),

(2) Cannot exceed the maximum permissible addition described in paragraph (e) of this section (if applicable), and

(3) Shall be determined without regard to any amount charged for any taxable year against the reserve for losses on qualifying real property loans pursuant to § 1.593–10 (relating to certain distributions to shareholders by a domestic building and loan association).

For each taxable year the taxpayer must include in its income tax return for such year a computation of the addition under this section. The use of a particular method in the return for a taxable year is not a binding election by the taxpayer to apply such method either for such taxable year or for subsequent taxable years. Thus, in the case of a subsequent adjustment described in paragraph (b)(2) of § 1.593–5 which has the effect of permitting an increase, or requiring a reduction, in the amount claimed in the return for a taxable year as an addition to the reserve for losses on qualifying real property loans, the amount of such addition may be recomputed under whichever method the taxpayer selects for the purposes of such recomputation, irrespective of the method initially applied for such taxable year. However, a taxpayer may not subsequently reduce the amount claimed in the return for a taxable year for the purpose of obtaining a larger deduction in a later year.

(b) Percentage of taxable income method—(1) In general. The amount determined under the percentage of taxable income method for any taxable year is an amount equal to 60 percent of the taxable income for such year, minus the amount determined under § 1.166–4 as a reasonable addition for such year to the reserve for losses on nonqualifying loans. However, the amount determined under such method shall not exceed the amount necessary to increase the balance (as of the close of the taxable year) of the reserve for losses on qualifying real property loans to an amount equal to 6 percent of such loans outstanding at such time.

(2) Taxable income defined. For purposes of this paragraph, taxable income shall be computed—

(i) By excluding from gross income any amount included therein by reason of the application of § 1.593–10 (relating to certain distributions to shareholders by a domestic building and loan association);

(ii) Without regard to any deduction allowable under section 166(c) for an addition to a reserve for bad debts;

(iii) Without regard to any section providing for a deduction the amount of which is dependent upon the amount of taxable income (such as section 170, relating to charitable, etc., contributions and gifts), other than sections 243, 244, and 245 (relating to deductions for dividends received); and

(iv) Without regard to any net operating loss carryback to such year under section 172.

In computing the deductions under sections 243, 244, and 245, section 246(b) (relating to limitation on aggregate amount of deduction) shall not apply. For purposes of subdivision (iii) of this subparagraph, a net operating loss deduction under section

172 is not a deduction the amount of which is dependent upon the amount of taxable income.

(c) **Percentage of real property loans method—(1) General rule.** The amount determined under the percentage of real property loans method for any taxable year is the amount necessary to increase the balance (as of the close of such year) of the reserve for losses on qualifying real property loans to—

(i) An amount equal to 3 percent of such loans outstanding at such time, plus

(ii) In the case of a taxpayer described in subparagraph (2) of this paragraph, an amount equal to—

(a) The lesser of 2 percent of such loans outstanding at such time, or $80,000, reduced (but not below zero) by

(b) The balance as of the close of such year, if any, of such taxpayer's supplemental reserve for losses on loans.

(2) **Certain new companies.** (i) Subparagraph (1)(ii) of this paragraph applies only in the case of a taxpayer which is a new company, and which does not have capital stock with respect to which distributions of property (as defined in section 317(a)) are not allowable as a deduction under section 591.

(ii) For purposes of this subparagraph, a taxpayer is a new company for any taxable year only if such year begins not more than 10 calendar years after the first day on which such taxpayer, or any predecessor of such taxpayer, was authorized by Federal or State law to do business as (a) a mutual savings bank not having capital stock represented by shares, (b) a domestic building and loan association, (c) a cooperative bank without capital stock organized and operated for mutual purposes and without profit, or (d) any other savings institution chartered and supervised as a savings and loan or similar association under Federal or State law.

(iii) As used in subdivision (ii) of this subparagraph, the term "calendar year" has the meaning assigned to such term in section 441 (relating to the period for computation of taxable income); and the term "predecessor" means any organization which transferred more than 50 percent of the total amount of its assets to the taxpayer, and which, prior to the time of such transfer, was (a) authorized by Federal or State law to do business as a mutual savings bank not having capital stock represented by shares, a domestic building and loan association, or a cooperative bank without capital stock organized and operated for mutual purposes and without profit, or (b) any other savings institution chartered and supervised as a savings and loan or similar association under Federal or State law. The term "predecessor" also means any predecessor of such predecessor.

(d) **Experience method.** The amount determined under the experience method for any taxable year is the amount determined under § 1.166–4 to be a reasonable addition for such year to the reserve for losses on qualifying real property loans.

(e) **Maximum permissible addition where percentage of taxable income method or percentage of real property loans method is applied—(1) 12 percent of deposits limitation.** If, for the taxable year, the taxpayer uses either the percentage of taxable income method described in paragraph (b) of this section or the percentage of real property loans method described in paragraph (c) of this section, then (unless subparagraph (2) of this paragraph applies) the maximum permissible addition for such year is equal to the lesser of:

(i) The amount determined under such paragraph (b) or (c), or

(ii) An amount which, when added to the amount determined under § 1.166–4 as an addition for such year to the reserve for losses on nonqualifying loans, equals the amount by which 12 percent of the total deposits or withdrawable accounts of depositors of the taxpayer at the close of such year exceeds the sum of the taxpayer's surplus, undivided profits, and reserves at the beginning of such year (taking into account any portion thereof which is attributable to the period before the first taxable year beginning after December 31, 1951).

For definition of the terms "surplus, undivided profits, and reserves" and "total deposits or withdrawable accounts", see paragraph (f) of this section.
